10 *Proceedings.*

Commissioner Harlan: Gentlemen, I wish first to suggest that all who are here representing any interest that is involved in this proceeding will be good enough to file their appearances with the reporter at some time during the day. It is desirable that the record should show just who are here and who are interested. Another thing that I would like all to observe is this: The stenographer does not know all who are here and all who may address the Commission on this occasion. He suggests, and I hope you will bear it in mind when any one rises to address the Commission they will first give their names to the stenographer, and it might be well to say what interest they represent.

I shall be glad now to have any suggestions as to procedure. I assume counsel perhaps have given that matter some consideration, and I would be glad to know whether the suggestions have been formulated as to how we shall proceed with this matter. Of course it is understood that the Star Grain and Lumber case is here, also all the special cases that have been filed by the tap lines. It is the purpose of the Commission to make one record, which shall be considered as attached to the record in the Star Grain and
11 Lumber case, and also will be a record for the individual cases that are to be presented.

Have counsel any suggestions to make as to how we shall proceed to make up this record?

Mr. Glasgow: Mr. Commissioner, I represent the Butler County Railway Company. Counsel who have been representing the numerous short lines who are here have been somewhat embarrassed in making any suggestion as to procedure, because they did not know exactly what the views of the Commission were in connection with this hearing. They have considered as far as I know, both separately as far as their lines are concerned, and generally, the subject of this inquiry; and upon one question they have appointed a committee to present a motion to your Honor this morning as to a matter which occurs in the record, which I will now, if your Honor will permit me, ask to spread on the record at this time.

There has been a petition filed in this cause styled the supplemental petition of the Miller Link Lumber Company and others. As I understand the situation, the Star Grain case has been reopened for taking further evidence, and that it has been combined and consolidated with the special petitions of short line roads, which have been filed with the Commission, all to be
12 heard at this time before your Honor.

The scope of the Star Grain case was that certain complaints filed with the Commission a petition to reestablish through routes and joint rates which had been withdrawn by the carrier, the Atchison, Topeka & Santa Fe Railway Company. Upon that inquiry the Commission delivered an opinion and subsequently reopened the case or considered it further, taking into consideration the general question of division of rates between short line railroads and the trunk lines, and whether joint rates and through routes should be established, and that, as we understand it, is the inquiry that is now before the Commission for investigation. The petition to which I have alluded undertakes in this inquiry to extend the investigation far beyond any question which was in the Star Grain case or any question made by the special petition. Therefore, this committee, who represent or who are acting for all of the counsel here, because it was inconvenient for them all to make the motion, desire to present this motion, which I will read, if your Honor will permit me:

"Now come all short line railway companies and all owners of short line railways, cited to appear at this hearing and now move the Commission to strike from the record in this cause all
13 of the supplemental petition filed herein by Miller Link Lumber Company, et al, except so much thereof as charges that division of through rates between the trunk line railways and the short line railways is in violation of the second and third sections of the Act to Regulate Commerce.

"And in order that the above motion and the reasons therefor may be made more specific it is further moved—

"1. That section 3 of said supplemental petition filed herein by Miller Link Lumber Company, et al., be stricken from this record, for the reason that by said section 3 there is thrust into this case questions which cannot properly be considered, upon the citation which parties are required to answer upon a re-opening of the case of Star Grain & Lumber Company, et al., versus A. T. & S. F. Railway Company, et al., No. 1319, and the other cases assigned for hearing this day therewith since by said petition it is sought to have the Commission pass upon all 'rates of freight on lumber and saw mill products, now in effect from points on the lines of said railways in Louisiana, Arkansas and Texas to interstate destinations in the States of Oklahoma, Colorado, Kansas, Missouri, Iowa, Nebraska, and other interstate destinations' and this upon the insuf-
14 ficient charge that such rates 'are unjust and unreasonable per se and relatively as compared to the rates of freight which the owners of the saw mills and shippers who receive such divisions of the rates are accorded.'

"2. That section 5 of said petition should be stricken from the record in that it undertakes without any definite or distinct allegations of fact or without giving information as to what specific objection petitioners may have as to rates, to have this Commission 'consider the entire body of rates on lumber from Louisiana, Arkansas and Texas as well as the regulations and practices pertaining to such transportation and to the rates' and to thrust said *omnibus*, indefinite and unlimited inquiry into cause No. 1319 aforesaid.

"3. That said petition undertakes to inject into this cause and inquiry into the legality or propriety of Group Rates, which has no place in the investigation upon which the Commission is engaged in cause No. 1319 aforesaid, and especially in that there are no specific and definite allegations as to what Group Rates petitioner charges to be illegal and the reasons therefor, and paragraph 3 of the prayers of said petition should be stricken from the record
15 for the above reason and because same is indefinite and uncertain.

"4. That paragraph 1 of the prayers of said petition be stricken from the record, because it asks to inject into cause No. 1319 aforesaid matters which cannot properly be considered therein.

"5 That paragraph No. 4 of the prayers of said petition be stricken from the record, in that it asks the Commission to give notice of an *omnibus* "investigation of all the interstate rates from Texas points to interstate markets on lumber and lumber products, together with the tap line divisions and other allowances, regulations, practices and rates applicable to the lumber and logging traffic in the same manner and to the same extent as the same subject shall be involved with respect to the rates, regulations and practices from said points in Louisiana and Arkansas,' and the facts alleged and the section aforesaid are so indefinite that the Commission cannot properly base an investigation or an order thereon.

"6. That paragraph 5 of the prayers of said petition be stricken from the record as the same is too indifinite and uncertain to enable parties interested in this proceeding to understand definitely the relief asked and the Commission can not properly base an
16 investigation or order thereon.

"7. If investigation is to be had on a complaint as indefinite as the petition above referred to, then the effect thereof would be to deny to parties interested a proper hearing in that they would have no definite and specific information as to the grounds of complaint and necessarily could not prepare their defense thereto.

WM. A. GLASGOW, JR., *Philadelphia;*
EDGAR H. FARRAR, *New Orleans;*
H. W. SEAMAN, *Chicago;*
C. L. MARSHALL, *Memphis;*
WALTER H. SAUNDERS, *St. Louis,*
Committee of Counsel Representing Short Line Railroads Cited to Appear."

Now, sir, I think, and the committee think, that the case of the National Petroleum Association against Ann Arbor Railroad Company settles the question as to this petition, 14 I. C. C. Reports. Your Honor is no doubt familiar with the case. In that case a petition very much of the same character as this, undertaking to charge that all the rates in a certain district were unreasonable and unjust, just as this undertakes to charge, that all rates
17 from Texas, Arkansas, and Missouri to all the points in Colorado and the other states of the Union are unjust and unreasonable, was filed; and the Commission says:

"Then it must follow that we are asked by complainant to reduce by one sweeping order thousands and perhaps hundreds of thousands of rates concerning which no specific complaint has been made and not one syllable of evidence offered. To quote the language used in Dallas Freight Bureau versus M. K. & T. Ry. Co., 12 I. C. C. Rep. 427: 'The case seems to have been thrown together as if the Commission only needed to have an opportunity presented to it to take favorable action. * * * We are authorized under the Act to order a reduction in rates only when it is made to appear that they are unjust or unreasonable or unjustly distriminatory or unduly perferential. But inasmuch as this proceeding is undoubtedly maintained in good faith upon the belief that the Commission can, within the powers conferred upon it by law, and from the evidence in this record, grant the relief prayed for, it may be well to state here some of the insuperable difficulties involved in an omnibus complaint of this nature,' and they go on to discuss it.
18 "We can make no such wholesale order as is prayed for in this proceeding. If any of these rates are excessive or operate to effect forbidden discriminations, as may be the case, they are the rates of one or more carriers against which a definite and specific complaint can be directed," and the Commission in that case dismissed the complaint of the National Petroleum Company and required them to come in, as they subsequently did, with specific charges as to specific rates.

Now, the committee make this motion. We do not want to go beyond the inquiry which is legitimately and properly before the Commission, and we make this motion before your Honor on the record. I do not know whether your Honor will feel like passing upon it at this time, but before going into any of the questions involved on that, if your Honor does not pass on it, we should ask that your Honor refer the motion to the Commission to be passed upon before we go to the expense of going into the record on that question.

Commissioner Harlan: Is counsel here representing the petition? I think it was filed by Judge Cowan.

Mr. Cowan: Yes, your Honor.

Commissioner Harlan: Have you any suggestions to make in response to the motion?
19 Mr. Cowan: The motion of Mr. Glasgow is to postpone the case until the allegations can be made sufficiently definite to inform the parties interested of what rates we complain, and

that we shall not be permitted to inject into the case an investigation of any rates which were not embraced in the original case of the Star Grain and Lumber Company, and that we shall not investigate any questions except the questions involved in that case. As I understand Mr. Glasgow, he wants the Commission and your Honor to postpone the hearing of this case in order that they may ascertain whether these questions may be heard in this case, so they will not have to go to the expense of making preparation for trial. It is like the application in a criminal case for the continuance of such a trial on the ground of the absence of the witnesses, who are really in the vicinity of the court house. The Commission under the present law has ample and complete power to investigate any matter that pertains to the matter of the complaint or the rates complained of. The Act of 1910 gives the Commision ample power in that particular, and it may investigate without a complaint and on its own motion. The law does not require that the Commission specify with the certainty of an indictment just what the subject matter is in all particulars, but only generally. I take it that the motion is without any foundation, legally speaking, because of the power conferred upon the Commission by the Act of Congress of 1910. The petition seeks in this case to adjust the rates for the purpose of preventing those discriminations as to which the Commission made its decision in the Star Grain and Lumber case, the object being to embrace the question of reasonableness per se and the relative reasonableness of the rates, as well as matters pertaining to discriminations, to rebates and to practices concerning the handling of traffic, the making of the application of the rates or the division of the rates. Whether the petition is as aptly drawn as my friend, Mr. Glasgow, might draw it, and whether it sets out in detail to inform those who are present of the matter that is intended to be reached by virtue of the petition calling the Commission's attention to the situation, I do not know; I probably could have drawn it a great deal better, but it was sufficient, at least, that when the petition is served upon these gentlemen it has brought together the largest aggregation of good looking and intelligent and wealthy gentlemen who are participating in these advantages that I have ever seen, by a petition containing as little as Mr. Glasgow says it contains. It brought him down here representing a cooperage company and not a lumber company, from Philadelphia, and it seems very strange, in view of what your Honor sees before you, that these gentlemen should contend that the petition was not sufficient to inform these gentlemen what the subject matter intended to be reached, is about. I think the petition has ample evidence now before your Honor that it has reached all the purposes of a petition that could be drawn by a Philadelphia lawyer, however much better it might be than one drawn by a gentleman from Texas.

Mr. Glasgow: The question is not who drew the petition, but when my friend undertakes to look around over this audience and say this petition has brought them here, the truth of the business is, a great many of these distinguished and good looking gentlemen

he has referred to never heard of this petition until they got here. He has misinterpreted this motion——

Commissioner Harlan: I assume, after the compliment Judge Cowan has paid to the assemblage, that no one wants action on your motion at this time.

Mr. Glasgow: No, sir; I do not suppose you will pass upon it now.

22 Commissioner Harlan: We will reserve that question for the Commission. I think it proper, however, to say that in addition to the notice that has been given, that the Commission expects at this time to have a record that will enable it to proceed on the intimations made by the Commission in the Star Grain and Lumber case. The Commission has before it also the numerous petitions of particular lines which bring that same general question in issue; and in addition, the Commission has suspended the action of the carriers cancelling the so-called tap line allowances, and the investigation of the propriety of the carriers in that regard is here before us. So that I may say, for the Commission, and after a conference with the Commission, that it hopes at this time to make a record that will be sufficient basis for such action as may be necessary on this whole question.

Mr. Glasgow: Do you mean of the division of rates to carriers?

Commissioner Harlan: The division of rates and lawful allowances in all cases and in particular cases, and in the propriety of the action taken by the carriers in cancelling allowances. Now, I should regard it, and that is the view of the Commission, as most unfortunate if any attitude is assumed here, either by the tap

23 lines, or by the regular lines, or by the lumber interests, that will impair the sufficiency of this record as the basis for a disposition of the whole question.

Mr. Glasgow: I have not done that, and neither does this motion put it in that attitude. But we cannot be put in the attitude of being in any way attempting to limit the inquiry of the Commission. But your Honor recognizes that the question of reasonableness per se of rates from Texas to Louisiana and Arkansas is a very different question from what has been considered in this case, and we do ask that before you go into the questions of the breadth suggested by this supplemental petition, that if your Honor does not feel like passing upon it alone before you go into it, we have that matter submitted to the Commission for its order in that connection, because it opens up a breadth of examination that no Commission, in my judgment, can possibly pass on in one case, it is utterly impossible. Therefore, I do not think that the committee can expect your Honor to pass upon it, but we do not want to go into that thing without having it submitted to your honor to consider it at your leisure.

Commissioner Harlan: Your motion is of record, and you

24 have heard my statement made in behalf of the Commission, and I think all questions growing out of the motion may be reserved for the action of the Commission.

Mr. Garwood: In behalf of the lines which I represent, I wish to [redacted] that in view of the course of this investigation, and in view

of the shortness and insufficiency of the notice of this supplemental petition, it had not occurred to us that the reasonableness of the lumber rates from the territory mentioned to the consuming territory would be considered, as to the reasonableness per se of those rates, and we are utterly unprepared with testimony to maintain those rates, if they are to be attacked. I think that I state almost a truism when I say it has never occurred to any of the main lines, the trunk lines, that here we would be called upon to meet the charge that the rates were unreasonable, and we are not prepared to do it.

Commissioner Harlan: Let me interrupt you for a moment, Mr. Garwood. The view of the Commission is, as I think I correctly interpret it, that the purpose of the supplemental petition was not to bring before the Commission the general question of the reasonableness of the lumber rates from those territories, but only
25 the particular question as to the reasonableness in view of the allowances made to tap lines. I assume that counsel who filed the petition is not prepared to go beyond that phase of the question of reasonableness. And it occurs to me, as I assume that it would be acceded by you, that there will be a sufficient basis here for the determining of the reasonableness of lumber rates from that point of view.

Mr. Garwood: As a mere collateral or incidental question——

Commissioner Harlan: As a question growing out of the whole matter of allowances made by regular lines to tap lines, the state of those allowances, and the effect that those allowances have upon the net revenues of those carriers. I assume we will have no difficulty in proceeding upon that general basis, and I assume that counsel does not expect at this time to go beyond that.

Mr. Cowan: Your Honor has correctly stated the view that we hold, for the petitioners, and the object of filing it. We did not expect to go into the general question of the rates per se; that is, put in the formal allegation of the petition like in the filing of an indictment.

Mr. Peirce: I would like to state my view of the situation
26 in view of this supplemental petition. I think your Honor has stated about as clearly as could be, my own understanding of this supplemental petition. Now, the Rock Island was not a party to the Star Grain and Lumber case, and has never been made a party to it, to my knowledge, and no copy of this petition has ever been served upon us. Now, the situation, as I understand it, is simply this: that there has been a controversy pending in Texas by many of the Texas lumber producers that the payment of these allowances in Arkansas and Louisiana resulted in discrimination against the Texas people who were not getting these allowances directly or indirectly, and a petition was filed before the Texas Commission asking that the local rates in Texas be reduced to offset these divisions in Arkansas and Louisiana, and that the Texas people have never made any contention as to the rates in and of themselves, but simply that the payment of these divisions in Arkansas and Louisiana resulted in a discrimination, which, if removed or cancelled, satisfied their complaint. Now, when the main lines, like the Rock Island and the Missouri Pacific and the others filed these petitions cancelling

the divisions with the short lines, the Commission suspended
27 these cancellations; and while I have never known just precisely the theory upon which it was done, I have understood in a general way, and I think perhaps now in an authoritative way, that it was done for the purpose of determining whether these cancellations were proper or not——

Commissioner Harlan: That is not quite the basis of the action of the Commission, as I understand it. It was done because the Rock Island in a case in court, had permitted or secured, or at any rate, the results were had in court as to produce a discrimination if the rest of the rates were not suspended.

Mr. Peirce: The noise outside, your Honor, prevented me from hearing.

Commissioner Harlan: Well, it was done as the result of a proceeding against the Rock Island in court, in which such action was taken as would result in a discrimination unless the suspension was made general.

Mr. Peirce: What action do you refer to?

Commissioner Harlan: I do not think it worth while to refer to it. You were there and argued the case, as I understand. However, I do not think it worth while to go into the reasons of the
28 Commission in taking that action. It did take it, and this is the situation.

Mr. Peirce: I was just stating my understanding, and was about to conclude. The petition filed by Mr. Cowan, as stated by your Honor, was simply to restate the petition of the Texas shippers, that these allowances in Arkansas and Louisiana were improper, and resulted in a discrimination, and the only effect of this petition was to raise the question squarely before the Commission and put them on the record in order to be heard here on the question of the propriety of these allowances, and that that is the question that is now before the Commission. After all, these lines are here, and I understand they are all here by their counsel and want to be heard, and make their cases, and the Commission, after hearing the evidence, may decide that the action of the main lines in cancelling these divisions was improper and that these lines are lines entitled to share in these rates, and if they do decide that, it seems to me the only necessary conclusion is that the petition of Mr. Cowan must be dismissed. If, on the contrary, the Commission holds these divisions are improper, then, of course, they will be permanently cancelled, and in that way Mr. Cowan's petition will be satisfied and no further action than the permanent cancellation of divis-
29 ions will be necessary. Now, that is the issue, as I understand it, that is to be heard by the Commission here at this time.

Commissioner Harlan: Mr. Peirce, I do not see how I can make the statement any clearer than I have endeavored to make it. You have overlooked the second hearing in this city on the tap line question. Now, if you will remember, the issue in the Star Grain and Lumber case was so enlarged in the second hearing as to bring before the Commission the entire question of tap line allowances, whether

in Arkansas, Louisiana or Texas, and the Rock Island, if I mistake not, was present on that occasion.

Mr. Peirce: Well, we were present——

Commissioner Harlan: The Commissioner certainly regards the Rock Island as being before it on this occasion.

Mr. Peirce: I do not think there is any question but what the Rock Island is here, and I do not think there is any question but what the Rock Island is a party to the record, and I do not want your Honor to understand I am going to raise any technical objection. But at the first hearing in New Orleans, the Star Grain case was set down for hearing; to which the Rock Island was not
30 a party, and also the other cases known as the Chicago Coal and Lumber cases, to which the Rock Island was a party. They were all assigned for hearing before the Commission at New Orleans, in this room, and we all appeared here in those cases and introduced evidence, and the record was made one, and the evidence was treated in both cases, but separate opinions were rendered in those cases, and I do not know of any order that was ever made consolidating those cases. However, I do not desire and will not. If it becomes necessary to get in the Star Grain and Lumber case, in order to let the Commission go ahead, I think we shall do it. I do not want to take any position that would in any way obstruct this proceeding, and will not do it, and if necessary, I think we would enter our appearance if you wanted it entered, in order to proceed with this record in this case.

Commissioner Harlan: I think probably counsel will do that, at any rate, there can be no misunderstanding. The whole tap line question is here, and as I understand it, counsel understands the Rock Island is a party to that question.

Mr. Peirce: I do not rise to object to the jurisdiction of the Commission, but simply for the purpose of stating my under-
31 standing of the issues before the Commission.

Commissioner Harlan: If your understanding is any narrower than that, I think you are wrong. The Commission understands that the tap line question is before it in all of its aspects in this hearing, and we expect a record to be made, and we want the co-operation of every one in making a record that will enable the Commission to dispose of that question.

Mr. Peirce: Well, you say the tap line question, in all of its aspects, and I take it that is the propriety of making the divisions to the tap lines in each and all of the cases.

Commissioner Harlan: The propriety of making the divisions generally and in individual cases, and also the question intimated very clearly by the Commission in the Star Grain and Lumber case, whether there ought not to be a reduction of the rate; so that the matter may rest on the net revenues of the carriers.

Mr. Peirce: Yes, sir. Now, if the position of the Commissioner is correct, that there ought to be a readjustment of the rates if the tap line divisions are cancelled, it is impossible for us to give any

consideration to that question until after the tap line ques-
32 tion is settled, because we do not know what divisions you are going to allow or what you are not going to allow, and it is impossible for us to give any consideration to that, and impossible for us to introduce any evidence on that, because we do not know what the decision of the Commission is ultimately going to be, after you hear the evidence of all these gentlemen here as to their individual roads. You may decide, after you hear the evidence, that the situation will remain as it is today. If you do, I take it there would not be any readjustment of the rates under the intimation of the Commission in the Star Grain and Lumber case, and I do not see how the Commission could very well expect us to introduce evidence on the question of the readjustment of rates on the assumption that tap line divisions are cancelled, because we do not know what the Commission is going to decide, and we do not know what the result of that phase of the controversy is going to be.

Commissioner Harlan: Well, I assume, Mr. Peirce, that there will be abundant opportunity before the Commission to present your views on this particular question as well as on the general question, and I can see that on any suggestion made by counsel that this question will be considered by the Commission. As to
33 whether it is desirable to have your line introduce further testimony, all those matters can come forward for decision by the Commission after we have made this record.

Mr. Glasgow: Your Honor's statement of what is here today is practically satisfactory to us, so far as I am concerned; that is, all the questions involved in the allowances to tap lines are to be considered. We make our motion and I expect we will have an opportunity for hearing on that. We are not complaining of the breadth of this petition as filed as a supplemental petition at this time. That is reasonably satisfactory. Now, not as a member of the committee, but as counsel for a single client, I want to suggest to your Honor as to the method of procedure. The tariffs have been filed in the case I particularly represent by the St. Louis & San Francisco, and by the Missouri Pacific, cancelling the former rates in effect from points on the Butler County Railroad to destination, and putting in effect new rates, which new rates are an increase over the rates formerly paid, or under the tariffs cancelled out. The petition was filed by the Butler County Railroad Company attacking the cancelling tariffs as unjust and unreasonable, and asking for joint rates and through routes in division of the rates be-
34 tween the two carriers, alleging that the Butler County Railroad Company is a common carrier. Now, upon that petition, and I take it that the others are practically the same, the first inquiry arises as to whether the tariffs which your Honors have suspended and whether the rates thereunder, are reasonable and just, and upon that the burden of proof is upon the railway companies to justify what is an increased rate. That is a matter of procedure now. Second, the question comes up whether there shall be joint rates and through routes and divisions thereof. The question arises on the threshold whether the Butler County Railroad is a common

carrier, and if so, what should be the rates and divisions thereof, and therefore, I suggest to your Honor that the question of procedure now should be, first, that as to the tariffs which have been suspended, and the reasonableness of the increased rates which have been filed, that the carriers should now assume the burden of establishing the justness of the rates which are increased, for the service rendered.

Commissioner Harlan: Where is the Butler County Railroad?

Mr. Glasgow: It runs from a place called Poplar Bluff in either Arkansas or Missouri——

35 Mr. Jeffery: In Missouri.

Mr. Glasgow: To a connection with the Iron Mountain and the Frisco Road, for about thirty-five miles towards the Arkansas line in a general way south.

Commissioner Harlan: Have you had allowances heretofore?

Mr. Glasgow: We do not state it that way.

Commissioner Harlan: I do not want to commit you, but we want to get along. Did you get something from the regular lines?

Mr. Glasgow: We got a division of the through rates.

Commissioner Harlan: Very well, call it what you like, division or allowance; that is what you got?

Mr. Glasgow: Yes.

Commissioner Harlan: Now, the new tariffs cancelled that?

Mr. Glasgow: Yes, sir.

Commissioner Harlan: And at the same time raised the rates?

Mr. Glasgow: Put in the rate from the junction the same as it was from the Butler County Railroad, which is an increased rate on shipments from the Butler County Railroad.

Commissioner Harlan: Then you stand practically as all the other lines here?

Mr. Glasgow: I think so.

36 Commissioner Harlan: And on that question the Commission understands that the regular lines, in pursuance of the intimations by the Commission in the Star Grain and Lumber case, filed these tariffs cancelling the allowances. Now, these tap lines filed their petitions asking for their restoration. We want all the information that we can get on that question from the particular carriers, and we are not going to stop very long this morning to determine the question of where the burden of proof is, or whether it is an increased rate or not.

Mr. Glasgow: I am trying to bring out of this chaos some method of procedure.

Commissioner Harlan: I do not think there is any chaos.

Mr. Glasgow: I am talking about the chaos we had yesterday, when your Honor was not here, because there was a great variety of opinion as to what we were to do. Now, I suggest, in order to try and get along—I am not trying to obstruct anything——

Commissioner Harlan: I assume you are not.

Mr. Glasgow: What I say is that the petition attacks the rates which are now filed as unreasonable, and when that question comes

up, I suggest the burden would be upon the carriers to pro-
37 ceed with the inquiry. When it comes to the question of the allowance or division of rates, or whether the joint rates should be established, the individual short line must proceed to present its case.

Commissioner Harlan: That has been understood.

Mr. Glasgow: And I merely suggest that as the method of procedure.

Commissioner Harlan: We are trying to make a record on the general question, and not on the individual cases.

Mr. Peirce: Right on that point, we are not parties to the Butler County case——

Mr. Glasgow: Yes, you are.

Mr. Peirce: If we are, then that serves as an illustration. I do not understand in these petitions filed by the short lines, any question is raised as to the reasonableness of rates. Those petitions are filed asking the restoration of through rates, and therefore, Mr. Glasgow is wholly wrong and illogical in his position, in stating that any burden of proof rests upon the main carriers here to establish the reasonableness of an increased rate. They did not increase the rate, but merely cancelled a through rate with one of their connections, in view of this understanding of the intim-
38 ation of the Commission in the Star Grain case, and now that short line comes and says to the Commission that the main line has improperly cancelled that through rate, and we ask the restoration of the through rate, but the only question now is whether that cancellation was improperly made, and if the Commission finds it was improperly made, then I take it that the through rate will be immediately re-established, in accordance with whatever the finding of the Commission may be.

Commissioner Harlan: Mr. Peirce, I do not understand there is any substantial difference between your view and that suggested by Mr. Glasgow, and the view I have endeavored to express for the Commission. We shall not at this time discuss whether the 24 cent rate from Texas to Kansas City is or is not a reasonable rate. We shall at this time expect to make a record which will enable the Commission to determine whether any part of that rate is to go to the tap line as a general proposition, and to the particular tap line that contests that rate as a particular proposition.

Mr. Peirce: That is exactly as I understand it.

Commissioner Harlan: Now, there can be no misunderstanding as to what we are here for.

39 Mr. Peirce: I agree fully with that, and will proceed on that line.

Mr. McRae: I represent the Prescott & Northwestern Railroad, and we have filed a complaint against the St. Louis, Iron Mountain & Southern, and against the Kansas City & Southern Railway Company for the cancellation of the rates. We are among the first on the docket, and I would ask of your Honor, if you have determined the order in which these special complaints shall be heard. We

are here with our witnesses, prepared to give the Commission such information as we have touching our transportation questions.

Commissioner Harlan: Mr. McRae, before taking up that question, I want to make an addition, Mr. Peirce, to the statement I last made, which was incorporated in some remarks I had previously made on the question of the reasonableness of the rate, to the extent that the rate may be unreasonable because of the allowances or divisions being made to tap lines, that question of reasonableness is before us, but no other question. I have stated that in several different ways, and in making my last statement I neglected to complete it by calling attention again to that phase of the matter, which the Commission believes is now before it.

40 Mr. Jeffery: Do I understand from that that for instance the 18 cent rate from the lumber territory to St. Louis will be attacked and the burden on us to defend that 18 cent rate as it stands? I am doing this sincerely, because I could not quite get your idea on that point.

Commissioner Harlan: I am going to ask counsel to confer with other counsel on that point.

Mr. Jeffery: I will do that, but I did not understand.

Commissioner Harlan: I set it forth as clearly as I could, and I am going to leave the question now with this assemblage, and let us go ahead.

Mr. Glasgow: Some of the gentlemen here have not filed petitions for their specific lines, and I think it would clarify the subject if your Honor would state, as I suppose is the rule, that they may introduce evidence as to their lines without having formally filed a complaint.

Commissioner Harlan: It was so understood with counsel representing a number of these lines at Washington, that they need not burden the record with separate petitions, but that everyone here that wanted to go into this record would have liberty to do so without a formal petition. We have asigned first for hearing the case of the Red River & Gulf Railroad against the Rock

41 Island. That case went into court, and was referred by the court to the Commission, and we thought it desirable, under those conditions and as a courtesy to the court, that that case be disposed of first. I would like to know who is here representing that road.

Mr. Farrar: We represent the Red River & Gulf, but I think your Honor is mistaken in saying the court referred that case to the Commission. The appeal was dismissed voluntarily because the defendant came in and pleaded——

Commissioner Harlan: Aside from the question, we have assigned that case first, and if you are ready to go ahead, we will go ahead with this.

Mr. Marsilliot: Mr. Commissioner——

Mr. Farrar: It will be necessary for us to send out and get our books and papers.

Commissioner Harlan: I hope counsel will be ready when their case is called. I make no criticism of this particular case, but I

hope hereafter all books and papers and witnesses will be on hand when the case is called.

Mr. Farrar: We would have been ready, but my client's train was delayed.

Mr. Marsilliot: In order that we may facilitate the move-
42 ment of the Commission, and carry out the suggestion your Honor has just made, and which we think was a most excellent one, I would like to repeat Mr. Glasgow's question, as to whether or not your Honor has fixed any order that these cases may be set, in order that we may be ready, and all of us may be ready as fast as they are called.

Malvern & Freeo Valley Ry. Co.

Commisioner Harlan: We will have to develop this thing a little later. We want to get started and then be able to make some announcement that will relieve a good many of those who are here perhaps until tomorrow. Is the Malvern & Freeo Valley in court?

Mr. H. M. Armistead: I represent that company. I understand that we are in court.

Commissioner Harlan: I will put the further question. Are you ready to go ahead with your case?

Mr. Armistead: I undestand we were brought here on citation to the complaint of the Butler County Railroad. That complaint is here, and our response to it is that we did not cause the conditions complained of there; that is, the cancelling of the division sheets of the Butler County Railroad, and it would be a simple denial of the allegations in that complaint. Now, in the case of the
43 Arkansas Eastern Railroad Company, the Malvern & Freeo Valley is cited to that complaint, and that is similar to the Butler County Railroad complaint; and now our answer would be simply that we did not cancel any divisions with that complainant. If there has been any general citation issued, any citation making the Malvern & Freeo Valley a party to any other complaint, I am not advised of it, and I would like to have advice from your record.

Commissioner Harlan: Did you get into court with a bill for the restoration of the rate?

Mr. Armistead: Yes, sir; we have a suit pending in the United States Circuit Court for the——

Commissioner Harlan: Was that the case that was referred to the Commission?

Mr. Armistead: No, sir. I heard your Honor state just now something about that case——

Commissioner Harlan: Was not there an injunction granted in that case?

Mr. Armistead: There was an injunction.

Commissioner Harlan: Have you any complaint against the Rock Island?

Mr. Armistead: We have a complaint in court.

Commissioner Harlan: You have no complaint before the
44 Commission?

Mr. Armistead: None here.

Commissioner Harlan: That is to say, the Commission may order your allowance cut off and we will not hear from you again; is that it?

Mr. Armistead: No, sir. If you will be patient with me, I will be frank with you.

Commissioner Harlan: I expect counsel to be frank.

Mr. Armistead: And I will be frank.

Commissioner Harlan: What is your position? We would like to get your case up, because it was a case in court and there was another case in court, and we have assigned those two cases first for hearing.

Mr. Armistead: Well, this is the first advice that I have had or that any of the Malvern & Freeo Valley people have had that that case was assigned first. Will you kindly answer my inquiry from your record, whether we are cited on any other complaint than the Butler County Railroad and the Arkansas & Eastern?

Commissioner Harlan: Well, we will assume that you are not, and from that point, what is your procedure?

Mr. Armistead: Then I will be perfectly frank with you.

45 Your Honor stated just now that the Rock Island had procured that case to be brought——

Commissioner Harlan: No, I did not state that, or at least did not intend to be so understood.

Mr. Armistead: I understood you to so state. And in order that you may understand that that is not true, I will state that the Malvern & Freeo Valley regards itself as a common carrier. It is, in fact, a typical tap line. It may eventually turn out not to be entitled to a division, and in order to test its right under a contract for a division, it filed that bill and a temporary injunction was granted, and that case was fully argued in court. There were amici curiæ from all over the country pro and con——

Commissioner Harlan: If you will pardon me, the Commission knows all those facts.

Mr. Armistead: Yes, sir. Now, I will make our position here plain. We are ready to be investigated, but we do desire an opportunity to prepare, by bringing records and witnesses, and we were not advised until your Honor spoke that it was proposed to investigate us first.

Commissioner Harlan: Well, then, will you be ready at

46 two o'clock?

Mr. Armistead: No, sir.

Commissioner Harlan: When will you be ready?

Mr. Armistead: I should say that I will be ready in ten days.

Commissioner Harlan: You are not ready to go on now?

Mr. Armistead: No, sir.

Commissioner Harlan: Very well; the Commission will have to close the record at this time as to your road. Have you any of your witnesses here?

Mr. Armistead: I have an officer of the company here.

Commissioner Harlan: What officer is that?

Mr. Armistead: President.

Commissioner Harlan: Have you any others?
Mr. Armistead: No, sir.
Commissioner Harlan: Is he here now in court?
Mr. Armistead: Yes, sir.
Commissioner Harlan: Will you be kind enough to put him on the stand?
Mr. Armistead: I want to make this objection, that we are entitled to notice and to have a complaint filed, if it is a complaint to the Commission, we are entitled to be advised what it is, and
47 that we should not be dealt with summarily.
Commissioner Harlan: It is not the purpose of the Commission to deal summarily with any one, and it is not the practice of the Commission. The Commission never acts until it thinks itself fully advised as to all the facts; but we have come down here to go ahead with the investigation. It has been widely advertised, as is indicated by the presence of this assemblage, and we expect the tap lines that are interested in the continuance of divisions or allowances to be ready here to give us all the facts showing that they are entitled to have these divisions or allowances.
Mr. Armistead: Still, you have an Interstate Commerce Act, and you have rules of practice——
Commissioner Harlan: If counsel is not ready to go on at this time, after all this notice, the record will show that, and the Commission will have to take its action in that particular case.
Mr. Armistead: Very well, I will state we are not ready because we have not been notified that we were a party to any complaint except that of the Butler County and the Arkansas & Eastern.
Commissioner Harlan: You have received a notice from
48 the Commission?
Mr. Armistead: I have just asked two or three times if there is any citation shown to be served upon us. I have never received it.
Commissioner Harlan: Where is the president of your company; will you ask him to arise?
Mr. Armistead: Mr. Foster is here.
Commissioner Harlan: What is your name?
Mr. Foster: Foster.
Commissioner Harlan: Did you receive any citation from the Commission?
Mr. Foster: For December 8th, for this hearing?
Commissioner Harlan: Yes, for this week.
Mr. Foster: No.
Commissioner Harlan: Has your road in any way received any notice of this hearing?
Mr. Foster: Not that I know of. We have an agency appointed in Washington, which is supposed to send us on all our notices.
Commissioner Harlan: Did you receive at your general offices any notice of any kind?
Mr. Foster: No, sir; only in regard to the two cases Mr.
49 Armistead refers to, the Butler County and the Arkansas & Eastern.

Mr. Armistead: We are made defendants in those cases.

Commissioner Harlan: Are you ready to meet the case of the Butler County Railroad?

Mr. Foster: I understand our attorney has just explained the situation with regard to that.

Commissioner Harlan: Mr. Glasgow, you represent the Butler County Railroad?

Mr. Glasgow: Yes.

Commissioner Harlan: I understand you have a complaint in which this railroad is defendant.

Mr. Glasgow: They got into it in this way, our complaint was against the Frisco and the Iron Mountain and the Missouri Pacific, and this was a short road, and the tariffs showed a concurrence in the rates which had been cancelled, and in going down the line of concurring carriers, in order to make proper filings, the name of this road, which I do not now recall, was put in as a defendant and a concurring carrier in the cancelling of the tariffs.

Mr. Armistead: Whether that is true or not, we do not want to limit it to that anyway. We are perfectly willing to be
50 investigated.

Commissioner Harlan: What is the name of your Washington agent?

Mr. Armistead: I do not know.

Mr. Foster: Tannikin, or some such name.

Commissioner Harlan: Mr. Foster, the Commission will now call you as the president of that railroad. Will you be kind enough to take the stand?

H. H. FOSTER was called as a witness, and having been duly sworn, testified as follows:

Mr. Armistead: Will I be permitted to state in the record that we came here not prepared to answer any questions——

Commissioner Harlan: Let the record show that Mr. Foster is called by the Commission, and counsel states that he was not ready so far as his case is concerned.

Mr. Armistead: We are not advised of any complaint against us other than those two I have mentioned.

Commissioner Harlan: Will you state your full name, Mr. Foster?

Mr. Foster: H. H. Foster.

Commissioner Harlan: Where do you reside?
51 Mr. Foster: Little Rock, Arkansas.

Commissioner Harlan: What is your business?

Mr. Foster: My principal business is the manufacturing and selling of lumber.

Commissioner Harlan: Where is your mill?

Mr. Foster: At Waleo, Arkansas.

Commissioner Harlan: How far is that from Little Rock?

Mr. Foster: About 43 or 44 miles.

Commissioner Harlan: How long have you been engaged in the lumber business there?

Mr. Foster: Nine years.

Commissioner *Foster:* Are you connected with a lumbering corporation?

Mr. Foster: Yes, sir.

Commissioner Harlan: What is the name of that?

Mr. Foster: Wisconsin and Arkansas Lumber Company.

Commissioner Harlan: You are president of it?

Mr. Foster: Yes.

Commissioner Harlan: And have been for nine years?

Mr. Foster: Yes.

Commissioner Harlan: What is the extent of the plant that it has at Walco; what does it consist of?

52 Mr. Foster: It is a saw mill, and its accessories, with a capacity of about 45,000,000 feet a year of lumber.

Commissioner Harlan: What is the capital of your company?

Mr. Foster: A million and a quarter.

Commissioner Harlan: Does it own lumber forests?

Mr. Foster: Yes, sir.

Commissioner Harlan: What acreage have you?

Mr. Foster: We have about 65,000 acres uncut.

Commissioner Harlan: Is it in one body?

Mr. Foster: Practically, sir.

Commissioner Harlan: What was your original holding when the company was organized?

Mr. Foster: About 70,000 acres.

Commissioner Harlan: You have not purchased any additional land since that time?

Mr. Foster: Yes, sir; about 30,000 acres.

Commissioner Harlan: And you have lumbered how much?

Mr. Foster: About 35,000 acres.

Commissioner Harlan: And you have about 60,000 or 65,000 left?

Mr. Foster: Yes.

Commissioner Harlan: What is the character of the lumber?

53 Mr. Foster: Short leaf yellow pine.

Commissioner Harlan: The short leaf, as I understand it, is used more for the fine interior work, rather than the exterior?

Mr. Foster: The manufacturers of it claim that the finish is superior to the long leaf.

Commissioner Harlan: Have you a logging road?

Mr. Foster: Yes, sir.

Commissioner Harlan: When was it built?

Mr. Foster: 1902 it was commenced; when we built the plant.

Commissioner Harlan: That was after the mill was built?

Mr. Foster: It was all started about at the same time.

Commissioner Harlan: And completed about at the same time?

Mr. Foster: Yes, sir.

Commissioner Harlan: The mill and the road went into operation at the same time?

Mr. Foster: Yes, sir.

Commissioner Harlan: And both belonged to the lumber corporation at that time?

Mr. Foster: Yes, sir.

Commissioner Harlan: Is there now a railroad corpora-
54 tion?

Mr. Foster: Part of the equipment is owned by a separate corporation; the company has a logging road outfit besides.

Commissioner Harlan: If you will just answer the question yes or no, which was, is there now a railroad corporation?

Mr. Foster: Yes, sir.

Commissioner Harlan: When was it organized?

Mr. Foster: I cannot state that definitely; I think about 1905 or 1906.

Commissioner Harlan: Under the general incorporation law of Arkansas?

Mr. Foster: Yes, sir.

Commissioner Harlan: What capital has it?

Mr. Foster: Authorized, $175,000, and I think it has $169,000 paid in.

Commissioner Harlan: Does it own any railroad?

Mr. Foster: Yes, sir.

Commissioner Harlan: What is the mileage of it?

Mr. Foster: A little over nine miles.

Commissioner Harlan: What are the termini of that road?

Mr. Foster: Walco and the end of the line, nine miles from the mill, called Landers.

Commissioner Harlan: Is Walco the mill point?
55 Mr. Foster: Yes, sir.

Commissioner Harlan: And the other end is what?

Mr. Foster: Landers.

Commissioner Harlan: Is that a junction point with some railroad?

Mr. Foster: It is where we join on to our logging road.

Commissioner Harlan: Do you join any railroad?

Mr. Foster: Not on the Landers end. We do on the Walco end.

Commissioner Harlan: How far is the rail line from your mill?

Mr. Foster: Our railroad moreover from——

Commissioner Harlan: No, what regular line serves your mill?

Mr. Foster: The Chicago, Rock Island & Pacific, and the Iron Mountain.

Commissioner Harlan: Does the tap line, I will use that phrase for convenience only, join both roads?

Mr. Foster: Yes, sir.

Commissioner Harlan: Where does it join the Rock Island?

Mr. Foster: I think it is about a quarter of a mile north of the mill.

56 Commissioner Harlan: Where does it join the Iron Mountain?

Mr. Foster: It is almost directly at the mill; it has a switch out to the Iron Mountain, the main line.

Commissioner Harlan: Almost directly at the mill?

Mr. Foster: Yes, sir.

Commissioner Harlan: Did you build the switch to the Iron Mountain?

Mr. Foster: Yes, sir.

Commissioner Harlan: When I say "you," I am talking of the railroad that you are president of?

Mr. Foster: Well, we originally built it when the plant was installed there.

Commissioner Harlan: It was originally built by the lumber company?

Mr. Foster: Yes, sir.

Commissioner Harlan: And not by the Iron Mountain?

Mr. Foster: No, sir.

Commissioner Harlan: And subsequently was turned over to the railroad company?

Mr. Foster: Yes, sir.

Commissioner Harlan: The tap line?

Mr. Foster: Yes, sir.

57 Commissioner Harlan: Do you remember when that switch was built, with the Iron Mountain?

Mr. Foster: In 1902, in the spring of 1902, when we began operations there.

Commissioner Harlan: Now, on the other side of the mill point, what track have you that belongs to the railroad company?

Mr. Foster: I do not understand.

Commissioner Harlan: Well, you have described the general conditions between the mill point and the tracks of the Rock Island and the Iron Mountain.

Mr. Foster: We have nine miles of road running in a southeasterly direction to the timber. That belongs to the railroad company.

Commissioner Harlan: How long has that been built?

Mr. Foster: That was built in 1902.

Commissioner Harlan: Is it a single track?

Mr. Foster: Yes, sir.

Commissioner Harlan: What rails has it?

Mr. Foster: 45 pound steel.

Commissioner Harlan: Is it a broad gauge road?

Mr. Foster: Yes, sir.

58 Commissioner Harlan: Has the lumber company any railroad that joins the tap line at Walco?

Mr. Foster: Well, the lumber company owns the tracks itself on its mill site, and leases it to the Freeo Valley Railroad Company, and they keep it up and maintain and operate it for the lease, and do the switching in there.

Commissioner Harlan: Let me see——

Mr. Foster: That is at the mill.

Commissioner Harlan: The lumber company at the mill owns what track?

Mr. Foster: They own their loading tracks, and they own the track that goes to the log pond to dump their logs off into the pond.

Commissioner Harlan: How about this switch track connecting with the Iron Mountain; does that belong to the lumber company?

Mr. Foster: Yes, sir, that belongs to the lumber company.

Commissioner Harlan: And the switch track connecting the road with the Rock Island?

Mr. Foster: Yes, sir; to the lumber company.

Commissioner Harlan: The nine miles of track to Walco belongs to the railroad company?

59 Mr. Foster: To the railroad company; that is, to Landers; from Walco to Landers.

Commissioner Harlan: Where is Landers? You have not described that point.

Mr. Foster: That is the end of the road; that is in the woods; out to the woods end of it, where it joins onto the logging road of the Wisconsin & Arkansas Lumber Company.

Commissioner Harlan: Well, from the mill to Walco, what is the——

Mr. Foster: Well, the mill is at Walco.

Commissioner Harlan: I see.

Mr. Foster: Walco is the mill, and these are its track facilities which I have described, that the lumber company owns, that are about its plant.

Commissioner Harlan: From Walco to Landers is a track nine miles long, that belongs to the railroad company?

Mr. Foster: Yes, sir.

Commissioner Harlan: Although originally built by the lumber company?

Mr. Foster: Yes.

Commissioner Harlan: The lumber company has rented the tracks about the plant and the switch tracks to the railroad

60 company?

Mr. Foster: Yes, sir.

Commissioner Harlan: At Landers, you say, the logging road connects with the tap line?

Mr. Foster: Yes.

Commissioner Harlan: What is the extent of the logging road?

Mr. Foster: I think approximately there is about 17 miles of it out now.

Commissioner Harlan: And that belongs to the lumber company?

Mr. Foster: Yes.

Commissioner Harlan: Mr. Foster, who are the other officers of the railroad company?

Mr. Foster: Well, I cannot name them, except that they are all members of the Wisconsin & Arkansas Lumber Company.

Commissioner Harlan: Who owns the railroad company?

Mr. Foster: The Wisconsin & Arkansas Lumber Company owns its stock.

Commissioner Harlan: No stock outside at all?

Mr. Foster: No, sir.

Commissioner Harlan: And all the officers of the railroad
61 company are either stockholders or officers of the lumber company?

Mr. Foster: Or members of the company.

Commissioner Harlan: So it is practically one investment by the same people; different corporations, but the same people own both companies.

Mr. Foster: Yes, sir.

Commissioner Harlan: You have spoken of Walco as a station. Does the tap line have any station building there?

Mr. Foster: They have a small building on the right of way of the Iron Mountain.

Commissioner Harlan: Well, that is not at Walco.

Mr. Foster: Right there at Walco; yes, sir.

Commissioner Harlan: What kind of a station is that?

Mr. Foster: Oh, it is just a temporary, rough building; it answers the purpose for a flag station; that is all the privileges we have for passenger traffic there.

Commissioner Harlan: Is there any station at Landers?

Mr. Foster: No, sir.

Commissioner Harlan: Is there any industry at Walco except your lumber company?

Mr. Foster: No, sir.

62 Commissioner Harlan: How near is the nearest mill to Walco that does not belong to your company?

Mr. Foster: Saw mill?

Commissioner Harlan: Saw mill or any other kind?

Mr. Foster: Oh, the—Malvern is quite a manufacturing point.

Commissioner Harlan: How far is that from Walco?

Mr. Foster: About a mile and a half.

Commissioner Harlan: Is there any other interest at Landers than that of your lumber company; any mill or——

Mr. Foster: No, there is no manufacturing interest down there.

Commissioner Harlan: Any lumbering mill?

Mr. Foster: For the past year there has been a considerable quantity of staves and stave bolts and such stuff as that gotten out down there by the farmers.

Commissioner Harlan: By farmers?

Mr. Foster: Yes, sir; some people have gone down in there with representatives, getting from the farmers—they are getting the stave bolts.

Commissioner Harlan: And your railroad moves that to
63 the junction?

Mr. Foster: Yes.

Commissioner Harlan: Do you know the extent of that traffic last year?

Mr. Foster: It was about 12 per cent of the revenues of the road, ten or 12.

Commissioner Harlan: Do you know the extent of it in carloads?

Mr. Foster: No, sir; I do not.

Commissioner Harlan: You can find that out?

Mr. Foster: Yes.

Commissioner Harlan: You do not remember the number of carloads?

Mr. Foster: I do not; no, sir.

Commissioner Harlan: Or the gross revenue?

Mr. Foster: It is running for the last eight or nine months from $200 to $400 per month, approximately.

Commissioner Harlan: How many farmers are engaged in that work?

Mr. Foster: I could not tell you; that is quite a farming community, all south of that road.

Commissioner Harlan: They are not in any way related to

64 your company?

Mr. Foster: No.

Commissioner Harlan: Have no financial arrangement with it?

Mr. Foster: No.

Commissioner Harlan: Where is their market for these staves?

Mr. Foster: Little Rock is the principal market, the nearest market of any note.

Commissioner Harlan: Mr. Foster, I wish you would procure a statement of the carloads that you have received at Landers or elsewhere on your road, and carried to the junction with the Iron Mountain or the Rock Island; also the gross revenues and the number of different shipments. Now, that is traffic that has developed in the last year?

Mr. Foster: There has always been a little of it; there has been more of it last year.

Commissioner Harlan: Is there any other traffic, other than your own lumber company's traffic?

Mr. Foster: There is fertilizer; we have some considerable fertilizer out there to the farmers, and shipments have been made that way, and there is lumber that is shipped out there to the farmers.

65 Commissioner Harlan: From what point?

Mr. Foster: From our mill.

Commissioner Harlan: Your own lumber?

Mr. Foster: Yes, sir; but it is sold to the farmers, and the revenue collected for taking it out there; and there is some cotton seed accumulated at a little town by the name of Lono; that is about half a mile off our logging road.

Commissioner Harlan: How far is that town from the Iron Mountain tracks?

Mr. Foster: I should judge the Iron Mountain tracks would be about ten miles west.

Commissioner Harlan: And from the Rock Island tracks?

Mr. Foster: About six or seven miles, seven or eight miles; I am only giving those distances approximately.

Commissioner Harlan: Will you also procure and furnish to the

Commission a statement covering, say, the last three years, of all the outside tonnage you have had?

Mr. Foster: Yes, sir.

Commissioner Harlan: Stating the amount of gross revenue from it?

Mr. Foster: Yes, sir.

Commissioner Harlan: Now, Mr. Foster, do you receive a
66 salary as president of the railroad company?

Mr. Foster: No, sir.

Commissioner Harlan: Do any of the officers receive a salary as officers of that company?

Mr. Foster: No, sir; they do not.

Commissioner Harlan: What equipment have you?

Mr. Foster: We have got about 60 logging cars, standard *guage* flat cars, and we have cabooses and——

Commissioner Harlan: Do you mean you have 60 cars, standard *guage* flat cars, used for logging?

Mr. Foster: Yes, sir; we have two or three cabooses, which are used in connection with the trains, and we have six locomotives.

Commissioner Harlan: Of what style?

Mr. Foster: There are two of them which are the Shea, the geared engines, and four of them are rod engines, about 45 to 50 ton engines.

Commissioner Harlan: To whom does that equipment belong?

Mr. Foster: To the railroad company.

Commissioner Harlan: Did it ever belong to the lumber company?

67 Mr. Foster: Part of it was turned over when the corporation was formed, and part of it has been bought since.

Commissioner Harlan: Are you sure that those locomotives belong to the railroad company? Are they not shown on the books of the lumber company to belong to the lumber company?

Mr. Foster: I think not, sir. I think they are owned by the railroad company and leased to the lumber company, the portion of them that they use in the woods.

Commissioner Harlan: Leased to the lumber company?

Mr. Foster: Yes, sir.

Commissioner Harlan: So they are operated by the lumber company?

Mr. Foster: Part of them; the main line engines, of course, are operated and maintained by the railroad.

Commissioner Harlan: Who furnished the capital for the railroad company, or was there any capital furnished?

Mr. Foster: The Wisconsin & Arkansas Lumber Company furnished it.

Commissioner Harlan: Just describe how it was that the railroad company acquired the title of nine miles of track and certain equipment from the lumber company. Did any money pass from the railroad company to the lumber company?

68 Mr. Foster: The investment was made in the railroad by the company.

Commissioner Harlan: By the lumber company?

Mr. Foster: Yes, sir.

Commissioner Harlan: Then, you organized the railroad company?

Mr. Foster: And passed the title to it and took the stock for what we had put into it.

Commissioner Harlan: And no money passed?

Mr. Foster: Practically none, absolute money.

Commissioner Harlan: As the railroad company—well, it was done as that thing is ordinarily done?

Mr. Foster: Yes.

Commissioner Harlan: That is, you issued capital for estimated value?

Mr. Foster: No; just exactly what we put into it.

Commissioner Harlan: For what you paid into it.

Mr. Foster: For exactly what it cost.

Commissioner Harlan: Has the railroad company at any time had any capital of its own; has it issued any stock and obtained cash for it?

Mr. Foster: Not outside of that one transaction.

69 Commissioner Harlan: Who built the original track? I understood you to say it was built by the lumber company, but who furnished the capital for that?

Mr. Foster: The lumber company.

Commissioner Harlan: Was it built by the lumber company or by the Rock Island?

Mr. Foster: Built by the lumber company.

Commissioner Harlan: I do not mean who furnished the capital; you have just answered the question.

Mr. Foster: No, we absolutely built it under railroad contracts, regardless of trunk lines or anything else; it was our property.

Commissioner Harlan: What do you mean to say, by building it under railroad contracts?

Mr. Foster: A man that was in the habit of going out and building under railroad construction, came there and bid on the grading and laying of the rail.

Commissioner Harlan: What was his name?

Mr. Foster: Dalhoff.

Mr. Armistead: The Dalhoff Construction Company?

Mr. Foster: I do not know whether it was the Dalhoff Construction Company. I think Mr. Dalhoff was operating as a

70 contractor himself and graded the road, and we furnished the ties and he laid them. That is eight or nine years ago, and I do not remember just all the details of it.

Commissioner Harlan: You say the railroad company has never had any cash capital of its own?

Mr. Foster: No; outside of that transaction.

Commissioner Harlan: It keeps separate books, of course?

Mr. Foster: Yes.

Commissioner Harlan: And keeps a system of accounts that the Commission has prescribed?

Mr. Foster: Yes, sir; they have accepted them.

Commissioner Harlan: Have you filed tariffs?

Mr. Foster: Yes.

Commissioner Harlan: Are you sure of that?

Mr. Foster: Well, I will say we filed concurring tariffs, all the tariffs we have are the concurrence with the Rock Island and the Iron Mountain roads.

Commissioner Harlan: Does any of your equipment go off your own lines?

Mr. Foster: Not of our equipment; no, sir.

Commissioner Harlan: I wish you would also file a statement showing the tonnage of manufactured lumber that has gone out
71 from your mill over the Rock Island, and a separate statement of the tonnage which has gone out over the Iron Mountain during the last three years.

Mr. Foster: You had better make a memorandum of this.

Mr. Armistead: I presume we will be furnished with some memorandum of your Honor's request in this regard.

Commissioner Harlan: I think you can arrange that. But it will help expedite the thing if counsel will himself keep a memorandum.

Mr. Armistead: I had not commenced to do it. I had thought we could get it from the stenographer, probably.

Commissioner Harlan: Does most of your lumber go out over the Iron Mountain or the Rock Island?

Mr. Foster: The Rock Island.

Commissioner Harlan: What proportion goes out over the Iron Mountain?

Mr. Foster: Oh, 35 per cent, about.

Commissioner Harlan: Was there a time when the Iron Mountain got more of your tonnage that it does now?

Mr. Foster: They got all of it. It was all the connection we had when we started in.

Commissioner Harlan: When did the Rock Island build
72 into that country?

Mr. Foster: Well, they were operating as far as—I am mistaken about their having all of it; the original plan. The Rock Island was as far as Malvern, which was one and a half to two miles away from the mill, and we got Rock Island facilities at that time and the switching charges were absorbed, so we had both roads, but the Iron Mountain had the bulk of the business, their tracks being immediately at the mill.

Commissioner Harlan: Did you ever haul the lumber to Malvern?

Mr. Foster: No, sir; that is not for a charge. We have taken trains up there.

Commissioner Harlan: I mean by horse and wagon; did you ever haul it up?

Mr. Foster: No.

Commissioner Harlan: You have never used teams at all?

Mr. Foster: No; we are too far away.

Commissioner Harlan: Take the first year of your operation; that was in 1902?

Mr. Foster: Yes, sir.

Commissioner Harlan: Then your lumber went out over the Iron Mountain?

73 Mr. Foster: Very largely; except that we could get cars switched in belonging to the Rock Island over the Iron Mountain tracks; but the bulk of the business went by the Iron Mountain at that time.

Commissioner Harlan: When you did that, what arrangement did you have with the Rock Island? Did you pay them for switching the car in, or the Iron Mountain for switching the Rock Island car in?

Mr. Foster: Well, I don't remember, somebody absorbed the switching rate anyway; we did not have to; they wanted the business, and got down there, and it was taken care of.

Commissioner Harlan: The Rock Island wanted the business and they got the cars in; that is your recollection?

Mr. Foster: Yes, sir.

Commissioner Harlan: You did not pay anything for switching the cars in?

Mr. Foster: Not that I remember of, because we had the Iron Mountain directly at our door, and I do not suppose we would have paid a great deal to have had their cars switched down there.

Commissioner Harlan: What proportion of your lumber did the Rock Island get in that way? Do you remember?

74 Mr. Foster: No, sir; I do not. The Iron Mountain had the bulk of the business, a very large proportion of it.

Commissioner Harlan: When did the conditions change so that the Rock Island got the bulk of it?

Mr. Foster: They were changed about 1905 or 1906 by the building of a track from their Malvern line down to our mill.

Commissioner Harlan: Is that the track you have spoken of as about half a mile in length?

Mr. Foster: No; that track is about—they constructed about two miles and a half of track to get to our mill, and it ends about half a mile from the mill, and the Malvern & Freeo Valley there connects with it.

Commissioner Harlan: When they built those two miles and a half, they found the Malvern & Freeo Valley already built to that point?

Mr. Foster: Yes, sir.

Commissioner Harlan: And they then connected up with it?

Mr. Foster: Yes, sir.

Commissioner Harlan: And after that, the Rock Island got the bulk of the traffic?

Mr. Foster: Not immediately; it has grown; it has been a fair division until within the last two or three years.

75 Commissioner Harlan: Well, did you enter into any written contract with the Rock Island at that time?

Mr. Foster: Yes, sir.

Commissioner Harlan: Have you a copy of that here?

Mr. Foster: I do not know whether the attorney has or not.

Mr. Armistead: No, we have not any papers with us. We will furnish it. A copy has been on file with the Commission since it has been entered into, and we will furnish a copy with the record. That contract and the amendments have all been filed, but we will furnish it, if it is desired, also.

Commissioner Harlan: Up to that time, Mr. Foster, had the Iron Mountain made you any allowances?

Mr. Foster: Yes, sir.

Commissioner Harlan: What was the amount of the allowance received from the Iron Mountain?

Mr. Foster: Three cents per hundred pounds.

Commissioner Harlan: Well, was that the allowance they had paid you from the beginning?

Mr. Foster: Yes, sir.

Commissioner Harlan: That is, they paid it to your railroad company?

Mr. Foster: Yes, sir, they—in the beginning, I think it
76 was paid—I do not know how it was handled in the first place; I think about the same as all those tap line arrangements down there. Many of those logging roads did not have charters. We had no charter at the time, that was in the early history of it.

Commissioner Harlan: Well, then, it was paid to the lumber company.

Mr. Foster: I could not tell you just how that was handled. The road was named, it was called the Malvern & Freeo Valley, and was a railroad without a charter, it was a private road, and they paid it to the road, if I remember right; it never has been paid direct to the Wisconsin & Arkansas Lumber Company.

Commissioner Harlan: Did you make that arrangement with the Iron Mountain?

Mr. Foster: Yes, sir.

Commissioner Harlan: Just tell us what the basis was for that allowance of three cents, for what service?

Mr. Foster: The timber was about nine miles away from the Iron Mountain's main line, and about 700,000,000 feet of it, and we brought the logs to the manufacturing point, where we joined—the junction of the Iron Mountain and the Malvern & Freeo
77 Valley, under a milling in transit rate, and produced the lumber and turned it over to the Iron Mountain.

Commissioner Harlan: Was that a published rate?

Mr. Foster: That I could not tell you, sir.

Commissioner Harlan: Well, your road did not join at that time in any rates, it was not a railroad, then, was it?

Mr. Foster: No, it was a private railroad. We owned it without a charter.

Commissioner Harlan: After you were chartered, was there any change in the method of handling the business?

Mr. Foster: It was paid to the railroad company.

Commissioner Harlan: That is the only change?

Mr. Foster: Yes.

Commissioner Harlan: The haul was just about the same, and it was conducted in the same manner?

Mr. Foster: Yes, sir.

Commissioner Harlan: When the Rock Island connected up with the Malvern & Freeo Valley, what allowance did you get from the Rock Island?

Mr. Foster: Three cents per hundred pounds.

Commissioner Harlan: And that has been the allowance
78 ever since?

Mr. Foster: Yes, sir.

Commissioner Harlan: And were you then a chartered railroad?

Mr. Foster: Yes, sir.

Commissioner Harlan: When the Rock Island came in?

Mr. Foster: Yes, sir; we had a charter by that time.

Commissioner Harlan: Have you at any time or on any business had an excess of three cents?

Mr. Foster: No.

Commissioner Harlan: The payments by the Rock Island were always to the chartered tap line?

Mr. Foster: Yes, sir.

Commissioner Harlan: Where are your markets?

Mr. Foster: This simply spreads out in a perfect fan from Little Rock northeast and northwest; we reach Canada and the New England states and the Dakotas——

Commissioner Harlan: You sell lumber ordinarily delivered?

Mr. Foster: We guarantee it—the custom under which lumber is sold practically guarantees the weights; it is not a delivery; it is not so considered, but it is so arranged that the customer is sure to get the dry lumber; he is not having green lumber forced on him.

79 Commissioner Harlan: He gets it at the delivered weight?

Mr. Foster: Yes, sir; we make him a delivered price, but the delivery is not guaranteed by the lumber man.

Commissioner Harlan: The freight is paid by your company?

Mr. Foster: We never pay the freight by the company, except where we happen to ship to a prepaid station. The method is that the receiving party takes up the expense bill and sends it back as a part of his remittance.

Examiner Burchmore: You guarantee the rate, as well as the weight, do you not?

Mr. Foster: I suppose we practically guarantee the rate. We use the published rates. We do almost anything that the customer wants us to do that is legitimate; that is about the size of it.

Commissioner Harlan: You do not carry any passengers?

Mr. Foster: We make no charge for passengers at all.

Commissioner Harlan: Or express matter?

Mr. Foster: No, sir.

Commissioner Harlan: Do not carry any mail?

Mr. Foster: No, sir.

Examiner Burchmore: Any less than carload freight?

Mr. Foster: Some.

80 Examiner Burchmore: Have you a regular train service running on regular schedules?

Mr. Foster: Practically; it makes three trips a day.

Examiner Burchmore: Each way?

Mr. Foster: Yes.

Examiner Burchmore: Do you publish any local rates to and from the junction point?

Mr. Foster: We use the Arkansas distance tariff, the Commission tariff.

Mr. Armistead: That tariff is now called the court tariff; it is prescribed under an injunction and is used by all intra-state roads in Arkansas.

Examiner Burchmore: What employees has the railroad company who are not also employees of the milling company?

Mr. Foster: Its engineers, trainmen, roadmen and trackmen.

Examiner Burchmore: Can you indicate the number of such employees, in a general way?

Mr. Foster: I should judge somewhere about 25 men.

Examiner Burchmore: Separated into classes, how many engineers and how many fireman and how many road employees.

Mr. Foster: The only fireman and engineer we have is on
81 our main line, one engineer and one fireman, and the train crew, and the men who keep up the road and keep it in shape; the other engines that are operated in the woods end of it clear out into the woods, are operated by the lumber company.

Commissioner Harlan: Let me ask right here; the three cents you get now from both lines covers what services performed by your company?

Mr. Foster: It covers the haul from Landers to Walco, over nine miles of track.

Commissioner Harlan: But not the haul into Landers?

Mr. Foster: No, sir. That, the lumber company does—the railroad company sends its main line engine down over the 18 miles of logging road for the trains that are accumulated and we pay the railroad company 80 cents a thousand feet for that haul.

Commissioner Harlan: I did not quite get that. How do you get the logs from your forest to Landers; who does that work for you?

Mr. Foster: Well, the lumber company builds the tracks and keeps them up and owns them, and we accumulate the trains down there, with our woods engines, whatever engines are in the
82 woods operating, and in trains of about 16 to 18 cars; the main line engine goes down over the track of the Wisconsin & Arkansas Lumber Company and gets that train and brings it up.

Commissioner Harlan: What main line engine?

Mr. Foster: The main line engine of the Malvern & Freeo Valley Railroad.

Commissioner Harlan: You do not mean the Rock Island or Iron Mountain?

Mr. Foster: No, sir; neither the Iron Mountain or the Rock Island have any tracks of any description on any of the property of the lumber company or the Malvern & Freeo Valley Railroad company, and their engines never come on there.

Commissioner Harlan: When you used that phrase "main line" you meant your tap line?

Mr. Foster: Our own line; yes, sir.

Commissioner Harlan: It sends its engine down to the forest and hauls up these trains?

Mr. Foster: Yes, sir; and they have an earning capacity of 80 cents a thousand feet for the logs out of that haul, for that and the maintenance of the logging engines.

Commissioner Harlan: Just how is that rate established;
83 is that part of the court tariff?

Mr. Foster: No.

Commissioner Harlan: What sort of a movement is that?

Mr. Foster: It is an intrastate movement entirely, I suppose.

Commissioner Harlan: Is there any rate published for it?

Mr. Foster: No, sir.

Commissioner Harlan: Any bill of lading issued?

Mr. Foster: No, sir.

Commissioner Harlan: Do you issue any bills of lading?

Mr. Foster: Yes, sir.

Commissioner Harlan: From what point to what point?

Mr. Foster: From Landers to destination of the lumber.

Commissioner Harlan: Have you a form of your own for that?

Mr. Foster: We use the regular form; our railroad name is printed on it.

Commissioner Harlan: How long have you been doing that?

Mr. Foster: I think three or four years; I think we have always done it; it has always been handled that way.

Examiner Burchmore: Do the rates published by the Rock Island and the Iron Mountain apply only from the mill at Walco or are they published and do they apply from the other end of the line at Landers?

84 Mr. Foster: They are published to apply from Landers.

Examiner Burchmore: With a milling in transit privilege?

Mr. Foster: Yes, sir.

Examiner Burchmore: Are your cars equipped with air brakes?

Mr. Foster: Yes, sir.

Examiner Burchmore: And safety couplers?

Mr. Foster: Yes, sir, and they were inspected just a very few days ago by the representative of the Commission, and he pronounced them in very fine order.

Commissioner Harlan: What were the net profits of your tap line last year?

Mr. Foster: I will just have to give you that from memory; I think about $12,000 or $13,000; somewhere along there.

Mr. Armistead: I did not hear that question.

Mr. Foster: The profits of the Malvern & Freeo Valley Railroad last year.

Mr. Armistead: Net?

Mr. Foster: I understood that was the question.

Commissioner Harlan: The net profits from operation.

Mr. Foster: Yes, sir; I think about $12,000 or $13,000; it ran along near that neighborhood.

85 Mr. Armistead: About four per cent on the cost.

Mr. Foster: I am giving you that from memory.

Commissioner Harlan: It is so understood, Mr. Foster. Is all the authorized stock of that company issued? If not, what part is issued?

Mr. Foster: Now, my recollection is that the authorized capital is $175,000 and that there is $169,500 issued.

Commissioner Harlan: What was the cost of these nine miles of road?

Mr. Foster: It was $169,500, with its equipment; it was a very difficult country to go through, and the grades——

Commissioner Harlan: What was the character of the country?

Mr. Foster: Very rough and very hilly. We operate one grade four miles long that averages over three per cent.

Examiner Burchmore: Who is the traffic manager of the Malvern & Freeo Valley, if you have one?

Mr. Foster: I think Mr. F. H. McCormack.

Examiner Burchmore: He is also manager of the lumber company?

Mr. Foster: No; he is sales manager.

Examiner Burchmore: Does he receive any salary from the railroad company?

86 Mr. Foster: No.

Examiner Burchmore: What employee of the Malvern & Freeo Valley issues the bills of lading, as you have described them being issued?

Mr. Foster: We have a joint agent with the Rock Island and the Iron Mountain.

Examiner Burchmore: The bills of lading are not issued by an employee of the Malvern & Freeo Valley who is also an employee of the milling company?

Mr. Foster: Well, my name is used as the joint agent there, but I do not do it.

Commissioner Harlan: Have you any questions, Judge Cowan?

Mr. Cowan: I suppose counsel on the other side desires to ask some questions. We do.

Mr. Armistead: Yes, we do.

Mr. Marsilliot: I notice it is six minutes of one o'clock, and it occurs to me that it might be well to take it up after lunch.

Commissioner Harlan: You raise a very important question. We will now adjourn until two o'clock.

Whereupon, at 12:44, a recess was taken until 2:00 P. M.

87 After Recess. 2:00 P. M.

H. H. FOSTER resumed the stand.

Mr. Armistead: Your Honor asked immediately before adjournment if we desired to ask this witness any questions, and in reply I stated that we did, and Judge Cowan indicated that he desired to ask some questions, and I would really prefer that Judge Cowan examine him first, because his questions might suggest matters that I might wish to attempt to clear up.

Mr. Cowan: That is immaterial to me. I supposed, being intervenors, we would come at the tail end, that is all, but it does not make any difference.

Commissioner Harlan: You may proceed now, Judge Cowan, and we will think that question over as to the future examinations.

Mr. Cowan: It does not make any difference at all. When you bring the logs from the end of the timber road on by Landers to your mill, the same engine which takes them to the mill brings them from the end of the line?

88 Mr. Foster: Yes, sir.

Mr. Cowan: And you use, of course, the logging cars throughout the entire length of the line?

Mr. Foster: Yes, sir.

Mr. Cowan: To whom do you say the cars belong?

Mr. Foster: The railroad company.

Mr. Cowan: Is there any contract between the railroad company and the milling company for the use of the tracks from Landers out to the timber?

Mr. Foster: Yes, sir.

Mr. Cowan: Is that a written contract?

Mr. Foster: Yes, sir.

Mr. Cowan: Will you file a copy of it, if quite agreeable?

Mr. Foster: Sir?

Mr. Cowan: Will you please file a copy of it as part of your evidence, and hand it to the stenographer?

Mr. Foster: Will you make a memorandum of it?

Mr. Armistead: I am going to ask to have that incorported in the record; it is already on file with the Commission. If it is not, it is a mere oversight.

Mr. Cowan. Have you any depot at Landers?

Mr. Foster: No.

89 Mr. Cowan: A switch there?

Mr. Foster: Yes, sir.

Mr. Cowan: What sort of a switch is that; just a siding?

Mr. Foster: Like any other switch; I don't know what you mean by what sort of a siding, it is a switch.

Mr. Cowan: Does it run to anything, or is it just a siding for trains to pass?

Mr. Foster: It is a spur; the railroad tracks probably extend 500 feet beyond the point where the logging road branches off.

Mr. Cowan: How would one looking at it know which was the logging road and which was the railroad?

Mr. Foster: I don't think they could tell by looking at it.

Mr. Cowan: Whereabouts at this place called Landers, there being no depot, do these logs enter interstate commerce as a movement on the milling in transit rates? Just where do they enter that traffic?

Mr. Foster: At that junction between the logging railroad and the Malvern & Freeo Valley tracks.

Mr. Cowan: How do you arrive at that idea; how would you tell it?

Mr. Foster: It is the end of the incorporated line.

90 Mr. Cowan: Because it is the end of the incorporated line?

Mr. Foster: Yes, sir.

Mr. Cowan: Is there any other reason for it?

Mr. Foster: I do not know that there could be. It is the end of the incorporated line, and it begins interstate traffic at that point.

Mr. Cowan: Have you any contract with either the Rock Island or the Iron Mountain that so provides in the contract?

Mr. Foster: We have a contract with the Rock Island. We have not with the Iron Mountain.

Mr. Cowan: That contract provides that this becomes interstate commerce when it passes this point at Landers?

Mr. Foster: The rates are made effective at Landers.

Mr. Cowan: And that is rates on what?

Mr Foster: On logs; it is on lumber.

Mr. Cowan: Which is it?

Mr. Foster: With a milling in transit privilege.

Mr. Cowan: Have you the tariff which specifies that?

Mr. Foster: No, I have not.

Mr. Cowan: Have you ever seen the tariffs which specify this milling in transit?

Mr. Foster: I think I have; I think it is so specified in

91 the tariff.

Mr. Cowwan: When you haul these logs down to the mill of course you put them in some pond, I assume?

Mr. Foster: Yes, sir.

Mr. Cowan: Who does that for you, does the lumber company do that?

Mr. Foster: Yes, sir.

Mr. Cowan: Or does the railroad company do it?

Mr. Foster: The lumber company.

Mr. Cowan: Where does the lumber company take charge of the logs for the purpose of putting them in the pond?

Mr. Foster: When they are loaded at the log platform, built for the purpose of putting them into the pond.

Mr. Cowan: The lumber company, then, does the unloading?

Mr. Foster: Yes, sir.

Mr. Cowan: Is the lumber company at all of the expense up to this point at Landers, all expense back of that the lumber company is at, is it?

Mr. Foster: Yes, sir; absolutely.

Mr. Cowan: How much does it cost you to haul these logs from

Landers up to this platform at the unloading place?

Mr. Foster: How much does it cost from Landers——

92 Mr. Cowan: To the unloading place; how much does it cost the railroad company?

Mr. Foster: We have no data here to tell you, sir.

Mr. Cowan: Have you any data anywhere to tell?

Mr. Foster: Yes, sir.

Mr. Cowan: Where is that?

Mr. Foster: At the office at Malvern.

Mr. Cowan: Do you keep a separate account of the expense of hauling the logs from Landers up to that platform?

Mr. Foster: Yes, sir.

Mr. Cowan: What does that expense consist of?

Mr. Foster: Maintaining the track, maintaining the equipment, transportation, office expense.

Mr. Cowan: Maintenance of what equipment?

Mr. Foster: The maintenance of the engines, the maintenance of the logging cars.

Mr. Cowan: You keep that separately for your road engine?

Mr. Foster: Yes, sir.

Mr. Cowan: You do not recall now how much that costs?

Mr. Foster: No.

Mr. Cowan: Do you keep the mileage of your logging cars?

Mr. Foster: No, sir.

93 Mr. Cowan: Do you keep the mileage of this road engine?

Mr. Foster: No, sir.

Mr. Cowan: How many road engines have you in that service?

Mr. Foster: On the main line?

Mr. Cowan: Yes, that take the train from Landers, on to this unloading platform.

Mr. Foster: We have one engine.

Mr. Cowan: How many?

Mr. Foster: One engine does the work.

Mr. Cowan: Do you have any recollection how much it costs you to maintain that engine in a year?

Mr. Foster: I know in a general way it costs about $6,000 to maintain an engine for a year.

Mr. Cowan: $6,000?

Mr. Foster: Yes, sir.

Mr. Cowan: How do you know that?

Mr. Foster: I know it from general information and general experience with engines.

Mr. Cowan: Did you ever examine into any of the annual reports of the Rock Island or the Iron Mountain to find out that it costs generally about half that?

Mr. Foster: No.

94 Mr. Cowan: It is, you say, a 45 ton engine?

Mr. Foster: Yes, sir.

Mr. Cowan: Was it new or second hand when you bought it?

Mr. Foster: The ro-d engines were bought second hand.

Mr. Cowan: And from whom were they obtained?

Mr. Foster: Different parties.

Mr. Cowan: By "parties," you mean different railroads?

Mr. Foster: No, sir; from none of the railroads.

Mr. Cowan: How is that?

Mr. Foster: We did not buy them from the railroads at all; we bought most of them in Chicago from F. M. Hicks.

Mr. Cowan: Then you have the original cost of this engine?

Mr. Foster: Yes, sir.

Mr. Cowan: Do you keep the expense of fuel used in that engine by the mile; do you keep that separately for this track between Landers and that unloading station?

Mr. Foster: We keep our railroad books in accordance with the instructions of the Commission, and make those reports to them, and they accept them.

Mr. Cowan: I wondered how you kept your accounts to know how the expense of operation was on this incorporated road, doing what you claim is the interstate business.

95 Mr. Foster: It is a very easy proposition; it is entirely separate from the other.

Mr. Cowan: How do you keep it separate, if you do not keep the fuel account——

Mr. Foster: We do keep the fuel account; we charge it with all the coal furnished us; it has got a large bin of its own.

Mr. Cowan: Now, that means all the coal that it burns?

Mr. Foster: It means the coal that is used on the main line; yes, sir.

Mr. Cowan: That is what I was asking. Do you keep that separate from Landers on?

Mr. Foster: Yes, sir; from Landers on to Walco.

Mr. Cowan: You keep that coal separate?

Mr. Foster: That coal is in a separate bin by itself, and all the supplies and everything that enter into that part of the road.

Mr. Cowan: I thought you said this engine went down into the woods and got the cars.

Mr. Foster: It does.

Mr. Cowan: How do you manage by keeping it in a separate bin to keep a separate account of the cost of the amount consumed between Landers and Walco? You load up your tender

96 with coal and make the trip and back?

Mr. Foster: Yes, sir.

Mr. Cowan: By what method do you keep it separate from Landers up to Walco?

Mr. Foster: Well, in that particular, I do not think it is kept separate, sir, any more than it is an estimate of what is used on the main line, when she makes that trip.

Mr. Cowan: Do you keep separate the wages of your engineer and fireman?

Mr. Foster: On the main line?

Mr. Cowan: Separate from Landers up to Walco, to what it is on the balance of the trip after you get the cars?

Mr. Foster: No.

Mr. Cowan: These men make that round trip in a day?

Mr. Foster: They make three of them.

Mr. Cowan: And they work for you from Landers out, to where they get the train and come back to Landers; is that right? I mean work for the lumber company?

Mr. Foster: They work for the railroad company all the way, the entire trip.

Mr. Cowan: The service, then, beyond Landers is for the Malvern & Freeo Valley Railroad Company?

97 Mr. Foster: The Malvern & Freeo Valley Railroad Company performs it, and the lumber company pays them for it beyond Landers.

Mr. Cowan: That is so much a thousand for the logs?

Mr. Foster: Yes, sir.

Mr. Cowan: Are there any separate entries in fact in the books of the Malvern & Freeo Valley Railroad, to show the expense of that engine while on the track of the incorporated company, compared to the expense on the track of the other company?

Mr. Foster: I think not.

Mr. Cowan: After you have unloaded your logs into the pond, how long until you saw them?

Mr. Foster: We have a pond capacity of about half a million feet of logs, and a mill capacity of about 175,000 feet a day. Now, we may get logs in the pond that will lay there a year; ordinarily they are sawed within 24 hours.

Mr Cowan: Do you know anything about where the lumber is going to that you make out of those logs when they are put into the pond?

Mr. Foster: No.

Mr. Cowan: Do not have any idea?

98 Mr. Foster: Not the slightest.

Mr. Cowan: Do not have any idea what the rates are going to be on that lumber?

Mr. Foster: Not the slightest.

Mr. Cowan: And-you do not know whether it is going intrastate or not?

Mr. Foster: No.

Mr. Cowan: It may go to Little Rock or some other place in Arkansas?

Mr. Foster: No.

Mr. Cowan: When you make out a bill of lading for the shipment of a carload of lumber, do you make the bill of lading read as the point of origin at Landers?

Mr. Foster: Yes.

Mr. Cowan: But it is not, in point of fact, there?

Mr. Foster: Not as lumber; it is milled into lumber, and it starts as logs there.

Mr. Cowan: Suppose that lumber is going to a Texas point; did the logs start from Landers to Texas?

Mr. Foster: Yes, sir.

Mr. Cowan: How do you know that, when it goes into the pond, and you do not know where it is going to from that?

99 Mr. Foster: Because there are absolutely no other logs go into the pond.

Mr. Cowan: Except what logs go to Texas?

Mr. Foster: Except what logs I might send there. Do you mean the mill's particular logs?

Mr. Cowan: Yes.

Mr. Foster: It is absolutely the only log supply we have which come over that road.

Mr. Cowan: But when you bill out a car of lumber to Texas, you make that billing from Landers?

Mr. Foster: Yes, sir.

Mr. Cowan: Because you brought the logs from there?

Mr. Foster: Yes, sir.

Mr. Cowan: But those logs did not start to Texas. They may have started to anywhere that the lumber happens to go?

Mr. Foster: Well, they started for Texas as much as any milling in transit proposition; as much as a bushel of corn starts for Europe, or it may start for Asia; it gets milled into corn meal somewhere; you do not undertake to preserve the identity of the particular bushel of corn that went one way or the other, nor do we the logs.

Mr. Cowan: Do you think if the identity of the grain is

100 to be preserved, that therefore the identity of the lumber in the logs should be preserved?

Mr. Foster: I do not know anything about that.

Mr. Armistead: If I may interpose an objection, I object to that. It is asking the opinion of the witness.

Commissioner Harlan: Well, this gentleman is president of a railroad company, and he ought to know about these things.

Mr. Armistead: It seems to me it just calls for his opinion.

Commissioner Harlan: Well, we want his opinion. It may help us.

Mr. Armistead: All right; I withdraw my objection.

Mr. Cowan: You do not know but what the bill of lading issued today at Landers on lumber which you load out from Waco may have in the car logs that were sent a year before into the mill pond from Landers?

Mr. Foster: Yes, sir; it may have.

Mr. Cowan: What is the use of billing this lumber from Landers? You do not load it there? What is the use of that?

Mr. Foster: To avail ourselves of the milling in transit privilege.

Mr. Cowan: Where is that privilege defined that you avail

101 yourselves of, that makes it necessary to make a billing from a place where you do not ship the lumber?

Mr. Foster: Sir?

Mr. Cowan: Where is that privilege defined?

Mr. Foster: I think not very many years ago the interstate Commerce Commission said that the operation would come within the limits of the milling in transit privileges.

Mr. Cowan: There was no other purpose in making the bill of

lading read from Landers except to get a division of the rate, was there?

Mr. Foster: That was the purpose.

Mr. Cowan: Is Walco on the line of the Rock Island?

Mr. Foster: It is within about a half a mile; between a quarter and half a mile of it.

Mr. Cowan: It is not on the line of the Rock Island?

Mr. Foster: Not exactly.

Mr. Cowan: Is it on the line of the Iron Mountain?

Mr. Foster: Probably a thousand feet away.

Mr. Cowan: The actual movement of the lumber, then is over that short distance to the connection with each place?

Mr. Foster: We take the cars in there and switch them back and load them.

102 Mr. Cowan: Do they bring their engines onto your track to get these cars, or do you set them on their tracks?

Mr. Foster In the case of the Rock Island, we go in to their tracks after the empties and set the loads, and in the case of the Iron Mountain, their engine just backs in on the head of their tracks with their empties.

Mr. Cowan: Where you have set the loaded cars?

Mr. Foster: Yes, sir.

Mr. Cowan: About the actual service after the lumber is manufactured, and you know where it is going to; after it is loaded in the car, the actual service is over this short space of track?

Mr. Foster: In the lumber shipped in the form of lumber, yes, sir.

Mr. Cowan: And the railroad company hauls no lumber, neither is any loaded at Landers whatever?

Mr. Foster: Not of lumber.

Mr. Cowan: Why not have this three cents allowance, just for the switching from your mill to the Rock Island, and the Iron Mountain tracks? Why not have it applied to the whole movement of the lumber, as you are billing the lumber out?

Mr. Foster: Well, we had the Rock Island to deal with and
103 the Iron Mountain to deal with, and we made the kind of deal we could make, the best deal we could make.

Mr. Cowan: But in most cases why should not the billing be simply from Walco—you say it is on your line and not on theirs—to the destination of the lumber, and not from Landers, a place where the lumber never moved from?

Mr. Foster: Because the railroad considered itself well within its rights to have the milling in transit privilege, and that was the way it had to take its business, and avail itself of it.

Mr. Cowan: Do you estimate what was the cost of the service from Landers to the junction point with the Rock Island and the Iron Mountain?

Mr. Foster: Yes, sir, we know about what it is.

Mr. Cowan: Did that form the basis of the three cents per hundred pounds?

Mr. Foster: Yes, sir.

Mr. Cowan: You estimated the cost of the service on the lumber?

Mr. Foster: Yes, sir.

Mr. Cowan: From Landers?

104 Mr. Foster: Yes, sir.

Mr. Cowan: Did you estimate the cost of the service on the logs?

Mr. Foster: We estimated—the operation is very simple to reduce lumber back to logs or logs back to lumber to get your feetage or tonnage.

Mr. Cowan: When you estimate the service to be three cents per hundred pounds on lumber, how did you get at the figures; did you estimate that that would be what it would cost if you did move the lumber, or what it had cost you to move the logs?

Mr. Foster: It is what it cost us practically in each case; it cost us that much to move the raw material from Landers to Walco, that is what it would amount to at three cents per hundred pounds turned into lumber.

Mr. Cowan: Then up to the time you loaded it on the cars at Walco, you estimated in your trade with the Rock Island and the Iron Mountain that it would cost you three cents per hundred pounds to move the logs; that is, three cents per hundred pounds, estimated in lumber measurement, from Landers to your unloading place at the pond?

Mr. Foster: Yes, sir.

Mr. Cowan: You then did not count anything for the

105 switching of these cars of lumber out to the other roads?

Mr. Foster: We estimated that was practically the service we put into it;; I do not know that I could give you just exactly the detail of that, sir, or just how we arrived at it or just what we did. We got the best milling in transit rate we could get.

Mr. Cowan: The rate was fixed at three cents because it was based on the cost of the service; you are certain of that?

Mr. Foster: That was one of the considerations.

Mr. Cowan: What other one was there, if there was any other?

Mr. Foster: The other consideration was that it was practically what was being paid by the logging road at that time so we were assured when we came down there, for the moving the raw material to the mill.

Mr. Cowan: Who made that trade with the Rock Island? Did you make it?

Mr. Foster: Yes, sir, I made the trade.

Mr. Cowan: With what man did you make the trade?

Mr. Foster: Oh, I dealt with quite a number of them.

Mr. Cowan: But there must have been somebody who came

106 to this common estimate of what it cost.

Mr. Foster: I think the principal part of the trade was made with their division freight agent at that time, Mr. Morrison.

Mr. Cowan: Did you and he sit down and figure what it would cost you to perform this service, or what it would cost them to perform it?

Mr. Foster: No, I did not talk with him about that part of it specially, that I know of. That was my part of it.

Mr. Cowan: Did you talk with him about what it cost to handle this lumber from your loading platform or stack or whatever you call it, out to their tracks?

Mr. Foster: The trade with the Rock Island was made long after we already had a traffic arrangement with the Iron Mountain.

Mr. Cowan: I understand that, but my question was, did you and he estimate what it would cost you to switch this lumber from the place where you loaded the cars over to their tracks?

Mr. Foster: I don't remember.

Mr. Cowan: That did not enter into it.

Mr. Foster: I do not remember the details of the conversation.

107 Mr. Cowan: Did that enter into it at all or not? You ought to know, you made the trade.

Mr. Foster: I have made hundreds of trades eight or nine years old that I cannot remember the details of, my conversation in regard to them.

Mr. Cowan: You can recollect whether or not you figured what it actually cost you to move the car when actually loaded?

Mr. Foster: I do know, sir, as a positive fact, that the three cents per hundred pounds practically is the cost of moving the raw material from the edge of the timber at Landers to the mill, the service we perform on it.

Mr. Cowan: To the mill?

Mr. Foster: Yes, sir.

Mr. Cowan: Independent of the cost of switching the car of lumber to the other tracks?

Mr. Foster: Yes, I think that represents practically the cost of the service that we perform on the logs and lumber, the upkeep of that portion of the road.

Mr. Cowan: Why should the Rock Island pay you for moving the logs from Landers to your saw mill?

Mr. Foster: Well, they would have the choice, if they wanted the tonnage, of building their own road down there and

108 producing it or else paying us for bringing it up there.

Mr. Cowan: Suppose they had built their own road down to Landers, what would they have gotten? You already had your own to bring the logs to the mill?

Mr. Foster: No.

Mr. Cowan: Didn't you have your road to Landers when you made the trade with the Rock Island?

Mr. Foster: That is where the lumber began; we started from there.

Mr. Cowan: Did you not have your own road to Landers when you made the trade with the Rock Island, and was it not incorporated at that time?

Mr. Foster: No, it was not.

Mr. Cowan: Was it incorporated when you made the contract with the Rock Island?

Mr. Foster: Yes, sir, and this contract is in force now.

Mr. Cowan: If they had built their road to Landers, they would not have gotten lumber, you had no saw mill there?

Mr. Foster: The property would probably have been put up in different shape.

Mr. Cowan: What property?

Mr. Foster: The entire property. Originally it was put up
109 as the two properties together, and it was afterwards separated and incorporated and chartered, one as a railroad and the other as a lumber company.

Mr. Cowan: You already had your mill at Walco, when you made the trade with the Rock Island?

Mr. Foster: Yes, sir, and we already had the Iron Mountain and we could have turned the entire traffic to them.

Mr. Cowan: Why should the Iron Mountain pay you for bringing your logs up?

Mr. Foster: Because when we made the trade with the Iron Mountain, we had neither mill nor railroad.

Mr. Cowan: But why should they pay for bringing the logs to the mill?

Mr. Foster: They should pay, if they want the traffic, if they want the tonnage, if it costs to go off into the forest after the tonnage, they should either pay us for the service, or perform the service themselves, if they expect to receive the tonnage.

Mr. Cowan: Is that why they did it?

Mr. Foster: I expect that is the reason they did it, to get the tonnage.

Mr. Cowan: Is that your understanding of it?

110 Mr. Foster: Yes, sir; to get the tonnage.

Mr. Cowan: When you made the trade with the Rock Island, you agreed you would give them not less than a certain amount of your tonnage?

Mr. Foster: Yes, sir.

Commissioner Harlan: Are you making that statement now as president of the lumber company or the railroad company?

Mr. Foster: I am talking entirely as the president of the railroad company. I understand that is the one that is being investigated, and I am talking from that standpoint.

Mr. Cowan: This Malvern & Freeo Valley Railroad Company was under no obligation to haul your logs from Landers to the saw mill except what you paid them for doing?

Mr. Foster: Under no obligations to haul the logs from Landers to the saw mill?

Mr. Cowan: Yes, except what they were paid for doing.

Mr. Foster: Well, I suppose they were not.

Mr. Cowan: And did they at any time agree with the saw mill industry that they would haul your logs for a certain period for a certain amount?

Mr. Foster: To the railroad company?

Mr. Cowan: Yes.

111 Mr. Foster: They have got a contract with the lumber company to haul the logs, yes, sir.

Mr. Cowan: What do they charge for hauling the logs from Landers to Walco?

Mr. Foster: They do not charge the lumber company anything. They controlled the tonnage and sold the tonnage.

Mr. Cowan: They sold the tonnage?

Mr. Foster: They sold the tonnage to the Rock Island and Iron Mountain.

Mr. Cowan: Does the lumber company get any advantage out of that?

Mr. Foster: Only just what you please to call the community of interests, they are both held by the same stockholders.

Mr. Cowan: As representing the lumber company, would you have any objection to the cancellation of that allowance of three cents per hundred pounds to the railroad company?

Mr. Foster: I should think I should. I do not see any reason why I should not object.

Mr. Cowan: Why should you object to it?

Mr. Foster: Because I have got myself to consider in all the interests I have got charge of and am responsible for.

112 Mr. Cowan: The lumber company owns the stock in the railroad company?

Mr. Foster: Yes.

Mr. Cowan: If the railroad company gets a profit out of this three cents a hundred pounds, the lumber company gets it, because the lumber company owns the stock?

Mr. Foster: They get it through their dividends in their stock holdings in the Malvern & Freeo Valley Railroad.

Mr. Cowan: Before you had this contract with the Rock Island, and before you were incorporated, did you get the allowance then?

Mr. Foster: Yes.

Mr. Cowan: Who got that?

Mr. Foster: The railroad company.

Mr. Cowan: It was not a company then; it was not incorporated.

Mr. Foster: It was not an incorporated railroad; it was a railroad.

Mr. Cowan: It was a railroad, but was simply a road that was built by the lumber company?

Mr. Foster: Yes.

Commissioner Harlan: He explained that this morning;

113 that there was no chartered company, and he says the railroad got it, and he also said that the lumber company got it after the railroad got it.

Mr. Cowan: Why was the road incorporated; what business reason led you to incorporate the railroad?

Mr. Farrar: Why, to be—that was done for the express purpose of legalizing as far as we knew how, the custom that had been in existence in Arkansas and Louisiana for years and years, since the establishment of the lumber business.

Mr. Cowan: Legalizing what?

Mr. Foster: Upon the payment of compensation from the trunk lines to the logging railroads for bringing the raw material to the mill; it was the custom throughout the country.

Mr. Cowan: The expense of maintenance of $6,000 per annum

for the engine; did that include the salary of the engineer and the fireman?

Mr. Foster: Yes, sir.

Mr. Cowan: And also the repairs on the engine and the fuel?

Mr. Foster: Yes, sir; that is only a general estimate.

Mr. Cowan: Yes. You have these items separate, though?

Mr. Foster: We have our books and our accounts, kept in
114 accordance with the instructions of the Interstate Commerce Commission.

Mr. Cowan: Do you pay the railroad company anything for the use of cars that are set over on your track?

Mr. Foster: No, sir.

Mr. Cowan: Do they pay you anything if you deliver them back in a certain length of time?

Mr. Foster: No, sir; I think there has never been anything between us.

Mr. Cowan: You have no demurrage rules, then, so-called?

Mr. Foster: None that are operative; none that we take advantage of.

Commissioner Harlan: And no per diem rules?

Mr. Foster: No, sir.

Commissioner Harlan: Any demurrage charged against the lumber company?

Mr. Foster: Yes, sir; in case we held the cars.

Commissioner Harlan: What was the last case you recollect?

Mr. Foster: Of a demurrage?

Commissioner Harlan: Yes.

Mr. Foster: I have no recollection of one.

Commissioner Harlan: To whom does the lumber com-
115 pany pay it?

Mr. Foster: They pay it to the owner of the car.

Commissioner Harlan: The Rock Island or the Iron Mountain?

Mr. Foster: The Rock Island or the Iron Mountain; yes, sir.

Mr. Cowan: How much free time do you have before you have to pay any demurrage?

Mr. Foster: I think it is 48 hours.

Mr. Cowan: How much is it per day?

Mr. Foster: One dollar.

Mr. Cowan: One dollar a day?

Mr. Foster: Yes.

Mr. Cowan: You have not your annual report here, that you make to the Interstate Commerce Commission?

Mr. Foster: No, sir.

Mr. Cowan: Speaking of the selling price of lumber which you mentioned, what do you base that on with respect to the freight rates, say, for example, you are selling a carload of lumber to go to a Texas point or one to Oklahoma City; doubtless you send lumber to most places—what is the basis of the price of that lumber with respect to the rate of freight?

Mr. Foster: It is the weight of the lumber, multiplied by
116 the rate from Landers to Oklahoma City or Texas, or wherever it goes.

Mr. Cowan: When you quote to the man you sell the lumber to a price for the lumber, do you quote it with the freight paid or F. O. B. at your mill?

Mr. Foster: We quote him freight paid, and we accept the expense bill as part of the remittance.

Mr. Cowan: And that is practically universally the case?

Mr. Foster: Yes, sir.

Mr. Cowan: Then your lumber would net you the same, whether you sold it to go to Texarkana, Little Rock, Fort Worth, Oklahoma City or Chicago?

Mr. Foster: Yes, sir; it would be higher or lower according to the freight rate, delivered.

Mr. Cowan: That is, higher or lower to the producer?

Mr. Foster: At the point of destination, but the same at the mill.

Mr. Cowan: What other traffic does the Rock Island get at Walco except from your mill?

Mr. Foster: They get the inbound tonnage on all our commissary supplies, camp supplies——

117 Commissioner Harlan: That is to be shown by exhibits filed by this witness. I think perhaps you need not ask for details.

Mr. Foster: I was asked for the inbound tonnage over the Rock Island.

Commissioner Harlan: You are to furnish that for three years.

Mr. Cowan: Do they get anything except that which comes off of your road, going into and out of your mill, or——

Mr. Foster: That has been growing in small quantities; as I stated before, the revenue to the Malvern & Freco Valley outbound on that class of tonnage has been $200 to $400 a month, and has been for some time.

Mr. Cowan: They have no station there at Walco?

Mr. Foster: They have an agent.

Mr. Cowan: Who occupies part of your offices?

Mr. Foster: Yes, sir.

Mr. Cowan: Who is that agent?

Mr. Foster: I am.

Mr. Cowan: That is all.

Mr. Armistead: The Malvern & Freco Valley extends in a southerly direction from Walco to the terminus at Landers, does

118 it not?

Mr. Foster: Rather southeast; it bears off to the east.

Mr. Armistead: What are the timber holdings or the estimated cut of timber in that contiguous territory belonging to the Wisconsin & Arkansas Lumber Company?

Mr. Foster: The present time?

Mr. Armistead: At the present time.

Mr. Foster: About 500,000,000 feet.

Mr. Armistead: What period of time do you anticipate, if you have made estimates, will be required to cut that timber?

Mr. Foster: Somewhere from twelve to fourteen years.

Mr. Armistead: So that this tonnage will be there for that period, for that length of time, estimated?

Mr. Foster: Yes, sir.

Mr. Armistead: What estimated cut had you there when the railway line which is now incorporated and known as the Malvern & Freeo Valley was first laid?

Mr. Foster: The lumber company held, when we laid the rails, about 600,000,000 feet of timber, and we estimated that there was about 300,000,000 feet which we could acquire title to as we went on. The original deal contemplated about 600,000,000 feet of timber.

119 Mr. Armistead: Is there any reasonably practical or feasible method of logging that country; that is, transporting the logs out of it, other than by railway?

Mr. Foster: No, sir. It must come that way; there are no other facilities.

Mr. Armistead: What is the character of the country with reference to its topography?

Mr. Foster: It is rough, hilly country, cut in two by a ridge that is the back bone between the Ouachita and Saline Rivers; this ridge runs right through the middle of them, and the streams on each side cut it down into valleys and hills.

Mr. Armistead: What sort of a line has your incorporated line, the Malvern & Freeo Valley, with reference to construction and permanence?

Mr. Foster: Well, construction, standard ties, standard gauge, 45 pound steel, well drained, and a road that we can run as fast as they can run on any road, and well kept up.

Mr. Armistead: Do you hold yourselves out to the public as a common carrier, in that you are ready to perform any service that is offered?

Commissioner Harlan: We will not stop on that. It is incorporated as a common carrier, and it must be assumed that in
120 all these cases that affirmative reply will be made to these questions. The question is whether there is any stuff there to carry.

Mr. Armistead: Is this a country adapted to farming, when denuded of timber?

Mr. Foster: Yes, sir.

Mr. Armistead: What crops are raised in that soil?

Mr. Foster: Cotton and corn, principally.

Mr. Armistead: Fruit?

Mr. Foster: Good fruit country. It has not been developed.

Mr. Armistead: Is it not a fact that it is a strawberry and canteloupe coutnry immediately around there?

Mr. Foster: Yes, sir; good fruit country.

Mr. Armistead: Have you any prospects of extending this road?

Mr. Foster: Yes, sir.

Mr. Armistead: What are they?

Mr. Foster: The road was originally chartered to Lono, a small town, and we are within about five miles of it, and we have been

urged and are contemplating now the extension of the line to Lono.

121 Mr. Armistead: What is there at Lono?

Mr. Foster: It is a little, small country village; it is the headquarters for the farmers about there.

Mr. Armistead: Farming country around there?

Mr. Foster: Yes, sir. Very well developed farming country. It is right on that ridge; it is a little farming center, is what it is.

Mr. Armistead: We will ask leave to file as a part of the record in this case the contract between the railroad company and the Wisconsin & Arkansas Lumber Company, which has been referred to in the examination. I believe it is on file with the Commission.

Commissioner Harlan: Then it need not be filed again.

Mr. Armistead: We would ask leave to file a detailed statement in the way of a tabulated statement and explanation for the tabulation, of the cost of the construction of this road, the cost of the operation, the net and gross earnings, the character of freight or traffic from which these earnings are derived, and a copy of the charter granted to the road by the State of Arkansas.

Commissioner Harlan: That need not be filed. It is the

122 ordinary charter, I suppose, under the State law.

Mr. Armistead: We would ask leave to file and make part of this record a map of the Malvern & Freeo Valley Railroad, drawn on scale, showing the physical location of the railroad, the physical location of the lines of the connecting carriers, the St. Louis, Iron Mountain & Southern and the Chicago, Rock Island & Pacific, the location of the town of Malvern, the station of Walco, the mill of the Wisconsin and Arkansas Lumber Company and the logging operations of the lumber company at the terminus of the Malvern & Freeo Valley Railroad and approximately the topography of the country, and also the location of the timbered lands of the Wisconsin & Arkansas Lumber Company. I will state to your Honor that the usual maps drawn with rough approximations would not be proper, and we want to file a map drawn to scale by an engineer, and we will have to prepare such a map.

Commissioner Harlan: Very well.

Mr. J. L. Coleman: Is all of this inbound freight destined to your stores?

Mr. Foster: The inbound is consigned to the Wisconsin & Arkansas Lumber Company.

Mr. J. L. Coleman: No other storekeeper operates in that

123 territory?

Mr. Foster: Not at Walco; no, sir.

Mr. J. L. Coleman: Do you make a local rate from Walco to the Commissary on the inbound stuff?

Mr. Foster: No, this Malvern & Freeo Valley has no local rate there.

Mr. J. L. Coleman: How do you account for the fact that no other storekeeper operates in that territory?

Mr. Foster: At Walco?

Mr. J. L. Coleman: At any other of your commissary points.

Mr. Foster: Well, we have just got one. We have two commissaries, one in the woods and one at the mill.

Mr. J. L. Coleman: And of course your company wants to keep control of that?

Mr. Foster: Yes, sir; we own it lock, stock and barrel.

Mr. J. L. Coleman: Do you interchange transportation with trunk line railroads?

Mr. Foster: Yes, sir.

Mr. J. L. Coleman: Does the Rock Island or the Iron Mountain Railroad give to your officers transportation?

Mr. Foster: We have two annuals on each road.

Mr. J. L. Coleman: One for whom?

124 Mr. Foster: One from each road for myself, and one from each road for F. H. McCormack.

Mr. J. L. Coleman: Is he the traffic manager?

Mr. Foster: Yes, sir.

Mr. J. L. Coleman: Also he is salesman for the lumber company?

Mr. Foster: He is the general superintendent for the lumber company.

Mr. J. L. Coleman: And he is also sales manager for the lumber company?

Mr. Foster: He handles the sales.

Mr. J. L. Coleman: I suppose in the course of his business for the lumber company he would use those annuals in traveling?

Mr. Foster: Well, I don't know whether——

Commissioner Harlan: If he is wide awake the Commission should suppose he does use those annuals, unless this witness says he does not.

Mr. J. L. Coleman: That is what I want to know.

Mr. Foster: Well, he does.

Mr. J. L. Coleman: Do you use yours?

Mr. Foster: Yes, sir; repeatedly. Every day of my life.

Mr. Coleman: So when you get transportation from the

125 trunk line railroads, you use it in soliciting business for the lumber company?

Mr. Foster: I do not undertake to dissolve myself from one relation to the other every time I get onto a train. I have the transportation, and I use it.

Mr. J. L. Coleman: So if you were going on lumber business, competing with some other lumber company, you would assume that you were still president of the railroad and use that transportation?

Mr. Foster: I think I would assume it; yes, sir.

Mr. J. L. Coleman: Now, Mr. Foster, why did you not incorporate the logging railroad from Landers to the woods?

Mr. Foster: Well, we did not want to incorporate it.

Mr. J. L. Coleman: Well, is that the best answer?

Mr. Foster: I think that is answer enough, unless the Commission thinks I ought to go into it a little more in detail.

Commissioner Harlan: We want to know all the facts, if there are any other reasons.

Mr. Foster: We wanted to control that timber company.

Mr J. L. Coleman: You wanted a monopoly?

Mr Foster: Yes, sir—no, we did not want a monopoly, but we wanted to control that section of the country.

126 Mr. J. L. Coleman: You wanted to move the lumber right down there from Landers so no other man could come in and acquire timber country afterwards?

Mr. Foster: Yes, sir.

Mr. J. L. Coleman: That is one of the reasons you acquired other territory there?

Mr. Foster: Yes, sir.

Mr. J. L. Coleman: In the course of 14 years, you think all the lumber will be gone?

Mr. Foster: Practically.

Mr. J. L. Coleman: Well, will you take up your railroad track?

Mr. Foster: I could not tell you?

Mr. J. L. Coleman: You do not know?

Mr. Foster: No.

Mr. J. L. Coleman: So you don't know whether this road will be a lumber road or not?

Mr. Foster: I do not imagine we will ever take the road up. I do not know whether we will continue to operate it ourselves or not. We may sell it.

Mr. J. L. Coleman: Is it not true it is used now solely as an incident to the manufacture of lumber?

127 Mr. Foster: It is used largely in that traffic. Its principal traffic is the raw material from Landers to Walco.

Mr. J. L. Coleman: This land which promises cotton and corn and fruit has not produced any yet?

Mr. Foster: Oh, yes; that is quite a very productive farming country.

Mr. J. L. Coleman: But it is not shipped over your road?

Mr. Foster: No. Not a great deal of it.

Mr. J. L. Coleman: Have you a through rate on merchandise in bound?

Mr. Foster: We have to Walco.

Mr. J. L. Coleman: From St. Louis and Chicago?

Mr. Foster: On inbound?

Mr. J. L. Coleman: Yes.

Mr. Foster: You mean the railroad company?

Mr. J. L. Coleman: The lumber company or anybody?

Mr. Foster: No.

Mr. J. L. Coleman: Is there a through rate from St. Louis to Walco?

Mr. Foster: I think so.

Mr. J. L. Coleman: Do you get a division of that through rate?

128 Mr. Foster: No.

Mr. J. L. Coleman: You do not?

Mr. Foster: No.

Mr. J. L. Coleman: Who are the other carriers making that through rate?

Mr. Foster: The Iron Mountain.

Mr. J. L. Coleman: And who else?

Mr. Foster: The Rock Island.

Mr. J. L. Coleman: How could it be a through rate if there is only one road in it?

Mr. Foster: The Iron Mountain is absolutely at our doors.

Mr. J. L. Coleman: I do not want to have you misunderstand me. I asked if there is a through rate on the merchandise to Walco.

Mr. Foster: Yes.

Mr. J. L. Coleman: If there is, there must be more than one carrier joining in it.

Mr. Foster: I do not know why. Walco is on the Iron Mountain just as much as it is on the Malvern & Freeo Valley. Walco can have two railroads and not necessarily have to ship in anything, it ships in over both of them.

Mr. J. L. Coleman: Didn't you say to Mr. Cowan just now
129 you had a switch from your Walco place to these other roads?

Mr. Foster: Yes.

Mr. J. L. Coleman: Well, what is the answer?

Mr. Foster: The answer is that for inbound merchandise the main line of the Iron Mountain Railroad is within 200 feet of the commissary.

Mr. J. L. Coleman: But for outbound merchandise?

Mr. Foster: It is the same place. The facilities are such for the lumber company that they did not have their planing mill on the same spot they have the commissary.

Mr. J. L. Coleman: It depends which way you look at it; whether from St. Louis or Walco; if it forms a connection.

Mr. Foster: We can get there inbound from the Iron Mountain or send it out locally, without its going over the Malvern & Freeo Valley at all, but we cannot ship carloads that way, and the lumber business is a carload business.

Mr. J. L. Coleman: When you had this transfer from the lumber company to the railroad company of all the equipment, and when you decided upon a capital stock, did you acquire, as being represented by that $175,000 of capital stock, all of the equipment?

Mr. Foster: Yes, sir.

130 Mr. J. L. Coleman: You included that used on the logging road?

Mr. Foster: Yes.

Mr. Coleman: And as a matter of fact, though, that is used solely for the lumber company?

Mr. Foster: No.

Mr. J. L. Coleman: And not the logging road?

Mr. Foster: You mean the rails of the logging road? No, sir; that never entered into the cost of the main line of the Malvern & Freeo Valley or in any way into the $169,000, that is represented by stocks.

Mr. J. L. Coleman: Do not misunderstand me. I mean equipment, cars and engines.

Mr. Foster: Yes, sir; the equipment, cars and the engines, and

the nine miles of road, with its grade and right of way and bridges, and everything that goes with it cost $169,000 and belongs to the railroad company.

Mr. J. L. Coleman: True, but some of those cars and engines are used on the logging railroad.

Mr. Foster: They are rented at an annual rental provided for in the contract.

131 Mr. Coleman: Supposing these divisions were cancelled, would you stop milling?

Mr. Foster: I do not think we would.

Mr. J. L. Coleman: You would still go on?

Mr. Foster: I expect we would.

Mr. J. L. Coleman: Supposing that divisions were cancelled with every man in a similar situation as your company, the milling business would still go on, I suppose?

Mr. Foster: I anticipate that it would be here with us.

Mr. J. L. Coleman: Have you any objection to telling the Commission what you paid for your acquirement of timber land out in that country?

Mr. Foster: What we paid for the timber? I have, unless the Commission insists on it. I think——

Commissioner Harlan: We will not go into that question.

Mr. Armistead: That question is directed to the Wisconsin and Arkansas Lumber Company?

Mr. Coleman: Well, the gentleman has difficulty in dissolving those two relations.

Mr. Armistead: No, he has not, and furthermore, he is not here to be submitted to any insults from you.

Mr. J. L. Coleman: That is all.

132 Examiner Burchmore: You testified that this Malvern & Freeo Valley Railroad was constructed by a regular railroad contractor and paid for by the lumber Company originally?

Mr. Foster: Yes.

Examiner Burchmore: Who furnished the rails and fastenings?

Mr. Foster: We bought them in the open market.

Examiner Burchmore: The rails and fastenings or no part of the line were furnished by the Iron Mountain?

Mr. Foster: No, not a foot of them by any railroad. We bought and paid for the new rails in the open market.

Commissioner Harlan: Do you have an agent at Landers——

Mr. Foster: Yes, sir.

Commissioner Harlan: Wait a moment, I am not finished. To accept the logs that come in on the logging road and bill them out?

Mr. Foster That is all done on the outbound shipments of the lumber. There are no bills made on the Malvern & Freeo Valley, except we keep a record of the cars that go over the road every day and they are loaded just as full as they will carry, and at Walco it is cut into lumber and dried and put through the planing mill, and then the bills of lading are made as the shipments are made into the country.

133 Commissioner Harlan: I know, but the lumber company does not accept delivery at Landers and re-bill it at that point?

Mr. Foster: From Walco?

Commissioner Harlan: No, from Landers.

Mr. Foster: No, there are no bills made between Landers and Walco.

Commissioner Harlan: No record kept?

Mr. Foster: Except the movement of the car.

Mr. Cowan: You answered the Commissioner—he asked you the question which I think you probably misunderstood, if you had an agent at Landers, and you said "yes, sir."

Mr. Foster: The three roads have a joint agency.

Commissioner Harlan: You are talking about Walco?

Mr. Foster: Yes, sir.

Commissioner Harlan: I was asking about Landers.

Mr. Foster: No, there is no agent.

Commissioner Harlan: You do not keep any record or billing there?

Mr. Foster: No, absolutely not.

Commissioner Harlan: The name Walco comes from the initials of the lumber company, does it?

Mr. Foster: Yes, sir.

134 Mr. Cowan: There was one item of your evidence wherein I understood you to say that the engines that the lumber company had were sold or transferred to the railroad company, the Freeo Valley Company, and then the engines were rented back and a rental paid for use in the logging camps; is that correct?

Mr. Foster: Yes, sir.

Mr. Cowan: What was the business reason for selling the engines to the railroad company, which were going to be used by the lumber company, and then leasing the engines back from the railroad company by the lumber company?

Mr. Foster: Well, it was all property that naturally would come under the head of a railroad, and it was all put together and the cost accounted for or made up and the stock for the railroad company issued accordingly when the transfer was made.

Mr. Cowan: And the same reasons should have applied to the track. The track is a thing that approximately would belong to a railroad?

Mr. Foster: Yes, sir.

Mr. Cowan: You knew that these engines of the sort only
135 fit for a logging camp that happened to be used there or not at all, the railroad company could not use them?

Mr. Foster: Well, they were originally railroad engines, they were engines, almost all of them, which came off the Lackawanna System.

Mr. Cowan: But you stated two engines were——

Mr. Foster: Well, two engines were geared engines, yes, sir, but those are frequently used on railroads in rough countries.

Mr. Cowan: Do your books show the value of the unincorporated part of your railroad?

Mr. Foster: That has been taken care of in logging operations and charged off every year as an operating account.

Mr. Cowan: These rails are in part laid down from place to places as you may want to reach the timber?

Mr. Foster: Yes, sir.

Mr. Cowan: And they are here today, and away tomorrow——

Mr. Foster: That is true of a large portion of the track. Of course we start in in the timber nearest the mill, and keep on through and leave the track which will take care of the timber farthest away, and it becomes a logging road.

Mr. Cowan: If the railroad company were to lease two or
136 three miles beyond Landers, you might just as well bill it from out there as from Landers?

Mr. Foster: If they had tracks down there, I suppose they could do it.

Mr. Cowan: That is all.

Commissioner Harlan: That seems to be all. You are excused.

Mr. Armistead: Do you desire us to bring the other employees? The call came rather unexpectedly.

Commissioner Harlan: That is for you to say.

Mr. Armistead: Some other attorneys are going to ask the Commission to hold a session at Little Rock before an Examiner. I do not know what the Commission will do, but could we take in other witnesses at that time; anything that might occur to us?

Commissioner Harlan: That can be determined later. Perhaps it might be well to say that after the Red River & Gulf is disposed of, we will take up the Crittenden Railroad and the Crossett Railroad, and possibly that will consume the afternoon. *Perhaps* here interested in other railroads may perhaps want to be excused until tomorrow morning. We will first go through the Red River & Gulf and then the Crittenden and then the Crossett Railroad, and we will reserve the Prescott & Northwestern this afternoon also.

137 *Red River & Gulf Railroad Company.*

Commissioner Harlan: Is the Red River & Gulf Railroad Company ready?

Mr. Farrar: Yes, sir.

Commissioner Harlan: How many witnesses have you?

Mr. Farrar: I have only one. I have some documents to offer first. We offer the certified copy of the charter and amended charter of the Red River & Gulf Railroad.

Commisioner Harlan: Let me say that all your exhibits that are now in the record are considered as being in the record for all purposes. That is our practice. You need not get on the record what you have just offered, if it is already there.

Mr. Farrar: I will then make a general offer of the documents annexed to the petition. Under the statement made by the Commissioner, the Red River & Gulf offers the documents annexed to and made part of its petition in this case.

138 J. S. CROWELL was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Mr. Farrar: What connection have you with the Red River & Gulf Railroad?

Mr. Crowell: General manager of the Red River & Gulf Railroad.

Mr. Farrar: How long have you been general manager of the company?

Mr. Crowell: Since the organization in 1906, in the latter part of 1906.

Mr. Farrar: I show you this blue print, and ask you if that blue print correctly indicates the lines, route and connections of the Red River & Gulf Railroad.

Mr. Crowell: It does.

Mr. Farrar: What are the two termini of that road?

Mr. Crowell: Long Leaf, Louisiana, and Lecompte, Louisiana.

Mr. Farrar: On what line of railroad is Long Leaf?

Mr. Crowell: Long Leaf is on the Red River & Gulf Railroad and the St. Louis, Iron Mountain & Southern Railway.

Mr. Farrar: On what line is Lecompte?

139 Mr. Crowell: Lecompte is on the Rock Island, the Southern Pacific and the Texas & Pacific.

Mr. Farrar: Do the Texas & Pacific and the Southern Pacific at Lecompte use separate tracks, or do they use the same tracks?

Mr. Crowell: They use joint tracks; the same tracks.

Mr. Farrar: What is the length of the line of this road?

Mr. Crowell: 12¾ miles.

Mr. Farrar: How many stations are there on this road?

Mr. Crowell: Six or seven stations.

Mr. Farrar: What are their names?

Mr. Crowell: Long Leaf, Hurricane Creek, Forest Hill, Stamps Junction, Randolph, Holdup, Togo, Spring Hill and Lecompte.

Mr. Farrar: Are those stations flag stations or regular stations?

Mr. Crowell: They are all flag stations except the two termini and the Togo station.

Mr. Farrar: How many mills are there on the line of that road?

Mr. Crowell: There is one mill at Long Leaf, and there is a mill location at Togo; the mill burned recently.

140 Mr. Farrar: Recently burned?

Mr. Crowell: Yes, sir.

Mr. Farrar: Does this map correctly show the location of the mill which you say is at Long Leaf?

Mr. Crowell: Yes, sir, it does.

(The map so offered and identified was received in evidence and thereupon marked Red River & Gulf Railroad Exhibit No. 1, witness Crowell, received in evidence December 8, 1910, and is attached hereto.)

Mr. Farrar: Whom does the mill at Long Leaf belong to?

Mr. Crowell: To the Crowell & Spencer Lumber Company, Limited.

Mr. Farrar: Who does the mill at Togo belong to?
Mr. Crowell: To the Lecompte Lumber Company, Limited.
Mr. Farrar: What is the equipment of your railroad?
Mr. Crowell: We have one locomotive and four cars.
Mr. Farrar: What kind of cars are those?
Mr. Crowell: One is a combination passenger coach and freight car, and the others are flat cars.
Mr. Farrar: How many trains does this road run?
Mr. Crowell: One a day each way.
Mr. Farrar: What business do you do with those trains?
141 Mr. Crowell: We do a general business as a public carrier.
Mr. Farrar: Do you carry passengers?
Mr. Crowell: Yes, sir.
Mr. Farrar: Do you carry generall freight?
Mr. Crowell: We do; yes, sir.
Mr. Farrar: You have set forth in the petition in this case a detailed statement of the receipts and disbursements of this company for the years 1906, 1907, 1908 and the year 1909. Is that statement correct?
Mr. Crowell: It is; yes, sir; it is verified.
Mr. Farrar: You have also set forth in this petition a detailed statement of your receipts on finished lumber from the Crowell & Spencer Lumber Company and on finished lumber from the Lecompte Lumber Company and on miscellaneous freight such as hay, grain, groceries, household goods, cattle, furniture, and so forth, for each of those years; is that correct?
Mr. Crowell: It is correct; yes, sir.
Mr. Farrar: At this point, if your Honor please, we ask leave to file as part of this witness's testimony a similar statement for the year 1910.
Commissioner Harlan: Very well.
142 (The statement so offered and identified was received in evidence and thereupon marked Red River & Gulf Railroad Exhibit No. 2, witness Crowell, received in evidence December 8, 1910, and is attached hereto.)

Mr. Farrar: In explanation of two items in this statement, to wit, revenue for trackage from Rock Island gravel trains, and revenue from trackage for the Crowell & Spencer Lumber Company's log trains, we desire to offer the original trackage contract between the Red River & Gulf Railroad Company and the Rock Island, Arkansas & Louisiana Railroad Company, dated the 24th of August, 1907.
Commissioner Harlan: That is the original?
Mr. Farrar: Yes, sir; together with a map annexed which shows that portion of the line of the Red River & Gulf Road to which this trackage agreement applies. It covers only the hauling of gravel out of this pit.

(The paper so offered and identified was received in evidence and thereupon marked Red River & Gulf Railroad Exhibit No. 3,

witness Crowell, received in evidence December 8, 1910, and is attached hereto.)

Examiner Burchmore: Who was the other party to this contract?

143 Mr. Crowell: It is the Rock Island, Louisiana & Arkansas.

Mr. Farrar: It is one of the branch lines of the Rock Island. We next offer in evidence the original contract between the Crowell & Spencer Company and the Red River & Gulf Railroad covering contract for logging trains over a portion of this road, together with a map annexed showing what portion of the road is covered——

Commissioner Harlan: That is the Red River & Gulf Railroad operates logging trains for the lumber company?

Mr. Crowell: No, the lumber company operates logging trains over a portion of the Red River & Gulf.

Mr. Farrar: Together with a letter of the Railroad Commission of Louisiana, showing that this contract is duly filed with the Railroad Commission of Louisiana.

Commissioner Harlan: That need not be filed. The record will show that you offer to prove that, and that the contract has been filed with the State Commission.

(The paper so offered and identified was received in evidence and thereupon marked Red River & Gulf Railroad Exhibit No. 4, witness Crowell, received in evidence December 8, 1910, and is attached hereto.)

Mr. Farrar: This map or blue print which was offered in
144 evidence here shows this Crowell & Spencer tram road?

Mr. Crowell: Yes, sir; it does.

Mr. Farrar: This is the line marked here running south?

Mr. Crowell: Yes.

Mr. Farrar: Does your road handle any log trains on this tram road?

Mr. Crowell: The railroad company?

Mr. Farrar: Yes.

Mr. Crowell: No, sir, it does not.

Mr. Farrar: Who handles the logging trains on this Crowell & Spencer tram?

Mr. Crowell: The Crowell & Spencer Lumber Company.

Mr. Farrar: Who handles those logging trains when they come under this contract on this portion of the Red River & Gulf?

Mr. Crowell: They are handled under the despatcher of the Red River & Gulf Railroad.

Mr. Farrar: But I mean to say, whose locomotives are they that handle them?

Mr. Crowell: The Crowell & Spencer Lumber Company locomotives and crew.

Mr. Farrar: Has the Red River & Gulf Railroad Com-
145 pany any interest in the operation of that logging road, other than the revenue which it receives under this trackage contract?

Mr. Crowell: None whatever, no.

Mr. Farrar: Does the Red River & Gulf Railroad receive other than the trackage under this agreement, any compensation from the Crowell & Spencer Lumber Company or from any connecting railroad for any of the logs that are hauled over that track?

Mr. Crowell: No, sir; it does not.

Mr. Farrar: In your division of rates with these connecting lines, is any consideration whatever given to the hauling of these logs over this tram track by the Crowell & Spencer Company?

Mr. Crowell: No; none.

Mr. Farrar: You have no milling in transit arrangements whatever?

Mr. Crowell: No.

Mr. Farrar: You have no interests in this logging business whatever?

Mr. Crowell: None whatever.

Mr. Farrar: What are your relations to the Louisiana Railway Commission?

146 Mr. Crowell: The relations of any other common carrier railroad; we comply with their requirements.

Mr. Farrar: Do you obey their rules and regulations?

Mr. Crowell: Yes, sir.

Mr. Farrar: Do you make reports to the local Commission?

Mr. Crowell: Yes, sir.

Mr. Farrar: What reports do you make to the Interstate Commerce Commission?

Mr. Crowell: We make monthly and annual reports.

Mr. Farrar: Of what?

Mr. Crowell: Covering the transactions of business.

Mr. Farrar: To the Interstate Commerce Commission?

Mr. Crowell: To the Interstate Commerce Commission.

Mr. Farrar: How is your road treated in the matter of the assessment in this State?

Mr. Crowell: It is assessed the same as any other common carrier railroad.

Mr. Farrar: It is assessed by the Board of State Railroad Commissioners?

Mr. Crowell: Yes.

Mr. Farrar: Is your road liable to taxation or free from taxation, and if so, why?

147 Mr. Crowell: Free on account of the law that exempts roads from taxation for ten years, except for the rolling stock; we pay taxes on the rolling stock.

Mr. Farrar: You pay taxes on the rolling stock?

Mr. Crowell: And equipment; yes, sir.

Mr. Farrar: But you pay no taxes on your roadbed, because your road was built within the limit provided by the Constitution?

Mr. Crowell: Exactly.

Mr. Farrar: How is your freight that is shipped off from your road handled, in regard to billing?

Mr. Crowell: We bill it on our own way bills.
Mr. Farrar: How do you handle local freight?
Mr. Crowell: The same as we do other freight.
Mr. Farrar: You use way bills and bills of lading for local freight?
Mr. Crowell: Yes, sir.
Mr. Farrar: And how about interestate freight?
Mr. Crowell: We do the same on interstate freight.
Mr. Farrar: You issue bills of lading?
Mr. Crowell: And way bills.
Mr. Farrar: And way bills also?
148 Mr. Crowell: Yes, sir.
Mr. Farrar: Do you keep a set of books complete?
Mr. Crowell: Yes, sir.
Mr. Farrar: I show you these three books, which are called cash book, ledger and journal. Are they the books of your company?
Mr. Crowell: They are; yes, sir.
Mr. Farrar: Do they show a complete condition of your affairs, from the time that this company began to operate down to this date?
Mr. Crowell: They do; yes, sir.
Mr. Farrar: How are the funds of this company kept?
Mr. Crowell: They are kept by the company.
Mr. Farrar: Where?
Mr. Crowell: In banks.
Mr. Farrar: Where?
Mr. Crowell: Shreveport Commercial National Bank at present.
Mr. Farrar: Did you ever keep them any where else?
Mr. Crowell: We did for a while in the Lake Charles National Bank at Lake Charles.
Mr. Farrar: Were the funds of your company at any time ever kept in the custody of any other person or corporation?
149 Mr. Crowell: No, sir; they were not.
Mr. Farrar: Are the funds of your company now, or were the funds of your company ever at any time mingled with the funds of the Crowell & Spencer Lumber Company?
Mr. Crowell: No, sir; not to my knowledge.
Mr. Farrar: In this petition here you give a list of your stockholders?
Mr. Crowell: Yes.
Mr. Farrar: Is that list correct?
Mr. Crowell: It is; yes, sir.
Mr. Farrar: Is an account kept in your ledger with each one of those stockholders?
Mr. Crowell: Yes, sir; it is.
Mr. Farrar: Have you a certificate of stock?
Mr. Crowell: Yes, sir.
Mr. Farrar: That book will not be here until tomorrow——
Commissioner Harlan: You need not stop on the details of that book. It is true that the stockholders of the lumber company control, by stock ownership, the railroad company?

Mr. Crowell: Yes, sir.
Mr. Farrar: They are the same. I am going to prove it.
Commissioner Harlan: That can be admitted now through
the witness, that the ownership of the two companies is controlled by the same parties.
Mr. Farrar: Yes, sir, except one share of stock in this company is not owned by the lumber company. In whose name does stock of this company stand on your books?
Mr. Crowell: In the names of the individuals owning the stock.
Mr. Farrar: Whose names are shown in this ledger?
Mr. Crowell: Yes.
Mr. Farrar: Is there any difference, and if so, what, in the personnel of the stockholders of this company and the personnel the stockholders of the Crowell & Spencer Lumber Company?
Mr. Crowell: Only a slight difference; one share of railroad ock owned by outside parties.
Mr. Farrar: He is not a stockholder in the Crowell & Spencer umber Company?
Mr. Crowell: No.
Mr. Farrar: Who is that outside party?
Mr. Crowell: James Andrews, Alexandria.
Mr. Farrar: Has this company declared dividends?
Mr. Crowell: Yes, sir; it has.
51 Mr. Farrar: To whom have those dividends been paid?
Mr. Crowell: Paid to the stockholders.
Mr. Farrar: Do your ledger and your books show the payment of ese dividends to those individual stockholders?
Mr. Crowell: Yes, sir; they do.
Mr. Farrar: Have you got the receipts of those individual stockolders for those dividends?
Mr. Crowell: Yes, sir.
Mr. Farrar: Can you produce them?
Mr. Crowell: Yes, sir.
Commissioner Harlan: That will not be necessary. We will take he gentleman's word for all those details.
Mr. Farrar: What becomes of the money that you pay to the tockholders as dividends?
Mr. Crowell: I can only account for my own.
Mr. Farrar: What do you do with yours?
Mr. Crowell: I use it for my individual uses.
Mr. Farrar: Have you ever known of any instance——
Commissioner Harlan: I do not think that is necessary.
Mr. Farrar: I want to show that neither of these corporations ever receive any of these dividends.
52 Commissioner Harlan: That sufficiently appears. The witness has fully explained that there are two corporations nd they are owned by identically the same persons, and the divilends of the lumber company go to the stockholders of that comany, and the dividends of the railroad company go to the stockolders of that company, and they respectively dispose of their funds s they choose, and that is all of record.

Mr. Farrar: That is what I wanted to show; yes, sir.

Commissioner Harlan: Is James Andrews an employee of the railroad?

Mr. Crowell: He is the attorney of the railroad company, and also for the lumber company. He is not on a salary basis.

Mr. Farrar: Now, sir, who is president of the Lumber Company?

Mr. Crowell: C. C. Crowell, president.

Mr. Farrar: Who is president of the railroad company?

Mr. Crowell: C. C. Crowell; the same.

Mr. Farrar: What difference is there between the officers of the lumber company and this railroad company?

Mr. Crowell: Well, they are identical, with the exception that we have an auditor for the railroad company.

153 Mr. Farrar: You have an auditor in the railroad company?

Mr. Crowell: Yes, sir.

Mr. Farrar: Is he in any respect an employee of the lumber company?

Mr. Crowell: Yes, sir; he is.

Mr. Farrar: He is an employee, then, of both corporations?

Mr. Crowell: Yes, sir.

Mr. Farrar: Is he paid a salary by the railroad company?

Mr. Crowell: Yes, sir.

Mr. Farrar: Are the officers of the railroad company paid any salary?

Mr. Crowell: They are not; no, sir, outside of the one.

Commissioner Harlan: Except the auditor?

Mr. Crowell: Except the auditor.

Mr. Farrar: Now, the employees of the railroad company, the engineers and firemen and the conductors and tracknen and people of that sort, are they the employees of both corporations or the employees of only one?

Mr. Crowell: Only one.

Mr. Farar: Which one?

Mr. Crowell: The railroad company.

Mr. Farrar: Have you division rates with all of your railroad connections?

154 Mr. Crowell: Yes, sir.

Mr. Farrar: On all traffic of every sort.

Mr. Crowell: Of every sort; yes, sir, except with the Texas & Pacific, we have not lumber divisions with the Texas & Pacific at present.

Mr. Farrar: Do you divide rates with all of the roads that you connect with?

Mr. Crowell: Yes, sir.

Mr. Farrar: On all kinds of traffic?

Mr. Crowell: Yes, sir.

Mr. Farrar: Except with the Texas & Pacific, and with them you have no lumber divisions?

Mr. Crowell: No.

Mr. Farrar: Did you ever have any lumber divisions with the Texas & Pacific?

Mr. Crowell: Yes, sir.

Mr. Farrar: When were they cancelled?

Mr. Crowell: About a year and a half ago.

Mr. Farrar: Why?

Commissioner Harlan: I suppose that division was simply mislaid, was it?

155 Mr. Crowell: How is that?

Commissioner Harlan: What became of that division?

Mr. Crowell: That was cancelled by the Texas & Pacific.

Mr. Farrar: I have just asked you why they cancelled it?

Mr. Crowell: They explained they did not get enough business to justify the continuance of it.

Mr. Farrar: What is your division with the road you connect with at Long Leaf?

Mr. Crowell: Three cents.

Mr. Farrar: What is your division rate with the Rock Island, that you connect with at Lecompte?

Mr. Crowell: $2\frac{1}{2}$ to $4\frac{1}{2}$ cents; I believe that is correct.

Mr. Farrar: What is your division rate with the Southern Pacific, that you connect with at Lecompte?

Mr. Crowell: Three and four cents.

Mr. Farrar: When we say "Southern Pacific," we mean Morgan's Louisiana & Texas Railroad & Steamship Company, which, though operated as a separate corporation, is known as the Southern Pacific Company?

Mr. Crowell: Yes, sir.

156 Mr. Blair: Known as the Southern Pacific Lines.

Mr. Farrar: Known as the Southern Pacific Lines. I do not mean to say you are utterly lost and swallowed up; you have your identity still left.

Mr. Blair: As the Southern Pacific is denying it is a party to this suit, I wanted the record straight.

Mr. Farrar: Knowing the sensitiveness of the gentleman on that subject, I took his individual fractions and made them parties.

Mr. Blair: And the Southern Pacific also, which was unnecessary.

Mr. Farrar: I do not know whether it was necessary, but I thought I would gather them all up.

Commissioner Harlan: Well, the record will show. Let us get ahead.

Mr. Farrar: How long have these various divisions which you speak of with these three sets of connecting lines been in force?

Mr. Crowell: They have been in force since the completion of the line, with the exception of the Rock Island Lines, and those were put in after the completion of this line of theirs, which connects with our road.

157 Commissioner Harlan: When was your road organized?

Mr. Crowell: In 1905.

Commissioner Harlan: When was the track built?

Mr. Crowell: In 1905, and it began business in December of that year.

Commissioner Harlan: Built by the railroad company?

Mr. Crowell: Well, it was built by the Crowell & Spencer Lumber Company.

Mr. Farrar: I was just about to bring that out. Who did the actual, physical construction of this road?

Mr. Crowell: The Crowell & Spencer Lumber Company.

Mr. Farrar: Who did the title to this road come from, to this corporation?

Mr. Crowell: It passed by deed of record; we deeded the property over to the railroad company after its completion.

Mr. Farrar: What was the price for which this property was transferred?

Mr. Crowell: $101,000.

Mr. Farrar: What did that represent?

Mr. Crowell: It represented cash paid out in the construction of the line.

Mr. Farrar: The actual cash paid out?

158 Mr. Crowell: The actual cash paid out in constructing the line and equipping the line.

Mr. Farrar: What did the Crowell & Spencer Lumber Company receive as a consideration for that deed; what did they get back; what did they receive from the railroad company?

Mr. Crowell: That transaction was handled in this way; a dividend was declared and the money used to cover the purchase of the railroad company.

Commissioner Harlan: Who declared the dividend; which company?

Mr. Crowell: The Crowell & Spencer Lumber Company.

Commissioner Harlan: Declared a dividend out of surplus?

Mr. Crowell: Yes, sir.

Commissioner Harlan: Of $101,000?

Mr. Crowell: Yes, sir.

Commissioner Harlan: And that money, instead of being paid over to the stockholders, was used to build this road?

Mr. Crowell: Yes, sir.

Commissioner Harlan: Then the railroad company was organized?

Mr. Crowell: The railroad company was organized ahead of the construction.

159 Commissioner Harlan: And after the road had been built by the lumber company, it was turned over to the railroad company?

Mr. Crowell: Yes, sir.

Commissioner Harlan: And the railroad company paid for it in stock for that amount?

Mr. Crowell: Yes, sir.

Commissioner Harlan: And that included the equipment?

Mr. Crowell: Yes, sir.

Mr. Farrar: And that stock was declared as a dividend to the stockholders of the Crowell & Spencer Lumber Company?

Mr. Crowell: Yes, sir.

Mr. Farrar: Do you keep an agent at Lecompte?

Mr. Crowell: Yes, sir; we have two agents at Lecompte.

Mr. Farrar: Do you mean Lecompte?

Mr. Crowell: We have a joint agency there with the Rock Island and the Texas & Pacific.

Mr. Farrar: And another joint agency with the Texas & Pacific?

Mr. Crowell: Yes.

Mr. Farrar: Have you an agent at the other terminus?

160 Mr. Crowell: Yes, sir; we have.

Mr. Farrar: Do you issue time cards and schedules?

Mr. Crowell: Yes, sir; we do, and run trains on the schedule.

Mr. Farrar: Run trains on that schedule?

Mr. Crowell: Yes, sir.

Mr. Farrar: How are the trains on your road handled; are they handled by the motive power of any of the other railroads with whom you connect, or are they handled with your own motive power?

Mr. Crowell: They are handled with our own motive power.

Mr. Farrar: Do any of the connecting roads run any of their trains over your road, except the gravel trains run by the Rock Island road under the trackage contract?

Mr. Crowell: None except that one contract.

Mr. Farrar: And the logging trains that are run by the Crowell & Spencer Lumber Company?

Mr. Crowell: Yes.

Mr. Farrar: At the time that the railroad company complained of in your complaint here cancelled the lumber rate, did they cancel the other through rates with you on merchandise and other articles?

161 Mr. Crowell: You refer to the Texas & Pacific.

Mr. Farrar: No, sir; I am referring to the suit now before the court.

Mr. Crowell: No, sir; they did not, only the lumber rate.

Mr. Farrar: They did not undertake to cancel their division rates with you on general traffic?

Mr. Crowell: No.

Mr. Farrar: But only on lumber?

Mr. Crowell: Only on lumber.

Mr. Farrar: When was this mill at Togo burned?

Mr. Crowell: Burned some time this year.

Mr. Farrar: Has it been reconstructed?

Mr. Crowell: No, sir; it has not.

Mr. Farrar: Have they got much lumber on hand there unsold, or have they moved it out since the mill was burned?

Mr. Crowell: They had considerable lumber there, but most of it has been moved out since the mill burned.

Mr. Farrar: Your receipts for the year 1910, the statement of which you are to make up for the Commission, will show that?

Mr. Crowell: Yes, sir.

Mr. Farrar: Now, what is the general character of the freight that you handle for people along the line of that road?

162 Mr. Crowell: We handle everything that is offered.

Commissioner Harlan: That will be shown in the exhibits you propose to file?

Mr. Farrar: The exhibits generally show that, because they are affidavits made by merchants in these various towns of Alexandria, and so on, who testify as to the character of the goods that they had shipped over the line of this road, cattle, furniture, hardware——

Commissioner Harlan: That is all of record, and you need not bring it out by this witness.

Mr. Farrar: Now, we tender, if your Honor please, for the inspection by the Commission and counsel, the stock transfer book, the bank deposit books, the cash book, the ledger and the journal of this company, to show the manner in which its business has been conducted, and to show it is controlled by its own officers.

Commissioner Harlan: That tender will be shown in the record.

Mr. Farrar: This Lecompte Company; have the Crowell & Spencer Company any relations whatever with the Lecompte Lumber Company.

163 Mr. Crowell: None whatever; it is entirely independent.

Mr. Farrar: Have any of the stockholders in the Lecompte Lumber Company any stock ownership in the Crowell & Spencer Company?

Mr. Crowell: None.

Mr. Farrar: Any of the stockholders of the Crowell & Spencer Company have any stock in the Lecompte Lumber Company?

Mr. Crowell: No.

Commissioner Harlan: When was the Crowell & Spencer Lumber Company organized?

Mr. Crowell: Organized in 1898—incorporated in 1898.

Commissioner Harlan: When was your mill at Long Leaf built?

Mr. Crowell: 1892.

Commissioner Harlan: How far is that from the tracks of the St. Louis & Iron Mountain?

Mr. Crowell: The saw mill was about a quarter of a mile.

Examiner Burchmore: It was constructed in 1902?

Mr. Crowell: 1892.

Examiner Burchmore: Before the Lumber Company was organized?

Mr. Crowell: It was originally a partnership, and was incorporated in 1898.

164 Commissioner Harlan: What sort of connection did you have with the Iron Mountain tracks before this tap line was incorporated?

Mr. Crowell: The lumber company owned its tracks into the saw mill.

Commissioner Harlan: Did you get an allowance at that time?

Mr. Crowell: No, sir.

Commissioner Harlan: When did you first commence to get an allowance from the Iron Mountain?

Mr. Crowell: After the organization of the railroad.

Commissioner Harlan: In 1905?

Mr. Crowell: In 1905.

Commissioner Harlan: Where do most of your logs come from?

Mr. Crowell: Most of our logs at present come from the territory shown there by the line, as laid down in the blue print.

Commissioner Harlan: The Crowell & Spencer tram line?

Mr. Crowell: Yes, sir.

Commissioner Harlan: Is there much lumber on the Red River & Gulf, any belonging to you?

Mr. Crowell: No sir.

Commissioner Harlan: Any belonging to anyone else?

165 Mr. Crowell: No; the timber is all cut out, except this territory, and there is only about a year and a half on it.

Commissioner Harlan: So that all the timber that you now get is on the line of this private carrier called the Crowell & Spencer tram on this map?

Mr. Crowell: Yes, sir.

Commissioner Harlan: These logs are carried by the lumber company itself to your mill at Long Leaf?

Mr. Crowell: Yes, sir.

Commissioner Harlan: And there manufactured into lumber?

Mr. Crowell: Yes.

Commissioner Harlan: What proportion of the manufactured lumber goes out over the Iron Mountain?

Mr. Crowell: Well, a small per cent.

Commissioner Harlan: Before this Red River & Gulf was built, all of your lumber went out over the Iron Mountain, did it not?

Mr. Crowell: Yes, sir.

Commissioner Harlan: And you built it 12 miles over to the Rock Island?

Mr. Crowell: 12¾ miles over to the Texas & Pacific and

166 the Southern Pacific at that time. The Rock Island was not built through there until later.

Commissioner Harlan: What line takes the major part of your manufactured lumber now?

Mr. Crowell: The Rock Island is getting the most. It changes, though, with different times; it depends on the business offered. At present time the Rock Island is getting most of the business.

Commissioner Harlan: How long has that been true?

Mr. Crowell: It has been true for about two years.

Commissioner Harlan: For the last two years the Rock Island has been getting the bulk of your traffic?

Mr. Crowell: Getting the bulk of it; yes, sir, practically.

Commissioner Harlan: So that you haul logs from your forest on the Crowell & Spencer tram line into your mill on the Iron Mountain line, and then the manufactured lumber is hauled back about 12 miles to the Rock Island?

Mr. Crowell: Yes, sir.

Commissioner Harlan: Instead of going out over the Iron Mountain?

Mr. Crowell: Well, we deliver business to the Southern Pacific and the Iron Mountain and to the Rock Island.

167 Commissioner Harlan: The Iron Mountain and the Rock Island have a junction at Alexandria, have they not, a few miles north?

Mr. Crowell: Yes, sir.

Commissioner Harlan: How many miles north is that?

Mr. Crowell: Twenty-five.

Commissioner Harlan: Before this Red River & Gulf was built, when you wanted to reach Rock Island points you used the Iron Mountain, did you not?

Mr. Crowell: We did not reach it through Alexandria; they did not have a road into Alexandria at that time.

Commissioner Harlan: Where did you reach the Rock Island at that time?

Mr. Crowell: I think that business was handled in connection with the Texas & Pacific, and they turned it over at Fort Worth.

Mr. Farrar: The Rock Island construction into that territory is only of a very recent date.

Commissioner Harlan: It went to the Texas & Pacific at Alexandria?

Mr. Crowell: Yes, sir; at Alexandria at that time, and to the Southern Pacific. Rates were in effect both ways.

168 Commissioner Harlan: But you can reach all Rock Island points by using the Iron Mountain to Alexandria or some other junction point, can you not?

Mr. Crowell: Yes, sir.

Examiner Burchmore: Among the exhibits filed of record, to which counsel refers, are a number of printed blanks filled out by shippers who say that they have used the Red River & Gulf Railroad Company during the past three or four years in receiving or shipping freight. One of these statements is filed by J. B. Simnott.

Mr. Farrar: That is Smith Brothers & Company, of New Orleans.

Examiner Burchmore: President of Smith Brothers & Company, of New Orleans. What amount of traffic does that firm originate or receive?

Mr. Crowell: It is not a large traffic.

Examiner Burchmore: As much as one carload in the whole year, or more?

Mr. Crowell: Four, I should say.

Examiner Burchmore: Kracke & Flanders, a partnership, also filed out such a statement. Is their traffic of considerable volume?

169 Mr. Crowell: Yes, sir.

Examiner Burchmore: About how much in a year?

Mr. Crowell: Well, it is all in local shipments.

Examiner Burchmore: J. P. Dunn, a farmer at Forest Hill certifies that he has made shipments over your road. Are those simply

occasional shipments of agricultural products, or is it a considerable traffic?

Mr. Crowell: Occasional shipments of agricultural products.

Examiner Burchmore: I presume you have seen all these statements which are filed of record?

Mr. Crowell: Yes, sir.

Examiner Burchmore: Could you estimate the total volume of traffic that is handled for these shippers who have written these statements, in a year? Does it amount to ten carloads or one carload?

Mr. Crowell: More than ten carloads, I should say; there are shippers there that would ship more than ten carloads individually.

Examiner Burchmore: What would you estimate the total volume?

Mr. Crowell: I do not know that I could estimate that with any degree of accuracy, without looking up the records.

Mr. Farrar: The statements will show the exact amount of
170 that, outside of lumber.

Commissioner Harlan: What is the extent of your lumber shipments; what was your cut last year?

Mr. Crowell: About 17 and a half million feet.

Commissioner Harlan: Do you know about how many carloads went out from the mill over all lines?

Mr. Crowell: No, I could not give the actual number.

Commissioner Harlan: How long has it been since there was any lumber on the Red River & Gulf, east of its junction with the Crowell & Spencer tram?

Mr. Crowell: Early this year, in March, I think.

Commissioner Harlan: Are there some forests on your road, the Red River & Gulf?

Mr. Crowell: Yes, sir.

Commissioner Harlan: Which belong to you?

Mr. Crowell: There are some belonging to us, and others owned by other people.

Commissioner Harlan: When was the Crowell & Spencer tram line built?

Mr. Crowell: That was built in the last of 1906 or 1907.

Commissioner Harlan: And in 1905, when the Red River & Gulf Railroad was built, what forests did you own, and where
171 were they?

Mr. Crowell: They were west of Long Leaf, and operated over a logging tram that we afterwards dismantled.

Commissioner Harlan: Let me see if I understand that. When the Red River & Gulf was built, you owned no forest east of Long Leaf?

Mr. Crowell: Yes, we owned forest east of Long Leaf, but at the time of the building of the Red River & Gulf we were operating 15 miles of tram road due west of Long Leaf, and that road has been dismantled.

Commissioner Harlan: Then you commenced to lumber east of Long Leaf in 1906?

Mr. Crowell: Yes, sir.

Commissioner Harlan: Describe your holdings east of Long Leaf, when the Red River & Gulf was built, and the location of your forest.

Mr. Crowell: The location was on both sides of the line for a distance——

Commissioner Harlan: What line?

Mr. Crowell: The Red River & Gulf.

Commissioner Harlan: How far east did they extend?

Mr. Crowell: Between six and seven miles east of Long Leaf.

172 Commissioner Harlan: And at that time, your mill was at Long Leaf?

Mr. Crowell: Yes, sir.

Commissioner Harlan: Why did you invest money in the extension of the Red River & Gulf eastward beyond your forest?

Mr. Crowell: In order to handle our lumber.

Commissioner Harlan: Over these other lines?

Mr. Crowell: Yes, sir.

Commissioner Harlan: Which you could have reached at that time through their junction at Alexandria?

Mr. Crowell: Yes, sir.

Commissioner Harlan: You could have reached all Rock Island points in 1905 through Alexandria?

Mr. Crowell: Yes, sir.

Commissioner Harlan: And you could have reached the Texas & Pacific points too?

Mr. Crowell: Yes, sir.

Commissioner Harlan: But notwithstanding that, you extended the Red River & Gulf to a junction with those lines?

Mr. Crowell: Yes, sir.

Commissioner Harlan: You did that to get divisions, did you not.

173 Mr. Crowell: Yes, sir, and for the further reason that we could not get cars from the St. Louis, Watkins & Gulf, which is now the Iron Mountain; they were unable for four or five months of every year to give us cars, and our business was badly crippled, and it was largely for that reason that our road was built, as well as for the other.

Commissioner Harlan: You were not getting a sufficient supply of equipment from the Iron Mountain.

Mr. Crowell: No; they could not furnish it.

Commissioner Harlan: Did you have any talk with the other roads before you extended the Red River & Gulf eastward?

Mr. Crowell: Yes, sir.

Commissioner Harlan: Just tell us what inducement you had to extend that road to the junction with the Rock Island and other roads to the east.

Mr. Crowell: They offered us divisions of the through rates.

Commissioner Harlan: What divisions were offered?

Mr. Crowell: At that time we received three and four cents, I believe it was, from the Texas & Pacific and the Southern Pacific.

Commissioner Harlan: And what offer was made to you by the Rock Island?

174 Mr. Crowell: Well, there was no offer made by the Rock Island at that time. There was no Rock Island.

Commissioner Harlan: The Rock Island came in later?

Mr. Crowell: The Rock Island came in later; yes, sir.

Commissioner Harlan: What is the highest division you have ever received from any line?

Mr. Crowell: I believe five cents was as much as we have ever received.

Commissioner Harlan: When was that?

Mr. Crowell: In 1906 and 1907.

Mr. Jeffery: Talk up, please. I did not hear what you said. Who did you say you got the five cent division from?

Commissioner Harlan: He has not said that. He is giving the details——

Mr. Crowell: To a few common points in Texas we got five cents from the Texas & Pacific and the Southern Pacific, at one time.

Commissioner Harlan: What was the highest division you ever received from the St. Louis, Watkins & Gulf or the Iron Mountain?

Mr. Crowell: Three cents.

Commissioner Harlan: When did you make your arrange-

175 ments with the Rock Island?

Mr. Crowell: Since they built this line south of Alexandria.

Commissioner Harlan: When was that?

Mr. Crowell: That has been something over two years.

Commissioner Harlan: What division do you receive now from the Rock Island?

Mr. Crowell: From two and a half to four and a half cents.

Commissioner Harlan: Is four and a half cents the highest going division at this time?

Mr. Crowell: To the best of my recollection it is; yes, sir. I have the division sheets with me.

Mr. Farrar: You say you have those division sheets?

Mr. Crowell: Yes, sir.

Mr. Cowan: They will be filed; they are already filed.

Mr. Crowell: They are all filed.

Examiner Burchmore: Has the Red River & Gulf a contract with the Rock Island Railroad?

Mr. Crowell: No, sir.

Examiner Burchmore: No contract for divisions of the rates?

Mr. Crowell: No, sir; not for divisions.

Mr. Farrar: You have no contracts with any railroad as to

176 rates, have you?

Mr. Crowell: No, sir.

Commissioner Harlan: Do you own all the forests through which the Crowell & Spencer tram runs?

Mr. Crowell: No.

Commissioner Harlan: Do you own all on the west of that line?

Mr. Crowell: No.

Commissioner Harlan: Are there other interests in there?
Mr. Crowell: Yes, sir; other large interests.
Commissioner Harlan: How do they get to market?
Mr. Crowell: Some are not operators, some are only timber holdings. The bulk——
Commissioner Harlan: Any farmers in there?
Mr. Crowell: Yes, sir.
Commissioner Harlan: Does the Crowell & Spencer tram carry any stuff for the farmers?
Mr. Crowell: Yes, sir.
Commissioner Harlan: To what extent?
Mr. Crowell: Only in a small way; local shipments of molasses and cane and——
Commissioner Harlan: Do you carry logs for any one else?
177 Mr. Crowell: We have; yes, sir.
Mr. Farrar: There is no connection, though, between this Crowell & Spencer tram and the Red River & Gulf Railroad at all, is there?
Mr. Crowell: No, sir, none.
Commissioner Harlan: What was the cost of the Crowell & Spencer tram for building?
Mr. Crowell: Over $30,000.
Commissioner Harlan: Is it standard gauge?
Mr. Crowell: Standard gauge; yes, sir.
Commissioner Harlan: Why was not that turned over to the Red River & Gulf?
Mr. Crowell: No particular reason why; the Red River & Gulf had no object in buying that property.
Commissioner Harlan: Is that all the reason that you did not turn it over to the Red River & Gulf?
Mr. Crowell: That subject was never taken up at all, and it was never considered.
Commissioner Harlan: You just did not do it.
Mr. Crowell: We did not do it.
Commissioner Harlan: Judge Cowan, have you any questions?
Mr. Cowan: The original object of building the Red River
178 & Gulf was for the purpose of logging the timber belonging to the Crowell & Spencer Company?
Mr. Crowell: No.
Mr. Cowan: What was the object of building it, then?
Mr. Crowell: The object was to get the advantage of additional shipping facilities, and the remuneration incident to that.
Mr. Cowan: How much of the old tram line that had been used by the Crowell & Spencer Company did you put into the make up of the Red River & Gulf?
Mr. Crowell: There was not any of it. This is a newly constructed railroad throughout.
Mr. Cowan: From Long Leaf to Lecompte?
Mr. Crowell: Yes, sir.
Mr. Cowan: How long is that road?
Mr. Crowell: Fourteen and three-quarter miles.

Mr. Cowan: And that goes from the Iron Mountain over to a connection with the Texas & Pacific and the Rock Island?

Mr. Crowell: And the Southern Pacific.

Mr. Cowan: And the Southern Pacific?

Mr. Crowell: Yes, sir.

Mr. Cowan: And you completed that road in 1905?

179 Mr. Crowell: Yes, sir.

Mr. Cowan: Previous to building that road, how did you log the mill of the Crowell & Spencer Lumber Company?

Mr. Crowell: We logged the mill over a tram road owned by the Crowell & Spencer Lumber Company.

Mr. Cowan: And no part of that was used in the Red River & Gulf?

Mr. Crowell: No part, except a few miles of steel was used.

Mr. Cowan: How many miles of steel?

Mr. Crowell: About five miles of steel.

Mr. Cowan: But not the track or roadway?

Mr. Crowell: No.

Mr. Cowan: Just that much material used?

Mr. Crowell: That much material.

Mr. Cowan: You say you have two joint agents at Lecompte?

Mr. Crowell: Yes, sir.

Mr. Cowan: What do you pay them?

Mr. Crowell: We pay one $50 and the other $35.

Mr. Cowan: And they are respectively also local agents of the Texas & Pacific and the Rock Island?

Mr. Crowell: Yes, sir.

180 Mr. Cowan: How much do the Texas & Pacific and the Rock Island pay them?

Mr. Crowell: I do not know.

Mr. Cowan: Why do you have two agents at that place?

Mr. Crowell: We get business in connection with both lines, and necessarily that business has to be handled.

Mr. Cowan: Well, if you just had one station, you would not have to have but one agent?

Mr. Crowell: But we have an arrangement whereby we get into both stations.

Mr. Cowan: The Texas & Pacific only has one agent there?

Mr. Crowell: One agent.

Mr. Cowan: But you have two?

Mr. Crowell: We have two.

Mr. Cowan: Now, all this tonnage which you speak of being carried for other people, how much of that goes in fact, if any, to the commissaries or other uses of the Crowell & Spencer Lumber Company?

Mr. Crowell: A good proportion of it. The statement filed with our bill shows the exact amount.

Mr. Cowan: Well, these men who make affidavits that they have been shipping on your road, were they shipping that sort

181 of produce, or manufactured articles?

Mr. Crowell: Yes, sir.

Mr. Cowan: And they did not disclose in their affidavit, though,

that they were shipping it for the purpose of your lumber company's business?

Mr. Crowell: No.

Mr. Cowan: But that was the fact?

Mr. Crowell: No, that was not the fact. Some of this business was not shipped in connection with that business, and had no connection whatever with the Crowell & Spencer Lumber Company.

Mr. Cowan: I thought you said a good portion of it did.

Mr. Crowell: I said a good portion of the local business was business to the Crowell & Spencer Lumber Company, but this business shipped by these local people was entirely independent of that business.

Mr. Cowan: What enterprises are there on this Red River & Gulf Railroad between your saw mill and Lecompte?

Mr. Crowell: This Lecompte Lumber Company plant was the principal one.

Mr. Cowan: Who owns that?

Mr. Crowell: The owners of that are Mr. George Gainnie
182 and his son, K. M. Gainnie, and Walter Clark, of Lecompte.

Mr. Cowan: Have they any relations to the Crowell & Spencer Lumber Company?

Mr. Crowell: No.

Mr. Cowan: Any ownership in the stock of the railroad company?

Mr. Crowell: No, sir; none.

Mr. Cowan: Have they trackage rights over it?

Mr. Crowell: No.

Mr. Cowan: How do they log their mill?

Mr. Crowell: By wagons and teams.

Mr. Cowan: They are located on your line?

Mr. Crowell: On our line.

Mr. Cowan: What amount do you get for hauling their lumber?

Mr. Crowell: The same divisions apply on lumber from their mill as from our own.

Commissioner Harlan: Over what line does the bulk of their lumber go?

Mr. Crowell: I could not say with any degree of accuracy; it can go over all the connecting lines.

Commissioner Harlan: Does a good share of it go over the Iron Mountain?

183 Mr. Crowell: Yes, sir.

Commissioner Harlan: More than over the Texas & Pacific or the Southern Pacific?

Mr. Crowell: Well, I think not; than those three lines combined.

Commissioner Harlan: Well, the Iron Mountain gets more of their lumber than it does of yours?

Mr. Crowell: Well, at the present they are not shipping.

Commissioner Harlan: I know now they are not, since they burned up, but I am talking of the time they did ship.

Mr. Crowell: I could not say.

Commissioner Harlan: Have you not any judgment on that?

Mr. Crowell: I think they do get more than from our company, yes, sir.

Commissioner Harlan: What allowance did you get on their lumber from the Iron Mountain?

Mr. Crowell: Three cents.

Mr. Cowan: Did you get anything in addition to that for hauling their lumber?

Mr. Crowell: No.

Mr. Cowan: Or for hauling logs?

Mr. Crowell: No.

184 Mr. Cowan: Or for any other service?

Mr. Crowell: No.

Mr. Cowan: How far is their mill from the other end of your line at Lecompte; is it right there?

Mr. Crowell: About five miles.

Mr. Cowan: It is down on your line?

Mr. Crowell: It is down on our line about five miles.

Mr. Cowan: What was the output of that mill; have you any idea?

Mr. Crowell: About 40,000 feet a day capacity.

Mr. Cowan: How did that compare with the output of your mill?

Mr. Crowell: About half; about 50 per cent of ours.

Mr. Cowan: Were there any arrangements for divisions of rates to points where the rate division sheet itself did not apply, like there are in many cases where a division sheet does not apply, then the division will be according to the agreement of the traffic officials.

Mr. Crowell: No, none except these division sheet agreements.

Mr. Cowan: Have you any knowledge as to what it costs you to haul a carload of lumber from Long Leaf to Lecompte?

185 Mr. Crowell: No.

Mr. Cowan: Have you ever made any estimate as to what it costs you?

Mr. Crowell: No.

Mr. Cowan: You do not haul any logs?

Mr. Crowell: No, we do not haul any.

Mr. Cowan: Your business is not mixed up with hauling logs at all?

Mr. Crowell: No. We have hauled a few logs; that is, where local people shipped them.

Mr. Cowan: But your business is the commercial business you do, and the business of hauling lumber?

Mr. Crowell: Lumber and other commodities.

Mr. Cowan: Do you know how many carloads of traffic you haul altogether?

Mr. Crowell: Between fifteen hundred and two thousand cars a year.

Mr. Cowan: Can you come a little nearer than that to it?

Mr. Crowell: No, I do not believe I could.

Mr. Cowan: You can file a statement which shows exactly?

Mr. Crowell: I think our statement shows.

186 Mr. Farrar: No, it simply shows the revenue from various sources.

Mr. Cowan: I want to know the number of carloads.

Mr. Crowell: How would you compute the local shipments in carloads?

Mr. Cowan: Take that for a carload, for the purposes of my question; state the total number of loaded cars and of those, the total number that were carloads; the total number of empty cars moved, giving it in opposite directions, as no doubt your accounts show what it is in each direction?

Mr. Crowell: Yes, sir.

Mr. Cowan: During the period of a year.

Mr. Crowell: Any particular year?

Mr. Cowan: Take before that mill burned, the fiscal year ending June 30, 1909.

Mr. Crowell: I could get that information up for you.

Mr. Cowan: Yes. And then make a statement showing the total train expenses separately from the locomotive expenses; then the total locomotive expenses, so that we can get at what it costs per car——

Mr. Farrar: We have our books here, which show the whole cost of transportion and everything is detailed in those books.

187 Mr. Cowan: He can make up the statement, I assume, just a tabulated statement.

Mr. Crowell: I would like to have what you want.

Mr. Cowan: We will have that furnished to you in a request, probably, with a heading for the table, that you can just fill in, and it will enable some one to find out what it costs you to haul lumber.

Mr. Crowell: Yes.

Mr. Cowan: Do you now know in your own mind what you consider it to be worth for each separate movement of lumber on a 12 mile road, such as you have got? About how much do you think it costs you per car for actual expenditure outside of maintenance of track, to handle lumber?

Mr. Crowell: I should say about $7.50 a car.

Mr. Cowan: $7.50 a car?

Mr. Crowell: Yes, sir; per car. Of course, if we get quantities of cars that are handled to full capacity, we could handle them for less, but take the business furnished as we get it now, and basing it on that quantity of business.

Mr. Cowan: How much does a car of lumber weigh, on the average, as you handle it?

188 Mr. Crowell: About 60,000 pounds.

Mr. Cowan: You told the number of engines, but I will ask that again.

Mr. Crowell: One locomotive.

Mr. Cowan: How many more could you handle with a locomotive, if you had the stuff to handle?

Mr. Crowell: We could handle twice the business we are handling.

Mr. Cowan: What size and character of locomotive is that?
Mr. Crowell: About 45 ton locomotive.
Mr. Cowan: Does the lumber company own engines and cars which they log with on the tram?
Mr. Crowell: Yes, sir; they have three locomotives, and about 40 to 50 cars of their own.
Mr. Cowan: What income has the railroad company from the use of this tram from the Crowell Lumber Company for the logs moved over the tram?
Mr. Crowell: Twenty-five cents a thousand, log scale.
Mr. Cowan: For what distance?
Mr. Crowell: Three and a half miles.
Mr. Cowan: That is just for the use of the track?
Mr. Crowell: That is just for the use of the track.
189 Mr. Cowan: But not for any other service?
Mr. Crowell: But not for any other services.
Mr. Cowan: Do you have demurrage rules with the Rock Island, the Iron Mountain and the Texas & Pacific?
Mr. Crowell: Yes, sir.
Mr. Cowan: What are the arrangements between you and them?
Mr. Crowell: The regular arrangements applying with all the roads; we pay $1.00 a day demurrage after a certain time.
Mr. Cowan: Who pays it?
Mr. Crowell: The Red River & Gulf.
Mr. Cowan: The Red River & Gulf pays $1.00 a day?
Mr. Crowell: Yes, sir.
Mr. Cowan: Not the lumber company?
Mr. Crowell: I think the railroad company pays the demurrage.
Mr. Cowan: The regular arrangements between the railroads is not $1.00 a day. The lumber company may pay $1.00 a day, but whatever that is, you can make a statement and file it, if you do not recollect it.
Mr. Crowell: Yes, sir.
Mr. Cowan: If you know what the demurrage arrangements are, state them for the record, and if not, file a statement.
190 Commissioner Harlan: Well, do you know the demurrage arrangements?
Mr. Crowell: We pay demurrage, I know that.
Commissioner Harlan: Who pays it?
Mr. Crowell: The Red River & Gulf, I think.
Commissioner Harlan: That is, if a Rock Island car is set at your mill and detained by the mill longer than it ought to be?
Mr. Crowell: We pay $1.00 a day.
Commissioner Harlan: Who pays it?
Mr. Crowell: The Red River & Gulf; that is my recollection.
Commissioner Harlan: Does the Red River & Gulf collect anything from the mill?
Mr. Crowell: I could not be positive of that.
Commissioner Harlan: You would know, would you not?
Mr. Crowell: I can find out; yes, sir. I think we filed a state-

ment with the Commission covering that point, regarding demurrage.

Mr. Coleman: You mentioned a dividend having been paid to the stockholders of the railroad company?

Mr. Crowell: Yes, sir.

Mr. Coleman: What was that dividend?

191 Mr. Crowell: Well, it varied.

Mr. Coleman: Well, the first one?

Mr. Crowell: The first dividend, I believe, was 15 per cent.

Mr. Coleman: The second?

Mr. Crowell: I will have to get the books.

Mr. Farrar: The books show it.

Mr. Crowell: Give me the ledger.

(Book produced and handed to witness.)

Commissioner Harlan: What was the last dividend?

Mr. Crowell: Ten per cent dividend.

Commissioner Harlan: What year?

Mr. Crowell: The first dividend was paid May 29, 1907.

Commissioner Harlan: Fifteen per cent?

Mr. Crowell: Yes, sir.

Mr. Coleman: The next one?

Mr. Crowell: July 28, 1908.

Mr. Coleman: How much?

Mr. Crowell: Thirty per cent.

Mr. Coleman: The next?

Mr. Crowell: November 19, 1908; ten per cent.

Mr. Coleman: 1908?

Mr. Crowell: Yes, sir.

192 Mr. Coleman: That was about six months later, ten per cent more?

Mr. Crowell: November 11th.

Mr. Coleman: The next?

Mr. Crowell: July 17, 1909; ten per cent.

Mr. Coleman: Six months later. Next?

Mr. Crowell: October 20, 1909, ten per cent.

Mr. Coleman: Have you any of that stock for sale?

(No response.)

Mr. Coleman: Now, take the division of three cents which you got from the Iron Mountain, what haul did you perform to earn that?

Mr. Crowell: We haul the lumber about a quarter of a mile.

Mr. Coleman: What was the through rate that the railroads got?

Mr. Crowell: What was the through rate?

Mr. Coleman: Yes, say to Colorado points.

Mr. Crowell: They vary from 27½ to 34 cents.

Mr. Coleman: What is the distance?

Mr. Crowell: I don't know that.

Mr. Coleman: Take the 2½ cent rate to the Rock Island at Lecompte, what service did you perform for that?

193 Mr. Crowell: We haul that 12¾ miles.

Mr. Coleman: You haul it 12¾ miles for two and a half cents?

Mr. Crowell: Yes, sir.

Mr. Coleman: Take the haul you give for the four and a half cents.

Mr. Crowell: We haul it twelve miles.

Mr. Coleman: What was the difference? Why did you get four and a half cents in one case and two and a half in another case?

Mr. Crowell: I cannot explain that.

Mr. Coleman: Can anybody?

Mr. Crowell: I suppose they can.

Mr. Coleman: Who would that be?

Mr. Crowell: The traffic management.

Mr. Coleman: Of the other railroads?

Mr. Crowell: Yes, sir.

Mr. Coleman: They simply bid with your company to get the traffic; is not that it?

Mr. Crowell: They voluntarily made it.

Mr. Coleman: Take the three cent division and the four

194 cent division with the Southern Pacific, what haul do you perform on that?

Mr. Crowell: We haul that 12¾ miles.

Mr. Coleman: Do you interchange transportation?

Mr. Crowell: Yes, sir.

Mr. Coleman: What do you get?

Mr. Crowell: We get two or three annuals.

Mr. Coleman: And you get them from the Southern Pacific?

Mr. Crowell: Yes, sir.

Mr. Coleman: And the Iron Mountain?

Mr. Crowell: Yes, sir.

Mr. Coleman: And the Rock Island?

Mr. Crowell: The Rock Island and the Texas & Pacific.

Mr. Coleman: Are these used by your people in soliciting lumber business in competition with other lumber companies?

Mr. Crowell: None of our office force solicits business except by mail.

Mr. Coleman: Now, then, is some officer of the railroad company an officer of the lumber company?

Mr. Crowell: Yes, sir.

Mr. Coleman: Are not they all the same?

Mr. Crowell: They are practically all the same.

195 Mr. Coleman: So when you say that it is only an officer of the railroad company, you are making the division between the two parts of you?

Mr. Farrar: He said the officers of the lumber company solicit trade by mail.

Mr. Crowell: None of the officers of the lumber company travel for business.

Mr. Coleman: True, but the officers of the lumber company are the very same men who are officers of the railroad?

Mr. Crowell: Yes, sir.

Mr. Coleman: So it is the difference between tweedle-dee and tweedle-dum, is it not?

Commissioner Harlan: We will reserve that for argument.

Mr. Crowell: We do not solicit business on this transportation; we do not solicit business at all personally, except by mail, for our company; none of our officers travel for business.

Mr. Coleman: How do you come to get this transportation then?

Mr. Crowell: We made requisitions for it, and it was supplied.

Mr. Coleman: That is the only reason?

Mr. Crowell: And by reason of the fact that we are a com-
196 mon carrier railroad and entitled to it.

Mr. Coleman: Have you any other transportation besides that I have named?

Mr. Crowell: Yes, sir.

Mr. Coleman: What is it?

Mr. Crowell: The L. & A. and the L. R. & N.

Mr. Coleman: Any more?

Mr. Crowell: I think I have some more; yes, sir.

Mr. Coleman: What is that?

Mr. Crowell: I could not tell you that. I have got a lot of it. It does not amount to much.

Mr. Coleman: Is it not so, that you never threw open the Red River & Gulf Railroad as a common carrier until all the timber was cut away?

Mr. Crowell: No, sir, it is not true.

Mr. Coleman: Is there timber on it now?

Mr. Crowell: Yes, sir.

Mr. Coleman: Are you using it?

Mr. Crowell: We are using some of it; yes, sir.

Mr. Coleman: In the milling operation?

Mr. Crowell: Yes, sir.

Mr. Coleman: That is all.

197 Commissioner Harlan: Do you get trip transportation over on request?

Mr. Crowell: We have gotten a few trip transportations.

Commissioner Harlan: For what purpose?

Mr. Crowell: Personal trips; I have been out home once on a trip transportation.

Mr. Farrar: I call your attention to a statement made here for the year 1898, by which it appears that you received in revenue for trackage for the Rock Island gravel trains $23,097.

Mr. Crowell: Yes, sir.

Mr. Farrar: And that you received as a total freight receipt that year $46,054.96, so that more than half of your total freight receipts came from the trackage for these Rock Island Gravel trains, did it not?

Mr. Crowell: Yes, sir; that is correct.

Mr. Cowan: How far did they run over your track?

Mr. Crowell: They hauled about six miles over our track.

Mr. Cowan: How much did your total track cost, $101,000 for the 12 miles?

Mr. Crowell: Yes, sir.

Mr. Cowan: They pay you $23,000 a year for the use of six
198 miles?

Mr. Crowell: No.

Mr. Cowan: How did you get the money, then?

Mr. Crowell: They paid us that year, they hauled 75 cars a day over the road for the first year when they were ballasting.

Mr. Cowan: But they would have paid for your entire road in five years. Who made that contract to pay that much to run the gravel train over the road?

Mr. Crowell: Some one on the Rock Island.

Mr. Cowan: Some managing official make that contract?

Mr. Crowell: Yes, sir.

Mr. Cowan: Who was it, just for curiosity?

Mr. Crowell: I believe the vice-president of the road signed the contract.

Mr. Cowan: The vice-president in charge of operation?

Mr. Crowell: Yes, sir. The original contract is on file.

Mr. Farrar: I have offered it in evidence.

Mr. Cowan: I know, but I thought you might remember who it was.

Mr. Crowell: I know it was the vice-president.

Mr. Cowan: Did he make it with you?

199 Mr. Crowell: He made it with the company.

Mr. Cowan: Did you do the negotiating?

Mr. Crowell: The president of the road, my father, did the contracting.

Mr. Cowan: Was anything said about the reasonable use or wheelage on a track of that sort?

Mr. Crowell: They thought the price was too high that we asked, at once, and we had considerable correspondence.

Mr. Cowan: How many years did they use that track for hauling gravel?

Mr. Crowell: They used it about one year solid, and afterwards they used it about six months at one time.

Mr. Cowan: What has been the amount of return from that source thereafter?

Mr. Crowell: It is shown in the statement filed in the record. I do not remember the exact figure.

Commissioner Harlan: That seems to be all.

Examiner Burchmore: One or two questions about the physical characteristics of the road. What weight of rail is used?

Mr. Crowell: We have 35, 45 and 60 pound rail.

Examiner Burchmore: Which predominates?

200 Mr. Crowell: The 45 pound.

Examiner Burchmore: You said you had one or two station buildings?

Mr. Crowell: No.

Examiner Burchmore: You have none?

Mr. Crowell: We have none, except these joint stations at the terminus.

Examiner Burchmore: Are those joint station buildings chiefly used by your road or by the trunk lines?

Mr. Crowell: Chiefly by the trunk lines.

Examiner Burchmore: And were constructed before your road was built?

Mr. Crowell: Yes, sir.

Examiner Burchmore: With the exception of the Rock Island?

Mr. Crowell: Yes, sir.

Examiner Burchmore: Have you any freight platforms for loading and unloading freight on your line, other than at those stations just referred to?

Mr. Crowell: Yes, sir.

Examiner Burchmore: How many, and where?

Mr. Crowell: One at Togo and one at Holdup and one at Long Leaf.

201 Examiner Burchmore: Have you any track scales for weighing carload shipments?

Mr. Crowell: No, sir.

Examiner Burchmore: Any team tracks along your line?

Mr. Crowell: No.

Examiner Burchmore: Have you any facilities along your line for handling less than carload freight, any special facilities, such as small scales or small storage buildings?

Mr. Crowell: No, sir; we have not.

Examiner Burchmore: How many employees are there in your operating department, that is, engineers, firemen and conductors?

Mr. Crowell: We have one train crew, one engineer, one conductor, one fireman and one brakeman.

Examiner Burchmore: What is the number of employees, approximately, in your road department for maintaining the way?

Mr. Crowell: We have two section crews; they average from three to eight men to the section.

Examiner Burchmore: Where is your general office located?

Mr. Crowell: Long Leaf.

Examiner Burchmore: It is identical with the general office of the lumber company?

202 Mr. Crowell: In the same building, yes, sir.

Examiner Burchmore: You testified that you had some passenger traffic. Is the major portion of that passenger traffic revenue traffic or free traffic?

Mr. Crowell: All revenue traffic.

Examiner Burchmore: Is any considerable amount of passenger traffic for the public as contrasted with your own employees?

Mr. Crowell: Oh, yes.

Examiner Burchmore: Do those passengers pay cash fares on the train, or purchase tickets?

Mr. Crowell: Some pay cash fares and some purchase tickets.

Examiner Burchmore: You have tickets on sale?

Mr. Crowell: Yes.

Mr. Farrar. Did the Government of the United States levy the corporation tax upon the Red River & Gulf Railroad Company?

Mr. Crowell. Yes, sir.

Mr. Farrar. Have you paid that corporation tax?

Mr. Crowell. We have; yes, sir.

Examiner Burchmore. Mr. Crowell, was that tax the same against the road as a common carrier as it would have been if the road had not been a common carrier, that is, the mere fact that it
203 was a corporation?

Mr. Crowell. My understanding was that that was a corporation tax.

Examiner Burchmore. Applicable to all corporations, business as well as common carriers?

Mr. Crowell. Yes, sir.

(Witness excused.)

204 *Cotton & Railroad Company.*

Mr. Marsilliot. I will call Mr. Stonebraker.

F. E. STONEBRAKER was called as a witness and having been duly sworn, testified as follows:

Mr. Marsilliot. In order that your Honor and the gentlemen present may a little better understand this case and to go a little faster with it, I want to describe in about two minutes what our road is. I have not the map here, but I think I can explain it better than as if I had a map. About 25 miles west of the city of Memphis, on the St. Louis, Iron Mountain & Southern Railroad, is the prosperous town of Earle, which I think has some 2,000 or 2,500 inhabitants at the present time. The Rock Island Railroad runs a little south of west, or almost paralleling the Iron Mountain, passing through Forest City, which your Honor will probably see on the map there, in St. Francis County, and this Crittenden Railroad runs from the town of Earle, 25 miles west of Memphis on the Iron Mountain, south about 16 miles to the town of Heth, on the Rock Island, and connects these two trunk lines, and an extension is now in process toward the town of Democrat, which
205 your Honor will not see on that map. It is a small town at the present time, but the extension is now in progress, and it is suggested it will be a big town very soon, but it is now a very small town.

I want to state, furthermore, that this road does more service for the public than for the lumber company which owns the controlling stock, and it does a daily business for the public. I simply make that statement so that your Honor and the gentlemen on the other side will understand what we are talking about.

Mr. Cowan. This is not in the yellow pine district?

Mr. Marsilliot. No, this is hardwood; in the bottoms. Crittenden County is the first country on the other side of the river from Tennessee. It is a hardwood road.

Direct examination:

Mr. Marsilliot: Your name is F. E. Stonebraker?

Mr. Stonebraker: Yes.

Mr. Marsilliot: Where do you live?

Mr. Stonebraker: Memphis, Tennessee.

Mr. Marsilliot: How long have you lived there?

Mr. Stonebraker: About fifteen years.

206 Mr. Marsilliot: Are you connected with the Crottenden Railroad?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: That railroad is incorporated under the general incorporation laws of the State of Arkansas?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: Incorporated in 1905, I believe?

Mr. Stonebraker: August of 1905.

Mr. Marsilliot: Mr. Stonebraker, do you know when the construction of this road was begun?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: When was it?

Mr. Stonebraker: In 1899.

Mr. Marsilliot: Who began the construction of it?

Mr. Stonebraker: The Crittenden Lumber Company.

Mr. Marsilliot: What was the purpose in the construction of the road at the outset?

Mr. Stonebraker: A plant adjunct.

Mr. Marsilliot: What other purpose or view did the builders of that road have in mind at the time they laid the first rails?

Mr. Stonebraker: The intention from the beginning was

207 to make a railroad eventually connecting the Rock Island.

Mr. Marsilliot: How do you know that?

Mr. Stonebraker: Because I was there and doing the work, and that was my intention, and it was discussed with other associates.

Mr. Marsilliot: What was your business in 1898, when the construction of this road began?

Mr. Stonebraker: General manager of the Crittenden Lumber Company.

Mr. Marsilliot: You say that the purpose of the building of this road at the very outset was to make it a common carrier and a public service corporation?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: Now, I will ask you to state what policy was pursued by the builders of that road in order to bring about that result, that is, with reference to inviting settlers and other enterprises into that country?

Mr. Stonebraker: We encouraged settlers to come in there.

Mr. Marsilliot: How did you do that; what methods did you pursue?

Mr. Stonebraker: By telling them we intended to provide a way that they could have their supplies given them.

208 Mr. Marsilliot: Did you do that in person?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: What was the result of your efforts along that line?

Mr. Stonebraker: Well, we got a number of settlers to come in there to open up lands.

Mr. Marsilliot: Along the line of your road?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: We are speaking now about the time before the incorporation of the road. Now, the road was incorporated in 1905?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: What has been done with reference to inviting settlers and enterprises into that country since the incorporation of your road?

Mr. Stonebraker: The same energies have been displayed.

Mr. Marsilliot: Mr. Stonebraker, what is your connection with that road?

Mr. Stonebraker: President.

Mr. Marsilliot: What is your present business?

Mr. Stonebraker: Lumber.

Mr. Marsilliot: I believe you are the American agent of
209 some European lumber concern, are you not?

Mr. Stonebraker: Yes, sir; Belgian.

Mr. Marsilliot: You are no longer in the employ of the Crittenden Lumber Company?

Mr. Stonebraker: No.

Mr. Marsilliot: When did you cease to be their general manager, if you remember, about?

Mr. Stonebraker: About four years ago.

Mr. Marsilliot: On page 5 of the printed petition filed by the Crittenden Railroad Company I see a list of stockholders there. I observe from that list that the Crittenden Lumber Company still owns the controlling interest in the stock of that road; is that correct?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: How much stock do you hold in it?

Mr. Stonebraker: Fifty shares.

Mr. Marsilliot: That is $5,000?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: Now, I do not believe I caught just exactly when you say you severed your connection as general manager of the Crittenden Lumber Company.

Commissioner Harlan: He said four years ago.

210 Mr. Marsilliot: But you still remain president of that road?

Mr. Stonebraker: Yes, sir.

Commissioner Harlan: While we are on this, are these other men named on page 5 of your petition interested as stockholders in the Crittenden Lumber Company?

Mr. Stonebraker: No, sir; not all of them.

Commissioner Harlan: Some of them?

Mr. Marsilliot: I can show you that in a moment.

Commissioner Harlan: It is not necessary. Some of them are.
Mr. Stonebraker: Yes, sir.
Commissioner Harlan: About $6,000 is outstanding in $150,000?
Mr. Stonebraker: Yes, sir.
Commissioner Harlan: In the hands of stockholders who have no interest in the Crittenden Lumber Company?
Mr. Stonebraker: Yes, sir.
Mr. Marsilliot: Prior to the time that road was incorporated, and prior to the time it was extended to a connection with the Rock Island Railroad, thereby connecting the two trunk lines, the Rock Island and the Iron Mountain, can you tell us what were
211 the conditions with respect to transportation service at Earl?
Mr. Stonebraker: I do not understand your question.
Commissioner Harlan: Let me put a question first. Had the line been completed before the railroad was incorporated?
Mr. Stonebraker: No, sir.
Commissioner Harlan: How much had been built?
Mr. Stonebraker: I would say about seven to eight miles.
Commissioner Harlan: By the lumber company?
Mr. Stonebraker: Yes.
Commissioner Harlan: Your mill is at Earl?
Mr. Stonebraker: No, sir.
Commissioner Harlan: Where is it?
Mr. Stonebraker: At Crittenden, between two and three miles south of Earl.
Commissioner Harlan: Now, the question counsel asked was, what was the condition there, or what were the transportation conditions before the railroad company was incorporated?
Mr. Marsilliot: At Earl; that is, what sort of service did the people at Earl get, the merchants?
Mr. Stonebraker: Well, unsatisfactory, I think.
Mr. Marsilliot: What sort of a depot did they have there,
212 the Iron Mountain?
Mr. Jeffery: Did they have a depot?
Mr. Stonebraker: They had, if I remember, the frame of a box car for a station.
Mr. Marsilliot: You say the mill of the Crittenden Lumber Company is between two and three miles south of Earl, and on the main line of the Crittenden Railroad?
Mr. Stonebraker: Yes, sir.
Mr. Marsilliot: When was the Crittenden Railroad there completed to its connection with the Rock Island at Heth?
Mr. Stonebraker: In 1908.
Mr. Marsilliot: In 1908?
Mr. Stonebraker: Yes.
Mr. Marsilliot: How far south of Heth does it now extend?
Mr. Stonebraker: Something more than a mile; I don't just remember the exact distance, building.
Mr. Marsilliot: The extension is now in progress?
Mr. Stonebraker: Yes, sir
Mr. Marsilliot: I will ask you whether or not it was the original

intention, so soon as conditions justified it, to extend that road down to some point on the Iron Mountain, something like Marianna, somewhere in that neighborhood?"

213 Mr. Stonebraker: It has been contemplated."

Mr. Marsilliot: That is under consideration now."

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: Taking the distance between Earl and Trafton as approximately sixteen miles, what are the holdings of the Crittenden Lumber Company there, in the way of timber lands?"

Mr. Stonebraker: I do not know the holdings of the Crittenden Lumber Company in timber lands.

Mr. Marsilliot: Do you know what proportion their holdings bear to the whole area of timber land contiguous to this line?"

Mr. Stonebraker: No, sir.

Mr. Marsilliot: The general manager of the road can answer that question?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: And he is here. Now, after the construction of this extension to a connection with the Rock Island you then had two trunk line connections. Did you receive divisions of the through rates from those connections?"

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: Who arranged those divisions with the trunk line officials?

214 Mr. Stonebraker: I did.

Mr. Marsilliot: Without going into details Mr. Stonebraker, I will ask you to state whether or not those divisions were fair and just for the service performed by your company.

Mr. Stonebraker: I believe they were just.

Mr. Marsilliot: And the details of that can also be given by Mr. Blair, the general manager?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: Now I would like for you to tell us since the construction of that connection with the Rock Island, what has been the progress of development from an agricultural and industrial standpoint along the line of that railroad?"

Mr. Stonebraker: Very rapid progress has been made.

Mr. Marsilliot: Do you know about how many manufacturing plants there are along the line of that road between Earl and Trafton at the present time?

Mr. Stonebraker: I believe there are seven plants.

Mr. Marsilliot: You think there are seven."

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: What is the nature of the country through which that road is built, with reference to the character of the soil?"

215 Mr. Stonebraker: The soil is very fine.

Mr. Marsilliot: Is it hilly or swampy country?"

Mr. Stonebraker: Swampy.

Mr. Marsilliot: With reference to the construction of a railroad through that kind of country, was it a difficult or simple proposition?

Mr. Stonebraker: Difficult.

Mr. Marsilliot: At the time that road was built down through there, what sort of a country was that? Developed or undeveloped?

Mr. Stonebraker: Undeveloped.

Mr. Marsilliot: Since the construction of the road, and the removal of a good part of the timber, what has been done with that land?

Mr. Stonebraker: There has been much improvement, rapidly settling up.

Mr. Marsilliot: Are you able to state of your own knowledge what the value of that land is from an agricultural standpoint in that section? I do not mean in dollars and cents, but whether it is good land or poor land.

216 Mr. Stonebraker: Good land.

Mr. Marsilliot: How does it compare in that respect to the best of the agricultural lands in the Mississippi Bottoms; how does it run?

Mr. Stonebraker: I believe it equals any.

Mr. Marsilliot: You believe it equals any in the Mississippi Valley?

Mr. Stonebraker: Yes, sir; in the St. Francis Valley and Mississippi Valley.

Mr. Marsilliot: You said a while ago you made certain representations to the investors in enterprises and in agricultural pursuits along that line with reference to the service you intended to give them. I will ask you what those representations were, and who made them, so far as you know of your own knowledge, what you told those people?

Mr. Stonebraker: I told the people we invited to settle in there that it was our intention to have a connecting line of railroad between Early and Heth and to develop that country, and that plan we worked on from the beginning.

Mr. Marsilliot: In other words, from the very outset of the construction of this road, your intention was to make it a railroad proposition distinctively, and you invited these settlers and in-

217 vestors in various enterprises to come in there and pursued that policy all the way through to the present time?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: And the result of it has been, as I understand, a marked development?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: Have you any idea at the present time about how much land there is in cultivation right along the line of your road? I do not mean to an acre, but approximately?

Commissioner Harlan: Well, it is more important to show the traffic.

Mr. Marsilliot: I have another witness who will testify to that. Now, I will ask you to state, coming to the point his Honor has suggested, what the nature of the traffic is that that road does.

Mr. Stonebraker: It is general traffic, merchandise and forest products.

Mr. Marsilliot: Farm and agricultural supplies?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: Do you run a local service on that road?

Mr. Stonebraker: Yes, sir.

218 Mr. Marsilliot: What arrangements have you with the Chicago, Rock Island & Pacific with reference to your Memphis service to the people of Earl and along your road?

Mr. Stonebraker: We have a daily local car.

Mr. Marsilliot: A package car?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: Less than carload car?

Mr. Stonebraker: Yes, sir, and more than one car if necessary to handle the business. I said daily cars; we have no cars Sundays.

Mr. Marsilliot: Do you run a daily train service on that line?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: What sort of solicitation service do you have in the city of Memphis to secure freight for your line?

Mr. Stonebraker: We have a soliciting arrangement.

Mr. Marsilliot: With whom?

Mr Stonebraker: The Rock Island Railroad.

Mr. Marsilliot: And they do constantly solicit freight for your line?

Mr. Stonebraker: Yes.

219 Mr. Marsilliot: And you have, as I understand it, an arrangement with them whereby you run a daily package car or cars, as the case may be, over to Heth over the Rock Island and then up from Heth to Earl?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: And deliver freight all along the line of the road to Earl?

Mr. Stonebraker: Yes.

Mr. Marsilliot: I will ask you to state whether or not the Crittenden Railroad has a depot at Earl.

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: Without any egotism about it, I will ask you what about that depot and its appointments, the characteristics, as compared with most of them in that section of the country.

Mr. Sonebraker: It is a very good station, much better than some others in that vicinity.

Mr. Marsilliot: I do not want to mention the Iron Mountain by comparison of course. Have you an agent at Earl?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: What is his business?

Mr. Stonebraker: To look after billing and all business of the line at that point.

220 Mr. Marsilliot: He does that exclusively?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: I will ask you to state whether or not that agent

at that depot also solicits business in the town of Earl for the Crittenden line?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: In other words, he is their employee exclusively for the purpose of billing and handling the traffic on that line and soliciting business at Earl?

Mr. Stonebraker: Absolutely.

Mr. Marsilliot: Has that railroad ever paid any dividends?

Mr. Stonebraker: No, sir.

Mr. Marsilliot: Has it ever made any money? Ever earned any money, over and above expenses?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: Can you tell us in a rough way about what it has earned, over and above its expenses?

Mr. Stonebraker: I cannot tell you in a rough way. However, Mr. Blair is here to submit that with the figures.

Mr. Marsilliot: I will ask you what has been done with the net earnings of that railroad.

Mr. Stonebraker: Put into betterments and extensions.

221 Mr. Marsilliot: Has any of that money ever gone into the hands of the Crittenden Lumber Company or any stockholder at all?

Mr. Stonebraker: Not to my knowledge.

Mr. Marsilliot: You would have been pretty apt to know something about it, if it had?

Mr. Stonebraker: I hope so.

Mr. Marsilliot: So that the Crittenden Lumber Company never has gotten a dollar, and neither have the stockholders, except the benefits they have derived from the extension of the road?

Mr. Stonebraker: Yes.

Mr. Marsilliot: Have its funds been kept as a railroad proposition, instead of being intermingled with the funds of the lumber company?

Mr. Stonebraker: Yes, sir; there has been a bank account kept at various cities for the railroad.

Mr. Marsilliot: What bank; do you know?

Mr. Stonebraker: No, sir.

Commissioner Harlan: That does not make any difference.

Mr. Marsilliot: All right. I simply wanted to give all the facts.

222 Commissioner Harlan: I know, but some of those details are not necessary.

Mr. Marsilliot: Inasmuch as you were with this proposition from the very inception, and have been its president and have followed it all the way down the line, I want to ask you what, in your opinion, from your knowledge of the facts and conditions, would be the effect of the cancellation of the through routes and joint rates if these cancellation orders are permitted to go into effect, and considering first, the effect on the railroad itself, what would be the effect on the railroad if these cancellation orders go into effect and you are denied all divisions or through rates.

Commissioner Harlan: Cannot he just explain that in one way at least, by telling what the allowances were? That has not appeared yet.

Mr. Marsilliot: I do not know that he knows that as accurately as another witness, but I would like to have his idea of what the effect would be on the railroad, if it is cut off from all divisions of the through rates.

Mr. Stonebraker: I think the Crittenden Railroad would sustain a severe loss.

223 Mr. Marsilliot: Well, in what way?

Mr. Stonebraker: Well, in the manner of people leaving our line; at least, that has been threatened, if we had to charge them additional rate.

Mr. Marsilliot: Well, what people have threatened to leave your line?

Mr. Stonebraker: Well, Mr. Mason in particular.

Mr. Marsilliot: What business is he in?

Mr. Stonebraker: Cooperage business.

Mr. Marsilliot: He runs a cooperage plant on your line?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: He threatened to leave your line if you charged the combination rates?

Mr. Stonebraker: Well, he said he could not pay an additional rate, and would be forced to leave.

Mr. Marsilliot: Do you, as a matter of fact, think he could afford to pay the additional rate?

Mr. Stonebraker: I know very little about the cooperage business, and could not give an opinion about it.

Mr. Marsilliot: That is with reference to the road. What effect would the cancellation of these divisions have on this rapid development you have been speaking about in industrial and

224 agricultural respects?

Mr. Stonebraker: Owing to the fact of there being no roads or turnpikes, means and ways for people to get in their supplies, I think it would retard greatly the growth of that vicinity.

Mr. Marsilliot: Why is it there have not been any roads and turnpikes built through that country?

Mr. Stonebraker: I do not know.

Mr. Marsilliot: From wading through those swamps over there during the last few years, or at the time that road was constructed, would you like, yourself, to undertake to build a turnpike or county road through that land?

Commissioner Harlan: Let us not go into that.

Mr. Marsilliot: I simply wanted to show it was so swampy that they could not build it.

Commissioner Harlan: That appears.

Mr. Cowan: If it is so swampy they could not build a road, I wonder how they would cultivate it.

Mr. Marsilliot: I am going to show that right now. I want to ask you what effect the cutting out of the timber would have on

that swampy country there, with reference to drying out the land?

225 Mr. Stonebraker: Oh, easier access, and it makes it easier to cross.

Mr. Marsilliot: Does that land down there through that section respond rapidly to the ordinary drainage methods?

Mr. Stonebraker: Yes, sir.

Commissioner Harlan: I really do not think this is of absolute value to the record. Everyone knows about Arkansas and the swamps and how it is going to be drained, and everything else.

Mr. Marsilliot: I believe that is all.

Mr. Cowan: I want to ask one question about the local rates. There is no other railroad serving these industries except yours, between Earl and Heth?

Mr. Stonebraker: No, sir; not those on our line.

Mr. Cowan: Who are all these people there, the farmers, the people you are serving on that line; are they farmers?

Mr. Stonebraker: Many of them are farmers.

Mr. Cowan: Do not they ship their stuff out from there to Memphis principally?

Mr. Stonebraker: Memphis and St. Louis.

Mr. Cowan: As a matter of fact, the business is done with Memphis nearly altogether by the farmers who live nearby, and

226 that is all around Memphis?

Mr. Stonebraker: Much business is done in Earl.

Mr. Cowan: If it is shipped from Earl down to these farms, it is shipped on a local rate?

Mr. Stonebraker: From Earl?

Mr. Cowan: The through rate has nothing to do with it. You get more out of the local rate than out of a division of the through rate?

Mr. Stonebraker: Oh, no.

Mr. Cowan: That is all.

Mr. Marsilliot: I want to ask you a question about that. There is a large quantity of traffic which moves from these enterprises on your line into other states, is there not?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: There is a through rate charged on that, is there not?

Mr. Stonebraker: Yes, sir.

Mr. Marsilliot: And the Crittenden Railroad Company has got its divisions of the through rate?

Mr. Stonebraker: Yes, sir.

Examiner Burchmore: Do you at the present time own any stock in the Crittenden Lumber Comptny?

227 Mr. Stonebraker: No.

Examiner Burchmore: Does any member of your family own any stock?

Mr. Stonebraker: No, sir.

Commissioner Harlan: That seems to be all.

(Witness excused.)

J. R. BLAIR was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Mr. Marsilliot: Your name is J. R. Blair?
Mr. Blair: Yes, sir.
Mr. Marsilliot: Where do you live?
Mr. Blair: Memphis, Tennessee.
Mr. Marsilliot: How long have you lived there?
Mr. Blair: About five years.
Mr. Marsilliot: In what way are you connected with the Crittenden Railroad?
Mr. Blair: Secretary and general manager.
Mr. Marsilliot: How often do you go over to Earl and along the road?
228 Mr. Blair: Two or more times a week.
Mr. Marsilliot: You are also connected with the Crittenden Lumber Company?
Mr. Blair: Yes, sir.
Mr. Marsilliot: What is your connection with the Crittenden Lumber Company?
Mr. Blair: Western manager.
Mr. Marsilliot: Before we go further, I want to ask you, do you solicit orders for lumber for your saw mill, the Crittenden Lumber Company?
Mr. Blair: By correspondence; yes, sir.
Mr. Marsilliot: Now, Mr. Blair, you have been there about five years. Were you general manager of the road at the time it was incorporated?
Mr. Blair: No, sir.
Mr. Marsilliot: How long did you get there after it was incorporated?
Mr. Blair: I was working for the Crittenden Lumber Company at the time the road was incorporated, and was employed at Earl, at the mill.
Mr. Marsilliot: I wish you would state briefly, so we can hurry along, what were the conditions affecting transportation,
229 or rather, the transportation service received by the citizens of Earl prior to the time this road was extended down to the Rock Island at Heth?
Mr. Blair: Before the Crittenden Railroad connected with the Rock Island at Heth, the only way they could get freight and ship freight was from and by the St. Louis, Iron Mountain & Southern Railroad. When our road connected with the Rock Island at Heth arrangements were made for through rates and routes, which gave Earl a competitive service, thereby greatly facilitating ordinary business transactions.
Mr. Marsilliot: Are you able to state what effect that competitive transportation service had upon the growth and development of the town of Earl?
Mr. Blair: I would say it had a great deal.

Mr. Marsilliot: I want to ask you what effect the construction of that road to a connection with the Rock Island at Heth had upon the rates paid by the merchants at Earl, for instance, on traffic to Memphis of various kinds; take cotton, for instance.

Mr. Blair: The rates remained the same in all cases, with the exception of cotton; the cotton rate was reduced somewhat.

Mr. Marsilliot: Well, about what percentage?

230 Mr. Blair: I do not know; 25 or 30 per cent, probably.

Mr. Marsilliot: In other words, after the construction of your road to the connection with the Rock Island, the merchants at Earl got a reduction of some 25 or 30 per cent in the rate on cotton to Memphis?

Mr. Blair: Yes, sir.

Mr. Marsilliot: I want to ask you right there about how much cotton is shipped, in a general way, from Earl to Memphis, per annum?

Mr. Blair: Probably this year something over 6,000 bales will be shipped.

Mr. Marsilliot: How much of that will be handled by your road, as near as you can tell?

Mr. Blair: About fifty per cent.

Mr. Marsilliot: About 50 per cent goes down over the Crittenden Road south to Heth, and then over the Rock Island to Memphis?

Mr. Blair: Yes, sir.

Commissioner Harlan: What is the mileage by that route?

Mr. Blair: It is 15 miles from Earl to Heth, and I think 24 or 25 miles from Heth to Memphis.

Commissioner Harlan: What is the mileage over the Iron

231 Mountain route into Memphis?

Mr. Blair: 25 or 26 miles, about.

Commissioner Harlan: Twenty-five miles, as against 40 over your road?

Mr. Blair: Yes, sir.

Mr. Marsilliot: But the rates are the same by either route?

Mr. Blair: They are.

Mr. Marsilliot: I will ask you to illustrate some of the divisions of rates between your road and the Iron Mountain and the Rock Island. Just select any illustrations that occur to you.

Mr. Blair: The divisions are the same in all cases; that is, we get the same divisions from the Rock Island as the Iron Mountain. The rate to Memphis is six cents, of which we get two cents; to Cairo and St. Louis it is ten to twelve cents, of which we get two cents, and to Kansas City, sixteen cents, of which we get two cents.

Mr. Marsilliot: So you never get more than two cents division on any of that traffic?

Mr. Blair: Never more than two cents on forest products.

Mr. Marsilliot: Considering the service your road renders

232 and that it is the initial line, do you think that is a fair division?

Mr. Blair: I think it is a very fair division.

Mr. Marsilliot: Well, fair to whom?

Mr. Blair: To everybody.

Mr. Marsilliot: Is there any such thing on your road as the milling in transit scheme we have talked about here this morning?

Mr. Blair: No.

Mr. Marsilliot: You have no such feature of that kind on your road at all?

Mr. Blair: No.

Mr. Marsilliot: There is nothing of that kind in connection with the Crittenden Lumber Company?

Mr. Blair: No.

Mr. Marsilliot: What sort of an outfit have you got at the town of Earl in the way——

Commissioner Harlan: Where are the forests of the Crittenden Lumber Company?

Mr. Blair: The mill of the Crittenden Lumber Company is situated two miles south of Earl, and when we commenced there, their woods were all around us; the timber was drawn from the
233 woods that were nearest the mill, and as we progressed the road was built longer and longer, and the holdings of the Crittenden Lumber Company are of course farther and farther away.

Commissioner Harlan: How do you get you logs now to the mill?

Mr. Blair: The Crittenden Railroad Company hauls them.

Commissioner Harlan: What charge does that railroad make?

Mr. Blair: $5.00 per log car.

Commissioner Harlan: Against the lumber company?

Mr. Blair: Yes.

Commissioner Harlan: Regardless of the distance?

Mr. Blair: That takes it to the Rock Island Road. We are now just continuing our road, or extending our road beyond, and there will be a charge of $7.00 when we get down there, but at present it is $5.00 regardless of distance.

Commissioner Harlan: What kind of rate do you call that?

Mr. Blair: Per car load rate, flat rate.

Commissioner Harlan: Is that published?

Mr. Blair: Yes, sir.

Commissioner Harlan: With the Inter-state Commerce Commission?

234 Mr. Blair: With the State Commission.

Commissioner Harlan: When the lumber is manufactured, and you haul it out to the Iron Mountain at Earl, what division do you get?

Mr. Blair: Two cents.

Commissioner Harlan: On the Memphis rate?

Mr. Blair: All rates.

Commissioner Harlan: When you haul it out to the Rock Island Junction you get two cents?

Mr. Blair: Yes, sir.

Commissioner Harlan: What part of your manufactured lumber goes out over the Rock Island?

Mr. Blair: Probably 50 per cent.

Commissioner Harlan: Did you get any allowance from the Iron Mountain before the railroad was incorporated?

Mr. Blair: Yes, sir.

Commissioner Harlan: What was it?

Mr. Blair: I think it was the same as it is now.

Commissioner Harlan: Do you have any equipment—I have forgotten whether it has been stated——

Mr. Marsilliot: I was just coming to that.

Mr. Blair: We have equipment, but none of our own
235 equipment is interchanged with the other roads.

Commissioner Harlan: You have only the logging equipment?

Mr. Blair: And a few other box and flat cars, which we use for the general business.

Commissioner Harlan: How many locomotives?

Mr. Blair: Two.

Commissioner Harlan: Do you have any special locomotives in the logging business?

Mr. Blair: Only two on the entire road.

Examiner Burchmore: You said there are no milling in transit rates or privileges on your railroad?

Mr. Blair: Yes, sir.

Examiner Burchmore: Were there not formerly such privileges and divisions?

Mr. Blair: No, sir.

Mr. Marsilliot: Coming now to the road itself, beginning with the town of Earl, what sort of facilities have you in that town such as a depot and engines——

Commissioner Harlan: The depot at Earl has been described. Have you public team tracks there?

Mr. Blair: Yes.

Commissioner Harlan: How many?

236 Mr. Blair: One.

Commissioner Harlan: How many cars will it hold?

Mr. Blair: A number. All that any one would want to use.

Commissioner Harlan: Have you an agent there for less than carload freight?

Mr. Blair: Yes, sir.

Mr. Marsilliot: And he does not do anything else but that?

Mr. Blair: That is all.

Mr. Marsilliot: How is that road constructed, standard or narrow gauge?

Mr. Blair: Standard gauge.

Commissioner Harlan: What is the iron?

Mr. Blair: 35 pound steel, and some 65; just a little.

Mr. Marsilliot: Let us come to your train service. What sort of a train service do you have?

Mr. Blair: We run a local freight from Crittenden to Heth, which returns with a package car from Memphis every day, which it delivers at Earl, or returns to Crittenden and goes to other points along the road.

Mr. Marsilliot: And that drops the freight packages along the road, according to the destinations?

Mr. Blair: The big bulk of it is for Earl.

237 Mr. Marsilliot: Now, what do you do in the way of securing business for that road, where do you solicit business and how do you solicit it?

Mr. Blair: That package freight coming from Memphis, the Rock Island are of course interested in getting a good deal of freight——

Commissioner Harlan: Let us not go over that. That is sufficiently in the record.

Mr. Marsilliot: At the present time, taking the total tonnage of your road, about how much of its business is transacted for the Crittenden Lumber Company and about how much for the public?

Mr. Blair: I would say not over 35 per cent for the Crittenden Lumber Company. I have not the exact figures, but about 35 to 40 per cent; not over 40 per cent for the Crittenden Lumber Company and the balance for the general public.

Mr. Marsilliot: You have your through and local tariffs published and regularly on file with the State and Interstate Commerce Commission?

Mr. Blair: Yes, sir.

238 Mr. Marsilliot: Have you made your reports regularly to the Interstate Commerce Commission?

Mr. Blair: Yes, sir.

Mr. Marsilliot: Have you ever received any complaint about your manner of keeping accounts or rendering your reports?

Mr. Blair: We have had some explanations to make, which have always been satisfactory.

Mr. Marsilliot: I want to ask about this train service. What have you to say about the public log loading service on your road?

Mr. Blair: There are mills on our line which buy timber along our line, which we are required to load for them and haul to their plants.

Mr. Marsilliot: But they pay you your regular local tariff?

Mr. Blair: Yes, sir.

Commissioner Harlan: Their mills are on your line?

Mr. Blair: Yes, sir.

Mr. Marsilliot: Before I forget it, the Crittenden Lumber Company pays your road the same as any other enterprise located on your road?

Mr. Blair: Yes, sir.

239 Mr. Marsilliot: Does it receive any service or any different service or different rate from any other enterprise on your line?

Mr. Blair: Absolutely none.

Mr. Marsilliot: Does it pay the regular local and through rates on the service rendered to it by your railroad company?

Mr. Blair: In every case.

Mr. Marsilliot: How often are those settlements made, Mr. Blair?

Mr. Blair: Once a month.

Mr. Marsilliot: We will come to the enterprises on your road. How many are there, and what do they consist of?

Mr. Blair: Butler & Linster are at one end of the road, as a stave mill.

Mr. Marsilliot: Let us take them one at a time. What is their business?

Mr. Blair: They make staves.

Mr. Marsilliot: How much, in a rough way, do they ship per month?

Mr. Blair: I do not know.

Commissioner Harlan: It would be much more satisfactory to have those details in the form of an exhibit. It is impossible
240 to remember these amounts, and we would have to examine the exhibits anyway. If you will prepare an exhibit giving the names of these industries and their location and the business in which they deal, and the amount of freight you have handled in the last three years for each of them in and out——

Mr. Marsilliot: We will do that. There are seven enterprises located on your line?

Mr. Blair: Yes, sir.

Mr. Marsilliot: How did they happen to locate there?

Mr. Blair: We induced them to, by proving to them it was advantageous to do so, inasmuch as the location was good and the rates were the same.

Mr. Marsilliot: What representation did you make to them with reference to public transportation service?

Mr. Blair: That it was the same on our road as on any road, and the through rates were the same from any point on our line as from Earl or Heth.

Mr. Marsilliot: Have those representations been carried out by your road?

Mr. Blair: Yes, sir.

Mr. Marsilliot: I want to ask you about how much land, in
241 a rough way, there is in cultivation along the line of your road. I do not mean to the acre, but as near as you can get at it.

Mr. Blair: Our road is 15 miles between Earl and Heth, and for half of that distance it is cultivated on both sides of the road, and the other half is being put into a state of cultivation.

Mr. Marsilliot: About how many acres, in round figures, as near as you can get at it?

Mr. Blair: Probably 10,000 acres.

Mr. Marsilliot: What proportion do the timber holdings of the Crittenden Lumber Company bear to the total timber area along the line of your road, in other words, taking the total area as 100 per cent, about what percentage of timber contiguous to your road does the Crittenden Lumber Company own?

Mr. Blair: Up to the present time they have owned probably 75 per cent; that is on a mileage on each side of the road I would say 75 per cent.

Mr. Marsilliot: Up to the present time?

Mr. Blair: Yes, sir.

Mr. Marsilliot: As I understand, a great deal of that tim-
242 ber has been removed?

Mr. Blair: Yes, sir.

Mr. Marsilliot: What has been done with the land after the timber has been removed?

Mr. Blair: It has been largely sold to northern farmers, who have come down there to settle.

Mr. Marsilliot: What representations have you made to them about transportation service?

Commissioner Harlan: You need not go further into that. If this witness can show by exhibits the traffic he has moved for the farmers, that is all he need to show.

Mr. Marsilliot: We will do that. Now, from your familiarity with this situation, I should like to have you explain to the Commission what, in your opinion, will be the necessary effect of the cancellation of these divisions of through rates, and why?

Mr. Blair: It will necessarily make an increase in the rate, because everybody along our line will have to pay a local rate in addition to the rate which is now in effect from Memphis to destination along our line, and the mills located on our line I understand cannot stand the additional expense; they will have to be moved, which
243 will take their tonnage away from us.

Mr. Marsilliot: Well, now, right there I want to ask you, what have you done in the way of building spur tracks and switches for enterprises on your line?

Mr. Blair: We have built one spur track of four and a half miles to a mill whose capacity is two carloads of lumber a day. We have built another spur to a plant whose capacity is probably two carloads a week. We have built two of that kind.

Commissioner Harlan: Are those lumber mills?

Mr. Blair: Lumber mills; and another spur probably three-quarters of a mile long, which goes to two mills.

Mr. Marsilliot: Is the Crittenden Railroad, or any of its stockholders, interested in any of those other enterprises on your line?

Mr. Blair: None whatever, to my knowledge.

Mr. Marsilliot: Have you got any interest in any of them?

Mr. Blair: No, sir.

Commissioner Harlan: Did your question include the stockholders? Did the stockholders of the Crittenden Lumber Company?

Mr. Blair: I understood the question that way, and I answered no.

244 Commissioner Harlan: The Crittenden Lumber Company or its stockholders have no interest in the forests that those other lumber companies are operating?

Mr. Blair: They have no interest in them whatever.

Examiner Burchmore: You said there were no milling in transit arrangements; on file with the Commission is Rock Island tariff No. I. C. C. 8630 and Iron Mountain A-974, which may have been cancelled by this time; I do not know whether they are still in effect, but they are said to contain milling in transit rules applicable over

the Crittenden Railroad, and by the Crittenden Railroad. Now, that your memory is refreshed by reference to those tariffs, do you remember whether such milling in transit arrangements have been in effect?

Mr. Blair: I do not remember them and I know if they are in effect, they have never been taken advantage of.

Examiner Burchmore: Will you not look into the matter upon your return to your office, and advise the Commission formally by way of supplement to your testimony on that point?

Mr. Blair: Let me have those tariff numbers.

Examiner Burchmore: Rock Island I. C. C. 8630 and Iron Mountain A-974. The Commission also has a division sheet issued
245 by the Chicago, Rock Island & Pacific on January 1st, 1909, numbered percentage issue No. 11, providing a basis for dividing freight rates with the Crittenden Railroad. I do not know whether that is your present division sheet. Do you know whether it is?

Mr. Blair: I think there has been another one since.

Examiner Burchmore: This division sheet provides that on lumber in carloads from stations on the Crittenden Railroad to all stations in Arkansas on the Rock Island or Frisco the divisions will be as follows, to the Crittenden Railroad, free; to the Rock Island and connections, the remainder. That indicates evidently that on traffic within the State of Arkansas the Crittenden Railroad hauls it free for the lumber company?

Mr. Blair: Yes, sir.

Examiner Burchmore: Have you any explanation to make of that arrangement?

Mr. Blair: None other than when the connection was made with the Rock Island they gave the railroad no division of intra-state freight business.

Examiner Burchmore: Is that explained by any action of
246 the Arkansas State Commission with respect to such divisions?

Mr. Blair: Not that I know of.

Commissioner Harlan: What is the explanation?

Mr. Blair: I do not know. We never did get it, and that is all I know.

Examiner Burchmore: What is the explanation for your willingnes to haul it free for the shipper?

Mr. Blair: The only explanation is that — is very little business for us in Arkansas.

Commissioner Harlan: Are you permitted under the laws of Arkansas to haul free for a shipper?

Mr. Blair: I presume not.

Commissioner Harlan: Still you are doing it?

Mr. Blair: It seems so.

Commissioner Harlan: Is that all the explanation you have to make?

Mr. Blair: That is all the explanation I can make; yes, sir.

Examiner Burchmore: Will you furnish the Commission with a copy of the present division sheet of the Rock Island?

Commissioner Harlan: I would like to put one question now on that matter. You are now hauling it free, and the tariff so provides.

247 Mr. Blair: Yes, sir, the tariff so provides.

Commissioner Harlan: Does the fact that the railroad company is owned by the lumber company have any relation to that?

Mr. Blair: Absolutely none; no sir.

Examiner Burchmore: You have a passenger traffic?

Mr. Blair: Yes, sir.

Examiner Burchmore: Have you any passenger equipment?

Mr. Blair: No.

Examiner Burchmore: Passengers are hauled in cabooses?

Mr. Blair: Yes, sir.

Examiner Burchmore: Do passengers pay any fare?

Mr. Blair: No.

Examiner Burchmore: They are hauled free?

Mr. Blair: Yes, sir.

Examiner Burchmore: That includes the traveling public as well as employees of your community?

Mr. Blair: Yes, sir.

Mr. Marsilliot: Are you not mistaken about that? Take a passenger getting on with a package or something of that kind——

Mr. Blair: If a passenger gets on and he has a grip or big bundle, he pays 25 cents or a dime for the privilege of car-

248 rying it down the line.

Commissioner Harlan: Do you haul lumber for any other than the Crittenden Lumber Company without charge in the State of Arkansas?

Mr. Blair: Well, I cannot state.

Commissioner Harlan: You must have some provision about that.

Mr. Blair: I think there is a charge, but what it is, I do not know.

Commissioner Harlan: My precise question was whether you hauled it free of charge.

Mr. Balir: No, sir.

Mr. Marsilliot: Is there any lumber originating on your line of road sold to points in Arkansas, to amount to anything?

Mr. Blair: No, very, very little.

Mr. Marsilliot: When was the last time you remember of a carload going off of your railroad to any point in Arkansas?

Mr. Blair: I do not remember of one.

Mr. Marsilliot: In other words, that traffic moved to points east of the Mississippi River and to points north and west of the State of Arkansas?

Mr. Blair: Yes, sir.

249 Examiner Burchmore: Have you filed with the Interstate Commerce Commission any local rates between stations as your own line?

Mr. Blair: No.

Examiner Burchmore: Do you handle any traffic which has orig-

nated in Memphis or St. Louis and is billed to points on your line on combinations, by using your local rates, which is not published with the Commission?

Mr. Blair: No.

Examiner Burchmore: You have joint through rates from Memphis and St. Louis?

Mr. Blair: Yes.

Examiner Burchmore: Do you file annual reports of statistics with the Interstate Commerce Commission?

Mr. Blair: Yes, sir.

Examiner Burchmore: When was the last one filed?

Mr. Blair: June 30, 1908 to 1909.

Examiner Burchmore: Do you file monthly reports.

Mr. Blair: No.

Examiner Burchmore: Accident reports?

Mr. Blair: No.

Examiner Burchmore: Are your cars equipped with safety
250 devices, as required by the Interstate Commerce Comission?

Mr. Blair: Couplers, but no air brakes.

Examiner Burchmore: Do you keep your system of accounts in accordance with the rules promulgated by the Interstate Commerce Commission?

Mr. Blair: Not entirely.

Examiner Burchmore: Are those exceptions of an important nature, or is it substantially different?

Mr. Blair: Well, it is substantially different. We keep a set of books as a double entry system, and from that system we send everything to the Interstate Commerce Commission in their annual report

Commissioner Harlan: Have you any questions, Judge Cowan?

Mr. Cowan: No questions, so far as I am concernel.

Mr. Coleman: What are the divisions of the through rates on the traffic from Memphis and St. Louis inbound?

Mr. Blair: I cannot state offhand. I think it is about—I do not know; I cannot state offhand.

Mr. Coleman: Do you know what you get on that haul of cotton?

Mr. Marsilliot: From where do you mean; from Earl to Mem phis?

251 Mr. Coleman: Yes, if you remember.

Mr. Blair: No, sir, I cannot remember.

Mr. Coleman: What percentage does the lumber traffic bear to all the traffic, if you know?

Mr. Blair: No, I have never made up those things.

Mr. Coleman: Your position, then, is that the divisions you receive on the cotton and merchandise from St. Louis is comparatively unimportant, compared with the lumber?

Mr. Blair: Yes, sir:

Mr. Coleman: It is so unimportant that you do not even know?

Mr. Blair: Oh, no; it is considerably more than that.

Mr. Coleman: But the main thing is the division on the lumber?

Mr. Blair: Yes, sir.

Mr. Marsilliot: Is it possible for you, without the tariff before you to keep in your mind the divisions on all of the numberless and varied classes of commodities that you haul from various points?

Commissionr Harlan: Now, we all know that it is not, but we thought he might know something about that. If he does not, he might ascertain that.

252 Mr. Blair: I will have it in the division sheets which I will show.

Commissioner Harlan: We will adjourn at this point until ten o'clock tomorrow morning.

Whereupon, at 5:30 P. M., an adjournment was taken until Friday, December 9, 1910, at 10:00 A. M.

253 NEW ORLEANS, LA., *December* 9, 1910.

Met pursuant to adjournment at 10:00 A. M.

Present: Parties as before.

Commissioner Harlan: The stenographer informs me that not more than half of the parties in attendance have filed appearances, as requested yesterday. I hope it will be understood that the Commission cannot act on any case unless the record shows that that road is here. It becomes very important, therefore, for all the tap lines, so-called, that are seeking a restoration of through rates to indicate that desire by filing their appearances of record. The Commission will not consider any case that does not appear of record.

Mr. Brady: On the question of reparation, some are cited here who have not entered an appearance, where there has been no cancellation of the divisions.

Commissioner Harlan: I should advise those roads to enter their appearance also. The Commission is going to deal with the whole question.

Mr. Cowan: If I may make the suggestion, that if there is a list, complete or otherwise, so that the names could be called, that the list be gone over and the names be called, because persons who have not entered their appearence may do so orally,

254 and it might save a good deal of complication if the names were called, and let those enter their appearance who happen to be here, or, if they are here and do not want to appear, they can do that.

Commissioner Harlan: That seems to be a good suggestion. There are a great many of them on the list before us at this time, but I will call them off, and if any one appears, they will at once arise and state their names.

The first on the list is the Anderson & Saline River Railway.

(No response.)

Commissioner Harlan: Antoine Valley Railroad Company.

(No response.)

Commissioner Harlan: The Arkansas Eastern Railroad.

Mr. Andrews: Sidney F. Andrews.

Commissioner Harlan: Bearden & Ouachita River Railroad.

Mr. Beland: Mr. J. H. Beland.
Commissioner Harlan: Beirne & Clear Lake Railroad.
(No response.)
Commissioner Harlan: Blytheville, Burdette & Mississippi River Railroad.
(No response.)
255 Commissioner Harlan: Brookings & Peach Orchard Railroad.
(No response.)
Commissioner Harlan: Crossett Railway. That road was represented yesterday.
Mr. McRae: I am here, and a written appearance was filed for that road.
Commissioner Harlan: De Queen & Eastern Railroad.
Mr. Kirkpatrick: John S. Kirkpatrick.
Commissioner Harlan: Doniphan, Kensett & Searcy Railway.
Mr. Burdette: I appear for that road.
Commissioner Harlan: El Dorado & Wesson.
Mr. Niehauss: C. W. Niehauss.
Commissioner Harlan: Cornie Valley.
(No response.)
Commissioner Harlan: Elmore & Southwestern.
(No response.)
Commissioner Harlan: England & Clear Lake Railway.
(No response.)
Commissioner Harlan: Fordyce & Princeton.
Mr. Murray: W. T. Murray.
Commissioner Harlan: Fourche River Valley & Indian Territory Railway.
256 Mr. Bigelow: N. B. Bigelow.
Commissioner Harlan: Freeo Valley Railway.
Mr. Bower: Edward Bower.
Commissioner Harlan: Greenfield & Southeastern.
(No response.)
Commissioner Harlan: Griffen, Magnolia & Western.
(No response.)
Commissioner Harlan: Helena, Parkin & Northern.
(No response.)
Commissioner Harlan: Homan & Southeastern.
(No response.)
Commissioner Harlan: Kearney & Sheriden.
(No response.)
Commissioner Harlan: L'Anguille River Railway.
(No response.)
Commissioner Harlan: Lester & Ouachita Valley Railroad.
(No response.)
Commissioner Harlan: Little Rock Maumelle & Western.
Mr. Mehaffy: An appearance has already been entered.
Commissioner Harlan: Little Rock, Sheridan & Saline River Railway.
(No response.)
257 Commissioner Harlan: Louisiana & Pine Bluff.
Mr. Scott: F. W. Scott.

Commissioner Harlan: Luchrmann & Western Railway.
(No response.)
Commissioner Harlan: The Malvern & Freeo Valley Railway. That was before us yesterday.
Mississippi, Arkansas & Western Railway.
(No response.)
Commissioner Harlan: Mississippi Valley Railroad.
Mr. Ziebold: Charles F. Ziebold.
Commissioner Harlan: The Osceola, Little River & Western Railroad.
(No response.)
Commissioner Harlan: Ouachita Valley Railway.
Mr. Buchner: C. A. Buchner.
Commissioner Harlan: Perla Northern Railroad.
Mr. Armistead: H. M. Armistead.
Commissioner Harlan: Prescott & Northwestern Railroad.
Mr. McRae: I have already entered my appearance.
Commissioner Harlan: Red River Valley.
(No response.)
Commissioner Harlan: Rison & Mt. Elba Railroad.
258 (No response.)
Commissioner Harlan: Round Top Terminal Company.
(No response.)
Commissioner Harlan: Saginaw & Ouachita River Railway.
Mr. Mehaffy: My appearance has been noted.
Commissioner Harlan: Saline Bayou Railway.
(No response.)
Commissioner Harlan: Saline River Railway.
Mr. Stocking: An appearance was entered yesterday for that road.
Commissioner Harlan. Thornton & Alexandria Railway.
Mr. Beland: J. H. Beland.
Commissioner Harlan: Warren & Ouachita Valley Railroad.
(No response.)
Commissioner Harlan: Warren, Johnsville & Saline River Railroad.
(No response.)
Commissioner Harlan: Wilmar & Saline Valley Railroad.
(No response.)
Commissioner Harlan: Wilson Northern Railway.
Mr. Coleman: Charles T. Coleman.
Commissioner Harlan: Wyandotte & Southeastern Railway.
259 (No response.)
Commissioner Harlan: Arkansas & Gulf Railroad.
Mr. Kimball: Mr. M. Kimball.
Commissioner Harlan: Arkansas Southeastern Railroad.
(No response.)
Commissioner Harlan: Bernice & Northwestern Railway.
(No response.)
Commissioner Harlan: Bodcaw Valley Railway Company.
(No response.)

Commissioner Harlan: Delhi, Baskin & Southwestern Railway Company.
(No response.)
Commissioner Harlan: Dorcheat Valley Railroad.
Mr. McRae: I have entered an appearance.
Commissioner Harlan: Enterprise Railway Company.
(No response.)
Commissioner Harlan: Gulf & Sabine River Railroad, Fullerton Division.
(No response.)
Commissioner Harlan: Gulf & Sabine River Railroad, Stables Division.
(No response.)
260 Commissioner Harlan: Kentwood & Eastern Railway Company.
(No response.)
Commissioner Harlan: Kentwood, Greensburg & Southwestern Railroad Company.
Mr. Brady: T. Brady, Jr.
Commissioner Harlan: Lake Charles Railway & Navigation Company.
Mr. Webber: W. B. Webber and Luther M. Walter.
Commissioner Harlan: Loring & Western Railway Company.
(No response.)
Commissioner Harlan: Louisiana & Pacific Railway.
Mr. Thurmond: W. R. Thurmond.
Commissioner Harlan: Louisiana Central Railroad.
Mr. Church: W. Q. Church.
Commissioner Harlan: Louisiana Railway Company.
Mr. McRae: I have filed an appearance.
Commissioner Harlan: Mangham & Northeastern Railway.
(No response.)
Commissioner Harlan: Mansfield Railway & Transportation Company.
Mr. Frost: E. A. Frost.
Commissioner Harlan: Martindale & Ouachita River Rail-
261 road Company.
(No response.)
Commissioner Harlan: Mill Creek & Little River Railway & Navigation Company.
(No response.)
Commissioner Harlan: Missouri & Louisiana Railroad.
Mr. Sargent: John A. Sargent.
Commissioner Harlan: There seems to be two roads of that name.
Mr. Sargent: One corporation operates all of them.
Commissioner Harlan: Monroe & Southwestern Railway Company.
Mr. McLurg: P. S. McLurg.
Commissioner Harlan: Natchez, Ball & Shreveport Railway Company.
(No response.)

Commissioner Harlan: Natchez, Urania & Ruston Railway.
(No response.)
Commissioner Harlan: New Orleans, Natalbany & Natchez Railway Company.
Mr. Brady: T. Brady, Jr.
Commissioner Harlan: North Louisiana & Gulf Railroad.
Mr. Hobbs: W. S. Hobbs.
262 Commissioner Harlan: Ouachita & Northwestern Railroad.
Mr. Riddell: J. D. Riddell.
Commissioner Harlan: The Red River & Gulf is already before us. Red River & Rocky Mount Railroad.
Mr. Ziebold: I appear for that road.
Commissioner Harlan: Sabine & Eastern Railway.
Mr. Kirkpatrick: J. S. Kirkpatrick.
Commissioner Harlan: Sabine & Northern Railroad Company.
Mr. Sugar: My appearance has been filed.
Commissioner Harlan: Sibley, Lake Bisteneau & Southern Railway.
Mr. Thurmond: W. R. Thurmond.
Commissioner Harlan: The Tioga & Southeastern Railway.
(No response.)
Commissioner Harlan: The Tremont & Gulf Railway.
Mr. Seaman: I appear for that company.
Commissioner Harlan: Victoria, Fisher & Western Railroad Company.
Mr. Riddell: J. D. Riddell.
Commissioner Harlan: Woodworth & Louisiana Central Railway Company.
Mr. Thurmond: W. R. Thurmond.
263 Commissioner Harlan: Zwolle & Eastern Railway.
Mr. Ziebold: Charles F. Ziebold.
Commissioner Harlan: Angelina & Neches River Railroad.
A Voice: Luther M. Walter will represent that road.
Commissioner Harlan: Beaumont & Saratoga Transportation Company.
(No response.)
Commissioner Harlan: Beaumont & Great Northern Railroad.
(No response.)
Commissioner Harlan: Caro Northern Railway.
Mr. Saner: J. S. Saner.
Commissioner Harlan: Durham Transportation Company.
(No response.)
Commissioner Harlan: Galveston, Beaumont & Northeastern.
(No response.)
Commissioner Harlan: Groveton, Lufkin & Northern Railway.
Mr. Garwood: The appearance was entered yesterday.
Commissioner Harlan: Jefferson & Northwestern Railway.
(No response.)
Commissioner Harlan: Livingston & Southeastern Railway.
(No response.)

Commissioner Harlan: Moscow, Camden & San Augustine.
264 Mr. Mantooth: E. J. Mantooth.
Commissioner Harlan: Nacogdoches & Southeastern Railroad.
Mr. Smith: W. B. Smith.
Commissioner Harlan: Shreveport, Houston & Gulf Railroad.
A Voice: Luther M. Walter will represent that road.
Commissioner Harlan: Texas Southeastern Railroad.
Mr. Greer: George C. Greer. My appearance was entered yesterday.
Commissioner Harlan: Timpson & Henderson Railroad.
(No response.)
Commissioner Harlan: Trinity Valley & Northern.
A Voice: Luther M. Walter will represent that road.
Commissioner Harlan: Trinity Valley Southern Railroad.
Mr. Powell: B. H. Powell.
Commissioner Harlan: Are there any other companies that have not been called?
Mr. McRae: The Caddo & Choctaw.
Commissioner Harlan: The appearance has been entered for that road.
Mr. Brady: The Natchez, Columbia & Mobile Railroad Company. I represent that company.
Commissioner Harlan: We only want such roads as have
265 not been called, who wish to enter their appearance.
Mr. Armistead: I desire to place Mr. H. H. Foster, of the Malvern & Freeo Valley Railroad on the stand in order that he may correct and explain his testimony.

H. H. Foster was recalled as a witness, and having been previously sworn, testified as follows:

Mr. Armistead: You wish to make a correction and an explanation of your testimony with reference to the connections of the incorporated road with the lumber company's tram road. Proceed, and be as concise as possible.
Mr. Foster: I testified yesterday that the logging road south of Landers was owned by the lumber company, that portion of the line that is taken up and transferred from one place to another. That was true as to everything except the rail. The rail belongs to the Malvern & Freeo Valley Railroad Company, and is rented to the lumber company; that is, ten miles belongs to them and ten miles of the rail was secured through the Malvern & Freeo Valley from the Rock Island on a rental valuation and by them rented to the lumber company, so that the 18 miles of rail that lies south of
Landers is the property of the Malvern & Freeo Valley Rail-
266 road, and by them rented to the lumber company. That was not in accordance with my testimony yesterday. I could not think fast enough to state the details.
Commissioner Harlan: And ten miles were furnished by the Rock Island?

Mr. Foster: The Malvern & Freeo Valley rents that ten miles from the Rock Island road, and in turn rents it to the lumber company.

Commissioner Harlan: Is the rent reserved in the contract which is already in evidence?

Mr. Foster: Yes, sir.

Mr. Armistead: That rail is used in your temporary trams, and laid into the woods, and moved from time to time?

Mr. Foster: Yes, sir. That is the end of the track south of Landers.

Mr. Armistead: That is the lumber company's trams?

Mr. Foster: Yes, sir.

Commissioner Harlan: While you are on the stand I would like to know whether it is not true that the Malvern & Freeo Valley Railroad was incorporated by you at the suggestion and advice of the Rock Island?

Mr. Foster: No, sir: I do not think that is true at all. The
267 incorporation of that road was the outgrowth of the sitting of the Commission in St. Louis in about 1904, when it was stated by the Commission that lines at least to be common carriers must be incorporated, and both the Iron Mountain and the Rock Island insisted that if these relations were to exist, that we must become an incorporated line, and we incorporated.

Commissioner Harlan: Well, your attention was called to that proceeding by these two roads?

Mr. Foster: I was present at the hearing.

Commissioner Harlan: That seems to be all.

Mr. Cowan: I would like to ask what the object of renting rails is. What is the reason for renting rails?

Mr. Foster: Well, sometimes it fits your financial situation better to pay six per cent interest than to buy rails at——

Mr. Cowan: But as between the Freeo Valley Railroad and the lumber company, the Wyoming or Wisconsin, or whatever the name of it is: how could it fit the financial situation there to rent the rails?

Mr. Foster: I explained yesterday all the railroad's property or property which came under a general railroad character was incorporated under the charter, already received from the state,
268 and put in to constitute its capital stock....

Mr. Cowan: But I am speaking now of renting rails. I can not see why there would be a rental arrangement for renting rails as between your lumber company and the railroad company.

Mr. Foster: I do not see why; it is just as legitimate as the renting of rails between the lumber company and any other railroad company. They might rent them from the Rock Island, the Santa Fe or the Iron Mountain.

Mr Cowan: Why does not the lumber company continue to own the rails it uses on its own track, instead of renting them from anybody?

Mr. Foster: They did not want to. I think they were clearly moving within their rights when they shaped it up as they did.

Mr. Cowan: Who determines the rental of rails?

Mr. Foster: I don't know; that is a pretty old proposition; it is too far back for me.

Mr. Cowan: I am talking now about the rental as between the Malvern & Freeo Valley Railroad and your lumber company; how did it come about you were making that arrangement to rent rails?

Mr. Foster: I tried to make it clear to you that we took
269 the railroad property that could be headed under such, and naturally would be headed under such property, and put it in one corporation.

Mr. Cowan: And turned it over to the railroad company?

Mr. Foster: Yes, sir, and rails naturally were that part of it.

Mr. Cowan: And that included the rails that were used out in the lumbering district, in the lumber?

Mr. Foster: There were very few of them at that time.

Mr. Cowan: Well, whatever it was, was included?

Mr. Foster: Yes, sir.

Mr. Cowan: And then as the lumber company was using those rails, you rented them back to the lumber company?

Mr. Foster: Yes.

Mr. Cowan: And then you employed the railroad company to move over the rails they had rented to the lumber company, the logs from your timber, and paid them so much for moving the logs?

Mr. Foster: Yes, sir.

Mr. Cowan: Who conceived that?

Mr. Foster: You understand south of Landers we go there into the timber, and those tracks, it would be an utter impossibility to incorporate and maintain any particular line for any length
270 of time. You are changing about all over the woods; every 40 acres gets a track across it, and it was these rails that were rented by the railroad to the lumber company, a proposition that is frequently entered into between roads, and is quite a common practice.

Mr. Cowan: I fail to see the object, though, of the railway company owning the rails, and the lumber company renting the rails from the railroad company.

Mr. Foster: Well, I can give you no more object in it than simply the convenience of the arrangement, because it was property of a railroad character, under one heading.

Mr. Cowan: What rental was paid?

Mr. Foster: Six per cent on a valuation of $28.00 a ton, I think, was the arrangement.

Mr. Cowan: Simply interest on the investment, then?

Mr. Foster: Yes.

Mr. Cowan: And not a rental?

Mr. Foster: That is the rental; that was the rental consideration.

Mr. Cowan: Where is that denominated a rental?

Mr. Foster: I do not know.

Mr. Cowan: Why would it be denominated a rental, if it
271 is six per cent on the cost of the rail?

Mr. Foster: We are willing to rent at it. Other roads are willing to, and rails can be secured from any line, I think.

Mr. Cowan: Anything for deterioration?

Mr. Foster: No.

Mr. Cowan: Any provision for supplying new rails when those are worn out at the end of the rental period?

Mr. Foster: Yes, sir.

Mr. Cowan: And that is in the contract you have filed?

Mr. Foster: Yes, sir, I think so.

Mr. Armistead: That contract is on file with the Commission, is it not?

Mr. Foster: I do not know whether the contract between the lumber company and the Malvern & Freeo Valley is on file with the Commission or not. I think it is.

Mr. Armistead: I am sure it is.

Commissioner Harlan: If it is not, we would like to have you produce a copy.

Mr. Armistead: I am confident it is on file.

Commissioner Harlan: Is Landers a station which has been fixed for some time where it now is?

Mr. Foster: Yes, sir; we built directly there, and never
272 changed.

Mr. Andrews: I think you misunderstood about Landers. You said you built at Landers.

Mr. Foster: We built from Walco to Landers originally, and the point has never been changed.

Mr. Andrews: You did not build anything at Landers, except the track?

Mr. Foster: No, it is the terminus of the road, and always has been. Logging operations started from there, and the lines branch out all through the woods.

Mr. Coleman: Is your rental that the lumber company pays the Malvern & Freeo Valley the same as the Freeo Valley pays the Rock Island?

Mr. Foster: Yes, sir.

Mr. Coleman: Do you carry that in the books of the lumber company?

Mr. Foster: Yes.

Mr. Coleman: Charged against the logging operations?

Mr. Foster: Charged against the logging operations.

Mr. Marsilliot: I would like to recall Mr. Blair. While he is taking the stand, I would like to file in the Butler County Railroad case, the answer of the Tyronza & St. Francis River Valley
273 Railroad Company.

(The paper was marked "Filed, December 9, 1910," and is attached hereto.)

J. R. BLAIR was recalled as a witness, and having been previously sworn, testified as follows:

Commissioner Harlan: Before we go farther with this witness, I want to say that I have been laboring under some embarrassment as to the order in which these roads shall be called. I think perhaps not less than fifty requests have been made for a preferred status, and we have been giving a good deal of consideration to the matter over night as to what is the best and simplest way to proceed. It was agreed last night that the Butler County Road would come on after the road that is now before us, on the understanding that that would take a very short time; but from that point on there has been no agreement, and I have expressly declined to make any agreement. One embarrassment is that the Commission has indicated to a great many roads that they need not file formal petitions, and it has been pointed out very forcefully that the roads that have taken advantage of that suggestion by the Commission
274 ought not to be postponed until the last, and that seems to be a fair and reasonable suggestion. We have concluded, therefore, inasmuch as we have started with the Rock Island road, that the simplest way is to go through with those roads. Many of them reach the Iron Mountain and other roads, and in going through with the Rock Island roads we will gather up a great many roads in which other regular lines are interested, and that probably will consume the day. So that those who are not interested in tap lines that reach the Rock Island may at least be excused until two o'clock, and after we get through the Butler County road we will commence to call the Rock Island roads alphabetically.

Mr. Scott: I understood from your Honor's statement yesterday that it was not necessary, in order to have a hearing here, that any tap lines should file a petition at all.

Commissioner Harlan: It has been so understood that a formal petition is not necessary; but it is necessary that every tap line that is interested in the continuance of its divisions or allowances, whether they have been cancelled or not, shall appear at this hearing.

Mr. Marsilliot: Mr. Blair, you were asked yesterday after-
275 noon with reference to a tariff issued by the St. Louis, Iron Mountain & Southern Railroad Company that provided for a milling in transit rate on your road, that question being asked by the Commissioner. Now, I want to ask you if you ever saw or heard of that tariff until your attention was directed to it on yesterday afternoon.

Mr. Blair: No, sir.

Mr. Marsilliot: Did any official of your company ever directly authorize the issuance of a tariff providing for milling in transit privileges on your road?

Mr. Blair: No, sir.

Mr. Marsilliot: Never to your knowledge?

Mr. Blair: No, sir.

Mr. Marsilliot: Now, Mr. Blair, if that is so, how do you explain, or have you any explanation, of how that tariff came into existence?

Mr. Blair: We gave the Iron Mountain a general—what do you call it—concurrence?

Mr. Marsilliot: A general concurrence agreement?

Mr. Blair: Yes, sir.

Mr. Marsilliot: And as I understand it, under that general concurrence the Iron Mountain issued this tariff.

276 Mr. Blair: I presume so.

Mr. Marsilliot: That is simply a presumption on your part?

Mr. Blair: Yes, sir.

Commissioner Harlan: You need not go further into that. It sufficiently appears.

Mr. Marsilliot: Just one more question on that. There never has been any sort of milling in transit arrangement with anybody at any time on your road, under that or any other tariff?

Mr. Blair: No.

Mr. Marsilliot: Now, Mr. Blair, you were asked yesterday afternoon by the Commission, with reference to a division sheet which seems to provide for something like a free haul on your road on business originating on your road and destined to points on other lines, but within the State of Arkansas. You were asked by the Commission to investigate that matter, and I will ask you if you have done so since the hearing yesterday afternoon.

Mr. Blair: Yes, sir.

Mr. Marsilliot: What have you to say with reference to that division sheet?

277 Mr. Blair: That division sheet calls for no division to the Rock Island on business wholly within the State of Arkansas, which originates on our road; we get no division on such business; but the freight which we secure in payment of the haul is governed by our local tariff, which is filed with the State Commission.

Mr. Marsilliot: In other words, if I understand you, the word "free" as used in that division sheet means that the shipment is delivered free, so far as the trunk line is concerned; that is to say that the trunk line is under no obligations to allow your road a division on such traffic?

Mr. Blair: That is right.

Commissioner Harlan: Do you mean on a two line local movement, that the Rock Island makes no charge?

Mr. Blair: They charge from the point of connection with our road, and we charge the local freight between the point of origin on our road, to the point of connection with the Rock Island, and that goes as advance charges on that shipment; in other words, if we should ship a car from Felco to Pine Bluff, the charge would be $10 per car from Felco to Heth, and that would go as advance charges on the shipment, and the additional charges would be from Heth to Pine Bluff, all of which would be collected by the Rock Island.

278 Examiner Burchmore: I am not fully informed about Arkansas state rates, but does not the Arkansas State Com-

mission enforce some sort of joint rates between carriers in Arkansas, joint through rates?

Mr. Blair: As I understand it, we are allowed that. Now, if it is illegal, I am not informed.

Examiner Burchmore: What I mean, are not there joint through rates from stations on your line on lumber in carloads to points on the Rock Island line in the State of Arkansas?

Mr. Blair: We are allowed by the State, because of being a tap line, 150 per cent of the mileage that is collected.

Examiner Burchmore: There are no joint through rates from stations on your line to points in the State of Arkansas on other lines?

Mr. Blair: No.

Examiner Burchmore: Does that mean that you are getting a special status, other than the ordinary common carriers, in the State of Arkansas?

Mr. Blair: No.

Mr. Marsilliot: If I understand you, then, on what little business of that kind you did do, your road never hauled anything free for anybody?

279 Mr. Blair: No.

Mr. Marsilliot: And you got your local tariff rate on that traffic from the point of origin to your junction point?

Mr. Blair: Yes, sir.

Mr. Marsilliot: And that is fixed by the Railway Commission of Arkansas, as I understand?

Mr. Blair: Yes, sir.

Mr. Marsilliot: In all the years of your connection with the Crittenden Railroad, I will ask you to state to the very best of your recollection how many shipments were ever made over the railroad.

Mr. Blair: I have been with the Company eight years, and I do not suppose ten cars during that time have been shipped from any point on our road to any point in Arkansas.

Mr. Marsilliot: So it is a remote proposition?

Mr. Blair: Yes, sir.

Mr. Marsilliot: I neglected to ask you two questions yesterday, and I will ask them now, and then I am done. What did your depot at Earl cost, approximately?

Mr. Blair: About $2,000.

Mr. Marsilliot: What sort of depot facilities have you at Heth in connection with the Rock Island Railroad?

280 Mr. Blair: The Rock Island own their own depot; we have none; our tracks go right to the Rock Island depot.

Mr. Marsilliot: And there is a joint use of the Rock Island depot?

Mr. Blair: Of the platforms; yes, sir.

Mr. Marsilliot: Now, my last question to you is this: As the matter stands now, what percentage of the whole area of timber along the line of the Crittenden Railroad does the Crittenden Lumber Company own, as it stands today?

Mr. Blair: Probably not more than ten per cent.

Mr. Marsilliot: Probably not more than ten per cent?

Mr. Blair: Yes, sir.

Examiner Burchmore: You testified yesterday that not over 35 per cent is traffic controlled by the Crittenden Lumber Company.

Mr. Blair: Yes, sir.

Examiner Burchmore: Has that been the prevailing ratio in the past history of the railroad?

Mr. Blair: No; that is, as it has increased since our connection with the Rock Island and our ability to handle freight into East.

Commissioner Harlan: You said from 35 to 40 per cent?

281 Mr. Blair: Yes, sir; 35 to 40 per cent.

Commissioner Harlan: The records of the Commission seem to indicate that as much as 80 per cent of your traffic comes from the Crittenden Lumber Company.

Mr. Blair: It has in the past, but not in the past year. We commenced with the Rock Island about two years ago, and since that time the other business has increased.

Commissioner Harlan: The statements made by the officers of your company to the officials of the Commission and now appearing on our records, were to the effect that 80 per cent of your traffic is Crittenden Lumber traffic. Now, as I understood it, you gave a different impression yesterday. I want you to state to the best of your belief at this time, what is the relation of your traffic.

Mr. Blair: 35 to 40 per cent of the tonnage is from the Crittenden Lumber Company, today.

Commissioner Harlan: How long has that been so?

Mr. Blair: For the past year.

Commissioner Harlan: Have you gone over the matter recently and familiarized yourself with the fact?

Mr. Blair: Yes, sir.

Commissioner Harlan: When did you do that?

282 Mr. Blair: Probably a month ago.

Commissioner Harlan: Did you make any figures?

Mr. Blair: Only in estimates.

Commissioner Harlan: Then you think that within the past year the percentage has decreased from 80 per cent to 35 or 40 per cent?

Mr. Blair: Yes, sir; the past two years, on the whole. It commenced to decrease two years ago.

Mr. Marsilliot: Why was that?

Mr. Blair: Because of our connection with the Rock Island and our ability to handle products other than from the Crittenden Lumber Company.

Mr. Marsilliot: That increased your general traffic and made it a real railroad proposition?

Mr. Blair: Yes, sir.

Examiner Burchmore: You say 45 per cent of the tonnage. What percentage of the revenue?

Mr. Blair: I cannot state that without getting figures for it.

Examiner Burchmore: Is it your impression that it is 45 per cent or 90 per cent of the revenue?

Mr. Blair: Not that much; not 45 per cent.

283 Examiner Burchmore: How do you get at this 45 per cent; do you include in that 45 per cent only the lumber that is

actually billed in the name of the Crittenden Lumber Company or do you include also lumber they may have sold to customers f. o. b. the mill?

Mr. Blair: All shipments of the Crittenden Lumber Company.

Examiner Burchmore: Do you include lumber that is moving for customers of the Crittenden Lumber Company, in the 45 per cent?

Mr. Blair: Yes, sir.

Examiner Burchmore: Do you include supplies for the commissary, if they have one?

Mr. Blair: Well, we have no commissary.

Examiner Burchmore: Have you filed statements of your tonnage and revenue for the past fiscal year in this case?

Mr. Blair: Yes, sir—well, I filed my yearly report.

Mr. Marsilliot: We understand the Commission requested us yesterday to furnish a statement for the past three years, and that will be promptly prepared and filed in this case.

Mr. Coleman: Could we look at that sheet for a minute, that shows the free haul in Arkansas?

(Paper handed counsel.)

284 Examiner Burchmore: You stated that the Arkansas Commission permitted you to charge 150 per cent of the Arkansas rate.

Mr. Blair: Yes, sir.

Examiner Burchmore: In what shape do you get that authority?

Mr. Blair: From the Railroad Commission.

Examiner Burchmore: Is it a special order entered in your favor or——

Mr. Blair: No, I think it is general to short lines.

Examiner Burchmore: Can you refer us to that so we can see the order?

Mr. Blair: No, sir; I suppose you would have to get it from the Commission.

Commissioner Harlan: They give you a constructive mileage and 150 per cent?

Mr. Blair: They publish the mileage.

Mr. Marsilliot: The United States Circuit Court, I am informed, has published what they call the Court Tariff, and we will take pleasure in filing that.

Commissioner Harlan: You need not. The Commission has that, and knows a good deal about it.

Mr. Coleman: You said you investigated last night this question of divisions, and desire to change your statement. What did
285 that investigation amount to?

Mr. Blair: Well, I made the statement yesterday, if I remember correctly, that there was practically a free haul on our line. That, of course, is not so; there is nothing hauled on our line for anybody for no charge; and in talking with our superintendent, who is here, he reminded me of the fact of that charge of $10, which is accounted for in our local tariff.

Mr. Coleman: In other words, your arrangement amounts to the

charge of two locals, if your statement is correct, between your line and the Rock Island and the Iron Mountain?

Mr. Blair: Yes, sir.

Mr. Coleman: Why should you have a division sheet of two locals; what is the sense of that?

Mr. Blair: Well, with our arrangement with the Rock Island we get no revenue whatever for our haul.

Mr. Coleman: This purports to be a division of the through rate. As you have stated it, the arrangement covering lumber is nothing but an addition of two local rates, $10 to you and the rest to the Rock Island.

Mr. Blair: Yes, sir.

Mr. Coleman: Then why have a division sheet of two
286 locals, if you are correct?

Mr. Blair: I do not see any necessity for it, myself.

Mr. Coleman: Are you sure that your investigation was thorough in this matter?

Mr. Blair: No, it was not thorough as to looking up the papers, because I had none with me.

Mr. Coleman: You are relying on what your superintendent told you?

Mr. Blair: Yes, sir.

Mr. Coleman: I note also, if your statement is also correct, that to some points you show a division to your road of two cents and two and one-half cents under the same heading, No. 7, on which you show a free haul to stations in Arkansas on lumber. That is also inconsistent with your statement, is it not?

Mr. Blair: Two cents and two and a half cents on what?

Mr. Coleman: On lumber in carloads, grouped under heading 7 at different destinations.

Mr. Blair: In Arkansas?

Mr. Coleman: No, you make an exception of Arkansas.

Mr. Blair: Yes.

Mr. Coleman: You haul that free?

287 Mr. Blair: According to that; yes, sir.

Mr. Coleman: Did you get this up?

Mr. Blair: No.

Mr. Coleman: Who did?

Mr. Blair: The Rock Island, I believe.

Mr. Coleman: But you concurred in it?

Mr. Blair: Yes.

Mr. Marsilliot: Let me have that tariff for a minute.

Mr. Coleman: Just one question. Has there been any decrease in the business of the Crittenden Lumber Company in the last year or two?

Mr. Blair: No.

Mr. Coleman: None at all?

Mr. Blair: Not to any extent.

Mr. Coleman: You are familiar with that, and have investigated that?

Mr. Blair: Yes, sir.

Mr. Coleman: That is all.

Mr. Marsilliot: Taking this division sheet which bears the number 113——

Commissioner Harlan: I suggest that you have the witness here who made that tariff, and do not spend another minute with
288 this witness.

Mr. Marsilliot: He is not here.

Commissioner Harlan: Is anyone here who can explain it?

Mr. Marsilliot: No; but I want to show one thing which will clear up the whole business.

Commissioner Harlan: Very well; go ahead.

Mr. Marsilliot: On this division sheet I see it provides a basis for dividing freight rates between your road and the Rock Island, not only on Arkansas business, but on interstate business?

Mr. Blair: Yes.

Mr. Marsilliot: It provides for both things in the same sheet?

Mr. Blair: Yes.

Mr. Marsilliot: And it simply provides that on the Arkansas business destined to points beyond your line, you get no division.

Mr. Blair: From the Rock Island; yes, sir.

Mr. Marsilliot: And you have got to take care of yourself?

Mr. Blair: Yes.

Mr. Marsilliot: And you did do it?

Mr. Blair: Yes, sir.

289 Mr. Marsilliot: That is all there is to it. That is all.

(Witness excused.)

Mr. Marsilliot: The next witness I intended to call was Mr. Walcott, the treasurer of this road, and I was going to ask him one question, and that is on the existence of the milling in transit business. He would testify that it never existed on this road.

Commissioner Harlan: Now, your view is sufficiently in the record. This witness has said he has never availed himself of that privilege, but it was put in by the Rock Island. The record is as complete as it can be.

Mr. Marsilliot: To save time, I will say that I have two witnesses here who will say they applied for that milling in transit privilege on our road, and were refused; two outside manufacturing concerns. I take it you do not care to hear from them?

Commissioner Harlan: Where are those witnesses?

Mr. Marsilliot: They are here in the room.

Commissioner Harlan: Let them stand up.

(Two gentlemen arose.)

Commissioner Harlan: What is your name?

Mr. Machen: Machen.

290 Commissioner Harlan: What is your business?

Mr. Machen: Manufacturer of wooden products.

Commissioner Harlan: Where?

Mr. Machen: Earl, Arkansas, two miles south of Earl.

Commissioner Harlan: On what railroad?

Mr. Machen: Crittenden Railroad.
Commissioner Harlan: Where is your market?
Mr. Machen: In Poplar Bluff, Missouri, principally.
Commissioner Harlan: What do you know about this milling in transit rate?
Mr. Machen: I know I have applied for it.
Commissioner Harlan: When?
Mr Machen: A year ago.
Commissioner Harlan: Did you know it was published?
Mr. Machen: No, sir; I did not know anything about it.
Commissioner Harlan: Why did you apply for it, if you did not know it was published?
Mr. Machen: Why did I?
Commissioner Harlan: Yes.
Mr. Machen: Because I asked for it, and thought perhaps I could get it.

Commissioner Harlan: Well, you don't expect to get what
291 is not published, do you?

Mr. Machen: Well, I am not familiar with railroad business.
Commissioner Harlan: I recommend you to find out, if you are trying to get the benefit of rates and privileges which are not published. That is all you know about it; you were refused the privilege, were you?
Mr. Machen: Yes.
Commissioner Harlan: I think that is all on that question.
Mr. Marsilliot: Do you know whether that ever has existed on that road or not?
Mr. Machen: Not to my knowledge, it has not.
Commissioner Harlan: Do you mean you wanted it for a special shipment, or did you want the road to publish it?
Mr. Machen: Our rough product originated on the Crittenden Railroad, and was milled on the Crittenden Railroad, and reshipped on the Crittenden Railroad, and I understood——
Commissioner Harlan: I put my question again. Did you want it on a particular shipment, or did you want the Crittenden Railroad to establish that privilege?
Mr. Machen: I wanted them to establish it.
Mr. Marsilliot: You did not know whether it was published or not?

292 Mr. Machen: No.

Mr. Coleman: At that time they actually had published a milling in transit arrangement, had they not——
Commissioner Harlan: When did you make this request?
Mr. Machen: I believe a year ago, to the best of my memory.
Mr. Coleman: At that time the milling in transit privilege was published?
Mr. Machen: I do not know.
Mr. Coleman: Well, is it not so?
Mr. Marsilliot: I think that is so; yes.
Mr. Coleman: In other words, the Crittenden Railroad refused to

you, a private shipper on the road, a privilege which they published in their tariff?

Mr. Machen: I do not know whether they published it or not.

Mr. Cowan: From whom did you get your raw material?

Mr. Machen: From whom?

Mr. Cowan: Yes.

Mr. Machen: From different parties.

Mr. Cowan: Did you get it from the Crittenden Lumber Company?

Mr. Machen: I have bought some from the Crittenden Lumber Company.

293 Mr. Cowan: Well, were you doing it at that time?

Mr. Machen: Well, I was getting some stuff.

Mr. Cowan: Was it not on that product you asked this milling in transit privilege?

Mr. Machen: No, sir; not on that alone.

Mr. Cowan: Well, you were getting raw material from different people. Did you designate that it was desired upon raw material coming from the Crittenden Lumber Company or from some other source?

Mr. Machen: From all sources.

Mr. Marsilliot: The other witness is Mr. Whitman.

C. T. WHITMAN was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: Where is your place of business?

Mr. Whitman: Earl, Arkansas.

Commissioner Harlan: What is your business?

Mr. Whitman: Cooperage and lumber.

Commissioner Harlan: Where do you get your raw materials?

Mr. Whitman: I get it, part of it, off the Crittenden Railroad.

294 Commissioner Harlan: What proportion of it?

Mr. Whitman: Seventy-five per cent of it, for the last year.

Commissioner Harlan: Mr. Machen, what proportion of your raw material have you got from the Crittenden Lumber Company last year?

Mr. Machen: Fifty per cent.

Commissioner Harlan: Is that from the lumber company or from off the Crittenden Railroad?

Mr. Machen: Shipped on the Crittenden Railroad, bought from different parties.

Commissioner Harlan: What do you know about this milling in transit privilege, Mr. Whitman?

Mr. Whitman: Not anything.

Commissioner Harlan: You did not know about it?

Mr. Whitman: No, never asked for it.

Commissioner Harlan: Never asked for it?

Mr. Whitman: No. All I asked for was a rate.

Mr. Marsilliot: Did it ever exist on that road?

Mr. Whitman: Not to my knowledge.

Mr. Marsilliot: How much freight have you shipped on that road?

Mr. Whitman: Something like 3,000 cars.

295 Mr. Marsilliot: Did you ever hear of anybody getting it on that road?

Mr. Whitman: No.

Mr. Marsilliot: I want to introduce Mr. Holly.

H. C. HOLLY was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Mr. Marsilliot: How long have you been connected with the Crittenden Road?

Mr. Holly: Since 1901.

Mr. Marsilliot: What is your business in connection with it?

Mr. Holly: Superintendent.

Mr. Marsilliot: I want to ask you, in the management of that road, whether or not there is any difference made in the service rendered to one person, firm or corporation on the road from that rendered to another?

Mr. Holly: Well, there has been, in a way.

Mr. Marsilliot: Well, describe how it has been.

Mr. Holly: Well, for instance, we have showed our patrons along the road in preference to the Crittenden Lumber Company.

296 Mr. Marsilliot: To what extent has that been done?

Mr. Holly: Well, for instance, when at times there was a shortage of cars and our patrons had shipments to make, we have given the privilege of cars to them instead of to the Crittenden Lumber Company.

Mr. Marsilliot: Why was that done?

Mr. Holly: That was to work up the traffic.

Mr. Marsilliot: What is the general characteristic of the construction of the roadbed and bridges of that road? You are superintendent of it.

Mr. Holly: Well, the roadbed from Earl to Heth is the bottom ballast, we have no gravel ballast; it is all made of the bottom land; and the bridges are all substantial, capable of carrying anything that we choose to carry.

Mr. Marsilliot: What is the biggest load you carry over that road in a car?

Mr. Holly: 100,000 pounds capacity.

Mr. Marsilliot: Have any trouble doing that?

Mr. Holly: Well, we never have had.

Mr. Marsilliot: I believe that is about all.

Mr. Coleman: You say in times of shortage of cars you would prefer the private shippers to the Crittenden Lumber com-

297 pany?

Mr. Holly: We have; yes, sir.

Mr. Coleman: You say you do that to work up traffic?

Mr. Holly: Yes, sir.

Mr. Coleman: It is customary to work up traffic when your cars are short?

Mr. Holly: Well, it is customary for us to take care of our people to the very best of our ability.

Mr. Coleman: It is only when you have shortage of cars that you work up this traffic?

Mr. Holly: Well, when we have plenty of cars everybody has them.

Commissioner Harlan: What is your understanding of the proportion of your general tonnage that belongs to the Crittenden Lumber Company?

Mr. Holly: Well, that is a part of the business that I do not keep up with, but——

Commissioner Harlan: Well, what is your best judgment?

Mr. Holly: But I should say from 35 to 40 per cent.

Commissioner Harlan: At this time? It has been more in the past?

Mr. Holly: At this time; yes, sir, for the past year.

298 (Witness excused.)

Mr. Marsilliot: I want to call Mr. Barton, very briefly.

C. G. BARTON was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Mr. Marsilliot: What is your name?

Mr. Barton: C. G. Barton.

Mr. Marsilliot: You live at Earl?

Mr. Barton: Yes, sir.

Mr. Marsilliot: What is your business.

Mr. Barton: Mercantile business.

Mr. Marsilliot: What is the nature of your business, what is the extent; just in a general way.

Mr. Barton: Do you mean the amount of business?

Mr. Marsilliot: Yes; and what kind of mercantile business?

Mr. Barton: General furnishing business, and I also run a gin.

Mr. Marsilliot: What is the volume of your business which you do at Earl?

Mr. Barton: Well, this year we ought to do $150,000. We probably will gin 2,700 bales of cotton.

299 Mr. Marsilliot: Tell as concisely as you can to the Commission what sort of service the Crittenden Railroad Company gives you.

Mr. Barton: I think the service is so good that about 75 per cent of my incoming freight is shipped over the Crittenden Railroad, and I haul my cotton, which cost me ten cents a bale drayage to the Crittenden Railroad, while I could load it from the gin right to the Iron Mountain.

Mr. Marsilliot: That you pay to the drayage man for hauling?

Mr. Barton: Yes.

Mr. Marsilliot: You pay ten cents more to get it on the Crittenden Railroad, because they give you more prompt service?

Mr. Barton: Yes.

Mr. Marsilliot: What do you think would be the effect of the cancellation of these through routes and joint rates on the town of Earl?

Mr. Barton: I don't know hardly—I think it would be bad, I cannot say just what the damage would be.

Mr. Marsilliot: You have not studied the situation carefully?

Mr. Barton: No.

300 Mr. Marsilliot: That is all.

Mr. Barton: We would not get as good service.

Mr. Jeffery: Are you a stockholder in the Crittenden Lumber Company?

Mr. Barton: No.

Mr. Jeffery: Are you a stockholder in the railroad company?

Mr. Barton: No.

Mr. Marsilliot: Interested in the Crittenden Lumber Company——

Commissioner Harlan: No; he said he was not.

Mr. Cowan: What is the matter with the Iron Mountain hauling that cotton? I suppose you send it to Memphis largely.

Mr. Barton: Yes, sir.

Mr. Cowan: What is the difficulty about the hauling of cotton from your platform over to Memphis, 25 miles?

Mr. Barton: I do not know as there is any great difference in the time of delivery from Earl to Memphis, but there is a difference in the way stuff is handled by the agents there. They handle it quicker and get prompter service.

Mr. Cowan: By hauling it over to the other fellow?

Mr. Barton: Yes, sir.

Commissioner Harlan: The agents where?

Mr. Barton: At Earl.

301 Examiner Burchmore: Are the rates the same by both routes?

Mr. Barton: Yes, sir.

Examiner Burchmore: And the same delivery in Memphis?

Mr. Barton: Yes, sir.

Commissioner Harlan: Do you move 2,700 bales?

Mr. Barton: I have not to date; I have moved about 2,400, and I expect to get——

Commissioner Harlan: And you pay ten cents a bale more to avoid the Iron Mountain?

Mr. Barton: Well, there is about 250 bales of that that I shipped on the Iron Mountain, at the first of the season.

Mr. Cowan: What is the real reason of that? There must be some reason for it that we have not heard.

Mr. Barton: I have stated the reason.

Mr. Cowan: That is the only reason?

Mr. Barton: That is the only reason; yes, sir.

Mr. Cowan: Have you not any business relation with the Crittenden Lumber Company or business in connection with their store

which makes you have this feeling in your breast for the Crittenden Railroad?

Mr. Barton: No, sir; I have not. I do not think the Crit-
302 tenden people do very much business with me in their store.

Mr. Cowan: You just simply do not like the Iron Mountain, the way it does business?

Mr. Barton: Well, I don't particularly like their service there.

Mr. Cowan: It is up to Mr. Jeffery.

Mr. Coleman: Just what does the agent at Earl do that you do not like?

Mr. Barton: The shipments are not as good.

Mr. Coleman: Tell us what he does. You take the shipment down, and what does the agent do, issue the bill of lading?

Mr. Barton: Not promptly, no.

Mr. Coleman: How long would it take?

Mr. Barton: Sometimes you get a bill there is the morning and get it back the next day. He has the negro porter go out and check the cotton up.

Mr. Coleman: You could not get it any quicker?

Mr. Barton: In some cases I suppose you could.

Mr. Coleman: What is the best you ever did? Did you ever make any kick about it?

Mr. Barton: No.

Commissioner Harlan: I think we have gone as far as we
303 should go on that.

Mr. Coleman: Do you cash some of the pay checks of the Crittenden people?

Mr. Barton: Very few indeed.

Mr. Marsilliot: I want to ask Mr. Morrison a few questions.

Commissioner Harlan: What do you want to bring out?

Mr. Marsilliot: He is a banker, and I wanted him to tell the situation and what the road had done to the town.

Commissioner Harlan: That is sufficiently in the record for the purposes of the Commission.

Mr. Marsilliot: All right; we are done.

304 *Butler County Railroad Company.*

Commissioner Harlan: The Butler County Railroad Company is the next company. Mr. Glasgow, are you ready?

Mr. Glasgow: Yes, sir.

Commissioner Harlan: How many witnesses have you?

Mr. Glasgow: One.

WILLIAM N. BARRON was called as a witness and having been duly sworn, testified as follows:

Mr. Glasgow: I want to make a brief statement of our case. In this case there are three petitions filed by the Butler County Railroad Company. They were originally petitions filed, and then by permission of the Commission, they were filed in this cause as

petitions to be considered under the Star Grain case. One is the Butler County Railroad Company against the Missouri Pacific Railway Company and the Iron Mountain; the second is the Butler County Railroad Company against the St. Louis & San Francisco Railroad Company and others; and the third is the Butler County Railroad Company against F. A. Leland, agent, and the Alabama & Vicksburg Railway Company.

The petition sets forth the tariffs which were in effect at
305 this time on the several routes set up in the petition by the several defendants, and their connections, and that tariffs had been filed by each of the defendants with the concurrences, cancelling those rates and putting in effect other rates from the junction point with the Butler County Railroad at Poplar Bluff.

The petition has two charges, first, that the rates established under the cancelling tariffs, or proposed to be established under those cancelling tariffs, which are increases over and above the rates now in effect, are unjust and unreasonable. Second, that the Butler County Railroad Company is a common carrier and entitled to joint rates and through routes with the long line carriers, and that the joint rates and through routes in effect before the cancellation notices were just and reasonable, and asking the Commission to re-establish them, or require that those rates be re-established or continued with divisions to the several roads parties thereto.

Direct examination:

Mr. Glasgow: Where do you live, Mr. Barron?

Mr. Barron: Poplar Bluff, Missouri.

Mr. Glasgow: What is your relation to the Butler County
306 Railroad Company?

Mr. Barron: I am the vice-president, treasurer and general manager of the Butler County Railroad Company.

Mr. Glasgow: You have charge of its operation?

Mr. Barron: Yes, sir.

Mr. Glasgow: When was the Butler County Railroad Company organized?

Mr. Barron: It was organized under the railroad statute of Missouri in September, 1905.

Mr. Glasgow: Prior to that time what company or person owned the railroad which the Butler County Railroad Company now owns?

Mr. Barron: That which was in existence at that time was owned by the Brooklyn Cooperage Company.

Mr. Glasgow: The Brooklyn Cooperage Company is a lumber company?

Mr. Barron: It is a cooperage company.

Mr. Glasgow: Engaged in making cooperage stock?

Mr. Barron: Yes, sir.

Mr. Glasgow: And it has a mill on the line of the Butler County Railroad?

Mr. Barron: Yes, sir.

307 Mr. Glasgow: At what point?

Mr. Barron: At a point in the neighborhood of Poplar Bluff called Linstead.

Mr. Glasgow: At the time that the Butler County Railroad Company was incorporated, were there any allowances made by the carriers with which it connected physically to the Brooklyn Cooperage Company on cooperage stock or lumber or anything else?

Mr. Barron: No, sir.

Mr. Glasgow: What roads does the Butler County Railroad Company connect with?

Mr. Barron: It connects with the St. Louis, Iron Mountain & Southern Railroad, and also with the St. Louis and San Francisco Railroad.

Mr. Glasgow: At what point?

Mr. Barron: Well, it is variously known as Linstead and Poplar Bluff; it is in the neighborhood of Poplar Bluff.

Mr. Glasgow: You have a map here of the Butler County Railroad?

Mr. Barron: Yes, sir.

(Paper Produced.)

Mr. Glasgow: Beginning at Poplar Bluff, at the connec-
308 tion between the Butler County Railroad and the St. Louis & San Francisco Railroad, there are tracks, a red dotted line. To whom do those tracks belong?

Mr. Barron: The red line indicates tracks which the Butler County Railroad Company owns.

Mr. Glasgow: And the black line with white in between?

Mr. Barron: Indicates tracks owned by other concerns, over which the Butler County Railroad Company operates its trains.

Mr. Glasgow: And the yellow?

Mr. Barron: Indicates tracks which are owned by the Brooklyn Cooperage Company.

Mr. Glasgow: Now, beginning at Poplar Bluff, to what point does the Butler County Railroad Company operate its trains over its own tracks and tracks over which it has the running right?

Mr. Barron: From Poplar Bluff it operates its trains over its own tracks to the junction with the St. Louis, Iron Mountain and Southern at Linstead; then over the track of the St. Louis, Iron Mountain and Southern Railway Company, Cairo Branch, to Lowell Junction.

Mr. Glasgow: What distance?

309 Mr. Barron: About seven and a half miles.

Mr. Glasgow: That is by arrangement or agreement for trackage payments by the Butler County Railroad?

Mr. Barron: Yes, sir.

Mr. Glasgow: And thence to where?

Mr. Barron: It operates over its own track; that is, over the Butler County Railroad Company's own track south, a distance of seven miles.

Mr. Glasgow: To what point?

Mr. Barron: To a point called Bailey's; thence over the track that is owned by the Brooklyn Cooperage Company to a point called Melville.

Mr. Glasgow: Is that under an agreement or lease?

Mr. Barron: That is under an agreement by which the Butler County Railroad Company operates and has trackage rights on that track. Thence it operates northwardly to a point called Menorkenut on a track also owned by the Brooklyn Cooperage Company, over which it has trackage rights.

Mr. Glasgow: At that point is where the tracks of the Brooklyn Cooperage Company operated by it connect with the Butler County Railroad Company?

Mr. Barron: That is one of the points where it connects
310 with the Brooklyn Cooperage Company logging tracks.

Mr. Glasgow: Beginning at Linstead and going over the St. Louis & San Francisco tracks to Lowell Junction——

Mr. Barron: That is the Iron Mountain track.

Mr. Glasgow: I should say the Iron Mountain track to Lowell Junction, what is the arrangement under which you operate trains over that track?

Mr. Barron: The arrangement is that the Butler County Railroad Company operates its trains subject to the orders of the train despatcher of the Iron Mountain Railroad, and for the service and the use of the track it pays the Iron Mountain Railroad Company a certain sum per train mile, depending upon the size of the train.

Mr. Glasgow: Well, now, a train of 25 cars?

Mr. Barron: It pays 65 cents per train mile.

Mr. Glasgow: And 35 cars?

Mr. Barron: 75 cents.

Mr. Glasgow: And 45 cars or more?

Mr. Barron: 85 cents.

Mr. Glasgow: Can you tell us about what per annum that rental amounts to which is paid to the Iron Mountain Road?

Mr. Barron: That amounts to about $3,600 per annum.

311 Mr. Glasgow: Beginning at Poplar Bluff, have you got a station there?

Mr. Barron: We have a station in the neighborhood of Poplar Bluff; it is about a mile distant from the center of the town; it may be said to be in Poplar Bluff.

Mr. Glasgow: Do you have an agent?

Mr. Barron: Yes, sir.

Mr. Glasgow: Have you an agent at Lowell Junction?

Mr. Barron: We have a joint agent with the Iron Mountain Railroad there, and we pay the entire compensation of that agent.

Mr. Glasgow: You pay it?

Mr. Barron: Yes, sir.

Mr. Glasgow: Have you a station or agent at Bailey's?

Mr. Barron: No.

Mr. Glasgow: Have you at Melville?

Mr. Barron: Yes, sir.

Mr. Glasgow: An agent and station man?

Mr. Barron: Yes, sir.

Mr. Glasgow: For the delivery of freight or travel which may pass along?

Mr. Barron: Both.

312 Mr. Glasgow: Do you run regular trains over the Butler County Railroad, on schedule?

Mr. Barron: Yes, sir.

Mr. Glasgow: Have you got a copy of the schedule of your company there?

Mr. Barron: Yes, sir.

Mr. Glasgow: The time table No. 4?

Mr. Barron: Yes, sir.

Mr. Glasgow: I want to file this as an exhibit.

(The paper so offered and identified was received in evidence and thereupon marked Butler County Railroad Exhibit No. 1, witness Barron, received in evidence December 9, 1910, and is attached hereto.)

Mr. Glasgow: Those trains shown on that schedule, are operated upon regular time tables for the carriage of passengers and freight?

Mr. Barron: Yes, sir; every day except Sunday.

Mr. Glasgow: Do you sell passenger tickets on that road?

Mr. Barron: Yes, sir.

Mr. Glasgow: At what points?

Mr. Barron: At Poplar Bluff, Lowell Junction, Melville and wherever there is an agent. The remainder of the business
313 is done on a cash fare basis by the men in charge of the train.

Commissioner Harlan: What is the total mileage operated by your road?

Mr. Barron: About 35 miles, 34.

Mr. Glasgow: What is the part of that of which the Butler County Railroad now owns the track?

Mr. Barron: Twelve miles.

Mr. Glasgow: And have you any track arrangement looking to the immediate acquisition of additional tracks?

Mr. Barron: Yes, sir; just as soon as the deed can be drawn, the Butler County Railroad will acquire by purchase from the Brooklyn Cooperage Company, the present owner, that piece of track lying between Bailey's and the southern terminus of the road, including three miles that is now under construction down there, to the south line of section 13.

Mr. Glasgow: And has the price been agreed upon?

Mr. Barron: Yes, sir.

Mr. Glasgow: When the Butler County Railroad was organized I suppose, following the usual way, the cooperage company sold to that company the tracks which it then had, and——

Mr. Barron: Part of them.

314 Mr. Glasgow: Part of them, and issued stock in consideration thereof?

Mr. Barron: Yes, sir.

Mr. Glasgow: And that stock is held by the Brooklyn Cooperage Company?

Mr. Barron: It is held, Mr. Glasgow, by certain individuals in trust for the Brooklyn Cooperage Company.

Commissioner Harlan: What is the amount of the capital stock issued?

Mr. Barron: $163,500.

Commissioner Harlan: And authorized?

Mr. Barron: $200,000.

Commissioner Harlan: All of it is held in trust for the Brooklyn Cooperage Company?

Mr. Barron: I believe so; yes, sir.

Mr. Glasgow: Has it any bonded indebtedness?

Mr. Barron: It has a bonded indebtedness of $50,000.

Mr. Glasgow: Those bonds are probably held in the same way?

Mr. Barron: I believe they are; yes, sir.

Commissioner Harlan: Held by whom?

Mr. Barron: I believe they are held—the paper is made
315 payable to the Brooklyn Cooperage Company.

Mr. Glasgow: The bonds you mean, or the note?

Mr. Barron: The note, and the mortgage securing the note.

Mr. Glasgow: Will you tell us when the operations were commenced, and these roads were being built, were there any towns or villages or farms along the route this road now goes?

Mr Barron: There were no towns or villages; there were a very few farms, but none in comparison with what exist there now.

Mr. Glasgow: The Great Western Land Company is a company owning large tracts of lumber and timber lands?

Mr. Barron: Yes, sir. I have a map here which shows the situation about that. (Producing map.)

Mr. Glasgow: The yellow on this map shows the land of the Great Western Land Company, does it?

Mr. Barron: Yes, sir.

Mr Glasgow: Now, as the progress of cutting timber on the lands of this company proceeded, the white indicates the lands from which it has been cut off, does it?

Mr. Barron: No, sir; not altogether; that is hardly cor-
316 rect.

Mr. Glasgow: Well——

Mr. Barron: The white indicates land that the Great Western Land Company does not own; and you will notice that there is a great deal more white on the map where the railroad has been in operation for some years than there is farther down; it never was an absolutely solid body, but it was about alike; but up on the northern portion, where the railroad has existed from 11 to 12 years, a great deal of the land has been sold. Whenever it is sold, it is sold to a settler who puts it, or part of it, immediately into cultivation.

Mr. Glasgow: That white along there, does that indicate the land that is under cultivation or——

Mr. Barron: It indicates the land that has been sold and what few farms there were in that neighborhood prior to that time, and that section of the country is very largely in cultivation.

Mr. Glasgow: Are there farms all along the line of the road from

Lowell Junction down to Melville, of course with intervening spaces yet to be settled?

Mr. Barron: Yes, sir. The Great Western Land Company in that neighborhood has sold three or four hundred separate tracts of land that are now in cultivation, to farmers.

317 Commissioner Harlan: What is the relation between the Brooklyn Cooperage Company and the Great Western Land Company?

Mr. Glasgow: I was coming right to that at this moment, if your Honor will permit me. As I understand, the stock of the Brooklyn Cooperage Company is owned by the American Sugar Refining Company?

Mr. Barron: Yes, sir.

Mr. Glasgow: The Great Western Land Company's stock is held by whom?

Mr. Barron: By the American Sugar Refining Company.

Mr. Glasgow: And that is the only relation which exists between the Great Western Land Company and the Brooklyn Cooperage Company?

Mr. Barron: Yes, sir.

Mr. Glasgow: What is the Brooklyn Cooperage Company engaged in doing; what is its principal business?

Mr. Barron: Its principal business is the manufacturing of sugar barrels with which to ship the sugar refined by the American Sugar Refining Company.

Mr. Glasgow: What is the character of the timber in that section of country that the Great Western Land Company owns?

Mr. Barron: It is the same as all of that eastern Texas
318 and eastern Arkansas and southeast Missouri bottom; it is hardwood timber; it consists principally of gum; next in volume will be oak, and after that, hickory, ash, elm, and other timbers of that forest in smaller proportions.

Mr. Glasgow: Any pine?

Mr. Barron: Not a pine tree on the outfit.

Mr. Glasgow: Now, beginning at Lowell Junction and coming along, I understand you to say down towards Melville there are farms along the line of the road.

Mr. Barron: Yes.

Mr. Glasgow: Have any villages sprung up since the road was started?

Mr. Barron: Yes, sir; three.

Mr. Glasgow: What are they?

Mr. Barron: Batesville, Bailey's and Melville.

Mr. Glasgow: What is the population, should you say, of Melville?

Mr. Barron: Well, Melville will approximate a thousand people.

Mr. Glasgow: And the others are villages which have grown up?

Mr. Barron: And the others are smaller.

319 Mr. Glasgow: What character of freight is transported by the Butler County Railroad?

Mr. Barron: You might say pretty much everything that is used by a community.

Mr. Glasgow: Well, name the principal articles.

Mr. Barron: Well, the principal is—transported by the Butler County Railroad?

Mr. Glasgow: Yes, sir.

Mr. Barron: Do you mean the less than carload, or the general proposition?

Mr. Glasgow: Well, it is engaged in carload and less than carload transportation?

Mr. Barron: Yes.

Mr. Glasgow: Does it carry the class freights?

Mr. Barron: Yes, sir.

Mr. Glasgow: And has tariffs in effect covering class freights?

Mr. Barron: Yes, sir, and filed with the Federal Commission.

Mr. Glasgow: With the Interstate Commerce Commission?

Mr. Barron: Yes, sir.

Mr. Glasgow: And joint traiffs covering the class freight
320 with what roads?

Mr. Barron: With the St. Louis, Iron Mountain and Southern.

Mr. Glasgow: When the tariffs were filed cancelling the rates on lumber and lumber products by the Iron Mountain Road were the class freights cancelled out also?

Mr. Barron: No.

Mr. Glasgow: And now today the through routes and joint rates are in effect with the Iron Mountain for class freight on your road?

Mr. Barron: Yes, sir.

Mr. Glasgow: Does any freight move under those tariffs?

Mr. Barron: A great deal.

Mr. Glasgow: Have you any arrangement for carrying the mails on this road?

Mr. Barron: Yes, sir, we are under contract with the Post Office Department to carry the mail.

Mr. Glasgow: From what point?

Mr. Barron: From Lowell Junction to Melville. The name of Melville post office is Quelin. The place has two names: the post office is the name of Quelin and the railroad name of Melville.

Mr. Glasgow: Have you filed joint tariffs with other roads, the Iron Mountain and the Frisco roads; with the Interstate
321 Commerce Commission, or concurrences in their through tariffs?

Mr. Barron: We have filed concurrences with the Interstate Commerce Commission concurring in tariffs issued by the Missouri Pacific and by the Frisco Railroad.

Commissioner Harlan: Where are your lumbering operations going on now?

Mr. Barron: They are going on on that land of the Great Western Land Company.

Commissioner Harlan: I assume so, but what part of this land?

Take, for instance, the region south of Melville; what are you doing down there?

Mr. Barron: They are lumbering down there.

Commissioner Harlan: In what section?

Mr. Barron: Well, where that yellow line is, you will see on the other map, Judge——

Commissioner Harlan: Melville, apparently, seems to be in section 31.

Mr. Barron: 31 and 36, and the lumbering operations are being carried on in the vicinity of these yellow lines here and here and down there (indicating.)

Commissioner Harlan: If you will just answer the ques-
322 tion: Melville, you say, is in 31 and 36?

Mr. Barron: Melville is situated in section 31, township 23, north range, 7 east and——

Commissioner Harlan: We will just leave out the township and range, and shorten it up.

Mr. Barron: Well, in sections 31 and 36.

Commissioner Harlan: Is it towards the north of 31 or the south of 31?

Mr. Barron: It is in the south half of 31 and 36.

Commissioner Harlan: Well, south of Melville, then, according to this map, the road is owned by the Brooklyn Cooperage Company?

Mr. Barron: Yes, sir.

Commissioner Harlan: And it is around that road that you are now doing lumbering south of Melville?

Mr. Barron: Yes, sir.

Commissioner Harlan: That is, the Brooklyn Cooperage Company is doing the lumbering?

Mr. Barron: Yes, sir.

Commissioner Harlan: And the Butler County Railroad is doing the hauling?

Mr. Barron: No, sir.

323 Mr. Glasgow: I am coming to it——

Commissioner Harlan: Well, we have come to it now, and I want to know now. Who does the hauling from the forest to Melville?

Mr. Barron: From that forest, the Brooklyn Cooperage Company.

Commissioner Harlan: With what equipment?

Mr. Barron: Its own.

Commissioner Harlan: How many logging cars has it?

Mr. Barron: Now, I beg pardon—I said its own equipment—I had the locomotives in my mind.

Commissioner Harlan: Very well.

Mr. Barron: The cars belong to the Butler County Railroad.

Commissioner Harlan: But the locomotives belong to the Cooperage Company?

Mr. Barron: Yes, sir.

Commissioner Harlan: What is the mileage of the constructed track south of Melville?

Mr. Barron: It is about two and one-half miles.

Commissioner Harlan: Does it run right into the forest belonging to the Great Western Land Association?

Mr. Barron: Yes, sir.

324 Commissioner Harlan: Is there any other ownership there?

Mr. Barron: Yes, there is——

Commissioner Harlan: According to this yellow map, the ownership is very insubstantial, as indicated by the white part of the map.

Mr. Barron: Well, it is small, compared with the amount of land owned by the Great Western Land Company, but there is a good deal of territory shown on that map, and a good deal of land and timber is owned by other parties.

Mr. Glasgow: Each of those blocks represents a square mile, does it?

Mr. Barron: Yes, sir.

Commissioner Harlan: Well, this map with the yellow color on it, indicates substantially the ownership as it exists today?

Mr. Barron: Yes sir.

Commissioner Harlan: The yellow showing the Great Western Company's ownership, and the white the outside ownership?

Mr. Barron: Yes, sir.

Commissioner Harlan: Now, I observe that south of a station called Hicoria there is a logging road running due east?

325 Mr. Barron: Yes.

Commissioner Harlan: Are you doing any lumbering there?

Mr. Barron: Yes, sir.

Commissioner Harlan: And that forest also belongs to the Great Western Land Association?

Mr. Barron: And others.

Commissioner Harlan: It is indicated on this colored map?

Mr. Barron: Yes, sir.

Commissioner Harlan: And the logging road belongs to the Cooperage Company?

Mr. Barron: Yes, sir.

Commissioner Harlan: Does it use any locomotives that it owns?

Mr. Barron: Yes, sir.

Commissioner Harlan: The locomotives it owns there are confined to the logging road?

Mr. Barron: Yes, sir.

Commissioner Harlan: And is that true of the locomotives used south of Melville?

Mr. Barron: Yes, sir.

Commissioner Harlan: They do not go onto the tracks of the Butler County Railroad?

326 Mr. Barron: Yes, sir; they do.

Commissioner Harlan: What do they do on those tracks?

Mr. Barron: They will run over them.

Commissioner Harlan: To what point—do you mean regularly?

Mr. Barron: No—they will run over them and get some timber and deposit it at some switch where the Butler County Railroad will handle it.

Commissioner Harlan: Just at an interchange point?

Mr. Barron: Yes, sir:

Commissioner Harlan: And not beyond that?

Mr. Barron: No.

Commisioner Harlan: Now, north of Menorkenut and also to the east, there is some of this track belonging to the Cooperage Company?

Mr. Barron: Yes, sir.

Commissioner Harlan: And you are doing lumbering in there?

Mr. Barron: The Brooklyn Cooperage Company and others are doing lumbering in there.

Commissioner Harlan: Well, the Brooklyn Cooperage Company is lumbering the Great Western Land Company's lands?

Mr. Barron: It and others.

327 Commissioner Harlan: What other land——

Mr. Barron: No—it and other parties are lumbering the Great Western Company's land.

Commissioner Harlan: But the Brooklyn Cooperage Company is lumbering no lands except those belonging to the Association?

Mr. Barron: Yes, sir, it is.

Commissioner Harlan: Just tell us about that.

Mr. Barron: If it buys a tract of timber on another man's land, it lumbers that, and the Great Western Land Company is doing business with other parties who lumber on the Great Western Land Company's land as well as the Brooklyn Cooperage Company. The Brooklyn Cooperage Company take off only one class of timber and other parties remove the remainder and ship it out over that road.

Commissioner Harlan: At what other part of the Great Western Land Company's holding is the Cooperage Company lumbering at this time?

Mr. Barron: I beg pardon?

Commissioner Harlan: Well, I see that the Land Association owns some lands up along the Iron Mountain right of way.

Mr. Barron: Yes, sir.

328 Commissioner Harlan: Is the Brooklyn Cooperage Company doing any lumbering there?

Mr. Barron: Yes, sir.

Commissioner Harlan: How extensive is the lumbering at that point:

Mr. Barron: Not very extensive, because that section is pretty well cut over, and very little left.

Commissioner Harlan: You may proceed.

Mr. Glasgow: I was asking you a moment ago whether the Butler County Railroad Company filed concurrences in the joint tariffs published by the Frisco and the Iron Mountain roads, with the Interstate Commerce Commission?

Mr. Barron: Yes, sir, it did.

Mr. Glasgow: Will you give us, if you have there, a reference to the index filed with the Interstate Commerce Commission of those tariffs?

Mr. Barron: Well, Mr. Glasgow——

Commissioner Harlan: You can file that later.

Mr. Barron: Mr. Glasgow has it, I believe.

Mr. Glasgow: I do not believe so.

Commissioner Harlan: Well, it is filed in our Bureau of Tariff-?

Mr. Barron: Yes, sir.

329 Mr. Glasgow: The last that is filed is I. C. C. No. 5, Butler County Railroad Company, indexes to tariff No. 5?

Mr. Barron: Yes, sir.

Mr. Glasgow: And that shows the list of tariffs which your company has concurred in, and the company filing the tariff with the Interstate Commerce Commission?

Mr. Barron: Yes, sir.

Mr. Glasgow: Have you also filed with the Interstate Commerce Commission the tariff of the Butler County Railroad?

Mr. Barron: Yes, sir.

Mr. Glasgow: And that is filed as I. C. C. No. 1, Butler County Railroad freight tariff of local rates No. 3?

Mr. Barron: Yes, sir.

Mr. Glasgow: On classes and commodities?

Mr. Barron: Yes, sir.

Mr. Glasgow: Has your company complied with the Federal statute as to safety appliances?

Mr. Barron: Yes, sir; clear down to the ash pan law.

Mr. Glasgow: The Butler County Railroad has?

Mr. Barron: Yes, sir.

Mr. Glasgow: Can you give us approximately what was the cost to your company to comply with that statute of Congress?

330 Mr. Barron: Well, I should say about $6,500.

Mr. Glasgow: Has your company made the reports to the Interstate Commerce Commission monthly and yearly required by the Act to regulate Commerce?

Mr. Barron: Yes, sir; also required by the orders of the Commission.

Mr. Glasgow: Does your company keep its books in accordance with the regulations and orders of the Interstate Commerce Commission.

Mr. Barron: It does.

Mr. Glasgow: Will you tell us how many locomotives the Butler County Railroad has?

Mr. Barron: It has two.

Mr. Glasgow: How many cars?

Mr. Barron: Well, it has 110 or 112 or 113, I forget which. Not less than 110, however.

Mr. Glasgow: It has a passenger coach?

Mr. Barron: Yes, sir, and we just bought another one, making two.

Mr. Glasgow: Cabooses?

Mr. Barron: About three.

Mr. Glasgow: Has it any box cars?

331 Mr. Barron: Yes, sir.

Mr. Glasgow: Coal cars?

Mr. Barron: It has six gondolas.

Mr. Glasgow: Does this photograph show a train on the Butler County Railroad made up of the various characters of equipment owned by that road? (Handing photograph.)

Mr. Barron: Yes, sir.

Mr. Glasgow: I offer that in evidence.

(The photograph so offered and identified was received in evidence and marked Butler County Railroad Exhibit No. 2, witness Barron, received in evidence December 9, 1910, and is attached hereto.)

Mr. Glasgow: Does your company, in pursuance of the Act of Congress, observe the hours of service provided by the Congressional Act?

Mr. Barron: Yes, sir.

Mr. Glasgow: Can you tell us about what population is adjacent to and along the line of road operated by the Butler County Railroad, and served by it?

Mr. Barron: There is a population of not less than 3,500 or 4,000 people—there is more than that; I will say 5,000 people.

332 Mr. Glasgow: Farmers?

Mr. Barron: Farmers and merchants——

Mr. Glasgow: A general population, I suppose?

Mr. Barron: General population. Hunters——

Mr. Cowan: Politicians?

Mr. Barron: Oh, yes; I might say they predominate.

Examiner Burchmore: A great number of timber cutters and lumber men?

Mr. Barron: Yes, sir, a great number of men working in the timber, tie makers, piling makers; all of these, however, or with very few exceptions, have farms and they devote their time——

Commissioner Harlan: Never mind going into those details. We understand there is a general population there.

Mr. Glasgow: When the Butler County Railroad receives shipments o lumber to go over its road, or cooperage stuff, whichever it may be, or whatever it may be, where is it received by the Butler County Railroad?

Mr. Barron: Wherever it is tendered to it.

Mr. Glasgow: At what points on its line, I mean?

Mr. Barron: Well——

Mr. Glasgow: At the junction points with these logging roads?

333 Mr. Barron: Yes, sir.

Mr. Glasgow: That is what I mean.

Mr. Barron: And other places, too; it receives lumber tendered to it for shipment by a private mill at Melville and it receives lumber tendered to it for shipment by the public at Bailey's and at Batesville.

Mr. Glasgow: But I mean, does the Butler County Railroad perform any of the service off its own line, of bringing the traffic to its line?

Mr. Barron: No.

Mr. Glasgow: That is performed, in the case of the Cooperage Company, by the engines of the Cooperage Company?

Mr. Barron: Yes.

Mr. Glasgow: Will you tell me along that line, what industries are there at Poplar Bluff or Linstead?

Mr. Barron: What industries are there at Poplar Bluff?

Mr. Glasgow: Or Linstead?

Mr. Barron: At Poplar Bluff is the mill of the Brooklyn Cooperage Company, engaged in the manufacturing of staves and headings. At Poplar Bluff is the mill of the Quercus Lumber Company, engaged in the manufacture of oak lumber. At Poplar Bluff is the mill of the Oil Well Supply Company, engaged in the manu-
334 facture of sucker rods for deep wells, and hickory lumber. At Poplar Bluff is the mill of the Putnam Manufacturing Company, engaged in making handles.

Mr. Glasgow: Has the Brooklyn Cooperage Company any interest whatever in the mill of the Quercus Lumber Company or the Oil Well Supply Company or the Putnam Hickory Mill?

Mr. Barron: None, whatever.

Mr. Glasgow: The Quercus Lumber Company, however, does buy some of the lumber or timber that they use, from the Great Western Land Company?

Mr. Barron: It buys oak logs from the Great Western Land Company?

Commissioner Harlan: Does it buy them delivered?

Mr. Barron: No, sir; the logs are scaled by two men; one employed by the Quercus Lumber Company and the other by the Great Western Land Company. They are loaded on the ground of the Great Western Land Company, and on the track of the Brooklyn Cooperage Company. Now, the Great Western Land Company pays the freight. Now, where that point of delivery is, is perhaps a nice legal question, and I would not undertake to say, but the title passes on the ground on these private tracks of the Brooklyn Cooperage Company.

335 Commissioner Harlan: You mentioned two other companies. Do they get their wood from the Butler County Railway?

Mr. Barron: Yes, sir.

Commissioner Harlan: Altogether?

Mr. Barron: No, sir; not altogether.

Commissioner Harlan: Largely?

Mr. Barron: Very largely.

Commissioner Harlan: And is that wood sold to them by the Great Western Land Company in practically the same way?

Mr. Barron: Most of it.

Commissioner Harlan: And delivered in the same way; the title passes on the logging road of the Brooklyn Cooperage Company?

Mr. Barron: No, some of the other customers of the Great Western Land Cmpany cut the timber themselves and haul it.

Commissioner Harlan: And they pay the freight?

Mr. Barron: And they pay the freight; yes, sir.

Mr. Glasgow: Is there any other connection between the Quercus Lumber Company, the Putnam Hickory Mill and the Oil Well Supply Company, other than you have stated?

Mr. Barron: By connection you mean railroad connection or proprietary interest.

336 Mr. Glasgow: I mean proprietary interest, affiliation, ownership or other than that you have detailed, as to getting lumber from the lands of the Great Western Land Company?

Mr. Barron: None whatever.

Mr. Glasgow: Coming down to Bailey's, can you tell us what, if any, industries are located there?

Commissioner Harlan: Proceed as rapidly as you can.

Mr. Glasgow: Is there a cotton gin there?

Mr. Barron: There is a cotton gin there and a saw mill in that immediate vicinity.

Mr. Glasgow: Drummond's saw mill?

Mr. Barron: Yes, sir.

Mr. Glasgow: And a cattle pen?

Mr. Barron: Yes, sir.

Mr. Glasgow: Do the Great Western Land Company or the Brooklyn Cooperage Company have any interest in the cotton gin or Drummond's mill?

Mr. Barron: No.

Mr. Glasgow: It is separate and independent?

Mr. Barron: Nor in the cattle pen, which is separate and independent.

Mr. Glasgow: Take it down at Melville?

337 Mr. Barron: Well, there is a saw mill at Batesville.

Commissioner Harlan: Is there a logging road joining your line at Bailey's?

Mr. Barron: No.

Commissioner Harlan: How far is this mill away?

Mr. Barron: Something less than a mile.

Commissioner Harlan: How do they get the lumber over there?

Mr. Barron: By team.

Commissioner Harlan: Does that mill own forests?

Mr. Barron: It owns timber.

Commissioner Harlan: It is lumbering its own timber?

Mr. Barron: Yes.

Commissioner Harlan: And not the timber of the Great Western Company?

Mr. Barron: No.

Mr. Glasgow: And it hauls it up to Bailey's, to your road?

Mr. Barron: Yes, sir.

Mr. Glasgow: Just as the Brooklyn Cooperage Company does up to the points of connection with the logging road?

Mr. Barron: Yes sir; and then the farmers in that neighborhood are making ties and handle bolts, and such things?

338 Commissioner Harlan: They haul them to your roads?

Mr. Barron: Yes.

Commissioner Harlan: Do you give them any allowance?

Mr. Barron: No.

Commissioner Harlan: They bear the expense of their haul?

Mr. Barron: Yes, sir.

Mr. Glasgow: Do you give the Brooklyn Cooperage Company any allowance for hauling it up to the line of your road?

Mr. Barron: No.

Commissioner Harlan: There was another mill, you said, at Batesville?

Mr. Barron: At Batesville.

Commissioner Harlan: Just north of Bailey's?

Mr. Barron: Yes.

Commissioner Harlan: What timber is that mill getting?

Mr. Barron: They are getting private timber.

Commissioner Harlan: Not of the Great Western Land Company?

Mr. Barron: No.

Commissioner Harlan: How far from your track is that situated?

Mr. Barron: That is on our track.

Commissioner Harlan: How do they get their logs to the mill?

339 Mr. Barron: By teams.

Commissioner Harlan: What distance?

Mr. Barron: Well, they haul within two miles.

Commissioner Harlan: You do not pay them anything, do not give them any allowance?

Mr. Barron: No, sir.

Mr. Glasgow: You do not give anybody allowances for bringing traffic up to your line?

Mr. Barron: No, sir.

Mr. Glasgow: Now, at Melville there is a cattle pen there for receiving cattle also?

Mr. Barron: Yes.

Mr. Glasgow: There is Baumhoefer's mill?

Mr. Barron: Yes, sir.

Mr. Glasgow: And Talley's mill?

Mr. Barron: Talley's mill. Mr. Talley tendered to the railroad in November 18 cars of lumber, and we shipped it from Melville for him.

Commissioner Harlan: Has he a logging road?

Mr. Barron: No.

Commissioner Harlan: How many miles south of Melville is that mill?

340 Mr. Barron: Three.

Commissioner Harlan: How does he get there with his manufactured lumber?

Mr. Barron: Hauls it by team.

Commissioner Harlan: Three miles?
Mr. Barron: Yes.
Commissioner Harlan: Who bears the expense of that?
Mr. Barron: He does.
Commissioner Harlan: You do not give him any allowance?
Mr. Barron: No, sir.
Examiner Burchmore: It would be more convenient for him if he could haul his lumber over to the Brooklyn Cooperage Company's private line and there ship it, would it not? He is very near to their line.
Mr. Barron: It is a mile and a half away.
Commissioner Harlan: And he hauls it three miles to Melville?
Mr. Barron: Yes, sir; he has a better road.
Mr. Glasgow: Has there been any application made to the Brooklyn Cooperage Company, so far as you know, to allow them to use that line if they wanted to?
Mr. Barron: No.
341 Commissioner Harlan: Has there ever been any talk about it?
Mr. Barron: That is a new line; it has been built this year.
Commissioner Harlan: I know, but there has been a whole year in which he could take up that question with him.
Mr. Barron: Well, he has not done so.
Commissioner Harlan: Does he know it is there?
Mr. Barron: Yes, sir, he knows it is there.
Mr. Glasgow: You say he has a better road to Melville than from his place to the tracks owned by the Brooklyn Cooperage Company?
Mr. Barron: Yes, sir. That railroad is not quite complete down at the lower end, because it is in such a swampy, wet country that we have not been able to finish it, and that is probably the reason he has not applied for the use of that track.
Commissioner Harlan: You say farmers have bought up some of these lands?
Mr. Barron: Yes, sir.
Commissioner Harlan: They cut down trees occasionally, do they not?
Mr. Barron: Yes, sir.
342 Commissioner Harlan: What do they do with them?
Mr. Barron: They sell them.
Commissioner Harlan: Sell them to the mills?
Mr. Barron: They will sell them to whoever will buy them. They will sell, depending what it is——
Commissioner Harlan: Do they sell the standing tree?
Mr. Barron: No, they sell the product of the tree.
Commissioner Harlan: Does it not happen occasionally that they carry those logs to the mill and have them lumbered and then use the lumber?
Mr. Barron: Yes, sir; very frequently.
Commissioner Harlan: And sell it?
Mr. Barron: No; they use the lumber.
Commissioner Harlan: Don't they occasionally sell it?

Mr. Barron: No, I don't think so. When they carry the log to the saw mill and have it sawed, it is usually for their own purposes, to build houses and barns with.

Commissioner Harlan: You do not have shipments over your road of small lots of lumber for anybody?

Mr. Barron: Yes, sir, we do; a great many.

Commissioner Harlan: Tell us about those. For whom?

Mr. Barron: Well, from Poplar Bluff we have a great
343 many small shipments of finished lumber to stations down the railroad——

Commissioner Harlan: I am talking about the lumber the other way.

Mr. Barron: No, sir; there is no movement of lumber the other way in small lots; it is all in carloads.

Commissioner Harlan: Well, do you have shippers that give you one or two carloads in a year?

Mr. Barron: Yes, sir.

Commissioner Harlan: And are there many such shippers?

Mr. Barron: You speak of lumber?

Commissioner Harlan: Yes.

Mr. Barron: Yes, there are two or three.

Commissioner Harlan: Do they have mills?

Mr. Barron: Yes, sir.

Commissioner Harlan: Are there any pony mills down in that country?

Mr. Barron: Yes.

Commissioner Harlan: Where are they?

Mr. Barron: Well, there are two on what we call the Hicoria spur.

Commissioner Harlan: Is that the spur of the Cooperage
344 Company?

Mr. Barron: No, sir—the Cooperage Company owns it, but the Butler Railroad Company runs it——

Commissioner Harlan: You mean the spur up from Hicoria to Menorkenut?

Mr. Barron: Yes, sir.

Mr. Glasgow: What is a pony mill?

Mr. Barron: Well, I presume by pony mill is meant a portable mill.

Mr. Glasgow: I understood you to say that the Baumhoefer mill, Talley's mill, the P. & S. Lumber Mill, were at Melville or in the vicinity of it.

Mr. Barron: No, the P. & S. Lumber Company has a couple of mills on the Hicoria spur.

Mr. Glasgow: Does it not also have one at Melville?

Mr. Barron: No.

Mr. Glasgow: And Melville is the point where the mail is carried for Quelin?

Mr. Barron: Yes.

Mr. Glasgow: What is the character of the Butler County Rail-

road, as to its physical character, equipment, rails, and so forth.

345 Mr. Barron: The road which was first built was 56 pounds; all that has been built in the last five years is 60 pound steel.

Mr. Glasgow: How does it compare with the road of the trunk line carriers that you join?

Mr. Barron: Well, I would not like to say that. I think we have got a pretty good road; we carry 100,000 pound capacity cars over it every day, loaded to capacity.

Mr. Glasgow: Mr. Barron, does the Butler County Railroad on these through rates which have been in effect on lumber and on the class rates—do you issue through bills of lading?

Mr. Barron: Yes, sir. I have got last month's bills of lading right here.

Mr. Glasgow: Are they on the form that has been approved by the Commission?

Mr. Barron: Yes, sir; it is on the universal form.

Mr. Glasgow: There is no use to file them, I suppose?

Commissioner Harlan: No. Have you prepared any exhibit showing the tonnage of your road?

Mr. Barron: Yes, sir.

Mr. Glasgow: I am coming right to that. Have you a statement prepared of the earnings of your passenger business?

346 Mr. Barron: Yes.

Mr. Glasgow: For the year ending June 30, 1910, and for the five months ending November 30, 1910?

Mr. Barron: Yes, sir.

Mr. Glasgow: We offer that in evidence.

(The paper so offered and identified was received in evidence and thereupon marked Butler County Exhibit No. 3, witness Barron, received in evidence December 9, 1910, and is attached hereto.)

Mr. Glasgow: Tell us approximately how many passengers per day are handled.

Commissioner Harlan: We will not go into those details. That is all shown on the exhibit, and can be argued later.

Mr. Glasgow: No, that is not shown on the exhibit.

Commissioner Harlan: Well, it ought to be.

Mr. Glasgow: The total is shown.

Commissioner Harlan: Very well; ask the question.

Mr. Barron: We carry 75 passengers per day.

Mr. Glasgow: Have you prepared a statement showing the tonnage and revenue of the Butler County Railroad, from traffic handled for the Brooklyn Cooperage Company and for all other traffic?

347 Mr. Barron: Yes, sir.

Mr. Glasgow: And all other traffic, including the lumber which has been mentioned as being sold by the Great Western Land Company, and which the purchasers take from their lands to mills, and so forth?

Mr. Barron: Yes, sir; to mills, and that is also sold direct in the form of ties and piling to railroads and brokers.

Mr. Glasgow: I want to file the monthly statement, beginning July 1st, 1909, and ending June 30th, 1910, and for the five months beginning July 1st, 1910, and ending November 30th, 1910.

(The papers so offered and identified were received in evidence and thereupon marked Butler County Railroad Exhibits Nos. 4 and 5, witness Barron, received in evidence December 9, 1910, and are attached hereto.)

Mr. Cowan: I suggest when a statement of that kind is filed that the summary ought to be stated in the record, because these copies will never be furnished to anybody.

Mr. Glasgow: Can you tell us the number of cars handled by the Butler County Railroad from July 1st, 1909, to June 30th, 1910, all cars handled?

348 Mr. Barron: You are speaking of carload freight?

Mr. Glasgow: Yes.

Mr. Barron: Yes, sir, I can tell you.

Mr. Glasgow: You have it on that yellow memorandum you have got?

Mr. Barron: Yes.

Commissioner Harlan: Does this yellow sheet summarize the larger sheet you have just offered in evidence?

Mr. Barron: Yes, sir.

Commissioner Harlan: Just give us the summary.

Mr. Glasgow: The number of cars for the year ending June 30th, 1910.

Mr. Barron: 10,436.

Mr. Glasgow: What number of cars out of that were handled for the Brooklyn Cooperage Company?

Mr. Barron: 6,593.

Mr. Glasgow: How many for all other carload freight?

Mr. Barron: 3,843.

Mr. Glasgow: What was the percentage of freight cars handled by the Butler County Railroad Company for the Brooklyn Cooperage Company?

Mr. Barron: 63 per cent.

349 Mr. Glasgow: And 37 per cent for other carload freight?

Mr. Barron: Yes, sir.

Mr. Glasgow: And the number of tons handled by the company, total, was what?

Mr. Barron: 188,403.

Mr. Glasgow: And the number out of that handled for the Brooklyn Cooperage Company?

Mr. Barron: 108,722 tons.

Mr. Glasgow: And other carload freight?

Mr Barron: 78,441.

Mr. Glasgow: And the less than carload freight?

Mr. Barron: 1, 240 tons.

Commissioner Harlan: Of that other carload freight, 78,000 tons, what part contained lumber of the Great Western Land Company?

Mr. Glasgow: You mean from——

Mr. Barron: None. The Great Western Land Company has no lumbering.

Commissioner Harlan: Well, the Great Western Land Company, you said, sold lumber?

Mr. Barron: No, sir.

350 Mr. Glasgow: Timber?

Commissioner Harlan: I was not using the word "lumber" in the correct sense. How much timber, then, was moved in that 78,000 tons that had been sold by the Land Company to mills other than the Cooperage Company mills?

Mr. Glasgow: None of that was sold to the Cooperage Company. I will answer it, to expedite it. We have not got this analyzed down to the point to show that of that other carload freight how much is timber coming from the lands of the Great Western Land Company. We have not analyzed it to that point.

Commissioner Harlan: Your figures do not show that?

Mr. Barron: No.

Commissioner Harlan: You can get that, can you not?

Mr. Barron: Yes, sir; I can get it.

Commissioner Harlan: I wish you would do so, and file it as an exhibit. You have testified about certain mills that either cut the timber themselves or buy it delivered on the tramways of the Brooklyn Cooperage Company?

Mr. Barron: Yes, sir.

Commissioner Harlan: We want an examination and a statement of the amount of that timber that goes over the Butler County Railroad.

351 Mr. Glasgow: Would you not want that analyzed a little further, to show what proportion of it goes to each of the purchasers?

Commissioner Harlan: Well, he can analyze it as he chooses, if he shows that result.

Mr. Barron: That is on timber that goes to these outside mills?

Commissioner Harlan: Yes.

Mr. Glasgow: He wants to know how much of that 78,000 tons comes from timber which was cut on the land of the Great Western Land Company.

Mr. Barron: And went to these mills?

Mr. Glasgow: Yes.

Mr. Barron: All right.

Commissioner Harlan: Or went elsewhere, all of it that moved over your road.

Mr. Barron: Well, now, Judge, half of that material that comes off of the Great Western Land Company's land goes to mills, and the other half goes direct in some form that does not require manufacturing; for instance, piling; there is a very large volume of that that goes out.

Commissioner Harlan: Very well; show that. Show all
352 the timber that comes off the Great Western Company's lands and is moved by your line, and for whom it is moved.

Mr. Barron: All right.

Commissioner Harlan: And if you can now, tell us about what proportion of that 78,000 tons constitutes timber of that kind. We would like to know it.

Mr. Barron: I cannot.

Commissioner Harlan: Very well.

Mr. Glasgow: What is the percentage of carload freight handled by the Butler County Railroad Company for the Brooklyn Cooperage Company; the percentage of the total?

Mr. Barron: In tons?

Mr. Glasgow: No, the percentage of the whole number of tons handled for the Brooklyn Cooperage Company.

Mr. Barron: 57 per cent.

Mr. Glasgow: And 42 per cent is other carload freight?

Mr Barron: Yes, sir.

Mr. Glasgow: And one per cent is less than carload?

Mr. Barron: Yes.

Mr. Glasgow: Now, the revenue earned: what proportion of that comes from the carload freight handled for the Brooklyn Cooperage Company?

353 Mr. Barron: 39 per cent of the revenue derived——

Mr. Glasgow: Let us get the dollars first.

Mr. Barron: $28,092.

Mr. Glasgow: What comes from other carload freight?

Mr. Barron: $41,133.

Mr. Glasgow: And less than carload freight?

Mr. Barron: $4,427.

Mr. Glasgow: And the percentage of the revenue which is derived from the carload traffic of the Brooklyn Cooperage Company is what per cent?

Mr. Barron: 39 per cent of the whole.

Mr. Glasgow: And the other carload freight?

Mr. Barron: 55 per cent.

Mr. Glasgow: And less than carload freight?

Mr. Barron: Six per cent.

Commissioner Harlan: I would like you to extend those figures so as to cover the timber we have just been talking about.

Mr. Barron: Well, it will only change one line.

Mr. Glasgow: I think practically what you want is a statement of all the shippers and what tonnage is handled for them?

Commissioner Harlan: Well, the witness understands. I
354 want the information and percentages of this outside tonnage we have just been talking about.

Mr. Barron: Yes, I understand.

Mr. Glasgow: Now, then, for the five months of the year 1910, beginning July 1st, I will read this without asking the question. The number of cars handled——

Commissioner Harlan: I think if you will just file it, that will be sufficient.

Mr. Glasgow: Mr. Cowan asked to put it in the record.

Commissioner Harlan: We need all the time we have got. Now, Mr. Glasgow, if you will oblige the Commission by filing it——

Mr. Glasgow: I am going to do it, but I was told that counsel wanted the figures.

(The papers so offered and identified were received in evidence and thereupon marked Butler County Railroad Exhibits Nos. 6 and 7, witness Barron, received in evidence December 9, 1910, and are attached hereto.)

Mr. Glasgow: You know the tariffs which you have had in effect with the Iron Mountain and the St. Louis and San Francisco Road. Can you give us a statement showing the divisions of the through rates to points, St. Louis, New York, New Orleans, Cairo,
355 Thebes, Memphis and East St. Louis; first in connection with the Iron Mountain, and second, in connection with the St. Louis & San Francisco?

Mr. Barron: Yes, sir.

Mr. Glasgow: Have you that statement?

Mr. Barron: Yes, sir.

(The papers so offered and identified were received in evidence and thereupon marked Butler County Railroad Exhibits Nos. 8 and 9, witness Barron, received in evidence December 9, 1910, and are attached hereto.)

Commissioner Harlan: Was there a larger percentage of traffic for the controlling mill for the year ending June 30th, 1909, than there was for the year ending June 30th, 1910?

Mr. Barron: I think not. The controlling mill's output has been quite uniform, but the other business has been growing quite rapidly.

Commissioner Harlan: Then the percentage last year would be larger, would it not, if the percentage of the other has grown rapidily this year?

Mr. Barron: Yes, sir; the percentage of the outside business was larger this year than before.

356 Commissioner Harlan: What was the percentage of the inside business last year; the controlling mill's traffic?

Mr. Barron: You have it there.

Commissioner Harlan: I mean for the year ending June 30th, 1909?

Mr. Barron: I have not got the figures, but it would be larger, of course, than——

Commissioner Harlan: Have you any idea what the percentage was for that year?

Mr. Barron: It would not be a great deal greater; the outside business is growing. At the beginning, the outside business——

Commissioner Harlan: If you do not know, we will not stop.

Mr. Barron: I do not know, no, but it is not a great deal different.

Mr. Glasgow: Will you please tell us in connection with the two statements you have just filed, showing the divisions which the Butler County Railroad gets, what is the service rendered by the Butler County Railroad for the division of rates which it gets?

Mr. Barron: The service performed by the Butler County Railroad Company is the transportation of the timber from the
357 point where it is tendered to the Butler County Railroad to destination. Some of it is milled in transit. Now, the compensation—of course I say it is transported to destination for the through rate, of which we get that division. Now, the compensation that is received is on the cheaper grades of lumber one cent per 100 pounds on the logs, and on the more valuable kinds of timber, one and one-half cents per 100 pounds on the logs, for the milling in transit service, for handling it, and then the division on the manufactured product, if it is milled.

Mr. Glasgow: To illustrate it briefly, take a log you receive at Memorkenut on your line, that is going through, a through shipment of the lower grades. As I understand, you carry that log down on your line to the mill at Linstead?

Mr. Barron: Down to the Brooklyn Cooperage Company's mill, say at Linstead; yes, sir.

Mr. Glasgow: There it is milled in transit?

Mr. Barron: Yes, sir.

Mr. Glasgow: Then you handle that from the mill tracks over to the long line road, and deliver it?

Mr. Barron: Yes, sir.

Mr. Glasgow: And for that, you get the proportion shown
358 in the statement filed? As shown in the tariff?

Mr. Barron: Yes, sir.

Mr. Glasgow: And in addition to that, you get one cent per 100 pounds for your own tariff on the log?

Mr. Barron: Yes, sir.

Mr. Glasgow: And if it is the higher grade of log, one and one-half cents per 100 pounds?

Mr. Barron: Yes, sir.

Commissioner Harlan: What is the total earnings of your road, then, on the shipment?

Mr. Barron: On the shipment?

Commissioner Harlan: Yes.

Mr. Barron: Well, it takes about five cars of logs to make one of lumber or manufactured material. Now, we get an average of $4.00 a car on the logs; that is $20.00, and three cents per 100 pounds under the junction rate, say 60,000 pounds, is $18.00. Now, we get $38.00 for handling, say, five and a half cars.

Commissioner Harlan: To the mill, and how many cars from the mill?

Mr. Barron: No, four and one-half cars to the mill and one from the mill.

359 Commissioner Harlan: And what is the distance from the mill to the junction with the Rock Island?

Mr. Barron: Half to three-quarters of a mile.

Examiner Burchmore: That is the distance from the outside of your plant to the line of the Iron Mountain, or does that include the haul inside the plant?

Mr. Barron: Well, it will average a little over half a mile. You take the mill of the Quercus Lumber Company, that stands about half a mile away from the junction point of the Iron Mountain and Frisco. The Brooklyn Cooperage Company's mill is about the same, and the handle mill about the same.

Commissioner Harlan: Who hauls it from the mill to the regular line?

Mr. Barron: The Butler County Railroad.

Mr. Glasgow: Are there any other mills in competition with the Brooklyn Cooperage Company's mill in the sale of the manufactured products?

Mr. Barron: No, sir, the products of the Brooklyn Cooperage Company's mill is consumed by the proprietor of the mill, by the real owner, the beneficial owner of the property. It is not sold.

Mr. Glasgow: Is there anybody in that vicinity making
360 the same character of stuff?

Mr. Barron: Yes, sir, but in a very small way, a very insignificant way.

Mr. Glasgow: And the product of the Brooklyn Cooperage Company's mill does not come into competition with that product?

Mr. Barron: No, sir. Whenever there is any transaction of that character at all, it is the purchase by the Brooklyn Cooperage Company of the product of the outside mill, and not a sale except——

Mr. Glasgow: I think that is all. I will ask to have these maps marked as exhibits.

(The maps so offered and identified were received in evidence and thereupon marked Butler County Railroad Exhibits Nos. 10 and 11, witness Barron, received in evidence December 9, 1910, and are attached hereto.)

Examiner Burchmore: You testified that the Butler County Railroad was incorporated in 1905?

Mr. Barron: Yes.

Examiner Burchmore: Did you give the date on which it was built, or the first building?

Mr. Barron: I did not.

361 Examiner Burchmore: What was the first construction?

Mr. Barron: 1899.

Examiner Burchmore: Prior to the incorporation in 1905, did or did not the Butler County Railroad, I mean the line that was then in existence, receive allowances from the Missouri Pacific System?

Mr. Barron: It did not.

Examiner Burchmore: It received none?

Mr. Barron: No.

Examiner Burchmore: Has the Butler County Railroad any contract in effect now with the Iron Mountain System covering through rates or allowances?

Mr. Barron: Well, I guess not; nothing more than is shown in the tariffs.

Examiner Burchmore: Any contract, not a tariff, but a contract?

Mr. Barron: Well, then, if a tariff is not a contract, it has no contract, no sir.

Examiner Burchmore: Has it in the past had any such contract for divisions?

Mr. Barron: No, sir.

Examiner Burchmore: Does the Brooklyn Cooperage Com-
362 pany now have, or has it in the past had such a contract with the Iron Mountain System?

Mr. Barron: No.

Examiner Burchmore: Would you know if there had been such a contract in existence in the past?

Mr. Barron: I would.

Mr. Glasgow: Have you any information that there is? Because I will look it up if you have.

Commissioner Harlan: What are you the president of?

Mr. Barron: Nothing.

Commissioner Harlan: What is your relation to the railroad company?

Mr. Barron: I am vice-president.

Commissioner Harlan: As such, are you authorized to sign contracts?

Mr. Barron: For the railroad company; yes, sir.

Commissioner Harlan: For the railroad company?

Mr. Barron: Yes.

Commissioner Harlan: Is any one else authorized to sign contracts?

Mr. Barron: Well, I don't remember what the by-laws provide,
but I have done all of the business; there has nobody else
363 done anything except me; I have done it all.

Commissioner Harlan: I want to put to you the question: Is there any contract between the Iron Mountain or the Missouri Pacific or any other line governing the amount of divisions that are received by the Butler County Railroad, whether that contract is with your railroad, or with the American Sugar Refining Company or the Land Association, or the Brooklyn Cooperage Company.

Mr. Barron: I do not know what you mean by a contract. They have got a division sheet, issued, but that is all I know anything about.

Commissioner Harlan: I am talking about a formal contract.

Mr. Barron: No, sir; there is none and never was.

Examiner Burchmore: One of your companies has a contract with the Iron Mountain under which these trackage rights are exercised.

Mr. Barron: That is a verbal contract which runs from month to month. They perform the service and send us a bill for so much money, and we pay it.

Examiner Burchmore: There was a written contract some time ago?

Mr. Barron: Yes, there was a written contract covering
364 those trackage rights, but that was made by an individual with the Iron Mountain Railroad, and it is so long ago it has been forgotten.

Examiner Burchmore: Who was that individual?

Mr. Barron: That individual was a man named Lowell M. Palmer.

Examiner Burchmore: Who was Lowell M. Palmer?

Mr. Barron: But that did not cover any question of divisions; it just provided for the running of the trains, and fixed the amount of the trackage and the amount per train mile.

Examiner Burchmore: Why was that contract discontinued; why did you abandon that method and resort to a verbal contract, if you know?

Mr. Glasgow: When was the date of this contract?

Mr. Barron: That contract was made in 1899, when the business was started out there. At that time the land was owned by Lowell M. Palmer.

Commissioner Harlan: Have you a copy of that contract?

Mr. Barron: Yes, sir.

Commissioner Harlan: Will you supply a copy to the Commission?

365 Mr. Barron: Certainly; but that was before these companies ever acquired any of this land——

Mr. Glasgow: May I ask, because I never heard of this before—what is the purpose of going back to 1899 on this?

Commissioner Harlan: For the purposes of this inquiry.

Mr. Glasgow: That does not give me any information.

Commissioner Harlan: We want to get all of the information that is available.

Mr. Glasgow: I thought if I knew your Honor's purpose, I might be able to assist in getting it out.

Mr. Jeffery: I will state at this time I know there is no contract for divisions between the Butler County Railroad and either the Missouri Pacific or the Iron Mountain. You will recollect that we withdrew from our written contracts which we had with any tap line, and there was only one. This is the first I ever heard of this one, and it must be with an individual.

Commissioner Harlan: The witness has said that it was.

Mr. Jeffrey: But there is none with the Butler County Railroad. In fact, there is none in effect with any now.

Examiner Burchmore: You testified that the amount of compensation paid to the Iron Mountain for trackage rights was
366 so much per train; I think you mentioned 85 cents per train or 25 cars.

Mr. Barron: No, I said it was 65, 75 and 85.

Examiner Burchmore: Does your road run a train composed of as many as 35 cars?

Mr. Barron: Yes, sir.

Examiner Burchmore: I ask the question because your time table shows three trains each way each day. You testified your total

traffic last year amounted to something in excess of 10,000 cars, which would be, in rough numbers, 35 a day. Those 35 were apparently handled in six trains.

Mr. Glasgow: I suggest that Mr. Barron has not testified that he hauled an average of 35 cars a day over the road. I suppose it is like any other road——

Examiner Burchmore: The only question I desire to ask is what is the average payment per train which you make for these trackage rights, in a general way?

Mr. Barron: Well, it is 75 cents per mile.

Examiner Burchmore: That is your average actual payment?

Mr. Barron: Yes, sir. Now, you say we operate three trains a day. That is correct, but two of those trains do not handle any freight business to speak of. All of the freight business is
367 handled by one train, and the train will carry on an average I would say, 42 cars. It is a level track, and a good engine, and we put all of that business into one train and get over the ground faster with the other two, the other two being devoted, I might say, exclusively to passenger business.

Examiner Burchmore: You testified that lines of railroad marked in red on this first map were owned by the Butler County Railroad Company.

Mr. Barron: Yes, sir.

Examiner Burchmore: Is that an actual ownership in fee of the land, or a long term lease of the land, or some other kind of lease of the land from the Brooklyn Cooperage Company?

Mr. Barron: It is an actual ownership in fee of the land.

Commissioner Harlan: And the rails?

Mr. Barron: Yes, sir, and the rails and the ties and spikes.

Examiner Burchmore: The town known as Linstead; is it within the municipal limits of Poplar Bluff?

Mr. Barron: It is not.

Examiner Burchmore: Within what distance is it of
368 Poplar Bluff?

Mr. Barron: Well, the property there constitutes the eastern boundary of part of Poplar Bluff, and there is about 120 acres of land devoted to manufacturing businesses outside of the municipal limits.

Examiner Burchmore: You referred in your testimony to three other industries at Linstead, or Poplar Bluff, the Oil Well Supply Company, the Quercus Lumber Company and the Putnam Manufacturing Company. Are the mills or factories of those companies on ground owned by the Brooklyn Cooperage Company; that is, are they lessees of the Cooperage Company?

Mr. Barron: They are, all of them, and up until a few months there was another mill there, the Garretson & Greacen Lumber Company.

Examiner Burchmore: Can you indicate in a general way what that lease arrangement is?

Mr. Barron: Yes, sir; the Brooklyn Cooperage Company leased five acres of land to the Oil Well Supply Company for a rental

of $150 per annum, on which they constructed a mill which they operate, and a similar arrangement was made with the Quercus Lumber Company, and on another piece of ground of 20 acres. Later on, another arrangement similar to the other two was made with the Putnam Manufacturing Company for its mill site.

369 Examiner Burchmore: And substantially the same rental consideration, the same general basis?

Mr. Barron: The same general basis; yes, sir.

Examiner Burchmore: Does the line of the Butler County Railroad connect with any other railroad than the Iron Mountain?

Mr. Barron: Yes, sir.

Examiner Burchmore: With the Frisco?

Mr. Barron: Yes, sir.

Examiner Burchmore: At what point?

Mr. Barron: Well, they call that Poplar Bluff.

Examiner Burchmore: There is an actual physical connection at Poplar Bluff?

Mr. Barron: There is an actual physical connection, but it is not in the city of Poplar Bluff; it is outside on this same track of ground.

Examiner Burchmore: Does your company maintain joint through rates in connection with the Frisco generally?

Mr. Barron: Not generally on lumber.

Examiner Burchmore: Practically its entire traffic goes out over the Iron Mountain?

Mr. Barron: No, sir; the Frisco gets some. The Iron
370 Mountain has been pretty short of cars lately, and the Frisco got the bulk of it.

Examiner Burchmore: What rates apply over the Frisco, the combination of locals?

Mr. Barron: No, there are some through rates there. We have never gotten down to the combination of local rates yet, and I hope we never shall.

Examiner Burchmore: There are joint through class rates in effect over your line in connection with the Iron Mountain to interstate destinations, and those are published and filed with the Commission. What is the publication of those rates; that is to say, from stations on your line are the class rates to interstate destinations the same as the class rates from the junction points, Lowell, and the same as the class rates from Poplar Bluff? Perhaps that is a little long——

Mr. Barron: It was a little indirect.

Examiner Burchmore: The question is this: Are these joint through class rates in effect over your line to interstate destinations the same as the junction class rates, or are they made on the combination of locals?

Mr. Barron: They are made, some of them are on a combination of locals, and some are not. Some are joint through rates.

371 Examiner Burchmore: But the amount of those joint through rates; are they as low as the joint through rates——

Mr. Barron: As the combination of locals? They are lower.

Examiner Burchmore: Are they as low as the through rates in effect from Poplar Bluff?

Mr. Barron: No, they are higher.

Examiner Burchmore: They are substantially equal to the sum of the locals?

Mr. Barron: No, they are less than the sum of the locals.

Examiner Burchmore: You testified that you had class and commodity rates filed with the Commission between points on the Butler County Railroad, local rates?

Mr. Barron: Yes, sir.

Commissioner Harlan: Is your division less or greater than your locals?

Mr. Barron: Why, Judge, I will tell you. Up to about a month ago it was less, but I went to Mr. Perkins and Mr. Johnson and I complained about that, and they were good enough to increase it so it is a shade more. It formerly was 27 per cent, and it is now 33 per cent. 27 per cent was a shade too low, and 33 per cent would just carry it.

372 Commissioner Harlan: The percentages of the joint through rates?

Mr. Barron: Yes.

Commissioner Harlan: Now, you get a division that is larger than the local?

Mr. Barron: Well, it is our local plumb; the scale goes down like that; but before that, it did not, it went down on the other side; but it is not substantially different from the sums of our locals; that is, on those rates which are based on the sum of the two locals. Now, there are certain rates which are not arrived at in that way, we agree on the division arbitrarily.

Mr. Jeffery: That is less than carload business, and not lumber?

Mr. Barron: That is less than carload business and not lumber; yes, general classes and commodities. But now, live stock and cattle which goes in carloads, on which there are through rates that is not dealt with on the basis of the sum of the two locals, but it is competitive, and we met it both took less than the sum of our local rate.

Examiner Burchmore: On these through class rates are all points on your line blanketed; do they all take the same rate?

373 Mr. Barron: No, sir—well, no, sir, they do not.

Examiner Burchmore: Do all points on your line south of Lowell Junction take the same rate?

Mr. Barron: No, sir.

Examiner Burchmore: Those rates are scaled, graded?

Mr. Barron: Yes, sir, except cotton and live stock.

Mr. Barron: Your index of tariffs, issued December 1, 1910, I. C. C. No. 5, under section 3, reads as follows: "Numerical list of Butler County Railroad Company tariffs bearing I. C. C. numbers, none." Does that not indicate that you have no local rates on file with the Commission under your own I. C. C. number.

Mr. Barron: It indicated that at the time that tariff was filed,

we had no local rates on file with the Commission, but we have filed one since.

Examiner Burchmore: Since December 1st, 1910?

Mr. Barron: Yes, sir. I have a copy of it here, I think, or Mr Glasgow has it.

Examiner Burchmore: You referred to the transportation of the United States mails. Do you have a contract with the Government, similar to the contracts entered into by the Government
374 with all common carriers?

Mr. Barron: Well, now, I never had anything to do with any other railroad, and I do not know what kind of a contract the other railroads have, but we have a contract with the Government which I presume is similar to the usual contracts.

Examiner Burchmore: The question with me is just this, the Government employs railroads to transport the mail as common carriers between various points; it also employs private individuals, or mail routes, to transport mail in carriages and otherwise——

Mr. Barron: Well, the Government has employed us to transport the mails as a common carrier, and we get the railroad carrier's compensation for the service, which I might mention incidentally is very low.

Commissioner Harlan: Do you mean your division is low?

Mr. Barron: No, the total compensation; the through rate is low.

Mr. Glasgow: The division with the Government is low?

Mr. Barron: Yes, sir.

Examiner Burchmore: Do you carry any express matter?

Mr. Barron: No. We have three trains a day, and it will go by freight just as fast as it will go by express.

375 Mr. Glasgow: You give it all an expedited service?

Mr. Barron: Yes, sir.

Examiner Burchmore: Has your company any track scales for weighing cars?

Mr. Barron: No.

Examiner Burchmore: Has it any small scales for weighing L. C. L. freight?

Mr. Barron: Yes, sir, it has team scales.

Commissioner Harlan: Judge Cowan, have you some questions?

Mr. Cowan: I wanted to ask some questions about some of these divisions. In the exhibits which you have filed, Mr. Barron, showing the divisions with the Missouri Pacific and the St. Louis, Iron Mountain & Southern on lumber and cooperage stock handles and cotton, the rate from Poplar Bluff is stated to be 12 cents to St. Louis from all stations on the Butler County Railroad, of which you get a division of five cents. Does that include the station called Linstead, where your factory is?

Mr. Barron. No, sir. Now, pardon me, but you said the paper shows the rate from Poplar Bluff. Your question would have expressed what you meant if you had left that Poplar Bluff off,
376 and said from all stations on the Butler County Railroad.

Mr. Cowan: Yes, they are both coupled here in the same

category, but I see the rate is ten cents from Poplar Bluff and twelve cents from all stations on your road.

Mr. Barron: Yes, sir.

Mr. Cowan: Out of that twelve cents you get five cents?

Mr. Barron: Yes.

Mr. Cowan: Does that apply on traffic, lumber loaded into the cars at Linstead?

Mr. Barron: Yes, sir; by reason of the milling in transit arrangement.

Mr. Cowan: Do you manufacture lumber, or does that term "lumber" mean lumber products, staves and barrel heads?

Mr. Barron: Well, the lumber products go out on a commodity cooperage rate, and the lumber proper is manufactured by parties with whom we have no proprietary connection.

Mr. Cowan: You mentioned several factories to whom you had leased some land there?

Mr. Barron: Yes, sir.

Mr. Cowan: And I assume that was for the purpose of concentrating the business there, and for your railroad to get the traffic loaded on its line and then transferred to the Iron Mountain,
377 so you would get a division of the rate. Is that correct?

Mr. Barron: Well, that matter was not altogether lost sight of, no. That railroad has got to live; it has enjoyed a division ever since it was created, and the result of the operation so far has been a net loss of $8,000; and we had in mind that division; yes, sir, we had.

Mr. Cowan: There was no other compensation which would amount to anything to let them have the land on which to put the factory except the fact that you would get a division of the rate on the lumber which they manufactured.

Mr. Barron: Yes, sir; they all paid a fair rental value for the land they got.

Mr. Cowan: I think I heard you mention $150 a year for five acres. I thought that was pretty cheap.

Mr. Barron: Well, we paid $60 an acre for the land.

Examiner Burchmore: Does that include the use of your mill pond?

Mr. Barron: No, that is only the land.

Mr. Glasgow: That is 50 per cent.

Mr. Cowan: On cooperage stock from all Butler County Railroad stations the rate to St. Louis is 35 cents, out of which
378 you get——

Mr. Barron: No, sir; that is New York.

Mr. Cowan: I am mistaken; 35 cents to New York, out of which you get three cents?

Mr. Barron: Yes, sir.

Mr. Cowan: How does it come about that you get practically ten per cent on the New York shipments, and you get 40 per cent on the shipments to St. Louis?

Mr. Barron: Because the haul is much longer to New York and the rate higher, and we do not haul it any longer or any farther on a New York shipment than on a St. Louis shipment.

Mr. Cowan: How far do you haul the lumber itself?
Mr. Barron: The manufactured product?
Mr. Cowan: Yes.
Mr. Barron: About three-quarters of a mile.
Mr. Cowan: It is customary for the carload shipper of lumber or lumber products throughout the country to load the cars?
Mr. Barron: Yes, sir.
Mr. Cowan: The railroad company does not undertake that?
Mr. Barron: Yes, sir; they load the cars.

379 Mr. Cowan: At what expense is the Butler County Railroad per car for the handling of it from one of these lumber concerns there out to the Iron Mountain Road?

Mr. Barron: Ordinarily none, and I will explain why, because I applied to the American Railroad Association and the Central Storage and Demurrage Bureau for admission to those organizations, and they have so far deferred approving the application, and we are on a demurrage basis instead of a per diem basis. We do not pay per diem, and therefore we are at no expense for the cars.
Mr. Cowan: But I meant the expense of handling per car.
Mr. Barron: The expense of handling per car?
Mr. Cowan: Yes. You switch it over about three-quarters of a mile, as I understand, and I wondered if you knew how much it cost you per car to do that.
Mr. Barron: Well, it does not cost a great deal to do that, but that is not the entire service. We have got to get that timber in there to Linstead.
Mr. Cowan: I understand all that.
Mr. Barron: And there is a 35 mile haul.
Mr. Cowan: How much do you get for hauling the logs into the mills of some of these other concerns which make lumber products which move to St. Louis on the 12 cent rate?

380 Mr. Barron: One and one-half cents per 100 pounds, which will average about $6.00 per car, and the haul will average 25 miles.

Mr. Cowan: Do you know what the Arkansas Commission tariff is for hauling logs a similar distance?
Mr. Barron: No, sir; we do not do business in Arkansas.
Mr. Cowan: Well, Missouri, then.
Mr. Barron: About four and one-half cents per 100 pounds.
Mr. Cowan: For a distance of 25 miles?
Mr. Barron: Yes, sir; either four or four and a half cents, I am not sure.
Mr. Glasgow: Is that a local tariff?
Mr. Barron: Yes, sir. I can tell you what it is.
Mr. Glasgow: I do not care to go any further with it.
Mr. Cowan: I did not mean to take time with that.
Mr. Glasgow: You need not go into that, unless counsel desires.
Mr. Cowan: I see the rate on cotton to St. Louis from your stations is 14 cents per 100 pounds, out of which you get a ten cent division. Why is the division on cotton so much less in percentage to the total than in the case of lumber?

381 Mr. Barron: Well, I expect the Missouri Pacific gentlemen out-traded me on that.

Mr. Jeffery: They don't often do it, I guess.

Mr. Barron: I am glad you called attention to it.

Mr. Cowan: I see the rate to Thebes from all stations on your line for lumber is ten cents, out of which you get five cents, and the Iron Mountain gets five.

Mr. Barron: Well, that is a division of three cents under the junction rate, just as it is in the other cases, outside of cotton.

Mr. Cowan: I wanted to ask what the cooperage company pays for getting its logs in.

Mr. Barron: It pays one cent per 100 pounds. Those logs are not worth more that 50 per cent of the value of the other logs.

Mr. Cowan: I notice that you do not have the blanket system of rates on lumber from your stations, but a two cent arbitrary above the average. I do not know whether it is an arbitrary, but it is two cents above the St. Louis rate.

Mr. Glasgow: No.

Mr. Barron: We have the blanket system, but it is not the same rate as the Poplar Bluff rate, it is a group rate.

382 Mr. Cowan: It is two cents more from stations on your line than from Poplar Bluff?

Mr. Barron: Yes.

Mr. Glasgow: But the whole line of stations on his line are grouped.

Mr. Cowan: Is there a blanket system of rates from the locality of Poplar Bluff on Iron Mountain stations?

Mr. Barron: Yes, sir, but the blanket is not as big as it is farther south.

Mr. Cowan: How far down does this ten cent rate extend below Poplar Bluff?

Mr. Barron: I do not know; but I do know that a point 15 miles south of Poplar Bluff carries a $10\frac{1}{2}$ cent rate.

Mr. Cowan: How far north of Poplar Bluff does the ten cents rate apply?

Mr. Barron: That I do not know.

Mr. Cowan: Do you know the extent of the blanket to which the ten cent rate applies from stations on the Frisco line to St. Louis?

Mr. Barron: No, sir, but on the same parallel of latitude as the southern terminus of our road, the Frisco's rate to St. Louis

383 is 12 cents, the same as ours; that is a point a few miles east of the southern end of our road.

Mr. Cowan: A man doing business on your line and shipping from stations on your line, either logs or lumber, would have to pay on the basis of two cents more than he would for an equal distance from St. Louis on the Iron Mountain or the Frisco. Your rates are two cents higher.

Mr. Barron: No, sir. From a point on the Frisco as far south from St. Louis as our stations he would pay the same. He would pay a little more if he shipped over our road than he would if he shipped on the Iron Mountain from a point about as far south.

Mr. Cowan: You receive from the Frisco on shipments to Cairo also one-half of the ten cent rate. Now, you spoke about them outtrading you on the cotton. By what sort of means were you able to get the Frisco Railroad and the Iron Mountain Railroad to give you one-half of the rate to Cairo and to Phebes; what inducement was there that would induce them to give you half the rate for the service you performed, and they take it and haul it on to Phebes or Cairo for the same amount they give your company?

Mr. Barron: Well, they give us a division of three cents
384 under the junction rate, and we haul it, say 35 miles to the mill, deliver it to the mill, switch them in and empty car and get the load and carry it out and haul it three-quarters of a mile, and they will haul it 70 miles. We will haul five cars 35 miles and they will haul one car 70 miles, and I think that we are not getting any more than we are entitled to.

Mr. Jeffery: What is the through rate?

Mr. Barron: I think ten cents; I am not quite sure.

Mr. Cowan: What is the distance from Popular Bluff to Thebes?

Mr. Barron: I should say 60—65 or 70 miles. I am not sure.

Mr. Cowan: Do you know what expense is involved in delivering at Thebes?

Mr. Barron: No, sir.

Mr. Cowan: Nor Cairo?

Mr. Barron: No, sir. I understand there is a bridge toll there.

Mr. Cowan: How much do you understand the bridge toll to be?

Mr. Barron: A cent and a half.

385 Mr. Cowan: So, after paying the bridge toll, they would have, out of a shipment either to Cairo or Thebes, $3\frac{1}{2}$ cents left, $1\frac{1}{2}$ cents off five cents.

Mr. Barron: Well, assuming those figures are correct, that is so; but they only haul one car, while we have to handle six.

Mr. Cowan: Well, but at all events, three and one-half cents is what the net would be after they paid the bridge toll at Thebes or Cairo.

Mr. Barron: It is three cents less than their regular rate, whatever that will be.

Commissioner Harlan: Mr. Jeffery, is there a bridge toll at Thebes?

Mr. Jeffery: Yes, I think there is. It is a bookkeeping proposition, for the reason that the Iron Mountain and the Cotton Belt and one other road own the Bridge, and the Iron Mountain, for instance, gets one-third back of everything that goes over it.

Mr. Cowan: Let me ask at this point, Mr. Jeffery, however, it is a very expensive bridge, and you would not be making any money on your investment on one and one-half cents per 100 pounds.

386 Mr. Jeffery: I could not say about that.

Mr. Cowan: What did the bridge cost, do you know?

Mr. Jeffery: I haven't any idea.

Mr. Cowan: Now, you handle some carloads of lumber from stations on your line, where there are some small saw mills where you do not handle the logs at all, but just handle the lumber?

Mr. Barron: Yes, sir.

Mr. Cowan: In those case- you would haul the lumber, just one car?

Mr. Barron: Yes.

Mr. Cowan: Down to the junction point of delivery?

Mr. Barron: Yes.

Mr. Cowan: And get five cents per 100 pounds for it, while the railroad would take that and deliver it to Thebes or Cairo for the other part of the rate?

Mr. Barron: Yes, sir; in those instances that is true.

Mr. Cowan: Your rates generally on that line for everything including lumber are a differential higher than the junction point rate to the outgoing destinations on the Mississippi River. That is, it appears so here?

Mr. Barron: I do not think the classes are stated on here.

387 Mr. Cowan: No, but you stated a while ago that the rates were higher on points on your line than they are from junction points.

Mr. Barron: Yes, sir; they are.

Mr. Cowan: Your New York rate, however, is the same on cooperage to New York—New York is the same rate, and it is also the same to New Orleans from stations on your line as from Poplar Bluff?

Mr. Barron: Yes, sir.

Mr. Cowan: Is the cotton rate from points on your line the same as from the junction point?

Mr. Barron: No, sir, it is higher.

Mr. Cowan: How much higher; do you remember?

Mr. Barron: No, I do not remember.

Mr. Cowan: That will be shown by the tariff anyway?

Mr. Barron: Yes.

Mr. Cowan: That is all. I wanted to inquire of Mr. Glasgow if there has been any map or drawing of the track connections at Poplar Bluff, showing the location of the industries, the switch tracks and their connection with the Iron Mountain and the Frisco.

Mr. Glasgow: Nothing further than I have already offered in evidence.

388 Mr. Cowan: I did not look at it.

Mr. Glasgow: It did not show the terminal connections.

Mr. Cowan: I suggest in all these cases there ought to be a drawing to show the terminal connections.

Mr. Glasgow: What is the purpose of that?

Mr. Cowan: It enables the eye to see, better than a verbal description.

Mr. Glasgow: You will have a drawing showing your tracks from the mill to the railroad?

Mr. Barron: Yes, sir.

Mr. Coleman: Your cooperage rates from points on your line are the same as from junction points to New York and other points, are they not?

Mr. Barron: To New York and New Orleans they are the same.

Mr. Coleman: You do not add the two cent arbitrary?

Mr. Barron: We do on cooperage to everywhere except those two points.

Mr. Coleman: The rate on lumber carries an arbitrary of two cents from points on your line over the rate from junction points?

Mr. Barron: Yes, sir.

Mr. Coleman: The effect of that is to enable you to buy
389 from those little men on your line a good deal cheaper?

Mr. Barron: We do not buy from the little men.

Mr. Glasgow: What little men are you referring to?

Mr. Coleman: Haven't you some individual lumber men on the line who would sell, some men with pony lumber mills?

Commissioner Harlan: This witness said when they made a purchase of that sort it was a direct purchase by the cooperage company.

Mr. Barron: Of the Great Western Land Company. Well, the Brooklyn Cooperage Company has purchased some tracts of timber also.

Mr. Coleman: And the effect of that adjustment would be to let them buy it two cents cheaper?

Commissioner Harlan: This witness is talking about the purchase of land and you are referring to manufactured material.

Mr. Barron: We do not purchase any manufactured material.

Mr. Coleman: If they can add two cents on the lumber man's rate out, and make it the same on the cooperage rate, they can get two cents off his price, that is my point.

Mr. Glasgow: I would like to have the gentleman work that out a little more definitely.

390 Mr. Coleman: We will after lunch. You said you complied with all the safety appliance laws?

Mr. Barron: Yes, sir.

Mr. Coleman: And that you spent $6,500 to put ash pans on two engines?

Mr. Barron: No.

Mr. Glasgow: Let us be fair among ourselves.

Mr. Coleman: I wanted to know.

Mr. Barron: No, I said the expense of complying with the safety appliance acts amounted to anyhow $6,500.

Mr. Coleman: What did you do to comply with it?

Mr. Barron: Well, we put air brakes on; something like 115 or 120 vehicles.

Mr. Coleman: I see by this picture you have no air brakes on those cars at all.

Mr. Barron: No, you do not see anything of the kind.

Mr. Coleman: Well, show me them.

Mr. Barron: I am not going to show them. They are there all right; like the drummer's overcoat.

Mr. Glasgow: You find them.

Mr. Coleman: You cannot find them, either; they are not there.

391 Mr. Glasgow: That is a puzzle picture. You find the air brakes.

Mr. Coleman: How many ash pans did you put on these engines?

Mr. Barron: We did not put any ash pans on. I said that we had complied with the safety appliance acts down to the furnishing of the ash pans.

Mr. Coleman: That was all you did?

Mr. Barron: No, I did not say that was all we did.

Mr. Coleman: Well, we don't seem to connect up, for some reason.

Mr. Barron: I mean to say that our engines have got the ash pans that you can dump without having the fireman go underneath it. The equipment is fixed that way. It is also fixed with air brakes, and we put them on, and it cost something between $5,000 and $6,000 to do that thing alone. They are also equipped with the required steps and grab irons and hand brakes, and the tops of the box cars have got these running boards on.

Mr. Coleman: That is all.

Mr. Cowan: Just one question. The cooperage that is shipped from your manufacturing establishment principally goes
392 to New York and New Orleans?

Mr. Barron: Yes, sir; principally. It goes to other points but most of it goes to those two points.

Mr. Cowan: That is because the owner of the mill, or the practical owner, consumes the cooperage at the sugar manufacturing plants in the vicinity of those two places?

Mr. Barron: Yes, sir. Now, those cooperage rates were made in 1899, before the organization of the Butler County Railroad or the participation by the railroad in the rate, and they are the same now as they were then.

Examiner Burchmore: Where did those rates apply from then?

Mr. Barron: They applied from Linstead.

Examiner Burchmore: Well, but does not Linstead take the Poplar Bluff rate?

Mr. Barron: Yes, sir, and those rates are the same as the Poplar Bluff rates. They are the Poplar Bluff rates; that is what they are.

Commissioner Harlan: Is your railroad paying dividends?

Mr. Barron: No, sir, it has paid in the five years one dividend of four per cent, but it ought not to have paid that.

Commissioner Harlan: It could have paid it? It did pay it?

393 Mr. Barron: It had borrowed some money, and did not spend all that it had borrowed, and it had that surplus and paid a dividend with it, and afterwards it had to borrow more. We have had to borrow some $15,000 to $20,000 to pay our bills in the last two years.

Commissioner Harlan: You file your reports with the Commission, I believe?

Mr. Barron: Yes.

Commissioner Harlan: That shows your surplus account, if you have any?

Mr. Barron: Yes, sir.

Mr. Glasgow: Will you state, please, what is the population of Poplar Bluff?

Mr. Barron: About 8,000.

Mr. Glasgow: I want you also to state to the Commission whether this man Palmer that you spoke of, who made this contract or agreement with one of the roads for trackage—he sold out all his interests there to the Brooklyn Cooperage Company afterwards?

Mr. Barron: Mr. Palmer owned the land in 1899 and made that contract in his own name. In 1902 he sold all his land to the Brooklyn Cooperage Company.

394 Mr. Glasgow: So, at the time the contract was made which has been referred to, Palmer owned the lands?

Mr. Barron: Yes, sir.

Mr. Glasgow: And he afterwards sold those lands to the Brooklyn Cooperage Company?

Mr. Barron: Yes, sir.

Mr. Glasgow: Will you please tell us what is the width of the right of way of the Butler County Railroad?

Mr. Barron: 100 feet.

Mr. Glasgow: Have you had accidents on that road for which you have been — under the Missouri statute applicable to carriers?

Mr. Barron: Yes, sir.

Mr. Glasgow: How many?

Commissioner Harlan: We will not stop on the details of that. If you have been held, that covers the question. It is not necessary to go into detail.

Mr. Barron: Yes, sir, we have been held for that, for litigated contests.

Commissioner Harlan: You have so stated.

Mr. Glasgow: One more question. Your company is engaged in extending its road as the development requires in that

395 community?

Mr. Barron: Yes, sir. We have in contemplation at the present time the extension of the road ten miles south into Arkansas.

Mr. Glasgow: A further extension of the Butler County Railroad?

Mr. Barron: Yes, sir.

Commissioner Harlan: Did Mr. Palmer own that land in his own right or as trustee?

Mr. Barron: In his own right.

(Witness excused.)

Whereupon, at 1:00 P. M., a recess was taken until 2:00 P. M.

396 After Recess.

2:00 P. M.

Mr. Green: My name is Marcellus Green, of Jackson, Mississippi. I represent the Fernwood & Gulf. I do not exactly understand the status here. The controversy, as I understand it, is a controversy growing out of the rates on the west side of the river under similar circumstances, and my clients have been summoned

here by a notice in these proceedings, to which they are not a party, and I am really embarras-ed to know exactly the status that I occupy, and I would be glad if your Honor would advise me.

Commissioner Harlan: Well, you have been made a party to the investigation which the Commission is making, and have been served with a notice.

Mr. Green: We are, then, considered as being parties defendant to this controversy on the west side of the river?

Commissioner Harlan: Of course you are only interested where you are, and with what you are doing there.

Mr. Green: There is no controversy on the east side of the river between the main lines and——

Commissioner Harlan: Are you receiving allowances?

Mr. Green: We are getting a published division on the
397 through rates filed with the Commission.

Commissioner Harlan: That is the controversy here. You had better be here to justify your case.

Mr. Green: There are hundreds of people interested in these several proceedings. I did not know until yesterday on a telegram from my client, who found out that he was summoned here to be present and answer. Now, is it not possible for your Honor to so adjust this matter that all of us need not be held dancing in attendance here from day to day?

Commissioner Harlan: Have you any suggestion to make as to how it is to be done?

Mr. Green: Yes, sir, I would make this suggestion, that your Honor take the list of the several carriers or companies in controversy and then assign a day for the hearing of so many on this day and so many on the next day and so many on the next day.

Commissioner Harlan: We cannot spend our time in this way. We are dealing with the commerce of the country, and we have got to move, and you have got to be here to present your case as it is called. Now, I am doing the best I can to represent all interests——

Mr. Green: I see the difficulties in your way, but would
398 it not be possible for our people—we are really outside of the controversy on this west side, and we have no interest in it——

Commissioner Harlan: I direct your attention again to the suggestion I have just made. The Commission does not understand you are interested in the situation west of the river. The Commission is interested on the east side of the river. You are getting an allowance, and that is what the Commission wants to know about.

Mr. Green: Of course every railroad is getting an allowance in that sense.

Commissioner Harlan: All I can say to you is perhaps to indicate that the east of the river line perhaps will not be called until Monday. Now, if they are called—I do not think they will be called—but your judgment about that is perhaps as good as mine. We are going to push this thing as rapidly as possible. If the

eastern lines are called before Monday, they will have to be here. You know who they are, and you might arrange with them as to who will be here tomorrow in case they are called. I do not think they will be called. Perhaps we can say that the east of the river lines will not be called until Monday.

399 Mr. Brady. That was the question I was about to ask on behalf of the road I represent.

Crossett Railway Company.

Mr. Gaughan: Mr. Trieschmann will take the stand.

A. TRIESCHMANN was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: State your name.

Mr. Trieschmann: A. Trieschmann.

Commissioner Harlan: Where do you reside?

Mr. Trieschmann. Crossett, Arkansas.

Commissioner Harlan: In what business are you engaged?

Mr. Trieschmann: Engaged in the sawing of lumber, and as auditor and traffic manager of the Crossett Railway Company.

Commissioner Harlan: For what lumber company do you sell lumber?

Mr. Trieschmann: Crossett Lumber Company.

Commissioner Harlan: Where is its mill?

400 Mr. Trieschmann: At Crossett, Arkansas.

Commissioner Harlan: Where is its general office?

Mr. Trieschmann: At Crossett.

Commissioner Harlan: Does it lumber its own forests?

Mr. Trieschmann: It does.

Commissioner Harlan: How long has the Crossett Lumber Company been engaged in business at Crossett?

Mr. Trieschmann: Eight years.

Commissioner Harlan: Have you been with them all that time?

Mr. Trieschmann: Not at Crossett all that time. I think about seven years.

Commissioner Harlan: Are they interested elsewhere as lumber people?

Mr. Trieschmann: No, sir—now, do you mean the stockholders or the company?

Commissioner Harlan: Well, did the company succeed any partnership?

Mr. Trieschmann: No.

Commissioner Harlan: What is the significance of your inquiry, then?

Mr. Trieschmann: The stockholders have interests in other

401 companies, but the Crossett Lumber Company has not.

Commissioner Harlan: Who are the large stockholders of your company?

Mr. Trieschmann: Mr. E. S. Crossett and Dr. J. W. Watzek and C. W. Gates; they are the large stockholders.

Commissioner Harlan: Are they engaged elsewhere and in other lumber companies?

Mr. Trieschmann: They are.

Commissioner Harlan: Where?

Mr. Trieschmann: They are engaged in the lumbering business at Fordyce, Arkansas; Lockhart, Alabama, and in Oregon; I do not know what place in Oregon.

Commissioner Harlan: What is the extent of their forest near Crossett; how many acres of timber land do they own?

Mr. Trieschmann: The fee simple lands aggregate something like 200,000 acres, and their timber deeds that are part of the holdings but not fee simply lands.

Commissioner Harlan: How many such acres have they; timber deeds? Was that included in the 200,000?

Mr. Trieschmann: No; I should judge there is close to 50,000 acres; I am speaking in round figures and not accurately. I do not know.

402 Commissioner Harlan: Well, for the most part, do they lie north and to the east of Crossett?

Mr. Trieschmann: They lie north and south and west, and some east, but not a great deal east.

Commissioner Harlan: Where is the Crossett Lumber Company's mill?

Mr. Trieschmann: It is at Crossett.

Commissioner Harlan: And where is it now engaged in timbering?

Mr. Trieschmann: At Crossett.

Commissioner Harlan: Do you mean to say there is lumbering going on right around Crossett, where you are getting the logs?

Mr. Trieschmann: Do you mean the logging operations?

Commissioner Harlan: Yes, the logging operations.

Mr. Trieschmann: The logging operations at the present time are about 20 miles north of Crossett.

Commissioner Harlan: How do the logs get to the mill at Crossett?

Mr. Trieschmann: They are hauled over the Crossett Railway.

Commissioner Harlan: Tell us about that railway; when was it organized?

403 Mr. Trieschmann: The first organization I think was in 1905. I will have to go to the records for that, because my connection has only been two years, and I would not know.

Commissioner Harlan: You think it was incorporated in 1905?

Mr. Trieschmann: I think the first incorporation was in 1905.

Commissioner Harlan: Had the road been built prior to the incorporation of the railroad company?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: Built by the Crossett Lumber Company?

Mr. Trieschmann: Yes.

Commissioner Harlan: In 1905, before the railroad was chartered, what was the distance from which logs were being hauled to the mill at Crossett?

Mr. Trieschmann: Something like eight or ten miles. I do not remember that, either; it could not have been less, I think, though, than ten miles. That, however, does not mean that the first year's logging was done ten miles away from the mill, because the first year's logging was probably done within two or three miles.

Commissioner Harlan: Then since the incorporation of the railroad company, the logging operation has moved farther to the north?

404 Mr. Trieschmann: Yes, sir.

Commissioner Harlan: And the haul is now about 20 miles?

Mr. Trieschmann: About 20 miles.

Commissioner Harlan: What is the capital stock of the Crossett Lumber Company?

Mr. Trieschmann: It is $25,000.

Commissioner Harlan: Who owns that stock?

Mr. Trieschmann: It is owned practically by the stockholders of the Crossett Lumber Company.

Commissioner Harlan: Substantially the same investment?

Mr. Trieschmann: Substantially the same.

Commissioner Harlan: Do you know what the cost of that road was?

Mr. Trieschmann: The cost of the original road was $30,000.

Commissioner Harlan: For how many miles?

Mr. Trieschmann: Ten miles.

Commissioner Harlan: And subsequently ten additional miles were built?

Mr. Trieschmann: Yes, sir; but not by the railroad company. The ten additional miles is a leased track, the Crossett Railway Company is paying a lease for the use of the ten miles beyond

405 the original ten miles.

Commissioner Harlan: Let us go back to the first. The Crossett Lumber Company built ten miles of road before the railroad was organized?

Mr. Trieschmann: Yes.

Commissioner Harlan: To whom does that belong now?

Mr Trieschmann: The Crossett Railway Company.

Commissioner Harlan: When was it transferred to them?

Mr. Trieschmann: I think it was in 1905.

Commissioner Harlan: Shortly after it was incorporated?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: Did the Crossett Railway Company pay anything for that road?

Mr. Trieschmann: Yes.

Commissioner Harlan: What did it pay?

Mr. Trieschmann: Stock.

Commissioner Harlan: To what amount?

Mr. Trieschmann: $30,000.

Commissioner Harlan: What is the capital stock of the road?

Mr. Trieschmann: I mean $25,000. I got my figures wrong.

Commissioner Harlan: For that amount in stock, the railroad

company acquired fee simple title to the right of way of
406 about ten miles of railroad?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: And with the track and steel and equipment?

Mr. Trieschmann: Yes, sir, it included two engines.

Commissioner Harlan: It included two engines?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: No other equipment?

Mr. Trieschmann: No other equipment at that time, excepting working equipment, such as hand cars.

Commissioner Harlan: Are we to understand that those ten miles only cost $25,000 to build in the beginning?

Mr. Trieschmann: I really do not know what it cost. I would have to look at the original records. I have no knowledge of that whatever.

Commissioner Harlan: What was the northern terminus of the road at that time?

Mr. Trieschmann: The northern terminus of the road at that time was what we call Stephens.

Commissioner Harlan: And was that ten miles away?

Mr. Trieschmann: Yes, about ten miles.

Commissioner Harlan: You say after the road was incor-
407 porated, ten additional miles were constructed?

Mr. Trieschmann: Not at one time.

Commissioner Harlan: But altogether?

Mr. Trieschmann: Altogether, up to the present time, ten additional miles have been constructed.

Commissioner Harlan: Who built that additional road?

Mr. Trieschmann: The Crossett Lumber Company built that ten miles of additional road.

Commissioner Harlan: Who owns this now?

Mr. Trieschmann: The Crossett Lumber Company.

Commissioner Harlan: By whom was that mileage built? Did the Crossett Lumber Company do it under a contract?

Mr. Trieschmann: I think most of it was done under contract? I really don't know about that.

Commissioner Harlan: As a matter of fact, was not that built by the Crossett Railroad Company for the Crossett Lumber Company?

Mr. Trieschmann: No, it was not.

Commissioner Harlan: Who owns that track at this time?

Mr. Trieschmann: The Crossett Lumber Company.

Commissioner Harlan: Who operates it?

Mr. Trieschmann: The Crossett Railroad Company operates it.

408 Commissioner Harlan: Under what sort of a contract?

Mr. Trieschmann: Under a lease.

Commissioner Harlan: Have you a copy of that?

Mr. Trieschmann: It is on file with the Commission.

Commissioner Harlan: Very well.

Mr. Gaughan: Will that be a part of this record?

Commissioner Harlan: If it is on file, it will be part of the record.

Mr. Gaughan: I would like to have it understood that all the contracts and papers we have on file with the Commission be included in the record.

Commissioner Harlan: Very well; it will be so understood. You are sure that is filed with the Commission?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: When was it filed?

Mr. Trieschmann: I think it was filed about 30 days ago, at a request from the Commission.

Commissioner Harlan: Has the railroad company any share in that lease?

Mr. Trieschmann: They have not.

Commissioner Harlan: What is the character of the road first constructed to Stephens: what is the character of the roadbed
409 and rails.

Mr. Trieschmann: It is 45 pound rail, and it is in first class order.

Commissioner Harlan: Well ballasted?

Mr. Trieschmann: It is well ballasted.

Commissioner Harlan: What about the additional ten miles.

Mr. Trieschmann: It is of the same character.

Commissioner Harlan: Same kind of rails?

Mr. Trieschmann: Same kind of rails.

Commissioner Harlan: Who are the officers of the Crossett Railway Company?

Mr. Trieschmann: Mr. C. W. Gates is president and E. W. Gates is vice-president and myself, traffic manager and auditor.

Commissioner Harlan: Are those gentlemen also officers of the lumber company?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: What is their office in the lumber company?

Mr. Trieschmann: Mr. C. W. Gates is president, E. W. Gates is manager, and myself, assistant manager.

Commissioner Harlan: Do each of you get a salary from
410 the railway company?

Mr. Trieschmann: We do not.

Commissioner Harlan: You get a salary only from the lumber company?

Mr. Trieschmann: Yes.

Commissioner Harlan: Have you any clerks in the employ of the railroad company?

Mr. Trieschmann: Yes.

Commissioner Harlan: How many?

Mr. Trieschmann: One.

Commissioner Harlan: What is his salary?

Mr. Trieschmann: His salary is $100 per month.

Commissioner Harlan: Paid by the railroad company?

Mr. Trieschmann: Yes.

Commissioner Harlan: Does he do any work for the lumber company?

Mr. Trieschmann: Yes.

Commissioner Harlan: What work does he do for the lumber company?

Mr. Trieschmann: It is just clerical work of various kinds.

Commissioner Harlan: Is he paid by the lumber company also?

411 Mr. Trieschmann: Yes, sir.

Commissioner Harlan: How much?

Mr. Trieschmann: It is a joint salary. This $100 per month is supposed to cover any and all clerical work of the one man, but the clerical work of the railroad company is divided between two or three men.

Commissioner Harlan: I do not quite understand it. There is one man that does the work and one man gets the salary?

Mr. Trieschmann: No, one man does not do all the work.

Commissioner Harlan: My question was how many clerks you had, and you said one, and I asked what salary he got, and you said $100 a month.

Mr. Trieschmann: Well, he does not get that whole $100.

Commissioner Harlan: Well, what part does he get?

Mr. Trieschmann: Well, $100 is paid by the railroad company for the clerical work.

Commissioner Harlan: And the railroad company appropriates that amount every month for its clerical work?

Mr. Trieschmann: Yes; that is——

Commissioner Harlan: Is that sum paid to one or more clerks?

Mr. Trieschmann: That is paid to more than one.

412 Commissioner Harlan: Give the names of the clerks who have got that $100 last month.

Mr. Trieschmann: Byron Kemp.

Commissioner Harlan: How much did he get?

Mr. Trieschmann: I don't know exactly how that is divided unless I would look up the record.

Commissioner Harlan: Was it divided among two or three or four, or how many clerks; do you know that?

Mr. Trieschmann: It is just for the clerical service that is performed.

Commissioner Harlan: It is the appropriation, then, by the railroad company for all its clerical work?

Mr. Trieschmann: Yes.

Commissioner Harlan: And that work is done by clerks otherwise in the employ of the lumber company?

Mr. Trieschmann: Yes.

Commissioner Harlan: And they are also paid by the lumber company?

Mr. Trieschmann: They are; yes, sir.

Commissioner Harlan: So that this $100 as divided among them, is in addition to their monthly salary from the lumber company? I mean, it is paid by the railroad company?

413 Mr. Trieschmann: Yes.

Commissioner Harlan: But it is in addition to what they regularly receive from the lumber company?

Mr. Trieschmann: Yes.

Commissioner Harlan: Do they receive from the lumber company a salary that is identical with the salaries of other clerks in the lumber company that do not do any work for the railroad company?

Mr. Trieschmann: How was that question, again? I do not beiieve I understand it.

Commissioner Harlan: How many clerks has the lumber company?

Mr. Trieschmann: I could not tell you.

Commissioner Harlan: Well, quite a number?

Mr. Trieschmann: About 12 or 15.

Commissioner Harlan: And they have a salary that is more or less an average fixed salary?

Mr. Trieschmann: Yes.

Commissioner Harlan: These three or four clerks that do railroad work, do they get more than the other clerks, counting what they get from the railroad company as part of their monthly earnings?

414 Mr. Trieschmann: Why, yes; they do, that is extra.

Commissioner Harlan: That is the point I wanted to get at.

Mr. Trieschmann: Yes.

Commissioner Harlan: They get the regular average salary from the lumber company, and then get this extra salary from the railroad company?

Mr. Trieschmann: Yes.

Commissioner Harlan: What other employees of the railroad company are there?

Mr. Trieschmann: There are none excepting the operating crews.

Commissioner Harlan: How many——

Mr. Trieschmann: About 40 men.

Commissioner Harlan: The railroad company owns only two locomotives?

Mr. Trieschmann: That is all.

Commissioner Harlan: It has some logging cars?

Mr. Trieschmann: They lease the logging cars.

Commissioner Harlan: From whom?

Mr. Trieschmann: The lumber company.

Commissioner Harlan: How many?

Mr. Trieschmann: About 80 I think is correct.

415 Commissioner Harlan: Under written contracts?

Mr. Trieschmann: There is a contract on file for that, I think. That was done before I knew anything about the railroad business. I do not know whether that contract is on file or whether it is verbal.

Commissioner Harlan: What is the rent paid by the railroad to the lumber company?

Mr. Trieschmann: I think the total aggregate is something like $22,000 a year.

Commissioner Harlan: How much is it a month?

Mr. Trieschmann: Well, it would be one-twelfth of that.

Commissioner Harlan: Don't you pay $2,500 a month to the lumber company for those cars?

Mr. Trieschmann: The records will show.

Commissioner Harlan: But you do not know?

Mr. Trieschmann: No, I would not attempt to say, without looking at the records. The annual report contains that exactly, and it is on file with the Commission.

Mr. Gaughan: If that contract is in writing, and is not on file with the Commission, we would like to have permission to make it part of this record.

Commissioner Harlan: Very well; if you will just have
416 a copy made and forward it to the Commission.

Mr. Gaughan: I do not know whether it is in writing or not.

Mr. Trieschmann: If it is on file, we will have it copied for the record.

Commissioner Harlan: Do the men who compose the train crews do any work other than running those trains?

Mr. Trieschmann: Those 40 men also include the track crews for the maintenance of the railroad.

Commissioner Harlan: Do they do any other work than maintain the track and operate the trains?

Mr. Trieschmann: No, sir.

Commissioner Harlan: Do they load or unload the trains?

Mr. Trieschmann: Yes; they perform all the services in connection with the railroad end of the work.

Commissioner Harlan: Do they load the logs on the cars?

Mr. Trieschmann: No, they do not load the logs on the cars.

Commissioner Harlan: Who does that?

Mr. Trieschmann: The Crossett Lumber Company.

Commissioner Harlan: With their employees?

Mr. Trieschmann: With their employees.

Commissioner Harlan: Who unloads them at the mill?
417 Mr. Trieschmann: The railroad employees.

Commissioner Harlan: Into a pond?

Mr. Trieschmann: Yes.

Commissioner Harlan: Now, you said the lumber company holds about 200,000 acres of land. Is there any timber uncut between Crossett and Stephens at this time?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: Belonging to the lumber company?

Mr. Trieschmann: Well, I am not in a position to say who owns that timber. There is quite a lot of timber on the north main line that is still uncut. Some is owned by the Crossett Lumber and some by other individuals.

Commissioner Harlan: Is there any lumbering going on there now south of Stephens?

Mr. Trieschmann: Nothing more than probably tie making and piling.

Commissioner Harlan: That is done by outside interests?

Mr. Trieschmann: Some done by outside interests and some done by ourselves.

Commissioner Harlan: What is the general character of the country; are there any farms there?

Mr. Trieschmann: There are a great many farms at the
418 present time in that part of the country.

Commissioner Harlan: South of Stephens?

Mr. Trieschmann: Yes, south of Stephens. I cannot tell how many, but quite a number of farms in that territory; not directly on the railroad, but adjoining the railroad.

Commissioner Harlan: Well, where is the Crossett Lumber Company now doing the major part of its logging?

Mr. Trieschmann: About 20 miles north of Crossett.

Commissioner Harlan: Where is that with reference to Stephens?

Mr. Trieschmann: That is about 10 miles north.

Commissioner Harlan: In other words, at the end of this additional ten miles that have been built?

Mr. Trieschmann: Yes.

Commissioner Harlan: Is any one else doing any lumbering about the end of this extension of ten miles?

Mr. Trieschmann: Yes.

Commissioner Harlan: Who is doing that?

Mr. Trieschmann: I will have to go to the records to find the names. There are probably half a dozen different parties. I would like——

Commissioner Harlan: Are they companies or individuals?

419 Mr. Trieschmann: Some are companies and some are individuals.

Commissioner Harlan: Are those large operations or small?

Mr. Trieschmann: They are small at the present time.

Commissioner Harlan: Is the Crossett Lumber Company interested directly or indirectly in those operations?

Mr. Trieschmann: They are not.

Commissioner Harlan: Do you do the hauling of the logs?

Mr. Trieschmann: We do.

Commisioner Harlan: To what mill?

Mr. Trieschmann: Well, that product is not hauled to any mill. That product is hauled as it is put on the cars there, either in the form of logs, staves or piling. Let me correct one statement. We do haul logs to another mill at Crossett, the mill which we lease to an outside party.

Commissioner Harlan: The mill that the Crossett Lumber Company owns?

Mr. Trieschmann: Owns and leases to another party.

Commissioner Harlan: Who is now running that mill?

Mr. Trieschmann: The Garretson & Greacon Lumber Company of St. Louis.

Commissioner Harlan: Do they have a large output?

420 Mr. Trieschmann: About 20,000 to 30,000 feet per day.

Commissioner Harlan: Where do their logs come from?

Mr. Trieschmann: From the Crossett Lumber Company.

Commissioner Harlan: Do you mean from the lands of the Crossett Lumber Company?

Mr. Trieschmann: Largely from the lands; yes.

Commissioner Harlan: Who cuts those logs?

Mr. Trieschmann: The Crossett Lumber Company.

Commissioner Harlan: Is that the only outside shipper of logs into Crossett?

Mr. Trieschmann: No, sir.

Commissioner Harlan: Who else ships logs?

Mr. Trieschmann: There are various parties, and I will get up a statement showing the number of cars that these different parties ship.

Commissioner Harlan: From what lands do their logs come?

Mr. Trieschmann: Individual holdings; I would not know the names.

Commissioner Harlan: Is that a large movement?

Mr. Trieschmann: In the aggregate I presume it is probably 50 to 75 cars so far this year.

Commissioner Harlan: Where do those logs go?

421 Mr. Trieschmann: Various places; some are shipped north; some are shipped to Little Rock and various places, for wagon industries largely.

Commissioner Harlan: What do you regard as the point of origin, from a transportation point of view, of those logs?

Mr. Trieschmann: We bill them from Stephens.

Commissioner Harlan: Through to destination?

Mr. Trieschmann: Through to destination; where there are joint through rates.

Commissioner Harlan: What charge do you make up to Stephens?

Mr. Trieschmann: Up to Stephens?

Commissioner Harlan: Yes.

Mr. Trieschmann: That is all in the through rate.

Commissioner Harlan: So the through rate extends to Stephens and back to the log?

Mr. Trieschmann: Back to the place where we have leased.

Mr. Gaughan: Back to the point where the Crossett Railway Company takes charge of them.

Commissioner Harlan: Is there any logging road that joins the Crossett Railroad at any point?

Mr. Trieschmann: I believe not.

422 Commissioner Harlan: Counsel has just said that the point of origin of these logs you have just been speaking of is the point where the Crossett Railroad Company takes charge of them.

Mr. Trieschmann: I thought you meant outside of the Crossett Lumber Company.

Mr. Gaughan: I think the witness misunderstands. Are there not

spur tracks leading out into the timber that the Crossett Lumber Company assembles the logs on the main line from?

Mr. Trieschmann: Yes.

Mr. Gaughan: That is what he has reference to.

Mr. Trieschmann: Yes. I did not know that was the question.

Commissioner Harlan: When did the railway company undertake to operate the ten miles of additional line you have described north of Stephens?

Mr. Trieschmann: I think the lease for the first four miles has possibly been in effect one or two years, the records with the Commission will show that. The second lease for an additional four miles has just taken effect a short time ago.

423 Commissioner Harlan: A matter of a few weeks?

Mr. Trieschmann: Well, more than that; several months.

Commissioner Harlan: If you will send the Commission a copy of that contract or lease. I suppose it is another document, is it not?

Mr. Trieschmann: Yes. Well, I think that is on file with the Commission at the present time.

Commissioner Harlan: Very well. Now, you described 20 miles of railroad operated by the Crossett Company.

Mr. Trieschmann: Well, it should be 18.

Commissioner Harlan: 18?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: And in addition, are there spur tracks or logging roads which run into that track?

Mr. Trieschmann: Yes.

Commissioner Harlan: How many such spur tracks are there, or logging roads?

Mr. Trieschmann: I should judge ten miles; just as a guess.

Commissioner Harlan: And by whom are they owned?

Mr. Trieschmann: They are owned by the Crossett Lumber Company.

424 Commissioner Harlan: Who operates them?

Mr. Trieschmann: The Crossett Lumber Company.

Commissioner Harlan: With what equipment?

Mr. Trieschmann: Their own equipment.

Commissioner Harlan: Including an engine?

Mr. Trieschmann: Including their own engines.

Commissioner Harlan: How many cars have they on those ten miles of logging road?

Mr. Trieschmann: How many have they?

Commissioner Harlan: Yes, the Crossett Lumber Company.

Mr. Trieschmann: I do not know how many, they have some, but the Crossett Railway cars are used largely on those tracks.

Commissioner Harlan: Are those logging roads the roads that reach these other outside people that send logs and staves into Crossett over your railroad?

Mr. Trieschmann: Some are and some are hauled by teams to the main line where we built switches for them to load their cars.

Commissioner Harlan: Now, who does any hauling by wagon?

Mr. Trieschmann: Various parties.

Commissioner Harlan: For what distance?

Mr. Trieschmann: That I don't know. I presume anywhere from one to four or five miles.

425 Commissioner Harlan: Do you haul the logs or staves?

Mr. Trieschmann: Both.

Commissioner Harlan: Do you know how large a tonnage that is?

Mr. Trieschmann: I think it has been about 65 to 75 cars in the last twelve months. It has just recently developed.

Commissioner Harlan: Do the logging roads owned by the railway company carry lumber in any form, either in logs or staves, that did not come from the forest of the Crossett Lumber Company?

Mr. Trieschmann: I am not in a position to say. I am not sure about that.

Commissioner Harlan: Well, what is your best opinion?

Mr. Trieschmann: I think there is some traffic that is hauled over these logging lines before it is delivered to the railway company.

Commissioner Harlan: Have you some special person or company in mind who is doing any lumbering beyond there, and who uses those logging roads?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: Well, who?

426 Mr. Trieschmann: There is the Hampton Stave Company, for Fordyce, Arkansas.

Commissioner Harlan: Where do they get their raw material?

Mr. Trieschmann: They buy it from individuals out there.

Commissioner Harlan: Are staves made in mills?

Mr. Trieschmann: No, sir, not in our mill. They have stave mills for that purpose.

Commissioner Harlan: Does this man have a stave mill whom you have just mentioned?

Mr. Trieschmann: They get out the hewed products; what they call stave bolts, and those are transported to the mills.

Commissioner Harlan: Are there any points on your line other than Stephens where there is any population?

Mr. Trieschmann: There are logging camps which constitute a population of about 500 to a camp.

Commissioner Harlan: How many such camps are there?

Mr. Trieschmann: We have two such camps on the line.

Commissioner Harlan: And they are employees of the Crossett Lumber Company?

Mr. Trieschmann: In the main they are.

Commissioner Harlan: Does the lumber company operate company stores?

427 Mr. Trieschmann: They do.

Commissioner Harlan: Are there any outside stores there to supply the lumber camps?

Mr. Trieschmann: Not directly in the camps, but nearby.

Commissioner Harlan: Are there any towns or post offices?

Mr. Trieschmann: I am not in a position to say about any post offices.

Commissioner Harlan: Well, any sort of towns.

Mr. Trieschmann: No, there are no towns out there. I will take that back. There is one town that we supply, that is within one mile of the railroad.

Commissioner Harlan: What do you haul there?

Mr. Trieschmann: We haul merchandise for the people who live there.

Commissioner Harlan: General merchandise?

Mr. Trieschmann: General merchandise.

Commissioner Harlan: How large a town is that?

Mr. Trieschmann: It is just a small country post office, probably two or three stores. I have never been there, so I am not posted.

Commissioner Harlan: Do you run passenger trains?

Mr. Trieschmann: We do not.

428 Commissioner Harlan: Do you carry mail or express?

Mr. Trieschmann: We do not.

Commissioner Harlan: This traffic to the town which you have spoken of, I suppose, is very small?

Mr. Trieschmann: Comparatively small; yes, sir.

Commissioner Harlan: It is all a local movement from Crossett, or do you have any through traffic?

Mr. Trieschmann: We have some through traffic, but that is comparatively small.

Commissioner Harlan: Have you through rates on general merchandise?

Mr. Trieschmann: Yes.

Commissioner Harlan: Class rates?

Mr. Trieschmann: Class and commodity rates.

Commissioner Harlan: How long have they been in?

Mr. Trieschmann: They have been on file for six months, I should say. The tariff is on file with the Commission.

Commissioner Harlan: What was the total tonnage of your railroad for the last fiscal year?

Mr. Trieschmann: That is on file with the Commission. I have not refreshed my memory with those figures.

Examiner Burchmore: Approximating 5,000 carloads?

429 Mr. Trieschmann: Well, I think it is a little less than that; approximately a little over 4,000; between 4,000 and 5,000.

Commissioner Harlan: What percentage was logs from the Crossett Lumber Company?

Mr. Trieschmann: I should judge between 90 and 95 per cent.

Commissioner Harlan: And what percentage was logs or staves manufactured from the forest belonging to the Crossett Lumber Company?

Mr. Trieschmann: About the same per cent.

Commissioner Harlan: You do not quite mean that, do you?

Mr. Trieschmann: Maybe I did not get your question right?

Commissioner Harlan: You say 95 per cent was lumber from the Crossett Lumber Company. That leaves five per cent unaccounted for. Out of the five per cent remaining, how much con-

sisted of logs and staves that had been cut and manufactured by other persons from the land of the Crossett Lumber Company?

Mr. Trieschmann: The entire five per cent; that is, I am just guessing at those percentages.

Commissioner Harlan: Those are approximations?

Mr. Trieschmann: Those figures are all on file with the
430 Commission in detail.

Commissioner Harlan: You do not include this general merchandise at all in your figures?

Mr. Trieschmann: Yes, that is included.

Commissioner Harlan: What percentage of the whole was that?

Mr. Trieschmann: The general merchandise?

Commissioner Harlan: Yes.

Mr. Trieschmann: A very small per cent; probably three or four hundred thousand pounds of that kind of merchandise in twelve months.

Commissioner Harlan: Of that merchandise, how much was to the Crossett Lumber Company's stores and camps?

Mr. Trieschmann: That is in addition to what I gave you.

Examiner Burchmore: With reference to the construction of this road north of Stephens, there is filed with the Commission a copy of a contract entered into in 1906 by the Rock Island Company, the Crossett Railroad Company and the Crossett Lumber Company, which recites that the railway company, meaning the Crossett Railway Company, is, at the request of the lumber company, building a line of railway from Crossett, Arkansas, in a northeasterly direction to Stephens, Arkansas, a distance of 6½ miles, and from
431 Stephens, Arkansas, in a northeasterly direction, a distance of 9½ miles. When completed, said railway's main line will be 16 miles in length. One of the provisions of the contract is that the Crossett Railway Company covenants and agrees with all speed and despatch to complete its railway from Crossett in a northeasterly direction to Stephens, and from Stephens in a northeasterly direction for 9½ miles. With those provisions in this contract read, is your recollection changed so you would now say that the railway beyond Stephens was constructed by the Crossett Railway Company, rather than by the lumber company?

Mr. Trieschmann: I said it was constructed by the lumber company.

Examiner Burchmore: This contract seems to say it was constructed by the Crossett Railway Company.

Mr. Trieschmann: Well, I am not familiar with the details of that contract.

Examiner Burchmore: I have just read that into the record.

Mr. Trieschmann: It is on record for itself.

Examiner Burchmore: After the construction of this line from Crossett to Stephens it was operated—that is, after 1905—by the Crossett Railway Company, and the line beyond Stephens
432 was operated for a time by the lumber company?

Mr. Trieschmann: Yes, sir.

Examiner Burchmore: In 1909 or 1910 the Crossett Railway

Company took over the operation of a portion of the line north of Stephens.

Mr. Trieschmann: Four miles.

Examiner Burchmore: What change of conditions or circumstances explains this difference in the operation? Why did the railway subsequently take over the additional mileage, if you know any explanation?

Mr. Trieschmann: Well, I do not know what the explanation was, other than to get the operations under the railroad management.

Examiner Burchmore: I might ask the question a little differently. Why, in the beginning, was the line beyond Stephens operated by the lumber company instead of by the railroad company as one operation?

Mr. Trieschmann: I am not posted to say as to just why that was done.

Commissioner Harlan: Let me ask at this point, is it not true that the operation of this track by the railroad company followed the lumbering as the lumbering went farther back——

433 Mr. Trieschmann: That is true.

Commissioner Harlan: Did not the railroad company take up the operation of the line? You say that is true?

Mr. Trieschmann: That is true.

Commissioner Harlan: Leaving the lumber company to operate the rest of the mileage that went into the forest?

Mr Trieschmann: Yes.

Commissioner Harlan: Why was that so? Why was it so arranged?

Mr. Trieschmann: Well, in getting out the timber, it is hard to determine just what direction you want the line to take. The railroad company did not take over the railroad; it did not lease it until the permanent line had been established, and subsequently would buy it as a part of the main line.

Commissioner Harlan: But this additional ten miles you have described has never been changed, as I understand it, since it was first constructed?

Mr. Trieschmann: It was not all constructed at the same time in the northerly direction.

Commissioner Harlan: But it never was a movable line?

Mr. Trieschmann: No, sir.

434 Commissioner Harlan: Part of the time a portion of that line was operated by the lumber company?

Mr Trieschmann: Yes.

Commissioner Harlan: And the rest by the railroad company?

Mr. Trieschmann: Yes.

Commissioner Harlan: So it was not a question as to being a movable line; the lumber company simply did not turn that part over to the railroad company. Now, why not?

Mr. Trieschmann: I do not know as I can give you an explanation of that. That is out of my jurisdiction. I do not know why that was done.

Examiner Burchmore: Some parties not connected with the Crossett Lumber Company have been carrying on outside logging operations in this region, and you say on land that does not belong to the Crossett Lumber Company.

Mr. Trieschmann: Yes, sir.

Examiner Burchmore: Does the Crossett Lumber Company own the stumpage rights on that land or any of it?

Mr. Trieschmann: It might own some, but there is a great deal of product handled that it does not. Where the Crossett Lumber Company owns the stumpage, they would do their own operations.

Examiner Burchmore: Is there any town at Stephens? I
435 did not understand you to say that there was.

Mr. Trieschmann: There is no town there, except a mercantile establishment.

Examiner Burchmore: Is that mercantile establishment operated by the Crossett Lumber Company?

Mr. Trieschmann: It is not.

Examiner Burchmore: It has no relation to it?

Mr. Trieschmann: No relation whatever.

Examiner Burchmore: Are there any considerable number of stores at Crossett?

Mr. Trieschmann: Just one store at Crossett.

Examiner Burchmore: That is the company store?

Mr. Trieschmann: The company store.

Examiner Burchmore: But there is a store at Stephens which is not a company store?

Mr. Trieschmann: Yes.

Examiner Burchmore: And they compete?

Mr. Trieschmann: And they compete.

Examiner Burchmore: What rate does the storekeeper at Stephens pay to get his merchandise from the wholesaling points?

Mr. Trieschmann: There is a through rate published,
436 which tariff is on file, and from points where there are no through rates published, the local rate, as filed with the Arkansas Commission, is charged.

Examiner Burchmore: What is that through rate; that is to say, is that through rate higher than the rate to Crossett?

Mr. Trieschmann: No, sir; I think not.

Examiner Burchmore: The same rate?

Mr. Trieschmann: I think it is the same rate. The tariff will show for itself.

Examiner Burchmore: The lumber company maintains commissaries up in the woods?

Mr. Trieschmann: Yes.

Examiner Burchmore: What freight charges, if any, does the lumber company pay on its supplies for those commissaries?

Mr. Trieschmann: The published Arkansas rate.

Examiner Burchmore: Up to Crossett, or beyond Crossett?

Mr. Trieschmann: Beyond Crossett.

Examiner Burchmore: On the Crossett Railway?

Mr. Trieschmann: Yes, sir.

1585

Examiner Burchmore: Where there are through rates of freight, it pays the through rate, however?

437 Mr. Trieschmann: If the shipments are handled in that way.

Examiner Burchmore: If the shipments are handled in that way, it is customary to bill them locally to the junction point?

Mr. Trieschmann: No; they are billed through from the shipping point, if it is a commodity that can be handled in that way.

Examiner Burchmore: Has your company published and filed with the Interstate Commerce Commission a tariff of local fares between Crossett and Stephens?

Mr. Trieschmann: Yes, sir, on interstate traffic.

Examiner Burchmore: Class rates?

Mr. Trieschmann: Class rates.

Examiner Burchmore: Do you carry any passengers?

Mr. Trieschmann: We do not.

Examiner Burchmore: Do not people ride on your trains?

Mr. Trieschmann: Employees, and possibly some others; I am not in a position to say about that. I presume there are.

Examiner Burchmore: What other trunk lines does the Crossett Railway connect with, in addition to the Rock Island System?

Mr. Trieschmann: With the Iron Mountain Railway, and

438 the A. L. & G.

Examiner Burchmore: The Arkansas, Louisiana & Gulf?

Mr. Trieschmann: The Arkansas, Louisiana & Gulf.

Examiner Burchmore: What percentage of its outbound tonnage on lumber goes out over each of these companies, in a general way?

Mr. Trieschmann: Well, in a general way I should say 50 per cent goes Rock Island, 40 per cent Iron Mountain and ten per cent the other; that varies according to the car supply; some months it is just the reverse from that.

Examiner Burchmore: Is it true as a general statement that the rates are the same by these three trunk lines?

Mr. Trieschmann: Exactly the same.

Examiner Burchmore: Are the conditions the same?

Mr. Trieschmann: In the main they are. There are some differences; it depends on the territories.

Commissioner Harlan: How far is your mill from the Rock Island tracks?

Mr. Trieschmann: About, I should judge, half or three-quarters of a mile; probably half a mile.

Commissioner Harlan: And from the Iron Mountain tracks?

Mr. Trieschmann: Probably 300 or 400 yards.

439 Examiner Burchmore: Is not your mill right at the junction between the two companies?

Mr. Trieschmann: At the junction between the Rock Island and the Iron Mountain?

Examiner Burchmore: Between the Iron Mountain and the Rock Island; practically at the junction?

Mr. Trieschmann: Practically at the junction; 200 or 300 yards.

Commissioner Harlan: And what allowances do you get from the Iron Mountain?

Mr. Trieschmann: That varies all the way, I think, from two to four and a half cents.

Commissioner Harlan: What is the highest allowance you have ever received from any rate?

Mr. Trieschmann: Four and a half cents.

Commissioner Harlan: Are the Rock Island allowances the same?

Mr. Trieschmann: The same.

Commissioner Harlan: To the same destinations?

Mr. Trieschmann: Well, that varies some; not exactly the same to the same destinations.

Commissioner Harlan: What service do you understand
440 the Crossett Railway Company performs for those allowances?

Mr. Trieschmann: As I understand it, the milling in transit, and the delivering of the lumber to these lines.

Commissioner Harlan: That is, the hauling of the logs from the tree to the mill?

Mr. Trieschmann: Yes.

Commissioner Harlan: And the manufactured lumber from the mill to the main line?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: Do you put them on the interchange track of the main line?

Mr. Trieschmann: Yes.

Examiner Burchmore: On shipments of general merchandise, that is, as distinguished from lumber coming into Crossett over the Rock Island and Iron Mountain, and consigned to the company's store at Crossett, does the Crossett Railway Company receive any switching charge?

Mr. Trieschmann: If it is billed through to the Crossett Railway, we do receive part of the through rate.

Examiner Burchmore: As a matter of fact, are not shipments that are intended for the company's store at Crossett, cus-
441 tomarily billed for delivery on the Crossett Railway at Crossett?

Mr. Trieschmann: No, I think most are billed direct.

Examiner Burchmore: What is that switching charge where it is allowed?

Mr. Trieschmann: I do not think there is any switching charge of that kind, except on straight carload lots. There is no switching charge on less than carload lots.

Examiner Burchmore: Is that paid by the consignee or by the Rock Island or Iron Mountain?

Mr. Trieschmann: That switching charge is paid by the railway company, wherever there is a switching charge.

Examiner Burchmore: Does your company issue bills of lading covering outbound shipments of lumber?

Mr. Trieschmann: Yes, sir.

Examiner Burchmore: Where are they issued?

Mr. Trieschmann: They are issued in the office.

Examiner Burchmore: At Crossett?

Mr. Trieschmann: At Crossett.

Examiner Burchmore: A shipment of logs coming from a point north of Stephens and moving by railroad to Crossett and there milled into lumber and subsequently shipped out as lumber
442 to an interstate destination; would any bill of lading be issued at Stephens or at a point up in the woods covering a carload of logs?

Mr. Trieschmann: It would not.

Examiner Burchmore: The first bill of lading issued on such a transaction would be issued at Crossett?

Mr. Trieschmann: Yes, sir.

Examiner Burchmore: Would that be issued when the lumber was shipped out of the mill?

Mr. Trieschmann: Yes, sir.

Examiner Burchmore: What rate would be applied; the rate in effect at the time the shipment left the woods, or the rate in effect at the time the shipment left the mill?

Mr. Trieschmann: The mill.

Examiner Burchmore: And that rate would be the rate published from Crossett or from Stephens?

Mr. Trieschmann: From Stephens.

Examiner Burchmore: You have a milling in transit privilege published in the tariff?

Mr. Trieschmann: Yes, sir.

Examiner Burchmore: Are you familiar with the Commission's rulings with regard to transit privileges and practices?

Mr. Trieschmann: I don't know as I am, any late rulings.
443 I kept up——

Examiner Burchmore: The customary transit arrangement at large transit points, such as Chicago, contemplates the surrender by the shipper at transit points, of the inbound billing at the time he ships his product out. Such a practice is not possible on the Crossett Railway under the present methods of billing?

Mr. Trieschmann: I should think not; no, sir.

Examiner Burchmore: You just assume that the logs have come from Stephens?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: As a matter of fact, you know they have?

Mr. Trieschmann: Certainly.

Mr. Gaughan: They could not come from anywhere else.

Examiner Burchmore: Are any waybills issued by the Crossett Railway?

Mr. Trieschmann: Yes, sir.

Examiner Burchmore: On lumber moving south, or moving into Crossett?

Mr. Trieschmann: Lumber moving into Crossett?

Examiner Burchmore: Way bills, not bills of lading, but
444 are any way bills issued on movements of logs to Crossett?

Mr. Trieschmann: No, sir.

Examiner Burchmore: They are just handled in the cars?

Mr. Trieschmann: In the cars.

Examiner Burchmore: Is there a card billing on the cars?

Mr. Trieschmann: There is not.

Examiner Burchmore: How can you tell whether a car of logs is intended for your mill at Crossett or for some one else?

Mr. Trieschmann: By reports made by the train crew. I will correct that. There is billing on other logs for other parties. There is a slip billing for them, which is re-billed at Crossett.

Examiner Burchmore: You have no agent at Stephens?

Mr. Trieschmann: No.

Examiner Burchmore: Shipments of merchandise, from state or interstate points, consigned to this storekeeper at Stephens, how do you collect the charges on such a shipment?

Mr. Trieschmann: We keep an account.

Examiner Burchmore: And collect from his monthly or——

Mr. Trieschmann: Well, just whenever it is convenient, probably some days we collect daily and keep an account.

445 Commissioner Harlan: Do you keep separate books of account for the railroad company?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: And report to this Commission?

Mr. Trieschmann: Yes.

Commissioner Harlan: How long have you been doing that?

Mr. Trieschmann: Ever since the Commission required it.

Examiner Burchmore: Are your cars equipped with safety couplers?

Mr. Trieschmann: They are not.

Examiner Burchmore: With air brakes?

Mr. Trieschmann: They are not.

Examiner Burchmore: Are your locomotives equipped with such devices?

Mr. Trieschmann: I am quite sure they are equipped. I am not posted on the mechanical end of it.

Examiner Burchmore: Some of your cars are used for purposes other than the hauling of logs?

Mr. Trieschmann: Yes, sir.

Examiner Burchmore: Are such cars equipped with safety devices?

Mr. Trieschmann: Yes, sir.

446 Mr. Gaughan: Do you know of any instance where the through rate has been changed between the time the logs started from the woods and the lumber from that log would reasonably be shipped out?

Mr. Trieschmann: I never have.

Mr. Gaughan: As a general rule, how long is it from the time a shipment of logs starts from the woods until it is milled into lumber?

Mr. Trieschmann: Well, anywhere from one week to thirty days. Some might be three months. That would be impossible to state accurately.

Mr. Gaughan: But I mean as a general rule?

Mr. Trieschmann: As a general rule, about two to three weeks.

Mr. Gaughan: Where are they kept, in a pond?

Mr. Trieschmann: What is that?

Mr. Gaughan: Are they kept in a pond?

Mr. Trieschmann: Those logs?

Mr. Gaughan: Yes.

Mr. Trieschmann: The logs are not kept more than 24 hours probably.

447 Mr. Gaughan: That is what I am talking about; from the time the railroad company gets the logs, how long is it before they are turned into lumber?

Mr. Trieschmann: That is liable to happen in five to 24 hours.

Mr. Gaughan: It is rarely ever more than 48 hours, is it?

Mr. Trieschmann: No, sir.

Mr. Gaughan: What is the character of the forest growth in the territory through which your railroad is extended?

Mr. Trieschmann: There are various kinds of hard wood and the pines, pine predominating.

Mr. Gaughan: I wish you would state the different kinds of hard wood that are merchantable.

Mr. Trieschmann: Oak, gun, hickory, some cypress; those are the principal varieties.

Mr. Gaughan: Are those classes of timber now coming into the market?

Mr. Treischmann: They are.

Mr. Gaughan: Is pine timber now coming into the market which was unfit for logs at the time these woods were cut over?

Mr. Trieschmann: Yes, sir.

448 Mr. Gaughan: For what use?

Mr. Trieschmann: For various uses.

Mr. Gaughan: Could you name some of the uses?

Mr. Trieschmann: Some of the lower grades are now being used for box purposes and crate purposes.

Commissioner Harlan: I do not think we will go into that, unless they are made on this line.

Mr. Gaughan: I simply wanted to show the forest products that are still left there, to be hauled by this railway company.

Commissioner Harlan: Well, he says there are such products to be hauled. You need not go into the details.

Mr. Gaughan: I would like to show the extent of it.

Commissioner Harlan: Do you mean in tonnage? Well, proceed and answer the question.

Mr. Gaughan: In a general way, not particularly, of course, but in a general way; is there much of it, or just a little of it?

Mr. Trieschmann: There is a great deal of that character of timber that will have to be cut from now on.

Mr. Gaughan: Is it not a fact that this railroad has extended north near the Saline River bottoms?

Mr. Trieschmann: That is a fact.

449 Mr. Gaughan: Is there not a great deal of hard wood timber in that bottom?

Mr. Trieschmann: Very large quantities.

Mr. Gaughan: Do you know of any one or many people who have

purchased hard wood timber holdings in that territory who expect to have it brought out on this railroad?

Mr. Trieschmann: I know of one party who invested a little over a million dollars. I do not know how many acres that included. I think that is known as the American Timber Company: It is the only large investment that I can recall now.

Mr. Gaughan: State what proportion of the pine timber owned by the Crossett Lumber Company in the territory where the railroad is built has now been cut.

Mr. Trieschmann: About, I should say, 95 per cent of the first cutting.

Mr. Gaughan: In the event the Commission should hold that this railroad is not entitled to participate in the through rates, what would the company do with that road?

Mr. Trieschmann: Well, there are several propositions that might present themselves. We would either have to make an attempt to surrender our charter, and if that was allowed, of course we
450 would take up the track. If it was not allowed, under the laws of Arkansas, we would have to operate trains at a very heavy loss.

Mr. Gaughan: Is there any future for that road? What is the purpose of the owners, or rather, the stockholders of this road, to do with it in the event it is recognized as a railroad entitled to participate in divisions?

Mr. Trieschmann: The purpose is to extend north immediately, connecting with a railroad running south from Wilmar, Arkansas, acquiring that property, which would make an extension of something like 50 miles from Crossett to Wilmar, which would be operated for regular train service.

Mr. Gaughan: Would you inaugurate a passenger business then?

Mr. Trieschmann: We would be compelled to, and we would, because it would be profitable.

Mr. Gaughan: Has that line been surveyed?

Mr. Trieschmann: It has.

Mr. Gaughan: At what cost?

Mr. Trieschmann: I think something like $1,500 to $2,000 was expended for that survey.

Mr. Gaughan: Will you attach a map showing this survey——

451 Commissioner Harlan: I do not think we need that.

Mr. Gaughan: What has been done in the way of developing agricultural industries along the line of this railroad?

Mr. Trieschmann: There have been a great many small farms developed in what was, a few years ago, waste land.

Commissioner Harlan: That whole country is opening up, as all the rest of the state is; is not that about it?

Mr. Trieschmann: In this immediate vicinity it has opened up since the railroad has gone into that country. It was waste land prior to that time, so far as agriculture is concerned.

Mr. Gaughan: Have the stockholders of this company built a cotton gin at Crossett this year?

Mr. Trieschmann: The stockholders of the lumber company have.

Mr. Gaughan: Well, they are the same people?

Mr. Trieschmann: Not this year, but two or three years ago.

Mr. Gaughan: How many bales of cotton did they gin there this year?

Mr. Trieschmann: Ginning is not over, but I think it will reach 1,000 bales.

Commissioner Harlan: Did the Crossett Railroad Com-
452 pany move any of that cotton?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: You have not mentioned it heretofore in your testimony. What did they move?

Mr. Trieschmann: Well, they moved all of it. The gin is on the Crossett Railway Company's tracks.

Commissioner Harlan: Where do they move it; to what point?

Mr. Trieschmann: Some of the cotton has been moved a distance of ten miles.

Commissioner Harlan: Does the flat cotton reach Crossett over your line?

Mr. Trieschmann: Yes, sir; some does.

Commissioner Harlan: How much?

Mr. Trieschmann: I could not tell you. There has been only a few carloads this year.

Commissioner Harlan: Do you carry much of the baled or compressed cotton; do you carry much of that, and from where to where?

Mr. Trieschmann: From the gin, which is a half a mile from the Rock Island tracks.

Commissioner Harlan: You carry the compressed cotton half a mile?

453 Mr. Trieschmann: Yes, sir; whatever that distance is.

Commissioner Harlan: What charge do you make for that service?

Mr. Trieschmann: There is $3.00 per car charged in a published tariff.

Commissioner Harlan: Is that absorbed by the Rock Island?

Mr. Trieschmann: Yes, sir; by either line that takes it.

Commissioner Harlan: Does any other railroad reach the gin?

Mr. Trieschmann: No, sir.

Mr. Gaughan: Is there a physical connection at this point between the Rock Island and the Iron Mountain?

Mr. Trieschmann: There is not.

Mr. Gaughan: How do they get cars from one line to the other?

Mr. Trieschmann: The Crossett Railway Company has to do that switching.

Commissioner Harlan: What charge does it make for that service?

Mr. Trieschmann: $3.00 per car.

Commissioner Harlan: How many cars did you switch last year?

454 Mr. Trieschmann: The records will show; I would not attempt to say, but it was a great number.

Commissioner Harlan: Well, just give us a good, reasonable guess at it.

Mr. Trieschmann: Oh, I should think 50 cars.

Commissioner Harlan: Fifty cars?

Mr. Trieschmann: I should think so.

Commissioner Harlan: During the year?

Mr. Trieschmann: I should think so. A great deal of that switching done—I was not familiar with it at the time.

Mr. Gaughan: You stated the stock of this railway company was held by the same parties who held the stock in the Crossett Lumber Company. Is that stock pooled or held in trust in any way?

Mr. Trieschmann: It is not.

Mr. Gaughan: Are the owners of that stock at liberty to sell it to whomever they please?

Commissioner Harlan: This witness does not know anything about it.

Mr. Gaughan: I think he does.

Commissioner Harlan: I do not think he does. He does
455 not know any better than anyone here in the room knows. He says it is not pooled, and any one knows a man who owns stock may sell it and do what he pleases with his dividends.

Mr. Gaughan: I just wanted to show there was no agreement.

Commissioner Harlan: We will not stop on that. Have you any further questions?

Mr. Cowan: Yes, I have some questions. What is the character of the divisions which you receive; are they evidenced by division sheets with the Rock Island?

Mr. Trieschmann: Yes, sir.

Mr. Cowan: And with the Iron Mountain?

Mr. Trieschmann: Yes.

Mr. Cowan: Where is this town of Crossett in Arkansas, geographically speaking?

Mr. Trieschmann: In the southern part of the state.

Mr. Cowan: What line of the Iron Mountain is that?

Mr. Trieschmann: On the Iron Mountain proper.

Mr. Cowan: Between what points?

Mr. Trieschmann: It is the end of the line.

Mr. Cowan: Running from where?

Mr. Trieschmann: It is a branch from what they call Montrose.

456 Mr. Cowan: And on what part of the Rock Island is it?

Mr. Trieschmann: On the southern extension of the line that runs from Little Rock south, known as the Crossett branch.

Mr. Cowan: Do these division sheets specify what the divisions are to be in all cases or do they leave it to be determined by some other method dependent upon the destination of the lumber in certain cases?

Mr. Trieschmann: No they specify what they are to be in each case.

Mr. Cowan: Are the division sheets filed with the Interstate Commerce Commission or filed in this case?

Mr. Trieschmann: That I do not know. I presume so. The Iron Mountain and Rock Island file those.

Mr. Cowan: With respect to the lumber, the only service you perform is from the mill to the railroad?

Mr. Trieschmann: Yes.

Mr. Cowan: Do you know whether the railroad company has any interest in the tracks from your mills to the railroad?

Mr. Trieschmann: They own them.

Mr. Cowan: Which railroad owns them?

Mr. Trieschmann: The Crossett Railway owns them.

Mr. Cowan: Do the Iron Mountain and the Rock Island
457 have any sidings or switches at Crossett?

Mr. Trieschmann: Yes.

Mr. Cowan: Do they have any connection with your lumber yard?

Mr Trieschmann: No, sir; excepting over the Crossett Railway Company's tracks.

Mr. Cowan: Is there any obstacle to their building spur tracks to your lumber yard?

Mr. Trieschmann: Any obstacles?

Mr. Cowan: Yes.

Mr. Trieschmann: The obstacle is, we would not sell them the land to do it; that is all.

Mr. Cowan: But they could condemn that if they wanted to build?

Mr. Trieschmann: Yes.

Mr. Cowan: Why would you not sell them land if they wanted to build out there for your convenience?

Mr. Trieschmann: Well, it is not convenient.

Mr. Cowan: Why would you not sell them the tracks already built? That would be convenient; you would be willing to do that, would you not?

Mr. Trieschmann: If the consideration was proper; yes, sir.

458 Mr. Cowan: Well, you are not making any money by the operation of the railroad, are you?

Mr. Trieschmann: Yes, sir.

Mr. Cowan: How much were the net earnings on the operation of your railroad?

Mr. Trieschmann: Covering what period?

Mr. Cowan: Well, say, for the year ending June 30th, 1910.

Mr. Trieschmann: The statement is on file with the Commission.

Mr. Cowan: Well, I am just asking you how much it was, if you know.

Mr. Trieschmann: Well, I do not know the exact figures.

Mr. Cowan: Has it paid any dividends?

Mr. Trieschmann: They have not.

Mr. Cowan: Does the lumber company pay any dividends?

Mr. Trieschmann: They have.

Mr. Cowan: You said if the Commission should hold that you are not entitled to a division of rates, you would consider the matter of taking up the tracks. How would the lumber company get the logs, if you did that?

Mr. Trieschmann: We are through cutting in the north territory.

459 Mr. Cowan: You have no use for the railroad for the purpose of getting the logs to the mill?

Mr. Trieschmann: Not after six months from today.

Mr. Cowan: On what ground do you expect to make the rate from Stephens on the lumber, instead of Crossett, if you are not going to cut anything up there?

Mr. Trieschmann: That will have to be changed up.

Mr. Cowan: When you said you were through cutting up there, are you speaking advisedly?

Mr. Trieschmann: Yes, sir.

Mr. Cowan: You have no more timber to bring down that way?

Mr. Trieschmann: No.

Mr. Cowan: So in the event that the Commission should hold you are not entitled to a milling in transit from Stephens, it would not cut any ice, because you are not going to bring anything from there?

Mr. Trieschmann: There would have to be a new charter for a southern extension.

Mr. Cowan: How long has it been since you brought any logs from Stephens; when did you get through cutting?

460 Mr. Trieschmann: I did not say we were through. I say we will be through within six months.

Mr. Cowan: What do you contemplate doing, regardless of what the Commission does, with this road? You have the saw mill there. What are you going to do about getting logs?

Mr. Trieschmann: We are going to log south instead of north.

Mr. Cowan: You say you are going to charter a railroad for that. Is that the idea, or are you just going to build a logging railroad out from Crossett?

Mr. Trieschmann: The purpose is to make an extension and connect with the main line railroad, which will be an eventual distance of over 90 miles.

Mr. Cowan: How far will it be from Crossett, when you build this extension?

Mr. Trieschmann: Thirty miles. Not to the first one, but it will be that when we get through.

Mr. Cowan: How long will it be to the first logs you expect to mill?

Mr. Trieschmann: Probably six or eight miles.

Mr. Cowan: Do you contemplate building a logging railroad to that, or a railroad to get a division of the rate?

461 Mr. Trieschmann: We contemplate making that part of the main line of the railroad.

Mr. Cowan: You say you have a joint agent at Crossett between the railroad company and the lumber company. He keeps his office in the lumber company's office?

Mr. Trieschmann: Yes, sir.

Mr. Cowan: Just what sort of work does he do?

Mr. Trieschmann: The regular railroad work.

Mr. Cowan: Is it loading cars or making out billing, or what?

Mr. Trieschmann: Billing and daily records, demurrage records and claims.

Mr. Cowan: Does he perform that service for the railroad company?

Mr. Trieschmann: He does.

Mr. Cowan: Does he look after the loading of the cars?

Mr. Trieschmann: He does not.

Mr. Cowan: He makes out the billing which accompanies each car that is delivered to the Iron Mountain or to the Rock Island?

Mr. Trieschmann: Yes.

Mr. Cowan: He makes out the way bills and bills of lading?

462 Mr. Trieschmann: Yes, sir.

Mr. Cowan: How many cars do you ship out during a month, say?

Mr. Trieschmann: It varies from 250 to 350, and sometimes 400.

Mr. Cowan: Who is it that determines that he is to have $100 a month; the railroad company or the lumber company?

Mr. Trieschmann: The railroad company.

Mr. Cowan: What man determines that for the railroad company?

Mr. Trieschmann: I do not know.

Mr. Cowan: Does the railroad company have any officer there who confers with this agent in regard to his duties or who supervises what he does?

Mr. Trieschmann: I don't know. He can confer with any of the officers if he so chooses.

Mr. Cowan: They are the same officers of the lumber company?

Mr. Trieschmann: Yes.

Mr. Cowan: They do not get any pay from the railroad company?

Mr. Trieschmann: No.

463 Commissioner Harlan: Is this the same man we were talking of a while ago?

Mr. Trieschmann: Yes.

Commissioner Harlan: Is it not a fact the railroad company pays that money over to the lumber company, and the lumber company disburses it to these several clerks?

Mr. Trieschmann: No. I would like to make myself clear there. That was an arrangement with which I am not familiar, and I would like to get the exact status of it, and file it as evidence in this, so there will be no misunderstanding.

Commissioner Harlan: Very well, let that statement be filed, showing what is done now and what has been done for the last twelve months.

Mr. Cowan: Will you attach a list of the checks you have been giving? The checks will show for themselves whether it is a railroad check or a lumber company check.

Mr. Trieschmann: That will all show.

Commissioner Harlan: You might file copies of the checks.

Mr. Trieschmann: If there are checks.

Mr. Cowan: You pay checks, do you not?
Mr. Trieschmann: No, we pay cash altogether.
Mr. Cowan: Who does?
464 Mr. Trieschmann: The railroad company.
Mr. Cowan: And the lumber company, too?
Mr. Trieschmann: Yes.
Mr. Cowan: Is there not any voucher that is signed up?
Mr. Trieschmann: Yes, sir; just a receipt.
Mr. Cowan: Where does he draw his money? Do they take it around to him and deliver it to him, or does he take a voucher of some sort to the office and get his money? You must keep your money somewhere and not lying around loose.
Mr. Trieschmann: We have regular pay days.
Mr. Cowan: The same paymaster? Do you have a paymaster?
Mr. Trieschmann: Yes, sir.
Mr. Cowan: The same paymaster for the railroad as for the lumber company?
Mr. Trieschmann: No.
Mr. Cowan: Two different paymasters?
Mr. Trieschmann: Yes, sir.
Mr. Cowan: Who are they?
Mr. Trieschmann: Mr. Cannon is paymaster for the Crossett Railway Company.
Mr. Cowan: And who for the lumber company?
Mr. Trieschmann: Mr. Hall.
465 Mr. Cowan: Why do you have a joint agent and separate paymasters?
Mr. Trieschmann: What do you mean by joint agent?
Mr. Cowan: You said you had a joint agent, the lumber company and the railroad company.
Mr. Trieschmann: The lumber company has no agent.
Mr. Cowan: Well, he is an employee of the lumber company, you said.
Mr. Trieschmann: Well, he is not an agent in the sense that the railroad has an agent.
Mr. Cowan: Well, the same man, the same individual, that is joint in the sense of his service. He performs service for the railroad company and the lumber company?
Mr. Trieschmann: Yes.
Mr. Cowan: If he can perform service for them, why should not the paymaster be the same?
Mr. Trieschmann: I do not know any reason why, but he is not.
Mr. Cowan: I thought maybe you could give some explanation of it.
Mr. Trieschmann: There is a separate set of books, is the reason.
466 Mr. Cowan: Well, one man might handle the separate sets of books, just as the other man does in the lumber office. Where do you stay at Crossett?
Mr. Trieschmann: Yes.

Mr. Cowan: In the lumber company's office?
Mr. Trieschmann: Yes.
Mr. Cowan: Do you have charge of it?
Mr. Trieschmann: No, sir; not exactly.
Mr. Cowan: What is your position?
Mr. Trieschmann: Sales manager.
Mr. Cowan: You do not have anything to do with running these offices there?
Mr. Trieschmann: I run my own office.
Mr. Cowan: As sales manager?
Mr. Trieschmann: Yes.
Mr. Cowan: But you do not have anything to do with running the offices of the railroad company or lumber company?
Mr. Trieschmann: No.
Mr. Cowan: You are not posted about a lot of those things and they do not come within your jurisdiction; is not that the case?
Mr. Trieschmann: I can tell you what you want to know, I
466*a* expect.
Mr. Cowan: I do not know; I have asked several things and you were not able to tell what I wanted to know, and of course if it came under your jurisdiction you would be familiar with it.
Mr. Trieschmann: Yes.
Mr. Cowan: You are the sales agent?
Mr. Trieschmann: Yes.
Mr. Cowan: Do you have anything to do with employing or discharging men who operate the saw mill and the operations at the planing mill, and the like?
Mr. Trieschmann: No; each foreman does that himself.
Mr. Cowan: Do you have charge of the foremen?
Mr. Trieschmann: I do not.
Mr. Cowwan: Do you have charge of the engineers of the rail road company?
Mr. Trieschmann: I do not.
Mr. Cowan: Or the sectionmen?
Mr. Trieschmann: I do not.
Mr. Cowan: Or the agent of the railway company?
Mr. Trieschmann: I do not.
Mr. Cowan: Have you examined their books to see what they do?
467 Mr. Trieschmann: Yes.
Mr. Cowan: When?
Mr. Trieschmann: Well, in making up our annual reports. I am not the one that keeps the books.
Mr. Cowan: Are you an official of the railroad company?
Mr. Trieschmann: Yes.
Mr. Cowan: What position do you hold there?
Mr. Trieschmann: Traffic manager and auditor.
Mr. Cowan: If you are auditor of the railroad company you ought to know exactly about how you pay this man who is the joint agent; whether you pay him in cash or by voucher or by check, or in what manner that is done, you being the auditor.

Mr. Trieschmann: That will show in this record.

Mr. Cowan: That business is all kept in the same offices there and all operated together, is it not, the railroad and the lumber company business?

Mr. Trieschmann: Yes, sir.

Mr. Cowan: If I were to go in there, I would not know who was the railroad man and who was the lumber man?

Mr. Trieschmann: Not unless you asked.

Mr. Cowan: Could I find out then?

468 Mr. Trieschmann: Yes.

Mr. Cowan: Take this man who represents both the railroad company and lumber company, how could I find out who he was? I would have to ask him, would I not?

Mr. Trieschmann: You could ask anybody.

Mr. Cowan: They would tell me he was operating for both.

Commissioner Harlan: Judge Cowan, I think we had better leave that man just where he is and pass to some one else.

Mr. Cowan: With regard to that competing store which you said was at Stephens, I believe you said your company was not interested in the store at all.

Mr. Trieschmann: I said that.

Mr. Cowan: Neither the railroad company nor the lumber company?

Mr. Trieschmann: That is right.

Mr. Cowan: And they haul merchandise in there over your line of railroad that moves on through rates to Stephens?

Mr. Trieschmann: How is that?

Mr. Cowan: I think you said they moved some merchandise which comes in on through rates.

Mr. Trieschmann: There are through rates published. I do not know how they order it; whether they order it on locals

469 or on the through rates, but through rates are published.

Mr. Cowan: To Stephens?

Mr. Trieschmann: To Stephens.

Mr. Cowan: You have not a copy of that tariff here?

Mr. Trieschmann: It is on file with the Commission.

Mr. Cowan: Is there a higher rate to Stephens than to Crossett?

Mr. Trieschmann: There is not, not on the through rate?

Mr. Cowan: If it stops at Crossett and is moved out to your store, a similar shipment, I will say, from Memphis is billed to Crossett and goes out to the company's store at Crossett—I believe the company's store is there?

Mr. Trieschmann: Yes, sir; the company's store is at Crossett.

Mr. Cowan: It moves out over the tracks of this railroad company you are auditor of?

Mr. Trieschmann: To Crossett; no, sir.

Mr. Cowan: Where do you get your merchandise shipments which are consigned to the lumber company's store?

Mr. Trieschmann: Get it right at Crossett.

Mr. Cowan: What is Crossett, is it on your track or on the Rock Island?

470 Mr. Trieschmann: It is on the track of the Rock Island and the Iron Mountain.

Mr. Cowan: So a carload shipment would not be switched over onto your track, would it?

Mr. Trieschmann: It would from the Rock Island.

Mr. Cowan: Do you get any division on the merchandise which would be consigned to your company at Crossett?

Mr. Trieschmann: Yes, sir, providing it was billed over the Crossett Railway Company on that through rate.

Mr. Cowan: As a matter of fact, do you get a division of the rate on merchandise and other supplies that come in, consigned to the Crossett Lumber Company?

Commissioner Harlan: I think this witness has been over that ground.

Mr. Cowan: About the inbound.

Commissioner Harlan: Yes. Mr. Burchmore covered all that point.

Mr. Cowan: Well, I did not hear it. I made a note of it, and thought I was noticing it. It will not take but a moment about that, for fear it is not in.

Commissioner Harlan: Just a moment.

Mr. Cowan: All this carload merchandise comes to you on a division of the rates?

471 Mr. Trieschmann: Not all of it, no.

Mr. Cowan: What part does not?

Mr. Trieschmann: Well, the tariffs show as to which railroad we are a party to the through rate.

Mr. Cowan: The tariffs would not show what moved to your railroad.

Commissioner Harlan: The witness said all merchandise of a general nature that came in on joint rates yielded a division to his road, but he did not know the extent of the merchandise that came in on joint rates.

Mr. Trieschmann: It is not necessary to ship it that way.

Mr. Cowan: When a carload goes to Stephens, if such a thing ever happens, would you get the same division of the rate as you would in a carload consigned to your company on your own tracks at Crossett?

Mr. Trieschmann: Yes, sir.

Mr. Cowan: So that the additional service of hauling up there receives no different compensation than what it would on your tracks at Crossett; there is no additional rate up there?

Mr. Trieschmann: No additional rate.

472 Mr. Cowan: Have you any contract with the Rock Island as to the amount of your tonnage that you will deliver to them?

Mr. Trieschmann: Yes, sir.

Mr. Cowan: How much is that?

Mr. Trieschmann: Fifty per cent.

Mr. Cowan: Who made that contract: I mean, acting for your company?

Mr. Trieschmann: I am not sure about that.

Mr. Cowan: Did the lumber company make it?

Mr. Trieschmann: I do not know who made that contract; it was made before I had any connection with the railroad company.

Mr. Cowan: Is that contract, according to your understanding, on file?

Mr. Trieschmann: It is on file with the Commission.

Mr. Gaughan: He was questioned about it a while ago.

Examiner Burchmore: A copy of it filed with the Commission was entered into in 1906 by the Rock Island System while it was called the Rock Island, Louisiana & Arkansas, that is the name of that particular part of the system. The Crossett Railway Company is the party of the second part and the lumber company the party of the third part. It provides that 50 per cent shall be over
473 the Rock Island, and the division shall be so much in cents per 100 pounds.

Mr. Cowan: Is there any contract between the Crossett Lumber Company and the railroad company that the Crossett Lumber Company will deliver its lumber to the Crossett Railroad Company, or whatever the name of this company is?

Mr. Trieschmann: No contract.

Mr. Cowan: You do not know how the Crossett Railroad Company could become assured that it could deliver that amount of tonnage to the Rock Island?

(No response.)

Mr. Cowan: Where is the location of the planer with respect to the tracks of the Rock Island and the Iron Mountain, is it closer than the saw mill?

Mr. Trieschmann: The saw mill is probably closer to the Rock Island, and the planing mill closer to the Iron Mountain.

Mr. Cowan: What amount of territory is used in stacking lumber between these two roads?

Mr. Trieschmann: Anywhere from 20 to 40 acres, I should think.

Mr. Cowan: How far from the Rock Island Railroad is the nearest part of your lumber yard, where your lumber is stacked?

474 Mr. Trieschmann: It must be close to half a mile; between a quarter and a half.

Mr. Cowan: How far is the closest part of your lumber yard to the Iron Mountain?

Mr. Trieschmann: It must be about half a quarter.

Mr. Cowan: Practically almost right on the track? Half a quarter is 200 yards.

Commissioner Harlan: Well, he said 300.

Mr. Trieschmann: Yes, between 200 and 300 yards.

Mr. Cowan: You say the American Timber Company has made an investment of a million dollars in timber. Is that in the direction you contemplate extending this railroad?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: That is to the north?

Mr. Trieschmann: That is right north of our tracks.

Mr. Cowan: You also said you had made a survey in that direction.

Mr. Trieschmann: Yes, sir.

Mr. Cowan: What interest has the American Timber Company in the matter of the extension of this railroad into its timber?

475 Mr. Trieschmann: None whatever.

Mr. Cowan: Are the owners of the Crossett Lumber Company interested in the American Timber Company?

Mr. Trieschmann: None whatever.

Mr. Cowan: In regard to the matter of demurrage, does the Crossett Railroad Company charge the lumber company anything for demurrage?

Mr. Trieschmann: I think not.

Mr. Cowan: How much per diem does the Crossett Railroad Company have on the cars it receives from the Iron Mountain or Rock Island?

Mr. Trieschmann: Forty-eight hours.

Mr. Cowan: Then you have to pay what?

Mr. Trieschmann: One dollar per day.

Mr. Cowan: Do you mean the Crossett Railway Company has to pay one dollar a day?

Mr. Trieschmann: Yes, sir.

Mr. Cowan: You are certain about that, as I understand?

Mr. Trieschmann: I think I am.

Mr. Cowan: Now, you were asked in regard to the rental of those cars. It seems, from the information at hand, that there is some agreement whereby the Crossett Railway Company pays the

476 Crossett Lumber Company $2,500 a month for the lease of some cars. Do you know anything about that?

Mr. Trieschmann: There is a lease, but I do not think that $2,500 per month covers the lease of the cars.

Mr. Cowan: Is there some other contract than the $2,500 contract?

Mr. Trieschmann: There is a contract on file covering that lease, I think. That has been a lease of long standing.

Mr. Cowan: If you are the auditor of the railroad company you ought to be familiar with the books showing what the rental is.

Mr. Trieschmann: That is all on file with the Commission.

Mr. Cowan: But you ought to have it up here in your head, if you are the auditor of the company, it seems like you ought to know something about what the amounts of the lease is, your railroad company is paying to the lumber company, and what it is for.

Examiner Burchmore: Have you a copy of your report here?

Mr. Trieschmann: There is one in my room at the hotel.

Mr. Gaughan: State what the lease is, as near as you remember.

Mr. Trieschmann: The lease for the year, as near as I re-

477 member, is $22,500.

Commissioner Harlan: That covers a rental for the cars, and nothing else?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: Who repairs those cars?

Mr. Trieschmann: The Crossett Lumber Company.

Mr. Gaughan: Does it renew them?

Mr. Trieschmann: They keep them renewed; they have to replace them as they are worn out.

Commissioner Harlan: What is the cost of a logging car?

Mr. Trieschmann: There are different costs; I should judge from $300 to $700 a car.

Commissioner Harlan: Have any been bought since you have been connected with the lumber company?

Mr. Trieschmann: I think not; that is, not complete. We usually buy a portion of a car and make part of it, and just what the total cost of the car is, I would not know until I looked up the figures.

Commissioner Harlan: You would not say it would cost as much as $700?

Mr. Trieschmann: Not for a logging car.

478 Commissioner Harlan: Well, the kind you use; would $300 be a good price for it?

Mr. Trieschmann: I should judge from $300 to $400 a car.

Commissioner Harlan: And this $22,500 is for how many cars?

Mr. Trieschmann: Eighty cars.

Commissioner Harlan: How much a car is that?

Mr. Trieschmann: Well, it would be a little over $250 a car.

Commissioner Harlan: Per year?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: And that goes on year after year?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: The railroad company has not paid any dividends?

Mr. Trieschmann: No, sir.

Mr. Cowan: Does the lumber company carry those cars on its books as an investment, capital account?

Mr. Trieschmann: Yes, sir.

Mr. Cowan: What does it carry those cars at on its books, do you know?

Mr. Trieschmann: They are not kept separate, it is a part of other equipment.

479 Mr. Cowan: You spoke about the logs being milled and put into lumber there, and I understood in 48 hours; I probably misunderstood you. Sometimes it might go as long as a month, I think you said.

Mr. Trieschmann: There were two questions covering that.

Mr. Cowan: I know, and referring your mind to them, I want to ask you if you do not unload your logs into a pond, as is usual with saw mills?

Mr. Trieschmann: Yes, sir.

Mr. Cowan: What is the capacity of this pond? How many do you put in it?

Mr. Trieschmann: It varies all the way from 100,000 feet to one or two million feet.

Mr. Cowan: So as to the identity of the logs, you do not know how long they may be in there before they are milled out?

Mr. Trieschmann: No.

Mr. Cowan: There is no attempt to mill logs out, with respect to the dates they are put in the pond?

Mr. Trieschmann: No.

Mr. Cowan: Do you put them in on the same side or the
480 opposite side from where they are taken out and go up to the saw?

Mr. Trieschmann: The same side.

Mr. Cowan: When your logs are sawed, of course the timber is green and wet and has to be put through the process of drying in some fashion. How long does it take that lumber to get in condition to be put through the planer, in case it is sold?

Mr. Trieschmann: About three days.

Mr. Cowan: That is all.

Mr. Coleman: Do you know that the Act to Regulate Commerce, as amended in 1910, provides or makes it unlawful for a railroad agent to give information to a rival shipper of the business of another shipper?

Mr. Trieschmann: I am not familiar with any such law.

Mr. Coleman: Well, if I tell you that that is the law, can you explain how that joint agent at Crossett can receive information as agent of the railroad company and not give it to himself as agent of the lumber company?

Mr. Trieschmann: How is that?

Commissioner Harlan: Well, the difficulty of that is obvious. We will not go into that.

481 Mr. Coleman: That is all.

Mr. Cowan: You are sales agent. What duties do you perform? Do you stay there at Crossett all the while, or go elsewhere?

Mr. Trieschmann: I stay there most of the time: I go elsewhere also.

Mr. Cowan: Where do you make sales of your lumber; where does it go to?

Mr. Trieschmann: To about 25 different states in the Union.

Mr. Cowan: Do you sell down in Texas?

Mr. Trieschmann: Occasionally.

Mr. Cowan: Oklahoma?

Mr. Trieschmann: Some.

Mr. Cowan: Do you go up there to Oklahoma City, for example?

Mr. Trieschmann: I have never been there.

Mr. Cowan: Do you sell at Kansas City?

Mr. Trieschmann: Sometimes.

Mr. Cowan: Omaha?

Mr. Trieschmann: Yes, sir.

Mr. Cowan: Denver?

482 Mr. Trieschmann: Yes.

Mr. Cowan: Do you go up there?

Mr. Trieschmann: I go to some of those places.

Mr Cowan: Do you sell railroad lumber supplies to railroad companies?

Mr. Trieschmann: Yes.
Mr. Cowan: Do you sell at Chicago?
Mr. Trieschmann: Occasionally.
Mr. Cowan: St. Louis?
Mr. Trieschmann: Yes.
Mr. Cowan: Do you go to those places for the purpose of making contracts for sales?
Mr. Trieschmann: Sometimes.
Mr. Cowan: Where is your chief sale for the lumber you produce down there?
Mr. Trieschmann: The Central States of the United States.
Mr. Cowan: I do not know hardly—you mean up the Mississippi and Ohio Valley and this country north, and the Missiouri Valley?
Mr. Trieschmann: That is what I mean.
Mr. Cowan: As auditor of the railroad company you receive passes, do you not, from the Iron Mountain?
483 Mr. Trieschmann: Yes.
Mr. Cowan: The Rock Island?
Mr. Trieschmann: Yes.
Mr. Cowan: Any other officers of your railroad company receive passes?
Mr. Trieschmann: I think there is one other.
Mr. Cowan: Who is he?
Mr. Trieschmann: The vice-president.
Mr. Cowan: What is his position with the lumber company?
Mr. Trieschmann: Manager.
Mr. Cowan: Does he make sales also?
Mr. Trieschmann: Sometimes. Very seldom.
Mr. Cowan: When you make sales to railroad companies, large institutions, you go there oftentimes to make the contract, do you not?
Mr. Trieschmann: Very seldom. We have traveling men for that purpose.
Mr. Cowan: When you are traveling for the lumber company, making sales, you use your passes that you get from the railroad company on account of being the auditor of the Crossett Railway Company, do you not?
Mr. Trieschmann: Well, that is soliciting business for the
484 Crossett Railway Company.
Mr. Cowan: How is that?
Mr. Trieschmann: That would be soliciting business for the Crossett Railway Company.
Mr. Cowan: To pay it out on lease of logging cars?
(No response.)
Mr. Cowan: The Crossett Railway Company is not making any money, as I understand?
Mr. Trieschmann: Yes, sir, they are.
Mr. Cowan: You said they never paid a dividend.
Mr. Trieschmann: Well, they have a big surplus.
Commissioner Harlan: Tell us about the surplus. What is the amount of it? I was going to inquire.

Mr. Trieschmann: Well, I would prefer to file a statement, in this report, showing the surplus.

Commissioner Harlan: Never mind the exact statement. You can do that later. Tell us now about what the surplus is.

Mr. Trieschmann: I think it must be $10,000 or $12,000—no. it is about $30,000, I think.

Commissioner Harlan: How long has it taken to accumulate that amount?

Mr. Trieschmann: Since 1905.

485 Commissioner Harlan: Pursuing Judge Cowan's question about the free transportation, have you passes on any other than the Rock Island and Iron Mountain?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: On what roads?

Mr. Trieschmann: I do not know that I can recall the exact roads.

Commissioner Harlan: About how many such passes have you?

Mr. Trieschmann: I think about six or seven.

Commissioner Harlan: And the vice-president also has that many?

Mr. Trieschmann: I am not sure about that; I think he has.

Commissioner Harlan: Have your assistant salesmen any passes?

Mr. Trieschmann: No, sir.

Examiner Burchmore: The line north of Stephens now operated by the Crossett Railway Company is still owned by the lumber company?

Mr. Trieschmann: Yes.

Examiner Burchmore: It is leased to the Crossett Railway Company?

486 Mr. Trieschmann: Yes.

Examiner Burchmore: Can you state the terms of that lease with respect to the consideration?

Mr. Trieschmann: I think it is about $400 per month, in round figures.

Commissioner Harlan: That is for the whole ten miles?

Examiner Burchmore: Per mile?

Mr. Trieschmann: That is just the total.

Examiner Burchmore: For how many miles?

Mr. Trieschmann: The full distance.

Examiner Burchmore: Ten miles?

Mr. Trieschmann: No, eight miles. That is also on file.

Examiner Burchmore: What was the cost of construction of that road per mile, in a general way; do you know?

Mr. Trieschmann: Not without referring to the records, no, sir.

Commissioner Harlan: Do you mean you cannot tell in a general way about what it cost?

Mr. Trieschmann: Well, I should judge $5,000 or $6,00 per mile.

Examiner Burchmore: Was not the first contract entered into in the summer of 1909?

487 Mr. Trieschmann: For the four miles?

Examiner Burchmore: For the first four miles.

Mr. Trieschmann: Yes.

Examiner Burchmore: Was not the consideration for that four miles $5,000 a year?

Mr. Trieschmann: I would have to look at the records for that.

Commissioner Harlan: Would you be kind enough to get your annual report?

Mr. Trieschmann: Yes, sir.

Examiner Burchmore: Does your lumber company sell any lumber in the State of Arkansas?

Mr. Trieschmann: It does.

Examiner Burchmore: Does it sell any in the State of Louisiana?

Mr. Trieschmann: Yes, sir.

Examiner Burchmore: You said it did in Texas. What division is received on joint rates on shipments to points in Arkansas, Louisiana and Texas?

Mr. Trieschmann: $3.00 per car.

Examiner Burchmore: You receive no divisions in cents per hundred pounds?

488 Mr. Trieschmann: No.

Examiner Burchmore: Is there any explanation for that?

Mr. Trieschmann: Other than that we could not make arrangements.

Examiner Burchmore: The trunk lines declined to give you any divisions in cents per 100 pounds?

Mr. Trieschmann: Yes, sir.

Examiner Burchmore: And you have no milling in transit arrangements to those states?

Mr. Trieschmann: No.

Examiner Burchmore: But simply a switching charge which is absorbed?

Mr. Trieschmann: Yes.

Commissioner Harlan: Get your annual report and then come back.

Mr. Cowan: I have one question now. You do not know what it costs you per car to perform that service with the engine of moving the lumber from the place where it is loaded and delivering it to the exchange track, to the Rock Island or Iron Mountain?

Mr. Trieschmann: No, sir, I could not give you that.

Commissioner Harlan: You have no other witness?

489 Mr. Gaughan: I have no other witness, but I want to ask Mr. Trieschmann another question. What is the population of Crossett?

Mr. Trieschmann: Just about 2,500.

Mr. Gaughan: What kind of a town is it?

Mr. Trieschmann: It is a first class little village.

Mr. Gaughan: It has got schools there?

Mr. Trieschmann: Fine schools; yes, sir.

Mr. Gaughan: A public library?

Mr. Trieschmann: A public library and a public hall, and seven or eight churches.

Commissioner Harlan: Does it not come within the class of communities which are ordinarily referred to as company towns?

Mr. Trieschmann: Yes, I think it would come under that class.

Commissioner Harlan: You have no other witness?

Mr. Gaughan: No.

(At 5:20 P. M., at the adjournment of the day's hearing, Mr. Trieschmann reappeared and announced that he desired to make a further statement.)

490 Commissioner Harlan: Mr. Trieschmann, do you wish to make any statement in regard to something you have said heretofore in regard to your testimony?

Mr. Trieschmann: In regard to that $100 a month, I will just refer to our annual report. That is handled as a journal entry in the lumber company's books and also in the railroad company's books, which shows how it is disbursed.

Commissioner Harlan: Then you substitute your annual report in that regard for the explanation you have heretofore given?

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: You said something a moment ago about a plan for disposing of your line to some other carrier.

Mr. Trieschmann: Yes, sir.

Commissioner Harlan: What is that?

Mr. Trieschmann: We have a definite proposition from a trunk line today to buy the Crossett line 20 miles north, running from Crossett north, and if purchased, that trunk line will complete the line to Wilmar that we have had in contemplation, and a proposed line from Wilmar north to Pine Bluff.

491 Examiner Burchmore: What trunk line do you refer to?

Mr. Trieschmann: The Arkansas, Louisiana & Gulf. The president, vice-president and stockholders were at our place only last week and were trying to buy the road. We are awaiting a decision from the Commission. If that road cannot be legally operated by this present ownership then we must sell it, but if it can be, we want to run it north.

Commissioner Harlan: If you run it north, it will be in connection with another spur line called the Wilmar & Saline River?

Mr. Trieschmann: Yes, sir. We will buy that and make a permanent line from Wilmar to Crossett.

Commissioner Harlan: You will have to build how many miles in order to join that road?

Mr. Trieschmann: Two or three miles. That taps all that new timber.

Commissioner Harlan: The next road is the Doniphan, Kensett & Searcy. Is that road present by a representative? Counsel responded this morning for the Doniphan, Kensett & Searcy, and I would like to know if there is anyone here representing that
492 road, the attorney or official or agent of that company.

(No response.)

Commissioner Harlan: The record will show that that road was called.

(At this point Mr. Scott appeared.)

Commissioner Harlan: Have you any witness?

Mr. Scott: No, sir. I wish to make an inquiry. As I understand the situation, the Commission has had its examiners on our property a number of times and in our offices, and has obtained detailed information from us. They have made independent inquiry and have gotten full information as to our property and our method of doing business, and I suppose they have reported the result of those examinations to the Commission, and that the reports are on file. I assume that those reports, together with the reports my companies have made in obedience to the law and to the requirements of the Commission will be taken as a part of the record in this case and would be considered in the final determination of it. Now, if I am correct in that, after conference with my people, that we will be willing to submit the matter to the Commission, provided it is understood, of course, that we suffer no prejudice by reason of the fact that we have not filed here any petition, complaint,
493 pleading or other paper, and that we introduce no other evidence.

Commissioner Harlan: Am I to understand that you renounce the right to present your case?

Mr. Scott: No, sir; we do not renounce the right to present our case.

Commissioner Harlan: Now is the time to present it unless you do. If your people are here, I would like them to rise and be sworn.

Mr. Scott: My client will not be here until tomorrow. I thought I might stop him on the way, if the record could be made up in the way I have suggested. We have entered our appearance here, and are here in open court protesting against the cancellation of the through rates and cutting off of our divisions. I think we may be satisfied with the record as made up from those reports.

Commissioner Harlan: If you represent that road as counsel, it is for you to say what your case will be, and if you are satisfied to let your case stand upon such presentation of it as you have now suggested, it is for you to say.

Mr. Scott: Did I understand your Honor that in passing upon our case you would take up those reports already on file?

494 Commissioner Harlan: I do not know what the Commission will do. The Commission usually fully advises itself from all the information available, but the Commission expected your road, among others, to make its representation at this time.

Mr. Scott: I will ask your Honor to adjourn it until tomorrow, then, as I cannot take it up at this time.

Commissioner Harlan: Well, I see no objection to that. Your case will be called again tomorrow.

Is the Arkansas & Southeastern before the Commission?

Mr. H. L. Fitzhugh: Yes, your Honor.

495 *Central Railway of Arkansas.*

C. W. JONES was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: Where do you reside?
Mr. Jones: Fort Smith, Arkansas.
Commissioner Harlan: What is your business?
Mr. Jones: I am secretary, treasurer and general manager of the Central Railway Company of Arkansas.
Commissioner Harlan: What are the termini of that road?
Mr. Jones: Ola, on the Rock Island.
Commissioner Harlan: And what is the other end of it?
Mr. Jones: It is at Brizi, Arkansas.
Commissioner Harlan: Is that a fixed point or a movable point?
Mr. Jones: It is a fixed point.
Commissioner Harlan: What is the mileage between those points?
Mr. Jones: 13.13 miles.
Commissioner Harlan: What is the character of the rail on that road?
Mr. Jones: 60 pound steel.
496 Commissioner Harlan: When was it built?
Mr. Jones: 1906 and 1907.
Commissioner Harlan: You mean the whole road was built at that time, or——
Mr. Jones: It was commenced in 1906 and completed in 1907.
Commissioner Harlan: By whom was the road built?
Mr. Jones: By the Central Railway Company of Arkansas.
Commissioner Harlan: What is the capital of that company?
Mr. Jones: The authorized capital is $2,600,000.
Commissioner Harlan: And the issued capital?
Mr. Jones: $260,000.
Commissioner Harlan: Was that capital issued for cash?
Mr. Jones: The capital stock?
Commissioner Harlan: The capital that is already issued, $260,000, was it issued for cash?
Mr. Jones: I do not understand: I do not get that idea.
Commissioner Harlan: Well, you say that capital was issued. Now, was it——
Mr. Jones: No, not all cash.
Commissioner Harlan: Just explain how much was cash.
Mr. Jones: I think there were about $200 a mile issued.
Commissioner Harlan: $200 a mile for 13 miles?
497 Mr. Jones: Something like that—no, $2,000.
Commissioner Harlan: $2,000?
Mr. Jones: Yes.
Commissioner Harlan: And what property was acquired by the railway company to represent the balance of the issued capital?
Mr. Jones: The right of way, rails, equipment, depots, and so forth.

Commissioner Harlan: How much did that railroad cost?
Mr Jones: It has cost $260,000.
Commissioner Harlan: How much a mile is that?
Mr. Jones: It is a little over $19,000.
Commissioner Harlan: Did that cost include the equipment?
Mr. Jones: The equipment; yes, sir.
Commissioner Harlan: What is the equipment?
Mr. Jones: The equipment consists of five locomotives, 16 flat cars, three box cars, and a passenger coach.
Commissioner Harlan: One passenger coach?
Mr. Jones: One passenger coach.
Commissioner Harlan: And a mail car, mail and express car?
Mr. Jones: That is a combination passenger, mail and baggage car.

Commissioner Harlan: Any bridges on the line?
498 Mr. Jones: There are a number of pile bridges.
Commissioner Harlan: Any grades?
Mr. Jones: The grade is about 1.3, I think.
Commissioner Harlan: Any cuts or fills?
Mr. Jones: Yes, sir.
Commissioner Harlan: What is the general character of the country?
Mr. Jones: It is mountainous, rocky and hilly.
Commissioner Harlan: Who are the officers of this road?
Mr. Jones: Mr. L. L. Siboll, is president; A. F. Coughton, vice-president, and C. W. Jones, secretary and treasurer.
Commissioner Harlan: Where is your general office?
Mr. Jones: They incorporated in Fort Smith, but their business office is at Plainview, Arkansas.
Commissioner Harlan: Incorporated under the general railroad law of Arkansas?
Mr. Jones: Yes.
Commissioner Harlan: How many clerks have you in your general office?
Mr. Jones: There are two at Plainview.
Commissioner Harlan: Is that all at Plainview?
Mr. Jones: Those are all the clerks there. That is, the
499 station agent and his assistant.
Commissioner Harlan: How many crews have you?
Mr. Jones: Three.
Commissioner Harlan: How many men?
Mr. Jones: We average about some 27 to 30 men, including the section men.
Commissioner Harlan: Are you connected with any lumber company?
Mr. Jones: With the Fort Smith Lumber Company.
Commissioner Harlan: What is your relation to that company?
Mr. Jones: Secretary and treasurer and general manager.
Commissioner Harlan: Stockholder?
Mr. Jones: Yes, sir.
Commissioner Harlan: Are the other officers of the railroad company connected with that company?

Mr. Jones: Yes, sir.

Commissioner Harlan: What is their position in your lumber company?

Mr. Jones: They are the same.

Commissioner Harlan: They use the same title?

Mr. Jones: Yes, sir.

Commissioner Harlan: How many stockholders has the
500 railroad company?

Mr. Jones: Ten.

Commissioner Harlan: Are they also the stockholders of the lumber company?

Mr. Jones: Part of them are; there are three, I believe, that are not stockholders of the lumber company.

Commmissioner Harlan: But the road is substantially owned, I assume, by the stockholders of the lumber company?

Mr. Jones: Yes, sir.

Commissioner Harlan: It is practically the same investment; the same interest?

Mr. Jones: Yes, sir. The lumber company furnished the railroad company with the money to build the road; they are practically the same.

Commissioner Harlan: Just how was that done? You say the lumber company furnished the railroad company the money to build the road. The railroad company has stockholders. Did they furnish the money, or did it come directly from the lumber company?

Mr. Jones: Most of it from the lumber company.

Commissioner Harlan: Paid over to the railroad company, and the railroad stock was issued to the lumber company?

501 Mr. Jones: Yes.

Commissioner Harlan: And afterwards transferred to the stockholders of the railroad company?

Mr. Jones: Yes.

Commissioner Harlan: So that practically the entire cost of the railroad company and equipment was furnished by the lumber company?

Mr. Jones: Yes.

Commissioner Harlan: And the railroad company is now practically owned by the lumber company?

Mr. Jones: Yes, sir.

Commissioner Harlan: Where is the mill of the lumber company?

Mr. Jones: Seven miles southwest of the junction with the Rock Island at Ola, at Plainview.

Commissioner Harlan: Where is it with respect to your line?

Mr. Jones: The mill?

Commissioner Harlan: Yes.

Mr. Jones: The mill is located on the Central Railway of Arkansas.

Commissioner Harlan: How far is it from your mill to the
502 Rock Island main line?

Mr. Jones: Seven miles.

Commissioner Harlan: What other line does your railroad company join?

Mr. Jones: None.

Commissioner Harlan: Then your railroad has seven miles of track over which the manufactured lumber is carried?

Mr. Jones: Yes.

Commissioner Harlan: And six miles over which the logs are carried?

Mr. Jones: Yes.

Commissioner Harlan: What acreage does the lumber company own?

Mr. Jones: They have in the neighborhood of 60,000 acres of fine timber, uncut.

Commissioner Harlan: How near is the present logging operation to the mill?

Mr. Jones: It is about seven miles.

Commissioner Harlan: Seven miles?

Mr. Jones: Ten miles to the mill.

Commissioner Harlan: And six miles of that distance is covered by your track?

503 Mr. Jones: The lumber company have a spur track——

Commissioner Harlan: I know that, but six miles of that ten miles is covered by the tracks of the railroad company—or perhaps you had better explain how that is.

Mr. Jones: The spur of the lumber company is four miles from the main line at present. Of course that moves as we cut the timber.

Commissioner Harlan: Where does the spur line leave the railroad company's track, at the mill?

Mr. Jones: No, sir; it is four miles southeast from the the mill.

Commissioner Harlan: Does the track of the Central Railway Company run on the edge of the timber lands owned by the lumber company or through them?

Mr. Jones: The track of the Central Railway of Arkansas runs on the edge of the timber holdings at the present time.

Commissioner Harlan: And the spur track runs down in the forest?

Mr. Jones: Runs into the timber; yes, sir.

Commissioner Harlan: What is the direction according to the compass from the mill to the end of the Central Railway's track?

Mr. Jones: It is southeast.

504 Commissioner Harlan: Then to the north and east of the Central Railway's tracks there is no timber land owned by the lumber company?

Mr. Jones: North of the Central's tracks?

Commissioner Harlan: Yes.

Mr. Jones: Yes, sir.

Commissioner Harlan: In which direction does the spur track run?

Mr. Jones: It runs east from the Central's tracks.

Commissioner Harlan: Are there any other lumber operations around there?

Mr. Jones: There are three mills located on the line, and there are five or six other mills in the vicinity that ship over the railroad.

Commissioner Harlan: Have you a map of your line?

Mr. Jones: I have a map of the line. (Producing blue print.)

Commissioner Harlan: You have been kind enough to show us a map of your road. I understand that it joins the Rock Island at a place called Ola.

Mr. Jones: Yes, sir.

Commissioner Harlan: And then proceeds in a southwesterly direction?

505 Mr. Jones: Yes, sir.

Commissioner Harlan: For about how far?

Mr. Jones: Seven miles, to Plainview.

Commissioner Harlan: And apparently passes around the edge of a mountain?

Mr. Jones: The point of a mountain.

Commissioner Harlan: At that point, as I infer from this map, the lumber lands are owned by the Fort Smith Lumber Company?

Mr. Jones: Yes, sir.

Commissioner Harlan: Then your line swinging around to the south of the mountain, goes for some seven miles to its present terminus?

Mr. Jones: Yes.

Commissioner Harlan: And it makes a loop?

Mr. Jones: Yes.

Commissioner Harlan: And inside of that loop lies this mountain land on which your timber is?

Mr. Jones: Yes.

Commissioner Harlan: And your timber lands extend how far east from the apex of the loop?

Mr. Jones: About 24 miles.

Commissioner Harlan: Then your logging road runs to the

506 north?

Mr. Jones: Well, north and east, or northeast, rather.

Commissioner Harlan: North and east from the south side of this loop?

Mr. Jones: Yes.

Commissioner Harlan: And it runs into timber lands that are owned by the Fort Smith Lumber Company exclusively?

Mr. Jones: Yes, sir; that spur line does.

Commissioner Harlan: Now, is there any lumber south of the south side of the loop of your railroad?

Mr. Jones: Yes, sir.

Commissioner Harlan: Does that belong to the Fort Smith Lumber Company?

Mr. Jones: No.

Commissioner Harlan: To whom does that belong?

Mr. Jones: There is one tract that is south of the Fourche River that is held by the Choctaw Investment Company.

Commissioner Harlan: Where is their mill?

Mr. Jones: They have no mill. That is the land south.
Commissioner Harlan: They are not operating their land?
Mr. Jones: No.
Commissioner Harlan: Are there any mills on your railroad except your own mill?
507 Mr. Jones: Yes, sir.
Commissioner Harlan: What mills are on that line, and where are they?
Mr. Jones: There is one about a mile and a half east of Plainview, and one about three miles east of Plainview. One is owned by J. J. Ford and the other by J. W. Berry.
Commissioner Harlan: Are they on the southern loop of your line or the northern?
Mr. Jones: The southern.
Commissioner Harlan: Are they directly on your line?
Mr. Jones: Yes, sir, they have sidings to both of them.
Commissioner Harlan: What lumber are they using?
Mr. Jones: They are cutting oak and pine.
Commissioner Harlan: From whose land?
Mr. Jones: From their own lands, or from timber which they purchased.
Commissioner Harlan: Is that south of the south line of your land?
Mr. Jones: Yes, sir; south.
Commissioner Harlan: Have they any logging roads?
Mr. Jones: No.
508 Commissioner Harlan: How far from their mill are their logging operations at the present?
Mr. Jones: I presume from a mile to a mile and a half.
Commissioner Harlan: How do they get the logs to the mill?
Mr. Jones: They are hauled by wagons.
Commissioner Harlan: How large is their operation?
Mr. Jones: One of them is about 6,000 per day and the other about 10,000 capacity.
Commissioner Harlan: Do you mean in manufactured lumber, 10,000 feet?
Mr. Jones: Yes, sir; that is, oak lumber principally.
Commissioner Harlan: What is your total tonnage?
Mr. Jones: For what period?
Commissioner Harlan: Well, for the last fiscal year.
Mr. Jones: Including the logs into the mill and——
Commissioner Harlan: The total tonnage hauled by the railroad company.
Mr. Jones: And not by the logging road?
Commissioner Harlan: Not by the logging road.
Mr. Jones: We had about 35,000 tons total.
Commissioner Harlan: During the year?
Mr. Jones: During the year.
509 Commissioner Harlan: You do not operate the logging roads, do you, your railroad company?
Mr. Jones: The railroad company operates the road, and that is——

Commissioner Harlan: You did not quite catch that point. Does the lumber company operate the logging roads?

Mr. Jones: The logging roads?

Commissioner Harlan: Yes.

Mr. Jones: The lumber company builds the logging roads, and the railroad company sends their engines there and uses their equipment.

Commissioner Harlan: The lumber company has no equipment?

Mr. Jones: No.

Commissioner Harlan: Including the traffic on the logging road, what is your total tonnage, or what was it last year?

Mr. Jones: It runs something like 75,000 tons.

Commissioner Harlan: What proportion of that was lumber, logs owned by the Fort Smith Lumber Company?

Mr. Jones: About 19,000 tons—that was lumber.

Commissioner Harlan: Let us get that right. Are you making a distinction between logs and lumber?

Mr. Jones: Yes, sir.

510 Commissioner Harlan: I want your total tonnage of everything, logs, lumber and general merchandise and farming products and everything else. What was it last year?

Mr. Jones: About 75,000 tons.

Commissioner Harlan: Now, what portion of that consisted of logs and lumber for all persons?

Mr. Jones: I think about 50,000 tons.

Commissioner Harlan: And of that 50,000 tons, what part belonged to the Fort Smith Lumber Company?

Mr. Jones: I am wrong on that; I did not understand it. There is about 50,000 tons for the Fort Smith Lumber Company; that includes all logs into the mill and the lumber out of the mill.

Commissioner Harlan: I will put the inquiry again, because we want to get this as accurately as possible. I know want to know what was the volume in tons of your traffic during the last fiscal year, including the logs and lumber and farm products and all other traffic?

Mr. Jones: About 75,000 tons.

Commissioner Harlan: Now, what part of the 75,000 tons was logs and lumber for all persons, all shippers?

Mr. Jones: I do not know whether I have got that so I can

511 give it to you.

Commissioner Harlan: Have you an exhibit which will show?

Mr. Jones: No, sir.

Examiner Burchmore: Is a copy of your annual report here?

Mr. Jones: No.

Commissioner Harlan: Can you give us an approximate statement?

Mr. Jones: I can give you a statement of the lumber from Plainview to Ola.

Commissioner Harlan: Very well; give us that. How much was that?

Mr. Jones: That is for the Fort Smith Lumber Company or all?

Commissioner Harlan: All, from Plainview to Ola.

Mr. Jones: 34,534 tons, everything; that is, from Plainview to Ola; that includes lumber, express, mail, baggage, and so forth.

Commissioner Harlan: What part of that was lumber?

Mr. Jones: There was about 20,753 tons.

Commissioner Harlan: From Plainview to Ola?

Mr. Jones: Yes, sir.

Commissioner Harlan: What part of that lumber belonged
512 to the Fort Smith Lumber Company?

Mr. Jones: 19,165 tons.

Commissioner Harlan: Have you any figures showing the logs that were hauled into the mill at Plainview?

Mr. Fitzhugh: The question of milling in transit does not enter into this. We get no division except from Ola to Plainview, and we make no charge whatever for the question of logging, and there is no addition for that, and we did not think it necessary to prepare that information; but all the other information we have. The milling in transit proposition does not enter into it at all.

Commissioner Harlan: You said there were a couple of mills on the south loop of your road?

Mr. Jones: Yes.

Commissioner Harlan: Do you haul manufactured lumber for that community, Ola?

Mr. Jones: Yes, sir.

Commissioner Harlan: To what extent during the year?

Mr. Jones: There have been, I suppose, from one mill probably 15 to 20 cars.

Commissioner Harlan: During the year?

Mr. Jones: And the other one has been 50 to 60 carloads more.

513 Commissioner Harlan: Do you haul any other products from the south loop into Ola, general merchandise and farm products?

Mr. Jones: Cotton seed.

Commissioner Harlan: How much cotton seed?

Mr. Jones: I think there have been five cars this year.

Commissioner Harlan: In flat cotton?

Mr. Jones: Yes, sir.

Commissioner Harlan: How much——

Mr. Jones: That is on the south loop.

Commissioner Harlan: That is on the south road loop into Ola?

Mr. Jones: No, not from there.

Commissioner Harlan: Any other products?

Mr. Jones: From that point?

Commissioner Harlan: Yes.

Mr. Jones: We have handled piling and logs.

Commissioner Harlan: That was your own piling and logs?

Mr. Jones: No, sir, for other people.

Commissioner Harlan: You have not the figures showing that?

Mr. Jones: No, I have not the figures up, all of them, for
514 the year.

Commissioner Harlan: Are there any towns on your line?

Mr. Jones: Plainview.

Commissioner Harlan: What is the size of Plainview?

Mr. Jones: About 1,500.

Commissioner Harlan: Is that what they call a company town?

Mr. Jones: No.

Commissioner Harlan: How many mills are there?

Mr. Jones: The Fort Smith Lumber Company and W. M. Hippy.

Commissioner Harlan: Any one else?

Mr. Jones: At the end of the line there, there is five or six small mills that ship from Plainview.

Commissioner Harlan: Are they on your line?

Mr. Jones: They are not right on the line of the railroad, but they are a little distance from there.

Commissioner Harlan: Half a mile or so?

Mr. Jones: Some of them, or a little further.

Commissioner Harlan: How do they get to your line?

Mr. Jones: Haul it by wagon.

Commissioner Harlan: What rate do you make to them to haul it to Ola?

515 Mr. Jones: The published tariff, the same as the Arkansas tariff, if they ship to Ola.

Commissioner Harlan: If it goes on the joint through rate, what allowance do you get on all this lumber?

Mr. Jones: The division?

Commissioner Harlan: The division.

Mr. Jones: We get to Oklahoma points three and three-quarter cents, and to other points four cents.

Commissioner Harlan: What is the highest division you have ever received?

Mr. Jones: Four cents.

Commissioner Harlan: From what line?

Mr. Jones: The Rock Island.

Commissioner Harlan: Is this another railroad line north there, or a river (indicating)?

Mr. Jones: That is a river.

Commissioner Harlan: Do you recall approximately your gross revenues last year?

Mr. Jones: About $35,000.

Commissioner Harlan: And how much net?

Mr. Jones: The net revenue was—we lost about $440 in operating our road last year.

516 Commissioner Harlan: You call that your net, then?

Mr. Jones: Yes, sir; that is net.

Commissioner Harlan: That is, you have not paid any dividends at all?

Mr. Jones: No.

Commissioner Harlan: Were you among those that were present at the birth of this railroad; were you among those who conceived the plan of building a railroad?

Mr. Jones: No, sir.

Commissioner Harlan: Can you tell us why it was built?

Mr. Jones: The road was built with a view of going to Hot Springs eventually, and a branch from Plainview to Waldo.

Commissioner Harlan: How far is Hot Springs?

Mr. Jones: From where?

Commissioner Harlan: Well, from anywhere on your line?

Mr Jones: It would be about 85 miles from Plainview.

Mr. Cowan: What direction from this point?

Mr. Jones: South.

Commissioner Harlan: Do you understand that was the primary object of starting this construction?

Mr. Jones: Yes, sir.

Commissioner Harlan: You did not start it to bring in
517 this lumber?

Mr. Jones: Well, they expected to get shipments, or to get tonnage.

Commissioner Harlan: Do you mean the Commission to understand that you started out to reach Hot Springs or bust, is that the kind of a road it was?

Mr. Jones: No, sir.

Commissioner Harlan: Is it not a fact that you started out to get this lumber into your mill?

Mr. Jones: That was eventually what we expected to do with it.

Commissioner Harlan: Well, you are not doing it eventually, you are making Hot Springs the eventual end of this road. Did you not put it in there to get your logs in?

Mr. Jones: The railroad?

Commissioner Harlan: Yes.

Mr. Jones: We built it for to get the timber out and develop the country, and there is quite a farming country in there, quite a valley.

Commissioner Harlan: Where is that Valley?

Mr. Jones: That is this Fourche Valley.

Commissioner Harlan: You are not carrying any of that
518 farming stuff now, are you?

Mr. Jones: Yes, sir.

Commissioner Harlan: Well, I want to know about it.

Mr. Jones: We have hauled this year 5,000 bales of cotton from Plainview.

Commissioner Harlan: But you are not hauling any of that cotton into Plainview?

Mr. Jones: No, sir.

Commissioner Harlan: How does that cotton reach Plainview?

Mr. Jones: By wagon.

Commissioner Harlan: Is there a compress there?

Mr. Jones: No.

Commissioner Harlan: You carry it as flat cotton to what points?

Mr. Jones: We ship it to Little Rock.

Commissioner Harlan: It is compressed at Little Rock?

Mr. Jones: It is compressed at Little Rock.

Commissioner Harlan: How does it get to Little Rock, on a joint rate?

Mr. Jones: It gets there on a local rate, but afterwards we are parties to a joint rate if it be shipped to New York or anywhere else.

519 Commissioner Harlan: It goes to Little Rock on a joint rate between your road and the Rock Island?

Mr. Jones: Yes, sir.

Commissioner Harlan: Do you remember what that is?

Mr. Jones: No.

Commissioner Harlan: What is your division on it?

Mr. Jones: We get ten cents per 100 pounds.

Commissioner Harlan: You do not know what the rate is to Little Rock, the joint rate?

Mr. Jones: As I understand it, that is the Commission rate: those are the rates—that is taken from Plainview to Little Rock and then we are parties to a joint rate, and that is shipped to New Orleans or Boston or——

Commissioner Harlan: It moves out of Little Rock on the balance of a through rate?

Mr. Jones: Yes, sir.

Commissioner Harlan: I want to know what the local rate is, it goes in first on a local rate?

Mr. Jones: Yes, sir. I do not remember what it is.

Commissioner Harlan: Do you know what it is Mr. Fitzhugh?

Mr. Fitzhugh: No, I do not know. There are compress regulations that govern those things, but I do not know what

520 those regulations are.

Commissioner Harlan: The compress regulations do not govern the rate. They may be a part of the privilege of the through shipment.

Mr. Fitzhugh: Yes.

Commissioner Harlan: The road from Ola to Plainview was built in 1906 or started then?

Mr. Jones: In 1906, and completed in 1907.

Commissioner Harlan: Now, you have described the ownership of these two interests, the lumber company and the railroad company. The lumber company was in existence before the railroad company, was it not?

Mr. Jones: The lumber company was in existence, yes, sir, before the railroad.

Commissioner Harlan: When was the mill built?

Mr. Jones: The mill was built in 1909.

Commissioner Harlan: The mill was built after the railroad?

Mr. Jones: Yes, sir.

Commissioner Harlan: Is this a case of a railroad that has a lumber company as an incident to it, or is it a lumber company that has a railroad company as an incident to it?

Mr. Jones: We had been operating a mill at Abbott, which

521 was 60 or 70 miles west, for nine years, shipping our lumber down on the Rock Island rails to the territory tributary to those rails, and afterwards this railroad was built and we wanted to

get this lumber down through here, and this mill was built after the railroad.

Commissioner Harlan: Well, you built your mill in 1909?

Mr. Jones: Yes.

Commissioner Harlan: Were you doing any lumbering there before the mill was built?

Mr. Jones: No, sir, we were not.

Commissioner Harlan: You did not commence to lumber until after the mill was built?

Mr. Jones: No.

Commissioner Harlan: So the railroad started first?

Mr. Jones: Yes.

Commissioner Harlan: And was in operation a year or two before the mill was built?

Mr. Jones: Yes.

Commissioner Harlan: On its way to Hot Springs?

Mr. Jones: Yes, sir.

Examiner Burchmore: Before your mill was built at Plainview there was logging done on this road, and were those logs
522 moved down to your other mill?

Mr. Jones: There was a mill there of W. W. Gardner & Company, a small mill at Plainview.

Commissioner Harlan: You hauled logs there to that mill?

Mr. Jones: That was logs that were hauled there during the construction of that railroad, and I had nothing to do with it, and the railroad had nothing to do with it, as far as I remember.

Mr Fitzhugh: State when the Central Railroad of Arkansas was incorporated.

Mr. Jones: January 31, 1906.

Mr. Fitzhugh: Have you the articles of incorporation with you?

Mr. Jones: I have a copy.

Mr. Fitzhugh: Does the Commissioner care to have them? When did it build the railroad?

Commissioner Harlan: We have been all over that. One of the object in putting the questions from the bench was to shorten the examination. I hope you will not repeat any of those questions.

Mr. Fitzhugh: I will try not to. How long had it been in operation before the lumber company put up this mill on
523 the line?

Commissioner Harlan: That question has just been asked. The mill was built in 1909 and the railroad in 1906 and 1907.

Mr. Fitzhugh: Does the railway receive anything on account of milling in transit?

Mr. Jones: No, sir.

Mr. Fitzhugh: Does it make any charges for that?

Mr. Jones: No.

Examiner Burchmore: Are the logs hauled free of charge up to the mill?

Mr. Jones: No, sir, the logs are hauled from the spur line to the mill, by authority of the Arkansas Railroad Commission, up to Plainview.

Commissioner Harlan: At the state rate?

Mr. Jones: At 50 cents 1,000 feet, and way bills are made for all those cars.

Mr. Fitzhugh: How many trains per day does your road operate?

Mr. Jones: Three round trips per day.

Mr. Fitzhugh: Does it do a passenger service?

Mr. Jones: Yes, sir.

Mr. Fitzhugh: Does it run on schedule time?

524 Mr. Jones: Yes, sir.

Mr. Fitzhugh: State if it carries mail and express.

Mr. Jones: Yes, sir, it carries both mail and express.

Mr. Fitzhugh: To give the Commission an idea of the amount of passenger business, state the number of paid passengers carried for the month of October, 1910.

Mr. Jones: There were about 1,600.

Mr. Fitzhugh: Does your road comply with the Federal Safety Appliance Act by equipping engines and cars with air brakes and automatic couplers?

Mr. Jones: Yes, sir.

Mr. Fitzhugh: Does it make its report to the Interstate Commerce Commission?

Mr. Jones: Yes.

Mr. Fitzhugh: And does it keep its books in the manner required by the Commission?

Mr. Jones: Yes.

Mr. Fitzhugh: Does it operate under the rules and regulations of the Arkansas Railroad Commission?

Mr. Jones: Yes, sir.

Mr. Fitzhugh: You stated that Plainview was a place of 1,500 inhabitants.

525 Mr. Jones: Yes.

Mr. Fitzhugh: What other means have the people of Plainview for the transportation of their merchandise or produce to the general markets of the world?

Mr. Jones: No other means but the railway facilities.

Mr. Fitzhugh: Is the town of Plainview a lumber camp or is it a substantial town?

Mr. Jones: It is a substantial town.

Mr. Fitzhugh: How many banks there?

Mr. Jones: They have two banks.

Mr. Fitzhugh: How many general merchandise stores?

Mr. Jones: Six general stores.

Mr. Fitzhugh: Any brick business houses?

Mr. Jones: The two bank buildings are brick.

Mr. Fitzhugh: Can you state to the Commission the amount of business during the month of October, 1910, for the general public, and the revenue therefrom, and the amount done for the Fort Smith Lumber Company and the revenue therefrom?

Mr. Jones: I think I have a statement of it, sir. The lumber company had delivered to the railroad at Plainview 75 cars of lumber to haul to Ola, and by other people 15 cars of piling, 23 cars of

oak lumber and eight cars of logs, 62 cars of cotton, 10 cars
526 of cotton seed; that was for other people, which the Fort Smith Lumber Company had no interest in.

Mr. Fitzhugh: That was outgoing freight from Plainview to Ola?

Mr. Jones: Yes, sir.

Mr. Fitzhugh: As to the revenue derived from that freight, what percentage of it was from the Fort Smith Lumber Company?

Mr. Jones: From the Fort Smith Lumber Company was 33.39 per cent, and other shippers 56.75 per cent; passengers, eight per cent; mail, .55; express, 1.23; excess baggage, 1.9.

Commissioner Harlan: I suggest he file that statement.

(The statement so offered and identified was received in evidence and thereupon marked Central Railroad of Arkansas Exhibit No. 1, witness Jones, received in evidence December 9, 1910, and is attached hereto.)

Mr. Fitzhugh: Is that a fairly representative month?

Mr. Jones: Yes, sir.

Mr. Fitzhugh: State if the relative proportion of business done by your railroad for the Fort Smith Lumber Company and for the general public, is changing, and if so, whether or not you are doing a larger proportion or will continue to do a larger proportion
527 of business for the general public than for the lumber company.

Mr. Jones: I think the business will increase for the general public.

Mr. Jones: There was no town there when the railroad was built in there?

Mr. Jones: There was no town there when the railroad was built in there. It was started in 1907.

Mr. Fitzhugh: State if there are any other towns on beyond Plainview that depend upon this road to get their merchandise also.

Mr. Jones: There is Rover, Wing, Grovely, Blunton, which have general stores and are west of us, which could get their supplies of merchandise from Plainview and ship all their farming products and send it to Plainview, and it is sent out over our road.

Mr. Fitzhugh: You stated just now you had already carried this season 5,000 bales of cotton from Plainview to Ola. State how much cotton you carried during the whole season of last year.

Mr. Jones: That was 3,436 bales.

Mr. Fitzhugh: Does that indicate that the country is being
528 developed and more cotton being raised?

Mr. Jones: Yes, sir.

Mr. Fitzhugh: How long does the cotton season last—I suppose the Commission knows about that.

Commissioner Harlan: Yes.

Examiner Burchmore: The month of October was a little exceptional in that regard. It had more cotton than other months of the year.

Mr. Fitzhugh: Certainly. How much did you carry during the month of November from Plainview to Ola, how many bales?

Mr. Jones: I think it was about 2,300 for November, and about 1,900—I disremember the exact amount, but about 1,900 or 2,000 in October.

Mr. Fitzhugh: You carry cotton seed, corn and other produce?

Mr. Jones: Outbound?

Mr. Fitzhugh: Yes, from Plainview to the markets of the world.

Mr. Jones: There has been no corn shipped out of there, or any other farm products other than cotton and cotton seed.

Mr. Fitzhugh: With reference to bringing in corn or grain or farming utensils and vehicles for the Fourche Valley and
529 the little towns around and beyond Plainview?

Mr. Jones: That is all brought in and distributed at Plainview, and flour, corn, grain and hay and general merchandise.

Mr. Fitzhugh: State if you keep a railway agent at Plainview or elsewhere.

Mr. Jones: We have an agent at Plainview, and a joint agent at Ola.

Commissioner Harlan: Have you a station at Plainview?

Mr. Jones: Yes, sir.

Commissioner Harlan: For less than carload shipments?

Mr. Jones: Yes, sir.

Mr. Fitzhugh: Describe the station and what it cost——

Commissioner Harlan: No, that is enough.

Mr. Fitzhugh: Does your road issue bills of lading and way bills?

Mr. Jones: Yes, sir.

Mr. Fitzhugh: Schedules and time tables?

Mr. Jones: Yes.

Mr. Fitzhugh: Can you state whether or not these enterprises along your line are growing and increasing?

530 Mr. Jones: I think they are.

Mr. Fitzhugh: Has the Fort Smith Lumber Company or the Central Railway of Arkansas any interest whatever in any of these other saw mills or mercantile establishments which use your road?

Mr. Jones: None whatever.

Mr. Fitzhugh: Or any of its stockholders?

Mr. Jones: No.

Mr. Fitzhugh: With reference to the original object of building your road, some questions were asked you. Were you a member of the original incorporators?

Mr. Jones: I am a member of the original; yes.

Mr. Fitzhugh: Are you one of the original incorporators?

Mr. Jones: Of this road; yes, sir, but the road was originally started by other people; that is, that made the surveys for this line.

Mr. Fitzhugh: Tell the Commission if it is not a fact that the route you have surveyed is the shortest, easiest and most accessible route from that part of the state to Hot Springs, Arkansas.

Mr. Jones: Yes, sir.

Mr. Fitzhugh: And do you know if it was not the inten-

tion of the parties when they started to build this road, to
531 build it into Hot Springs, and of course to take the lumber, when they built the road?

Mr. Jones: The survey of this road was made by the Choctaw, Oklahoma & Gulf to start with, several years ago, and they expected to build this road from Ola to Hot Springs, as I understand. I had nothing to do with that part of it. Then afterwards they sold to the Rock Island and these parties then formed a company and were chartered, and then this company was chartered later, to which I was a party to this road or charter.

Commissioner Harlan: Has the company of which you are a member seriously contemplated the extension of this road to Hot Springs?

Mr. Jones: That was their intention; that was my understanding of the intention to do it; yes, sir. There are other interests that they expected to develop and build up this line and carry it through to Hot Springs, also through to Waldo.

Mr. Fitzhugh: I believe you asked the weight of the rails——

Commissioner Harlan: Yes; that is in.

532 Mr. Jones: 60 pound steel.

Mr. Fitzhugh: New?

Mr. Jones: Yes.

Mr. Fitzhugh: Bought by the railroad company itself?

Mr. Jones: Yes.

Examiner Burchmore: Aside from tariffs or division sheets has your company any contract with the Rock Island Road for allowances or divisions?

Mr. Jones: No.

Examiner Burchmore: Has any other road served by the Rock Island and your line?

Mr. Jones: They have a road from Ola to Dardanelle.

Examiner Burchmore: What is the name of that?

Mr. Jones: The Dardanelle, Ola & Southern.

Examiner Burchmore: Is there any relation between the Dardanelle, Ola & Southern and the Central Railway of Arkansas?

Mr. Jones: None at all.

Mr. Cowan: Is Dardanelle on any other road?

Mr. Jones: It is on the Arkansas River, and there is a railroad across the river.

Mr. Cowan: Is the railroad across the river accessible for
533 traffic moving north of Ola?

Mr. Jones: I presume not. It would have to be taken by one road and hauled across the river.

Mr. Cowan: You could not do that?

Mr. Jones: No.

Mr. Peirce: The road north of the river publishes through rates from Dardanelle, as I understand.

Mr. Jones: I do not know anything about that.

Mr. Peirce: The road leading out from Russellville to Dardanelle publishes through rates south of the river, that is, to Dardanelle

proper, although the rails terminate on the other side of the river. But the railroad takes the stuff to Dardanelle.

Mr. Cowan: Is there a bridge there?

Mr. Jones: An abandoned bridge.

Mr. Cowan: When the lumber company advanced the money to build this road, you were connected with the lumber company?

Mr. Jones: Yes, sir.

Mr. Cowan: You expected it, of course, to be a profitable enterprise because of the fact that you had the timber which could not be developed without the railroad?

Mr. Jones: Yes, sir.

534 Mr. Cowan: How much did that increase the value of the 60,000 acres of timberland?

Mr. Jones: By building the railroad?

Mr. Cowan: Yes.

Mr. Jones: I do not know that I could state how much it increased it.

Mr. Cowan: According to your judgement, what do you figure it would increase it?

Mr. Jones: I pre-ume it would double the value, probably.

Mr. Cowan: And it was that expectation, rather than the expectation of the amount of freight you would get, that induced you to enter into the enterprise?

Mr. Jones: I think they expected to get that traffic on the road other than the timber.

Mr. Cowan: You expected at least to make operating expenses out of the traffic, and then your company, which advanced the money to build it, of course would make a large sum of money by the enhancement of the value of the timber; that is correct, is it not?

Mr. Jones: How is that?

Mr. Cowan: You expected in addition to paying operating expenes to make a large sum of money by the enhanced

535 value of the timber land, naturally?

Mr. Jones: I do not know that the railroad figured on that at all.

Mr. Cowan: I mean the lumber company which advanced the money. The lumber company figured on that.

Mr. Jones: Having a profit on the timber?

Mr. Cowan: Yes.

Mr. Jones: They expected to get that; yes, sir.

Mr. Cowan: But they would expect to have a largely enhanced value to the 60,000 acres, by the building of the railroad?

Mr. Jones: It would make the timber more valuable by building the railroad.

Mr. Cowan: And that was the reason they advanced the $250,000 to build the railroad?

Mr. Jones: I do not know that that was the exact reason.

Mr. Cowan: There would not have been any chance to get the profit out of the timber, unless somebody built the railroad there?

Mr. Jones: No.

Mr. Cowan: The timber is not capable of being logged to any other place without building a railroad into it.

536 Mr. Jones: It could be logged to the Fourche River, part of it.

Mr. Cowan: But you were not doing that?

Mr. Jones: No.

Mr. Cowan: And that would be a very unsatisfactory method of course.

Mr. Jones: I think so.

Mr. Cowan: What kind of timber is it?

Mr. Jones: Yellow pine.

Mr. Cowan: You could float the pine, but you could not have floated the hard wood very well in the river.

Mr. Jones: We have no hard wood.

Mr. Cowan: Where do you market your lumber?

Mr. Jones: In Oklahoma, Missouri, Arkansas, Nebraska, some few shipments east of the Mississippi; not very many.

Mr. Cowan: And you come in competition with other producers of pine lumber from Texas, Louisiana and Arkansas?

Mr Jones: I presume so.

Mr. Cowan: On what basis do you make the price of your lumber at Plainview?

Mr. Jones: On the basis of the cost.

Mr. Cowan: And do you make the same price, no matter

537 where it is going?

Mr. Jones: Yes, sir.

Mr. Cowan: So the freight rate is added to the price of the lumber when it reaches the man who buys the lumber for retail purposes, or otherwise?

Mr. Jones: Yes, sir.

Mr. Cowan: Is there competition between your company in selling lumber at these various points and other companies selling lumber shipped from elsewhere? You meet the competition of other mills?

Mr. Jones: I presume so; yes, sir.

Mr. Cowan: And there is a competition, is there?

Mr. Jones: Yes, sir. There are other people in the business

Mr. Cowan: Well, there is no uniformity in prices of lumber agreed upon between the producers, no combination between them that fixes the wholesale price of lumber?

Mr. Jones: No, sir; none that I know of.

Mr. Cowan: So that it is an open competition where the freight rate from anywhere must figure in the value of the lumber delivered at the point of sale?

Mr. Jones: Yes.

538 Mr. Cowan: Have you the short line to Oklahoma from your place; is that the nearest pine timber for Oklahoma?

Mr. Jones: They have timber in Oklahoma.

Mr. Cowan: They have not much pine timber there?

Mr. Jones: Some pine; yes, sir, in eastern Oklahoma there is quite a good deal of pine.

Mr. Cowan: What was the market value of that land before the railroad was decided upon?

Mr. Jones: The market value of the land?

Mr. Cowan: Yes, I mean the land and timber.

Mr. Jones: Well——

Mr. Cowan: Situated at it was before.

Mr. Fitzhugh: Is that material?

Commissioner Harlan: I think it is. It shows one object in building the road. Do you know what the market value was before the road was built, or its construction announced?

Mr. Jones: No, I do not.

Mr. Cowan: He said it about doubled, and I wondered what the market value of such land was, situated that far from the railroad.

Mr. Jones: I think land has been bought from $3.00 to $5.00 an acre.

539 Mr. Cowan: What is such land worth today?

Mr. Jones: There has been quite a good deal of land that has been offered from $4.00 to $6.00.

Mr. Cowan: How far from the railroad?

Mr. Jones: Some of it is six, eight or ten miles.

Mr. Cowan: It would, of course, depend on the stumpage in any event?

Mr. Jones: Yes, sir.

Mr. Cowan: When you say land offered, do you mean land that has got the virgin timber?

Mr. Jones: Yes.

Mr. Cowan: Pine.

Mr. Jones: Yes, sir; some kind of timber, mountain timber; that is all mountainous.

Examiner Burchmore: Is it a matter of public, common understanding that the Dardenelle, Ola & Southern is a tap line?

Mr. Jones: I don't know whether it is or not.

Examiner Burchmore: Who controls it?

Mr. Jones: It is in the hands of a receiver.

Examiner Burchmore: When was that road constructed?

Mr. Jones: I think 1907 or 1908, I don't remember the exact date.

Examiner Burchmore: Did it operate a general freight and passenger business?

Mr. Jones: Yes, sir.

540 Mr. Cowan: How did you come to build the road down that 13 miles and stop there? I don't understand that there is any mill there.

Mr. Jones: We chartered for 130 miles and we built ten per cent. of it.

Mr. Cowan: Why did you just build ten per cent of it?

Mr. Jones. Well, I think we had to build ten per cent in a certain length of time under the charter.

Mr. Cowan: You did not build it there and stop at that point for any industrial reason?

Mr. Jones: No, sir

Mr. Cowan: You did not intend to put a mill there?

Mr. Jones: We had not at that time; no, sir.

Mr. Cowan: And you only used four miles of it beyond Plainview, where you have connected your spur for your logging purposes?

Mr. Jones: That is used for our logging purposes, and they have a siding at the end of the line, which is used for the general public for anything they offer to be shipped.

Mr. Cowan: That spur belongs to your railroad company, it is not a mill proposition?

Mr. Jones: Which spur is that?

Mr. Cowan: The spur that branches out four miles from Plainview.

541 Mr. Jones: That is the lumber company's spur.

Mr. Cowan: You spoke about having a siding for hauling other people's traffic.

Mr. Jones: That is on the main line of the railroad.

Commissioner Harlan: That belongs to the railroad, but there is a spur which belongs to the lumber company which is operated by this railroad company.

Mr. Cowan: And the real cost $260,000, as you have stated. How much did you get back in the way of town lots, bonuses and other things of value that went to the railroad company for construction?

Mr. Jones: We got nothing in the way of bonuses; we had a few rights of way that were given to us, I suppose.

Mr. Cowan: I spoke of town lots also. Did you make certain money off of Plainview lots?

Mr. Jones: The Fort Smith Lumber Company own one-half interest in the town site.

Mr. Cowan: You exchange the usual transportation with other people?

Mr. Jones: Yes, sir.

Mr. Cowan: And do these passes go to the lumber company's employees?

542 Mr. Jones: Passes from whom?

Mr. Cowan: What you get from other railroads, the Rock Island and others.

Mr. Jones: The only transportation we get is that which I receive, and I am employed by the railroad company.

Mr. Cowan: You are the only one who gets any?

Mr. Jones: Yes.

Mr. Cowan: The reason you had ten incorporators in the railroad company and seven in the lumber company is that the law requires ten for the railroad company?

Mr. Jones: Not that I know of.

Mr. Cowan: If there should be a loss on the operation of the railroad company, that would fall upon the stockholders of the lumber company?

Mr. Jones: It would fall upon the stockholders of the railroad company.

Mr. Cowan: And they are stockholders of the lumber company?

Mr. Jones: Some of them are.

Mr. Cowan: What per cent of the stock of the railroad company——

Commissioner Harlan: That is all in the record. He said
543 it was practically owned by stockholders of the lumber company.

Mr. Cowan: That is what I thought, but I asked him if the loss would fall on the stockholders of the lumber company and he spoke of part of them not owning stock in the railroad company.

Commissioner Harlan: No, it was the other way——

Mr. Cowan: And I asked him if the railroad company's stockholders were the same, and I understood him to say they were not.

Commissioner Harlan: They are not quite the same.

Mr. Cowan: Then I asked the per cent.

Commissioner Harlan: Do you know the per cent?

Mr. Cowan: It is the per cent of the stock of the railroad company that is owned by the stockholders of the lumber company.

Mr. Jones: I do not know that I could give you the per cent exactly.

Mr. Cowan: Well, the shares; is it nearly all owned by the lumber company's shareholders?

Mr. Jones: Yes.

Mr. Coleman: Did we correctly understand that there were about 1,600 passengers carried every month?

544 Mr. Jones: Of October.

Mr. Coleman: During the month of October?

Mr. Jones: During the month of October.

Mr. Coleman: What were your passenger earnings during that month?

Mr. Jones: About $380 and some odd dollars.

Mr. Coleman: Was that unusual?

Mr. Jones: That is about—it runs from $300 to $500 a month.

Mr. Coleman: As a rule?

Mr. Jones: Yes.

Mr. Coleman: What do you charge for fare?

Mr. Jones: The fare is 25 cents from Ola to Plainview.

Mr. Coleman: Is most of this traffic from Ola to Plainview?

Mr. Jones: Yes, sir, between the two towns largely.

Mr. Coleman: Between what two points does the bulk of that passenger traffic move?

Mr. Jones: Between Ola and Plainview.

Mr. Coleman: As to the cotton, did you issue bills of lading on all the 5,000 bales of cotton which moved in October?

Mr. Jones: Yes, sir.

545 Mr. Fitzhugh: I forgot to ask you, Mr. Jones, if your road is taxed by the State of Arkansas just as other railroads are taxed?

Mr. Jones: The Tax Commissioners tax it and assess it the same as other railroads.

Mr. Fitzhugh: The same as other railroads, and not as other property?

Mr. Jones: Yes.

Mr. Fitzhugh: You stated that the stockholders were practically the same in the two companies. I will ask you if Mrs. Gertrude Abbott does not own nearly one-quarter of the stock of the lumber company and no stock whatever in the railroad company?

Mr. Jones: Yes, sir.

Mr. Coleman: Those people moving between Ola and Plainveiw are they employees of the lumber company?

Mr. Jones: Some of them are.

Mr. Coleman: What percentage?

Mr. Jones: I suppose about five per cent.

Mr. Coleman: Now, that means about 50 people a day, does it not, moving between those points?

Mr. Jones: Something like that.

546 Mr. Coleman: And only five per cent are lumber people?

Mr. Jones: Yes, sir; that will be about the percentage.

Mr. Coleman: And the others would be commercial travelers?

Mr. Jones: Yes.

Mr Coleman: 45 commercial travelers would move a day over that line?

Mr. Jones: No, not commercial travelers, passengers, I do not know that they would all be commercial travelers.

Mr. Coleman: Would they be residents of Ola and Plainview, or destined to points beyond?

Mr. Jones: Some might be residents of Ola and Plainview and other places.

Mr. Coleman: But only five per cent would be lumber men?

Mr. Jones: I am judging about five per cent would be employees of the Fort Smith Lumber Company.

Mr. Coleman: How many men have you up in the woods near Plainview?

Mr. Jones: About 50 to 75.

Mr. Coleman: And at Ola, how many people?

Mr. Jones: How many people do we have at Ola?

Mr. Coleman: Well, the population.

Mr. Jones: Ola is about 1,000 inhabitants.

547 Mr. Coleman: And how many of your people are there at Ola?

Mr. Jones: None.

Mr. Cowan: I want to ask one question, why the railroad was not built on to Hot Springs.

Mr. Jones: The promoter of it died; that is, the one that intended to do that.

Mr. Cowan: Is it bonded?

Mr. Jones: No, sir.

Mr. Cowan: The stock represents the full capitalization?

Mr. Jones: Yes, sir.

Commissioner Harlan: Have you any other witness?

Mr. Fitzhugh: No.

(Witness excused.)

Commissioner Harlan: Is the El Dorado & Western before the Commission?

(No response.)

Commissioner Harlan: Is the Fordyce & Princeton?

(No response.)

Commissioner Harlan: The Fourche River Valley & Indian Territory?

Mr. Brady: Mr. Walter will be here in the morning.

548 Commissioner Harlan: The Lester & Ouachita Valley Railway?

(No response.)

Commissioner Harlan: Is the Ouachita Valley Railway before the Commission?

(No response.)

Commissioner Harlan: The Bernice & Northwestern?

(No response.)

Commissioner Harlan: The North Louisiana & Gulf?

Mr. Brady: Mr. Walter has that case.

Commissioner Harlan: Is the Perla River Northern Railway Company here?

Mr. Armistead: Yes.

Commissioner Harlan: Are you ready?

Mr. Armistead: We will be ready in the morning.

Mr. Cowan: I would like to make a suggestion, while we can all hear it, and consider it, that by to-morrow morning we endeavor to ascertain what is going to be the course of the procedure, so far as that might be ascertained; and particularly, how long we are going to continue the investigation here. A number of gentlemen, I am sure, have business arrangements of one kind and another to make dependent somewhat upon that, and I make the suggestion

549 that we endeavor tomorrow morning, if we can, when the Commission convenes, reach some understanding that would enable business people to make appointments and arrangements according to the time we are going to occupy.

Commissioner Harlan: I suggest that we adjourn until tomorrow at 9:30, and we will have a little time in which to talk over the matter which you suggest.

Mr. Garwood: I would like to inquire from Judge Cowan as to whether the intervenors in this case will introduce any testimony at the conclusion of the investigation which is now under way.

Mr. Cowan: Well, I would be very glad to answer if I could, Judge Garwood, as you well know, but I can hardly determine until we find whether we are going to get through with the consideration as it is now proceeding. But when that is through, then I suppose either the railroads, if they should see fit to do so, or the intervenors, if they should see fit to do so, would be called upon certainly to introduce such evidence as they have. Some of that I desire to get here when we find out just how long we are going to be here. I do not care to bring the men here unnecessarily, but want to get them here

so as not to delay the proceeding and that was one of the rea-
550 sons for my suggestion.

Mr. Garwood: It is your purpose at this hearing, if time suffices, to introduce evidence for the intervenors?

Mr. Cowan: I am unable to say that without consulting with Mr. Andrews, who is in the case with me, and other gentlemen here, but it is our purpose to introduce evidence to some extent dependent somewhat on what evidence shall be introduced by the other side.

Mr. Garwood: My purpose in asking that is that there are witnesses, who, as their own cases are determined would go home, but who would perhaps wish to remain in the event that the intervenors would undertake to put in evidence.

Mr. Cowan: I apprehended it was the case that the business situation of a great many men would hardly permit their remaining at New Orleans any great length of time, and it might be that we might, after consultation, decide it necessary to have another hearing for the purpose of winding up, and then we could accommodate everybody and let them remain at home and not remain here for the purpose of hearing evidence which might not be introduced, and it will be our endeavor to accommodate Judge Garwood and the other gentlemen in that effort.

Whereupon, at 5:30 P. M., an adjournment was taken to Saturday, December 10, 1910, at 9:30 A. M.

551 NEW ORLEANS, LA., *December* 10, 1910.

Met pursuant to adjournment at 9:30 A. M.

Present: Parties as before.

Commissioner Harlan: Yesterday we called the Warren & Ouachita Valley Railroad. I was advised that counsel was out of the room for the moment, and it was understood he might appear this morning. Who is the representative of that road?

Mr. Hobbs: My counsel is not here, but I am willing to take the stand and be examined.

W. S. HOBBS was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: Will you give your full name to the reporter?

Mr. Hobbs: W. S. Hobbs.

Mr. Greer: It was suggested last evening there would be some discussion as to the question of procedure, and inasmuch as there are so many tap lines to be investigated and so much time to consume, it is a very vital question with a number of us. Will your Honor
not devote some time to that question now?

552 Commissioner Harlan: What suggestion have you to make?

Mr. Greer: I represent a Texas line, and there are a number here.

If the present method is pursued, and we can see no other that would be just and fair, than that of inquiring into each particular case, necessarily it will be some two weeks or at least ten days until some could be reached. If your Honor could set down the Texas cases for some date to be heard at some point in Texas or here, it would be very convenient. A number of us have court proceedings that are just waiting our return. We supposed there would be something definite announced as to when our cases would come up, or approximately.

Commissioner Harlan: We have already announced we would take up the Rock Island cases first, and follow them with the Iron Mountain. Are any of your lines Rock Island or Iron Mountain connections?

Mr. Greer: They are Cotton Belt and Southern Pacific, but if your Honor could announce that those particular cases would be reached on a certain day next week at this place, or some place in Texas, it would facilitate us very much.

Commissioner Harlan: It is difficult to tell just how many lines we will have today. It has been our hope that we would pro-
553 ceed more rapidly, and I think we can, if counsel will indulge in less examination.

Mr. Greer: But I think 75 or 100 cases have entered an appearance here, and even at the best, it will be seven, eight or ten days before you could reach some of them.

Commissioner Harlan: We had not thought so. We thought we could get through early next week.

Mr. Greer: Each one is entitled to a hearing and must stand on its own merits, and if you dispose of them at the rate of ten a day, which is the maximum you could hope for, it would be a long time before you could reach those lowest on the list. I believe it would meet the wishes of those representing the Texas cases if your Honor would just group them together and hear us at some particular day in the future, limiting the scope of the inquiry to just what is now being observed, hearing the facts pertaining to each particular road.

Commissioner Harlan: How many Texas roads are there?

Mr. Greer: We made an estimate last night——

Mr. Scott: About 12 that I know of.

Commissioner Harlan: I am advised we have about 20 on our list.

554 Mr. Greer: Well, there are 12 present. There are, perhaps, quite a number who are not present that your Honor will want to inquire into, and there are some western Louisiana roads who are closely related to our section, and I am satisfied they would like to be investigated about the same time. Just to give an illustration of the situation, I left some three or four cases in the Federal Court undisposed of, and the court is in session and is going to adjourn next week.

Commissioner Harlan: Of course the difficulty is obvious. We have had a great many statements of that kind, involving different considerations; but the Commission must get ahead with this question, and we expected to close the record here.

Mr. Greer: You understand we do not ask for delay——

Commissioner Harlan: Would it meet your views if we simply announced this morning that the Texas lines would not be called until Monday? Your suggestion of a hearing in Texas we cannot agree to.

Mr. Greer: Would your Honor designate a day when they will be heard? You see, that would only leave Sunday.

Commissioner Harlan: I have just suggested Monday.

Mr. Greer: You said not until Monday. If you said Monday, that would meet our approval and convenience.

555 Commissioner Harlan: We will do this; we will say that the Texas cases will not come up before Monday, and at the close of the day I agree to advise some one by telegram as to the probabilities for Monday, and will do it tonight, so that would give you an opportunity to get here Monday or Monday afternoon if necessary, or possibly we might indicate in the telegram that you need not come until Tuesday. We will do the best that we can. If you will undertake to communicate with the others, or I will advise Mr. Garwood.

Mr. Greer: I presume if the case was to be called Monday we would all stay here, because that would only leave Sunday, and we could not transact business at home.

Commissioner Harlan: There are two sides to the question. We would like to oblige counsel as much as possible, but we want to get ahead with this record, and we do not want to spend our time here Monday waiting. It is possible that we would not call your cases until Tuesday. At the same time, we may get into the Texas cases Monday afternoon; it depends upon what develops before. Perhaps farther along in the day we can get some better impression. Where do you reside, Mr. Hobbs?

Mr. Hobbs: Warren, Arkansas.

556 Commissioner Harlan: What is your business?

Mr. Hobbs: General Manager of the Warren & Ouachita Valley Railway.

Commissioner Harlan: How long have you been connected with that railroad?

Mr. Hobbs: Nearly five years.

Commissioner Harlan: When was it incorporated?

Mr. Hobbs: I have not the record with me, but I think it was in 1895.

Commissioner Harlan: Who are the other officers of the railroad?

Mr. Hobbs: Mr. F. E. Weyerhauser, President; Mr. J. W. Embree, of Chicago, is Vice-President; Mr. C. J. Mansfield, of Warren, is Secretary, and Mr. O. O. Axley, of Warren, is Treasurer.

Commissioner Harlan: Are those men officers of any lumber company?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Of what company?

Mr. Hobbs: Mr. Weyerhauser is president of the Southern Lum-

ber Company, I believe; Mr. Embree is president of the Arkansas Lumber Company; Mr. Mansfield is secretary and general
557 manager of the Arkansas Lumber Company, and Mr. Axley is general manager of the Southern Lumber Company.

Commissioner Harlan: In a general way your road is owned by lumber interests?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Stockholders who are interested in lumber companies?

Commissioner Harlan: What particular lumber company has a mill on your line?

Mr. Hobbs: The Southern Lumber Company and the Arkansas Lumber Company.

Commissioner Harlan: And those two companies or their stockholders practically own your road?

Mr. Hobbs: Practically; I think they do entirely.

Commissioner Harlan: What are the termini of your road?

Mr. Hobbs: Warren, Arkansas, and Banks, Arkansas.

Commissioner Harlan: Where is Warren, with respect to Little Rock—I have it here. Warren and Banks, did you say?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: What is the capital of your road?

Mr. Hobbs: Authorized, $300,000.

Commissioner Harlan: I understand it is about 16 miles
558 long.

Mr. Hobbs: Exactly.

Commissioner Harlan: What stock has been issued?

Mr. Hobbs: $284,000.

Commissioner Harlan: What cash capital has your road?

Mr. Hobbs: I do not understand that.

Commissioner Harlan: Was the stock issued for cash?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: And was the railroad built by the railroad company?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: What is the character of the road?

Mr. Hobbs: It is a very fair railroad.

Commissioner Harlan: Well ballasted?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: What kind of iron have you?

Mr. Hobbs: Sixty pounds.

Commissioner Harlan: Did your company buy the rail?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: And bought the other material that went into the road?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: And there were no contributions or
559 loans by railroad companies?

Mr. Hobbs: No, sir.

Commissioner Harlan: Is the track a permanent track?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: What equipment have you?

Mr. Hobbs: We have three locomotives, two coaches, one caboose, one box car and five flat cars; I believe is the equipment.

Commissioner Harlan: What is the population of Warren?

Mr. Hobbs: I don't know exactly; the population of Warren and its suburbs is about 6,000 people.

Commissioner Harlan: It was a town, then, before your railroad was built?

Mr. Hobbs: Yes, sir, a good many years.

Commissioner Harlan: Is that true of Banks?

Mr. Hobbs: No, sir; Banks is a new town that has been built since the railroad went in there.

Commissioner Harlan: Do you do any express business between those two towns?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Passenger business?

Mr. Hobbs: Yes, sir.

560 Commissioner Harlan: Mail?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Have you a station at Banks?

Mr. Hobbs: Yes, sir. The Rock Island has one; it is used jointly between us and the Rock Island.

Commissioner Harlan: And at Warren you connect with the Iron Mountain?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Do you use a joint station with that road?

Mr. Hobbs: No.

Commissioner Harlan: Have you a station of your own?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Have you a physical connection with the Iron Mountain at Warren?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Now, these two mills, you say, are at Warren?

Mr. Hobbs: Well, they are not in Warren, no, sir; they are about a mile and a half to two miles from Warren.

Commissioner Harlan: West of Warren?

Mr. Hobbs: Yes, sir.

561 Commissioner Harlan: Who owns the right of way around the right of way of the Warren & Ouachita Valley Railway?

Mr. Hobbs: It is owned by various people; of course the Southern and the Arkansas Lumber Companies own a good deal of it.

Commissioner Harlan: Do they own on both sides?

Mr. Hobbs: I think so; yes, sir.

Commissioner Harlan: What is the extent of the holding of that lumber company?

Mr. Hobbs: I could not tell you.

Commissioner Harlan: Do you know about how much?

Mr. Hobbs: I should say the two of them together, probably own 100,000 acres of land.

Commissioner Harlan: On both sides of the road?

Mr. Hobbs: No, sir; they do not own it there. They own i
beyond the line, a great deal of their holding is beyond the line.
Commissioner Harlan: Confine your answer to their holding o
the line.
Mr. Hobbs: I have no idea.
Commissioner Harlan: Is it 60,000 acres?
Mr. Hobbs: I have no idea.
562 & 563 Commissioner Harlan: Can you furnish that?
Mr. Hobbs: I expect they will furnish me with the in
formation.
Commissioner Harlan: Are you an officer of either of those com
panies?
Mr. Hobbs: No.
Commissioner Harlan: If you will be kind enough to get tha
information——
Mr. Hobbs: Yes, sir.
Commissioner Harlan: The holding of those two companies be
tween Warren and Banks. Now, you say they own other forests
Just where are they?
Mr. Hobbs: I think they are all located in Bradley County, in th
southwestern portion.
Commissioner Harlan: How near to this Warren & Ouachita
Valley Railroad?
Mr. Hobbs: It varies from one mile to 20.
Commissioner Harlan: The point I want to get at is this; where
do logs come from which are manufactured into lumber at these
two mills?
Mr. Hobbs: The logs at the present time are coming, some o
them, from 20 miles south of Banks, and some of them five
564 miles south of Banks.
Commissioner Harlan: And they come from the forests be
longing to these two companies?
Mr. Hobbs: Yes, sir.
Commissioner Harlan: How do they reach Banks?
Mr. Hobbs: They have trackage arrangements with the Rock
Island Railroad and also——
Commissioner Harlan: A written contract?
Mr. Hobbs: Yes, sir.
Commissioner Harlan: Have you filed that contract with the Com
mission?
Mr. Hobbs: Yes, sir.
Commissioner Harlan: Do you operate your own logging trains
over the Rock Island?
Mr. Hobbs: We have no logging trains. The lumber companies
do.
Commissioner Harlan: You said the railroad had some equip
ment.
Mr. Hobbs: We have no logging equipment. We do no logging
at all.
Commissioner Harlan: The railroad does not?
Mr. Hobbs: No.

565 Commissioner Harlan: Then your equipment is used only in other business?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: What right have these two lumber companies to move their trains over your road?

Mr. Hobbs: They have a trackage right.

Commissioner Harlan: Has that contract been filed with the Commission?

Mr. Hobbs: I think so.

Commissioner Harlan: State in a general way what the payment made by the lumber company to you is for that privilege.

Mr. Hobbs: They pay us 15 cents a thousand feet.

Commissioner Harlan: A thousand feet in the log?

Mr. Hobbs: Well, no; it is measured, board measure, after it is sawed.

Commissioner Harlan: What is their arrangement with the Rock Island?

Mr. Hobbs: I think they pay the Rock Island 75 cents a train mile.

Commissioner Harlan: Is that the only compensation that the railroad receives from the lumber companies?

Mr. Hobbs: Yes, sir, except from freight that they ship or——

566 Commissioner Harlan: What kind of freight do they ship?

Mr. Hobbs: All kinds in and out.

Commissioner Harlan: For your company's stores?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: How many employees have they?

Mr. Hobbs: The lumber company?

Commissioner Harlan: Yes.

Mr. Hobbs: I could not tell you.

Commissioner Harlan: Do you know about how many?

Mr. Hobbs: I should judge three or four hundred apiece at Warren; I do not know how many in the woods.

Commissioner Harlan: Where are the companies' stores located?

Mr. Hobbs: In Warren they sell goods to all people in town they can.

Commissioner Harlan: They are general stores?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Do you bring in their general merchandise?

Mr. Hobbs: Some of it.

Commissioner Harlan: On through billing from what points generally?

567 Mr. Hobbs: All points in the United States, practically.

Commissioner Harlan: How does it reach your line?

Mr. Hobbs: By the way of the Rock Island at Banks.

Commissioner Harlan: If it comes to Warren from the east, would not the Iron Mountain be a more direct route?

Mr. Hobbs: It might be, but it is not.

Commissioner Harlan: It might be, but it is not?

Mr. Hobbs: It is not the most direct route; no, sir. We have the shortest line in connection with the Rock Island.

Commissioner Harlan: To Memphis, for instance?

Mr. Hobbs: To Memphis and Little Rock and any points reached beyond Little Rock, our line in connection with the Rock Island is about 30 miles shorter than the Iron Mountain is to Little Rock.

Commissioner Harlan: How about Memphis?

Mr. Hobbs: I do not know the distance to Memphis. However, I believe the Rock Island is about the same, or a little shorter, possibly, to Memphis, than the Iron Mountain.

Commissioner Harlan: Does that company's material come on through billing from Little Rock?

Mr. Hobbs: Yes, sir; all of it.

Commissioner Harlan: From Little Rock?

568 Mr. Hobbs: Yes, sir.

Commissioner Harlan: Or through Little Rock?

Mr. Hobbs: Yes, sir; all that comes from Little Rock comes on through billing; in fact, anything that comes from anywhere is on through billing.

Commissioner Harlan: So that is a local movement in the State of Arkansas?

Mr. Hobbs: From Little Rock; yes, sir.

Commissioner Harlan: Perhaps you did not understand. I am talking now of all the general merchandise that you move for the lumber companies going to their general stores. Does that come from Little Rock mostly, or from all points?

Mr. Hobbs: From all points.

Commissioner Harlan: Does it come under through billing?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: You file tariffs?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: An interstate tariff of your own?

Mr. Hobbs: I file concurrences in joint tariffs, and file an interstate tariff of my own.

Commissioner Harlan: An interstate tariff of your own?

Mr. Hobbs: Yes, sir.

569 Commissioner Harlan: Just what sort of a tariff is that interstate tariff of your own?

Mr. Hobbs: Well, we have to have an interstate tariff covering classes and commodities.

Commissioner Harlan: You mean rates applicable to interstate movements?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: On this through merchandise, what allowance do you get, say on shipments from St. Louis?

Mr. Hobbs: On what kind of shipments?

Commissioner Harlan: Well, groceries, and general merchandise and things of that kind.

Mr. Hobbs: I cannot give you all that; you know there is different allowances on all classes and commodities.

Commissioner Harlan: Take class rates.

Mr. Hobbs: On first class I think we receive 15 cents per 100 pounds; something near that.

Commissioner Harlan: What is the first class rate from St. Louis?

Mr. Hobbs: I think it is $1.20.

Commissioner Harlan: From St. Louis?

Mr. Hobbs: Yes, sir. I am not positive as to that; I think
570 that is it.

Commissioner Harlan: Have you filed a division sheet with the Commission?

Mr. Hobbs: No.

Commissioner Harlan: I wish you would be kind enough to do that.

Mr. Hobbs: All right. I think there is one filed by the Rock Island probably, showing what allowances we receive; what division we receive.

Commissioner Harlan: I do not think the Rock Island tariffs would show that as to class rates.

Mr. Hobbs: The tariffs might not, but the division sheets would.

Commissioner Harlan: I do not think they are filed. If you will file all the division sheets you have, either with the Rock Island or the Iron Mountain——

Mr. Hobbs: All right, sir.

Commissioner Harlan: Now, your divisions are not fixed and specific divisions of each joint through rate, are they? Are they not established on a percentage basis?

Mr. Hobbs: No, they are arbitrary.

Commissioner Harlan: There is no basis that you can de-
571 scribe for us underlying your division of joint through rates?

Mr. Hobbs: Well, I do not know; no, that I could explain any basis under which they are given, only that we are allowed, of course, what we can get in the first place, but enough to try to pay us for handling the business.

Commissioner Harlan: If you will file division sheets that will all appear, and also your local rates. Do you publish local Arkansas rates that are not filed with our Commission?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: If you will file your local tariff also.

Mr. Hobbs: All right.

Commissioner Harlan: And as I understand it, you receive absolutely nothing from the lumber companies except this rate per thousand feet?

Mr. Hobbs: That is all.

Commissioner Harlan: And that is under a trackage arrangement?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: You do not carry any logs for them?

Mr. Hobbs: No.

572 Commissioner Harlan: Do you carry any manufactured lumber?

Mr. Hobbs: Yes, sir; all of it.

Commissioner Harlan: Just tell us where you receive the manufactured lumber of these two companies.

Mr. Hobbs: We receive it at their mills.

Commissioner Harlan: Near Warren?

Mr. Hobbs: One is about a mile, and the other about a mile and a half from Warren.

Commissioner Harlan: Which one is a mile away?

Mr. Hobbs: The Arkansas Lumber Company.

Commissioner Harlan: What is the market to which that lumber usually goes in the greatest volume?

Mr. Hobbs: Well, I do not know which it goes to in the greatest volume; it goes to all points in the country.

Commissioner Harlan: Up towards Memphis, St. Louis and Chicago?

Mr. Hobbs: The northern and eastern states, judging from the billing; that is what I go by.

Commissioner Harlan: Where is that billing made out?

Mr. Hobbs: At our offices.

Commissioner Harlan: And that is through billing?

Mr. Hobbs: Yes, sir.

573 Commissioner Harlan: Under joint through rates?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: What compensation do you receive for that service?

Mr. Hobbs: We receive a division varying from one and one-half to five cents per 100 pounds.

Commissioner Harlan: On what traffic do you get five cents per 100 pounds?

Commissioner Harlan: On traffic going to the Mississippi River junctions, I think; I cannot tell you; the division sheets will show.

Commissioner Harlan: We would like you to file those division sheets also.

Mr. Hobbs: Well, that is covered——

Commissioner Harlan: You say that is covered by something you have already filed?

Mr. Hobbs: No, sir; by the division sheets you desire me to file.

Mr. Peirce: We have all that on file.

Commissioner Harlan: You have filed it?

Mr. Peirce: Yes.

Commissioner Harlan: Mr. Jeffery, has the Iron Mountain

574 filed those division sheets with this line?

Mr. Jeffery: Yes; we have filed our divisions with all lines I am not quite sure, your Honor, whether it covers anything except lumber.

Mr. Hobbs: There are some division sheets filed or issued by your line, I know I have copies of some of them.

Mr. Jeffery: I do not remember whether that included other commodities other than lumber. Of course, we have a division with the Warren & Ouachita Valley on all commodities.

Commissioner Harlan: We will take that matter up and will let

you know, Mr. Hobbs, what we want, if we have not everything we do want.

Mr. Hobbs: All right.

Commissioner Harlan: What was the total volume of tonnage moved by your line during the last fiscal year excluding, of course, these logs hauled by the lumber companies themselves?

Mr. Hobbs: I have no idea. I have no records with me to show that, to speak of.

Commissioner Harlan: Your records will show that?

Mr. Hobbs: Yes, sir; it is filed with the Commission.

Commissioner Harlan: When did you file your first annual report with the Commission?

575 Mr. Hobbs: The first one I filed was when I first came with the road five years ago.

Commissioner Harlan: Do you keep your accounts as the Commission requires?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Mr. Hobbs, I understand your accounts are well kept.

Mr. Hobbs: Thank you. We try to keep them well.

Commissioner Harlan: I mean by that that the reports in the offices of the Commission are that your line does keep its accounts according to our system, but perhaps more exactly, or at least as exactly, as any other tap line.

Mr. Hobbs: We follow it just as close as any trunk line does.

Commissioner Harlan: And if that is so, you will be able easily to get the figures we want.

Mr. Hobbs: Yes, sir.

Commissioner Harlan: I would like to have a statement showing your tonnage annually for the last five years, and the character of the tonnage.

Mr. Hobbs: Well, your Honor, we had a fire March 29,
576 1909 which destroyed all our records and burned our general office building. I can give it from that date on.

Commissioner Harlan: Very well. Where is your general office building?

Mr. Hobbs: At Warren.

Commissioner Harlan: Is it a separate building?

Mr. Hobbs: Yes, sir; it is part of the depot, it is the second story of our depot.

Commissioner Harlan: That is the Iron Mountain station—no, you have a station of your own there?

Mr. Hobbs: We have a station of our own there.

Commissioner Harlan: Can you tell us in a general way what lumber traffic you have for other companies than the two lumber companies you have named?

Mr. Hobbs: We probably handle for other companies approximately, I should say, from 250 to 350 cars a year, or have been doing that; that is, small concerns that have, you might call them, portable mills; that is, they go in and saw out a tract of timber that they buy and move somewhere else.

Commissioner Harlan: Do they deliver the lumber to you in the form of logs or manufactured lumber?

Mr. Hobbs: Manufactured lumber?

577 Commissioner Harlan: Hauled in wagons to your line?

Mr. Hobbs: Hauled in wagons, if the mill is not located on the line.

Commissioner Harlan: Are there any mills on your line?

Mr. Hobbs: Not right on the line.

Commissioner Harlan: So it is all hauled in wagons?

Mr. Hobbs: At the present time; yes, sir.

Commissioner Harlan: Have you any station for the reception of such traffic?

Mr. Hobbs: We have about six side tracks on the line, I should say.

Commissioner Harlan: Is that all carload freight?

Mr. Hobbs: That is all carload freight, the lumber is.

Commissioner Harlan: Do you take any less than carload traffic in lumber from these outside interests?

Mr. Hobbs: If it is offered; yes, sir.

Commissioner Harlan: You set a car on the loading track for that purpose?

Mr. Hobbs: Not for less than carload, we do not; we load it in the local car.

Commissioner Harlan: Suppose it is a less than carload shipment, what rates does it get?

578 Mr. Hobbs: It takes class rates.

Commissioner Harlan: It takes through class rates?

Mr. Hobbs: It would depend on where it would go.

Commissioner Harlan: We will suppose to Memphis or St. Louis.

Mr. Hobbs. There are no less than carload shipments made, only on local shipments.

Commissioner Harlan: Where does that less than carload stuff go to?

Mr. Hobbs: Only just to short distances.

Commissioner Harlan: Banks or Warren?

Mr. Hobbs: Banks or Warren, or some local station along the line.

Commissioner Harlan: Have you any other station along the line?

Mr. Hobbs: Not of any consequence.

Commissioner Harlan: Have you any station building between Banks and Warren?

Mr. Hobbs: We have three, what we call telephone houses; we keep telephones in; side tracks, I should say, and not stations, that provide shelter if any one wants to get on or off the trains.

579 Commissioner Harlan: Are those telephones open to the public?

Mr. Hobbs: No, not supposed to be. Sometimes they open them.

Commissioner Harlan: They are not stations that can be used by the public until your train gets there?

Mr. Hobbs: No, sir—yes, sir, there are rooms they can get into.

Commissioner Harlan: Well, they cannot deliver less than carload shipments of lumber at those telephone stations?

Mr. Hobbs: They do not usually at the blind sidings; no railroad has depots at their blind sidings:

Commissioner Harlan: Then you have no regular stations between Banks and Warren?

Mr. Hobbs: No, nothing of any consequence.

Commissioner Harlan: So that the less than carload movements do not go off your line?

Mr. Hobbs: I do not say that they do not; they might some go off the line, but not to interstate points; they would go to points in Arkansas.

Commissioner Harlan: Are there any such movements?

Mr. Hobbs: I do not recall ever having any such movements.

580 Commissioner Harlan: How about the carload movement from these outside interests; at what rate would a carload move to Memphis?

Mr. Hobbs: I think the rate is 14 cents per 100 pounds.

Commissioner Harlan: It is a joint through rate?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: What is your division of such movement?

Mr. Hobbs: I think it is five cents per hundred pounds.

Commissioner Harlan: Wherever it comes from?

Mr. Hobbs: Yes, sir; on our line.

Commissioner Harlan: If it comes from Banks it is five cents?

Mr. Hobbs: If it comes from Banks, we usually ship it over the Iron Mountain by the way of Warren.

Commissioner Harlan: You would not ship it over the Rock Island?

Mr. Hobbs: No, we could not from Banks.

Commissioner Harlan: Why not?

Mr. Hobbs: Because they are located at Banks also.

Commissioner Harlan: You mean the Rock Island would get it and you would not?

581 Mr. Hobbs: Yes, sir. If we would get it from there, we would have to solicit it, or route it by way of Warren and the Iron Mountain.

Commissioner Harlan: You do not get any of that traffic?

Mr. Hobbs: Yes, sir, we do.

Commissioner Harlan: You solicit it and get it?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: And you carry it by way of the Iron Mountain?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: And get five cents per 100 pounds?

Mr. Hobbs: I believe that is what we get.

Commissioner Harlan: What is the carload weight usually?

Mr. Hobbs: It runs from 40,000 to 50,000 pounds on yellow pine, usually; sometimes heavier or lighter.

Commissioner Harlan: And you would get five cents out of the rate of 14 cents to Memphis; is that right?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: How much traffic do you get from the farmers on your line?

Mr. Hobbs: Not a great deal.

Commissioner Harlan: Any cotton?

582 Mr. Hobbs: Most of the cotton in the vicinity of our line is hauled to the towns by the farmers on their wagons, where it is sold to the merchants, and then the merchants in turn sell it to the cotton buyers, who ship it. We get all we can of it.

Commissioner Harlan: It does not amount to very much?

Mr. Hobbs: Yes, sir, about 5,000 or 6,000 bales per year; not on our line, however; that is on the two lines.

Commissioner Harlan: What other line do you mean?

Mr. Hobbs: The Iron Mountain and our line at Warren and the Rock Island and our line at Banks.

Commissioner Harlan: You participate in the movement of about 5,000 bales?

Mr. Hobbs: Well, we have not for the last two years. We have done that well in years past, but——

Commissioner Harlan: What division do you get on that? It all goes to Memphis, does it not?

Mr. Hobbs: No, to Little Rock. We get ten cents per 100 pounds.

Commissioner Harlan: Out of the through rate of what?

Mr. Hobbs: I cannot state what it is.

Commissioner Harlan: What is the extent of your pas-

583 senger traffic?

Mr. Hobbs: What way?

Commissioner Harlan: How many passengers a month do you carry?

Mr. Hobbs: Well, I should judge we carried about 3,000 or 4,000 passengers a month.

Commissioner Harlan: What proportion are employees of the lumber companies?

Mr. Hobbs: I do not know; there is no distinction made between them and anybody else.

Commissioner Harlan: They pay their way, just as others do?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Do you issue tickets?

—. ——.

Mr. Hobbs: Do you know about what your passenger revenue is per month?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: What is it?

Mr. Hobbs: It runs right around $1,200 a month.

Commissioner Harlan: What about your express revenue a month?

Mr. Hobbs: Well, it is from $30 to $50 a month.

584 Commissioner Harlan: Can you give us a general idea of your monthly revenue from all sources except your trackage agreement traffic?

Mr. Hobbs: You mean the pay we get for the trackage of the lumber companies?

Commissioner Harlan: Yes, sir; from all sources except the traffic from the two lumber companies, on the logs.

Mr. Hobbs: Do you mean exclusive of the finished product?

Commissioner Harlan: No, exclusive of the logs you haul from the lumber companies, what is your monthly revenue?

Mr. Hobbs: Well, of course it varies. You mean gross revenue?

Commissioner Harlan: Perhaps we will get at it a little differently. What is their average gross revenue from all sources?

Mr. Hobbs: I should judge it is about $5,000 to $6,000 a month.

Commissioner Harlan: What part of that do you get from your trackage agreements with the lumber companies?

Mr. Hobbs: I should say probably from $400 to $1,000 a month.

Commissioner Harlan: And what part of it comes from
585 the general merchandise that you haul for the lumber companies?

Mr. Hobbs: I have no idea. We do not keep any separate account of what they ship or any other merchants ship.

Commissioner Harlan: Do you not settle with the lumber companies on some monthly basis?

Mr. Hobbs: No, we settle with them the same as any other merchants.

Commissioner Harlan: On delivery of the freight?

Mr. Hobbs: Some merchants we settle with weekly.

Commissioner Harlan: Can you ascertain about what the lumber companies pay you monthly?

Mr. Hobbs: Yes, sir, I think so.

Commissioner Harlan: I wish you would do that. Pick out four months since your general offices were destroyed; four fairly typical months.

Mr. Hobbs: That is, revenue on freight received?

Commissioner Harlan: Freight received, or outbound freight for the lumber companies, under class and commodity rates, and not under the trackage agreements.

Mr. Hobbs: All right.

Commissioner Harlan: How many employees have you in your general offices?

586 Mr. Hobbs: One beside myself.

Commissioner Harlan: How many men have you in your train and track crews?

Mr. Hobbs: Well, we have sometimes very few, and sometimes a great many.

Commissioner Harlan: Well, what is a fair average?

Mr. Hobbs: I should judge about 15 or 25 trackmen; six to 12 train and enginemen.

Commissioner Harlan: They are all carried on the books of your company?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Do they do any work of any kind for the lumber companies?

Mr. Hobbs: Nothing only the switching we would do for any other shipper.

Commissioner Harlan: Do they load *on* the logs on the cars, or participate in the loading of the logs on the cars?

Mr. Hobbs: We do not have anything to do with the logs at all. We do not touch them.

Commissioner Harlan: The lumber company operates its own trains with its own crews?

Mr. Hobbs: Yes, sir, under our own jurisdiction.

587 Commissioner Harlan: Under your own jurisdiction?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: As to the running of the trains, and that sort of thing?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: But your company does not participate in the delivering of the logs or unloading at the pond?

Mr. Hobbs: No.

Commissioner Harlan: The lumber of these two companies is sent to the general lumber markets?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: And there competes with lumber of other companies?

Mr. Hobbs: It competes with lumber of other companies, and they compete with one another.

Commissioner Harlan: They compete with one another, and these two companies compete with the small people along your line?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Who haul their lumber to you in wagons?

Mr. Hobbs: Yes, sir. There is one thing I would like to mention; you asked me about the lumber that was shipped over

588 our line by other than the two lumber companies interested in the line. In the past year we have made a connection with the Saline River Railway, or rather, they have made it with us. That is a small line, I think owned by another mill company, and there are through rates from Draughon, Arkansas, on the Cotton Belt in connection with our line, and the Rock Island, to several interstate points, and we handle some lumber that way.

Commissioner Harlan: How much does that amount to per year?

Mr. Hobbs: It has not been running a year yet.

Commissioner Harlan: Well, a month?

Mr. Hobbs: It has been running, I should say, 18 or 20 cars a month lately; but the car situation has not been so we could furnish them the cars they could use.

Commissioner Harlan: Does most of your manufactured lumber go out from Warren over the Iron Mountain?

Mr. Hobbs: No, sir; I would not say most of it. Most of it goes whichever way the cars are furnished.

Commissioner Harlan: Then taking it in that way, does the Rock Island get the bulk of your traffic, or the Iron Mountain?

589 Mr. Hobbs: I should judge it is about equally divided.

Commissioner Harlan: Is there any contract which requires you or the lumber companies to divide it equally?

Mr. Hobbs: There is a contract with the Rock Island that requires us to give them fifty per cent if the service is equal.

Commissioner Harlan: I understand these logs come in over the Rock Island to Banks and then from Banks to the mill near Warren?

Mr. Hobbs: Some of them do and some they are getting off their own lines, the lumber companies are.

Commissioner Harlan: We will take the Rock Island first. At what distance do they come from on the Rock Island?

Mr. Hobbs: The Arkansas Lumber Company is now hauling 21 miles over the Rock Island, and the Southern Lumber Company has been hauling, I believe, five or six miles.

Commissioner Harlan: Do the lumber companies run their own trains over the Rock Island—I believe you said they did?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Have either of those lumber companies logging roads connecting with the Warren & Ouachita Valley?

Mr. Hobbs: One connection.

590 Commissioner Harlan: Does that run to the south of that road or to the north of it?

Mr. Hobbs: It leaves our line to the west, and crosses the Rock Island main line and goes south or southwesterly.

Commissioner Harlan: What is the extent of that logging road?

Mr. Hobbs: I think it is about ten or twelve miles long now; it is a new line.

Commissioner Harlan: That is operated by——

Mr. Hobbs: By the two lumber companies.

Commissioner Harlan: Do logs belonging to other lumber companies move over that logging road?

Mr. Hobbs: Not that I know of.

Commissioner Harlan: Does the Rock Island bring onto your line through Banks logs belonging to any other lumber company?

Mr. Hobbs: No, sir.

Commissioner Harlan: Does the Rock Island bring onto your line through Banks any general merchandise?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: From the south?

Mr. Hobbs: Yes, sir.

591 Commissioner Harlan: Does it bring onto your line any manufactured lumber through Banks?

Mr. Hobbs: There might be a car once or twice a year.

Commissioner Harlan: It is rather an infrequent movement?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Then I understand, Mr. Hobbs, that these logs on the Rock Island are hauled for one company about 20 miles to Banks and then by you for 15 miles, say, to the mill?

Mr. Hobbs: Fourteen or 15 miles; yes, sir.

Commissioner Harlan: Fourteen or 15 miles to the mill, and then at least half of the manufactured product is hauled back 14 or 15 miles to the Rock Island?

Mr. Hobbs: I should judge about half; yes sir.

Commissioner Harlan: But you say it is more than half.

Mr. Hobbs: Sometimes it is more, and sometimes less; it will probably average up half.

Commissioner Harlan: And the logs which are produced on the lumber road belonging to these two companies are hauled in the same manner to their mills and at least about half of it is hauled back to the Rock Island?

Mr. Hobbs: The total amount of tonnage, I should say, is
592 divided about that way.

Commissioner Harlan: And you get from the Rock Island and the Iron Mountain the same allowances or divisions?

Mr. Hobbs: Practically the same, I should think.

Examiner Burchmore: There is filed with the Commission a copy of the contract dated November 5, 1907, between the Rock Island Railroad and the Warren & Ouachita Valley Railway Company. Under that contract which provides for the trackage rights you have referred to for 25 miles south of Banks the consideration is fixed at 75 cents per train mile, as you have stated.

Mr. Hobbs: Yes, sir.

Examiner Burchmore: You stated that the lumber company actually moves these logs over that trackage?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: And that the lumber company moves these logs from Banks to its mill under trackage rights over the Warren & Ouachita Valley?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: The consideration is 15 cents per 1,000 feet of lumber?

Mr. Hobbs: Yes, sir.

593 Examiner Burchmore: Stated in terms per train, what does that equal?

Mr. Hobbs: It depends a great deal on the size of the train; they haul pretty heavy trains; sometimes as many as 45 cars of logs in a train and I should figure it would run between 50 and 60 cents a train mile, if figured down to feet.

Commissioner Harlan: Can you figure that out in cars, what the revenue of a car would be?

Mr. Hobbs: No, I cannot; they vary in size, you know, and I do not know just what they have in their cars.

Examiner Burchmore: That 75 cents per train mile rate is for a train of 30 cars?

Mr. Hobbs: Limited.

Examiner Burchmore: And trains longer than 30 cars are proportionately higher rates?

Mr. Hobbs: Yes, sir, on the Rock Island.

Examiner Burchmore: What would be the charge per train of 30 cars under this 15 cent rate?

Mr. Hobbs: It would depend upon what they had in the cars.

Examiner Burchmore: An average car?

Mr. Hobbs: Well——

594 Examiner Burchmore: Seventy-five cents or $1.00?

Mr. Hobbs: No, it would not be that much, I do not think. I think it would average, as I said, between 50 and 60 cents, or thereabouts. That is, of course, just estimated.

Mr. Andrews: You said 50 or 60 cents a train mile. He is asking you about a car, for the total distance.

Mr. Hobbs: Is that what you want?

Examiner Burchmore: I said a train of 30 cars.

Mr. Hobbs: You mean the rate per train mile?

Examiner Burchmore: This is the rate per train mile.

Mr. Hobbs: That is Rock Island trackage.

Examiner Burchmore: I meant in terms per train mile for 30 cars.

Mr. Hobbs: Based on our rate?

Examiner Burchmore: Based on your 15 cents. I wanted to get the relation between the two rates.

Mr. Hobbs: It would run about $20.25 for the 14 mile haul. You understand there is also an empty haul back, so that would have to be divided by two, to get the average train miles.

Commissioner Harlan: I do not quite understand that. Who pays that and to whom and what is it? You have just given
595 the figure of $20.25. I did not catch the question.

Mr. Hobbs: He asked me what it would amount to per train mile at the rate we charge them, for 30 cars, and I told him a train of 30 cars ordinarily would amount to about $20.25.

Commissioner Harlan: Paid by the lumber company to you?

Mr. Hobbs: To the Warren & Ouachita Valley Railroad. And that would figure quite close to 70 or 75 cents per train mile.

Examiner Burchmore: Does the lumber company pay the Rock Island or pay your company for the trackage over the Rock Island rails?

Mr. Hobbs: It pays our company.

Examiner Burchmore: And your company pays the Rock Island?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: What is the result of that transaction to the Warren & Ouachita Valley Railway, does it make a profit out of the transaction, or a loss?

Mr. Hobbs: We lose our time.

Examiner Burchmore: You come out about even financially?

Mr. Hobbs: We come out exactly even financially.

Examiner Burchmore: Are you familiar with the terms of
596 this contract referred to?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: One of the provisions of that contract permits the Warren & Ouachita Valley Railroad Company to assign its rights and privileges thereunder, or assign the benefits to the Southern Lumber Company or the Arkansas Lumber Company for their trackage on their logging trains.

Mr. Hobbs: Yes, sir.

Examiner Burchmore: It forbids the assignment to any other

companies or corporations other than those two lumber companies?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: Are you familiar with the original construction of this railroad?

Mr. Hobbs: Only from hearsay.

Examiner Burchmore: Do you know in what way the material entering into the original construction was delivered at Banks or at Warren; in what way it was moved in?

Mr. Hobbs: I presume it was moved in over the Iron Mountain: that was the only railroad there was there.

Examiner Burchmore: The Rock Island was not yet constructed?

597 Mr. Hobbs: No, sir.

Examiner Burchmore: Do you know whether customarily a legal interstate rate of freight was paid on those rails and other material entering into the construction of the railroad?

Mr. Hobbs: I have no idea. The road was started by private parties.

Examiner Burchmore: Were the rails and fastenings out of which this road was constructed transported by the Iron Mountain to the junction points under special rates filed to take care of those movements, if you know?

Mr. Hobbs: I could not tell you. Do you mean the last rails?

Examiner Burchmore: Well, the first or the last; any of them.

Mr. Hobbs: They were handled under an interstate rate, all that have been put in since I have been there.

Examiner Burchmore: Was it a special rate published to take care of those movements?

Mr. Hobbs: Not specially that I know of; no, sir. We have a rate on rails and fastenings from different points, and that is the tariff which was used. It is still in effect, and has been, I guess, for several years.

598 Commissioner Harlan: Has your road declared any dividends?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: State what they were for the last three years.

Mr. Hobbs: I don't remember previous to last year.

Commissioner Harlan: What was it last year?

Mr. Hobbs: I think it was ten per cent last year; I am not positive as to that, although that can be shown, but I think it was ten per cent.

Commissioner Harlan: Do you remember what it was the year before?

Mr. Hobbs: I do not remember.

Commissioner Harlan: I wish you would find that out. I suppose our records would show it, but you can find it out very readily.

Mr. Hobbs: All right. For the last three years?

Commissioner Harlan: Well, we will say since the road was built.

Mr. Hobbs: The road never started doing any business until five years ago.

Commissioner Harlan: Then for the last five years.

Examiner Burchmore: One of the articles of the contract
599 heretofore referred to provides that the use of the tracks of the Rock Island Company under the trackage arrangement is expressly limited to the hauling of logs and logging trains for this lumber company and also of material entering into the construction of logging railroads and supplies, tools, equipment and employees connected with the logging railroad, and logging operations. Was the purpose or result of this provision in this contract to enable this railroad or the lumber company to receive its rails and other material at a less rate of freight than it would otherwise pay?

Mr. Hobbs: No, sir.

Examiner Burchmore: What was the purpose of that provision?

Mr. Hobbs: Well, the trackage right, I presume was granted in order to help them log their mill and to provide revenue for the Rock Island Railroad at the same time; that is what it covers, the material used in logging operations. Of course they do not ship anything in like that. They use their rail one place and haul it to another.

Examiner Burchmore: But in hauling or moving that rail from one point to another, instead of paying the Rock Island Railroad a rate of freight per 100 pounds on such movements, you pay
600 simply 75 cents per train mile for the trains on which that material is loaded?

Mr. Hobbs: I have never moved any.

Examiner Burchmore: You referred to the recent connection of the Saline River Railroad with your road.

Mr. Hobbs: Yes, sir.

Examiner Burchmore: Do you know what divisions the Saline River Road receives on traffic moving out from points on that railroad to interstate destinations, lumber traffic?

Mr. Hobbs: I think it is three cents per 100 pounds.

Examiner Burchmore: On traffic moving from a point on the Saline River Railroad over that railroad and thence over your railroad, and thence over a trunk line to an interstate destination, what are the divisions received by your company and by the Saline River Railroad?

Mr. Hobbs: I think they receive three cents and we receive two cents per 100 pounds, where we receive five cents, and where it is less, it is in proportion.

Examiner Burchmore: In other words, where the movement now goes over your rails, in addition to the Saline River, the earnings of the trunk lines are not decreased, but you split the tap line division?

601 Mr. Hobbs: Yes, sir; we split the division.

Commissioner Harlan: Whose equipment brings traffic over the Saline River Railroad to your road and thence to Warren or Banks?

Mr. Hobbs: Do you mean locomotives or cars?

Commissioner Harlan: Locomotives and cars.

Mr. Hobbs: The Saline River Railroad handles their own freight, and whosever cars they can get.

Commissioner Harlan: There is no transfer of cars?

Mr. Hobbs: No.

Commissioner Harlan: Or merchandise?

Mr. Hobbs: They do not handle merchandise.

Commissioner Harlan: Your locomotives do not go on their rails or theirs on yours?

Mr. Hobbs: No, not for that. They have a trackage right over our road, the same as the Arkansas & Southern Lumber Companies.

Commissioner Harlan: To your mills?

Mr. Hobbs: No, to theirs.

Commissioner Harlan: What lumber company owns that company?

Mr. Hobbs: I think the Saline Lumber Company.

Commissioner Harlan: Are your people interested in that?

602 Mr. Hobbs: No.

Commissioner Harlan: So far as you know it is wholly independent?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: Reference has already been made to the provision in this same contract requiring the Warren & Ouachita Valley Railroad to deliver to the Rock Island at least 50 per cent of the traffic moving to Rock Island territory. Who has the routing of this lumber traffic? That is, is the routing controlled by the Warren & Ouachita Valley Railway, or is it controlled by the lumber companies?

Mr. Hobbs: Under the present law, it is controlled by the lumber companies.

Examiner Burchmore: As a matter of fact, and not as a matter of law, who specifies the routing on these shipments; an official of the lumber company or of the railroad company?

Mr. Hobbs: Sometimes their bills of lading show routings, and sometimes they do not; and when they do not, we route them as we see fit, giving them the best rate there is.

Examiner Burchmore: The point is this, the Warren & Ouachita Valley has bound itself to deliver 50 per cent of the traffic to the Rock Island?

603 Mr. Hobbs: Yes, sir.

Examiner Burchmore: In order that it may be enabled to comply with that undertaking, does it not retain control of the routing of this traffic, as a matter of fact?

Mr. Hobbs: We can do that by the cars we furnish; if we furnish cars furnished us by the Rock Island, we must load them via the Rock Island. We require that and every other railroad does.

Examiner Burchmore: Then as a matter of fact, the Warren & Ouachita Valley Railroad does control the routing of traffic originating on its road?

Mr. Hobbs: As far as its junctions; yes, sir.

Examiner Burchmore: I mean it controls it with respect to which trunk line shall haul it out?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: Is any amount of stock in the Warren & Ouachita Valley Railway owned by any trunk line railroad official?

Mr. Hobbs: I do not think so. I do not know of anybody who owns any of it.

Commissioner Harlan: Did you ever hear of any such ownership?

604 Mr. Hobbs: I know there is none.

Commissioner Harlan: Have you ever had any personal injury suits?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: By employees of the railroad company?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Resulting in verdicts or judgments?

Mr. Hobbs: Yes, sir. We paid $10,000 last year.

Examiner Burchmore: Who paid $10,000?

Mr. Hobbs: The Warren & Ouachita Valley.

Examiner Burchmore: Have there been any such suits against the lumber companies for injuries sustained on the railroad?

Mr. Hobbs: I never heard of anybody. If anybody was hurt on the railroad, they would sue the Warren & Ouachita Valley Railroad.

Commissioner Harlan: Well, they might, but has anyone made the mistake of suing the lumber companies?

Mr. Hobbs: I never heard of it. We have an indemnity contract with them, however, that we will hold them responsible, or they are responsible, for any accidents of that kind occurring.

Examiner Burchmore: Suppose a person was injured on
605 one of these logging trains of the lumber company; they would not sue the railroad company?

Mr. Hobbs: Very likely, if they were on the railroad.

Examiner Burchmore: But the lumber company would indemnify the railroad?

Mr. Hobbs: Yes, sir; that is the contract we have with them.

Examiner Burchmore: Has your company any track scales for weighing carload shipments?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: How many?

Mr. Hobbs: One.

Examiner Burchmore: You have small platform scales for weighing wagon loads or less than carload traffic?

Mr. Hobbs: Yes, sir; local merchandise.

Examiner Burchmore: Are your trains run on a regular schedule?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: How many trains have you each way a day?

Mr. Hobbs: One passenger, and one mixed train each way daily.

606 Commissioner Harlan: Judge Cowan, have you any questions?

Mr. Cowan: How far is it from your tracks, where you load the

lumber into the cars, to where you deliver the lumber to the Iron Mountain road?

Mr. Hobbs: I said about a mile and a half from one mill and about a mile from the other.

Mr. Cowan: My question had reference to the place at which the lumber was loaded. I thought it might be a different place from where the mill is.

Mr. Hobbs: That might be, too. I do not know exactly the distance, but we have to haul it out of that track anyway; it is hauled at least a mile and a half.

Mr. Cowan: Does the Iron Mountain have any tracks to the lumber company's mills?

Mr. Hobbs: No.

Mr. Cowan: Does the Rock Island have any tracks to the lumber company's mills?

Mr. Hobbs: No, sir.

Mr. Cowan: What does it cost to perform the service of the switching of the lumber from the place where it is loaded by the lumber company to where it is delivered to the railroad company?

607 Mr. Hobbs: I could not tell you exactly.

Mr. Cowan: Can you approximate about what that service costs?

Mr. Hobbs: That depends on how many cars you have to move.

Mr. Cowan: Do you have any general idea about what such services cost?

Mr. Hobbs: The reports made to the Commission show what it costs to handle freight per ton per mile. I do not remember what it is.

Mr. Cowan: Of course you would not estimate switching on the basis of a ton per mile movement.

Mr. Hobbs: You have to base it on everything you handle.

Mr. Cowan: It would depend on the number of cars the switch engine handles per day, more than anything else. You have to pay for the cost of this engine, whether it is handling cars or not.

Mr. Hobbs: And you have to operate it tomorrow for nothing perhaps. I don't remember exactly.

Mr. Cowan: Your railroad keeps no accounts to show separately what it costs for switching independent of other track operation or transportation service?

Mr. Hobbs: No.

608 Mr. Cowan: What does it cost to build a railroad like the one you have?

Mr. Hobbs: It would cost at the present time about $310,000 to equip it.

Mr. Cowan: What does it cost actually to build per mile in that locality; the character of road you have?

Mr. Hobbs: To build it in the way our road is built?

Mr. Cowan: Yes.

Mr. Hobbs: I should say from $6,000 to $10,000; maybe a little more.

Mr. Cowan: Do you keep separately the cost of the maintenance of the railroad?

Mr. Hobbs: We keep our books according to the Commission's orders.

Mr. Cowan: So your annual reports will show all that?

Mr. Hobbs: Yes, sir.

Mr. Cowan: In all cases the lumber company performs the service of loading and unloading. The railroad company does not do that?

Mr. Hobbs: No, sir, only on local shipments on less than carload shipments.

Mr. Cowan: On L. C. L. business?

609 Mr. Cowan: The $10,000 you had to pay for personal injuries, was that actually paid by the railroad company or the lumber companies?

Mr. Hobbs: Paid by the railroad company.

Mr. Cowan: Was it recouped or paid over, then, by the lumber company to the railroad company?

Mr. Hobbs: We have never got anything I know of from them for it.

Mr. Cowan: It happened, then, independently of the lumber company's operations?

Mr. Hobbs: Yes, sir.

Mr. Cowan: Is there any obligation in such cases for the lumber company to stand any part of the loss?

Mr. Hobbs: I do not know anything about the lumber company. I only run the railroad, and I have to pay whatever it costs to run it.

Mr. Cowan: I was wondering if there was any obligation for them to pay. You said you never had received anything.

Mr. Hobbs: No, there is no obligation for them to pay anything the railroad loses.

Mr. Cowan: You said you get on every car going out on the Iron Mountain a division of the rate. On lumber, I mean.

610 Mr. Hobbs: Yes, sir.

Mr. Cowan: Do you get any division over the Iron Mountain on any other traffic than lumber?

Mr. Hobbs: Yes, sir.

Mr. Cowan: And do you get it on any traffic originating at the same locality as your lumber mills?

Mr. Hobbs: I do not know of anything that originates there but lumber. I never heard of anything.

Mr. Cowan: There is nothing originates at Warren that your line would handle but lumber?

Mr. Hobbs: Near Warren; not in connection with the Iron Mountain; no.

Mr. Cowan: If there was anything that originated in the way of traffic at Warren, it would be delivered to the Iron Mountain team tracks or depots?

Mr. Hobbs: It would, if I could not get it delivered to mine.

Mr. Cowan: Outside of lumber, do you have any place at Warren where you can take traffic and get a division from the Iron Mountain for handling it?

Mr. Hobbs: I would not give it to the Iron Mountain, but to the Rock Island.

611 Mr. Cowan: And haul it across the other way?

Mr. Hobbs: Yes, sir.

Mr. Cowan: Suppose you got it at Banks, would you deliver it to the Rock Island up there?

Mr. Hobbs: No, to the Iron Mountain.

Mr. Cowan: Back to the Iron Mountain?

Mr. Hobbs: Yes.

Mr. Cowan: So this road is an institution which hauls to the Iron Mountain from the Rock Island and from the Iron Mountain to the Rock Island for a division of the rate?

Mr. Hobbs: The road was built for profit, and we hope to make one.

Mr. Cowan: And it makes it by moving the freight the farthest way around for the nearest way haul?

Mr. Hobbs: That is a part of my business.

Mr. Cowan: Well, do you hold that as an inducement to each one of these roads to give you the division that you get?

Mr. Hobbs: Why, they know the business there as well as I do.

Mr. Cowan: Do they solicit the business on these divisions; do they endeavor to get you a haul for example——

Mr. Hobbs: No, sir, I do that myself. Everything I get from Banks has got to be in competition with the Rock Island.

612 and everything I get from Warren has got to be in competition with the Iron Mountain; it costs something to get that, and we get some division, necessarily.

Mr. Cowan: You handle a good deal of other people's business than the lumber company's from Banks to Warren and from Warren to Banks?

Mr. Hobbs: About 50 per cent of our earnings are other than that furnished us by the lumber companies.

Mr. Cowan: Is that 50 per cent handled from Warren to Banks and Banks to Warren?

Mr. Hobbs: It is handled over our line somewhere.

Mr. Cowan: But you get a lot of it in the interior?

Mr. Hobbs: We do not get much in the interior; it is practically all in the termini.

Mr. Cowan: Except passengers?

Mr. Hobbs: Yes, sir.

Mr. Cowan: And 50 per cent of that would be hauled from one terminal to the other?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: You say you have issued $284,000 capital stock?

Mr. Hobbs: Yes, sir.

613 Commissioner Harlan: And your road, you think cost from $6,000 to $10,000 to build?

Mr. Hobbs: That is just to build the dump and lay the track. Of course it has been ballasted and put in shape.

Commissioner Harlan: How much do you think it cost with the ballast?

Mr. Hobbs: I could tell exactly with the reports, but could not tell without them.

Commissioner Harlan: The road, with the equipment, did not cost $284,000, did it?

Mr. Hobbs: Yes, sir; it cost more than that.

Mr. Cowan: In regard to the company traffic that is handled for the lumber companies, independent of the output of the mills, I suppose they get a large amount of supplies and materials of one kind and another. Where do you take that from? Do you get any of that at Warren?

Mr. Hobbs: Yes, sir.

Mr. Cowan: From the Iron Mountain?

Mr. Hobbs: No. Well, we might, destined to some point on our line. Do you mean local freight or carload freight?

Mr. Cowan: Any sort of freight that is consigned to the lumber companies.

614 Mr. Hobbs: Yes, sir; we have through rates to all of our stations in connection with the Iron Mountain.

Mr. Cowan: You do not understand me. The lumber company receives a large amount of supplies and materials of various sorts, delivered by your line to the lumber companies.

Mr. Hobbs: Well, they receive it at our station, usually.

Mr. Cowan: And they get most of it at the station where the mill is?

Mr. Hobbs: I do not say most of it. Some of it they get there and some at Warren station.

Mr. Cowan: Do you get a division on that when it is delivered to the company at Warren, over the Iron Mountain?

Mr. Hobbs: No.

Mr. Cowan: But if it comes over the Rock Island from Banks you do?

Mr. Hobbs: Yes, sir.

Mr. Cowan: How is this material brought in there; does it not all come in, the commissary supplies, and all that, on the Rock Island?

Mr. Hobbs: The majority of it does; yes, sir.

Mr. Coleman: The line started at Warren originally, did it not?

615 Mr. Hobbs: Yes, sir.

Mr. Coleman: And extended how far?

Mr. Hobbs: I think two and a half or three miles.

Mr. Coleman: And then was there a logging road connecting that into the woods at right angles?

Mr. Hobbs: I am not able to say.

Mr. Coleman: What was the next extension?

Mr. Hobbs: I do not know when the next extension was.

Mr. Coleman: At the time when your knowledge begins, what was the end of the Warren & Ouachita Valley Railway?

Mr. Hobbs: It was eleven miles long.

Mr. Coleman: And that made it how far from Banks?

Mr. Hobbs: Five miles.

Mr. Coleman: At the end of that eleven miles, you had a logging road extending at perhaps right angles into the woods?

Mr. Hobbs: The lumber companies, I presume, had—one of them I know did.

Mr. Coleman: That is what I mean. You received from the Iron Mountain a division of the through rate at that time on lumber?

Mr. Hobbs: Yes, sir.

Mr. Coleman: Can you recall what that was?

616 Mr. Hobbs: No.

Mr. Coleman: Was it less than the one you received from the Rock Island?

Mr. Hobbs: We were not in connection with the Rock Island at that time.

Mr. Coleman: Less than the one you now receive?

Mr. Hobbs: Well, possibly a little less, not much.

Commissioner Harlan: Can you ascertain what it was?

Mr. Hobbs: I have no records.

Commissioner Harlan: Mr. Jeffery, will you be kind enough to file an exhibit? What was that date, Mr. Coleman?

Mr. Coleman: When the line was five miles from Banks, and before——

Commissioner Harlan: What was that date?

Mr. Hobbs: I would say it was in January or February, five years ago.

Commissioner Harlan: If you will say, Mr. Jeffery, what divisions or allowances you were paying this line prior to January, 1906, for several years, I wish you would.

Mr. Jeffrey. All right. I suppose I can bring the table right down to date of the allowances.

Mr. Coleman: Is the logging lines in practically the same

617 position physically—I will put that in another way—geographically, is it in about the same position; does it lie on the same line, about, as it did five years ago?

Mr. Hobbs: No, it has been changed a good many times.

Mr. Coleman: How has it been changed: by extension or twisting the tracks?

Mr. Hobbs: It has been moved.

Mr. Coleman: Which way has it been moved?

Mr. Hobbs: South.

Mr. Coleman: Towards the Iron Mountain?

Mr. Hobbs: No, towards the Ouachita River.

Mr. Coleman: About five years ago you extended your line from your junction point with the logging road to Banks, on the Rock Island?

Mr. Hobbs: Yes, sir.

Mr. Coleman: What was it that induced you to build that additional mileage of railway?

Mr. Hobbs: Well, I presume it probably had to be built at some time to get timber, and there was a town of 6,000 or 7,000 people, and the Rock Island was building a trunk line through that terri-

tory, and missed the town, and we saw an opportunity to go
618 to it and possibly make something out of it.

Mr. Coleman: Was any inducement made from the Rock Island Railroad, by way of a better division than the Iron Mountain gave you?

Mr. Hobbs: At that time there was no arrangement made until it was completed.

Mr. Coleman: Was it when it was completed?

Mr. Hobbs: When it was completed we went to them and asked them for a division.

Mr. Coleman: And they gave you a better division than the Iron Mountain?

Mr. Hobbs: Well, a slight increase, possibly.

Mr. Coleman: I have in mind what seems to be an inconsistent statement; I may have misunderstood you, but I thought you said the construction of your logging line into the woods did not extend towards the Rock Island, but towards the river.

Mr. Hobbs: It extends beyond the Rock Island, that is now the lumber companies' lines are now all beyond the Rock Island and beyond ours. The lumber companies' lines are all beyond Banks.

Mr. Coleman: That is what I mean. You referred to a
619 mixed train. What is that?

Mr. Hobbs: A train that handles both passengers and freight.

Mr. Coleman: And the passenger train runs at what time?

Mr. Hobbs: The train leaves Warren at 10:10 in the morning.

Mr. Coleman: And goes where?

Mr. Hobbs: To Banks.

Mr. Coleman: What are the people it carries, in the main; lumbermen going up to the woods to work for you?

Mr. Hobbs: They do not any of them go on our trains to work for the lumber companies unless they pay their fare.

Mr. Coleman: Do you issue through bills of lading?

Mr. Hobbs: Yes, sir.

Mr. Coleman: Where are they issued?

Mr. Hobbs: At our open stations, at Warren and Banks.

Mr. Coleman: If for a point on the Rock Island, you would issue it at Warren, to get the long haul?

Mr. Hobbs: Yes.

Mr. Coleman: And if for the Iron Mountain, you would issue it at Banks?

Mr. Hobbs: If it came from Banks we would. We would not otherwise.

620 Mr. Coleman: That is all.

Mr. Andrews: And it would not be for the Iron Mountain if it did not come from Banks, would it?

Mr. Hobbs: No, it might come from some other point on our line.

Mr. Jeffery: Your line does not commence on the main line of the Iron Mountain?

Mr. Hobbs: No.

Mr. Jeffery: But it is on the east and west line of the Warren branch?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: This contract which has been referred to several times, dated November 5, 1907, section 2 of article 4 provides that the Rock Island Company grants to the Warren & Ouachita Valley Company the right to take up the said connection between the two companies and take up all material included in the same, and to remove the same from time to time to such points on the portion of the railroad the use of which is granted as may be necessary or convenient to the business of the Warren Company, as the timber along the line may be exhausted. A provision of the same wording is contained in the contract between the War-
621 ren & Ouachita Valley Railway and the Saline River Railway Company, dated January 7, 1909, which is also filed with the Commission?

Mr, Hobbs: Yes, sir.

Examiner Burchmore: The purpose of those provisions, if you know; is it to permit these lumber roads to move along as the timber becomes exhausted and change their line from time to time?

Mr. Hobbs: That is what it is for; yes, sir.

Examiner Burchmore: So that they are not intended to be permanent lines of railroad, in one location?

Mr. Hobbs: No, sir.

Mr. Cowan: Is it claimed that such roads as that are common carriers? Do you claim that is a common carrier?

Mr. Hobbs: We have no such line, and I do not know anything about it.

Commissioner Harlan: You are putting a hard question to this witness.

Examiner Burchmore: Do you receive any coal for use along your line?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: What use is made of that coal?

622 Mr. Hobbs: Burned in engines.

Examiner Burchmore: And where is that coal stored?

Mr. Hobbs: We have a coal bin to store it, I guess, as all the rest of the people who get coal.

Examiner Burchmore: At what point, I mean.

Mr. Hobbs: Our coal bin is at Cloquet.

Examiner Burchmore: Intermediate between Warren and Banks?

Mr. Hobbs: Yes, sir.

Examiner Burchmore: Where does that coal come from?

Mr. Hobbs: Various points; some from Illinois, Arkansas, Kentucky and Indiana.

Examiner Burchmore: What freight is charged on the coal moving from Illinois?

Mr. Hobbs: $2.65 a ton, I think, is the rate.

Examiner Burchmore: What division of that rate is received by the Warren & Ouachita Valley?

Mr. Hobbs: I think we receive 27½ cents a ton.

Examiner Burchmore: About the same division applies on Kentucky coal?

Mr. Hobbs: On all coal.

Examiner Burchmore: No coal is used by the lumber companies?

Mr. Hobbs: No, except they burn coal in their locomotives.

623 Commissioner Harlan: Do you supply the countryside with coal?

Mr. Hobbs: There is very little coal burned there. There are dealers who furnish coal for people who want coal.

Commissioner Harlan: You do not sell any of it?

Mr. Hobbs: No.

Examiner Burchmore: Who owns the right of way on which this road is built?

Mr. Hobbs: The Warren & Ouachita Valley Railroad Company.

Examiner Burchmore: The land is not owned by the lumber companies?

Mr. Hobbs: No, not the right of way. There may be some outside of it, but not the right of way.

Mr. Coleman: Is the right of way owned in fee by the railroad?

Mr. Hobbs: Yes, sir.

Mr. Coleman: From whom did it acquire title?

Mr. Hobbs: From different people?

Mr. Coleman: Not from the lumber company?

Mr. Hobbs: Some of it, yes, sir.

Mr. Scott: Do you receive any shipments from the Saline River Railway of commodities other than lumber?

624 Mr. Hobbs: I believe we have received a little cottonseed, chiefly.

Mr. Scott: From what point was that?

Mr. Hobbs: New Edinburg.

Mr. Scott: That is a town on the Saline River Railway?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: Is not that the terminus of the Saline River Railway?

Mr. Hobbs: No, sir; I think not. I know it is not.

Commissioner Harlan: Is there not a logging road which runs south of New Edinburg?

Mr. Hobbs: I think it is run by the railroad; I think they are operating trains over it.

Commissioner Harlan: New Edinburg is south of Saline?

Mr. Hobbs: Yes.

Commissioner Harlan: There is no other railroad connection except the Saline River Railroad?

Mr. Hobbs: No.

Examiner Burchmore: What is the name of the junction point of the Saline River Railroad and the Warren & Ouachita Valley?

Mr. Hobbs: Glenn.

625 Examiner Burchmore: Where is that, with reference to New Edinburg?

Mr. Hobbs: I should judge about 15 miles.

Examiner Burchmore: That is now the terminus of the Saline River Road?

Mr. Hobbs: Yes, sir.

Commissioner Harlan: That seems to be all.

(Witness excused.)

626 Commissioner Harlan: Did we have any appearance yesterday for the Arkansas Southeastern?

(No response.)

Commissioner Harlan: Then we will call the Doniphan, Kensett & Searcy.

Mr. Scott: I will be ready to take that up Monday. I sent a telegram in pursuance of my conversation with you last night.

Commissioner Harlan: The El Dorado & Western.

Mr. Gaughan: That is Mr. Walter's case.

Commissioner Harlan: Little Rock, Maumelle & Western.

Mr. Mehaffy: We have wired for one witness who is coming on the train, and the other witness has gone to meet him.

Commissioner Harlan: Mr. Hobbs, will you be kind enough to furnish a map of your road, showing its connections with the Rock Island at Banks and with the Iron Mountain at Warren, and also showing the relation of the mills with each road and the switch tracks?

Mr. Hobbs: Yes.

Commissioner Harlan: Have it drawn somewhat to scale, so that the distances will all appear clearly and definitely.

Mr. Hobbs: Yes, sir. I would like to ask you also if it
627 is going to be necessary for my counsel to come here now. Is there anything you are going to want of me or our road?

Commissioner Harlan: Not if you will furnish all we have asked you to furnish. If we want any further information we will advise you or your counsel.

The Perla Northern Railway?

Mr. Armistead: I appear for that company. The offices of that company are in St. Louis. I was advised that the Perla Northern is not interested in the question of divisions, because the lumber that is hauled over its road, on which it has been getting a division of the interstate rate, will be cut out and it will cease to get such divisions before the suspension of cancellations in these cases matures and I have nothing to offer, and nothing further to say. As I stated before, I do not want to be taken as absolutely certain in that, but of course if the cancellations are suspended, they will not get a division.

Commissioner Harlan: After your statement the Commission will take it as certain that the divisions will be given up.

The Round Pond Terminal Company. Is there any one here that represents the Round Pond Terminal Company in Arkansas?

(No response.)

628 Tremont & Gulf Railway Company.

Commissioner Harlan: The Tremont and Gulf.
Mr. Garwood: We are ready to proceed, your Honor.
Commissioner Harlan: How many witnesses have you?
Mr. Garwood: We have about three or four or five.

Commissioner Harlan: If they can all arise now and be sworn. (Whereupon the several witnesses were duly sworn.)

H. W. SEAMAN was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: You reside in Chicago, Illinois?
Mr. Seaman: Yes, sir.
Commissioner Harlan: And are a railroad man?
Mr. Seaman: Yes, sir.
Commissioner Harlan: How long have you been connected with the operation of railroads?
Mr. Seaman: For 20 years.
Commissioner Harlan: And with what railroad are you now connected?
Mr. Seaman: With the Tremont & Gulf.
Commissioner Harlan: In what capacity?
Mr. Seaman: As president.
629 Commissioner Harlan: Do you happen to remember when that road was chartered?
Mr. Seaman: It was incorporated under the laws of Louisiana December 18, 1907.
Commissioner Harlan: How long have you been connected with it?
Mr. Seaman: Since its organization.
Commissioner Harlan: When was that road built?
Mr. Seaman: Built, part of it, prior to 1907, but during 1906 and 1907 and 1908.
Commissioner Harlan: In other words, there was no track on its present right of way until 1906, and from that time its construction went forward to completion?
Mr. Seaman: There was a small railroad starting from Tremont about 12 miles south, but after it was concluded to make a railroad of it, with grade and alignment, practically the old railroad was abandoned and a new line constructed so as to put it on a standard railroad basis.
Commissioner Harlan: What is its northern terminus?
Mr. Seaman: Tremont.
Commissioner Harlan: And the southern terminus?
Mr. Seaman: Winnfield.
630 Commissioner Harlan: Has it any branch lines?
Mr. Seaman: It has one to Dodson, a connection with the Rock Island, and from Menefee to Pyburn, where it makes a connection with the Rock Island, and from Menefee to Rochelle, where it makes a connection with the St. Louis & Iron Mountain.

Commissioner Harlan: The Pyburn branch is what you first referred to as the Dodson?

Mr. Seaman: Yes, sir. Pyburn and Dodson are practically the same town.

Commissioner Harlan: That is on the west of your main line?

Mr. Seaman: Yes, sir.

Commissioner Harlan: Rochelle is east of your main line?

Mr. Seaman: Yes, sir.

Commissioner Harlan: What is the distance from Menefee to Pyburn?

Mr. Seaman: I think about 12 miles, although I can give that definitely, and the distances are all given in the paper which I have furnished your Honor, exactly.

Commissioner Harlan: You have spoken about a line that extended some 12 miles south of Tremont, a temporary line.

631 Mr. Seaman: Yes, sir.

Commissioner Harlan: That was afterwards re-aligned and re-graded and made a part of the Tremont & Gulf. When was that line built?

Mr. Seaman: I do not know. It was built by the old Tremont Lumber Company, which was composed of Mr. Gardner, of the Northwestern, and a number of northern people who sold out. The line was of very small value, and was simply a logging line.

Commissioner Harlan: The Tremont Lumber Company had a mill at that time at Tremont, or near Tremont?

Mr. Seaman: Yes.

Commissioner Harlan: Has it a mill there now?

Mr. Seaman: It has just been abandoned; there is a small cutting up plant there, but that will be abandoned.

Commissioner Harlan: Did it own forests around Tremont?

Mr. Seaman: It did.

Commissioner Harlan: South or north of Tremont?

Mr. Seaman: East and west, but not north, to amount to anything.

Commissioner Harlan: It owned on either side of this logging road, then?

632 Mr. Seaman: Yes, sir. If you will examine—where is the black book you have there? That shows the location of the forests.

Commissioner Harlan: The witness here refers to a map entitled a map showing land and timber holdings of the Southern Investment Company, Winn Parish Lumber Company and Louisiana Lumber Company, Limited. I observe that map contains no reference apparently to the Tremont Lumber Company——

Mr. Seaman: The Tremont Lumber Company now owns all the lumber featured on that map. At the time the contract to which the map you have in your hand had reference was made, the lumber was all owned by the three companies, the Louisiana Lumber Company, Southern Investment Company and Winn Parish Company. Since that time, however, they have sold all their lumber and lands to the Tremont Lumber Company.

Commissioner Harlan: And all of these colored portions on this map indicate timber lands that formerly belonged to these three companies and later to the Tremont Lumber Company.

Mr. Seaman: The Tremont Lumber Company formerly owned the mill only and bought the stumpage.

Commissioner Harlan: I suppose much of this timber has
633 been lumbered and cut off.

Mr. Seaman: Some of it.

Mr. Cowan: May I inquire if there are copies of that map which could be furnished for the record?

Commissioner Harlan: Have you copies?

Mr. Seaman: I have no copies of that map. We could get it. I will see that you get one.

Mr. Cowan: It ought to be in the record.

Mr. Garwood: I will introduce that book as a part of the record. It has a great many of the ordinances——

Commissioner Harlan: I don't know that we want this book attached to the record.

Mr. Seaman: You already have it filed with the Commission.

Commissioner Harlan: Including the map?

Mr. Seaman: Yes, sir, a duplicate of that book.

Commissioner Harlan: Very well, then this book and the maps in it will be considered as a part of the record for reference by counsel and the Commission. What is the capital of the Tremont & Gulf, authorized and issued?

Mr. Seaman: The authorized capital is $5,000,000

Commissioner Harlan: The outstanding capital?

Mr. Seaman: $2,000,000.

634 Commissioner Harlan: Have you any bond issue?

Mr. Seaman: $1,550,000 issued; $5,000,000 authorized.

Commissioner Harlan: What is the length of the line, including the branches?

Mr. Seaman: 113.87 miles.

Commissioner Harlan: What was the actual cost of constructing the line and purchasing the equipment?

Mr. Seaman: The right of way and tracks, $1,609,771.85; buildings, fixtures, and so forth; I haven't that separate, but sufficient to bring the total up to $1,851,582.22.

Commissioner Harlan: What part of that expenditure was made while you were president of the company?

Mr. Seaman: Nearly all of it.

Commissioner Harlan: And you know that to be the actual cost of the line and its equipment?

Mr. Seaman: Yes, sir; to the best of my belief.

Commissioner Harlan: That amounts to about $22,000 a mile?

Mr. Seaman: Yes, sir.

Commissioner Harlan: What equipment have you?

Mr. Seaman: We have one class C Baldwin engine, 35 tons, one class C engine purchased from the C. B. & Q., 40 tons, two class C Baldwin engines, 74 tons each; passenger equipment, one
635 coach, two combination coach and baggage; freight equipment, 148 box car manufactured by Haskell & Barker 60,000

pounds capacity each; 50 flat cars, Haskell & Barker, 80,000 pounds capacity; four cabooses, one combination caboose, three box cars, 60,000 capacity, four flat cars, 60,000 capacity, a ditcher plow, drivers, various tools and equipment, all of which is shown upon the schedule which has been furnished you.

Mr. Cowan: Are the flat cars logging cars?

Mr. Seaman: No, sir; we have no logging equipment.

Commissioner Harlan: You mentioned the fact that you have some passenger car equipment.

Mr. Seaman: Yes, sir.

Commissioner Harlan: Do you run passenger cars over the line?

Mr. Seaman: Yes, sir, regularly.

Commissioner Harlan: On regular schedules?

Mr. Seaman: Yes, sir.

Commissioner Harlan: How many trains each way a day?

Mr. Seaman: If you will ask that of our traffic manager, please, he will give it to you definitely and accurately.

Mr. Garwood: There is one train each way each day, your Honor.

636 Commissioner Harlan: We will get at those details from the traffic manager. I observe, Mr. Seaman, that Mr. D. G. Joyce is vice-president.

Mr. Seaman: Yes, sir.

Commissioner Harlan: And J. S. Joyce is secretary.

Mr. Seaman: Yes, sir.

Commissioner Harlan: A. P. Tugwell treasurer.

Mr. Seaman: Yes.

Commissioner Harlan: J. B. Fick, auditor.

Mr. Seaman: Yes, sir.

Commissioner Harlan: Then those same men are directors, and Mr. Jenks, Mr. Stubbs, Mr. Patterson and Mr. Hume.

Mr. Seaman: Yes, sir.

Commissioner Harlan: Is the stock of this road owned substantially by those men?

Mr. Seaman: It is owned by the Southern Investment Company, except sufficient to qualify the directors.

Commissioner Harlan: Where was that company organized?

Mr. Seaman: Maine.

Commissioner Harlan: And under your charter what is the general scope of its functions and operations?

637 Mr. Seaman: To own stock and bonds and lands, and do a general business, and it has power to own stocks and bonds.

Commissioner Harlan: Are you an officer of that company?

Mr. Seaman: I am not.

Commissioner Harlan: Have you some familiarity with its details?

Mr. Seaman: Only in a very general way.

Commissioner Harlan: Is it engaged in any way through other companies in lumbering operations?

Mr. Seaman: Yes, sir; it owns the capital stock of the Tremont Lumber Company.

Commissioner Harlan: Any other companies?
Mr. Seaman: No, sir.
Commissioner Harlan: Any mills?
Mr. Seaman: No, sir.
Commissioner Harlan: Does it directly own any lumber lands?
Mr. Seaman: It does not.
Commissioner Harlan: Does it own any other railroads?
Mr. Seaman: It does not.
Commissioner Harlan: Has it any other business so far as you know, except the lumber business, through the ownership of
638 the capital stock of the Tremont & Gulf?
Mr. Seaman: I am not advised as to that. They have been practically a holding company.
Commissioner Harlan: Do you know what the capital stock of the Tremont Lumber Company is?
Mr. Seaman: I do not.
Commissioner Harlan: Are there any other lumber mills on the line of the Tremont & Gulf?
Mr. Seaman: Yes, sir.
Commissioner Harlan: I observe here the Tremont Lumber Company is indicated as having a mill property at Tremont. That, you say, has lately been abandoned?
Mr. Seaman: Practically so; yes, sir.
Commissioner Harlan: Then it is put down on this map as having interstate at Eros, which is a station south of Tremont.
Mr. Seaman: Tremont, Eros, Pyburn and Rochelle.
Commissioner Harlan: What about Jonesboro?
Mr. Seaman: And Jonesboro.
Commissioner Harlan: It has mills at all those points?
Mr. Seaman: Yes, sir; the mill at Pyburn has practically been abandoned; it has three live mills, Jonesboro, Eros, and
639 Rochelle.
Commissioner Harlan: You are not manufacturing lumber at Pyburn or Tremont?
Mr. Seaman: Not at the present time.
Commissioner Harlan: How lately were they given up as going concerns?
Mr. Seaman: Within the last year.
Commissioner Harlan: Are there any other mills at Pyburn or Tremont?
Mr. Seaman: I am not advised as to that, but our traffic manager could furnish you with all the details.
Commissioner Harlan: Then I observe the Haynes Lumber Company, Cornie Stave Company and Lemore & Company are also named on this map as having some interests at Chatham.
Mr. Seaman: Also G. H. Hughes.
Commissioner Harlan: Is he a lumber man also?
Mr. Seaman: I presume so.
Commissioner Harlan: Are there mills at Chatham?
Mr. Seaman: No, sir; only small mills.

Commissioner Harlan: What operation does the Haynes Lumber Company carry on there?

Mr. Seaman: I could not tell you. I know they are there.
640 and our traffic manager will give you all the details.

Commissioner Harlan: You are not advised, then, as to the number of mills and the character of the lumber interests on your line?

Mr. Seaman: Not in sufficient detail to testify.

Commissioner Harlan: And all the statistics relating to the traffic and extent and character of it, I suppose, can be had from some one else?

Mr. Seaman: Yes, sir. This statement presents in detail all the statistics that you would perhaps require.

Commissioner Harlan: Well, this typewritten statement marked Tremont & Gulf, I suppose, may be filed of record as an exhibit to this witness's testimony.

Mr. Garwood: Yes.

(The statement so offered and identified was received in evidence and thereupon marked Tremont & Gulf Railroad Exhibit No. 1, witness Seaman, received in evidence December 10, 1910, and is attached hereto.)

Commissioner Harlan: Has your company been paying dividends?

Mr. Seaman: It has not.

Commissioner Harlan: It has paid the interest on its
641 bonds?

Mr. Seaman: Yes, sir.

Commissioner Harlan: What is the interest, the rate, I mean?

Mr. Seaman: Five per cent on $1,550,000.

Commissioner Harlan: Has it any other liens of that character?

Mr. Seaman: There are none.

Commissioner Harlan: Has it any accumulated surplus?

Mr. Seaman: No, sir; as fast as money has been made, it has been put into the purchase of additional equipment and facilities for the road.

Commissioner Harlan: Well, it has been earning its operating expenses and more.

Mr. Seaman: It has been earning its interest on its bonds. There has been a deficit, as shown by the statement, from operation at different times. The net results have not shown the cost of operation plus the interest on the bonds, and the fixed charges.

Commissioner Harlan: Of course all the trains operated over the Tremont & Gulf are operated by that company.

Mr. Seaman: No, sir.

642 Commissioner Harlan: Are there any outstanding trackage rights?

Mr. Seaman: Yes, sir.

Commissioner Harlan: Tell us about those. Who has any trackage rights over your line?

Mr. Seaman: The Tremont Lumber Company has trackage rights

under a traffic and trackage agreement, whereby they use our line or any portion of it for the purpose of transporting their logs in their own trains and by their own equipment over our line to their various mills.

Commissioner Harlan: And with their own crews?

Mr. Seaman: And with their own crews.

Commissioner Harlan: Of course, under the supervision of your operating officers?

Mr. Seaman: We train despatch them; yes, sir.

Commissioner Harlan: Is that agreement in writing?

Mr. Seaman: Yes, sir.

Commissioner Harlan: Has it been filed with the Commission?

Mr. Seaman: It has.

Mr. Cowan: That is in the book you refer to?

Mr. Seaman: Yes.

643 Commissioner Harlan: Can you state in just general terms what the Tremont & Gulf pays you, either by the month or by the year, for that right?

Mr. Seaman: They pay us nothing.

Commissioner Harlan: Do you mean the contract does not call for any payment?

Mr. Seaman: It calls specifically for free trackage rights.

Commissioner Harlan: What was the consideration passed to the Tremont & Gulf for that free trackage right?

Mr. Seaman: The furnishing to the Tremont & Gulf Railway Company of its entire in and out bound tonnage, particularly the tonnage arising from 250,000 odd acres of timber land.

Commissioner Harlan: What is the general character of its inbound tonnage?

Mr. Seaman: The railroad, you mean?

Commissioner Harlan: No, of the Tremont Lumber Company. I understand you to say that in consideration of the agreement on the part of that shipper to route all of its inbound and outbound tonnage over your line, you give it free trackage rights over your line?

Mr. Seaman: Let me correct one statement, possibly. This 644 does not provide for the routing of the inbound tonnage specifically. It has special reference to the tonnage arising from the timber lands, a schedule of which is attached to the trackage and traffic agreement.

Mr. Garwood: The 13th paragraph of the agreement.

Commissioner Harlan: That arrangement is expressed in paragraph 13 on page 203 of the book entitled "Corporate Records and Proceedings of the Tremont & Gulf Railway Company.

Mr. Seaman: Yes, sir.

Commissioner Harlan: Which has already been filed with the Commission.

Mr. Seaman: Yes.

Commissioner Harlan: I would like to understand that a little more fully. Here is a shipper that operates its own trains over your line, and apparently such a considerable tonnage that the railroad

company was willing to give it a free trackage right. Now, just how does that result to the financial benefit of your company?

Mr. Seaman: By receiving the tonnage arising from the timber on the land mentioned in these schedules.

Commissioner Harlan: For illustration, the Tremont Lum-
645 ber Company has a mill at Eros?

Mr. Seaman: Yes, sir.

Commissioner Harlan: It takes out logs at or near that point or from some distant point, and carries them to its mills.

Mr. Seaman: The Tremont Lumber Company have as much railroad of their own as the Tremont & Gulf Railway Company has.

Commissioner Harlan: Now, the logs are brought into that mill by the Tremont Lumber Company over its logging road or over your line.

Mr. Seaman: Over its logging roads, which of course are changed from time to time, and wherever it is necessary to attach them to our main line they do so, and take up the distance from the end of their line to the mill to which the logs are destined by operation over our tracks.

Commissioner Harlan: We will assume a movement of logs over their logging road to your main line at some point south of Eros, carried thence in its own trains to its mill at Eros?

Mr. Seaman: Yes.

Commissioner Harlan: Now, it has a free trackage over
646 your line to the mill?

Mr. Seaman: Yes.

Commissioner Harlan: At just what point of time and how does that movement accrue to your financial advantage?

Mr. Seaman: After they have manufactured the lumber and loaded it for shipment outbound.

Commissioner Harlan: Then you move it from Eros to what point ordinarily?

Mr. Seaman: Depending upon the connection, whether to the V. S. & P. or Tremont or various lines, Winnfield or to the Iron Mountain at Rochelle, depending upon the territory to which it may be destined.

Commissioner Harlan: We will take a Rock Island local point; you will move it south to Winnfield?

Mr. Seaman: Yes, sir, because we have switch engines there and can handle it to advantage.

Commissioner Harlan: Well, to Winnfield; that is a distance of what?

Mr. Seaman: Of under 40 miles; 38 to 40 miles.

Commissioner Harlan: Now, you bill it out at Eros to some through point over the Rock Island.

Mr. Seaman: Yes, sir.

647 Commissioner Harlan: Under a joint through rate.

Mr. Seaman: Yes.

Commissioner Harlan: On what basis is your division established to Rock Island local points?

Mr. Seaman: If you will kindly ask that of our traffic manager?

Commissioner Harlan: Very well.

Mr. Seaman: I can give it to you generally, but he can give it to you definitely.

Commissioner Harlan: Well, that is illustrative, then, of the use made by the Tremont Lumber Company of your tracks under the free trackage rights that this contract gives it?

Mr. Seaman: Yes, sir.

Commissioner Harlan: And is illustrative of the financial benefit you get on their manufactured lumber?

Mr. Seaman: Yes.

Commissioner Harlan: Is there any other revenue accruing to the railroad company in any form from the Tremont Lumber Company?

Mr. Seaman: No, sir.

Commissioner Harlan: Under the trackage rights which this contract gives to the Tremont Lumber Company have they the
648 right to haul the logs of other shippers over your line without paying anything to you?

Mr. Seaman: No, sir, except the logs may be manufactured, as in one instance, and the manufactured lumber turned over to us for shipment. There has recently, or is now building at Winnfield, a plant——

Commissioner Harlan: Let us pursue this inquiry a little farther, and then I would like to have the explanation. As I understand your statement and this contract, the Tremont Lumber Company, under its trackage arrangement with the Tremont & Gulf Railroad Company, has no right to haul any logs except those belonging to it.

Mr. Seaman: That is all; or to conduct any business of any character along the line except that with reference to the transportation of its own logs.

Commissioner Harlan: And, as a matter of fact, does it haul the traffic of any one else?

Mr. Seaman: It does not.

Commissioner Harlan: You say there is one exception to that general rule?

Mr. Seaman: Well, it is hardly an exception. The Mansfield Lumber Company has expended about $125,000 or $130,000
649 in the erection of a plant, which is not quite complete, at Winnfield, to saw up the hard wood timber which is intermingled with the pine timber on the acreage belonging to the lumber company, and the lumber company deliver that on their own equipment to the Mansfield Hard Wood Lumber Company.

Commissioner Harlan: The Tremont Lumber Company makes those logs on its own land?

Mr. Seaman: I do not know what they do between themselves as to that. The title to the logs does not pass until they reach Winnfield and their mill. Whatever way the logging is handled, I do not know.

Commissioner Harlan: However, the logs come, whether from the lands of the Tremont Lumber Company or not, they are brought into Winnfield free of charge, so far as your railroad is concerned?

Mr. Seaman: They can only come from the lands of the Tremont Lumber Company.

Commissioner Harlan: And they are brought in free of charge by the Tremont Lumber Company to Winnfield under this trackage arrangement?

Mr. Seaman: Yes.

Commissioner Harlan: And there, so far as you are advised, the title passes to the Mansfield Hard Wood Lumber Company?

650

Mr. Seaman: Yes, sir.

Commissioner Harlan: Do you know who owns the stock in that company?

Mr. Seaman: I do not definitely, except I would state to you that the Tremont & Gulf Railway or the Tremont Lumber Company has no interest whatsoever in it; it is entirely distinct——

Commissioner Harlan: Is it owned directly or indirectly by the Southern Investment Company?

Mr. Seaman: It is not, they have no interest in it. It is an independent company.

Commissioner Harlan: The Southern Investment Company, you said, is owned substantially by the men who own this railroad company?

Mr. Seaman: Yes, sir—no, not by the men. The Southern Investment Company, as a distinct corporation, owns the stock of the Tremont & Gulf Railway Company substantially.

Commissioner Harlan: It is the general understanding that the Joyces own the Southern Investment Company.

Mr. Seaman: Well, they are only one of a great many.

Commissioner Harlan: Well, they are very largely interested?

651

Mr. Seaman: They are very largely interested.

Commissioner Harlan: So far as you know, have the Joyces and any other stockholders in the Southern Investment Company any interest directly or indirectly in the Mansfield Hard Wood Lumber Company?

Mr. Seaman: They have none whatsoever.

Commissioner Harlan: Has the Tremont & Gulf given any other free trackage rights to lumber people over its line?

Mr. Seaman: No. They are willing to do so, however, exactly on the terms stated in this contract, provided they can comply; there are those who can, and if they should apply, they would get the same terms.

Commissioner Harlan: Is it consistent with the laws of the state in which this company operates to allow any one to move traffic over its line without charge?

Mr. Seaman: I do not think it is inconsistent.

Commissioner Harlan: Is it done under any special authority of the State Commission or statute?

Mr. Seaman: Not particularly. I do not know of any prohibition in the statutes.

Commissioner Harlan: Are there other lumber interests
652 that have logging lines connected with the Tremont & Gulf?
Mr. Seaman: No, sir.
Commissioner Harlan: Well, take the Winn Lumber Company, which is noted as having a mill at or near Womack on your line, does it lumber its own forests?
Mr. Seaman: Yes, sir.
Commissioner Harlan: Is that true of the Carnie Stave Company?
Mr. Seaman: Yes, sir.
Commissioner Harlan: The Southern Lumber Company?
Mr. Seaman: Yes, sir.
Commissioner Harlan: G. H. Hughes?
Mr. Seaman: Yes.
Commissioner Harlan: The Haynes Lumber Company?
Mr. Seaman: Yes.
Commissioner Harlan: In other words, none of these lumber companies noted on this map of the Tremont & Gulf are lumbering lands belonging to the Tremont Lumber Company?
Mr. Seaman: No.
Commissioner Harlan: Or the allied interests of that company?
Mr. Seaman: No.
653 Commissioner Harlan: Do you know the extent of their holdings?
Mr. Seaman: I do not.
Commissioner Harlan: Or the location of them?
Mr. Seaman: Well, it is contiguous to the various towns in which they are operated.
Commissioner Harlan: They haul their logs by wagon to these mills?
Mr. Seaman: I do not know; I think so.
Commissioner Harlan: Are the mills on your line?
Mr. Seaman: Yes.
Commissioner Harlan: Or is there a switching movement?
Mr. Seaman: No, the mills are on our line or contiguous.
Commissioner Harlan: Practically on your line?
Mr. Seaman: Yes, sir.
Commissioner Harlan: How far on the east of your line do the woods and forests of the Tremont Lumber Company extend?
Mr. Seaman: That is shown on the maps, your Honor, fully.
Commissioner Harlan: Very well. You do not know anything about the details of the divisions of your line?
Mr. Seaman: No, only in a general way. That the traffic man can answer.
654 & 655 Commissioner Harlan: Has the Tremont & Gulf any other sources of revenue than the movement of lumber for the Tremont Lumber Company, and the other industries on its line, besides passenger and mail?
Mr. Seaman: Well, it does a large general business at Winnfield and various connecting points

Commissioner Harlan: You mean a general transportation business?

Mr. Seaman: Yes.

Commissioner Harlan: Are there any other trackage rights outstanding?

Mr. Seaman: There are none, except that the J. B. White interests, owners of the Ouachita & Northwestern have constructed a track from a connection with the Iron Mountain to a connection with our line between Womack and the line about in that section, and have graded and have their steel there, and they have applied to us for the right to connect there, to get trackage rights into Winnfield so as to connect with the Rock Island and the L. R. & N. and the L. & A.

Commissioner Harlan: Is that an incorporated railroad?

Mr. Seaman: I presume so.

Commissioner Harlan: Owned by a lumber Company?

656 Mr. Seaman: I do not know as to the ownership. The grade is completed and the rails and ties are there now, and the road is constructed within a few miles, and in a very short time will be connected up.

Commissioner Harlan: Is it in operation?

Mr. Seaman: Yes, sir; it is in operation from a point on the St. Louis, Iron Mountain & Southern to within a mile or two.

Commissioner Harlan: Have you agreed upon any trackage rights?

Mr. Seaman: We have substantially, but not in all the details.

Commissioner Harlan: Not formally?

Mr. Seaman: No.

Commissioner Harlan: All the details have not been worked out?

Mr. Seaman: No.

Commissioner Harlan: But in general, does it involve a free movement of the logs from the junction to Winnfield?

Mr. Seaman: No, sir; it would mean that they expect to haul not logs, but the finished product.

Commissioner Harlan: Where is their mill, near your line?

657 Mr. Seaman: No, it is on the Iron Mountain Railroad. I do not know the exact location of their mill, whether it is on the Iron Mountain or back there. They are very large operators.

Commissioner Harlan: Now, their mill is on the Iron Mountain at what point?

Mr. Seaman: I do not know.

Commissioner Harlan: Do they own some forest between the Iron Mountain and the Tremont & Gulf?

Mr. Seaman: I do not know whether the railroad does, but——

Commissioner Harlan: Well, the lumber company that owns it?

Mr. Seaman: Yes, sir.

Commissioner Harlan: Is that where the lumbering operations are going on?

Mr. Seaman: Yes, sir; they have no interests and no mills along our line.

Commissioner Harlan: So they would move the logs to the south-

east to their mill near the Iron Mountain, and the finished product would come back from the mill to the junction with your line?

Mr. Seaman: That portion of it that they wanted to ship over these various lines of road.

658 Commissioner Harlan: And then it would be hauled south to Winnfield and thence to destination?

Mr. Seaman: Yes, sir. The question is whether they should haul that as an intermediate line, or whether we should permit them, having it once entrained, to haul it down with their own engines and equipment, which would be a far preferable proposition. We would be obliged to charge them a rate which would be difficult to ascertain at various times, whereas, if they were allowed to haul their full trains, it would be on a train mile basis, probably. There are times when the individual roads are powerless to furnish equipment; take, for instance, the Rock Island or the Iron Mountain, or any of the roads, have peculiar conditions on their own lines, and do not want to furnish the equipment; if they have connection with but one line, their operations are closed. It is absolutely necessary to get connections with more than one line, so that the operations may be continuous.

Commissioner Harlan: So that if one cannot operate, the other can?

Mr. Seaman: And there are points of destination on the various other lines, which can be reached to far greater advantage.

659 Commissioner Harlan: To sum up your statement in a general way, I understand that since the Tremont & Gulf was opened, the Tremont Lumber Company has enjoyed a free movement of logs over your road to any of its mills?

Mr. Seaman: Yes, sir.

Commissioner Harlan: Wherever the logs may have been produced?

Mr. Seaman: Yes, sir.

Commissioner Harlan: Provided they were produced on lands belonging to it?

Mr. Seaman: Yes.

Commissioner Harlan: And that there is some movement in the trains of the Tremont Lumber Company to Winnfield for the Mansfield Hard Wood Lumber Company.

Mr. Seaman: The logs, however, belong to the Tremont Lumber Company, and all the product from those logs must be delivered back to us.

Commissioner Harlan: Do I understand that you stand ready to give a similar right of free trackage over your line to the logs of any other lumber company, produced at some point, and that require a haul over your line in order to reach the mill of the owner of the logs?

660 Mr. Seaman: Yes, sir, when they comply with the same conditions and under similar circumstances to those under which the Tremont Company's logs move.

Commissioner Harlan: Will you describe in a general way what

are the general circumstances and conditions which you have in mind?

Mr. Seaman: The company furnished us with a large portion of our right of way.

Commissioner Harlan: We will assume that another company has not the opportunity, because your right of way has already been furnished.

Mr. Seaman: I do not think we would stop on that; we would be very glad if we could get the outbound tonnage, and they operate substantially as a railroad, as the Tremont Lumber Company do, which has 20 engines and are highly organized, and we would be very glad to furnish anybody with free trackage, provided we secured all the outbound tonnage from their forests.

Commissioner Harlan: Do I understand that the Tremont Lumber Company operates the chartered railroad?

Mr. Seaman: No, sir, but they operate better than the majority of small railroads. They have nearly 100 miles of track,
661 20 engines or about that number, from 18 to 22 engines, and they are train dispatched by us and are a very highly organized organization.

Commissioner Harlan: You do not mean to say, then, that another company have a substantially equal mileage or be substantially as well organized in order to secure this free trackage?

Mr. Seaman: No, sir, we would not allow every Jim Crow organization that did not know how to operate a train and understand the train rules and perform the proper functions, we would not permit them to operate on our line; if that became necessary we would, if we could secure the consent of the Tremont Lumber Company, avoid this trackage arrangement and put in a train mile arrangement, which we have already considered, and have had printed.

Commissioner Harlan: Under your contract with the Tremont Lumber Company, have you the right to give free trackage to any other lumber company without its consent?

Mr. Seaman: Yes, sir.

Commissioner Harlan: You have?

Mr. Seaman: Yes, sir, specifically in the contract.

Commissioner Harlan: Does it not come to this, then, that
662 you would not give free trackage to any lumber company that was not large enough to operate lumber trains?

Mr. Seaman: That is about right; yes, sir; unless they could operate on a schedule and would not be liable to cause accidents and damage and danger to our track and to our operation.

Commissioner Harlan: In other words, there are conditions that surround the right of anyone else to have a free movement of logs over your road?

Mr. Seaman: Well, only the ordinary business conditions that would move anyone in considering it.

Commissioner Harlan: Well, the small fellow would not get the rate, would he?

Mr. Seaman: He would if he could operate his own cars and trains, and would operate on a schedule. We do not want any one

breaking in on our track at any moment, or at any time, and unless he does so under train schedules, with the proper despatch.

Commissioner Harlan: There are forests on the east and west of your track that are owned by other people?

Mr. Seaman: Yes, sir.

Commissioner Harlan: Outside interests?

663 Mr. Seaman: Yes, sir.

Commissioner Harlan: And of course the wood that stands there on the stump is as valuable as the wood of the Tremont Lumber Company?

Mr. Seaman: Yes, sir.

Commissioner Harlan: And if manufactured, it would compete in practically the same markets?

Mr. Seaman: It would not make any difference as to that. Yes, it would.

Commissioner Harlan: So that the basis on which they might successfully compete, becomes very important, does it not?

Mr. Seaman: I do not quite understand your question.

Commissioner Harlan: Well, if they had to pay for hauling their logs over your track to their mills, and the Tremont Lumber Company does not have to pay you, the latter company would have something of the advantage.

Mr. Seaman: Not a particle. We will haul their logs at a rate that is satisfactory, if they give us the outbound tonnage, or else we will charge them a straight rate. The proposition is based on the question of receiving back to us the products of those forests, otherwise we would put in a straight tariff for moving it, the

664 same as the L. & A. or any other railroad.

Commissioner Harlan: But I want to get the thing more specifically. You say there are outside interests here in these woods. Now, it is entirely conceivable that logs may come to your track possibly in a logging train of three or four cars, that have to be moved to some mill on your line.

Mr. Seaman: Yes, sir.

Commissioner Harlan: If that is a small operation, so that it cannot meet the general conditions, you have outlined, you won't give it free trackage, but you charge it a rate on the logs?

Mr. Seaman: We will give them free trackage if they will give us back all the tonnage arising from the logs so moved.

Commissioner Harlan: Suppose they have a mill at Dodson and cannot give you the manufactured tonnage outbound because it is right on the Rock Island tracks.

Mr. Seaman: We are also at Dodson, and if they move it off from our line and move the tonnage through other transportation companies, they cannot secure free trackage on our line.

Commissioner Harlan: Then does it not come to this, that if the owner of the forest there is so situated that he can not give you any outbound tonnage of the manufactured lumber, he does

665 not get a service over your line, that is, equipment on the same terms and conditions upon which you offer service to the Tremont Lumber Company.

Mr. Seaman: The fact is, your Honor, that the situation that you have in mind does not exist, as a matter of fact.

Commissioner Harlan: Well, if it did exist, he would get the same result.

Mr. Seaman: If it did exist, he would get the same result as the Tremont Lumber Company exactly. There are forests there of sufficient magnitude to warrant it. The question has been up, and whenever the people who own that want to lumber it and are willing to give us the outbound tonnage, they will get exactly the same conditions.

Commissioner Harlan: I understand you to say the details of the tonnage and the extent of it will be testified to by the traffic manager.

Mr. Seaman: Yes, sir. I simply want to add one thing. I know at the inception of this railroad enterprise Mr. W. T. Joyce, who is now dead, and who I think you know or know of, was largely interested in railroads, not only lumber railroads, but other railroads,
and being largely interested in this large tract of timber, and
666 seeing the opportunities for investment here, and for the construction of a railroad and the building up of the 250,000 acres of land, he projected this road from Tremont to Winnfield and from Winnfield to Rochelle and from Rochelle to Neches, a distance of 62 miles east of Rochelle. Have you the large map there, Mr. Garwood?

(Map produced.)

Commissioner Harlan: Well, the road from Rochelle to Neches has not been built.

Mr. Seaman: No, sir; it has been surveyed. It would have been built if we were certain as to what the Interstate Commerce decision would be. If we are to be classed as a tap line, so-called, the road will not be built. If we are a railroad, as I absolutely know we are, the road will be built. We have made our surveys and we own some timber east of there; but it is agricultural as well as timber, and contains large quantities of stone and gravel, a very valuable country.

Commissioner Harlan: Is there any agricultural country upon the Tremont & Gulf?

Mr. Seaman: Yes, sir; very largely.

Commissioner Harlan: Do you move any cotton?

Mr. Seaman: Yes, sir; cotton and peanuts and trains of
667 cattle to New Orleans. We moved 1,200 carloads of stone; there is a little railroad off to a quarry and we are moving 1,200 cars to a connection with the V. S. & P. for railroad construction in Mississippi.

Commissioner Harlan: Is it owned by outside interests?

Mr. Seaman: Absolutely.

Commissioner Harlan: Judge Garwood, have you any questions?

Mr. Garwood: Yes, a few. Your statement shows that the cost of the Tremont & Gulf is approximately $1,800,000 and more.

Mr. Seaman: Yes.

Mr. Garwood: In your opinion as a railroad man, is that a fair estimate of its actual value as a railroad proposition?

Mr. Seaman. It is.

Commissioner Harlan: Actual value at the time it was built?

Mr. Seaman: Yes, sir.

Commissioner Harlan: You have had a large experience in the building of railroads?

Mr. Seaman: Yes, sir.

Mr. Garwood: What is its maximum grade?

Mr. Seaman: One per cent.

668 Mr. Garwood: Do you know its maximum curvature?

Mr. Seaman: I think it is three and a half or four degrees.

Mr. Garwood: Four degrees is my own recollection.

Mr. Seaman: Four, as I remember.

Mr. Garwood: Its cost will approximate $22,000 a mile?

Mr. Seaman: Including equipment; yes, sir.

Mr. Garwood: What is its weight of steel rail?

Mr. Seaman: 60 pounds.

Mr. Garwood: Is it in all things a standard gauge permanent railway, well equipped with permanent and valuable stations, equipment and all of the modern appliances of a modern railway?

Mr. Seaman: It is.

Mr. Garwood: How is it operated, by telephone or telegraph?

Mr. Seaman: Both.

Mr. Garwood: Both by telegraph and telephone?

Mr. Seaman: Yes, sir.

Mr. Garwood: Does it own its own telephone system?

Mr. Seaman: It does.

Mr. Garwood: If you know, what is the value of that plant, the telephone plant?

Mr. Seaman: I cannot give you the value. It is shown

669 here.

Commissioner Harlan: Do you use the wires for public service?

Mr. Seaman: No; we have three wires and four wires, standard telephone lines.

Commissioner Harlan: It cost some $20,000, is my understanding.

Mr. Garwood: That is my recollection. Now, how is the telegraph worked in connection with that; who owns the telegraph line?

Mr. Seaman: We do. We have both the telegraph and telephone; we are largely despatching now by telephone.

Mr. Garwood: Do you do an express service?

Mr. Seaman: We do. We have a contract with the Wells Fargo Express Company.

Mr. Garwood: Is that contract set out in extenso in your volume of corporate records which you have filed here?

Mr. Seaman: It is.

Mr. Garwood: I will ask that the Commission consider that contract as introduced in evidence. Have you a contract for the carriage of the mail?

Mr. Seaman: Yes, sir.

281

Mr. Garwood: The Tremont Lumber Company, as such,
670 owns no interest in the railway company?

Mr. Seaman: No.

Mr. Garwood: Nor does the railway company, as such, own any interest in the lumber company?

Mr. Seaman: None whatever.

Mr. Garwood: The community of interests arises solely from the fact that the Southern Investment Company, which has multitudinous stockholders, owns stock in both companies?

Mr. Seaman: Yes, sir.

Commissioner Harlan: May I interrupt there? Is there some document here that shows how much stock the Southern Investment Company owns in each company?

Mr. Seaman: No, sir; I think not.

Commissioner Harlan: Can you tell us?

Mr. Seaman: I do not know. They own all the stock in each one——

Commissioner Harlan: All the stock?

Mr. Seaman: Substantially all the stock of the Tremont Lumber Company and substantially all the stock of the Tremont & Gulf

Commissioner Harlan: I understood so, but——

Mr. Garwood: Except such as is necessary to qualify di-
671 rectors. Does the railway company maintain an absolutely separate and independent organization from the lumber company?

Mr. Seaman: It does.

Mr. Garwood: Has it its own independent offices and officers?

Mr. Seaman: Absolutely; there is no employee of the Tremont & Gulf Railway Company that is in any manner an employee of the lumber company, or vice versa.

Mr. Garwood: Are their offices physically separate?

Mr. Seaman: They are.

Mr. Garwood: Does it perform all the functions of a common carrier, both as to holding itself out as such, actually transporting the business and in the issuance of bills of lading intrastate and interstate upon the usual and ordinary forms?

Mr. Seaman: Yes, sir.

Mr. Garwood: Under the laws of the State of Louisiana, it exercises the right of eminent domain?

Mr. Seaman: Yes, sir.

Mr. Garwood: Is it a member of the American Railway Association?

Mr. Seaman: Yes, sir.

Mr. Garwood: Does it conform to the rules and regulations of the Railroad Commission of Louisiana?

672 Mr. Seaman: Yes, sir.

Mr. Garwood: Is it recognized by that official body as a common carrier under the laws of Louisiana?

Mr. Seaman: Yes, sir.

Mr. Garwood: Are its cars and locomotives equipped in accordance with the safety appliance acts of Congress?

Mr. Seaman: Yes, sir.

Mr. Garwood: Can you state whether the State of Louisiana has safety appliance laws?

Mr. Seaman: Yes, sir.

Mr. Garwood: Does it conform with those laws?

Mr. Seaman: It does.

Mr. Garwood: Does it keep its accounts in accordance with the accounting orders of the Interstate Commerce Commission?

Mr. Seaman: It does.

Mr. Garwood: Does it make its regular reports in accordance with the rules and regulations of the Interstate Commerce Commission?

Mr. Seaman: It does.

Mr. Garwood: Does it make similar reports to the Railroad Commissioner of Louisiana?

Mr. Seaman: Yes, sir.

673 Mr. Garwood: When demanded?

Mr. Seaman: Yes, sir.

Mr. Garwood: I believe you stated there is no officer of the railroad company that is an officer or employee of the lumber company.

Mr. Seaman: That is, active officers. Mr. David Joyce is vice-president, and Mr. Stanley Joyce, Secretary.

Mr. Garwood: I am referring to the actual conduct of the business.

Mr. Seaman: Yes, actual operation.

Mr. Garwood: Has the railroad company an officer, a traffic man and a full corps of employees necessary to operate the road, with due regard to the rights, safety and convenience of the public.

Mr. Seaman: It has.

Mr. Garwood: It operates its trains on schedule time?

Mr. Seaman: Yes, sir.

Mr. Garwood: Have you in the town of Winnfield acquired trackage right under ordinances through the streets of that town?

Mr. Seaman: Yes, sir.

Mr. Garwood: Those are given to you under duly enacted

674 ordinances?

Mr. Seaman: Yes, sir.

Mr. Garwood: Some of them, I believe, are in your book of corporate records.

Mr. Seaman: They are all shown in the record.

Mr. Garwood: We will ask that they be considered as introduced in evidence.

Commissioner Harlan: It will be so understood.

Mr. Garwood: Has the railroad company received any public aid, by way of public donation, taxation or otherwise, from any of the communities through which it runs.

Mr. Seaman: In the town of Winnfield principally, where we established a depot at an expense of $7,000 and have been a material assistance to them, as is shown by the record this morning, in the Picayune, that largely through our efforts the town of Winnfield has been placed upon a parity with the connection of the Rock Island

with the V. S. & P., so that it is now in a fair way to become a large distributing center, which it has gradually been approaching.

Mr. Garwood: What is the population of Winnfield?

Mr. Seaman: I could only guess as to that, but I think abiut 3,500 or 4,000 people. It possibly may be larger.

675 Mr. Garwood: Largely through the connections afforded by your road, its competitive influence and its efforts in that direction, Winnfield aspires to become and is to some extent becoming a jobbing center, is it not?

Mr. Seaman: Rates were put in yesterday by the Commission which will permit them to become a jobbing center. They did do considerable, but they were at a disadvantage with the connecting points on the Rock Island and the V. S. & P. until the order of the Commission was entered yesterday at Shreveport.

Mr. Garwood: One other thing, relative to the trackage contract. I understood you to state to Commissioner Harlan that the two companies have been negotiating relative to a change of that contract.

Mr. Seaman: Yes.

Mr. Garwood: Would you please state how far that negotiation has gone and what are the proposed alterations that are suggested?

Mr. Seaman: Well, as between the lumber company and the railroad company and the Southern Investment Company, as a railroad man, I have proposed that they pay to us a trackage of 35 cents a train mile, which is the usual trackage agreement, where they

676 furnish their own equipment and power. The trackage agreement in force on the Rock Island at points, and I think upon the Missouri Pacific—that question has proceeded far enough to print the necessary contract, which has been printed. It is simply a modification of section 13 of the traffic and trackage agreement, whereby, instead of free trackage, they are to pay us at the rate of 35 cents per train mile, and with the necessary modifications to fit that condition.

Mr. Garwood: That is all.

Commissioner Harlan: I neglected to refer to the mills at Jonesboro and Rochelle, of the Tremont Lumber Company, and to their relation to the lines of the regular carriers. How far is the Tremont Lumber Company's mill at Jonesboro from the tracks of the Rock Island?

Mr. Seaman: A plat is attached to this book, giving the exact distance.

Commissioner Harlan: Well, in a general way.

Mr. Seaman: Oh, it is not very far.

Commissioner Harlan: About a quarter of a mile?

Mr. Seaman: About, but it is shown definitely on the plat.

677 Commissioner Harlan: How far is their mill at Rochelle from the tracks of the Iron Mountain?

Mr. Seaman: About the same distance. The railroad company owns the tracks at all the mills, the lumber company owns no tracks at the mills.

Commissioner Harlan: What allowances or divisions do you get

from the Iron Mountain and Rock Island on manufactured lumber out to interstate points from those mills?

Mr. Seaman: If you will ask that of our traffic manager, he knows the details.

Commissioner Harlan: What is your highest allowance; do you happen to remember that? Never mind, we will get it from the other witness.

Mr. Seaman: I think it is six cents.

Commissioner Harlan: You do get allowances on shipments from those mills, or divisions, as you call them?

Mr. Seaman: Yes, sir.

Commissioner Harlan: Does the Tremont & Gulf make any allowances to the lumber company of any kind?

Mr. Seaman: None whatever.

Commissioner Harlan: Does the lumber company, so far as you know, get any allowances from the Rock Island and Iron
678 Mountain?

Mr. Seaman: The lumber company itself?

Commissioner Harlan: Yes.

Mr. Seaman: No, sir, the lumber company has absolutely no tonnage.

Commissioner Harlan: This is not a milling in transit movement of logs to the mill?

Mr. Seaman: No.

Commissioner Harlan: It is merely a local movement.

Mr. Seaman: Yes.

Examiner Burchmore: There is on file with the Commission a contract dated February 5, 1909, between the Tremont & Gulf and the Rock Island System, relating to trackage and maintenance of the connection at Winnfield, I think.

Mr. Seaman: Yes, sir.

Examiner Burchmore: Have you any other contracts with the Rock Island System relating to divisions or rates?

Mr. Seaman: Well, no written contract; no, sir, only we are a party to their tariffs in the ordinary way.

Examiner Burchmore: Aside from the free trackage rights accorded to the lumber companies, is there any service performed by the Tremont & Gulf Railroad for the Tremont Lumber Com-
679 pany without charge?

Mr. Seaman: No, sir.

Examiner Burchmore: There is no free switching performed?

Mr. Seaman: No, sir.

Examiner Burchmore: Does not the Tremont & Gulf Railroad Company perform interwork switching free of charge?

Mr. Seaman: No; we spot our cars and take care of them, and they perform their own service.

Examiner Burchmore: Has there been in your knowledge in the past any negotiation for the sale of this Tremont & Gulf to the Rock Island or the St. Louis, Iron Mountain & Southern System?

Mr. Seaman: Is that a part of this inquiry?

Mr. Garwood: I presume almost anybody who owns a short line

road would like to sell it, but I think those are matters of more or less private nature, and a business man would scracely like to go into it. I do not know anything about it, and do not care anything about it.

Commissioner Harlan: We will limit the inquiry in this way. We want to know from this witness whether there are any arrangements that are completed, either with the Rock Island or the Iron Mountain, and the actual consummation of which will de-
680 pend upon the result of the Commission's investigation in this proceeding. That, I think, the Commission is entitled to know.

Mr. Garwood: Of course, your Honor, if there is anything in the shape of an agreement by which a motive might be established for the extension of any improper or peculiar favors, or anything of that sort, it is a matter, of course, which the Commission would have a perfect right to probe to the bottom, and we would have no objection to that line of inquiry, and as a practical matter, I would have no objection to this inquiry except this, I do not know; I have no personal knowledge about the matter one way or the other, but it occurs to me that no business man, if he is dealing with one, two or three, he might be trying to play one against the other; I do not know——

Commissioner Harlan: It was for that reason that I limited the inquiry to executed agreement; that is, agreements that are so far negotiated as to have become fixed and depending for their consummation only upon a condition subsequent to or the result of the conclusions of the Commission in this proceeding.

Mr. Garwood: Whether the Commission does or does not
681 recognize this as a common carrier?

Commissioner Harlan: Yes, or whether it continues or orders the cancellation of the division.

Mr. Garwood: Now, your Honor will pardon me when I say that I fail to see how that would throw any light upon the proposition whether we are a common carrier or not. If we are a common carrier, the Commission will doubtless hold we are entitled to a division.

Commissioner Harlan: There is undoubtedly force in your proposition, but the other side of it is this, the Commission does not recognize any common carrier has any secrets of its own, if it is under the jurisdiction of the Commission.

Mr. Garwood: Any traffic secrets, I heartily concur, nor have we any secrets——

Commissioner Harlan: Well, and its relations to other carriers in the form of contracts and agreements, if they are not reduced to writing, is a matter which the Commission has always thought was within its jurisdiction to inquire about.

Mr. Garwood: For instance, I speak with the utmost freedom because I do not know, if we ascertain from this witness on the stand that he is trying to sell to the Frisco or the Rock Island or the Iron Mountain, possibly our lines would like to get into the
682 game some where, and perhaps we could one way or the other, not wishing to see a good road like the Tremont & Gulf

fall into the laps of our competitors, we might interpose to block the game in some way. I can conceive of such things being done.

Commissioner Harlan: You could not do that if the agreement were executed, and I limited the inquiry to that proposition, whether any negotiation has been carried so far by the Tremont & Gulf with the Rock Island or the Iron Mountain that it will become a consummated transaction, depending on the result of this inquiry. Now, I do not see that that is a matter that a carrier has a right to withhold from the Commission.

Mr. Garwood: Now, what bearing does that have upon the question before the Commission, as to whether we are or are not a common carrier?

Commissioner Harlan: I will leave you to infer what bearing it may have. It may have a very extensive bearing. If the price paid amounts to a continuation of a division in another form it may be a very vital question, and it may have other significance.

Mr. Garwood: If it is a sale, how could there be a continuance of a division, when they have lost title?

683 Commissioner Harlan: We are now talking about the possibility of a continuance in another form to an investment interest of the divisions that they are now enjoying in this form. Now, that seems to me to be clear enough. Do you press your objection to this question?

Mr. Garwood: Solely upon the proposition that it is a matter of private business interests, which has no relevancy or materiality to the matter before the Commission.

Commission Harlan: I again ask, do you press your objection?

Mr. Garwood: Yes, sir.

Commissioner Harlan: In view of the importance that counsel attaches to the question, I will take the matter under consideration until two o'clock as to what ruling will be made at this time.

Mr. Garwood: It may possibly be we will have no objection to it. I know nothing about the subject matter, and therefore I make the objection.

Commissioner Harlan: Perhaps you might confer with the witness and ascertain whether he desires to answer or ascertain whether he has any objection.

Mr. Seaman: I will say we have no executed contracts
684 which are not on file with the Commission.

Commissioner Harlan: I did not mean contracts which were executed on paper in a formal way, but whether the negotiation has proceeded to an understanding of any kind, whether verbal or in writing that is fixed and depends for its consummation upon the result of this inquiry.

Mr. Garwood: We interpose the objection at this time.

Commissioner Harlan: The question will be reserved until two o'clock.

Examiner Burchmore: Under this contract referred to on page 203 of the book "Traffic and Trackage Agreements," the right is reserved to the Tremont & Gulf Railroad Company to route all traffic furnished by the lumber company?

Mr. Seaman: Yes, sir.

Examiner Burchmore: Is that same reservation contained in the new contract which is ready for signature?

Mr. Seaman: Yes, sir, except that we always recognize if there is any material difference, as stated in the contract, to the shipper, or if he has a preference, we have always observed it, but if it makes no difference to the Tremont Lumber Company over what route it goes, we select the routes which will give the best expedition and
685 best results to us.

Examiner Burchmore: The provision in the contract is subject to some such provision.

Mr. Seaman: No, only they have the right of terminal delivery, and we have the right, there being no difference whatsoever in the rates to the lumber company, the contract specifically provides they reserve the right of terminal routing.

Examiner Burchmore: Was any part of the rail from which the Tremont & Gulf was actually constructed, furnished by any common carrier with which it connects?

Mr. Seaman: No.

Examiner Burchmore: It was all purchased in the market?

Mr. Seaman: Yes, sir.

Examiner Burchmore: Were those rails moved to the points where used, under a special rate published by the interstate carriers, to apply on such movements?

Mr. Seaman: Yes, sir.

Examiner Burchmore: Were those special rates on the same general basis as the rates usually applied on steel rails?

Mr. Seaman: Yes, sir.

Examiner Burchmore: They were not on an unusually low
686 basis or special basis?

Mr. Seaman: No.

Examiner Burchmore: Did the Tremont & Gulf receive any divisions out of the movement of its own rails?

Mr. Seaman: I believe not. I am not sure, but I think not.

Examiner Burchmore: Rails for new construction or replacements move under joint rates which are participated in by the Tremont & Gulf?

Mr. Seaman: Ordinary material rates.

Examiner Burchmore: Do you know about what those divisions are?

Mr. Seaman: I do not.

Examiner Burchmore: Since the construction of the Tremont & Gulf and during the period since the construction, has the Southern Investment Company itself or through its subsidiary companies increased its land, or timber, or stumpage holdings in this country?

Mr. Seaman: Somewhat from time to time, but I am not familiar as to that. They are always buying.

Examiner Burchmore: Explain the failure to include in the lines of the Tremont & Gulf Railroad the private railroad operated by the lumber company.

687 Mr. Seaman: The lumber company's roads are being taken up and replaced from time to time at different junction points, operated through the woods in all directions, temporary railroad and not permanent.

Examiner Burchmore: It is only because of its temporary character that it was kept out of the organization?

Mr. Seaman: No, sir; absolutely the Tremont & Gulf is a railroad, as much as any railroad ever constructed, and the logging roads are logging roads purely for that purpose.

Examiner Burchmore: I understood those logging roads were of a very high character of construction.

Mr. Seaman: Yes, sir, they are; as far as logging roads go. They have main lines, and branches off of those. The main lines remain for years, and the branches from them are taken up and put down from time to time.

Commissioner Harlan: Judge Cowan, have you some questions? Let me say that I understand from Mr. Garwood that all the details of rate matters and financial details and matters of operation will be explained by other witnesses.

Mr. Cowan: Yes, I understood that. The only thing I thought of asking Mr. Seaman was if there is anybody here representing the Tremont Lumber Company who could tell us about the affairs of the Lumber Company. If so, we might want to call them, if
688 they are here.

Commissioner Harlan: Is there any officer or agent of that company here?

Mr. Seaman: There is, as a matter of fact.

Commissioner Harlan: Who is it?

Mr. Seaman: Mr. Carpenter, is here, not as a witness, but as an onlooker.

Commissioner Harlan: If Mr. Carpenter is here, we would like to have him here at two o'clock as a witness.

Mr. Cowan: I do not know that we want to ask anything at this time.

Mr. Coleman: Have you been with the Tremont & Gulf Railroad ever since it was originally constructed?

Mr. Seaman: Yes, sir—now, one moment. The Tremont & Gulf Railway Company is organized, there was the Tremont & Gulf Railroad, a small 12 mile road, owned by other interests which we succeeded. I organized the Tremont & Gulf Railway Company.

Mr. Coleman: The Tremont & Gulf Railroad Company——

Mr. Seaman: Railroad, not company.

Mr. Coleman: Railroad, began at Tremont?

Mr. Seaman: Yes.

689 Mr. Coleman: Extended in a southerly direction for 12 miles.

Mr. Seaman: About 12 miles.

Mr. Coleman: What year was that?

Mr. Seaman: I do not know what time the original road was constructed. It was an old logging road.

Mr. Coleman: When you came in?

Mr. Seaman: In 1907, 1906 and 1907.

Mr. Coleman: Then the Tremont & Gulf Railway began the construction of a road?

Mr. Seaman: Yes, sir.

Mr. Coleman: Still in a southerly direction?

Mr. Seaman: Yes, sir.

Commissioner Harlan: We have been all over that in a general way, and I wish you would remember what we explained. This witness has explained those details. Now, if you have some other facts you want to bring out, you may do so.

Mr. Coleman: I will not be but a minute, if I keep on.

Commissioner Harlan: Very well.

Mr. Coleman: Your mill is at Tremont, the first one?

Mr. Seaman: Yes, sir.

690 Mr. Coleman: How far was the first construction of the railway?

Mr. Seaman: It was constructed continuously, without interruption, as it now stands.

Mr. Coleman: Did you have a mill at Eros?

Mr. Seaman: Yes, sir; that was an old mill, which was taken over and rebuilt by these people when they reached it.

Mr. Coleman: Then you went down to Sikes?

Mr. Seaman: Yes, sir.

Mr. Coleman: At that time the only connection with a trunk line was the Vicksburg, Shreveport & Pacific?

Mr. Seaman: Yes.

Mr. Coleman: Did you go to Jonesboro next?

Mr. Seaman: No. The entire road was constructed throughout. We do not go direct from Sikes to Jonesboro.

Mr. Coleman: The Rock Island operates that track?

Mr. Seaman: Yes, sir.

Mr. Coleman: When did you complete the spur from Pyburn over to Rochelle?

Mr. Seaman: At the same time; it was all built together, the Rochelle line a little later; that is, it happened to be constructed a little later.

691 Mr. Coleman: When was the Southern Investment Company organized?

Mr. Seaman: I cannot tell you.

Mr. Coleman: No idea?

Mr. Seaman: Oh, years ago.

Mr. Coleman: Before the railroad?

Mr. Seaman: Yes.

Mr. Coleman: When was the stock of the railroad company transferred to the Southern Investment Company?

Mr. Seaman: At the time it was issued.

Mr. Coleman: The Mansfield Hard Wood Lumber Company, you testified, was given a free haul of its logs down to the mill.

Mr. Seaman: No, sir; I did not so testify.

Commissioner Harlan: No, he said the Mansfield Company got no title to the logs except upon delivery at the mill, but they were

hauled there by the Tremont Lumber Company on its trackage rights.

Mr. Coleman: You do not care to mill hardwood lumber up there?

Mr. Seaman: No, sir.

Mr. Coleman: Is not that the reason you let it go down there, so it will clear it up for you?

692 Mr. Seaman: Yes, sir. You speak of me. I have nothing to do with the lumber.

Commissioner Harlan: It is understood your replies refer to the lumber company.

Mr. Seaman: I presume so.

Mr. Coleman: When you testified a while ago you would allow any lumber company to run a train over your road on a trackage arrangement similar to the one which the Tremont Lumber Company has with the Tremont & Gulf Railway, your sole condition was that they give you the outbound tonnage?

Mr. Seaman: Practically so; yes.

Mr. Coleman: That carried with it, I suppose, the division of the through rates?

Mr. Seaman: Yes, sir.

Mr. Coleman: So, if the division of the through rates at Winnfield and Rochelle is six cents per 100 pounds, you meant that that six cents per 100 pounds should accrue to the Tremont & Gulf Railroad Company?

Mr. Seaman: Yes, sir.

Mr. Coleman: Does the Southern Investment Company pay a dividend?

Mr. Seaman: I do not know.

693 Mr. Coleman: Who does?

Mr. Seaman: I do not know that.

Mr. Coleman: Are you president of that company?

Mr. Seaman: I am not. I have no connection with it.

Mr. Coleman: Does the Tremont Lumber Company pay a dividend?

Mr. Seaman: I have no connection with the Tremont Lumber Company.

Mr. Coleman: DoDes the Tremont & Gulf Railway pay a dividend?

Mr. Seaman: It has not.

Mr. Coleman: Never has?

Mr. Seaman: No.

Mr. Coleman: How was your title acquired to the right of way of all these various roads?

Mr. Seaman: By deed.

Mr. Coleman: Was all of it by deed?

Mr. Seaman: Absolutely.

Mr. Coleman: You never condemned any land?

Mr. Seaman: Yes, sir.

Mr. Coleman: Then you did not get it by deed.

Mr. Seaman: We got it from the sheriff by deed in the proper way, if you understand condemnation proceedings.

694 Mr. Coleman: Who built the road from Jonesboro to Sikes?

Mr. Seaman: That was built by the old lumber company partially; I do not know who built it, as a matter of fact.

Mr. Coleman: You have it marked as one of your lines.

Mr. Seaman: Yes, sir; we operate that under lease.

Mr. Coleman: Under lease from whom?

Mr. Seaman: From the Tremont Lumber Company.

Mr. Coleman: What are the terms of that lease?

Mr. Seaman: It is all shown in the book here of records.

Mr. Coleman: You don't know it?

Mr. Seaman: I don't know it out of hand. It is here as part of the record.

Mr. Coleman: You mentioned something about a contract for 35 cents covering the trackage.

Mr. Seaman: Yes.

Mr. Coleman: 35 cents per train mile?

Mr. Seaman: 35 cents a train mile limited to certain tonnage.

Mr. Coleman: There never has been a secret arrangement, has there, between the two companies?

Mr. Seaman: No, sir. Every contract of any kind or character that our railroad has with the Tremont Lumber Company

695 or any other patron on our line is contained in this book, except one or two minor contracts as to connections which have been made since this was published.

Mr. Coleman: If there has been a running arrangement of 25 cents between your company and the Tremont Lumber Company would you know of it?

Mr. Seaman: Yes, sir.

Mr. Coleman: Is Mr. Batchelder here?

Mr. Seaman: No. He has no connection with the Tremont & Gulf Lumber Company.

Mr. Coleman: If I told you Mr. Batchelder testified in the case of the Chicago Lumber & Coal Company against the Tioga & Southeastern Railway two years ago that the Tremont Lumber Company paid 25 cents per train mile to the railroad company—or just the other way—would that change your opinion?

Mr. Seaman: Not the least, because he did not know anything about it if he said so.

Mr. Coleman: Is your road operated at a profit or a loss?

Mr. Seaman: At a loss.

Mr. Coleman: Always?

696 Mr. Seaman: Some months it is operated at a profit. We hope soon to have it on a profitable basis.

Mr. Coleman: Have you ever filed with the Louisiana State Commission your total earnings and expenditures?

Mr. Seaman: I think so. That you can ascertain from our auditor who attends to that part of the business.

Mr. Coleman: Have they ever shown a net profit for a year?

Mr. Seaman: No, never.

Mr. Coleman: Sure?

Mr. Seaman: I am quite sure. I do not know as to the filing of it, but I do not know of any year when we have made a net profit.

Mr. Coleman: You were connected with it two years ago?

Mr. Seaman: Yes, sir.

Mr. Coleman: Would it refresh your recollection if I told you—I do not say you personally, but your company—filed a statement with the Louisiana State Commission showing total earnings of $83,600, operating expenses $54,564.68, and a net profit of $29,080.

Mr. Seaman: I would not know anything about it.

Mr. Coleman: So when you said they had not made one,
697 you meant you did not know anything about it?

Mr. Seaman: Only in a general way. We have no profits for distribution to the stockholders, because I am continually asking them for more money than they will furnish me to put into track and equipment, and for other purposes.

Mr. Cowan: I assume you have reference to profit over and above fixed charges.

Mr. Seaman: Yes.

Commissioner Harlan: What was your operating ratio last year; do you know?

Mr. Seaman: 75.7 per cent.

Mr. Coleman: In the construction of your railroad, has your aim been to put your mill at a junction point with a trunk line?

Mr. Seaman: We have nothing to do with mills; we have them all along the line.

Mr. Coleman: Were not the mills built at junction points after your railroad connected, or before?

Mr. Seaman: Some were before, and some after.

Mr. Coleman: Which before?

Mr. Seaman: Jonesboro, Pyburn and Tremont.

Mr. Coleman: And the ones at Rochelle and Winnfield
698 were built afterwards?

Mr. Seaman: We have no mill at Winnfield. Rochelle was just completed a short time ago. We built at Rochelle because the Iron Mountain is here, and there are good water facilities, the Little River.

Mr. Coleman: I understand you do not know about the divisions and the details.

Mr. Seaman: No; I know generally, but not the details.

Commissioner Harlan: Do you rent any equipment from the lumber company?

Mr. Coleman: No.

Mr. Cowan: Or do they rent any from your company?

Mr. Seaman: No. They may at times get an engine for a day for a special service.

Mr. Coleman: You testified that the line from Womack over to Lyons—was it?

Mr. Seaman: From a point between Womack and Lyons easterly to a connection with the Iron Mountain.

Mr. Coleman: You testified that the reason that would be desirable would be on account of equipment, giving you better equipment.

Mr. Seaman: Not giving us any equipment.

699 Mr. Coleman: Won't you clear us up on that?

Mr. Seaman: The lease would be desirable so after they had their product all in train at the point where their mill is, they could better haul it through over our line than for us to pick it up at the junction point, we making them a train mile rate. The contract has not been concluded as yet.

Mr. Coleman: You did not mean it would have any effect on the furnishing of cars?

Mr. Seaman: Not on our equipment.

Mr. Coleman: You do not send your cars out?

Mr. Seaman: Yes, sir.

Mr. Coleman: Over other lines?

Mr. Seaman: Yes, sir.

Mr. Coleman: How extensively?

Mr. Seaman: All of them; we never see them.

Mr. Coleman: How many have you?

Mr. Seaman: We have one or two hundred. We try to get them and you fellows take them and hold on to them; steal them, in other words.

Mr. Coleman: Where the railroad does the hauling for the lumber company free of charge, you take care of the per diem, do you not?

700 Mr. Seaman: Yes.

Mr. Coleman: I mean the railroad takes care of the per diem.

Mr. Seaman: Well, you may get that from our traffic man, who understands the details.

Mr. Coleman: If your contract so provides, no doubt it is true.

Mr. Seaman: Whatever our contract provides, it is true.

Mr. Coleman: There is such a clause in the contract.

Commissioner Harlan: I do not think your question was quite accurately stated. The railroad does not do any hauling for the lumber company, of logs; the lumber company does the hauling itself.

Mr. Coleman: I mean it is subject to that. I mean the logs come down under the jurisdiction of the lumber company, but the per diem charge is all charged——

Mr. Seaman: There is no per diem. They have their own cars and equipment.

Commissioner Harlan: They use their own logging cars and locomotives.

Mr. Coleman: When the lumber leaves the mill, it is on a different car?

701 Mr. Seaman: Yes.

Mr. Coleman: Now, then, does your railroad company pay any charges accruing to that car?

Mr. Seaman: Originally as between ourselves and other carriers: yes, sir.

Mr. Coleman: You stated you reserved the right absolutely to control routing.

Mr. Seaman: As shown in the contract.

Mr. Coleman: Supposing I buy a car of lumber from the lumber company and wanted to route it my own way, as consignee, what then?

Mr. Seaman: You could have it.

Mr. Coleman: Then you do not control the routing?

Mr. Seaman: We do if we wish to insist upon it; we control the routing except the destination line, guaranteeing them the same rate, no higher rate, and as prompt delivery. They can take the destination routing.

Mr. Coleman: So, as a matter of fact, all you care for is to have the connecting line, the line that connects with you; you want the right to select that line. You do not care about the last line?

Mr. Seaman: No.

702 Mr. Coleman: You just want the line that pays you the highest division?

Mr. Seaman: Naturally; yes.

Mr. Coleman: That is all.

Commissioner Harlan: Do you charge demurrage on a car set at Chatham for the Haynes Lumber Company?

Mr. Seaman: Yes, sir.

Commissioner Harlan: Do you charge demurrage on a car set at Rochelle for the Tremont Lumber Company?

Mr. Seaman: Yes, sir, if it is subject to demurrage.

Examiner Burchmore: With respect to the lease of the Jonesboro road, a copy of that lease is found in this corporate record of proceedings. It is dated apparently May 1st, 1906 and runs for three years.

Mr. Seaman: There has been a mere formal renewal of that lease, by endorsement on the contract.

Examiner Burchmore: And the further question, the sole consideration for the lease of that line moving from the railroad company to the Tremont Lumber Company is the maintenance and upkeep of the track?

Mr. Seaman: Yes, sir.

Commissioner Harlan: The map to which the witness has
703 referred, entitled map of the Tremont & Gulf Railway Company, may be filed as an exhibit.

(The map so offered and identified was received in evidence and thereupon marked Tremont & Gulf Railway Exhibit No. 2, witness Seaman, received in evidence December 10, 1910, and is attached hereto.)

(Witness excused.)

J. B. FICK was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: Where do you reside?

Mr. Fick: Winnfield.

Commissioner Harlan: You are auditor of the Tremont & Gulf?

Mr. Fick: Yes.

Commissioner Harlan: As such, was this financial exhibit to which Mr. Seaman has referred prepared by you or under your supervision?

Mr. Fick: It was.

Commissioner Harlan: Does it contain an accurate statement of the financial and other affairs of your company, according to the various pages that it contains?

704 Mr. Fick: It does.

Commissioner Harlan: What period of time does it cover?

Mr. Fick: Sixteen months; the fiscal year 1909-1910, and then a period of four months ending October 31, 1910.

Commissioner Harlan: In a general way state what it shows with respect to the net revenues of the company during the last fiscal year.

Mr. Fick: The total operating revenue for the fiscal year ending June 30, 1910 was $249,104.48.

Commissioner Harlan: And operating expenses?

Mr. Fick: The total operating expenses for the same period were $188,479.51.

Commissioner Harlan: Now, if you add taxes and interest to that, what net do you get?

Mr. Fick: We get a net loss of $29,670.55; that is, for the fiscal year.

Commissioner Harlan: What is the largest item in the expense for maintenance of way and structures?

Mr. Fick: Track men.

Commissioner Harlan: The expense for that was some $88,000 for maintenance of way and structures?

Mr. Fick: Yes, sir.

705 Commissioner Harlan: Are the details shown on this report?

Mr. Fick: No, sir; only so far that that is the total of the operation or operating expenses. You see these items here were filed with the Commission.

Commissioner Harlan: I know, but one item of $88,794.27 is assigned to the maintenance of way and structures.

Mr. Fick: Under the classification issued by the Interstate Commerce Commission; yes, sir.

Commissioner Harlan: But what was the largest item in that?

Mr. Fick: Preparing the ballast of the road; that is, fixing up the roadbed.

Commissioner Harlan: Was that done last year?

Mr. Fick: Yes, sir.

Commissioner Harlan: Do you mean ballast as a primary proposition, or maintenance of ballast?

Mr. Fick: No, maintenance of ballasting; it was not an addition and betterment account or construction account. You see, we had considerable flood there, and to repair the track and put it back into a good first class condition it was necessary to perform that work.

Commissioner Harlan: Is not that a very large item on a road only 16 miles long?

706 Mr. Fick: How much?

Commissioner Harlan: Is not that a large item for a road that is only—I was thinking of something else. What does that amount to per mile of road?

Mr. Fick: That includes the side tracks and industrial spurs, making a total of about 80 odd miles, which would be possibly about $1,000 or $1,200.

Mr. Seaman: They had floods there, and all of the roads were washed out, and bridges and miles of track, and they were reballasted, and it put the track in better shape than it was before.

Commissioner Harlan: I observe an item of $102,000 for the previous year, which is some $14,000 more than the year 1910, assigned to maintenance of way and structures.

Mr. Seaman: It must have been practically the same proposition.

Mr. Fick: There are some entries down below there to show.

Mr. Seaman: There were weeks and weeks the roads did not operate down there; we had our road in shape and we detoured the Rock Island and other trains over our line.

Commissioner Harlan: Then the maintenance of equipment last year was $30,000 and the preceding year $53,000?

707 Mr. Fick: Yes, sir.

Commissioner Harlan: What is the explanation?

Mr. Fick: There were heavy repairs to some of those locomotives.

Commissioner Harlan: Does this statement show the original cost of equipment?

Mr. Fick: No, sir; that shows the present valuation, less the depreciation.

Commissioner Harlan: What is the present value of the equipment?

Mr. Fick: About $170,000.

Commissioner Harlan: What percentage do you write off per month on your car equipment?

Mr. Fick: On the freight cars, five per cent.

Commissioner Harlan: Five per cent a month?

Mr. Fick: No, sir; per annum.

Commissioner Harlan: I asked per month.

Mr. Fick: Well, that would be——

Commissioner Harlan: That is all right. What per cent do you write off per annum on your locomotives?

Mr. Fick: Six per cent.

Commissioner Harlan: What amount did you carry to

708 surplus last year? I suppose none, if you had a deficit.

Mr. Fick: None.

Commissioner Harlan: What the year before?

Mr. Fick: None.

Commissioner Harlan: Have you any accumulated surplus?

Mr. Fick: No.

Commissioner Harlan: Mr. Garwood, the Commission will adjourn at this time until two o'clock, and proceed with Mr. Fick afterward.

Whereupon, at 12:55 P. M., a recess was taken until 2:00 P. M.

709 After recess.

2.00 p. m.

Mr. Coleman: The statement made by the witness, which has been submitted to the Commission, showing allowances made to tap lines, shows payments made for the years 1906, 1907, 1908, 1909 and 1910, but it should be explained that all divisions were cancelled in 1908, and the payments made during that year and during the year 1909 and 1910 were settlements for divisions which had accrued prior to the cancellations. No division was in existence after the cancellation in 1908.

Mr. Andrews: May it please the Commission, so far as having my case heard, I am unfortunate because I am a connection of the Frisco Lines, and I understood you were to take up the Iron Mountain after the Rock Island. I wanted to know if you would excuse the lines connecting with the Frisco until Monday morning?

Commissioner Harlan: I think that would be safe; yes.

Mr. Andrews: Thank you.

710 J. B. Fick resumed the stand.

Commissioner Harlan: The question that arose on objection of counsel when Mr. Seaman was on the stand will be reserved for consideration by the Commission. In case the Commission desires to press that inquiry, Mr. Seaman will be expected to take the stand again at Washington, or at some other convenient place.

Mr. Fick, I direct your attention again to the items on this account for maintenance of way and structures amounting to $102,000 in the year 1909 and $88,000 in the year 1910, or a total of $191,000 plus for the two years. For those two years the two items together make a very large proportion of your outstanding capital stock. I would like to ask whether those items are not somewhat excessive, when compared with similar items on regular lines.

Mr. Fick: I believe not. The road being new, requires a greater amount of labor.

Commissioner Harlan: What is an ordinary expenditure per mile?

Mr. Fick: I could not say as to that. I would have to refer to other roads.

711 Commissioner Harlan: What was the total estimated value of the equipment? You gave it before.

Mr. Fick: $170,000.

Commissioner Harlan: And your expenditures during those two years on maintenance of equipment aggregated $83,000?

Mr. Fick: Yes, sir.

Commissioner Harlan: Or 50 per cent. Is that a usual percentage, 25 per cent a year for the maintenance of equipment?

Mr. Fick: Well, I could not say as to that. There were heavy repairs on some of the locomotives, and then that includes, you know, all the repairs to the box cars and flat cars and passenger equipment, and so forth.

Commissioner Harlan: Who does the repairs for your cars.

Mr. Fick: Wherever they are. You see the foreign roads bill on us for the amount. Under the Master Car Builders Association, they bill on us for owner's defects, and we have to pay those.

Commissioner Harlan: You made practically no repairs yourself or under contract?

Mr. Fick: Not under contract; no, sir.

Commissioner Harlan: Yourself; have you shops?

712 Mr. Fick: We had the shops at Eros.

Commissioner Harlan: Are the details of your shop accounts here?

Mr. Fick. No, sir.

Commissioner Harlan: Judge Cowan, have you any questions of this witness?

Mr. Cowan: Just a question or two on the lines your Honor was just asking about. Under the Master Car Builders' rules, what repairs do the other lines charge you with?

Mr. Fick: Owner's defects.

Mr. Cowan: Do you have your engines rebuilt in any machine shops anywhere?

Mr. Fick: Not rebuilt.

Mr. Cowan: Didn't you have contract work done on the engines, or have it done otherwise in anybody else's shops than your own?

Mr. Fick: Not any contract work to my knowledge.

Mr. Cowan: Were these second hand engines when you got them?

Mr. Fick: I could not say.

Mr. Cowan: Well, do you know of any extraordinary repairs made on them?

713 Mr. Fick: They were running repairs, and heavy repairs made on account of the road being new, and naturally it is harder on a locomotive on a new track than on an old, solid roadbed.

Mr. Cowan: Do your annual reports show your locomotive mileage?

Mr. Fick: Yes, sir.

Mr. Cowan: In regard to the question of repairs on your cars, what did that consist of, equipment with air brakes and the like?

Mr. Fick: Yes, sir; whatever the owner's defects may be, there are certain things that the connecting line or the carrier pays.

Mr. Cowan: You know whether or not, probably, if you had your cars equipped with air brakes in the last two years.

Mr. Fick: No, sir, they were equipped with air brakes when purchased.

Mr. Cowan: Have you any explanation you can offer why it cost such a large percentage of the value of your equipment to repair it annually?

Mr. Fick: No.

Mr. Cowan: Where does the lumber company repair its
714 engines and cars?

Mr. Fick: I could not say.

Mr. Cowan: Do they do it on your line?

Mr. Fick: I don't know.

Mr. Cowan: Do you know whether the cost of repairs of the locomotives and the cars which are embraced in your accounts that have been spoken of—do you know whether it is the aggregate of the operation of your shops; is that the way it is figured? Do you take the aggregate of the operation of your shops and divide that aggregate cost by the cars where the work was on cars, and by locomotives where it was on locomotives?

Mr. Fick: There is a percentage of labor and so forth added to the cost.

Mr. Cowan: Does your road make any repairs for the lumber company's engines and cars?

Mr. Fick: Not that I know of.

Mr. Cowan: Do you know whether they do or not?

Mr. Fick: I do not believe they do. I do not know.

Mr. Cowan: Do you make any repairs for owners' defects and charge that back to the lumber company on the trains which are run on your tracks?

715 Mr. Fick: No, sir.

Mr. Cowan: In regard to the maintenance of way and structures, you seem to have $1,000 per mile of line charged up. Did that include ballast where you had none before?

Mr. Fick: No.

Mr. Cowan: Did it include the widenings of the embankment?

Mr. Fick: Only so much as under the classification of the Interstate Commerce Commission was supposed to be charged to operation.

Mr. Cowan: Did it include the reconstruction or building of new depots?

Mr. Fick: No, sir; only so far as repairs.

Mr. Cowan: Did it include the purchase of new rails and ties?

Mr. Fick: No, sir.

Mr. Cowan: The building of new bridges?

Mr. Fick: Not of new bridges; no, sir.

Mr. Cowan: The rebuilding of old ones?

Mr. Fick: Only so far as they are under the classification.

Mr. Cowan: Do you keep the account of the divisions of rates between your company and your connecting line?

Mr. Fick: I keep an account of the amounts collected.

716 Mr. Cowan: Can you make a statement showing the amounts you have collected on lumber received from the Tremont Lumber Company?

Mr. Fick: I could.

Mr. Cowan: And that received from lumber which you get from other than the Tremont Lumber Company?

Mr. Fick: I could.

Mr. Cowan: Do you know what the rate or division is?

Mr. Fick: No, sir.

Mr. Cowan: Who does?

Mr. Fick: The traffic manager.

Mr. Cowan: But you make the settlements, do you not?

Mr. Fick: I make the interline settlements and traffic balances; yes, sir.

Mr. Cowan: Well, you have to have the amount of the division in order to know whether the amount is correct when you make the settlements, of course.

Mr. Fick: Yes, sir.

Mr. Cowan: Is it not a fact that the division sheets do not furnish the basis of settlement in many instances, but it is subject to the settlements to points to which the division sheets do not apply?

717 Mr. Fick: I did not get that.

(Question read.)

Mr. Fick: No, sir.

Mr. Cowan: All your divisions are from your division sheets?

Mr. Fick: Yes, sir.

Mr. Cowan: In some division sheets there are provisions for traffic other than that named in the division sheets, where the respective traffic officials agree on the amount of division, and you bill it out with some sort of a billing slip which shows that the division is different to what the division sheets would make it; and I wondered if that was the case with respect to your line and any of your connecting lines.

Mr. Fick: Our divisions are furnished by our traffic manager to us; the settlements with connecting lines are made on that basis.

Mr. Cowan: Is that a percentage or an arbitrary amount, do you happen to recall?

Mr. Fick: Well, that differs. I could not give you a definite answer.

Mr. Cowan: But that would be shown on your division sheets?

718 Mr. Fick: The percentage would be shown on the division sheets.

Mr. Cowan: Have you filed the division sheets or have you them?

Mr. Fick: That is with the traffic man.

Mr. Cowan: Have these divisions varied for the past two years since you have been with the company?

Mr. Fick: I could not say as to that. I have not watched them.

Mr. Cowan: Now, as to the financial relations of the railroad company and the Southern Development Company, that involves remittances by your company to the Southern Development Company?

Mr. Fick: No.

Mr. Cowan: To whom do you pay the interest on the bonds?

Mr. Fick: To the Southern Investment Company.

Mr. Cowan: Well, I got the word wrong. Are the earnings of your road from time to time kept in an account or bank for your own company, or is it turned over to the Southern Development Company?

Mr. Fick: Kept in our own name in various banks.

Mr. Cowan: Do you have any financial relations to the
719 Tremont Lumber Company?

Mr. Fick: None, except as a common carrier.

Mr. Cowan: Do you make the settlements in regard to the rates of freight and so on with the Tremont Lumber Company? Do you have any settlements to make with them on that subject?

Mr. Fick: No, sir. Where local merchandise is carried, our agents collect the amount, the same as from any other shipper.

Mr. Cowan: That is all.

Mr. Coleman: What interest do those bonds bear?

Mr. Fick: Five per cent.

Mr. Coleman: How long a term?

Mr. Fick: Forty years.

Mr. Cowan: And the bonds are owned by the Investment Company?

Mr. Fick: I could not say. They are held in trust by the Illinois Trust Company. That is in evidence.

Mr. Cowan: I understood you to say you remitted the interest to the Investment Company.

Mr. Fick: Yes, sir.

Mr. Cowan: That would indicate——

Mr. Garwood: What that indicates is a matter that the
720 record will show.

Commissioner Harlan: This witness says he does not know who owns them.

Mr. Cowan: After showing earnings of $249,000 and operating expenses of $188,000, in arriving at the deficit, of course you deducted the bond interest?

Mr. Fick: For the net corporate account, yes, sir.

Mr. Garwood: It was stated this morning that the company belonged to the American Railway Association. Are there requirements as to the general character that a railway must attain before it can be admitted to such an association?

Mr. Fick: I believe there are; yes, sir.

Mr. Garwood: As to its grade as a railroad?

Mr. Fick: Yes, sir.

Mr. Garwood: I assume that the Commission understands those requirements.

Commissioner Harlan: Yes, sir.

Mr. Garwood: What other railway associations do you belong to?

Mr. Fick: We are members of the Southern Demurrage & Storage Bureau, and then of course, as officers, we are members of
721 the American Railway Accounting Officers Association, and the Car Transportation Association.

Mr. Garwood: As anditor, you keep your accounts in accordance with the rules of the Interstate Commerce Commission?

Mr. Fick: Yes, sir.

Mr. Garwood: You make your reports to the Commission in the legal form?

Mr. Fick: Yes, sir.

Mr. Garwood: And also report to the Louisiana Commission?

Mr. Fick: Yes, sir.

Mr. Garwood: What is your monthly pay roll, in round numbers?

Mr. Fick: Between $700- and $8,000.

Mr. Garwood: Have you an officer in charge of the general operation of your road, a general superintendent or general manager?

Mr. Fick: Yes, sir.

Mr. Garwood: What other officers of a general character have you?

Mr. Fick: We have a treasurer and traffic manager and general superintendent and vice-president and secretary.

Mr. Garwood: Are you fully equipped with all of the of-
722 ficers requisite and necessary to properly conduct an active railway?

Mr. Fick: Yes, sir.

Mr. Garwood: How many agency stations have you on your line?

Mr. Fick: Nine.

Mr. Garwood: How many non-agency stations?

Mr. Fick: Fifteen.

Mr. Garwood: Turn to the page of your statement, the second page, I believe, and give me the cost of the buildings of those several agencies, stating as you call each one, whether it is an agency or non-agency station.

Mr. Fick: At Cartwright we have a pagoda, the book value is $200. At Eros we have a depot, $2,500. I wish to state that Cartwright is a non-agency point and Eros is an agency point. At Chatham we have a depot, $800, an agency point. At Womack and Lyons——

Commissioner Harlan: If you will just indicate the agencies——

Mr. Fick: On the third page it will show the agency and non-agency points, and the distance from Tremont, Pyburn and Jonesboro, and also whether or not it is a telephone station.

723 Commissioner Harlan: It seems to be a very complete statement of all the details.

Mr. Garwood: Now, at each of those agency stations you maintain an agent who performs all of the ordinary duties of a railway station agent?

Mr. Fick: Yes, sir.

Mr. Garwood: He issues bills of lading, both intrastate and interstate on the usual forms?

Mr. Fick: Yes, sir.

Mr. Garwood: How many section houses have you on your line?

Mr. Fick: Thirty.

Mr. Garwood: What is their character as to permanency and their general nature?

Mr. Fick: Well, they are an ordinary house; they are not what they term a box house, but are good permanent buildings, one for the section foreman, and the other is for the others.

Mr. Garwood: Can you recall how many section men your company employs?

Mr. Fick: On an average, I believe about 112.

Mr. Garwood: Do you know how many train operatives
724 you have?

Mr. Fick: Around 18 or 20; that is, train crews, you are speaking of?

Mr. Garwood: Train crews; yes.

Mr. Fick: Yes, sir.

Mr. Garwood: Does that include engineers and conductors, freight and passenger?

Mr. Fick: Yes, sir.

Mr. Garwood: You do an active passenger business, do you?

Mr. Fick: Yes, sir.

Mr. Garwood: What was your passenger business for the year ending June 30, 1909?

Mr. Fick: For passenger service proper——

Mr. Garwood: I mean exclusive, now, if you can so give it, for your earnings from mail and express.

Mr. Fick: $15,383.34.

Mr. Garwood: And for the year ending June 30, 1910?

Mr. Fick: $17,259.86.

Mr. Garwood: You have made a statement showing the passenger receipts by month for the last 16 months, by stations——

Commissioner Harlan: Mr. Garwood, I think it will not be
725 necessary to go over this. It will all be available to you in the argument.

Mr. Garwood: I merely did it in accordance with the suggestion of counsel the other day that he wished to get a running idea of the extent of the operations. Of course it is all there for the Commission to read.

Commissioner Harlan: This is so full that I think it is not necessary to go over the details, unless you have some special thing you desire to bring out.

Mr. Garwood: Just one or two other questions. Do you do a general passenger business, not confined to the passage of mill employees and business of that character; in other words, do you do a large general public business as a carrier of passengers.

Mr. Fick: We do.

Commissioner Harlan: Do the employees of any one go over this road without tickets?

Mr. Fick: No, sir.

Commissioner Harlan: Mr. Seaman said not.

Mr. Garwood: No, indeed.

Commissioner Harlan: What was your point?

Mr. Garwood: They have undertaken to show that most of
726 the business of some of the lines—that is, their interrogatories would indicate that the passenger business resulted largely from the patronage of mill employees, and things of that sort.

Commissioner Harlan: If so, it is on tickets.

Mr. Garwood: Oh, yes, absolutely it is on tickets, but I want to show this is a general commercial passenger business pertaining to the public at large, and is not confined to any particular class of people.

Commissioner Harlan: The witness has so indicated that.

Mr. Seaman: No one connected with the lumber company in any capacity has transportation over this road.

Mr. Garwood: The Tremont Lumber Company pays demurrage on cars, just as any other concern that does business with you?

Mr. Fick: Yes.

Mr. Garwood: You pay per diem to your connections?

Commissioner Harlan: That was all stated by Mr. Seaman.

Mr. Garwood: I do not want any mistakes about these propositions.

Commissioner Harlan: That is clearly understood.

Mr. Garwood: Have you made in this statement an analysis of your business, interstate and intrastate, at each station? I
727 am not going into that, but just want to indicate it.

Mr. Fick: I have; yes, sir.

Mr. Garwood: Have you also made a showing as to the character of the business, whether lumber or general merchandise?

Mr. Fick: I have.

Mr. Garwood: Have you made a statement showing the extent of business which your road receives from the Tremont Lumber Company.

Mr. Fick: I have.

Mr. Garwood: That all appears in the statement?

Mr. Fick: It does.

Mr. Garwood: You have figured this out, showing the relative proportions of the various classes of business?

Mr. Fick: I have shown the percentage on each sheet for each station.

Mr. Garwood: As inquired about?

Mr. Fick: Yes, sir.

Mr. Garwood: Are there stations upon your line where there are no mills of the Tremont Lumber Company, where you do a large business?

Mr. Fick: Yes, sir.

Mr. Garwood: Just by way of illustration, select one or
728 two of those and call them to the attention of the Commission.

Mr. Fick: For instance, at Winnfield, the largest station on our line, the Tremont Lumber Company's per cent is 9.1; outside business of other parties is 90.9 per cent.

Mr. Garwood: What is your total business at Winnfield?

Mr. Fick: The total is $41,804.38.

Mr. Garwood: Now, select some station——

Mr. Fick: Here is Sikes, a smaller station, with a business amounting to $10,037, which is 100 per cent for others.

Mr. Garwood: Where the Tremont Lumber Company had no business whatever?

Mr. Fick: No. At Womack the business amounting to $8,538.39 is 100 per cent for others, and the Tremont Lumber Company no business. At Gaars Mill, business amounting to $5,278.01, 100 per cent for others, and the lumber company no business. Those are practically some of the larger points. And then the smaller points——

Mr. Garwood: How about Chatham?

Mr. Fick: That is $18,237. Others, 96.9 per cent, and the Tremont Lumber Company 3.1 per cent.

Mr. Garwood: In other words, there are numerous stations upon your line where the lumber company has no interest of
729 any kind, where you do a very large business of a general commercial character?

Mr. Fick: Yes, sir.

Mr. Garwood: Have you caused to be made up a list of industries on your line which are entirely independent of and have no connection with the Tremont Lumber Company?

Mr. Fick: Yes, sir.

Mr. Garwood: If so, I will ask you if that is the statement (handing paper).

Mr. Fick: Yes, sir; it is made up in conjunction with our traffic manager.

Mr. Garwood: We offer that in evidence.

(The statement so offered and identified was received in evidence and thereupon marked Tremont & Gulf Exhibit No. 3, witness Fick, received in evidence December 10, 1910, and is attached hereto.)

Mr. Fick: That goes in connection with the map.

Mr. Garwood: I might ask you the general question if this statement which you have prepared, was prepared under your immediate direction, and if it is correct.

Commissioner Harlan: He has already stated that in response to my inquiry.

730 Mr. Garwood: Is Winnfield the county seat of the Parish?

Mr. Fick: It is.

Mr. Garwood: Where is the county seat of Jackson Parish?

Mr. Fick: It is unlocated at the present, but an effort was made to have it removed to Chatham. It was at Vernon.

Mr. Garwood: What do you mean by it being unlocated? It is not in suspense, they have a county seat somewhere.

Mr. Fick: It was voted to remove it from Vernon.

Mr. Garwood: Well, it is at Vernon now?

Mr. Fick: Yes, sir.

Mr. Garwood: Where is Vernon, relative to any line?

Mr. Fick: Vernon lies possibly in the northwest square, between Chatham and Jonesboro; that is up here, possibly in the center of it.

Mr. Garwood: Not on a railroad?

Mr. Fick: No; that is not on a railroad.

Mr. Garwood: The citizens utilize your road to reach that point?

Mr. Fick: Yes, sir.

Mr. Garwood: And it is now contemplated that it will be removed to Chatham, situated on your line?

Mr. Fick: Yes, sir.

731 Mr. Garwood: So you will have two county seats on your line if it is moved to Chatham?

Mr. Fick: Yes, sir.

(Witness excused.)

J. H. GEAGAN was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: What is your business?

Mr. Geagan: General freight agent of the Tremont & Gulf Railway Company.

Commissioner Harlan: How long have you occupied that relation to that company?

Mr. Geagan: Since the 1st of January, 1910.

Commissioner Harlan: Had you any relation with it prior to that time?

Mr. Geagan: Yes, sir.

Commissioner Harlan: What?

Mr. Geagan: Chief clerk to the general freight agent.

Commissioner Harlan: How long have you been with the road?

Mr. Geagan: Since March 5, 1909.

Commissioner Harlan: You may proceed, Mr. Garwood.

Mr. Garwood: I wish you would state what divisions you
732 get with your various trunk line connections. I will first take on lumber, the Vicksburg, Shreveport & Pacific, with which you connect at Tremont.

Mr. Geagan: The divisions range from 2.4 cents to six cents per 100 pounds.

Commissioner Harlan: On what shipments do you get six cents per 100 pounds?

Mr. Geagan: That would be very hard to say; it is according to the territory to which it moves.

Commissioner Harlan: Just what is a typical point?

Mr. Geagan: Well, Chicago, Illinois, for instance.

Mr. Garwood: What divisions do you get with the Rock Island?

Mr. Geagan: From three to six cents.

Mr. Garwood: Indicate in the same manner as you did in response to Commissioner Harlan's question, in a general way to what territory your six cent division would apply.

Mr. Geagan: To various points on the Rock Island. Well, take Western Trunk Line territory.

Mr. Garwood: What divisions do you get with the Iron Mountain?

Mr. Geagan: From three to six cents.

733 Mr. Garwood: Where does the six cent division apply?

Mr. Geagan: Well, Western Trunk Line territory; Central Freight Association territory chiefly.

Mr. Garwood: You connect at Winnfield, Louisiana, also with the Louisiana & Arkansas?

Mr. Geagan: We do; yes, sir.

Mr. Garwood: What road is that; is that what is known as the Buchanan road?

Mr. Geagan: It is known locally, or generally, you might say.

Mr. Garwood: It is known locally as the Buchanan road?

Mr. Geagan: Yes.

Mr. Garwood: Buchanan is a lumber man?

Mr. Geagan: Yes, sir.

Mr. Garwood: He is the practical owner of that road, and is so considered generally, is he not?

Mr. Geagan: That is the understanding.

Mr. Garwood: What is the length of that road, about?

Mr. Geagan: Approximately 200 miles.

Mr. Garwood: Is it not longer than 200 miles? Is it not very nearly 300 miles?

Mr. Geagan: Well, I could not say offhand, but it is
734 between 200 and 300, I suppose; possibly over 200, or at least 300.

Commissioner Harlan: Well, you state the fact to be that it is nearly 300 miles?

Mr. Garwood: It is my understanding it is about 275 miles.

Mr. Seaman: 276 miles.

Mr. Garwood: Have you divisions with that road, and if so, what are they?

Mr. Geagan: They are practically the same as with the Iron Mountain.

Mr. Garwood: Do you know the average haul on your line of your lumber?

Mr. Geagan: For the past six months it is 21.65 miles.

Commissioner Harlan: That is, the manufactured lumber?

Mr. Geagan: That is the manufactured lumber; yes, sir.

Mr. Garwood: Have you any milling in transit rates of which the Tremont Lumber Company takes advantage?

Mr. Geagan: We have milling in transit rates, but the Tremont Lumber Company does not take advantage of them.

Commissioner Harlan: That average haul of 21.65 miles seems to be of lumber manufactured by other than the Tremont Lumber Company.

735 Mr. Geagan: That is the lumber manufactured by everyone.

Commissioner Harlan: It is not so stated here.

Mr. Garwood: Mr. Fick says that that was the oversight of the stenographer.

Mr. Fick: It was the general haul.

Mr. Garwood: You had better correct that.

Commissioner Harlan: It is an oversight right at the top of the page. Now, what do you understand this table to be, Mr. Fick?

Mr. Fick: The figures shown there are as to the number of cars hauled for 16 months for others than the Tremont Lumber Company.

Commissioner Harlan: That is what it says.

Mr. Fick: Yes, and then the stenographer should have shown average haul for all lumber cars, including the Tremont Lumber Company.

Commissioner Harlan: 21.65 miles?

Mr. Fick: 21.65; yes, sir. I did not notice it until this afternoon.

Mr. Seaman: That you make a general statement, then, and not attached to this specific tabulation?

Mr. Fick: Yes, sir.

736 Mr. Cowan: Before you leave that point, as you were asking the other witness about it, I think some inquiry ought to be made in regard to whether that just applies to lumber that has a real movement, or whether it applies to all cars that are loaded at the mills which are situated on some other line where the company only performs a switching service.

Mr. Fick: That is the rail movement over the line.

Mr. Cowan: But it does not apply to or include that lumber for which you performed a switching service?

Mr. Fick: No, sir.

Mr. Cowan: And for which you get the same division as if it was a rail movement.

Mr. Fick: No.

Mr. Cowan: You do get the same division for that switching service as for the division, for instance, the mill at Rochelle?

Mr. Garwood: That is a question.

Mr. Cowan: You are getting the average length of haul of all lumber products. I do not see how it can include the cars as to which there is only a switching movement, because the length of the road would not indicate there could be any such average number, if those were included.

737 Commissioner Harlan: There is another table, which shows that the lumber tonnage—I think there is a table that shows that of the total tonnage, 75 per cent is moved for the Tremont Lumber Company.

Mr. Fick: Yes, sir.

Commissioner Harlan: Now, what is the average haul of manufactured lumber of that company?

Mr. Fick: Of the Tremont Lumber Company?

Commissioner Harlan: Yes.

Mr. Fick: I could not say right off hand. I believe Mr. Geagan can tell.

Commissioner Harlan: Have you that, Mr. Geagan?

Mr. Geagan: I could not state for this, off hand. This 21.65

includes the Tremont Company's lumber, the lumber shipped by them.

Mr. Garwood: What other lumber companies independent of the Tremont Company are situated on your lines, and in a general way state their capacity?

Commissioner Harlan: We have that list.

Mr. Garwood: There are a number of them, are there not?

Mr. Geagan: There are.

Mr. Garwood: You were about to say that you had *in*
738 some milling in transit rates, and that the Tremont Lumber Company does not use those rates. I would be glad for you to state what they are.

Mr. Geagan: It is covered by a tariff which provides shipments of lumber to a given point on the road, that they can be billed into a certain point and milled or stored in transit, and then on proof of shipment of a certain percentage of lumber outbound from that same party, and he surrenders the inbound expense bill, there is a reduction made in the rate to what we call the milling in transit rate.

Mr. Garwood: That applies to staves, for instance, and things of that character?

Mr. Geagan: It does.

Mr. Garwood: In such case, you haul out the finished product?

Mr. Geagan: We do.

Mr. Garwood: Where, at what point on your lines are those rates availed of?

Mr. Geagan: Chiefly at Winnfield, by the Winn Lumber Company, and at Jonesboro, Louisiana.

Mr. Garwood: What is the Winn Lumber Company?

Mr. Geagan: It is a planing mill located at Winnfield.
739 Commissioner Harlan: Well, that movement is very inconsiderable, is it not?

Mr. Geagan: No, sir; there is considerable movement for the Winn Lumber Company at Winnfield.

Commissioner Harlan: I do not mean that particular company, but taking all the movement at the milling in transit, it is small, compared to the entire movement?

Mr. Geagan: Compared to the entire movement, it is small.

Mr. Garwood: How, in a general way, do the divisions which you receive from your connecting carriers, compare with the local rates under the Louisiana Commission rates, or whatever you operate under here.

Mr. Geagan: Well, generally speaking, our division of the through rate is lower.

Mr. Garwood: Lower than the local rate?

Mr. Geagan: Yes, sir.

Mr. Garwood: I notice you have an independent company, that Mr. J. H. Frazier at Cartwright. They have a lumber mill there, have they?

Mr. Geagan: They have.

Mr. Garwood: What would be the effect on that business if

through billing were not permitted, and through rates did
740 not apply?

Mr. Geagan: Well, Mr. Frazier, the shipper, would have to pay from six to eight cents additional from the mill located on our line than he would from a mill located on the trunk line.

Mr. Garwood: Would that operate injuriously upon the shipper who was thus compelled to ship on the local rate to the point of junction?

Mr. Geagan: I suppose it would; yes, sir.

Mr. Garwood: I will ask you if there is any agricultural development in the section of the country served by your road.

Mr. Geagan: Yes, sir, there is considerable development right now especially—well, take the entire line, but especially around Eros, Chatham and Sikes.

Mr. Garwood: I have been reading in the paper since I have been in New Orleans a good deal about peanuts in Louisiana. Is there any development along that line in that section?

Mr. Geagan: Yes, sir; considerable.

Mr. Garwood: Are there any cattle raised and shipped from that section up there?

741 Mr. Geagan: Quite a number of cattle raised, and some shipped.

Mr. Garwood: Now, as to the general commercial business that you do; is that extensive?

Mr. Geagan: Yes, we consider it extensive, especially at Winnfield.

Mr. Garwood: Winnfield is a town of about 4,000 people, is it not?

Mr. Geagan: Yes, sir, about that.

Mr. Garwood: How many banks have they there?

Mr. Geagan: Two.

Mr. Garwood: What other large commercial enterprises have they there?

Mr. Geagan: They have the Louisiana Creosoting Company, handling creosoted timber and lumber; the Winn Lumber Company, Dalton Clark Stave Company, manufacturing, and the usual number of stores for a town of that size, and business houses, hardwood, furniture, and so forth.

Mr. Garwood: The Hard Wood Lumber Company.

Mr. Geagan: The Mansfield Hard Wood Lumber Company.

Mr. Garwood: Do you do a fair share of the commercial business at Winnfield?

742 Mr. Geagan: Yes, sir; we do.

Mr. Garwood: Are you an active competitor at Winnfield with the other roads entering there for all commercial business?

Mr. Geagan: We are; yes, sir.

Mr. Garwood: Do you bring in and take out interstate commercial business; I mean as contradistinguished from lumber business?

Mr. Geagan: Yes, sir.

Mr. Garwood: To and from Winnfield?

Mr. Geagan: We do; yes, sir.

Mr. Garwood: Is your general commercial business increasing or decreasing?

Mr. Geagan: It is increasing.

Mr. Garwood: How with regard to your passenger business?

Mr. Geagan: Well, we do a general passenger business, and that is increasing.

Mr. Garwood: You run your passenger trains on a regular schedule?

Mr. Geagan: Yes, sir.

Commissioner Harlan: That already appears. It was testified to by Mr. Seaman.

Mr. Garwood: I want to get now the character of the
743 trains he runs. That was merely preliminary.

Commissioner Harlan: All right, go ahead.

Mr. Garwood: What service do you render?

Mr. Geagan: From Tremont to Winnfield we run two straight passenger trains and have a mixed train from Tremont to Winnfield daily.

Mr. Garwood: By a passenger train, you mean by that a train devoted exclusively to the passenger service?

Mr. Geagan: Passenger service, baggage, mail and express.

Mr. Garwood: How many cars in that train?

Mr. Geagan: Two.

Mr. Garwood: The baggage, mail and express car, and then your passenger car?

Mr. Geagan: Yes, sir.

Mr. Garwood: Are those cars neat, clean and comfortable cars?

Mr. Geagan: They are comfortable cars; yes, sir.

Mr. Garwood: Did you get your division sheets with the various lines?

Mr. Geagan: No, I have not the division sheets here.

Mr. Garwood: Can you, and will you furnish them to the Commission if they desire them?

744 Mr. Geagan: Yes, sir.

Commissioner Harlan: We would like those.

Mr. Cowan: I suppose they are to be furnished by all the trunk lines and tap lines.

Commissioner Harlan: Most of them are in, but if they are not, the Commission will call for them.

Mr. Garwood: I did not know whether he had them. I would as soon the Commission had them.

Mr. Coleman: In furnishing those statements, we think it should appear when the division of six cents was first allowed, with reference to the efforts of the Rock Island on its connection with the company, our position being that the original allowance of the Iron Mountain and other roads was four cents, until they made a connection with the Rock Island, when the Rock Island made an allowance of six cents, and forced all others to do so.

Mr. Garwood: I would like to ask for my own enlightenment. You say "our position." Whom do you represent?

Mr. Coleman: The Atchison, Topeka & Santa Fe Railway Company.

Commissioner Harlan: Will you show that information?

745 Mr. Geagan: Yes, sir.

Commissioner Harlan: On a separate statement connected with your division sheet. The Commission would like to have that also.

Mr. Geaghan: Yes, sir.

Examiner Burchmore: Are you an officer or employee of any other railroad company?

Mr. Geagan: I am not.

Examiner Burchmore: Referring to your I. C. C. No. 52, terminal charges tariff, item No. 11, I just want to ask the meaning or application of that rule.

Mr. Geagan: Well, on a shipment where we have no through rates between certain points, there is a drayage charge. Well, for instance, a shipment originating at a point on the Tremont & Gulf, going to a point on the Rock Island, where there are no through rates in effect, there is a drayage charge between the two stations of the Tremont & Gulf and the Rock Island.

Examiner Burchmore: For example, a through shipment from Eros to St. Louis; if you had no joint through rate you would charge your local to Winnfield, plus the drayage, plus the local charge out of Winnfield?

746 Mr. Geagan: Yes, sir.

Examiner Burchmore: I think that rule No. 11 is irregular under the tariff regulations of the Commission, in that it provides that the drayage charge to be added will be based on the lowest figure that the company is able to arrange with dray lines. I think that is irregular.

Commissioner Harlan: You apply that on through billing?

Mr. Geagan: Well, yes, on shipments covered by the through bills of lading.

Examiner Burchmore: What is the greatest division you have ever received on lumber?

Mr. Geagan: Six cents.

Examiner Burchmore: Are you sure about that?

Mr. Geagan: To the best of my knowledge.

Examiner Burchmore: The Commission's information is, from an examination of your company, that you formerly received, and whether you do now or not I do not know, an allowance of 6 and 7 cents on some lumber, destination unknown.

Mr. Geagan: They did not to my knowledge.

Examiner Burchmore: Can you inquire and inform the Commission?

747 Mr. Geagan: I will, but I think if we had received it since my connection with the company I would have known it.

Mr. Seaman: May I ask what time that information relates to?

Examiner Burchmore: The report was furnished December 11,

1909, and the information was furnished by Mr. Fick. Was there such a division at one time, Mr. Fick?

Mr. Fick: I received that division from Mr. Mead, who was at that time traffic manager.

Commissioner Harlan: You say you got the division from Mr. Mead?

Mr. Fick: He was traffic manager at that time, and I got the figures from him.

Examiner Burchmore: Reference has been made to a quarry located a short distance from Winnfield, from which a track connects with your line at Winnfield.

Mr. Geagan: It connects with the track of the Louisiana Railway & Navigation Company.

Examiner Burchmore: Who owns that quarry?

Mr. Geagan: I understand it is owned by some New Orleans capitalists. I. L. Lyon is one.

Examiner Burchmore: Do you participate on through rates on stone that comes from that quarry?

748 Mr. Geagan: We do to Winnfield.

Commissioner Harlan: Well, to what common, ordinary destination?

Mr. Geagan: Vicksburg.

Commissioner Harlan: You carry it through Rochelle?

Mr. Geagan: Through Tremont.

Examiner Burchmore: What is your division under that rate?

Mr. Geagan: Do you want that in round figures, per car or per 100 pounds?

Examiner Burchmore: Per 100 pounds.

Mr. Geagan: Two cents per 100 pounds.

Examiner Burchmore: Is there any relation between that quarry and the lumber company or railroad company?

Mr. Geagan: There is none between the railroad company and the quarry.

Commissioner Harlan: What about the lumber company?

Mr. Geagan: Not that I know of.

Commissioner Harlan: Did you ever hear that there was any?

Mr. Geagan: No.

Mr. Seaman: There is not.

Examiner Burchmore: Does that private line connecting

749 the quarry with your rails at Winnfield, receive any part of that rate?

Mr. Geagan: Not of our rate.

Examiner Burchmore: Or of any rate, so far as you know?

Mr. Geagan: No.

Examiner Burchmore: Where is the bill of lading, issued on lumber transported for the Tremont Lumber Company?

Mr. Geagan: At the station where it is loaded; for instance, at Eros.

Examiner Burchmore: At the mill point?

Mr. Geagan: At the mill point.

Examiner Burchmore: No logs ever moved under billing on your road for the Tremont Lumber Company?

Mr. Geagan: No.

Examiner Burchmore: You referred to the milling in transit privilege, which is availed of by other shippers over your road on lumber. How long does the tariff permit storage in transit of that lumber?

Mr. Cowan: Give the tariff reference.

Mr. Geagan: The tariff does not specify; there is no limit placed on the time of reshipment.

Examiner Burchmore: What tariff controls the practice?

750 Mr. Geagan: Tariff 3-B, I. C. C. No. 58.

Examiner Burchmore: Does the Tremont & Gulf Railway Company perform any interwork switching for the Tremont Lumber Company?

Mr. Geagan: No, sir.

Commissioner Harlan: I would like to know where the great volume of manufactured lumber originating on your line goes to under your billing.

Mr. Geagan: Well, it is about evenly divided, to Central Freight Association, Western Trunk Line territory, and a certain portion of it to Eastern Trunk Line territory.

Commissioner Harlan: Can you say whether it is equally divided, so far as the six cent division is concerned, and the lower division?

Mr. Geagan: I think it is.

Commissioner Harlan: Does not the great volume of it take six cents?

Mr. Geagan: Yes, sir; it does.

Examiner Burchmore: The mill of the Tremont Lumber Company at Rochelle is located about 1,000 feet from the tracks of the Iron Mountain, I believe?

Mr. Geagan: About that.

751 Examiner Burchmore: A shipment of lumber moving out of Rochelle, under a bill of lading issued by your company to an interstate destination, does your company issue any way bill for that movement?

Mr. Geagan: Our agent makes the way bills.

Mr. Cowan: Where does the way bill show that the shipment originates in such a case?

Mr. Geagan: It originates—which mill?

Mr. Cowan: In such a case as Rochelle, I said.

Mr. Geagan: Denkman.

Mr. Cowan: How far is that from Rochelle?

Mr. Geagan: That station is about a mile.

Mr. Cowan: And on that lumber you get a six cent division?

Mr. Geagan: On some of it.

Mr. Cowan: Let us see if we cannot get at what it is you get the smaller division on, a little more definitely. You ship lumber destined for Texas points?

Mr. Geagan: Yes, sir; some goes to Texas.

Mr. Cowan: And you get six cents on that?

Mr. Geagan: Some of it.

Mr. Cowan: What of it do you not get six cents on?

Mr. Geagan: I do not know that I could say off hand.

752 Mr. Cowan: Is it not a fact that there is very little you do not get six cents on?

Mr. Geagan: No, there is considerable lumber that we do not get six cents on.

Mr. Cowan: What obstacle is there to your shipping all your lumber via the road that pays you six cents, as you have the right to route it?

Mr. Geagan: Sometimes the question of car supply, and different things, and sometimes the routing requested by the shipper or consignee.

Mr. Cowan: Can you make a statement of how much of your lumber tonnage you get the six cent division on, and how much you get the lower division on?

Mr. Geagan: Can I prepare a statement of that kind?

Mr. Cowan: Yes.

Mr. Geagan: It could be done, with a great deal of work.

Mr. Cowan: Well, you have said so far that on some of it you get six cents, and on some of it you get a smaller division, two and a half cents, or something, without giving us any idea, as I understand it——

Commissioner Harlan: He said by far the larger part of his lumber goes to points under the six cent division to his road.

753 Mr. Cowan: He gets the six cent division?

Commissioner Harlan: Yes.

Mr. Cowan: On the larger part of it?

Commissioner Harlan: On the larger part of it.

Mr. Cowan: The witness talked very low, and I had not understood it. I believe you said to Western Trunk Line territory you got six cents?

Mr. Geagan: Yes.

Mr. Cowan: And it does not matter whether it moves via the Rock Island or the Iron Mountain, as to your division?

Mr. Geagan: It makes no difference.

Mr. Cowan: To Texas points you say you get six cents on some, and less on some. Under what divisions would you get less on any movement to Texas points?

Mr. Geagan: Well, it depends on the routing it moves, and the destination. Some points of destination we get less than six cents.

Mr. Cowan: Where; to what points?

Mr. Geagan: Well, take the western part of Texas.

Mr. Cowan: Points on what railroad?

Mr. Geagan: I do not know that I can say offhand. It would be shown in the division sheets that go to the Commission.

754 Mr. Cowan: To points on the Gould lines and on the lines of the Rock Island, Colorado & Southern, you get six cents, do you not?

Mr. Geagan: To Texas points?

Mr. Cowan: Yes.

Mr. Geagan: We do not. What do you mean by the Gould lines, the Texas & Pacific?

Mr. Cowan: Those which we all know to be the Gould lines, the Texas & Pacific, and the St. Louis Southwestern.

Mr. Geagan: No, we do not get six cents.

Mr. Cowan: The International & Great Northern?

Mr. Geagan: I think not.

Mr. Cowan: Do you ship any lumber to those points in Texas where you do not get the six cent division which you might send via a route that would give you the six cents?

Mr. Geagan: It is done sometimes; yes, sir.

Mr. Cowan: All the Rock Island business that goes off your line pays six cents to all Rock Island stations?

Mr. Geagan: Not to all Rock Island stations.

Mr. Cowan: How is that?

Mr. Geagan: I said a while ago that the division with the Rock Island ranges from three to six cents.

755 Mr. Cowan: Is the larger part of the business which you send to Texas on the six cent division?

Mr. Geagan: Well, I could not say that offhand.

Mr. Cowan: I will just ask you to prepare a statement showing the amount of business you move on the six cent division and the amount of business you move on the lower divisions.

Commissioner Harlan: To Texas?

Mr. Cowan: To Texas and Oklahoma and Colorado points.

Commissioner Harlan: Can that be done without much trouble?

Mr. Geagan: It will require a great deal of work.

Mr. Cowan: It would seem to me the witness ought to have some general idea of what general proportion moves on the six cent and the lower divisions, but he does not seem to have it.

Commissioner Harlan: Will you indicate two months, one in each year, that would be satisfactory?

Mr. Cowan: Yes, sir; take October this year and October last year.

Mr. Geagan: To Texas?

Mr. Cowan: Texas, Oklahoma and Colorado points.

Commissioner Harlan: Very well, do that.

756 Mr. Cowan: Have you now in mind the volume of your business that you move to Texas points?

Mr. Geagan: No, sir; not to Texas points.

Mr. Cowan: Have you now in mind the volume of your business that you move to Oklahoma points?

Mr. Geagan: No.

Mr. Cowan: Is your Oklahoma rate in Group 5 or Group 6?

Mr. Geagan: Group 5, to practically all Oklahoma points.

Mr. Cowan: What is the division on such shipments, it is uniform?

Mr. Geagan: Is it uniform?

Mr. Cowan: Is the division uniform when the lumber is being shipped to points in Group 5?

Mr. Geagan: Yes.

Mr. Cowan: What would it be; six cents?

Mr. Geagan: Yes.

Mr. Cowan: What length of haul is it from the Rochelle mill to deliver to the Iron Mountain & Southern.

Mr. Geagan: I should judge it is about a mile.

Mr. Cowan: Is that the only mill of the Tremont Lumber Company that is located at a junction point with the other railroad, except the one at Tremont?

757 Mr. Geagan: Jonesboro.

Mr. Cowan: What is the length of the haul at Jonesboro?

Mr. Geagan: About a mile.

Mr. Cowan: Relatively, what proportion of the lumber of the Tremont Lumber Company is cut at Rochelle, Jonesboro and Tremont?

Mr. Garwood: Eros. We have no mill at Tremont now. It is at Eros, right below.

Mr. Cowan: Well, take Rochelle and Jonesboro. What is the relative amount of lumber furnished by that company to the railroad which is cut at Jonesboro and Rochelle?

Mr. Geagan: I suppose 40 per cent of it will come from Rochelle, divided almost equally between the other two lines.

Mr. Cowan: And 60 per cent would be about equally divided between Jonesboro and Eros?

Mr. Geagan: Yes.

Commissioner Harlan: Our records show that the mill at Jonesboro is about 3,000 feet from the Rock Island tracks. Is that about right?

Mr. Geagan: I could not say exactly as to that.

Commissioner Harlan: A little over half a mile.

758 Mr. Seaman: It is shown in this book.

Commissioner Harlan: Yes; that will appear later.

Mr. Cowan: Do you haul traffic on a through rate and route from Tremont down to Winnfield, that comes off the Vicksburg, Shreveport & Pacific?

Mr. Geagan: Yes, sir; we do.

Mr. Cowan: You have division sheets that show what you receive out of that?

Mr. Geagan: Yes, sir.

Mr. Cowan: What divisions do you get on ordinary traffic other than lumber? Do you have a percentage basis?

Mr. Geagan: Yes, and there is a wide difference in the divisions on general traffic, merchandise.

Mr. Cowan: Are your rates from stations on your line to and from points on the Vicksburg, Shreveport & Pacific to points on the Rock Island and points on the Iron Mountain, or to points beyond any of these lines—are your rates to and from your stations higher than the rates from the junction point on those lines? Take traffic generally; I am not speaking of lumber.

Mr. Geagan: Generally speaking, we carry the same rates to our local stations as are carried to junctions.

759 Commissioner Harlan: Under the general class rates or commodity rates?

Mr. Geagan: Generally speaking, we do; yes, sir.

Mr. Cowan: Are the rates to Eros, which is not reached by any other road, the same as the rates to Tremont, generally speaking?

Mr. Geagan: Yes, sir; they are.

Mr. Cowan: That would be the same at Womack, Chatham, and those other stations, as I understand your answer.

Mr. Geagan: I will qualify that. In some instances there are differences in the rates to those stations.

Mr. Cowan: Where there are differences, the rate, of course is higher to stations on your line than to the junction point?

Mr. Geagan: Yes.

Mr. Cowan: How far is Eros from Tremont?

Mr. Geagan: Eleven miles.

Mr. Cowan: Do you get any division on the rates to and from the Tremont Lumber Company on traffic other than lumber?

Mr. Geagan: Yes.

Mr. Cowan: Well, would you get it if it is delivered to the Tremont Lumber Company at Rochelle? Suppose they shipped a carload of commissary or other supplies to Rochelle over the
760 Iron Mountain, would you get a division out of that?

Mr. Geagan: If we handled the car, we would.

Mr. Cowan: I wanted to find out if you do handle it. Do you handle that business?

Mr. Geagan: Sometimes.

Mr. Cowan: Generally, do you, or not?

Mr. Geagan: Generally we do.

Mr. Cowan: And at Jonesboro?

Mr. Geagan: And at Jonesboro.

Mr. Cowan: Is it not a fact that practically all of the business that the Tremont Lumber Company ships into Rochelle and Jonesboro is delivered to your station rather than the others?

Mr. Geagan: All of it is?

Mr. Cowan: I think I used the words "practically all."

Mr. Geagan: Well, yes; I think practically all.

Mr. Cowan: The intention is to do that, of course, because of the relation of the companies. And what is the basis of your division in that case, the same as if it were shipped to Eros?

Mr. Geagan: In some cases, yes, and some different.

Mr. Cowan: Your division sheets generally are filed, are
761 they, as well as on lumber?

Commissioner Harlan: They are going to be filed. Is the inbound division the same ordinarily as the outbound division on similar rates?

Mr. Geagan: Yes, sir.

Mr. Cowan: It seems from information which we have that there are certain switching allowances received from connecting carriers of $3.00 per car at Winnfield. What does that apply to?

Mr. Geagan: It applies to shipments received by us, destined to a point on our rails within the yard limits at Winnfield, where we do nothing more than switch the car on a switching way bill.

Mr. Cowan: But that does not apply to lumber in any way.

Mr. Geagan: Yes, it applies to lumber.

Mr. Cowan: For what purpose would you be receiving lumber at Winnfield from another road?

Mr. Geagan: Well, the rate applies on lumber. I do not know whether we have handled any lumber on that arrangement lately.

Mr. Cowan: There would not be any place to move it, unless you handled it on a through bill of lading to Tremont.

762 Mr. Geagan: We might want to unload it on our team track.

Mr. Cowan: Do you know what the tonnage or number of carloads of logs amounts to which the Tremont Lumber Company haul to Jonesboro and Rochelle over your line?

Mr. Geagan: I do not.

Mr. Cowan: Do you keep any record that shows that, that you know of?

Mr. Geagan: I do not.

Mr. Cowan: You keep the traffic statistics, do you not?

Mr. Geagan: I do.

Mr. Cowan: Do you know about what the amount of traffic in logs is which is handled by the Tremont Lumber Company to Winnfield, that are delivered to the Mansfield Hard Wood Company?

Mr. Geagan: No.

Mr. Cowan: You could furnish the total number of carloads of logs that are hauled?

Mr. Geagan: It could be furnished.

Mr. Cowan: I wish you would make a statement showing the total number of carloads hauled by that company by their own equipment, without any compensation to the railroad company during the period of the year ending June 30, 1910, assum-

763 ing that you have not the statistics at hand. When the logs are taken to the Mansfield Hard Wood Lumber Company, do you know where they are delivered?

Mr. Geagan: They are delivered on the track at the Mansfield Lumber Company's mill.

Mr. Cowan: Are they delivered on your track?

Mr. Geagan: We own the track; yes.

Mr. Cowan: You own the track to that industry?

Mr. Geagan: We do.

Mr. Cowan: Are there any other tracks than yours which reach the Mansfield Hard Wood Lumber Company's industry?

Mr. Geagan: No.

Mr. Cowan: All lumber, then, that is shipped out by that concern must first go over your line?

Mr. Geagan: Yes, sir.

Mr. Cowan: You get the same division out of that that you would on lumber shipped out from any other station on your line?

Mr. Geagan: We do.

Mr. Cowan: Either the three or six cents, according to the destination?

Mr. Geagan: Yes, sir.

764 Mr. Cowan: How much service do you perform for the handling of that lumber of the Mansfield Hard Wood Lumber Company; what is the length of line you could haul it?

Mr. Geagan: We could haul it to Tremont, 50 miles, or to any of the junctions, to Rochelle, a haul of 23 miles.

Mr. Cowan: If it were destined to points on the Rock Island, you would just switch it over to the Rock Island, would you not?

Mr. Geagan: We carry no through rates from Winnfield in connection with the Rock Island on lumber.

Mr. Cowan: So you do not ship any lumber at all by way of Winnfield and the Rock Island connection?

Mr. Geagan: Not originating at Winnfield.

Mr. Cowan: But do you ever ship any lumber of the Mansfield Hard Wood Lumber Company to the Rock Island tracks to be sent out on that line?

Mr. Geagan: We have not.

Mr. Cowan: You have carried all that lumber either by way of Rochelle or Tremont?

Mr. Geagan: The fact is the Mansfield Hard Wood Lumber — are just beginning operations, and they have only shipped one car of lumber from there so far.

765 Mr. Cowan: It is a new industry, then?

Mr. Geagan: Yes.

Commissioner Harlan: I think perhaps most of these matters can be worked out from the tariffs, can they not?

Mr. Cowan: Probably so. I did not understand. I suppose it is my inability to understand, some way or other, but I did not understand about the $3.00 switching charge at Winnfield and to what sort of traffic that applies.

Commissioner Harlan: I do not understand some phases of that, but I suppose the tariffs will enable us to study that out. Is that all?

Mr. Cowan: I want to make just this inquiry about that $3.00 switching charge. You say that does not apply to lumber, as a matter of fact.

Mr. Geagan: It applies on lumber.

Mr. Cowan: Under what circumstances would it apply to a carload of lumber?

Mr. Geagan: If a man received a carload of lumber destined to Winnfield, coming in over the line of any other road, and demanded Tremont & Gulf delivery.

Mr. Cowan: To whom would the $3.00 be charged?

Mr. Geagan: The line delivering us the car.

766 Commissioner Harlan: That line would absorb it, do you mean?

Mr. Geagan: They would pay us. I do not know whether they would absorb it on all shipments or not.

Mr. Garwood: I did not understand the question.

Commissioner Harlan: The point is this: Mr. Cowan directed the attention of the witness to a switching charge of $3.00, which he understood was assessed at Winnfield, and by way of illustration

he asked what charge the Tremont & Gulf would make on a carload inbound to Winnfield over the Rock Island or one of the other lines that required delivery on the Tremont & Gulf tracks, and the witness says the Tremont & Gulf would make a charge of $3.00 against its connection. The question is whether the connection would absorb that charge, and the witness does not know.

Mr. Garwood: I suppose the tariffs will show that.

Commissioner Harlan: Yes.

Mr. Cowan: Do you know of its having, in fact, been applied on any shipment of lumber?

Mr. Geagan: At Winnfield?

Mr. Cowan: Yes.

Mr. Geagan: Yes.

767 Mr. Cowan: What road did the car come in over?

Mr. Geagan: I cannot say offhand. I don't remember which particular road it came in over.

Mr. Cowan: And what would you do with the car; what would you have to do with it? Would it be set over on an exchange track?

Mr. Geagan: From our interchange track we would place it on the consignee's track.

Mr. Cowan: On this car you say you know of, did you do that?

Mr. Geagan: Yes, sir.

Mr. Cowan: To whom did you charge the $3.00?

Mr. Geagan: The road delivering us the car.

Mr. Cowan: Did they absorb it out of the rate to Winnfield?

Mr. Geagan: I could not say as to that.

Commissioner Harlan: That is the point he does not know about. The tariffs will show.

Mr. Coleman: Does not that switching rate apply out?

Mr. Geagan: Yes, sir.

Mr. Coleman: Is it not so, that you are charging that $3.00 a car for the hard wood lumber that leaves the Mans-

768 field mill and goes to the Rock Island track?

Mr. Geagan: If it moves under our tariffs; yes, sir.

Mr. Coleman: And is not that $3.00 charge for precisely the same service that you get six cents per 100 pounds when it is up at Jonesboro or Rochelle?

Mr. Geagan: No.

Mr. Coleman: It is a switch from the Mansfield mill to the Rock Island connection——

Commissioner Harlan: How do the two movements differ?

Mr. Geagan: On the movement at Winnfield our connection will furnish the car and we will simply put it on the man's track to unload it and turn it back to them, and we do not weigh the car, and in the other case we perform all the service.

Commissioner Harlan: Furnish the car?

Mr. Geagan: Yes.

Commissioner Harlan: It is very often a foreign car?

Mr. Geagan: Yes, sir.

Commissioner Harlan: You just set it there; is that all?

Mr. Geagan: Yes.

Commissioner Harlan: Don't you do precisely the same thing at Winnfield, charge in one case six cents per 100
769 pounds and in the other $3.00 a car.

Mr. Geagan: In the case in question at Winnfield we do not weigh the car, but set it on the track.

Commissioner Harlan: That is the only difference, is it not, you do not weigh it?

Mr. Geagan: Yes, sir.

Commissioner Harlan: And you do not bill it at Winnfield?

Mr. Geagan: We do not bill it at Winnfield.

Commissioner Harlan: And you do bill it at Jonesboro and Rochelle?

Mr. Geagan: Yes.

Commissioner Harlan: But with the exception of billing it and weighing it, the service is the same on the outward movement?

Mr. Geagan: Yes, possibly so.

Mr. Cowan: I wanted to see why, in case the shipment was brought in over the Rock Island, which they paid $3.00 for, why the car could not be unloaded on the Rock Island tracks, without their giving up anything in coming to Winnfield.

Mr. Geagan: Possibly the consignee wanted delivery on our track for some reason.

Mr. Cowan: Why don't you charge him the same rate, if
770 he is situated where he wants delivery on your tracks, as you would on an outbound shipment that originated on your tracks for the same consignee? You would get six cents in one case and in the other case only $3.00.

Mr. Geagan: We simply handle that as a switch movement at Winnfield.

Commissioner Harlan: That has already been explained. How large are the shipping limits of Winnfield, how extensive?

Mr. Geagan: Our yard limits are something like a mile.

Commissioner Harlan: I mean the entire switching limits.

Mr. Geagan: Of our line or all lines?

Commissioner Harlan: All lines.

Mr. Geagan: It embraces the four lines of railroad; possibly a square mile, or something like that.

Commissioner Harlan: Are there any industries that are on your line and also on the Rock Island?

Mr. Geagan: No, sir.

Mr. Coleman: I wanted to inquire what other outbound joint through rates you have other than on lumber.

Mr. Geagan: We have them on classes and commodities generally to jobbing points.

Mr. Coleman: On all classes and commodities?

771 Mr. Geagan: Not all.

Mr. Coleman: I suppose that will appear.

Commissioner Harlan: He has stated that.

Mr. Coleman: Have you on cattle?

Mr. Geagan: No, not on cattle—yes, to St. Louis we have on cattle.

Mr. Coleman: Have you on peanuts?

Mr. Geagan: We have on peanuts.

Mr. Coleman: I believe Judge Garwood asked you if your divisions compared with the local Louisiana distance tariff rates, and you answered yes. Is that correct?

Mr. Geagan: I referred to lumber when I answered him.

Mr. Coleman: Is that correct?

Mr. Geagan: The divisions are slightly lower than our local rates.

Mr. Coleman: What is the minimum under the Louisiana distance tariff?

Mr. Geagan: The minimum hauled on our line, do you mean?

Mr. Coleman: Prescribed in Louisiana. I understand they fix a minimum haul up to five miles, with a maximum rate for that haul.

Mr. Geagan: Five miles is the minimum on our line.

772 Mr. Coleman: What do you get for five miles?

Mr. Geagan: Six cents per 100 pounds.

Mr. Coleman: Under the Louisiana tariff?

Mr. Geagan: Under our Louisiana tariff.

Mr. Coleman: I mean, does the local distance tariff of Louisiana allow you to charge six cents per 100 pounds for five miles?

Mr. Geagan: It does.

Mr. Coleman: Have you reference to that tariff?

Examiner Burchmore: Here is a complete list of this company's tariffs.

Mr. Coleman: Does it show lower than five miles?

Examiner Burchmore: I have not the tariffs themselves; only a list of the tariffs.

Mr. Geagan: 3-B, I. C. C. No. 58.

Mr. Coleman: I do not think it is important enough to stop.

Commissioner Harlan: No.

Mr. Jeffery: Are you not mistaken when you say you get six cents per 100 pounds division to points on the Cotton Belt? I am informed by the Cotton Belt that is not the case.

Mr. Geagan: I did not understand the question was that

773 way.

Mr. Seaman: Do you have divisions to points on the Santa Fe?

Mr. Geagan: No.

Mr. Jeffery: You do not get a division to points on the Cotton Belt?

Mr. Geagan: No.

Commissioner Harlan: I do not recall the witness having said that he did.

Mr. Coleman: You ship some lumber to Kansas, do you not?

Mr. Geagan: Yes, sir; some.

Mr. Coleman: Your division is six cents on that traffic, is it not?

Mr. Geagan: Some of it; yes, sir.

Mr. Coleman: Most of it; nearly all of it; in fact, all of it.

Mr. Geagan: I would not say all of it.

Mr. Coleman: But a considerable portion of your lumber does move to Kansas, a very considerable portion?

Mr. Geagan: I do not know just what proportion.

Mr. Cowan: One question which I should have asked: In the operation of your company's business, as traffic manager,
774 has the Tremont Lumber Company at any time routed its own freight other than giving the destination of the freight?

Mr. Geagan: Yes, they have.

Mr. Cowan: To what extent have they done that?

Mr. Geagan: It is very seldom they do it.

Mr. Cowan: Do they make out the bills of lading in their office when they load a car to be shipped out from Rochelle, say?

Mr. Geagan: They make bills of lading.

Mr. Cowan: And on that they name the destination?

Mr. Geagan: They do.

Mr. Cowan: And when you make out the way bill you name the route, do you?

Mr. Geagan: Yes, sir.

Mr. Cowan: Just how do you handle that bill of lading; do they send it to your office made out to be stamped and signed?

Mr. Geagan: Our local agent signs the bill of lading.

Mr. Cowan: They make it out and he signs it?

Mr. Geagan: Yes.

Mr. Cowan: Then your local agent makes out the way bills?

Mr. Geagan: He makes the way bills.

Mr. Cowan: Do you have a standard set of rules for your
775 agent to go by in routing traffic to a given destination; say, Kansas, Colorado, Central Freight Association territory, and the like?

Mr. Geagan: No, we have no set rule to go by.

Mr. Cowan: How does he know how to route it?

Mr. Geagan: According to the tariffs.

Mr. Cowan: But the tariffs may apply via the Iron Mountain or the Rock Island, either.

Mr. Geagan: It is governed largely by the class or kind of car it is in.

Mr. Cowan: Suppose it is one of your cars.

Mr. Geagan: He would call upon me as general freight agent for routing.

Mr. Cowan: When he does that, by what route do you preferably send that car?

Mr. Geagan: I would not say we sent it preferably by any route.

Mr. Cowan: Do you have any arrangement by which you give the Rock Island a certain percentage of your traffic?

Mr. Geagan: We have not.

Mr. Cowan: Have you any such arrangement with any other line.

776 Mr. Geagan: We have not.

Mr. Cowan: In fact, what proportion do you give to the Rock Island?

Mr. Geagan: We give them 35 per cent, approximately, of our entire movement.

Mr. Cowan: Of lumber?

Mr. Geagan: Of lumber.

Mr. Cowan: And the other is divided how; between the Iron Mountain and the Arkansas & Louisiana, the Vicksburg, Shreveport & Pacific; what ratio is the other division of the traffic?

Mr. Geagan: The Vicksburg, Shreveport & Pacific will get about one-third of our entire output, and the Iron Mountain; the balance is divided between the Iron Mountain and the L. R. & N. at Winnfield. The Iron Mountain, I suppose, 20 per cent.

Mr. Cowan: The Vicksburg, Shreveport & Pacific's traffic all moves east of the Mississippi River, I suppose.

Mr. Geagan: Not all of it.

Commissioner Harlan: Judge Cowan, you have exceeded your one question.

Mr. Cowan: I beg your pardon. I am through.

777 Examiner Burchmore: A question that ought to have been asked of the former witness I think you will be able to answer. This traffic agreement between the lumber interests and the Tremont & Gulf Railroad Company provides that the lumber companies will make arrangements for coal and water supply for the lumber company engines operating under this traffic agreement, but that the railroad company agrees to furnish coal and water for those engines at cost, where it is desired by the lumber company. Now, as a matter of fact, does the lumber company obtain the coal for its engines from the railway company?

Mr. Geagan: I could not say; I do not know.

Examiner Burchmore: Do you know as regards water?

Mr. Geagan: I do not know.

Commissioner Harlan: Mr. Fick, what do you know about that?

Mr. Fick: The lumber company buys its own coal except at Chatham. We furnish them coal, and bill on them at the same price we bill to other parties.

Commissioner Harlan: That is, cost: is it?

Mr. Fick: Practically, adding just ten or fifteen per cent more to pay for the handling. And for water, they pay

778 fifty cents a tank, and we pay the same wherever we take it.

Examiner Burchmore: The contract seems to provide that the Tremont & Gulf shall use all adequate and reasonable means to provide cars for shipments for the Tremont Lumber Company. It further provides when it shall fail to move or furnish cars as requested by the lumber company, then the lumber company shall have the right, if they desire, to go to one of the trunk lines and get cars, haul them empty with their own engines to the mill, there load them and haul them back to the division with the trunk line, for their shipments to interstate points. Are you advised whether that has ever been taken advantage of?

Mr. Geagan: It has never been taken advantage of to my knowledge.

Examiner Burchmore: It further provides, as I understand it,

that the railway company shall have the right to control the routing of all traffic in lumber furnished by the Tremont Lumber Company. That is your understanding?

Mr. Geagan: They allow us to route the lumber except in some particular case, where——

Examiner Burchmore: That is all.

(Witness excused.)

779 Mr. Garwood: I neglected to introduce the income account statistics for the year ending June 30, 1910 by months.

(The paper so offered and identified was received in evidence and thereupon marked Tremont & Gulf Exhibit No. 4, witness Geagan, received in evidence December 10, 1910, and is attached hereto.)

Mr. Garwood: Now, we have two or more witnesses who are citizens on the line, business men. I do not know that they will add very much to what your Honor wants to know, and unless you wish to examine them——

Commissioner Harlan: They would testify to the specific service and promptness of the service and the building up of the territory?

Mr. Garwood: Yes.

Commissioner Harlan: The record may show that if they were called, they would so testify.

Mr. Garwood: J. H. Frazier, and an independent lumber man on the line.

Commissioner Harlan: Very well, the record will show that would be the tendency of their testimony. We will next call the Warren, Johnsville & Saline River Railroad.

Mr. Cowan: Before your Honor calls the next case I wish to inquire if the gentleman representing the Tremont Lumber
780 Company is here, Mr. Carpenter.

Mr. Seaman: He is here.

Mr. Cowan: I wanted to ask some questions of Mr. Carpenter in regard to the lumber company's operations on the Tremont & Gulf Railroad, as a part of this investigation.

Commissioner Harlan: Will you make that rather short?

Mr. Cowan: If Mr. Carpenter is going to remain over until Monday we will postpone it until Monday.

Mr. Seaman: Get through with him now.

Commissioner Harlan: Close it as soon as you can.

S. J. CARPENTER was called as a witness, and having been duly sworn, testified as follows:

Mr. Cowan: Have you a record of the amount of logs which you haul over the tracks of the Tremont & Gulf Railway?

Mr. Carpenter: Yes.

Mr. Cowan: Will you please furnish it, covering a year?

Mr. Carpenter: Yes, sir. Of course I haven't it with me.

Mr. Cowan: I know, but you will furnish it.

Mr. Garwood: State what year; the exact time.

Mr. Cowan: I was about to say the year ending June 30, 1910.

Mr. Seaman: Mr. Geagan has stated that already.

781 Mr. Cowan: Stating separately the logs hauled to the different mills.

Mr. Carpenter: Yes.

Mr. Cowan: Do you do any milling operation except on the line of the Tremont & Gulf Railway?

Mr. Carpenter: The Tremont Lumber Company does not; no, sir.

Mr. Cowan: Is there any lumber company connected with the Tremont & Gulf Railway for whom you do any logging, or haul any logs?

Mr. Carpenter: The lumber company connected with the Tremont & Gulf Railway?

Mr. Cowan: Located on the Tremont & Gulf, I should say.

Mr. Carpenter: For whom we do logging?

Mr. Cowan: For whom you haul logs.

Mr. Carpenter: No. We sell some logs for the Mansfield Hard Wood Company, or are arranging to. We have not sold them any to amount to anything.

Mr. Cowan: Delivered at Winnfield?

Mr. Carpenter: Delivered at Winnfield.

Mr. Cowan: Does the price which you get for those logs depend upon some contract, or is it the price which anybody

782 else would supply logs at, at Winnfield?

Mr. Carpenter: Yes; it is the market price. We are not hard wood manufacturers, and have intermingled with our timber more or less hard wood that we wished to log when we were getting off the pine, and we sought a purchaser for the hard wood, and the Mansfield Company wished to operate our hard wood, and we explained to them before making the contract that we had entered into an agreement with the Tremont & Gulf Railroad Company covered by this trackage agreement which has been referred to here, that we could not part with the control of the tonnage arising from that timber, and if they bought of us that hard wood timber, they must respect the contract we had made with the Tremont & Gulf Railway Company.

Mr. Cowan: If you sell it to them delivered at Winnfield, I do not see why they would have anything to do with the matter.

Commissioner Harlan: The Tremont & Gulf gets the outbound tonnage, is what he means.

Mr. Carpenter: Yes.

Mr. Cowan: You could only sell them timber if they would give the tonnage to the Tremont & Gulf?

783 Mr. Carpenter: Yes. Of course under this contract we would not be allowed to sell any of this timber, for we induced the Tremont & Gulf to extend these lines with that understanding, that we would give them the tonnage.

Mr. Cowan: You could not sell them the timber, even if they were willing to pay you for hauling it out there, unless they would deliver the tonnage?

Mr. Carpenter: Unless they were willing to enter into a contract for the tonnage.

Mr. Cowan: All your other timber is subject to that contract, and you have no right to dispose of it unless the product goes back as freight to the Tremont & Gulf?

Mr. Carpenter: Yes.

Mr. Cowan: You get the market price at Winnfield?

Mr. Carpenter: Well, we made the best sale we could They, of course, took that into consideration.

Mr. Cowan: But it would be based on that, of course.

Mr. Carpenter: They had to take into consideration the circumstances under which they would have to operate.

Commissioner Harlan: What is that hard wood?

Mr. Carpenter: It is largely oak. There is some gum.

Commissioner Harlan: Where is the market?

784 Mr. Carpenter: I think they are exporting it largely, although the agricultural implement people are large buyers in that neighborhood.

Mr. Cowan: Do you sell to anybody else except the company you have just mentioned?

Mr. Carpenter: Yes, sir.

Mr. Cowan: Do they buy from anybody else except you?

Mr. Carpenter: Yes.

Mr. Cowan: How do they get it?

Mr. Carpenter: I say they do, but they are not operating yet, but it is their plan to buy from other people, and they will have to make their own arrangements for transportation.

Mr. Cowan: But they could buy lumber on the Rock Island and the L. & A.?

Mr. Carpenter: I understand it is their plan to ship in on the Louisiana Railroad & Navigation Company, and they are building plants on their track now.

Mr. Cowan: How many miles of logging road does your company operate?

Mr. Carpenter: We have in operation now some 55 or 60 miles of track. The lumber company owns rails that do not happen

785 to be needed at this time, to lay more track, at this time.

Mr. Cowan: At how many points do you connect with the Tremont & Gulf with your logging road?

Mr. Carpenter: There are three principal points, although I believe now we have temporary spurs off it at one or two other points for a little bit of timber.

Mr. Cowan: Name the points.

Mr. Carpenter: They are not necessarily regular stations, you know.

Mr. Cowan: Well, they are connecting points?

Mr. Carpenter: The first one leaving, coming down on the Rochelle branch, is seven miles from the mill at Rochelle. The logging camp that is supplying the Eros mill leaves the main line of the Tremont & Gulf about five miles above Eros and goes off 15 or

20 miles. Jonesboro is the same way, about half way between Jonesboro and Sikes it branches off from the main line.

Mr. Cowan: In the operation of your logging road, do you use your regular logging cars?

Mr. Carpenter: Well, our regular logging cars; yes, sir; they are not a light skeleton car, but all of our new equipment we are buying is 40 foot 80,000 pound capacity cars, very fine
786 cars.

Mr. Cowan: In returning these cars to the lumbering district, do you carry anything out on them?

Mr. Carpenter: No, everything is shipped in a regular way, except we are allowed under our contract to move camp equipment and that sort of thing, but nothing in the way of supplies that are billed out by the railroad company.

Mr. Cowan: Have you an estimate of what it costs you per thousand feet to deliver your logs at the mill?

Mr. Carpenter: Yes, sir; we keep records of that sort.

Mr. Cowan: Which show that?

Mr. Carpenter: Yes.

Mr. Cowan: I wish you would just file a statement.

Mr. Carpenter: I do not want to do that unless there is some very good reason why it should be done. The Tremont Company's cost of logging—of course there are a great many factors.

Mr. Cowan: I will pass that for the moment and ask you a general question as an expert, then. What is the reasonable cost of operating a logging train per train mile, of the ordinary sort?

Mr. Carpenter: Well, it depends so much upon the char-
787 acter of the road, whether it is a main line or tram road, for the maintenance, that I could not give it to you.

Mr. Cowan: Well, generally speaking, what do you consider the cost for logging mills per train mile for the cost of hauling the logs? We are all ignorant of that, and have no information as to what those things ought to cost, or give it per thousand feet.

Mr. Carpenter: You are speaking about the cost of taking the logs from the end of the tram roads and moving them to the main line of the railroad?

Mr. Cowan: I am speaking of the train operation after the logs have been loaded.

Mr. Carpenter: I will just explain to you briefly——

Commissioner Harlan: Suppose you say first whether you know or not.

Mr. Carpenter: I have records which show exactly, but I have not them with me.

Mr. Cowan: Go ahead.

Mr. Carpenter: What I wished to tell him was the cost of hauling on the main line is much less than it is in the woods.

Commissioner Harlan: Do you mean the main line in the
788 woods?

Mr. Carpenter: Of the Tremont & Gulf in our case, or a main line that is well kept up.

Mr. Cowan: My purpose is to get just that. State the cost per

train mile or per thousand feet on the main line of a logging road, well kept up, or any other unit basis you have in mind.

Mr. Carpenter: I cannot give it.

Commissioner Harlan: Well, I do not suppose this case is going to be decided on that, anyway. Have you anything further of this witness?

Mr. Cowan: Where do you sell the principal part of your lumber output?

Mr. Carpenter: We sell it over a large territory, Central Freight Association, and Western Trunk Line Territory takes perhaps two-thirds of our output; and it is scattered from New England to Texas.

Mr. Cowan: And in the territory west of the Missouri River, and Texas?

Mr. Carpenter: Yes, sir.

Mr. Cowan: Oklahoma and Kansas?

Mr. Carpenter: Yes, sir.

789 Mr. Cowan: In all these places you meet the ordinary competition in the lumber business in the sale of your product?

Mr. Carpenter: Yes.

Mr. Cowan: Do you sell it on a delivered price at the point of delivery, or do you sell it at the mill basis price?

Mr. Carpenter: We guarantee the weights, and make practically a delivered price, but do not guarantee delivery.

Commissioner Harlan: That is practically universal, is it not?

Mr. Carpenter: Yes, sir.

Mr. Cowan: You do have for your own purposes an estimated price at the mill?

Mr. Carpenter: Yes.

Mr. Cowan: And that is usual with lumber companies?

Mr. Carpenter: Yes.

Mr. Cowan: What is your annual output?

Mr. Carpenter: We are manufacturing about on the basis of 100,000,000 feet a year now.

Commissioner Harlan: How many carloads does that make?

Mr. Carpenter: I should say 7,000.

Mr. Cowan: This lumber you manufacture is pine lumber?

790 Mr. Carpenter: Yes.

Mr. Cowan: Known by any particular name, Long Leaf or——

Mr. Carpenter: Long Leaf yellow pine.

Mr. Cowan: And the same character of pine is supplied by mills in Louisiana, Arkansas and eastern Texas?

Mr. Carpenter: Yes, sir.

Mr. Cowan: I would like to ask one question, if you can state what it costs you from the stump to the mill to log your mill.

Mr. Carpenter: I have no figures on that. It varies under different conditions.

Commissioner Harlan: Have you any mill that is connected by a spur track with the Rock Island?

Mr. Carpenter: No, we have no track except the Tremont & Gulf to our mills.

Commissioner Harlan: Have you ever had any spurs to any of your mills from the Iron Mountain or Rock Island?

Mr. Carpenter: No.

Mr. Cowan: Have you ever endeavored to get a spur track from any of the other roads?

Mr. Carpenter: No.

Mr. Cowan: Naturally, your situation with the Tremont &
791 Gulf is such that as a business matter, you would not do that.

(No response.)

(Witness excused.)

792 *Warren, Johnsville & Saline River Railroad.*

Mr. Gaughan: I will call Mr. Forsyth.

J. F. Forsyth was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: Where do you reside?

Mr. Forsyth: Warren, Arkansas.

Commissioner Harlan: What is your business?

Mr. Forsyth: I am general manager of the Warren, Johnsville & Saline River Railroad.

Commissioner Harlan: How long have you been connected with that line?

Mr. Forsyth: Since it was built.

Commissioner Harlan: When was it built?

Mr. Forsyth: 1902.

Commissioner Harlan: By whom?

Mr. Forsyth: By the Bradley Lumber Company.

Commissioner Harlan: Was it completely built at that time?

Mr. Forsyth: No, sir.

Commissioner Harlan: How much was built when you went there in 1902?

793 Mr. Forsyth: Six miles completed at once.

Commissioner Harlan: It now extends from Warren to Hermitage?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: Warren is on what line, on the Iron Mountain?

Mr. Forsyth: On the Iron Mountain.

Commissioner Harlan: And Hermitage is on the Rock Island?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: Were you enjoying divisions on manufactured lumber or on logs when those six miles were the only part of the completed line?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: You got those divisions from the Iron Mountain?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: What did they amount to? What was the minimum and the maximum?

Mr. Forsyth: I think it was a blanket of two cents, if I remember correctly now.

Commissioner Harlan: What had it been for some time before you went there?

794 Mr. Forsyth: I think it was that way all the time; that is as far as my knowledge goes.

Commissioner Harlan: Is that the highest division you have ever received from the Iron Mountain?

Mr. Forsyth: Up to date?

Commissioner Harlan: Up to date.

Mr. Forsyth: No, sir.

Commissioner Harlan: When was the line extended south to Hermitage?

Mr. Forsyth: 1905.

Commissioner Harlan: Was that done by one contract of construction?

Mr. Forsyth: It was done under contract of construction; yes, sir.

Commissioner Harlan: That is, you first had six miles and the next time you built, you built right through to Hermitage?

Mr. Forsyth: No.

Commissioner Harlan: How many miles did you next build?

Mr. Forsyth: Four miles, to make the connection to Hermitage.

Commissioner Harlan: Then there was a line running out

795 from Hermitage?

Mr. Forsyth: We had four miles additional to build, making ten miles, by 1905, and then we made an addition of four miles and a fraction to reach Hermitage. We are not quite at Hermitage; the junction is a mile north of Hermitage.

Commissioner Harlan: The Bradley mill is at Warren?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: After you made the next extension to the six mile track, did you get any high division from the Iron Mountain?

Mr. Forsyth: No, sir.

Commissioner Harlan: You had not connected with the Rock Island, so you were not getting any divisions from the Rock Island at that time?

Mr. Forsyth: No, sir.

Commissioner Harlan: When did you reach the Rock Island rails?

Mr. Forsyth. I am not quite sure of the year, Judge; it was either 1905 or 1906, along in May or June of that year.

Commissioner Harlan: Did you reach the main track or a spur track of the Rock Island?

Mr. Forsyth: Well, it is what we call the main track there,

796 but it is considered a spur connection, I think, of the Rock Island main line which runs from Tinsman to Crossett. I do not know whether the Rock Island considers it main line or not.

Commissioner Harlan: At the time you reached the Rock Island

rails, the Warren, Johnsville & Saline River Railroad, as it is now called, was still the property of the Bradley Lumber Company?

Mr. Forsyth: It was still the property of the Bradley Lumber Company until 1905; yes, sir. It was not incorporated until that time.

Commissioner Harlan: After reaching the Rock Island rails, the title to the property was turned over to the railroad corporation?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: Organized under the laws of the State of Arkansas?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: With what capital stock, authorized?

Mr. Forsyth: $200,000.

Commissioner Harlan: And issued?

Mr. Forsyth: $50,000.

797 Commissioner Harlan: What is the mileage of the completed road?

Mr. Forsyth: It is 14.8 miles outside of the yard limits; the yard limits take up 1⅛ or 1 1/6 miles.

Commissioner Harlan: What was the cost of that construction?

Mr. Forsyth: Something over $200,000, including equipment.

Commissioner Harlan: That is what it cost the Bradley Lumber Company?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: And it was turned over to the railroad company, and simply a nominal issue of stock of $50,000 was made?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: And that was issued to the Bradley Lumber Company, or its officers, or stockholders?

Mr. Forsyth: It was issued to stockholders.

Commissioner Harlan: So that the railroad is owned by the same people who own the lumber company?

Mr. Forsyth: I think practically so.

Commissioner Harlan: What is the character of the road-

798 bed; is it a ballasted road?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: What iron do you use?

Mr. Forsyth: It was originally started at 35 pound steel, but we have changed some of that now, and we have a little over—there is about six and a half miles of 60 pound, and we are gradually replacing the 35 pound with 60 pound as fast as we can.

Commissioner Harlan: What equipment have you?

Mr. Forsyth: We have three locomotives and about 50 logging cars.

Commissioner Harlan: And passenger cars?

Mr. Forsyth: No passenger cars; we do not run a passenger car.

Commissioner Harlan: Do you do any passenger business?

Mr. Forsyth: No.

Commissioner Harlan: Mail or express business?

Mr. Forsyth: No.

Commissioner Harlan: Do you own the right of way?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: Do you own the equipment?

Mr. Forsyth: Yes, sir; all of it.

799 Commissioner Harlan: Have you any bonded indebtedness?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: What does it amount to?

Mr. Forsyth: I think that there was $200,000 worth of bonds issued. I am not in a position to give you that exact information. I did not know the extent of this inquiry, and I will have to depend on our reports to the Commission, to be exact on it.

Commissioner Harlan: Very well; that will be understood.

Mr. Gaughan: We will furnish a statement showing the bonds outstanding.

Mr. Forsyth: I will have it furnished.

Commissioner Harlan: And the rate of interest?

Mr. Forsyth: And the rate of interest.

Examiner Burchmore: You stated you had no passenger cars?

Mr. Forsyth: No.

Examiner Burchmore: In one of the reports to the Commission it says your company has two passenger cars owned.

Mr. Forsyth: It is a mistake; they are cabooses.

Commissioner Harlan: Do you carry passengers in the cabooses?

800 Mr. Forsyth: We used to carry them, but that matter was up before the Arkansas Railroad Commission, whereby they wanted us to put on regular service, and I took it up with the State Commission, and owing to the fact there were so very few passengers, I asked to be relieved from that duty.

Commissioner Harlan: The passengers you do carry in cabooses you make no charge for?

Mr. Forsyth: No.

Examiner Burchmore: There was a time, according to your time table, that you had a mixed train.

Mr. Forsyth: We filed that. We practically do that; yes; it is simply to comply with your regulations; that is all.

Commissioner Harlan: There is no regulation which requires you to file a passenger time-table you have a passenger car, is there?

Mr. Forsyth: I do not know; under the laws of the State of Arkansas——

Commissioner Harlan: Well, it is a fact you do not sell tickets, and you make no charge?

Mr. Forsyth: No.

Commissioner Harlan: And you do carry passengers simply
801 as an accommodation on a caboose car?

Mr. Forsyth: Yes.

Commissioner Harlan: What inducements were held out to you aand by whom, to build this connection over to Hermitage?

Mr. Forsyth: Well, we thought that the road would be a paying proposition, and we needed other outlets.

Commissioner Harlan: Well, it was the outlet that was the inducement, was it not?

Mr. Forsyth: Principally.

Commissioner Harlan: And the things that accompany the outlet?

Mr. Forsyth: Yes.

Commissioner Harlan: Did you have a promise of divisions which were higher than you had been receiving?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: You had that promise before you built over there?

Mr. Forsyth: Yes.

Commissioner Harlan: Was it agreed what the division should be?

Mr. Forsyth: I do not know. That agreement was completed after——

802 Commissioner Harlan: I do not mean the written agreement, but you understood you were going to get higher agreements or divisions than two cents per hundred pounds?

Mr. Forsyth: Yes.

Commissioner Harlan: And you do get five cents per 100 pounds?

Mr. Forsyth: Yes.

Commissioner Harlan: And it was understood you were to get five cents before you went over there, and that was a part of the inducement?

Mr. Forsyth: I would say yes, sir, but I did not negotiate this arrangement.

Commissioner Harlan: Well, that is your understanding?

Mr. Forsyth: That is my understanding; yes, sir.

Commissioner Harlan: What forest does the Bradley Lumber Company own?

Mr. Forsyth: Well, we have 35,000 acres uncut yet.

Commissioner Harlan: What did they have when you went there?

Mr. Forsyth: I think they had in the neighborhood of 10,000 acres altogether, and that has been bought since.

Commissioner Harlan: I thought you said they had 35,000

803 acres now.

Mr. Forsyth: Yes.

Commissioner Harlan: And they had 10,000 then?

Mr. Forsyth: Yes.

Commissioner Harlan: And have bought the other since?

Mr. Forsyth: Yes, sir. I went there in 1901.

Commissioner Harlan: You went there in connection with the lumber company?

Mr. Forsyth: Yes.

Commissioner Harlan: Let me ask you at this point whether the officers of the railroad company are practically the same as the officers of the lumber company.

Mr. Forsyth: Practically; yes, sir.

Commissioner Harlan: And as officers of the railroad company, do they receive any salary from the railroad company?

Mr. Forsyth: Only myself.

Commissioner Harlan: Do you also receive a salary from the lumber company?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: Compared to your salary as an official of the lumber company is your salary as an officer of the railroad company a substantial salary or nominal?

804 Mr. Forsyth: I should say a substantial salary.

Commissioner Harlan: Now, to return to the forests, do they lie off between Warren and Hermitage?

Mr. Forsyth: Not now. That part is all cut out. Our main holdings are now south of Hermitage and east.

Commissioner Harlan: But east of the Rock Island branch line?

Mr. Forsyth: All east of the Rock Island branch line; yes, sir.

Commissioner Harlan: Have you some logging roads connected with your main line?

Mr. Forsyth: The arrangement that we have—the lumber company has five miles of spur lines connecting with the main line.

Commissioner Harlan: That is operated by the lumber company?

Mr. Forsyth: It is operated by the railroad company at actual cost, which the lumber company refunds to the railroad company.

Commissioner Harlan: The lumber company has no locomotives or equipment?

Mr. Forsyth: No equipment of any kind.

805 Commissioner Harlan: So you run your cars off on this spur track?

Mr. Forsyth: Yes.

Commissioner Harlan: And you have no trackage agreement, but simply operate at cost?

Mr. Forsyth: Simply operate at cost to the main line.

Commissioner Harlan: Have you determined what the cost is?

Mr. Forsyth: Just the actual payroll and expenses. Of course the engines are on a rental basis.

Commissioner Harlan: I do not quite understand that. Your train crews and your engineers take your trains off onto the logging track.

Mr. Forsyth: Yes, sir.

Commissioner Harlan: The lumber company has no engineers or train crews?

Mr. Forsyth: No.

Commissioner Harlan: And every time you run a train off on the logging road and bring it back, can you take the time?

Mr. Forsyth: Well, there are two engines that are devoted altogether and stay on the spur track and we have only one engine that stays on the main line.

Commissioner Harlan: I see. So you charge all that ex-

806 pense to the lumber company?

Mr. Forsyth: We charge all that expense to the lumber company; yes, sir.

Commissioner Harlan: Have you a trackage arrangement with the Rock Island; do you bring in some over the Rock Island?

Mr. Forsyth: Yes, sir, but that is all finished now.

Commissioner Harlan: You do not do that any longer?

Mr. Forsyth: No; they are all cut out.

Commissioner Harlan: When did you cease running your trains over the Rock Island?

Mr. Forsyth: Last June, I think it was.

Commissioner Harlan: What was the trackage arrangement made at that time?

Mr. Forsyth: 75 cents per train mile on a basis of 30 cars to the train.

Commissioner Harlan: What is the daily output of the Bradley mill?

Mr. Forsyth: About practically 100,000 feet.

Commissioner Harlan: A day?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: And it is using just this one spur track, or one logging road?

807 Mr. Forsyth: Yes, sir.

Commissioner Harlan: And that lies somewhat east of Hermitage?

Mr. Forsyth: Yes.

Commissioner Harlan: Perhaps a little to the south.

Mr. Forsyth: South and east.

Commissioner Harlan: And the logging road is seven miles, or five, did you say?

Mr. Forsyth: The logging road is five miles of spurs that we have; these are spurs that are changed from one time to the other.

Commissioner Harlan: Yes, but at present you only have five miles of logging road running off the line of your road?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: Do you haul over the logging road logs of any other than the Bradley Lumber Company?

Mr. Forsyth: No, sir. We never have done it.

Commissioner Harlan: Do you haul any general merchandise over that road except for the Bradley Lumber Company?

Mr. Forsyth: No, sir; not over the logging railroad.

Commissioner Harlan: It has a commissary, I suppose, 808 out in the woods?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: And it does receive supplies?

Mr. Forsyth: Yes, sir; those supplies are billed just the same as if it was an outside party; that is, to the lumber company.

Commissioner Harlan: You charge local rates?

Mr. Forsyth: The local rates are billed and way bills issued just the same.

Commissioner Harlan: Are there any rates running out into the woods?

Mr. Forsyth: We comply with the Arkansas State tariff in that respect.

Commissioner Harlan: Do you do any traffic of a general nature on your line?

Mr. Forsyth: Well, very little, excepting we do a small per-

centage—we have three spurs out there for the accommodation of people, one about four miles, one about six and one about eight; they bring in staves, stave bolts, piling and ties, and we take out fertilizer and occasionally we bring in cotton seed.

Commissioner Harlan: Those are short loading tracks?

809 Mr. Forsyth: Short loading tracks; yes, sir.

Commissioner Harlan: What is the amount of that tonnage by the year?

Mr. Forsyth: It would not exceed ten per cent of the total.

Commissioner Harlan: Are the ties cut——

Mr. Forsyth: That is, I say that, figuring on the tonnage of the lumber and not on the tonnage of the logs.

Commissioner Harlan: Yes. Are those ties cut from the lands of the Bradley Lumber Company?

Mr. Forsyth: No.

Commissioner Harlan: That is all outside traffic?

Mr. Forsyth: Yes.

Commissioner Harlan: Has your railroad ever paid any dividends?

Mr. Forsyth: No, sir.

Commissioner Harlan: You file your annual and monthly reports with the Commission?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: Do you recall what your total revenue from operation was last year?

Mr. Forsyth: No, sir; I cannot. I know it is approxi-

810 mately gross about $35,000 to $36,000, I think.

Commissioner Harlan: And your expenses of operation?

Mr. Forsyth: About $30,000; I think that is right.

Commissioner Harlan: You had a slight net earning, then?

Mr. Forsyth: Yes.

Commissioner Harlan: But you have not paid it out in dividends?

Mr. Forsyth: It was used on extensions and betterments.

Commissioner Harlan: As I understand it, you rent no property from the Bradley Lumber Company?

Mr. Forsyth: No.

Commissioner Harlan: And have no revenues except—what do you charge the Bradley Lumber Company for the haul from the lumber camps to the mill at Warren?

Mr. Forsyth: We charge the Bradley Lumber Company—we have a back haul coming in and we charge them $6.00 a car, which is our regular published tariff.

Commissioner Harlan: Is that from the camp to the mill?

Mr. Forsyth: That is from the camp to the mill on all shipments made back to the Rock Island. That is shipments—there is no milling in transit arrangement on the Rock Island shipments. There is on the Iron Mountain shipments.

811 Commissioner Harlan: Let me see if I get the point. You haul the logs up to the junction with your line?

Mr. Forsyth: Yes.

Commissioner Harlan: At cost?

Mr. Forsyth: At cost; yes, sir.

Commissioner Harlan: That expense does not come into the $6.00 at all?

Mr. Forsyth: No.

Commissioner Harlan: Then from the junction of the logging line with your line, you haul the logs to the mill near to Warren?

Mr. Forsyth: Yes.

Commissioner Harlan: And then you haul the manufactured lumber back to Hermitage?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: And there deliver it to the Rock Island for $6.00 a car; is that it?

Mr. Forsyth: That is, we, of course, participate in the through rate on the finished product.

Commissioner Harlan: I am not sure that I understand it. You charge $6.00 a car from the junction of the logging line with your line up to the mill at Warren?

812 Mr. Forsyth: Yes.

Commissioner Harlan: That is a completed service by itself, is it?

Mr. Forsyth: Yes.

Commissioner Harlan: Then the manufactured lumber is billed out from that point as a new contract of transportation?

Mr. Forsyth: Yes.

Commissioner Harlan: And on that you get a division ranging from nothing at all to five cents?

Mr. Forsyth: No, one and one-half cents to five cents.

Commissioner Harlan: It is mostly five cents, is it not?

Mr. Forsyth: Yes.

Commissioner Harlan: If the manufactured lumber goes out over the Iron Mountain you bill the logs from the junction with the logging road?

Mr. Forsyth: Yes.

Commissioner Harlan: And it goes to the mill on the milling in transit rates?

Mr. Forsyth: Yes.

Commissioner Harlan: And then out to destination?

Mr. Forsyth: Yes.

Commissioner Harlan: And you get one and a half to

813 five cents on that?

Mr. Forsyth: Yes.

Commissioner Harlan: And that is mostly five cents?

Mr. Forsyth: Yes.

Commissioner Harlan: Which road takes the great bulk of your manufactured product?

Mr. Forsyth: Practically equally divided; it adjusts itself on the equipment furnished.

Commissioner Harlan: Is it not also adjusted under contract with the Rock Island, do you not guarantee them at least half?

Mr. Forsyth: That is the agreement, but it adjusts itself naturally anyway.

Commissioner Harlan: How many track men and train crews have you?

Mr. Forsyth: One section crew and then we have one crew in the woods that lay these spurs for the company at cost, and three train crews.

Commissioner Harlan: The section crew stays on the main line?

Mr. Forsyth: Altogether.

Commissioner Harlan: Then you have a crew in the woods
814 that lay the spurs for the lumber company?

Mr. Forsyth: Yes.

Commissioner Harlan: And they do that at cost?

Mr. Forsyth: Yes.

Commissioner Harlan: Then you have the regular train crews?

Mr. Forsyth: Yes.

Commissioner Harlan: How many men, 20 or 30?

Mr. Forsyth: Ten men in the train crews, I think, and then——

Commissioner Harlan: Do they load the logs on the cars?

Mr. Forsyth: No.

Commissioner Harlan: Do they participate in that at all?

Mr. Forsyth: No, they participate in the unloading.

Commissioner Harlan: In the unloading at the mill?

Mr. Forsyth: Into the pond; that is all.

Commissioner Harlan: The unloading is done by your people?

Mr. Forsyth: Yes; there is a pond man that is furnished by the lumber company and the brakemen help unload the logs.

Commissioner Harlan: Have you joint class and commodity rates generally?

Mr. Forsyth: Yes.

815 Commissioner Harlan: With both lines?

Mr. Forsyth: I think not with both lines.

Commissioner Harlan: Just with the Rock Island?

Mr. Forsyth: I think so.

Commissioner Harlan: Well, you said only about ten per cent of your traffic was outside of lumber.

Mr. Forsyth: Yes.

Commissioner Harlan: What sort of a town is Warren? I believe the record shows, still you might state how many people.

Mr. Forsyth: I should say, including the mills which are outside the limits, about in the neighborhood of 5,000 people.

Commissioner Harlan: And Hermitage had how many people?

Mr. Forsyth: Not to exceed 1,000.

Commissioner Harlan: That is a town that you built up, is it not?

Mr. Forsyth: Well, it was built up principally by the Rock Island and ourselves.

Examiner Burchmore: I have before me what purports to be a percentage issue No. 10, being a division sheet issued by the Rock Island Railway, containing divisions in effect with
816 the Warren, Johnsville & Saline River. Before I refer to that, may I ask, do you have any lumber shipments moving from points on your line to stations in Arkansas?

Mr. Forsyth: Yes, sir, we have.

Examiner Burchmore: This percentage sheet provides that on yellow pine lumber from points on the Warren, Johnsville & Saline River Railway to points in Arkansas and Louisiana, except junction points where through rates are published, the divisions to the Warren, Johnsville & Saline River are free, and the Chicago, Rock Island & Pacific and connections take the remainder. Does that mean that you receive no compensation for the haul of lumber from a point on your line that is consigned to a station in Arkansas or Louisiana?

Mr. Forsyth: That is a mistake. My understanding was that we participate in the state tariff, but that at no time should our percentage be over the sum of our local rates.

Examiner Burchmore: Then, similar to another company, as has appeared at this hearing, you receive your local rate on shipments consigned to Arkansas and Louisiana, and the Rock Island collects its junction rate.

Mr. Forsyth: Yes, sir.

Examiner Burchmore: This does not mean that you have a
817 free haul?

Mr. Forsyth: No.

Examiner Burchmore: There is filed with the Commission a copy of an agreement entered into on the 20th day of May, 1907, between the Rock Island, party of the first part, and the Warren, Johnsville & Saline River Railroad, party of the second part, and the Bradley Lumber Company, party of the third part. Are you familiar with the terms of that contract? It is a contract for divisions and traffic arrangements.

Mr. Forsyth: I could not say. Any questions I can answer I will, but I cannot say that I am very familiar with it.

Examiner Burchmore: I will call your attention to the following language in the second paragraph of that agreement as follows: "For the proper, economical and profitable conduct of its business, it requested the Warren Company to construct and operate said lines of railway." Does that language mean that this railroad was constructed for the proper, economical and profitable conduct of the business of the saw mill company; in other words, that it was constructed not as a common carrier primarily, but as a plant facility? Perhaps that is not a question for you to answer——

Mr. Forsyth: I would answer it in this way, that the rail-
818 road company could do the work cheaper than the lumber company, and that is the reason we made the contract for the spur work. I do not know anything about the main line work in that contract. That is not a question I could answer.

Mr. Gaughan: Would not that be asking the witness for the expression of an opinion?

Commissioner Harlan: Perhaps counsel can argue the case on the contract as it stands, without any questions.

Mr. Forsyth: I am not familiar enough with it anyway, because it was not drawn up by me, and I had no part in the contract.

Examiner Burchmore: Without asking any questions, I call your

attention to the terms of the contract dated September 9, 1908, between the Rock Island and the Warren, Johnsville & Saline River Railway Company and the Bradley Lumber *Lumber* Company seems not to be a party to that contract.

Mr. Forsyth: That is the trackage rights?

Examiner Burchmore: That is the trackage rights under which you operate the four or five miles over the Rock Island.

Mr. Forsyth: Yes.

819 Examiner Burchmore: The second paragraph of that contract reads in this way: "Whereas, the Rock Island Company owns and operates, as lessee, a certain line of railroad extending through Bradley County, Arkansas, and the Johnsville Company desires to obtain the right to operate trains over that portion of said road, hereinafter described, in order to facilitate the movement and handling of its logs from the forest to its mill at Warren, Arkansas, and the Rock Island Company is willing to grant such use"—referring to the logs in the mill as though the property of the Warren, Johnsville & Saline River Railway——

Commissioner Harlan: Did that railroad own any mill?

Mr. Forsyth: No, sir.

Examiner Burchmore: This contract provides as consideration the sum of 75 cents per train of 30 cars per mile. It further provides that if at any time it is so desired, the Rock Island will haul those cars at a rate of 35 cents per thousand feet instead of per train mile. Has that provision of the contract ever been taken advantage of?

Mr. Forsyth: No.

Examiner Burchmore: As a matter of fact, what has been the practice under the trackage rights? By that, I mean, has the War-

820 ren, Johnsville & Saline River Railroad hauled these logs from the forest on the Rock Island Railroad under the trackage rights?

Mr. Forsyth: Yes.

Examiner Burchmore: The lumber company has never gone down there?

Mr. Forsyth: No.

Mr. Gaughan: You mean there is but five miles of spur track in all, or do you mean there is that much of a main line, with spur track branching off from it?

Mr. Forsyth: There is that much of spurs and all.

Mr. Gaughan: Do you know how much track it will take to log the territory in which the timber of the Bradley Lumber Company is located?

Mr. Forsyth: Eventually?

Mr. Gaughan: Yes.

Mr. Forsyth: About 30 miles.

Mr. Gaughan: Please state whether or not your outside traffic for the railway company has increased or diminished since the construction of the road to Hermitage?

Mr. Forsyth: Increased.

Mr. Gaughan: State whether or not the country through which it is built is improving in an industrial way?

821 Mr. Forsyth: I cannot say it is an improvement in an industrial way; it has in an agricultural way.

Mr. Gaughan: Well, that is what that word covers. In an agricultural way, you say there are farms being opened up?

Mr. Forsyth: Yes.

Mr. Gaughan: This country was largely a wilderness, where your timber is located, before the timber was cut, was it not?

Mr. Forsyth: Practically altogether.

Mr. Gaughan: Are the lands fit for agricultural purposes?

Mr. Forsyth: A percentage of them, yes, sir.

Mr. Gaughan: Does the lumber company own much pine timber where it does not also own the land?

Mr. Forsyth: In the neighborhood of 15,000 acres.

Mr. Gaughan: On that land do you also own the hard wood?

Mr. Forsyth: No, sir; just the pine. In some cases we do, but in the large majority of cases we only own the pine timber on what we call timber deeds, where the deed is only for the timber, and not in fee simple.

Mr. Gaughan: In operating these logging tracks, do you permit the owners of the hard wood timber to get their timber out by means of your railroad?

822 Mr. Forsyth: Naturally.

Mr. Gaughan: Do you treat them all alike?

Mr. Forsyth: Everybody.

Mr. Gaughan: What, in the aggregate, will that tonnage amount to?

Mr. Forsyth: Per annum?

Mr. Gaughan: No, gross tonnage of the hard wood timber in that territory not owned by the Bradley Lumber Company?

Mr. Forsyth: That is a question that is too big for me to answer. I could not tell. Some hundreds of thousands of tons.

Mr. Gaughan: All I want to get in the record is a general idea of the amount of it.

Mr. Forsyth: Well, I should say there would be at least 10,000 cars, at least.

Mr. Gaughan: I may not have understood you in answer to the Commissioner's questions but this milling in transit——

Commissioner Harlan: Suppose you let me tell you that. There is no milling in transit on lumber that goes out over the Rock Island, but there is a milling in transit on that which goes out over the Iron Mountain. That is to say, the logs start on the

823 through rate at the junction of the logging road with this road, and they move to the mill and are there milled, and the manufactured lumber goes out on the transit rate.

Mr. Gaughan: The only point I did not catch was this, if the lumber company pays the railway company something for bringing those logs from Hermitage to the Bradley mill, and they are then milled on the through rate with the milling in transit privilege, should not that charge be refunded by the railway company to the lumber

company, and state whether or not that is done, as to lumber going out on the Iron Mountain.

Mr. Forsyth: No, we have an arrangement with the lumber company; we keep a record of all logging cars, and at the end of each month we proportion the shipments of lumber as they have actually been made with the proportion of the logs actually hauled, and so divide and make the charge on that basis.

Mr. Gaughan: As I understood it the way your testimony went in, you would be making a double charge.

Mr. Forsyth: No; that is the only way we could get at it.

Commissioner Harlan: How many car loads of logs make one car-load of lumber?

824 Mr. Forsyth: It varies from four to six; it depends on the class of timber we are handling. If small cars, they will take more, and if large, they will take less. I thought the feetage basis would be more accurate.

Mr. Gaughan: Did you make the contract yourself with the Rock Island?

Mr. Forsyth: No.

Mr. Gaughan: You do not know whether the matter referred to by the Examiner was simply clerical errors, or whether it was put in there intentionally?

Mr. Forsyth: I do not really know anything about that contract. It was made in the St. Louis office and not at Warren. It is evidently a clerical error.

Mr. Gaughan: That is all.

Commissioner Harlan: There is one question I omitted to ask you. Do you know anything about the lumber company called the Bernice Lumber Company?

Mr. Forsyth: I know of it, but I do not know anything about it; that is, I know of it. That is away out of that territory.

Commissioner Harlan: Do you know anything about the Lee Lumber Company?

Mr. Forsyth: I know of it; yes, sir.

825 Commissioner Harlan: What about the Brown Lumber Company?

Mr. Forsyth: I do not.

Commissioner Harlan: Have you ever heard of the Little River Lumber Company?

Mr. Forsyth: Yes, sir.

Commissioner Harlan: And the William Farrell Lumber Company?

Mr. Forsyth: William Farrell Lumber Company; yes, sir.

Commissioner Harlan: And the Gulf Lumber Company?

Mr. Forsyth: Yes.

Commissioner Harlan: And do you know something about the tap lines that are owned by those companies?

Mr. Forsyth: No, sir; I do not. The only place that I have been at on any one of these companies—I simply know of them. The only one is the Little Valley, and the Gulf Lumber Company. I have not been there for two or three years.

Commissioner Harlan: Have you ever heard of what is called the Colonial Railway, consisting of a number of tap lines?

Mr. Forsyth: No, sir; I have not heard of that.

Commissioner Harlan: Do you know who owns the Bradley Lumber Company?

Mr. Forsyth: Yes.

826 Commissioner Harlan: Who owns it?

Mr. Forsyth: The Chicago Lumber & Coal Company.

Commissioner Harlan: Does not that company own the Bernice Lumber Company?

Mr. Forsyth: I am not sure whether they do.

Commissioner Harlan: And the Lee Lumber Company and these others?

Mr. Forsyth: They are interested in the Lee Lumber Company, but the others, I do not know.

Commissioner Harlan: Are they interested to the extent of controlling it?

Mr. Forsyth: I do not know that they are.

Commissioner Harlan: Are you familiar with the affairs of the Chicago Lumber & Coal Company?

Mr. Forsyth: Not well enough to say that I am.

Commissioner Harlan: Are you an officer of that company?

Mr. Forsyth: No, sir; only of the Bradley Lumber Company.

Commissioner Harlan: The Bradley Lumber Company reports its transactions to that company?

Mr. Forsyth: Yes, sir.

Mr. Cowan: Does the Bradley Lumber Company own retail lumber yards?

827 Mr. Forsyth: No, sir.

Mr. Cowan: Is it not a fact that the interests which do own the Bradley Lumber Company do own a large number of yards in Kansas, about 80 lumber yards in Kansas?

Mr. Forsyth: How many?

Mr. Cowan: Eighty is the information I have; and two in Iowa and three in Nebraska.

Mr. Forsyth: I do not know the number of their yards at all. I know they own some; yes, sir.

Mr. Cowan: Where does your output go to, mainly?

Mr. Forsyth: All territories; we sell practically—I do not think five per cent of our output goes to the Chicago Lumber & Coal Company's yards.

Mr. Cowan: How does this division of the rate figure in the price of the lumber? Does it cut any figure in the price of lumber?

Mr. Forsyth: We figure on the tariff rates.

Mr. Cowan: The price of the lumber would not depend in any sense on whether this division was three cents per 100 pounds or five cents per 100 pounds; or would it?

Mr. Forsyth: No, sir; it would depend altogether on the published tariff rates.

828 Mr. Cowan: Do you know of any lumber manufacturers in your country which do not have a tap line of some sort,

which get a division of rates? Do you know of any which do not enjoy that privilege?

Mr. Forsyth: No.

Mr. Cowan: Are you pretty well acquainted with the situation in Arkansas and the lumber business in the yellow pine territory?

Mr. Forsyth: Fairly, I should say.

Mr. Cowan: In looking around over the country you keep your eyes open as to whether other people are getting an advantage over you?

Mr. Forsyth: Naturally I would.

Mr. Cowan: And it is your information that practically all these lumber manufacturers in that part of the country are getting somewhat similar divisions to what you do?

Mr. Forsyth: I presume so, although I have no knowledge of the actual divisions any one of them is getting.

Mr. Cowan: Do you know of any lumber mill which has a track connection from the main line and belonging to the main line, where the main line takes the lumber from the mill and
829 itself performs the service of the switching, we may call it, from the mill to the main line.

Mr. Forsyth: Oh, yes; quite a few, I think.

Mr. Cowan: In such cases, do the saw mills get a division of the rate?

Mr. Forsyth: I only know of three instances that I am well enough acquainted to say yes. I cannot say about any more.

Mr. Cowan: There is some sort of a scheme, though, whereby there is a division of the rate going to the tap line, we may call it, for the sake of not having a definite name.

Mr. Forsyth: Yes, sir, there is.

Mr. Cowan: When your lumber is billed out at Warren over the Iron Mountain, does your billing show that it originated at the junction point of the logging road with your line?

Mr. Forsyth: Yes.

Mr. Cowan: But there is no station at that junction point?

Mr. Forsyth: A small station, telephone connection.

Mr. Cowan: But nobody there to actually issue billing?

Mr. Forsyth: No.

Mr. Cowan: No lumber shipped from there?

Mr. Forsyth: Well, there are cars loaded there, but no billing actually done by an agent there; no, sir.

830 Mr. Cowan: What is the object of making the billing read from this junction point with the mill company's logging road?

Mr. Forsyth: Because it is a milling in transit transaction.

Mr. Cowan: Do you ever bill any lumber over the Iron Mountain, which shows the lumber to have originated at Warren or at your mill at Warren, as the point of origin?

Mr. Forsyth: No.

Mr. Cowan: It always shows as the point of origin the place where the logs come to your railroad?

Mr. Forsyth: Yes.

Mr. Cowan: Is there any more reason for having your billing for

Iron Mountain shipments show the point of origin at that place than there is to have your Rock Island shipments of lumber show the point of origin at that junction?

Mr. Forsyth: I think so or I would not have done it.

Mr. Cowan: What is that?

Mr. Forsyth: Because we do double the service.

Mr. Cowan: What is that?

Mr. Forsyth: It is not a continuous shipment on the Rock Island.

831 Mr. Cowan: It is just as continuous as it is in the case of the Iron Mountain.

Mr. Forsyth: No.

Mr. Cowan: In both cases do you not dump the logs into the pond and they saw them out of that?

Mr. Forsyth: Yes.

Mr. Cowan: In both cases when you load a car of lumber you send it to the line of the Iron Mountain or Rock Island?

Mr. Forsyth: Yes.

Mr. Cowan: So the continuity of the shipment is the same in actual service in one case as in the other, except the difference in the distance you move it?

Mr. Forsyth: That is a matter of opinion.

Mr. Cowan: How far do you move it in the case of the Iron Mountain shipments from the place where you load the car?

Mr. Forsyth: About in the neighborhood of a mile.

Mr. Cowan: That would not be worth five cents per 100 pounds itself, would it?

Mr. Forsyth: No, sir. We do not figure that we are charging five cents for that service.

Mr. Cowan: You figure you are charging five cents from where you got the logs?

832 Mr. Forsyth: Yes.

Mr. Cowan: In the case of the Rock Island, you figure the service from your mill over to the Rock Island is worth five cents?

Mr. Forsyth: For the 16 mile haul; yes, sir.

Mr. Cowan: And for that reason it is not worth while to bill the lumber from the junction of the logging road with your road?

Mr. Forsyth: Well, the railroad has to earn something.

Mr. Cowan: Is the office of the railroad company and the lumber company all one and the same thing?

Mr. Forsyth: They are in separate rooms in the same building; yes, sir.

Mr. Cowan: Are the officers of each the same persons, both in the employ of the lumber company and the railroad?

Mr. Forsyth: No, they have two men that are strictly altogether in the railroad company.

Mr. Cowan: And what do they do?

Mr. Forsyth: One is superintendent and one is an office man.

Mr. Cowan: That is the lumber company——

Mr. Forsyth: Who does the billing.

833 Mr. Cowan: Is that the lumber company or the railroad company?

Mr. Forsyth: The railroad company.

Mr. Cowan: They do not receive any salary and perform no work for the lumber company?

Mr. Forsyth: No.

Mr. Cowan: You come in competition with other manufacturers of lumber, of course, wherever you sell it, in all the markets?

Mr. Forsyth: Yes.

Mr. Cowan: You sell it on the basis of a mill price, plus the feright?

Mr. Forsyth: Yes.

Mr. Cowan: That is usual?

Mr. Forsyth: Yes.

Mr. J. J. Coleman: You speak about an arrangement for hauling logs for the lumber company. Is the arrangement you make mention of $6.00 a car, a somewhat recent one?

Mr. Forsyth: No, sir; it has been four to five years.

Mr. Coleman: Are you familiar with the testimony of Mr. Millard in the case of the Chicago Lumber & Coal Company against the Tioga & Southeastern, docket 1438?

834 Mr. Forsyth: No, sir; I am not.

Mr. J. J. Coleman: Do you consider that Mr. Millard was sufficiently familiar with the affairs of the railroad company and the lumber company to know what the arrangement was for hauling logs?

Mr. Forsyth: Well, I would not want to say. Mr. Millard has not been there ten times in his life.

Mr. J. J. Coleman: Well, there has been no new arrangement made?

Mr. Forsyth: I do not think there has, not in the last four or five years, not after we had incorporated. We did not incorporate until 1905, and prior to that we had other arrangements. As I have said, I want to leave all this data on record with the Commission to verify these things.

Commissioner Harlan: You have filed some exhibits already.

Mr. Forsyth: Yes, sir.

Commissioner Harlan: And you want those to be referred to as part of your testimony?

Mr. Forsyth: I want those to be referred to and to be authentic.

Commissioner Harlan: It will be so understood. Who is the president of your company?

835 Mr. Forsyth: S. H. Fullerton.

Commissioner Harlan: He is here?

Mr. Forsyth: Yes.

Commissioner Harlan: Mr. Fullerton, will you be good enough to be present on Monday as a witness?

Mr. Fullerton: Yes.

Commissioner Harlan: You will be understood as having been called by the Commission to testify on Monday. Are there any further questions to put to this witness?

Mr. Gaughan: Only this, to make a correction in the record. In answer to counsel's question, you said that you knew of no lumber

manufacturing plant in Arkansas to whom a division was not given. As a matter of fact, you do not know of any lumber companies to whom a division is given, do you?

Mr. Forsyth: I have not any knowledge of other people's business.

Mr. Gaughan: Well, whatever divisions you know of, are given to some railroad company, are they not?

Mr. Forsyth: I did not understand that question.

Mr. Gaughan: I say such divisions as you may know of, are given to some railroad company, are they not? They are not
836 given to a lumber company.

Mr. Forsyth: Yes.

Mr. Gaughan: Your division is not given to a lumber company, is it?

Mr. Forsyth: To some railroad company; yes, sir. I so understood the question.

Mr. Gaughan: That is what you had reference to?

Mr. Forsyth: Yes.

Commissioner Harlan: Gentlemen, I would like to know, as it may help out the whole situation, what tap lines connecting with the Cotton Belt are here, and also if the Kansas City Southern and the Frisco, for the convenience of those who are here, and with the prospect of not reaching certain cases until Tuesday, we thought possibly we might now announce that certain cases would not be called on Monday. We will reserve for calling the Rock Island and the Iron Mountain cases.

Mr. Thurmond: One of our lines which connects with the Rock Island also connects with the Southern Pacific.

Commissioner Harlan: Then that must be regarded as a Rock Island case.

Mr. Thurmond: In the Woodworth & Louisiana Central
837 and the Sibley, Lake Bisteneau & Southern, that is a proposition in connection with the Southern Pacific, and it would save a great deal of time if they were considered together.

Commissioner Harlan: The Louisiana Central is the only one which reaches the Rock Island?

Mr. Thurmond: Yes, which reaches the Rock Island, but a lot of general testimony will apply to all of them.

Commissioner Harlan: Then those cases may be reserved to be heard, not on Monday, but for call on Monday in connection with the other two, composing, what do you call it?

Mr. Thurmond: They call it the Shreveport, Alexandria & Southern System.

Mr. Sargent: The Kansas City Southern cases will not be taken up Monday?

Commissioner Harlan: Such cases as do not reach the Rock Island or Iron Mountain will not be taken up on Monday.

Mr. Mantooth: The Cotton Belt cases will not be taken up on Monday?

Commissioner Harlan: If they do not connect with the Rock Island. If counsel will wire on Monday in sufficient time, we may

be able to give some indication as to the cases to be heard
838 Tuesday. Understand, with the exception of the case just referred to that is reserved in connection with the system, we want all the Rock Island and Iron Mountain cases on Monday. We will now adjourn until Monday morning at 9:30 A. M.

(At the request of counsel Commissioner Harlan then proceeded with the hearing of the Dorcheat Valley Railroad Company.)

839 *Dorcheat Valley Railroad Company.*

E. E. PORTER was called as a witness and having been duly sworn, testified as follows:

Commissioner Harlan: Where do you live?
Mr. Porter: Texarkana, Arkansas.
Commissioner Harlan: What is your business?
Mr. Porter: Lumber and railroad.
Commissioner Harlan: What railroad are you connected with?
Mr. Porter: The Dorcheat Valley Railroad.
Commissioner Harlan: How long have you been connected or associated with that road?
Mr. Porter: Since its organization.
Commissioner Harlan: When was that?
Mr. Porter: I believe part of the road was built in 1905; it was incorporated in 1906, January, 1906.
Commissioner Harlan: Let us go back to the termini of the road. What was its first terminus; from what point was it built?
Mr. Porter: Cotton Valley, Arkansas, on the L. & A.
Commissioner Harlan: By whom was it built?
840 Mr. Porter: The Porter-Wadley Lumber Company.
Commissioner Harlan: What was the extent of the mileage first constructed?
Mr. Porter: Three or four miles.
Commissioner Harlan: Into forests owned by that lumber company?
Mr. Porter: Yes, sir.
Commissioner Harlan: And do you remember when those four miles were completed?
Mr. Porter: In the latter part of 1905; something along there; early in 1906, the road was incorporated in 1906.
Commissioner Harlan: What was the extent of the forests owned by the lumber company at that time?
Mr. Porter: The extent of the forest near the mill was small.
Commissioner Harlan: What was the acreage?
Mr. Porter: The acreage was probably two or three thousand acres near the mill and across the large bayou that is in that territory we owned at that time probably ten or fifteen thousand acres of land and timber rights, across this large bayou.
Commissioner Harlan: What was your connection?
841 Mr. Porter: With the Louisiana & Arkansas Railroad.
Commissioner Harlan: At Cotton Valley?

Mr. Porter: Yes, sir; near Cotton Valley.

Commissioner Harlan: How close was your mill to the line of that road?

Mr. Porter: It is about a quarter of a mile from the L. & A.

Commissioner Harlan: What allowance did you get at that time?

Mr. Porter: Nothing.

Commissioner Harlan: Did you have any equipment?

Mr. Porter: Only logging equipment.

Commissioner Harlan: It was just a logging road at that time?

Mr. Porter: Yes, sir.

Commissioner Harlan: You got no allowance whatever?

Mr. Porter: No. We went in there with the understanding that we would get no division on the timber between this Big Creek and the Louisiana & Arkansas Railroad. It is near to the railroad, and the railroad considered that that was its own tonnage. And, when we built across this creek, which is a long creek on which we
842 have over a 4,000 foot bridge, we were to have a division on the tonnage beyond that creek.

Commissioner Harlan: What is the name of that creek?

Mr. Porter: Dorcheat.

Commissioner Harlan: When did you build the latter part?

Mr. Porter: We built across it about Christmas, 1905.

Commissioner Harlan: How many miles did you build in order to cross the creek?

Mr. Porter: To the first station beyond the creek it is six miles from Cotton Valley.

Commissioner Harlan: 4,000 feet of that is a bridge?

Mr. Porter: Yes, sir; about 4,200 feet.

Commissioner Harlan: What kind of a bridge?

Mr. Porter: About 125 feet is a piling bridge; piling 40 feet long; and the balance is a bench built up with timber.

Commissioner Harlan: Did you make any extension after you got across the creek?

Mr. Porter: Yes, sir; we built eight or ten miles to the east, and cut out that territory. Now we are logging to the south; we went on east eight or ten miles and to the south ten or twelve miles, and are cutting out that territory, and later we go north ten or
843 twelve miles from this Gleason. We extend out in every direction.

Commissioner Harlan: These extensions were built by the logging company?

Mr. Porter: We built out four or five miles before that road was incorporated, and logged this timber which was near the mill, on which we were to have no division.

Commissioner Harlan: You built that out before you built the two extensions across the creek?

Mr. Porter: Yes, we have built everything since.

Commissioner Harlan: The Railroad Company has built everything since?

Mr. Porter: Yes.

Commissioner Harlan: Did the railroad company build across the creek?

Mr. Porter: Yes, sir, we incorporated about the time we were going across the creek.

Commissioner Harlan: What is the capital of the railroad company?

Mr. Porter: $75,000.

Commissioner Harlan: Was there any cash paid in?

Mr. Porter: Yes, sir; it was all paid in.

Commissioner Harlan: By the owners of the lumber company?

844 Mr. Porter: By the stockholders.

Commissioner Harlan: The railroad company is owned by the stockholders of the lumber company?

Mr. Porter: Not altogther; there are a few stockholders in the railroad, minor interests.

Commissioner Harlan: But it is practically identical interests?

Mr. Porter: Yes, sir; only the stock was issued to the individual stockholders and was paid for by them by check.

Commissioner Harlan: After the railroad was incorporated and these two extensions were built, did you have any improvement in your roadbed?

Mr. Porter: Yes, sir; we improved our roadbed.

Commissioner Harlan: What sort of rail have you?

Mr. Porter: 35 pound rail; 3,000 oak ties, forming a good logging railroad.

Commissioner Harlan: You would call it more of a logging railroad than a railroad?

Mr. Porter: It is a typical so-called tap line, logging railroad.

Commissioner Harlan: Is it ballasted?

Mr. Porter: With sand ballast.

845 Commissioner Harlan: What equipment have you now?

Mr. Porter: Five locomotives and about 60 logging cars.

Commissioner Harlan: And the entire expense was what?

Mr. Porter: Of building the railroad?

Commissioner Harlan: Yes.

Mr. Porter: About $120,000; in that neighborhood.

Commissioner Harlan: That included the equipment?

Mr. Porter: Yes, sir.

Commissioner Harlan: And your entire mileage at this time is what?

Mr. Porter: We have in operation, I should say, about 14 or 15 miles, 15 or 16 miles. Beyond Gleason those tracks are moved a good deal.

Commissioner Harlan: Do they belong to the railroad company?

Mr. Porter: Everything belongs to the railroad company.

Commissioner Harlan: The lumber company has no track at all?

Mr. Porter: The lumber company has no equipment or anything.

Commissioner Harlan: You are organized under the general law of Arkansas as a common carrier?

846 Mr. Porter: Well, it takes six incorporators, and there are a few other stockholders who own small interests.

Commissioner Harlan: Do you reach any other regular lines?

Mr. Porter: No.

Commissioner Harlan: When you built out in this country, was it a swampy forest country?

Mr. Porter: No; it is broken country; there are big creeks through it, and it is broken with farms.

Commissioner Harlan: It was an unsettled forest country?

Mr. Porter: There are a good many farms through it.

Commissioner Harlan: I mean when you built out.

Mr. Porter: There were a good many farms then.

Commissioner Harlan: It has rapidly increased in population?

Mr. Porter: No, it is increasing some. We are selling some of our cut over land, but it was a good farming country.

Commissioner Harlan: Do you own the lands in fee?

Mr. Porter: About half or one-third.

Commissioner Harlan: And the rest you have stumpage rights?

Mr. Porter: Yes, sir; about one-third we own.

Commissioner Harlan: Does the railroad own its right of way?

847 Mr. Porter: Yes, sir; we made a deed to the railroad, and it is put on record.

Commissioner Harlan: When it moves these branches, does it acquire the right of way?

Mr. Porter: No, sir. Beyond this station the Porter-Wadley Lumber Company furnishes the right of way.

Commissioner Harlan: What station do you refer to?

Mr. Porter: Gleason; that is the end of what we call the main line. The Porter-Wadley Company furnish the right of way for the tracks beyond that.

Commissioner Harlan: You mean furnish it temporarily?

Mr. Porter: Yes, sir.

Commissioner Harlan: When you move these extensions, the railroad company has no longer any rights?

Mr. Porter: No.

Commissioner Harlan: Is there any written contract under which those rights of way are furnished by the lumber company to the railroad company?

Mr. Porter: Yes.

Commissioner Harlan: Have you filed that?

Mr. Porter: I do not know whether it is filed with the Com-

848 mission or not.

Commissioner Harlan: Is it one general contract?

Mr. Porter: Yes.

Commissioner Harlan: Will you send us a copy of that?

Mr. Porter: Yes, sir. You have a copy of our contract with the L. & A.

Commissioner Harlan: Yes. Now, when did you first commence to get divisions with the L. & A.?

Mr. Porter: After we commenced to operate beyond this creek and to haul the timber in from beyond this bayou.

Commissioner Harlan: What division were you then allowed?

Mr. Porter: Our division varies. We are allowed from three to

four cents and perhaps four and a half cents in some cases: it averages about three and a half cents. That was the contract of the L. & A.

Commissioner Harlan: That contract we have?

Mr. Porter: Yes, sir, you had it two or three times, and we furnished it to your inspector who was around examining our books a year or two ago.

Commissioner Harlan: It seems to be here. Do these divisions appear on regular division sheets?

Mr. Porter: Oh, yes.

849 Commissioner Harlan: You have copies of the originals?

Mr. Porter: Yes, sir. I haven't them here; they are issued by the Louisiana & Arkansas. You have copies, I presume.

Commissioner Harlan: We seem to have them. Do they indicate divisions on manufactured lumber only?

Mr. Porter: Yes, sir, I think so.

Commissioner Harlan: Do you have divisions on class rates?

Mr. Porter: No, sir; there are no through shipments.

Commissioner Harlan. You do not move any general merchandise?

Mr. Porter: We move some, but it is all local from Cotton Valley practically.

Commissioner Harlan: Is Cotton Valley quite a point?

Mr. Porter: It is quite a little point; there are six or eight stores there. But there are some fertilizer and other things which move in from points on the Vicksburg, Shreveport & Pacific, those are Louisiana rates.

Commissioner Harlan: You have not filed any of those?

Mr. Porter: No.

Commissioner Harlan: Have you filed any tariffs with the Commission?

850 Mr. Porter: Yes.

Commissioner Harlan: You have filed concurrences?

Mr. Porter: No, we have filed tariffs.

Commissioner Harlan: Just these local tariffs?

Mr. Porter: Yes.

Commissioner Harlan: Then practically all your tonnage except a little general merchandise and some fertilizer from Louisiana points is outbound lumber?

Mr. Porter: No, sir; we have a stave mill and handle factory on our road.

Commissioner Harlan: Where are they?

Mr. Porter: The stave mills near Cotton Valley and the handle factory is eight or nine miles in the woods.

Commissioner Harlan: How near is the stave factory to your line?

Mr. Porter: It is on it.

Commissioner Harlan: How near to Cotton Valley?

Mr. Porter: Between a quarter and half a mile from the L. & A.

Commissioner Harlan: When was it built?

Mr. Porter: A year and a half after our road was incorporated.

851 Commissioner Harlan: It uses hard wood?

Mr. Porter: Yes.

Commissioner Harlan: Gets it from your company?

Mr. Porter: Yes, but it gets it practically all from the Porter-Wadley Lumber Company. It did buy some other, but our tonnage on staves last year was 4,100 tons.

Commissioner Harlan: Then you mentioned another mill farther out.

Mr. Porter: It is a handle factory.

Commissioner Harlan: And it gets its lumber from your forest?

Mr. Porter: Not all of it. I think they get some of it from us.

Commissioner Harlan: The greater part of it?

Mr. Porter: The greater part of it.

Commissioner Harlan: Do they cut it or do you cut it and deliver it to them?

Mr. Porter: They cut it.

Commissioner Harlan: How does it get to their mill?

Mr. Porter: They haul it in wagons and ship their product on our line.

Commissioner Harlan: And what division do you get on

852 the through rate on staves and handles?

Mr. Porter: That is handled on a combination of locals to Cotton Valley, and then they local it out. They pay us our local to Cotton Valley.

Commissioner Harlan: Do you recall what that is?

Mr. Porter: No. There is a tariff here.

Commissioner Harlan: Is a carload of handles worth more than a carload of lumber?

Mr. Porter: Yes, sir.

Commissioner Harlan: How much more?

Mr. Porter: I don't know, a carload of handles is worth $400 or $500, I think.

Commissioner Harlan: Well, a carload of lumber might be worth $400 or $500?

Mr. Porter: Yes, but not the average. The average is $150 to $175.

Mr. Wadley: $240 for manufactured lumber.

Commissioner Harlan: A carload of handles is worth how much?

Mr. Wadley: $500 or $600.

Mr. Porter: We handled 5,100 tons of staves.

Commissioner Harlan: How much of handles?

853 Mr. Porter: I do not know.

Commissioner Harlan: Do you know what the local rates are from the handle mill, from the local point to Cotton Valley?

Mr. Porter: I presume it takes the class rate.

Mr. Wadley: It is $12.00 a car.

Commissioner Harlan: Well, we have it in the tariff, and will find it. Now, have you any source of income—I am speaking of the railroad company—except your divisions of your lumber rates,

and the divisions on your staves and handles and your local rates on general merchandise and fertilizer?

Mr. Porter: We have some revenue on logs up to this junction point, this station where we spread out in different directions.

Commissioner Harlan: Just tell us about that.

Mr. Porter: We have a tariff filed under the authority of the Louisiana Commission. Have you a copy of that tariff? Locally to this station it is $1.25 a thousand.

Commissioner Harlan: That is a charge under the local tariff that you make against the lumber company?

Mr. Porter: Yes, sir, up to this point.

854 Commissioner Harlan: For hauling its logs from the forest up to what point?

Mr. Porter: Gleason; that is the end of the permanent line.

Commissioner Harlan: That is the end of the permanent line?

Mr. Porter: Yes.

Commissioner Harlan: Now, then, how does the lumber company get its logs from Gleason to its mill near Cotton Valley?

Mr. Porter: The railroad company hauls them in, and we have milling in transit tariffs published or concurred in, with the Commission.

Commissioner Harlan: And that milling in transit rate to St. Louis, for instance, is what?

Mr. Porter: Eighteen cents, the same as on the L. & A.

Commissioner Harlan: Out of that you get what?

Mr. Porter: I think about three or three and a half cents. We do not pay much attention to that. We leave that to the L. & A. to give the division agreed on.

Commissioner Harlan: How many carloads of logs do you take in to make a carload of lumber out?

Mr. Porter: In our case, I heard a gentleman say five or six. Ours, it would take seven or eight; sometimes nine, because

855 we handle short logs; we handle about 2,500 feet on a car of logs, and a car of lumber will average 18,000 or 19,000 feet; seven or eight cars, sometimes a little more.

Commissioner Harlan: What was your total tonnage last year?

Mr. Porter: The way we have made the report to the Louisiana Commission, it shows up our total tonnage as 147,000 tons, but that includes the lumber, 29,000 tons, which we really do not handle, but we get revenue on the milling in transit.

Commissioner Harlan: Just explain that a little more clearly.

Mr. Porter: Our total tonnage handled is 157,000 tons, as shown in the report, but 29,000 of that was lumber that we really did not handle, it was loaded on the tracks of the L. & A., but on which we get our milling in transit revenue.

Commissioner Harlan: That milling in transit revenue, do you mean you get a division of the joint through rate?

Mr. Porter: Yes.

Commissioner Harlan: Where is the mill with reference to the L. & A.?

Mr. Porter: About a quarter of a mile from it; the saw
856 mill; the planing mill is nearer the L. & A. tracks.

Commissioner Harlan: The logs go into the sawmill?

Mr. Porter: Yes.

Commissioner Harlan: Do they go over to the planing mill?

Mr. Porter: Yes, sir; the lumber is manufactured in the saw mill and then goes into the yard and then to the planing mill and then to the L. & A. tracks.

Commissioner Harlan: Then it is dressed lumber?

Mr. Porter: Yes, sir. We occasionally ship some rough, but it is generally planed and loaded on the L. & A.

Commissioner Harlan: How do you get it from the saw mill to the planing mill?

Mr. Porter: It is trucked into the yard to dry, and then into the planing mill.

Commissioner Harlan: What is the distance between the two mills?

Mr. Porter: About 1,000 to 1,100 feet.

Commissioner Harlan: And that is carried over there by horses?

Mr. Porter: Yes, sir.

Commissioner Harlan: And then it is planed or dressed and loaded directly into the L. & A. car from the planing mill?

857 Mr. Porter: Yes.

Commissioner Harlan: Then in your milling rate there is a partial movement of the lumber by truck?

Mr. Porter: Yes, sir.

Commissioner Harlan: You do not take it to the sawmill and load it from the saw mill, but truck it between the two mills?

Mr. Porter: Yes, sir.

Commissioner Harlan: In case the rough lumber goes out, where is it loaded?

Mr. Porter: It is trucked the same way; we have no loading track at the saw mill. We ship very little rough lumber.

Commissioner Harlan: You have been here during the day?

Mr. Porter: Yes, sir.

Commissioner Harlan: You have heard the testimony of others?

Mr. Porter: Yes, sir.

Commissioner Harlan: Is it usual to have a saw mill and a planing mill?

Mr. Porter: Yes, sir.

Commissioner Harlan: Most of this lumber that goes out is dressed lumber?

858 Mr. Porter: Yes, sir. I do not know of a saw mill anywhere, except these little portable mills, that do not have a planing mill.

Commissioner Harlan: And there is usually some distance between the saw mill and the planing mill?

Mr. Porter: Yes, sir; it is bound to be, because the drying yard is usually located between the two for convenience; the lumber would go right out the back end of the saw mill to the yard to dry and then into the planing mill, and is loaded right onto the track.

Commissioner Harlan: You file reports with the Commission?

Mr. Porter: They have never asked us; that is, for annual reports, but for a few accident reports, and inspectors have been around to look at our equipment.

Commissioner Harlan: You file reports with the State Commission?

Mr. Porter: Yes, sir. This is our report (indicating).

Commissioner Harlan: What was your total revenue last year?

Mr. Porter: $53,375.42.

Commissioner Harlan: What was your expense account?

Mr. Porter: $48,680.89.

859 Commissioner Harlan: Did you have an item in your expense account for maintenance of way?

Mr. Porter: Yes.

Commissioner Harlan: And what was that amount?

Mr. Porter: Maintenance of way is $21,069.18.

Commissioner Harlan: Is not that pretty large?

Mr. Porter: Yes, sir; we operate in a very bad country; it takes care of these spurs.

Commissioner Harlan: Does it build the spurs?

Mr. Porter: It lays the steel; yes, sir.

Commissioner Harlan: It does all the work, does it not?

Mr. Porter: It does practically all the work; yes, sir.

Commissioner Harlan: Moving the spurs?

Mr. Porter: Yes, sir; and we operate in very rough country.

Commissioner Harlan: Does it do the grading?

Mr. Porter: Whatever is necessary; we do not do much grading on spurs.

Commissioner Harlan: That is to say, if a spur track is taken up and moved to another place, and you have to do a little grading to take the ties and rails, and all that, that goes into maintenance of way?

860 Mr. Porter: Yes.

Commissioner Harlan: What was your maintenance of equipment last year?

Mr. Porter: $8,140.13.

Commissioner Harlan: What is the total value of your equipment?

Mr. Porter: $38,051.88. The maintenance of logging equipment is very heavy, especially in rough country, and we have a very heavy, rough, hilly country.

Commissioner Harlan: Does the railroad have about the same officers that the lumber company has?

Mr. Porter: Well, the lumber company is a partnership.

Commissioner Harlan: Well, do the officers of the railroad receive salaries?

Mr. Porter: No, sir; not the president and secretary and treasurer.

Commissioner Harlan: The clerk is paid by the railroad; you have one clerk?

Mr. Porter: We have two or three who are paid by the railroad, but they are all joint employees with the lumber company.

Commissioner Harlan: They are paid by the railroad, but
861 do some work for the lumber company?

Mr. Porter: They are paid part by the railroad and part by the lumber company.

Commissioner Harlan: You have train crews?

Mr. Porter: Yes.

Commissioner Harlan: How many men?

Mr. Porter: Sometimes we operate four, and sometimes five engines.

Commissioner Harlan: Generally speaking.

Mr. Porter: Generally speaking, it will take from eight to 15.

Commissioner Harlan: Your train crews and the track crews will constitute 40 to 50 men?

Mr. Porter: Forty to 50 or 60 men.

Commissioner Harlan: Do they load the logs on the cars?

Mr. Porter: No.

Commissioner Harlan: Who does that?

Mr. Porter: The lumber company.

Commissioner Harlan: With different men?

Mr. Porter: Yes, sir.

Commissioner Harlan: But you unload them at the pond?

Mr. Porter: Some of the lumber men that work on the
862 pond assist in unloading.

Commissioner Harlan: Who does the trucking of the rough lumber over to the planing mill?

Mr. Porter: The lumber company.

Commissioner Harlan: Of course the lumber company loads the dressed lumber into the cars?

Mr. Porter: Yes.

Mr. Gutheim: The division that you get as a general rule is exactly one-half the division that accrues to the L. & A.?

Mr. Porter: That was the trade we made with the L. & A. that we were to get one-half of the division they received on the lumber. They do not always make it just that, but they try to average it up. They have for some reason sometimes given us less, and sometimes more.

Mr. Gutheim: Is it your understanding that the rate authorized by the Louisiana Commission of $1.25 per 1,000 feet log scale from the logs on the stations on the branch or spur track is to cover also the spur work, construction spur work?

Mr. Porter: Yes, sir, it is to cover the railroad work up to Gleason.

Mr. Gutheim: The railroad company gets no compensa-
863 tion from the lumber company for constructing those spur tracks and so forth except the $1.25?

Mr. Porter: No.

Commissioner Harlan: Let me ask in a general way if the lumber rate itself were reduced, how would it hurt you to cut out these divisions?

Mr. Porter: I do not know as it would hurt us at all, if it was reduced as much as our division.

Commissioner Harlan: Well, for the purpose of illustration, suppose you get an average division on all your shipments, say, of three cents.

Mr. Porter: We are supposed to get an average of three and a half cents.

Commissioner Harlan: Well, we will say three cents. Suppose the general lumber rate were reduced three cents and extended to Cotton Valley, where your mill is.

Mr. Porter: Well, I probably did not explain myself a minute ago. If the lumber rate to all territory was reduced, it would hurt us just that much.

Commissioner Harlan: Suppose there is a blanket rate. You have now a blanket rate.

Mr. Porter: It would hurt us the amount of that division.

864 I first understood you to mean if it was reduced to certain territory, down to and including us.

Commissioner Harlan: No. I say without disturbing the present relation of rates, which is more or less blanket.

Mr. Porter: Yes, sir, it would hurt us three and a half cents.

Commissioner Harlan: And that blanket rates were reduced and then extended to all these junctions, how would that hurt you three and a half cents?

Mr. Porter: We would still have to compete with the other man who had the same advantage.

Commissioner Harlan: No, but I am supposing a case now where all divisions would be cut out and the blanket rate is extended to all junctions of tap lines with regular lines.

Mr. Porter: Including the whole territory down to Houston and everywhere?

Commissioner Harlan: All the territory that now has the blanket rate.

Mr. Porter: Well, I could not say just how that would affect us.

Commissioner Harlan: It would be rather difficult to find out how it is going to hurt you.

865 Mr. Porter: Sir?

Commissioner Harlan: You would find it difficult to explain how it would hurt you. Let me illustrate. We will not take your mill, but take a mill down in southern Louisiana. There is a 24 cent rate to Kansas City, and that rate really goes right back to the tree, if there is a milling in transit privilege. Now, suppose the rate is cut down to Kansas City and extended to the junction of the tap lines with the regular lines, instead of back to the forest, and all the milling in transit division is left out. Now you are competing with me, and we both have mills down there. Would not that leave us in precisely the same equality?

Mr. Porter: If we were all in the same position it would, but we have to compete against other mills and other territory.

Commissioner Harlan: I am assuming their divisions would be cut out also.

Mr. Porter: Do you mean the Pacific Coast, the territory we meet them in, or the white pine?

Commissioner Harlan: I do not think there are any such divisions over there as you have here.

Mr. Porter: I know, but we would have to meet them, and
866 the white pine and the Pacific Coast and the stuff in the North.

Commissioner Harlan: Any reduction in the rate would help to do that, would it not if the rate was reduced?

Mr. Porter: If the general rate was reduced, if their rate is reduced too?

Commissioner Harlan: If their rate is left where it is it would be to your advantage, if your rate was lower?

Mr. Porter: Yes, sir. Now, then, take some other roads in south Texas that have advantages which we have not.

Commissioner Harlan: What advantages?

Mr. Porter: Well, in some cases some of the Texas mills have sold their tap lines and some have loaned money at a lower rate, and they have advantages we have not.

Commissioner Harlan: And have their capital invested otherwise, the money they receive for the tap line?

Mr. Porter: Yes.

Commissioner Harlan: They have otherwise invested?

Mr. Porter: Yes, sir. May I explain a minute? When we went into this territory to look at this timber, it had been looked at by five or six different lumber men, and they had all turned it down
867 and said the country was too broken, too many big creeks, too many farms and the timber was too scattered to justify the putting of a railroad into it to mill it, and Mr. Buchanan had sent two or three of his own people into it, and they had turned it down——

Mr. Wadley: Mr. Buchanan went himself.

Mr. Porter: Well, I did not know he went, but two or three went in and they turned it down. The man whom I had been associated with in the mill business before owned about 10,000 or 12,000 acres in this territory, and he wanted to organize a corporation in which he would be interested to operate the territory, and Mr. Wadley and I looked at the timber and decided we could not afford to do it unless we could get help from the railroad. We went to Mr. Buchanan and told him if he would build us a spur ten miles long from Cotton Valley into this timber and turn it over to us to operate we would go for the timber. That has been done, and he had done it in other cases, and it has been done by other railroads. He said that he would prefer to give us a division and if we would go after this tonnage in this territory he would divide the L. & A. revenue with us. He preferred to do that rather than build the spur, because he was of the opinion there was not enough
868 timber in the territory, and it was so expensive it would not pay, and he made the agreement and the contract was made later, before we invested a dollar in the timber.

Mr. McRae: The contract was written before you built across the creek?

Mr. Porter: About the time; yes, sir. I do not remember what the date of that contract was. About 1906.

Mr. Wadley: Is it not a fact that the agreement was made before we invested.

Mr. Porter: Yes, sir. Here is a letter by Mr. Buchanan saying the contract would be made.

Mr. Wadley: Let me state in regard to the question you asked a moment ago, about what effect it would have on our proposition if the divisions were cut off and the rates were lowered, say to the extent of three and a half cents, the blanket rates. It would have this effect, that our proposition is so much more difficult than the average mill that we would be at a big handicap, because we cannot log this plant——

Commissioner Harlan: You can only do so much with what you have.

Mr. Wadley: Yes.

869 Commissioner Harlan: Now, if that rate is reduced by the amount of your allowance——

Mr. Wadley: And every other one is reduced, we are handicapped in that we would not have made this investment on an equal footing with the others. We do not have the benefit of the division, our position is so much more expensive.

Mr. Porter: We would not be at any disadvantage with anybody that has three and a half cents.

Commissioner Harlan: I am assuming all conditions equal, and that your division will be cut out, and I am saying supposing the rate would be reduced to the extent of your division, how would it affect you adversely?

Mr. Porter: It would not affect us adversely as compared with a man who had as much division as we have, unless other lumber rates were reduced to the Pacific Coast and the white pine forest, and other rates.

Mr. McRea: And it is not true that on the Pacific Coast and in the Norway district the rates have been adjusted on some other basis than that of divisions.

Mr. Porter: I do not know about that. I think so.

Commissioner Harlan: I will just read in the evidence, per-

870 haps it might be here, this letter of Mr. Buchanan. It is on the letterhead of the Louisiana & Arkansas Railway Company, dated Texarkana, Arkansas, August 13, 1904, addressed to Mr. E. E. Porter, Texarkana, Arkansas. It reads as follows:

"DEAR SIR: I hereby agree to cause the L. & A. Railway to enter into an agreement and contract to divide equally all revenue received from the lumber manufactured from logs originating on the railroad to be incorporated by you and others, and to be built from or near Cotton Valley across Dorcheat. Contract will be made when your company is incorporated.

Yours truly,

WILLIAM BUCHANAN,"
President and General Manager."

—. Dorcheat is the creek?

Mr. Porter: Yes, sir.

Commissioner Harlan: And that was attached to your original copy of the agreement subsequently executed by your railroad?

Mr. Porter: Yes, sir.

Commissioner Harlan: The Dorcheat Valley Railroad and
871 the Louisiana & Arkansas Railway Company.

Mr. Porter: In line with that letter.

Mr. McRae: And the copy of the contract which you attached to your complaint is a true copy of that?

Mr. Porter: Yes, sir.

Mr. McRae: The road is assessed for taxes by the Board in the same manner as the main line roads in Louisiana?

Mr. Porter: Yes, sir; we pay taxes on the equipment.

Mr. McRae: And you comply with all the regulations of the Louisiana Commission?

Mr. Porter: Yes.

Mr. McRae: And such of the regulations of the Interstate Commerce Commission as you have been requested to?

Mr. Porter: Yes.

Mr. McRae: When transporting the lumber you speak of or that his Honor asked you about, the carriage of the green lumber from the saw mill to the planer, do you not first carry it to the kiln in trucks?

Mr. Porter: Some of it, and it passes through the kilns into the yard, some of it to the planer.

Mr. McRae: And is, in fact, handled twice after it is unloaded from the logging cars?

872 Mr. Porter: Yes.

Mr. McRae: You keep the books of your railroad company separate from those of your lumber company?

Mr. Porter: Separate books and separate bank account.

Mr. McRae: Do you pay per diem and charge demurrage?

Mr. Porter: Yes, sir; it is provided for in our regular tariff.

Mr. McRea: Would you have built this road but for this agreement, across the Dorcheat?

Mr. Porter: No, sir.

Mr. McRae: You could not have afforded it?

Mr. Porter: We would not have gone in the face of more experienced men, men with more money.

Mr. McRae: Did you cut all your timber, or have you left some of it?

Mr. Porter: We left some timber this summer. Our timber man told us there was a tract of about 10,000,000 to 15,000,000 feet a mile or so beyond the end of one of our spurs, but the country was so rough we could not afford to go after it, even with the division.

Mr. McRae: Have you stated what your net earnings were from the operation of this road?

873 Mr. Porter: Yes, sir, I have stated them. I think our logging operations—this operation cost us $5.00 per thousand. We have been in a very rough country, and we probably lost money on some of that territory, and that is the reason we came out

and left some of this territory which was a mile or so from the end of the spur. We were in such a rough place it took two Shay engines to haul three logging cars out over the hill.

Mr. McRae. I do not know that I quite understand you about the right of way. Mr. Wadley made a suggestion. I understood you to say that the railroad company owned the right of way that you had acquired.

Mr. Porter: It does to Gleason, and there is a deed on record in Minden, at the Parish seat.

Mr. McRae: A logging spur is simply a permit to go over and it is taken up and there is no deed, and you give them the right to go over this land, and if it is necessary to go over private property you acquire that?

Mr. Porter: Yes, sir.

Mr. Wadley: You mentioned there that the lumber company furnished all the right of way.

Mr. Porter: No.

874 Commissioner Harlan: Only for the movable tracks.

Mr. Porter: The lumber company of course furnished all the right of way beyond Gleason.

Commissioner Harlan: But the railroad company owns all the right of way to Gleason?

Mr. Porter: The lumber company buys that and pays for it under contract.

Commissioner Harlan: You said the lumber company had turned into a partnership.

Mr. Porter: Yes.

Commissioner Harlan: What is that partnership?

Mr. Porter: Porter, Wadley & Company.

Commissioner Harlan: Was the lumber company incorporated originally?

Mr. Porter: Yes, sir; it is still in existence, but owns timber only.

Commissioner Harlan: What is the relation of Porter, Wadley & Company to the lumber company? Are they lessees?

Mr. Porter: No, sir; Porter, Wadley & Company purchase timber from the Porter-Wadley Lumber Company.

Commissioner Harlan: The timber, but not the fee title?

Mr. Porter: No, sir, just the stumpage.

875 Commissioner Harlan: The incorporated company owns the fee title to about 35,000 acres?

Mr. Porter: No, sir; we now have about 22,000 acres; that is in fee and timber rights together.

Commissioner Harlan: Now, Porter, Wadley & Company have acquired the timber rights on the acres that you own in fee?

Mr. Porter: They buy timber from month to month and pay for it as they get it out.

Commissioner Harlan: The lumber company is simply a company that owns it?

Mr. Porter: Yes.

Commissioner Harlan: And it is not operated?

Mr. Porter: No.

Commissioner Harlan: The partnership is operated?

Mr. Porter: Yes.

Commissioner Harlan: The partnership owns the saw mill and planer?

Mr. Porter: Yes, sir; everything.

Commissioner Harlan: Does the partnership own the railroad?

Mr. Porter: No, the stockholders own the railroad, and there are several individuals who are not stockholders in
876 the lumber company. It requires six incorporators in Louisiana, and there are not that many members of the Porter-Wadley Company.

Mr. McRea: But E. E. Porter and Mr. Wadley are the principal stockholders in the railroad company?

Mr. Porter: Yes, sir, we are the principal owners of all three companies.

Commissioner Harlan: I understand the outside traffic amounts to very little.

Mr. Porter: The tonnage last year was 746 tons; that is, general freight; that includes feed stuff, fertilizer and general merchandise.

Commissioner Harlan: Inbound and outbound?

Mr. Porter: Yes, sir, 726 tons, I should say.

Mr. McRae: I believe you stated it was standard gauge?

Mr. Porter: Yes, sir.

(Witness excused.)

877 *Bernice & Northwestern Railway Company.*

(At 6:00 P. M. the hearing on the above named company was held before Examiner Burchmore in room 1077 of the Grunewald Hotel, New Orleans, pursuant to agreement between all parties.)

G. W. JAMES was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: What is your residence and occupation?

Mr. James: I live at Bernice, Louisiana, and am president of the Bernice & Northwestern Railway.

Examiner Burchmore: How long have you been president of that company?

Mr. James: Ever since its organization.

Examiner Burchmore: In what year?

Mr. James: 1908.

Examiner Burchmore: It was incorporated in 1908?

Mr. James: It was incorporated in 1908.

Examiner Burchmore: In what year was the railroad or the first portion of the railroad constructed?

Mr. James: It was started in 1902 or 1903; it belonged to
878 the lumber company at that time.

Examiner Burchmore: Was the first construction co-incident with the establishment of the mill at that point?

Mr. James: Yes, sir.

Examiner Burchmore: Describe the line as it then existed, in a rough way.

Mr. James: Well, we built a logging road from Bernice to Summerfield to log the Bernice Lumber Company's plant.

Examiner Burchmore: How long was that road?

Mr. James: Well, it was 15 miles to Summerfield.

Examiner Burchmore: At that time?

Mr. James: Yes, when it was started it was 15 miles.

Examiner Burchmore: Was there any town at Summerfield at that time?

Mr. James: Yes, sir.

Examiner Burchmore: It was not just a point in the woods?

Mr. James: No, it is an old town, the oldest town in Louisiana, I guess.

Examiner Burchmore: At Bernice you had a connection with the Chicago, Rock Island & Pacific Railway?

Mr. James: Not at that time we did not; it was known as the Arkansas Southern at that time.

879 Examiner Burchmore: Was it a part of the Rock Island System?

Mr. James: It was the Rock Island when we started and the lumber company sold it to the railroad company.

Examiner Burchmore: Was the Arkansas Southern a part of the Rock Island System at that time?

Mr. James: No.

Examiner Burchmore: Was it an independent road?

Mr. James: Yes, sir.

Examiner Burchmore: Was it at that time controlled by lumber interests, if you know?

Mr. James: No, sir; I do not think so, but I could not say.

Examiner Sanford: What are the termini of the road; where does it run from and to?

Mr. James: From Bernice, Louisiana to Summerfield, Louisiana.

Examiner Sanford: Any branches?

Mr. James: Yes, sir; that is a distance of 15 miles; then it has another branch which runs from Dubach to Cunningham, eleven miles.

Examiner Sanford: Is Cunningham a station?

Mr. James: Yes, sir.

880 Examiner Sanford: It has no other connections?

Mr. James: No, except the Rock Island connection.

Examiner Burchmore: At the time of the incorporation in 1908 was there any other railroad in existence other than the line from Bernice to Summerfield?

Mr. James: There was a road at Bernice; the Arkansas Southern was there.

Examiner Burchmore: I mean was there any other part of this tap line?

Mr. James: No.

Examiner Burchmore: What road has subsequently been constructed since the incorporation?

Mr. James: Oh, yes, sir, at the time of the incorporation. I thought you said when it was first built, there was not any other, but at the time of the incorporation there was this other branch from Dubach, eleven miles, it was there the same as it is today.

Examiner Burchmore: Dubach is eleven miles westward?

Mr. James: Yes, sir.

Examiner Burchmore: Is there any connection between the Dubach line and the Bernice line?

Mr. James: Rock Island connection.

881 Examiner Burchmore: Have you trackage rights over the Rock Island?

Mr. James: Nothing over our rails—we run our engines back and forth, but we pay the regular tariff; we have not any special rate.

Examiner Burchmore: No contract?

Mr. James: No.

Examiner Burchmore: No special arrangement?

Mr. James: No, sir; no special arrangement.

Examiner Burchmore: Do you run your own cars back and forth?

Mr. James: No.

Examiner Burchmore: Just your engines?

Mr. James: Just our engines.

Examiner Burchmore: What consideration do you pay for that privilege?

Mr. James: Seventy-five cents per engine mile.

Examiner Burchmore: That is run with your own crew and under its own power?

Mr. James: Yes, sir.

Examiner Burchmore: Without any load behind?

Mr. James: No.

882 Examiner Burchmore: No empty cars?

Mr. James: No.

Examiner Burchmore: By whom is the stock in the Bernice & Northwestern Railway Company now held?

Mr. James: Well, it is held by myself and Mr. Fleishel and a few others, minor stockholders, that have not got but a little.

Examiner Burchmore: By whom is the majority of the stock of the railroad company held?

Mr. James: It is held by the same people as the lumber company; practically the same.

Examiner Burchmore: Then in substance the railroad company is owned and controlled by what lumber company, if any?

Mr. James: The same people that control the Bernice & Northwestern Railroad Company control the Bernice and Dubach Lumber Companies.

Examiner Burchmore: Those are two lumber companies, the Bernice Lumber Company and the Dubach Lumber Company?

Mr. James: Yes, sir.

Examiner Burchmore: That ownership of railroad stock is by the

stockholders of the lumber companies and not by the lumber companies themselves?

883 Mr. James: Yes, sir, by the stockholders.

Examiner Burchmore: There is no holding company that owns the stock in both companies?

Mr. James: No.

Examiner Burchmore: What was the earliest time when an allowance or division was paid to this tap line?

Mr. James: When it was started, in 1908.

Examiner Burchmore: Prior to the chartering of the tap line, no allowances or divisions whatsoever were paid to the owners of that tap line?

Mr. James: No, sir; nothing before that.

Examiner Burchmore: What rates on freight were paid prior to the incorporation? The regular legal tariff rate from the junction point?

Mr. James: You mean by the lumber company?

Examiner Burchmore: Yes.

Mr. Gaughan: To the Rock Island, he means.

Examiner Burchmore: To the Rock Island or its predecessor.

Mr. James: The lumber company owned the railroad company——

Mr. Gaughan: No, he is talking about what rate did you pay to the Arkansas Southern before you incorporated.

Mr. James: We paid them the regular tariff rate from

884 Bernice, the junction point.

Examiner Burchmore: Without any drawback or reduction of any character?

Mr. James: No, we did not get anything back before it was incorporated.

Examiner Burchmore: Was the establishment of divisions and allowances coincident with the incorporation of the tap line?

Mr. James: You mean they started at the same time?

Examiner Burchmore: Yes.

Mr. James: Yes, sir, we got the divisions when we chartered.

Examiner Burchmore: What was the purpose of this incorporation of the tap line, if you can state?

Mr. James: Well, we really chartered to get the divisions. We had to charter before we could get them, and we chartered in order to get the divisions, while we were doing a good deal of other business out in that country; in fact, we do a good deal of other business for other people.

Examiner Burchmore: At the time of the incorporation was there any actual traffic ready to be solicited for the public along the lines of your tap line?

885 Mr. James: Yes, sir; we were doing at least 15 per cent for the public before we chartered—ten per cent, I will say, at least.

Examiner Burchmore: What was the character of that traffic and for whom was it performed?

Mr. James: It was hauling staves in and car lots of flour and feed stuff for this town of Summerfield.

Examiner Burchmore: Say for the 12 months ending June 30, 1908, what would you estimate the total tonnage moving over this tap line; that is, prior to the incorporation?

Mr. James: That is, before the incorporation?

Examiner Burchmore: Yes.

Mr. James: Well, I just said not less than—about 10 or 12 per cent, I suppose, of the stuff.

Examiner Burchmore: No, but in cars or tons, what was the total traffic of all kinds that moved over that tap road?

Mr. James: Logs for the mills?

Examiner Burchmore: Everything, of every character.

Mr. James: How many carloads?

Examiner Burchmore: Yes.

Mr. James: It is pretty hard to get that.

Examiner Burchmore: A general statement.

886 Mr. James: For a year?

Examiner Burchmore: Yes; I simply want an idea of the extent of its business.

Mr. Gaughan: Would he have a right to see this paper and then compare it?

Examiner Burchmore: He can look at anything he wants to.

Mr. James: I know what it was for the next year, and it is practically the same.

Examiner Burchmore: Just tell it in round figures, then.

Mr. Gaughan: You can refresh your memory from any paper you have got.

Mr. James: Before the organization is what you want?

Examiner Burchmore: Yes.

Mr. James: For the next year it was 83,000 tons.

Examiner Burchmore: Of all traffic?

Mr. James: That is for the next year; that is after we incorporated.

Examiner Burchmore: What was the traffic——

Mr. James: I suppose the year before that would be about 80,000 tons, the year before we chartered.

Examiner Burchmore: For the nine months ending June 30, 1909, we have understood that your total traffic was 36,695

887 tons.

Mr. James: For nine months?

Examiner Burchmore: Yes, commencing October 1st, 1908.

Mr. James: Well, this that I gave you for the year was 83,000 tons.

Examiner Burchmore: More than twice what you handled in nine months. Your first annual report for the fiscal year ending June 30, 1909, indicates, I think, a traffic of 36,695 tons for nine months.

Mr. James: Yes, and now the next year was 83,000 tons.

Examiner Burchmore: That is the fiscal year 1910?

Mr. James: Ending this year, this is the last report. I could

not say whether before we chartered—we did not keep any track of that before we chartered. I do not know whether it would be a little more or a little less.

Examiner Burchmore: The line from Bernice westward practically parallels the road from Dubach westward with no physical connection?

Mr. James: Yes, sir.

Examiner Burchmore: What is the location of the mill of the Bernice Lumber Company?

Mr. James: It is on the track of the Bernice & Northwestern.

888 Examiner Burchmore: Right on the track of the Rock Island?

Mr. James: Yes, sir.

Examiner Burchmore: Where is the mill of the Dubach Lumber Company located?

Mr. James: Also on the track of the Rock Island.

Examiner Burchmore: Also on the track of the Bernice & Northwestern?

Mr. James: Yes, sir.

Examiner Burchmore: At Dubach?

Mr. James: Yes, sir.

Examiner Burchmore: How much of a town is Dubach?

Mr. James: It is about 1,500 people, I guess.

Examiner Burchmore: Was there any town there before the mill was constructed?

Mr. James: The mill was constructed and the town about the same time; it is all really built together.

Examiner Burchmore: Are Bernice and Dubach, or either of them, what are commonly known as company towns?

Mr. James: No, sir. Saw mill towns? No, they are good sized towns. We do not compose ten per cent of the people.

889 Examiner Burchmore: These lumber companies do not control the merchandise trade there?

Mr. James: No. We have got a big town; Bernice is about 3,000 people, and a good big bank in both towns.

Examiner Burchmore: Does the Bernice & Northwestern publish and file with the Commission any tariff of local rates applying to interstate traffic between points on its line?

Mr. James: Interstate?

Examiner Burchmore: Yes, for interstate application.

Mr. James: Published with the Commission; no, sir, I do not think so. I would rather leave that question for Mr. Wacker to answer, as to the tariff.

Examiner Burchmore: You are not advised with respect to the rates as well as he is?

Mr. James: No. We have a milling in transit proposition strictly, and Mr. Wacker can explain that all better than I can.

Examiner Burchmore: Will you please explain the method or practice at the present time of handling the logs into the mill and the lumber out of the mill for these controlling lumber companies?

Mr. James: That is a milling in transit proposition which I would rather Mr. Wacker would answer.

890 Examiner Burchmore: I am speaking from an operating standpoint; not what rates or privileges, but what is the physical handling of the property?

Mr. James: Well, we have got log cars and three locomotives, and 62 or 64 log cars.

Examiner Burchmore: Those cars are equipped with safety appliances?

Mr. James: No, they are regular skeleton log cars.

Examiner Burchmore: No air brakes or couplers?

Mr. James: No.

Examiner Burchmore: Used for the transportation of anything but logs?

Mr. James: No.

Examiner Burchmore: Any cars used for other tonnage?

Mr. James: Yes, sir; we have four of what we call open cars, flat cars, really, that we have for what little freight we handle.

Examiner Burchmore: Any box cars?

Mr. James: No, sir.

Examiner Burchmore: A caboose?

Mr. James: No.

Examiner Burchmore: Are these flat cars equipped with

891 couplers?

Mr. James: Yes, sir.

Examiner Burchmore: And air brakes?

Mr. James: We have brakes on the engines and these flat cars.

Examiner Burchmore: The Bernice & Northwestern engine takes the logging cars which it owns and hauls them empty into the forest?

Mr. James: Hauls them to Summerfield, and then the lumber company has spurs and it pulls these logs up to the main line, as we call it, to the railroad.

Examiner Burchmore: Does the lumber company have any locomotives?

Mr. James: Yes, sir.

Examiner Burchmore: It handles the cars over its own private spur tracks, then?

Mr. James: Yes, sir.

Examiner Burchmore: What is the extent of those private spur tracks in length?

Mr. James: That is all of them at both places, Dubach and Bernice?

Examiner Burchmore: State it separately.

892 Mr. James: At Bernice we have, I should say, about eight or nine miles. Dubach has about nine miles, I think.

Examiner Burchmore: A logging car is loaded with logs up in the forest by the employés of the lumber company?

Mr. James: Yes, sir.

Examiner Burchmore: And it is then hauled by the engine of the lumber company to Summerfield?

Mr. James: Yes, sir.

Examiner Burchmore: In the case of the Bernice company's shipments?

Mr. James: Yes.

Examiner Burchmore: What is the subsequent method with respect to those logs?

Mr. James: The engine that runs from Bernice to Summerfield picks these loads up and carries them to the mill, which is located at Bernice.

Examiner Burchmore: Who unloads the logs at that point?

Mr. James: The mill employés.

Examiner Burchmore: They are then manufactured into lumber?

Mr. James: Yes, sir.

Examiner Burchmore: And loaded into cars by whom?

893 Mr. James: The Rock Island.

Examiner Burchmore: Where are those cars set, and by whom?

Mr. James: They are set by the Rock Island upon their spur track.

Examiner Burchmore: And are loaded by your employés, or the lumber company employés?

Mr. James: Yes, sir.

Examiner Burchmore: They are then switched out or moved out by the Rock Island?

Mr. James: By the Rock Island. We do not handle them at all.

Examiner Burchmore: And move to interstate destinations?

Mr. James: Yes, sir.

Examiner Burchmore: Is any bill of lading issued at the time the log leaves the woods, or leaves Summerfield?

Mr. James: Yes, sir.

Examiner Burchmore: By whom is that issued and where?

Mr. James: That is stated, it is from Summerfield or Cunningham, whichever the case may be, as we have no agent at Summerfield.

Examiner Burchmore: Have you any agent at Cunning-

894 ham?

Mr. James: No, sir.

Examiner Burchmore: Where are your agents located?

Mr. James: At Bernice.

Examiner Burchmore: They issue bills of lading in the name of the Bernice & Northwestern Railway?

Mr. James: Yes, sir.

Examiner Burchmore: At Bernice, but stated Summerfield?

Mr. James: Yes.

Examiner Burchmore: And Cunningham?

Mr. James: Yes.

Mr. Wacker: I would like to correct that. There is also an agent at Dubach who signs bills of lading for the Dubach Division, and also one at Bernice, who signs for the Bernice Division.

Examiner Burchmore: The method is the same.

Mr. Wacker: The method is exactly the same.

Examiner Burchmore: Are any waybills issued for the movement into the mills?

Mr. James: Yes, sir, into the mill and out.

Examiner Burchmore: Waybills are issued in?

Mr. James: Yes, sir.

895 Examiner Burchmore: Are those card waybills?

Mr. James: We make a waybill covering the cars in.

Examiner Burchmore: Those freight bills actually accompany the cars?

Mr. James: No.

Examiner Burchmore: The conductor never sees them?

Mr. James: No, we make a waybill covering the train of logs.

Examiner Burchmore: Then when the shipments subsequently move out from the mill for interstate destinations, under what bill of lading do they move?

Mr. James: They move under the bill of lading—they move under a waybill. We furnish the Rock Island a waybill for each car.

Examiner Burchmore: You issue the waybills then?

Mr. James: Yes, sir.

Examiner Burchmore: What point is shown as the point of origin on that waybill?

Mr. James: Summerfield and Cunningham.

Examiner Burchmore: Bernice does not appear as the point of origin?

Mr. James: No.

896 Examiner Burchmore: Is any new bill of lading issued?

Mr. James: New bill of lading?

Examiner Burchmore: Yes.

Mr. James: What do you mean, after the car is loaded?

Examiner Burchmore: When it is loaded out with lumber. You stated you issued——

Mr. James: Yes, we issue a bill of lading for each car of lumber.

Examiner Burchmore: You issue two bills of lading, one at the time the log leaves Summerfield, and at the time the lumber leaves the mill?

Mr. James: I don't know about bills of lading——

Mr. Wacker: We do not issue the bill of lading for the logs, but issue a waybill or wheel report; the conductor has a wheel report in which he reports the number of logs in each train. For instance, he brings in ten cars of logs and he turns the report into the office, and from his report we turn the waybill into the mill.

Examiner Burchmore: So far as the logs are concerned, no bill of lading is issued until they reach Bernice?

Mr. Wacker: That is right.

Examiner Burchmore: Immediately upon their arrival at

897 Bernice, is the waybill issued?

Mr. Wacker: There is a bill issued on the conductor's report of his trip brought in at that time.

Examiner Burchmore: Subsequently when the lumber is billed

out from the mill you then issue a bill of lading reading back to Summerfield or Cunningham, as the case may be?

Mr. Wacker: Yes, sir.

Examiner Burchmore: An examination of the operations of your company was made by examiners of the Commission on or about December 4th, 1909, and the Commission has in its records a report from such examiners. Has there been any change in the methods or practices of your company since the date of that examination with respect to the movement of logs or the movement of lumber?

Mr. James: No, sir, I think not.

Examiner Burchmore: Has there been any new construction by the railroad company since that date?

Mr. James: No, sir, not by the railroad company.

Examiner Burchmore: There has however, been new construction or change of line in the case of the private rails of the lumber companies?

Mr. James: Yes, sir.

898 Examiner Burchmore: Those lines are not fixed in character, but are moved from time to time as the timber is cut?

Mr. James: Yes, sir, they are small spur tracks, and it is moved into the timber we cut, we move it farther out.

Examiner Burchmore: Are the officers of the Bernice & Northwestern Railway Company identical with the officers of the lumber companies, or either of them?

Mr. James: Well, they are practically the same.

Examiner Burchmore: Are you advised as to what parties or interests own the Bernice Lumber Company?

Mr. James: Yes, sir, I know who owns the Bernice Lumber Company.

Examiner Burchmore: State, if you will.

Mr. James: I am President of it, I own it.

Examiner Burchmore: You own the Bernice Lumber Company?

Mr. James: Yes, sir.

Mr. Gaughan: He wants to know how much of the stock is yours?

Examiner Burchmore: What proportion of the stock do you own?

899 Mr. James: About half, a little over half.

Examiner Burchmore: Do you own that in your own right or in trust?

Mr. James: Of what company do you mean, now, the Bernice or the railroad?

Examiner Burchmore: The Bernice Lumber Company.

Mr. James: I own the Bernice Lumber Company.

Examiner Burchmore: In your own right?

Mr. James: Yes, sir. I own all this company.

Examiner Burchmore: The Bernice Lumber Company is not owned or controlled by any interests that own and control other lumber companies aside from the Dubach Company?

Mr. James: No.

Examiner Burchmore: Does the same statement apply to the Dubach Lumber Company?

Mr. James: Yes, sir. I own over fifty per cent of both those companies.

Examiner Burchmore: Who owns the minority interests in those two companies?

Mr. James: In the Dubach Lumber Company and Bernice Lumber Company, Mr. M. L. Fleishel, the same man who is interested in the railroad.

900 Examiner Burchmore: How long have you owned the controlling interest in these two companies?

Mr. James: About nine years with the Bernice and I bought the Dubach Lumber Company four years ago, three and a half or four.

Examiner Burchmore: Since the incorporation of the Bernice & Northwestern Railway Company, and the establishment of allowances or divisions have you increased to a considerable extent your land or stumpage holdings in that vicinity?

Mr. James: No, sir, there is none to increase. We probably would if we could.

Examiner Burchmore: Is there any timber along the line——

Mr. Gaughan: I do not think you understood the question. He means have you bought any timber, after you got this division promised to you?

Mr. James: Yes, sir, we are buying timber. We buy timber right along.

Examiner Burchmore: Acquiring additional timber lands or stumpage rights?

Mr. James: Yes, sir.

Examiner Burchmore: Is there any timber land along the line of the Bernice & Northwestern which is not owned by your

901 lumber companies?

Mr. James: There is quite a good deal of hardwood——

Mr. Wacker: He is talking about lands.

Examiner Burchmore: Well, or stumpage?

Mr. James: I said quite a good deal of hardwood.

Examiner Burchmore: Is there any cutting going on?

Mr. James: Of hardwood? Yes, sir.

Examiner Burchmore: Are there any other sawmills on your line?

Mr. James: No, sir.

Examiner Burchmore: By whom is this cutting done?

Mr. James: By two or three concerns in New Orleans here. The Lamore Company, Cornie Stave Company, Adams Stave Company and A. Lamore Company. They are cutting staves, all those parties, and ties.

Mr. Wacker: The ties are being cut by Jacobs, are they not?

Examiner Burchmore: And others?

Mr. James: Well, the ties are cut, there are quite a good deal of ties which have been shipped by—I haven't got that big tie man's name.

Mr. Wacker: Is not Jacobs the man?

902 Mr. James: No, but on the Dubach Division.

Examiner Burchmore: Should I ask you about the rates applying on ties, or Mr. Wacker?

Mr. James: You might ask him.

Examiner Burchmore: Have you ever heard of the so-called Colonial system of tap lines?

Mr. James: Yes, sir.

Examiner Burchmore: Is there such a system?

Mr. James: No, sir.

Examiner Burchmore: How have you heard of it then?

Mr. James: It has not been in existence for, I don't know, it has been six or seven years, and it really never was incorporated; it never was a railroad. It was in the Guide, I think, was about as far as that question ever got.

Examiner Burchmore: Can you give me a little information?

Mr. James: The Bernice & Northwestern was in with the Colonial Railway System.

Examiner Burchmore: What sort of a system was that?

Mr. James: It was not much of a system. That was away back, four or five years before the incorporation.

Examiner Burchmore: Has the Colonial System gone out
903 of existence entirely?

Mr. James: I suppose so. I haven't heard of it in five, six or seven years.

Examiner Burchmore: Your railroad has no relation with any other tap lines?

Mr. James: No, sir, none whatever.

Examiner Burchmore: Have you any contract with the Rock Island System?

Mr. James: Nothing more than division sheets; I don't know whether you count those as contracts or not.

Examiner Burchmore: Is there any other statement that you desire to make in order that the Commission may be fully informed with respect to the status of your company?

Mr. James: I do not know of any. The Commission has all our reports, and we make our yearly and monthly reports and accident reports.

Examiner Burchmore: Do you keep your accounts in conformity with the regulations of the Interstate Commerce Commission?

Mr. James: Yes, sir, we keep that according to their rules.

Examiner Burchmore: What is the capitalization of the railroad?

Mr. James: $200,000.

904 Examiner Burchmore: Authorized?

Mr. James: Yes, sir.

Examiner Burchmore: And outstanding?

Mr. James: $108,600.

Examiner Burchmore: Was that stock paid for in cash or issued in exchange for railroad acquired?

Mr. James: The lumber company declared a dividend——

Mr. Gaughan: The lumber company declared a dividend and you people got some money, and you took the money and bought stock in the railroad?

Mr. James: Yes, sir, we bought stock in the railroad or really bought the railroad.

Mr. Gaughan: You bought stock in the railroad, and then the railroad company bought the railroad.

Examiner Burchmore: What was done was this, the lumber company declared a dividend, and instead of paying the dividend in cash had the railroad stock issued to its stockholders?

Mr. Gaughan: No.

Examiner Burchmore: I do not wish to ask a technical question, but the substance of that transaction was about that?

905 Mr. James: That is about the substance of it. The lumber company declared a dividend, and we organized a railroad and practically to the same stockholders, and bought stock in it.

Examiner Burchmore: As a stockholder in the lumber company you received money in the shape of a dividend and used that money to buy stock in the railroad?

Mr. James: Yes, sir.

Examiner Burchmore: And the railroad, with the money thus obtained from stock subscription, bought the line from the lumber company?

Mr. James: Yes, sir.

Examiner Burchmore: What dividends, if any, has the railroad company paid?

Mr. James: They have not paid any.

Examiner Burchmore: Are there any bonds outstanding on the railroad?

Mr. James: No.

Examiner Burchmore: You have paid no interest on bonds, then?

Mr. James: No.

Examiner Burchmore: Have you accumulated a surplus?

906 Mr. James: No, I think we have lost a little money.

Examiner Burchmore: The operations have been conducted at a loss?

Mr. James: Yes.

Examiner Burchmore: What advantage, if any, has accrued to the owners of this railroad through its operations then?

Mr. James: We expected to do better than we did. We expected to make some money out of it, but up to date we have failed.

Examiner Burchmore: To make some money from the public traffic?

Mr. James: From the public traffic and the lumber company.

Examiner Burchmore: Was not the railroad built and organized primarily for the purpose of serving these lumber plants and with the hope that as an adjunct to the lumber plant it would pay?

Mr. James: Well, the railroad does a good deal of outside business and always has, ever since it has been in existence, even before it was incorporated they did quite a good deal of business for the public.

Examiner Burchmore: There is no further statement you desire to make.

907 Mr. Gaughan: I wanted to direct his attention to one feature, and he should have answered it in answer to the

Examiner's question when he asked if you had anything else. How far is it practicable to log a sawmill with wagons, how far away?

Mr. James: With wagons?

Mr. Gaughan: Yes.

Mr. James: Not over two miles.

Mr. Gaughan: Were it not for the railroad to which you have referred, lumber, both hardwood and pine, out at the end of those lines, would not be available at all, would it?

Mr. James: No, sir. There is no other railroad in that section.

Mr. Gaughan: Were it not for the divisions which this railroad company receives, in view of the character of the country and the physical conditions, could that timber be manufactured profitably? That is to say, if the lumber company had to bear by itself the entire expense of bringing it to its mill by a railroad owned by it, and got no division of the freight rates.

Mr. James: We have bought timber since this division was put in that we never had figured on cutting, but after getting the
908 division we have gone much farther than we expected to go.

Examiner Burchmore: You can apply that division on one side of the ledger as against the extra cost of going farther into the woods, on the other side of the ledger?

Mr. James: Yes, sir.

Examiner Burchmore: These other interests who are cutting hardwood along your line team their logs to the railroad?

Mr. James: Yes, sir, to the line.

Examiner Burchmore: Do they receive any allowance for that teaming?

Mr. James: No, sir.

Mr. Gaughan: You also team your logs to the railroad, do you not?

Mr. James: Yes, sir.

Examiner Burchmore: Has the Bernice & Northwestern any station building?

Mr. James: Nothing only warehouses.

Examiner Burchmore: What are those warehouses, and where are they located?

Mr. James: Cottonseed. We have three cottonseed houses at Summerfield, that is practically all the warehouses we have.
909 We haul a good deal of cottonseed.

Examiner Burchmore: Any team tracks?

Mr. James: You mean for freight?

Examiner Burchmore: Yes.

Mr. James: We do not have any freight, only in car lots.

Examiner Burchmore: Do you have any side tracks where freight for the public can be set?

Mr. James: Yes, sir.

Examiner Burchmore: Along the lines?

Mr. James: Yes, sir; that is at Summerfield and Cunningham and one along the line between Summerfield and Bernice.

Examiner Burchmore: I presume the extent and nature of your tonnage is fully set forth in your annual report for 1910 to the Commission?

Mr. James: Yes, sir.

Examiner Burchmore: What employés has the railroad company?

Mr. James: In office work or——

Examiner Burchmore: All together?

Mr. James: How many men?

Examiner Burchmore: Yes, and classify them.

Mr. James: They use about 35 men, I guess.

910 Examiner Burchmore: How many engineers?

Mr. James: Three.

Examiner Burchmore: Fireman?

Mr. James: Three.

Examiner Burchmore: Other train men?

Mr. James: Seven.

Examiner Burchmore: Do those men devote their entire time to the work of the railroad?

Mr. James: Yes, sir.

Examiner Burchmore: Do not work for the lumber company ordinarily?

Mr. James: No.

Examiner Burchmore: How many track men have you?

Mr. James: It will average about 25 men.

Examiner Burchmore: Who work solely for the railroad company?

Mr. James: Yes, sir, who work solely for the railroad company.

Examiner Burchmore: What other employés are there, if any?

Mr. James: Well, myself and the agent at Bernice and Dubach, and the superintendent at Dubach.

Examiner Burchmore: That superintendent is also an

911 employé of the mill company?

Mr. James: Yes, sir.

Examiner Burchmore: Does he receive a salary from the railroad company?

Mr. James: Yes, sir.

Examiner Burchmore: What is his salary from the railroad company?

Mr. James: About one-third of his salary.

Examiner Burchmore: Well, I mean in dollars?

Mr. James: $25.00 a month.

Examiner Burchmore: Do you receive a salary from the railroad company?

Mr. James: Yes, sir.

Examiner Burchmore: What is your salary from the railroad company?

Mr. James: $100 a month.

Examiner Burchmore: These agents at Dubach and Bernice, are they joint agents with the railroad company?

Mr. James: With the Rock Island, do you mean?

Examiner Burchmore: Yes.

Mr. James: No.

Examiner Burchmore: Are they also employed by the
912 mill companies?

Mr. James: Yes, sir.

Examiner Burchmore: In what capacity?

Mr. James: The agent is bookkeeper at the lumber company.

Examiner Burchmore: At each point?

Mr. James: Yes.

Examiner Burchmore: What proportion of their salaries is paid by the railroad company?

Mr. James: About one-fourth of it.

Examiner Burchmore: Do they devote substantially one-fourth of their time to railroad work?

Mr. James: They devote three-fourths of it, there is more work for the railroad than for the lumber company, much more.

Examiner Burchmore: May I call your attention to the provision in the amendment to the Act to Regulate Commerce, enacted at the last session, which forbids any agent or employé of a common carrier subject to the act, from giving to any shipper information respecting the shipments of his competitors. Now without asking you any question about that, it being perhaps a matter of argument, how could your agents refrain from giving to them-
913 selves as employés of the lumber company, information with respect to shipments of its competitors, if any move over the railroad company? That is not a question, however. Where is the general office of the Bernice & Northwestern Railway Company?

Mr. James: Bernice.

Examiner Burchmore: Has that always been its general office?

Mr. James: Yes, sir.

Examiner Burchmore: Did it not formerly have a general office in the Fullerton Building, St. Louis, Mo.?

Mr. James: No, sir; I don't know how you got us mixed up with the Fullerton Building.

Examiner Burchmore: Did you ever hear of a Mr. J. C. Cremer?

Mr. James: I saw him, and that is just about all.

Examiner Burchmore: We have him on one of our reports as the Comptroller of the Bernice & Northwestern Railway Company, with an office in the Fullerton Building, St. Louis?

Mr. James: I don't know anything about it.

Examiner Burchmore: Is that correct?

Mr. James: No.

Examiner Burchmore: He has never been an officer of your company or an employee?

914 Mr. James: No, sir, not in any way, shape or form.

Examiner Burchmore: I presume you are fully authorized to represent your company on this occasion?

Mr. James: Yes, sir.

(Witness excused.)

A. H. WACKER was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: Please state your residence and occupation?

Mr. Wacker: Bernice, La. I am Auditor of the Bernice & Northwestern, and bookkeeper of the lumber company.

Examiner Burchmore: State in a general way the basis of the divisions or allowances received by the Bernice & Northwestern on the movement of lumber?

Mr. Wacker: We have a division sheet furnished us by the Rock Island, showing divisions to various points on lumber that we ship from the mills of the Bernice and Dubach Lumber Companies.

Examiner Burchmore: But what is the basis of the amounts of those allowances?

915 Mr. Wacker: Do you mean the maximum and minimum divisions allowed?

Mr. Burchmore: What is the basis of the amounts of those allowances?

Mr. Wacker: If I understand you correctly, you want the minimum and maximum allowances.

Examiner Burchmore: Yes, and the general territory to which they apply.

Mr. Wacker: Well, the division sheet provides for a minimum of one cent and a maximum of four cents per 100 pounds. The four cent division applies to points located on the Rock Island rails, that is where they get the entire haul the divisions are higher than they are where the rates have to be divided with other lines.

Examiner Burchmore: Four cents per 100 pounds applies to traffic to all points on the Rock Island?

Mr. Wacker: No, to points in Nebraska and Colorado, located on their own line. For instance, to Omaha we get a four cent division.

Examiner Burchmore: To Rock Island points in Texas four cents?

Mr. Wacker: We only get one cent division. I do not

916 know whether you have a copy of that.

Examiner Burchmore: Refer to that division sheet and state whether it is your present division sheet (handing paper)?

Mr. Wacker: Yes, except there ought to be stated here a recent division sheet which came out allowing us one cent to points in Texas.

Examiner Burchmore: What is the number of that?

Mr. Wacker: Rock Island No. 25,232.

Examiner Burchmore: That is the present division sheet, with the exception just stated?

Mr. Wacker: There are some additions which are not here. We have a new division—another addition was two cents per 100 pounds to points located in Arkansas.

Examiner Burchmore: Is there any lumber traffic on which your company receives no division from the Rock Island?

Mr. Wacker: Yes, on lumber moving to local points in the State of Louisiana we do not get any division.

Examiner Burchmore: What is the explanation?

Mr. Wacker: I really cannot tell you what the explanation is, because this division sheet was put in by an arrangement with our traffic department. Our traffic man, Mr. Musick, made the
917 arrangement with the Rock Island.

Examiner Burchmore: Do you receive a division of two or three dollars a car on business to Louisiana?

Mr. Wacker: We have a local tariff in effect which provides for a rate of $5.00 per car on logs moving from our Bernice or Cunningham station to the mill. Now when the product of those logs goes to the local points we retain that $5.00 on the logs.

Examiner Burchmore: That is paid to you by the lumber company?

Mr. Wacker: That is paid to us by the lumber company or the shippers.

Examiner Burchmore: That in case of shipment performed for the public would be paid by the shipper?

Mr. Wacker: Yes, sir.

Examiner Burchmore: When the shipment goes to a point to which you have joint rates with the Rock Island, and a division in effect, you credit that $5.00 on the through rate?

Mr. Wacker: The way we handle that is this. We tested a trainload of logs there to find out about what the number of
918 feet would be on each car of logs and we found that each car would contain about 2000 feet of logs in the rough, and we also find that the average number of feet of lumber shipped out in the car of the finished product is about 16,000 feet; consequently we arrived at the ratio of eight cars of logs to make one car of lumber, the finished product. Now if we collect our local freight of $5.00 per car on those logs, and they give us a bill of lading showing a reshipment of the finished product to a point on which we receive divisions we give them a milling in transit allowance of the entire amount paid on the logs.

Examiner Burchmore: In the case of a shipment to an interstate destination, is the rate applied that in effect from Bernice to destination or that in effect from Summerfield to destination?

Mr. Wacker: The rate is the same, because the rates are quoted by groups. Bernice, for instance, is in Group 19, according to the Rock Island tariffs, and Summerfield is in Group 42. Now both these groups take the same rate.

Examiner Burchmore: Dubach is the same rate?

Mr. Wacker: Yes.

Examiner Burchmore: And Cunningham?

919 Mr. Wacker: Yes, sir. It does not make any difference whether the stuff is billed from Bernice or Cunningham, because the rate is the same.

Examiner Burchmore: As a matter of fact all the shipments for the Bernice Lumber Company are billed as originating at Summerfield?

Mr. Wacker: Yes, sir.

Examiner Burchmore: The tariff contains a milling in transit privilege?

Mr. Wacker: We concur in the Rock Island tariff and Leland's tariff, and the Rock Island tariff shows the transit privilege.

Examiner Burchmore: Does that contain any rule with respect to the proportion of logs in to lumber out?

Mr. Wacker: No. If it does I do not recall it. I do not think it does.

Examiner Burchmore: Can you refer to the present tariff by the I. C. C. number?

Mr. Wacker: Do you mean the Rock Island?

Examiner Burchmore: Yes.

Mr. Wacker: No.

920 Examiner Burchmore: Have you filed an index with the Commission of your tariffs?

Mr. Wacker: Our tariff department handles that. I believe they have. I would not be positive of it. I do not handle that part of the business.

Examiner Burchmore: You are the agent at Summerfield?

Mr. Wacker: I am the Auditor, and act as agent at Bernice.

Examiner Burchmore: Then you attend to the billing and so forth?

Mr. Wacker: Yes, sir.

Examiner Burchmore: Is there any territory which you can refer to as being your principal selling market?

Mr. Wacker: Well, I find that the majority of the shipments are destined to points east of the Mississippi River and north of the Ohio River on which the divisions will average three cents per 100 pounds. That is about what I figure our average divisions are.

Examiner Burchmore: What are the average rates, of course in a general way?

Mr. Wacker: Well, the rates range all the way from 18 cents to 37 cents, you know. You mean the rates from the mill to

921 final destination? They will run, we will say, 14 cents, that is the Memphis rate. The two cent division is based on the Memphis rate. Take that from 14 cents to 37 cents or even 40 cents. Of course, we ship to points all over the country. We issue bills of lading to any point all over the country.

Examiner Burchmore: You have just described the territory to which most of your lumber moves, and you have said that on most of that lumber you get the three cent division.

Mr. Wacker: That would be the average, I think.

Examiner Burchmore: Out of what general rate would that be the division?

Mr. Wacker: On the rates shown in the tariff.

Examiner Burchmore: I mean 20 cents or 40 cents or what?

Mr. Wacker: I should think that rate would average about 30 cents.

Mr. Gaughan: We get a division on the average rate of 30 cents.

Examiner Burchmore: Under the joint rate under which the

Rock Island and its connecting lines haul the lumber for a distance ranging from 100 or 200 miles to 1000 miles, you receive three cents per 100 pounds——

Mr. Wacker: I would figure that as an average.

922 Examiner Burchmore: What service do you perform for that three cents?

Mr. Wacker: Well, we perform the service, we figure the hauling of the rough product into the mill.

Examiner Burchmore: And that seems to be all?

Mr. Wacker: Yes, sir.

Examiner Burchmore: You furnish no cars except for the movement of the logs?

Mr. Wacker: Except the logging cars for the movement of the logs.

Examiner Burchmore: I believe it was stated that the lumber company owns no cars?

Mr. Wacker: No, I do not think they own any. The railroad owns all the cars. I believe he did state that the lumber company owned an engine, which they do.

Examiner Burchmore: What is the rate to Chicago and the division of that rate?

Mr. Wacker: The rate to Chicago is 26 cents per 100 pounds. I believe it is.

Examiner Burchmore: And the division?

Mr. Wacker: The division would be three cents.

Examiner Burchmore: What is the rate to Kansas City and the division?

923 Mr. Wacker: Kansas City is 24 cents and if that shipment moves over the Rock Island, that is over our rails of the Rock Island exclusively, we get three cents, but if it is routed some other way by the shipper so the Rock Island does not get the entire haul after it leaves us, we get a two cent division.

Examiner Burchmore: By whom was the railroad originally constructed, that is to say, was it originally constructed by the lumber company or by a railroad for the lumber company?

Mr. Wacker: This was really a railroad operated by the lumber company before it was chartered as a railroad; it was already in existence when the present railroad company bought it.

Examiner Burchmore: I understand, but the railroad was not constructed by the Arkansas Southern on behalf of the lumber company?

Mr. Wacker: That was before my time. I do not think the Arkansas & Southern had anything to do with the construction of this. Do you know, Mr. Gaughan?

Mr. Gaughan: No, I was a stockholder.

Mr. Wacker: The Arkansas & Southern was a logging road itself at one time.

924 Examiner Burchmore: Does the Bernice & Northwestern switch any carloads for the public?

Mr. Wacker: We do this, we do not do any switching. We set

cars that are furnished us by the Rock Island on our spurs out along the line for loading with bolts, staves and cottonseed.

Examiner Burchmore: By the public?

Mr. Wacker: Yes, sir.

Examiner Burchmore: Tell me a little about your general traffic, how much cottonseed, and so forth?

Mr. Wacker: I think I have a little statement here which will give an idea. Our annual report for the year ending June 30th, 1910, shows a total tonnage of 83,611 tons. Now out of that tonnage we handled a total of 11,223 tons of miscellaneous commodities, grain, flour, mill products, cotton, cottonseed, fertilizer, salt, coal, staves, bolts, and so forth.

Examiner Burchmore: This statement shows that the percentage of miscellaneous commodities handled for the public to the total tonnage hauled for the public and for the lumber companies is 13.4 per cent.

925 Mr. Wacker: Yes, sir.

Examiner Burchmore: For the year ending June 30th, 1910.

Mr. Wacker: Yes.

Examiner Burchmore: This statement substantially agrees with the figures given in the annual report for that year.

Mr. Wacker: Yes, sir.

Examiner Burchmore: You have filed your annual report for that year?

Mr. Wacker: That is a copy.

Examiner Burchmore: Was any part of this material mentioned on this statement camp supplies or company materials for the logging operators?

Mr. Wacker: That is not included in this statement. We have not had any of that. All that we handled outside of course, is right here, and all that we handled for the mill company is shown right here. We haven't anything else.

Examiner Burchmore: Can you give these same figures stated in dollars and cents instead of in tons?

Mr. Wacker: I do not think they show that way in the report. If they do they are right here. I would have to take them from the report.

Examiner Burchmore: Reference may be made to the an-

926 nual report for that information.

Mr. Wacker: If you haven't it there I can get it for you.

Examiner Burchmore: If not contained in the annual report it will be furnished by you?

Mr. Wacker: Yes, sir. I think this annual report will show the total revenue collected on all commodities, and if you will want it that way I will have to separate it for you.

Examiner Burchmore: In this statement, I understand, Mr. Wacker, you say that the 44,887 tons of logs represent not the total weight of logs in, but the excess of the logs over the lumber?

Mr. Wacker: Yes, and those logs of which no division was received. For instance, lumber sold for local shipment.

Examiner Burchmore: The total quantity of logs handled, I presume, was 83,000?

Mr. Wacker: That 83,000 is the total of all commodities. The total of logs handled would be 23,000 plus 43,000. 83,000 was the total of all tonnage.

Examiner Burchmore: That is a very large increase apparently over the figures reported for the nine months of the fiscal year ending June 30th, 1909.

927 Mr. Wacker: I will tell you why I think that is. I think there would be stave business and other miscellaneous products heavier; and also the logging was a good deal heavier.

Examiner Burchmore: The logging was a great deal heavier?

Mr. Wacker: Yes, sir.

Examiner Burchmore: It is probably covered by what I have said already, but I cannot understand these figures of tons and feet as readily as carload statements. Can you indicate how many carloads of lumber per month or per year are shipped out by your two lumber companies?

Mr. Wacker: I can give you an estimated average of about 1,500 cars of lumber a year. We will average about 35 cars of finished product shipped out from Bernice.

Examiner Burchmore: What is the capacity of each of the mills, stated separately?

Mr. Wacker: The Bernice mill has a capacity of 50,000 daily, and the Dubach mill of about 75,000 daily.

Examiner Burchmore: Do you make any charge for depreciation of equipment in your accounts?

Mr. Wacker: Yes, sir, we make a charge of one-twelfth of ten per cent per annum, and charge it off every month.

928 Examiner Burchmore: And on locomotives?

Mr. Wacker: All equipment the same.

Examiner Burchmore: What is the approximate cost of upkeep of logging cars per annum, in your experience?

Mr. Wacker: The maintenance of equipment, I presume, would come near to that. I can refer to this and give it to you.

Examiner Burchmore: Take the total sum and divide by the number of cars and we could get that figure I presume?

Mr. Wacker: Yes, sir.

Examiner Burchmore: You do not know what that is?

Mr. Wacker: No. The books show what the total maintenance of equipment was and we could arrive at it per car.

Examiner Burchmore: What do you pay for logging cars?

Mr. Wacker: They will average about $210, I guess. They generally come in knocked down, and we have to have them set up and it costs something to get them fixed up and in running order; I suppose $225 to $230.

Examiner Burchmore: What is the capacity of your logging cars?

Mr. Wacker: 40,000 pounds.

Examiner Burchmore: Do you carry any mail?

Mr. Wacker: No.

929 Examiner Burchmore: Express?

Mr. Wacker: No.

Examiner Burchmore: Passengers?

Mr. Wacker: No; we are chartered for freight only.

Examiner Burchmore: You are chartered for freight only?

Mr. Wacker: That is all.

Examiner Burchmore: You carry people free sometimes?

Mr. Wacker: Well, they ride on our engines at their own risk, but we do not encourage anybody to do it, and we consider them as trespassers.

Examiner Burchmore: Do the officers or employés of the railroad company hold any passes from interstate railroads?

Mr. Wacker: Yes.

Examiner Burchmore: What passes and what officers?

Mr. Wacker: I think Mr. James has a pass over the Rock Island, I believe he has. I wish you had asked him that question instead of me, because I really don't know positively. I think he has over the Rock Island.

Examiner Burchmore: Interstate annual?

Mr. Wacker: Yes, sir.

Examiner Burchmore: You have a pass?

930 Mr. Wacker: I have not an annual but I have had trip passes over the Rock Island.

Examiner Burchmore: You heard the testimony given by Mr. James. Is there any correction that you would suggest in the testimony he gave?

Mr. Wacker: Now, I didn't exactly understand his testimony in regard to the old Arkansas Southern, why he came to get that mixed up with the Bernice & Northwestern I did not understand.

Examiner Burchmore: Tell us about that road.

Mr. Wacker: As I understand it, it formerly was a logging road, and some years back was taken over by the Rock Island and now forms part of their main line.

Examiner Burchmore: Do you know who operated it when it was a logging road?

Mr. Wacker: I do not know. It was long before I came down in this part of the country.

Mr. Gaughan: The Arkansas Southern started at Eldorado, and was built to Junction City, a distance of about 16 miles, and stayed there about two or three years, and then it was extended to Wesson and became quite a railroad. Then, it was extended to Winnfield and then a short distance below Winnfield and towns grew

931 up on it and Bernice was one of them.

Examiner Burchmore: When did it reach Bernice?

Mr. Gaughan: It reach the spot where Bernice is about 1900, I guess.

Examiner Burchmore: Was that its terminus for awhile?

Mr. Gaughan: No, Bernice was never its terminus, but there was not any Bernice until it got there. Then it was sold to the Rock Island System.

Examiner Burchmore: Did you ever hear anything about that sale, the terms?

Mr. Gaughan: Yes, sir; I was a stockholder and attorney for it, and helped make the sale.

Examiner Burchmore: Is there any statement you care to make?

Mr. Gaughan: No, that has nothing to do with all this.

Examiner Burchmore: Who controlled it when it was operated as a tap line?

Mr. Gaughan: Well, it really never was operated as a tap line.

Examiner Burchmore: Well, it was operated in connection with some lumbering operations?

Mr. Gaughan: Well, it was operated in connection with a
932 great many lumbering operations, a great many sawmills on it which had nothing to do with the railroad. There was only one sawmill on it that the stockholders of the Arkansas Southern had owned, and that was the one at Stonesboro, which is now owned by the Tremont & Gulf people. We sold it to them.

Examiner Burchmore: Is there any further statement you think should be made in order that this record may completely inform the Commission with respect to the operations of your road?

Mr. Wacker: None that I know of.

Examiner Burchmore: Have you anything further, Mr. Gaughan?

Mr. Gaughan: Have you got a telephone or telegraph line?

Mr. Wacker: We have a telephone line.

Mr. Gaughan: Along the line of the road?

Mr. Wacker: Reaching from Bernice to Summerfield.

Examiner Burchmore: Have you a train dispatcher?

Mr. Wacker: No.

Mr. Gaughan: When anyone along the line of the road desires to have some freight moved, how is the communication made so that the railroad engines can go there and get it?

933 Mr. Wacker: They either notify us by phone or else give the requisition or request for service to our trainmen, and they bring it into headquarters, to the office, and the service that they request is performed in that way.

Mr. Gaughan: Has traffic moved over your line of railroad every day?

Mr. Wacker: Yes, sir.

Examiner Burchmore: Will you request Mr. James to furnish the Commission with a map of the line drawn to scale and showing the location of the mills and also the private tracks of the lumber company, and where lumbering is going on and these station points, and so forth.

Mr. Gaughan: Yes.

Examiner Burchmore: Have you any time table or regular train schedules?

Mr. Wacker: We have no timetable. We try to run four trains daily, that is, make two round trips daily, one in the morning and one in the afternoon.

Examiner Burchmore: Do you connect with Rock Island trains?

Mr. Wacker: No.

Whereupon, at 7:30 P. M. the hearing in the above men-
934 tioned railroad was closed, and an adjournment was taken according to the previous announcement of the Commissioner, until Monday, December 12th, 1910, at 9:30 A. M.

935 NEW ORLEANS, LA., *December* 12, 1910.

Met pursuant to adjournment at 9:30 A. M.
Present: Parties as before.

Commissioner Harlan: The first case is the Little Rock, Maumelle & Western. How many witnesses have you?
Mr. Mehaffy: We have two witnesses.

(The witnesses were then sworn.)

Little Rock, Maumelle & Western.

F. NEIMEYER, was called as a witness, and having been duly sworn testified as follows:

Commissioner Harlan: State your name?
Mr. Neimeyer: F. Neimeyer.
Commissioner Harlan: Where do you live?
Mr. Neimeyer: Little Rock, Ark.
Commissioner Harlan: What is your business?
Mr. Neimeyer: I am Secretary of the A. J. Neimeyer Lumber Company, and Treasurer of the Little Rock, Maumelle &
936 Western Railroad.
Commissioner Harlan: What are the [illegible]ini of the Little Rock, Maumelle & Western?
Mr. Neimeyer: Maumelle.
Commissioner Harlan: Where is that in relation to the City of Little Rock?
Mr. Neimeyer: 16 miles, in a westerly direction.
Commissioner Harlan: Have you a map of your road?
Mr. Neimeyer: Well, it is a pretty large one here.
Commissioner Harlan: Never mind here. I think I have something here which will do.
Mr. Neimeyer: It is pretty large and is in two sections.
Commissioner Harlan: Where is Becker, with relation to your road?
Mr. Neimeyer: It is about a mile from our connection with the St. Louis, Iron Mountain & Southern, possibly not quite a mile.
Commissioner Harlan: Your connection with the Iron Mountain is at Maumelle?
Mr. Neimeyer: No.
Commissioner Harlan: Where is your connection with the
937 Iron Mountain?
Mr. Neimeyer: Well, Becker, I guess.
Commissioner Harlan: Where is Maumelle with reference to Becker?
Mr. Neimeyer: 16 miles west.

Commissioner Harlan: Of Becker?
Mr. Neimeyer: Yes, sir.
Commissioner Harlan: What do you call your eastern terminus, Becker or Maumelle?
Mr. Neimeyer: Becker, Ark.
Commissioner Harlan: Becker is your eastern terminus?
Mr. Neimeyer: Becker is our eastern terminus.
Commissioner Harlan: And what is your western terminus?
Mr. Neimeyer: Maumelle.
Commissioner Harlan: I understand now. How far is Becker from Little Rock?
Mr. Neimeyer: Our connection with the Iron Mountain, do I understand you?
Commissioner Harlan: No, how far is the town of Becker from Little Rock?
Mr. Neimeyer: About three and a half miles.
938 Commissioner Harlan: A little towards the south and west?
Mr. Neimeyer: Yes, sir.
Commissioner Harlan: Your connection with the Iron Mountain is about a mile from Becker?
Mr. Neimeyer: In the neighborhood of a mile.
Commissioner Harlan: To the west of Becker?
Mr. Neimeyer: Yes, sir.
Commissioner Harlan: Where is the mill of the lumber company of which you are secretary?
Mr. Neimeyer: It is at Becker, Ark.
Commissioner Harlan: What is the name of that mill?
Mr. Neimeyer: The A. J. Neimeyer Lumber Company.
Commissioner Harlan: Is it on the tracks of the Iron Mountain?
Mr. Neimeyer: No, sir.
Commissioner Harlan: Have you a sawmill and planing mill?
Mr. Neimeyer: Yes, sir.
Commissioner Harlan: Are they within the same enclosure?
Mr. Neimeyer: Yes, sir.
Commissioner Harlan: How far apart?
Mr. Neimeyer: About 200 feet.
939 Commissioner Harlan: Which is nearer to the Iron Mountain tracks?
Mr. Neimeyer: The sawmill.
Commissioner Harlan: Is the sawmill on the Little Rock, Maumelle & Western tracks?
Mr. Neimeyer: Yes, sir.
Commissioner Harlan: Is the planing mill also on that line?
Mr. Neimeyer: Yes, sir.
Commissioner Harlan: How far do you think the sawmill is from the Iron Mountain, is it half a mile?
Mr. Neimeyer: Yes; it is between three-quarters of a mile and a mile.
Commissioner Harlan: That is from the Iron Mountain tracks at Becker?
Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Is there a spur track running from the Iron Mountain track into the sawmill or planing mill?

Mr. Neimeyer: No, sir.

Commissioner Harlan: Where is the junction between the Little Rock, Maumelle & Western and the Iron Mountain, is it
940 near the sawmill?

Mr. Neimeyer: No, it is possibly—our connection tracks where we deliver the cars to the Iron Mountain is about half a mile from the sawmill, I should think.

Commissioner Harlan: Who owns the track from the sawmill to that interchange track?

Mr. Neimeyer: The Little Rock, Maumelle & Western.

Commissioner Harlan: Mr. Neimeyer, our reports show that the sawmill of the Neimeyer Lumber Company is only an eighth of a mile from the point of connection with the Iron Mountain.

Mr. Neimeyer: Well, I understand where I have gone wrong now is on account of where the spur of the Iron Mountain comes off of the main line and joins our spur; it possibly is only an eighth of a mile.

Commissioner Harlan: Is that the point of interchange?

Mr. Neimeyer: Yes.

Commissioner Harlan: Right at the junction of those two spurs?

Mr. Neimeyer: No, we have a switch and a set out track where we interchange cars.

Commissioner Harlan: Let me ask you in your own way,
941 just to explain the physical conditions there, and the relation of the tracks that lead from your mill to the main line of the Iron Mountain. Just explain it in your own way.

Mr. Mehaffy: Would not your Honor rather he would take the map and point it out to you there?

Commissioner Harlan: Yes, perhaps that would do. Now this map is entitled Map of located line of Little Rock, Maumelle & Western, and towards the bottom here I see the town of Becker. Is that right?

Mr. Neimeyer: Yes, sir. Here is the main line of the Iron Mountain (indicating).

Commissioner Harlan: To the right hand of the map.

Mr. Neimeyer: Yes. They maintain a track and there is another industry on this track.

Commissioner Harlan: They maintain a switch track from the main line passing several industries.

Mr. Neimeyer: To a large brick plant, and the penitentiary, which they serve.

Commissioner Harlan: What is the distance from the main line to the penitentiary?

Mr. Neimeyer: I would think it is half a mile.

942 Commissioner Harlan: From the penitentiary on towards Becker who owns the track?

Mr. Neimeyer: The Little Rock, Maumelle & Western.

Commissioner Harlan: Indicate your mill.

Mr. Neimeyer: Well, the mill is set right there about (indicating).

Commissioner Harlan: That is in the northeast corner of the square marked "Becker".

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: How far is that from the penitentiary?

Mr. Neimeyer: Well, the penitentiary is probably there (indicating).

Commissioner Harlan: Is that a distance of an eighth of a mile?

Mr. Neimeyer: I think so; possibly a little more.

Commissioner Harlan: Who owns the track from the sawmill to the junction of the Iron Mountain spur near the penitentiary?

Mr. Neimeyer: The Little Rock, Maumelle & Western.

Commissioner Harlan: Has that company always owned that spur?

943 Mr. Neimeyer: Yes, sir.

Commissioner Harlan: It was built by the Lumber Company, was it not?

Mr. Neimeyer: It was not.

Commissioner Harlan: It was built by the railroad company?

Mr. Neimeyer: Yes.

Commissioner Harlan: Was there at any time a spur track there that belonged to the Iron Mountain, leading into your sawmill?

Mr. Neimeyer: No.

Commissioner Harlan: And what is the point of interchange when you have a loaded car which you want delivered to the Iron Mountain, where do you deliver it to them?

Mr. Neimeyer: At an interchange track which is located about one-eighth of a mile from our sawmill.

Commissioner Harlan: And you will haul it there with your own locomotive?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Extending west from the sawmill is the line of the Little Rock, Maumelle & Western?

Mr. Neimeyer: Yes, sir.

944 Commissioner Harlan: You say it is 16 miles long?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: What is the character of the roadbed, is it ballasted?

Mr. Neimeyer: It is rock ballasted.

Commissioner Harlan: What rail have you?

Mr. Neimeyer: 60 pound.

Commissioner Harlan: What equipment have you, I am now referring to the railroad company?

Mr. Neimeyer: We have one engine, one combination caboose which carries passengers and also carries freight, and we have nine work cars, five flat cars, I think that is the correct number, and one motor car.

Commissioner Harlan: Have you any logging trucks?

Mr. Neimeyer: No, sir.

Commissioner Harlan: What are those trucks?

Mr. Neimeyer: Logging cars.

Commissioner Harlan: Our records refer to them as logging trucks. Do you understand what that means?

Mr. Neimeyer: I do not.

Commissioner Harlan: What use do you make of the
945 motor car?

Mr. Neimeyer: We use that for private inspection.

Commissioner Harlan: Is it a car that runs on rails?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Private inspection of what?

Mr. Neimeyer: Of the line. It is also used by the Neimeyer Lumber Company to some extent.

Commissioner Harlan: Is it owned by the railroad company?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: What use does the Lumber Company make of it?

Mr. Neimeyer: Well, if the officers care to go to the woods to look over the work at the end of the line, and the woods operation, they take it to the front.

Commissioner Harlan: Sort of a joy ride car?

Mr. Neimeyer: Probably you could call it that.

Commissioner Harlan: Well, is it a passenger car or a freight car, or what sort of a car is it?

Mr. Neimeyer: It is a motor car that could carry about nine passengers.

Commissioner Harlan: How long has the railroad had that car?

946 Mr. Neimeyer: Ever since the road has been completed out about seven miles.

Commissioner Harlan: How large is the town of Becker?

Mr. Neimeyer: Well, I cannot say it has any population at all, from the fact it is a part of Little Rock.

Commissioner Harlan: It is within the corporate limits of Little Rock?

Mr. Neimeyer: No.

Commissioner Harlan: Well, what is there? Your mill is near there. What else is at the place called Becker? There is a post office?

Mr. Neimeyer: No.

Commissioner Harlan: No post office?

Mr. Neimeyer: No; just the mill plant.

Commissioner Harlan: It is a mill point?

Mr. Neimeyer: Yes.

Commissioner Harlan: Is that true of Maumelle?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Is that a mill point too?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Has it a post office?

947 Mr. Neimeyer: No, there is a post office, but it is not on the main line.

Commissioner Harlan: I see on this map that the western terminus of your line is given as Douglass. What is that, is that right?

Mr. Neimeyer: Well, we call it Maumelle.

Commissioner Harlan: Douglass and Maumelle are one and the same point?

Mr. Neimeyer: One and the same point.

Commissioner Harlan: And that has no post office. What is at Maumelle?

Mr. Neimeyer: Nothing there but where we interchange logging cars with the Little Rock, Maumelle & Western.

Commissioner Harlan: Is there any post office called Douglass post office?

Mr. Neimeyer: Not to my knowledge.

Commissioner Harlan: And no post office called Maumelle post office?

Mr. Neimeyer: There is one but it is not located on our line or real near it.

Commissioner Harlan: Are Douglass and Maumelle then the same thing?

948 Mr. Neimeyer: Practically the same thing.

Commissioner Harlan: Is that the local understanding, that there is but one place there, and it is called Douglass or Maumelle, according to the pleasure of the person who speaks of it?

Mr. Neimeyer: Yes.

Commissioner Harlan: Is there any company store there?

Mr. Neimeyer: No, sir.

Commissioner Harlan: Is there any point or post office between Becker and Maumelle on your line?

Mr. Neimeyer: Carnes, Ark., there is an industry on the Little Rock, Maumelle & Western.

Commissioner Harlan: What is that industry?

Mr. Neimeyer: A little hardwood sawmill. The owner of that sawmill was appointed Postmaster, but I do not think he ever received his commission or did any work.

Commissioner Harlan: That mill is right on your rails?

Mr. Neimeyer: Yes.

Commissioner Harlan: Where does it get its hard wood?

Mr. Neimeyer: From the Neimeyer Lumber Company.

Commissioner Harlan: How does it get the logs into the

949 mill?

Mr. Neimeyer: It is hauled over the Little Rock, Maumelle & Western rails at the connecting point.

Commissioner Harlan: As I infer then, you do not carry any mail or express matter?

Mr. Neimeyer: No, sir.

Commissioner Harlan: And you carry no merchandise for any one except this hardwood mill and for the lumber company?

Mr. Neimeyer: We haul merchandise for several parties besides those.

Commissioner Harlan: Just tell us who they are and the character of the traffic?

Mr. Neimeyer: We haul from the Greenville Stave Company, who are shipping staves over our line.

Commissioner Harlan: Where is their mill?

Mr. Neimeyer: They have a couple of stave mills three or four miles from the end of our line.

Commissioner Harlan: And right on your line?

Mr. Neimeyer: No, sir, no mills right on the line.

Commissioner Harlan: Where do they get their logs?

Mr. Neimeyer: They own the timber.

950 Commissioner Harlan: How far are their mills from your line?

Mr. Neimeyer: Three or four miles, something like that.

Commissioner Harlan: They haul the manufactured products by wagon to your line?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Do you get a division on that traffic?

Mr. Neimeyer: We have a local rate; it is shipped into the City of Little Rock.

Commissioner Harlan: That is a joint rate with the Iron Mountain?

Mr. Neimeyer: No, sir; it is not shipped over the Iron Mountain rails. They have a switching charge and switch it to their plant, which is in Little Rock.

Commissioner Harlan: And the Iron Mountain has a switching charge from Becker to Little Rock?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Do you make any allowance to them out of your local rate?

Mr. Neimeyer: No.

951 Commissioner Harlan: You say at Maumelle your line joins the logging road of the Neimeyer Lumber Company?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: What is the extent of that road, how long is it?

Mr. Neimeyer: The logging road?

Commissioner Harlan: Yes.

Mr. Neimeyer: In the neighborhood of ten miles.

Commissioner Harlan: Does it run into forest belonging to the lumber company?

Mr. Neimeyer: It does.

Commissioner Harlan: Who operates that line?

Mr. Neimeyer: The A. J. Neimeyer Company.

Commissioner Harlan: Have they an engine?

Mr. Neimeyer: Three of them.

Commissioner Harlan: How many logging cars?

Mr. Neimeyer: Seventy, I think.

Commissioner Harlan: Do those logging cars run over your rails?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: And are hauled by those locomotives?

952 Mr. Neimeyer: The Little Rock, Maumelle & Western.

Commissioner Harlan: Do you get any traffic over that logging road except such as belongs to the Neimeyer Lumber Company?

Mr. Neimeyer: We do not.

Commissioner Harlan: What is your yearly tonnage, what was your tonnage for the last fiscal year from all sources?

Mr. Neimeyer: Our traffic manager will give you that information.

Commissioner Harlan: What is the capital stock of your road?

Mr. Neimeyer: $250,000. authorized.

Commissioner Harlan: And when was it organized?

Mr. Neimeyer: 1907.

Commissioner Harlan: What was the issue of capital stock?

Mr. Neimeyer: $160,000.

Commissioner Harlan: Was that issued for cash or property or partly both?

Mr. Neimeyer: I did not understand your question.

Commissioner Harlan: Was that capital stock issued for cash paid in to the railroad company, or for property turned
953 over to the railroad company?

Mr. Neimeyer: It was for construction work.

Commissioner Harlan: Well, I will put the question in a little different way. Who built the line of the Little Rock, Maumelle & Western, was it built by the railroad company or the lumber company?

Mr. Neimeyer: The railroad company.

Commissioner Harlan: Who furnished the money to do the work?

Mr. Neimeyer: There are bonds out to the amount of $160,000, and there is about $28,000 of that amount in the treasury, and borrowed money.

Commissioner Harlan: In addition to $160,000 of bonds, have you issued some stock?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: To the extent of——

Mr. Neimeyer: $160,000.

Commissioner Harlan: What was the cost of the line?

Mr. Neimeyer: In the neighborhood of $20,000 a mile.

Commissioner Harlan: That is, it cost about $320,000 all told?

954 Mr. Neimeyer: Yes, sir.

Commissioner Harlan: And it was paid for by an issue of $160,000 of bonds and a like amount of stock?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: And that included the cost of the equipment?

Mr. Neimeyer: No, sir.

Commissioner Harlan: How much did the equipment cost?

Mr. Neimeyer: I do not know the figures; I guess I can get that for you.

Commissioner Harlan: You are sure that did not include the cost of equipment?

Mr. Neimeyer: I think not.

Commissioner Harlan: Have you your annual report there?

Mr. Neimeyer: No, our traffic manager has it.

Commissioner Harlan: Mr. Neimeyer, who are the officers of the railroad company?

Mr. Neimeyer: A. J. Neimeyer is the President, E. B. Kinsworthy is Vice President, H. B. Becker, Secretary, Frank Neimeyer, Treasurer, G. W. Smith, Traffic Manager, C. J. Trowbridge, Auditor.

Commissioner Harlan: Are they all connected officially
955 with the lumber company?

Mr. Neimeyer: No.

Commissioner Harlan: Who are the officers of the lumber company?

Mr. Neimeyer: A. J. Neimeyer, President, C. A. Antrim, Vice President, Frank Neimeyer, Secretary, and H. C. Becker, Treasurer.

Commissioner Harlan: In a general way, without going into the details of the ownership of the stock of these two companies, is the railroad company owned practically by the stockholders of the lumber company?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: It is practically an identical investment by the same people?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: The lumber company and the railroad company?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: What is the tonnage that you get from this hardwood mill at Carnes annually?

Mr. Neimeyer: I could not give you that figure. Possibly our traffic manager can.

956 Commissioner Harlan: You cannot give it exactly, but can you give it in round numbers?

Mr. Neimeyer: No, I cannot.

Commissioner Harlan: Do you know the tonnage of the stave mill further along on the line?

Mr. Neimeyer: No, I am not familiar with it.

Commissioner Harlan: It is small, is it not?

Mr. Neimeyer: Well, it is considerable.

Mr. Mehaffy: I think the traffic man can give that.

Commissioner Harlan: Will you be kind enough to give those figures now, by your traffic manager.

Mr. Smith: I am figuring it up.

Commissioner Harlan: Does the railroad pay any dividends on its stock?

Mr. Neimeyer: It does not.

Commissioner Harlan: Who owns the bonds?

Mr. Neimeyer: They are held by individuals.

Commissioner Harlan: In the lumber company?
Mr. Neimeyer: Some of them.
Commissioner Harlan: Well, a great majority of them?
Mr. Neimeyer: Well, I think so.
957 Commissioner Harlan: What is the rate of interest on the bonds?
Mr. Neimeyer: Six per cent.
Commissioner Harlan: Do you know when this road was built from Becker to Maumelle?
Mr. Neimeyer: Yes, sir.
Commissioner Harlan: When was its construction first actually started and by whom?
Mr. Neimeyer: The fall of 1907.
Commissioner Harlan: You are now referring to the present rail line?
Mr. Neimeyer: Yes, sir.
Commissioner Harlan: Was there a logging line there before the railroad was built?
Mr. Neimeyer: No.
Commissioner Harlan: It was a virgin forest country?
Mr. Neimeyer: Yes, sir. Let me correct that statement. The fall of 1906.
Commissioner Harlan: And was it constructed right through to Maumelle or partially built and operated and then later ex-
958 tended?
Mr. Neimeyer: Partially built and operated, and then extended.
Commissioner Harlan: What was the mileage of the first portion that was constructed?
Mr. Neimeyer: Seven miles.
Mr. Harlan: Was there any logging done on that seven miles of railroad?
Mr. Neimeyer: On the main line?
Commissioner Harlan: Yes.
Mr. Neimeyer: A small amount.
Commissioner Harlan: Who did that logging?
Mr. Neimeyer: The A. J. Neimeyer Lumber Company.
Commissioner Harlan: Did they own the lands immediately around the seven mile track?
Mr. Neimeyer: A little of it, that is through the land that the track does run?
Commissioner Harlan: Yes.
Mr. Neimeyer: Very little of it.
Commissioner Harlan: Their ownership was at the west end of the track?
Mr. Neimeyer: Yes.
959 Commissioner Harlan: How long did it take them to clean up that lumber?
Mr. Neimeyer: About a year.
Commissioner Harlan: Did they have a logging road then connecting it?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Was that logging road about on the right of way of the present extension to Maumelle?

Mr. Neimeyer: No, sir, it was not on the right of way.

Commissioner Harlan: It ran at right angles?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Then after you got that cleaned up, you extended the line to Maumelle?

Mr. Neimeyer: Extended it to Carnes.

Commissioner Harlan: When was that extension?

Mr. Neimeyer: In 1907 sometime.

Commissioner Harlan: In making that extension did you run through any timber that belonged to the Neimeyer Lumber Company?

Mr. Neimeyer: A small amount.

Commissioner Harlan: And that was taken off, was it?

960 Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Did you lay a new logging road?

Mr. Neimeyer: We did.

Commissioner Harlan: Is that to the north or south of the regular road?

Mr. Neimeyer: Both sides.

Commissioner Harlan: How long were those logging roads?

Mr. Neimeyer: The longest spur up to this point I think was about four to five miles.

Commissioner Harlan: And those spurs were all operated by the lumber company and not by the railroad?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Did they at that time have equipment and operate it?

Mr. Neimeyer: The lumber company?

Commissioner Harlan: Yes.

Mr. Neimeyer: Yes, sir.

Commissioned Harlan: When those spurs were taken up, who did it?

Mr. Neimeyer: The lumber company.

Commissioner Harlan: The railroad company had no expense of moving those spurs?

961 Mr. Neimeyer: Not in the least.

Commissioner Harlan: When did you extend your line from Carnes to Maumelle?

Mr. Neimeyer: We began in the fall of 1907 and finished in 1908 some time.

Commissioner Harlan: And the lumber company connected the logging roads with your tracks, did it?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: How many logging roads did it have between Carnes and Maumelle?

Mr. Neimeyer: Between Carnes and Maumelle?

Commissioner Harlan: Yes, at any time since that extension was made?

Mr. Neimeyer: None at all between Carnes and Maumelle.
Commissioner Harlan: The only logging road connected with it is at Maumelle?
Mr. Neimeyer: At the present time.
Commissioner Harlan: And that comes in from the southwest?
Mr. Neimeyer: Northwest.
Commissioner Harlan: And that is the only logging road that has joined that extension from Carnes at any time?
962 Mr. Neimeyer: Yes, sir.
Commissioner Harlan: Has the railroad company at any time received traffic from any of these logging roads belonging to any one other than the Neimeyer Lumber Company?
Mr. Neimeyer: I think not.
Commissioner Harlan: Is the woods of your lumber company largely pine?
Mr. Neimeyer: Pine and oak.
Commissioner Harlan: Does it market the oak itself?
Mr. Neimeyer: It does.
Commissioner Harlan: The hardwood mill at Carnes does not exhaust your oak timber at all?
Mr. Neimeyer: No, we have another industry that we sell a certain class of our oak to.
Commissioner Harlan: You have another mill?
Mr. Neimeyer: It is owned by outside parties.
Commissioner Harlan: Haven't you two mills at Becker?
Mr. Neimeyer: No, sir. The Clark & Gay Manufacturing Company is located at Becker.
Commissioner Harlan: Have you any mill at Maumelle?
Mr. Neimeyer: No, sir.
963 Commissioner Harlan: Is there any mill there?
Mr. Neimeyer: No.
Commissioner Harlan: Is there any mill at the point called Douglass?
Mr. Neimeyer: No, sir.
Commissioner Harlan: Has the lumber company ever had a mill at Douglass or Maumelle?
Mr. Neimeyer: No, sir.
Commissioner Harlan: Has there been a mill there?
Mr. Neimeyer: Not to my knowledge.
Commissioner Harlan: The lumber of this lumber company goes into the general market, does it not, and competes with all this pine lumber from this region?
Mr. Neimeyer: Yes, sir.
Commissioner Harlan: Where is most of it shipped to?
Mr. Neimeyer: Do you want me to give you the states?
Commissioner Harlan: Well, in a general way.
Mr. Neimeyer: Missouri and Mississippi River points.
Commissioner Harlan: Do you go as far east as Chicago?
Mr. Neimeyer: Oh, yes, sir.

Commissioner Harlan: How much farther east?

964 Mr. Neimeyer: We ship into Massachusetts some.

Commissioner Harlan: The bulk of your shipments go east of the Mississippi River?

Mr. Neimeyer: No, sir.

Commissioner Harlan: Do you ship to the west at all, or to the south?

Mr. Neimeyer: We ship to the west. Not to the south.

Commissioner Harlan: Where does the main volume of your traffic go, east or west?

Mr. Neimeyer: I would say north, Oklahoma, Kansas, Nebraska, Iowa, Missouri and Illinois.

Commissioner Harlan: And as far east as Massachusetts?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: In competition with all the rest of this lumber?

Mr. Neimeyer: Yes.

Commissioner Harlan: Have you through rates to all those points?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: And what division do you get?

Mr. Neimeyer: I will be glad to have the traffic manager

965 answer those questions for you.

Commissioner Harlan: Can you now give us the volume of traffic from that hardwood mill at Carnes during the last fiscal year?

Mr. Smith: A little over 7,000 tons.

Commissioner Harlan: From the hardwood mills?

Mr. Smith: Yes, sir.

Commissioner Harlan: And from the two stave mills farther west?

Mr. Smith: About 300 tons.

Commissioner Harlan: And what was your total tonnage during that same fiscal year?

Mr. Smith: 105,194 tons.

Commissioner Harlan: You file your annual reports with the Interstate Commerce Commission, and your concurrences?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: And keep your accounts as prescribed by the Commission?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Where is the general office of your railroad?

966 Mr. Neimeyer: Becker, Ark.

Commissioner Harlan: Is it in the office of the lumber company?

Mr. Neimeyer: No.

Commissioner Harlan: Have you a freight station there?

Mr. Neimeyer: No.

Commissioner Harlan: Have you a freight station anywhere on your line?

Mr. Neimeyer: No, sir.

Commissioner Harlan: You have a separate office building?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: What sort of a building is it?

Mr. Neimeyer: Well, it is an ordinary wooden structure.

Commissioner Harlan: And all the records of the company are kept there?

Mr. Neimeyer: Yes, sir, all but the general ledger.

Commissioner Harlan: How many employés have you there stationed regularly?

Mr. Neimeyer: We have our traffic manager.

Commissioner Harlan: Does he do any business for the lumber company?

967 Mr. Neimeyer: He does not.

Commissioner Harlan: How many men have you in your track and train crews?

Mr. Neimeyer: He will answer all those questions. I think I can give them to you approximately.

Commissioner Harlan: That will do.

Mr. Neimeyer: Ten in the track crew, and four men in the train service.

Commissioner Harlan: You receive the logging train at the junction at Maumelle?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Your locomotives do not go out on the logging lines?

Mr. Neimeyer: No, only occasionally for repairs.

Commissioner Harlan: Is there a repair shop out on the logging line?

Mr. Neimeyer: We have a repair shop, yes, sir.

Commissioner Harlan: Who does the repairs, the lumber company?

Mr. Neimeyer: To what?

Commissioner Harlan: To the locomotives.

Mr. Neimeyer: Who- locomotives?

968 Commissioner Harlan: My inquiry was whether your railroad locomotives go out on the logging line?

Mr. Neimeyer: No.

Commissioner Harlan: And you said they do occasionally. Was that a mistake?

Mr. Neimeyer: No, sir, that was a mistake.

Commissioner Harlan: Do the lumber company's locomotives come in to your lines?

Mr. Neimeyer: Occasionally, for repairs.

Commissioner Harlan: Where is your repair shop?

Mr. Neimeyer: At Becker, the principal shop.

Commissioner Harlan: You do the repairs for the lumber company?

Mr. Neimeyer: No, the lumber company does the repairs for the railroad company.

Commissioner Harlan: Then the repair shop belongs to the lumber company and is at the mill?

Mr. Neimeyer: Yes: sir.

Commissioner Harlan: Does the lumber company make any charge against the railroad company?

Mr. Neimeyer: It does.

969 Commissioner Harlan: Does the railroad company unload the logs at the pond?

Mr. Neimeyer: They help; both companies participate in that unloading.

Commissioner Harlan: The saw mill employés come out and help the railroad employes do the unloading?

Mr. Neimeyer: Yes, sir,—not the sawmill employés, what we call the car men who keep the cars in repair.

Commissioner Harlan: By whom are those men paid?

Mr. Neimeyer. The Neimeyer Lumber Company, for what work they perform for them.

Commissioner Harlan: What division do you get from the Iron Mountain, or is it the Rock Island?

Mr. Neimeyer: Mr. Smith will answer that.

Mr. Smith: Here is our sheet (handing paper).

Commissioner Harlan: Your connection at Becker is the Iron Mountain, is it?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Do you also reach the rails of the Rock Island?

Mr. Neimeyer: We do not, only by switch.

970 Commissioner Harlan: To whom does that switch belong?

Mr. Neimeyer: We reach it only by a switching charge to the Iron Mountain; there is no connection.

Examiner Burchmore: The cost of construction of the Little Rock, Maumelle & Western Railroad approximated $20,000 per mile, you stated?

Mr. Neimeyer: Yes.

Examiner Burchmore: That seems to be rather high cost for construction. What is the character of this country?

Mr. Neimeyer: It is very hilly and rocky.

Examiner Burchmore: Is this line laid over those hills, or did you make cuts?

971 Mr. Neimeyer: No, sir; we made cuts and fills. We have a profile here of it, if you would like to see it.

Mr. Mehaffy: He has a profile from which you can get a pretty good idea about the line.

Mr. Neimeyer: There are one or two cuts which cost us $5,000 to make them, for a very short distance.

Examiner Burchmore: Do you cross any streams?

Mr. Neimeyer: Yes, sir.

Examiner Burchmore: How many bridges have you?

Mr. Neimeyer: I could not give you the number offhand. There are quite a number of them, a large number of them.

Commissioner Harlan: Is this an original document?

Mr. Neimeyer: Yes, sir, it is our located lines.

Examiner Harlan: I mean to say, have you other copies of this?

Mr. Neimeyer: I think we have, but that is—

Commissioner Harlan: If there is no objection I would like to have this attached to the record.

Mr. Mehaffy: If there is no other copy, we will have one made.

Mr. Neimeyer: We will have one made, but I am sure there——

972 (The paper so offered and identified was received in evidence and thereupon marked Little Rock, Maumelle & Western Railroad Exhibit No. 1, witness Neimeyer, received in evidence December 12, 1910, and is attached hereto.)

Examiner Burchmore: The mileage is 16 miles?

Mr. Neimeyer: Yes, sir.

Examiner Burchmore: Stock to the amount of $160,000 has been issued and outstanding. Was that sold for cash?

Mr. Neimeyer: No, sir.

Examiner Burchmore: Was it issued as a bonus with the bonds?

Mr. Neimeyer: Well, it was issued for construction work done by a construction company, in payment.

Commissioner Harlan: Mr. Neimeyer, I wish you would explain that very fully. I put you the inquiry as to the cost of this road, and understood you to say that it cost $20,000 in actual cash laid out, per mile. Now, I wish you would state whether or not that is the fact.

Mr. Neimeyer: Well, there was other money in this work besides——

Commissioner Harlan: Explain in your own way the full details of that financial transaction.

973 Mr. Neimeyer: There were bonds sold to the amount of $131,500 for which we received cash, and there was in the neighborhood of $200,000 of borrowed money, which we still owe.

Commissioner Harlan: Now, you mean by that that about $330,000 of actual cash was expended in the construction of that road?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: And why was the stock issued? I understand why the bonds were issued, because you borrowed $130,000 of money on those bonds. Now, you say you owe on notes or otherwise, some $200,000 more. Nevertheless you have got an issue of stock outstanding. You do not borrow money on stock ordinarily, although you may have done it in this case, but we want to know just how that stock was issued.

Mr. Neimeyer: It was issued to the construction company for work in building this line.

Commissioner Harlan: Let us see; you got some money on your bonds, $130,000. Then you borrowed $200,000, and you still owe that?

Mr. Neimeyer: Yes, sir.

974 Commissioner Harlan: Then you must have issued the stock to the construction company as a bonus; is not that it?

Mr. Neimeyer: That is correct.

Commissioner Harlan: Now, who composed the construction company? In the first place, tell us what the name of the construction company was.

Mr. Neimeyer: Becker Construction Company.

Commissioner Harlan: Named after the town of Becker?

Mr. Neimeyer: Named after an individual, one of our stockholders.

Commissioner Harlan: And the town was named after him?

Mr. Neimeyer: Yes.

Commissioner Harlan: Was he interested in the lumber company?

Mr. Neimeyer: He was.

Commissioner Harlan: Then is it not a fact the construction company was practically the lumber company?

Mr. Neimeyer: Well, I guess so.

Commissioner Harlan: Well, that is my understanding of the meaning of it all.

Mr. Neimeyer: I think so.

975 Commissioner Harlan: So that the lumber company and the construction company and the railroad company are practically one and the same interests?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Then when you said that the railroad cost $20,000 a mile, as I understand it, you meant to be understood not as indicating that it cost in actual dollars and cents so much, but only that that was the face of the transaction between these three companies?

Mr. Neimeyer: I didn't quite get that question.

Commissioner Harlan: Well, I put it in a little different way. I understood you to say that $160,000 of bonds were owned by the people that are interested in the lumber company.

Mr. Neimeyer: Not all of them.

Commissioner Harlan: Not all of them, but practically the entire issue is owned by those people?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: From whom did you borrow the $200,000?

Mr. Neimeyer: We borrowed $66,000 from Mr. Charles Becker.

Commissioner Harlan: That leaves $134,000.

Mr. Neimeyer: The other two amounts were borrowed from the Saginaw Lumber Company and the Monarch Lumber Company.

976 Commissioner Harlan: Now, we want to get at all these facts, and I wish you would facilitate the examination as much as you can, and I know you will. Who owns the A. J. Neimeyer Lumber Company? I do not mean the stockholders, but what investment interest owns that company? Is it not controlled by what is generally referred to as the A. J. Neimeyer interests of St. Louis?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: And they own and control the Neimeyer

Lumber Company and the Little Rock, Maumelle & Western Railroad Company and the Saginaw Lumber Company?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: And the Saginaw & Ouachita River Railroad?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: So that this entire capital was furnished by practically the one financial interest?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: I put you the question again: what did the railroad cost a mile in actual cash? Now, I do not mean cash paid to the construction company, but I mean in actual outlay.

977 Mr. Neimeyer: Well, I think I gave you that figure of $20,000: I think that is actual cash, if I am not mistaken.

Commissioner Harlan: Well, you are in a position to know about those things, are you not?

Mr. Neimeyer: I should be.

Commissioner Harlan: You mean to be understood as saying that that actual sum of money went into the construction of this road as those words ought to be understood?

Mr. Neimeyer: Yes, sir.

Examiner Burchmore: Who owns the right of way on which this road was laid?

Mr. Neimeyer: The Little Rock, Maumelle & Western.

Examiner Burchmore: The railroad owns the right of way?

Mr. Neimeyer: Yes, sir.

Examiner Burchmore: How did it acquire that right of way?

Mr. Neimeyer: Part of it was donated, part of it was paid for and part of it was condemned.

Examiner Burchmore: How much of it was donated?

Mr. Neimeyer: I could not tell you the exact amount.

Examiner Burchmore: Five miles, ten miles?

Mr. Neimeyer: No, I think not so much as that. I could not give you the figures.

Examiner Burchmore: By whom was it donated?

978 Mr. Neimeyer: By individuals who owned the land the road passed over.

Examiner Burchmore: By individuals interested in the lumber company?

Mr. Neimeyer: No.

Examiner Burchmore: How much of the road was purchased, how much of the right of way?

Mr. Neimeyer: I could not give you those figures.

Examiner Burchmore: About how much?

Mr. Neimeyer: I suppose ten or twelve miles of it; probably more.

Examiner Burchmore: From whom was it purchased?

Mr. Neimeyer: From the owners of the land that it passed over.

Examiner Burchmore: Were those owners interested in the lumber companies?

Mr. Neimeyer: In no way unless as to what part crossed the Neimeyer Lumber Company's lands.

Examiner Burchmore: How much of that purchased right of way crossed the Neimeyer Lumber Company's land, a substantial portion?

Mr. Neimeyer: No, sir.

979 Examiner Burchmore: Did the railroad company pay to the Neimeyer Lumber Company or to the interests that composed that Neimeyer Lumber Company any sum of money for right of way and land?

Mr. Neimeyer: They did not.

Examiner Burchmore: Did they issue stock in exchange for right of way land?

Mr. Neimeyer: They did not.

Examiner Burchmore: What rate of interest is paid on this $200,000 debt represented by notes?

Mr. Neimeyer: Six per cent.

Examiner Burchmore: Has that interest actually been paid?

Mr. Neimeyer: Yes, sir. Possibly not all of it, but the larger portion of it.

Examiner Burchmore: Has the railroad company paid any dividends on stock?

Mr. Neimeyer: No, sir.

Examiner Burchmore: The reports to the Commission seem to indicate that the revenue for the last fiscal year was $12,657.90, and the operating expenses $5,993.34, leaving a net earning of $6,664.56 from operation. What disposition was made of this net in-

980 come from operation of $6,664.56, if you know?

Mr. Neimeyer: I do not know.

Examiner Burchmore: It was used to pay interest on this indebtedness?

Mr. Neimeyer: Yes, sir.

Examiner Burchmore: And on the bonds?

Mr. Neimeyer: Yes, sir.

Examiner Burchmore: And when that interest on notes and bonds was paid, there was a deficit?

Mr. Neimeyer: I am not familiar with those figures.

Examiner Burchmore: What salaries are paid to the general officers of the railroad company?

Mr. Neimeyer: A. J. Neimeyer receives $200 a month.

Examiner Burchmore: Does he perform any actual labor in exchange for that salary?

Mr. Neimeyer: He is the general manager.

Examiner Burchmore: What portion of his time is devoted to railroad affairs?

Mr. Neimeyer: A small part of it.

Examiner Burchmore: Is that salary in substantial proportion to his salary from the lumber company?

Mr. Neimeyer: Yes, sir.

981 Examiner Burchmore: Does any other officer of the railroad company receive a salary?

Mr. Neimeyer: Yes, sir.

Examiner Burchmore: What officers?

Mr. Neimeyer: The treasurer and secretary and traffic manager.

Examiner Burchmore: What do those salaries aggregate?

Mr. Neimeyer: I could not give you the figures.

Examiner Burchmore: Can you state the salaries from the railroad company in amount?

Mr. Neimeyer: The secretary, $50 a month, I think; the treasurer is $25 I know. The traffic manager—do you mean the officers of the lumber company who receive salaries from the railroad company?

Examiner Burchmore: Yes.

Mr. Neimeyer: That is all.

Examiner Burchmore: $275 a month is paid to the general officers of the railroad company as salaries.

Mr. Neimeyer: Yes, sir; that are officers of the Neimeyer Lumber Company.

Examiner Burchmore: Any other officers of the railroad
982 company that are not officers of the lumber company that receive salaries?

Mr. Neimeyer: Yes.

Examiner Burchmore: What officer is that?

Mr. Neimeyer: The traffic manager.

Examiner Burchmore: Does the traffic manager perform any service for the lumber company?

Mr. Neimeyer: No.

Examiner Burchmore: Receives no salary from the lumber company?

Mr. Neimeyer: No.

Examiner Burchmore: What service does the traffic manager render to the railroad company?

Mr. Neimeyer: He operates the road.

Examiner Burchmore: He is general superintendent?

Mr. Neimeyer: Yes.

Examiner Burchmore: Devotes his entire time to the railroad business?

Mr. Neimeyer: Yes.

Examiner Burchmore: Is he a stockholder in this lumber company?

Mr. Neimeyer: He is not.

983 Examiner Burchmore: What was the total cost of the equipment of this road?

Mr. Neimeyer: I could not give you those figures.

Examiner Burchmore: Where was the money obtained for the purchase of the equipment?

Mr. Neimeyer: It was purchased from these moneys they borrowed, and on the bonds.

Examiner Burchmore: There was $160,000 obtained from the sale of bonds, and $200,000——

Mr. Neimeyer: No, sir; $131,500 from the sale of bonds, I think was the figure.

Examiner Burchmore: $200,000 obtained on notes, making $331,500 in money that was raised for the financing of this railroad?

Mr. Neimeyer: Yes.

Examiner Burchmore: You stated the cost of the road was $20,000 a mile, which for 16 miles, would be $320,000, leaving a remainder of $11,000, as I figure it.

Mr. Neimeyer: Yes, sir; something like that.

Examiner Burchmore: Did that $11,000 cover the cost of this locomotive, combination passenger coach, motor car, 14 freight cars, and the rest of the equipment?

984 Mr. Neimeyer: It would not miss it very far. Of course $20,000 might not be the exact figure, but it is near it. The locomotive is a second hand locomotive, which we bought we think, very cheap, and the cars were all second hand.

Examiner Burchmore: You stated there are ten men engaged in track work for the railroad company.

Mr. Neimeyer: Ten most of the time, and sometimes as high as 20.

Examiner Burchmore: Do those men put any part of their time in repairing, maintaining or changing the tracks of the lumber company?

Mr. Neimeyer: Only the switches at the mill that belong to the lumber company, which their engines use.

Examiner Burchmore: The trackmen of the railroad company perform no service for the lumber company.

Mr. Neimeyer: No, sir.

Examiner Burchmore: The Little Rock, Maumelle & Western carry passengers?

Mr. Neimeyer: It does.

Examiner Burchmore: Does it receive revenue from those passengers?

Mr. Niemeyer: Yes.

985 Examiner Burchmore: Are tickets sold for transportation?

Mr. Neimeyer: No.

Examiner Burchmore: Cash fares are collected on the train?

Mr. Niemeyer: Cash fares are collected on the train.

Examiner Burchmore: How many trains per day are run over this railroad?

Mr. Neimeyer: Two round trips.

Examiner Burchmore: Under regular schedule?

Mr. Neimeyer: Yes.

Examiner Burchmore: Do those trains make connections with the trains of other railroads?

Mr. Neimeyer: The logging road.

Examiner Burchmore: They make no connection with the Iron Mountain trains?

Mr. Neimeyer: No.

Examiner Burchmore: Does your railroad company have any trackage rights over the Iron Mountain?

Mr. Neimeyer: No, not to my knowledge.

Examiner Burchmore: It does not operate its engines or trains over the Iron Mountain tracks?

Mr. Neimeyer: No.

Examiner Burchmore: On examining these maps of your
986 line from Carnes to Douglas and from Becker to Carnes, I note one or two tracts of land belonging to the St. Louis, Iron Mountain & Southern, apparently.

Mr. Neimeyer: I think those belong to the Neimeyer Lumber Company, as the entire tract was purchased from the St. Louis, Iron Mountain & Southern Railway.

Commissioner Harlan: When was that purchase made?

Mr. Neimeyer: In 1904.

Examiner Burchmore: Are any of the officers of the Iron Mountain Railroad interested in the Neimeyer Lumber Company?

Mr. Neimeyer: They are not.

Examiner Burchmore: Are any of them interested in this railroad company?

Mr. Neimeyer: No.

Examiner Burchmore: Is the St. Louis, Iron Mountain & Southern interested in either the railroad company or lumber company?

Mr. Neimeyer: No.

Examiner Burchmore: Who furnished the steel for the tracks of this railroad company?

Mr. Neimeyer: Four miles of it was bought from the St. Louis, Iron Mountain & Southern. First it was leased and after-
987 ward purchased.

Examiner Burchmore: The rail was leased off the ground?

Mr. Neimeyer: Yes.

Examiner Burchmore: Not laid?

Mr. Neimeyer: No, and the balance was purchased in the market.

Examiner Burchmore: On what basis was that rail leased originally, on a percentage of its value or how?

Mr. Neimeyer: Yes, sir.

Examiner Burchmore: What was that percentage?

Mr. Neimeyer: Six per cent, I think.

Examiner Burchmore: Of what valuation; that is the regular market price?

Mr. Neimeyer: Yes, sir. I do not know the figures, I have not got those with me.

Examiner Burchmore: Well, describe that valuation of the rail.

Mr. Neimeyer: Per ton?

Examiner Burchmore: Was it supposed to be the market value of rail in Little Rock or the market value of rail in the rolling mills?

Mr. Neimeyer: The market value of relaying rail at Little
988 Rock.

Examiner Burchmore: Was that second hand rail?

Mr. Neimeyer: Yes, sir.

Examiner Burchmore: When was that rail purchased, that four miles of rail?

Mr. Neimeyer: I do not know the exact date.

Examiner Burchmore: About when?

Mr. Neimeyer: Our traffic manager can answer that question.

Examiner Burchmore: Was it purchased at the same price as the rent that had previously been estimated on?

Mr. Neimeyer: He probably can answer that question.

Examiner Burchmore: Are you familiar with the rates and divisions of those rates?

Mr. Neimeyer: No, sir, only in a general way.

Examiner Burchmore: Is not the hard wood mill which you referred to as being located at Carnes owned by the Neimeyer Lumber Company?

Mr. Neimeyer: It is not.

Examiner Burchmore: Who does own it?

Mr. Neimeyer: A. C. McCarley.

Examiner Burchmore: Was it formerly owned by the Neimeyer Lumber Company?

989 Mr. Neimeyer: No.

Examiner Burchmore: Was it formerly owned by any stockholders of the Neimeyer Lumber Company?

Mr. Neimeyer: No.

Examiner Burchmore: Is there any direct or indirect relation between A. C. McCarley and the Neimeyer interests?

Mr. Neimeyer: No.

Examiner Burchmore: The stave mills located farther west on the line, are they owned by the Neimeyer interests?

Mr. Neimeyer: No.

Examiner Burchmore: By A. C. McCarley?

Mr. Neimeyer: No.

Examiner Burchmore: Who does own them?

Mr. Neimeyer: The Greenville Stave Company.

Examiner Burchmore: Any relation between the Greenville Stave Company or its stockholders and the Neimeyer interests?

Mr. Neimeyer: None at all.

Examiner Burchmore: Do those stave mill owners hold any stock in this railroad?

Mr. Neimeyer: No, sir.

Examiner Burchmore: Our reports of examinations made of your company indicate that the hard wood mill was located

990 eleven miles from the junction point at a place known as Douglas, and not referred to on the reports as Carnes.

Mr. Mehaffy: That is not Carnes, that is Maumelle. Douglas and Maumelle are the same, and Carnes is a different place.

Examiner Burchmore: Douglas and Maumelle are 16 miles from Becker.

Mr. Neimeyer: Yes:

Examiner Burchmore: Carnes is eleven miles from Becker. This seems to indicate that the hard wood mill, eleven miles from Becker, was owned by the Neimeyer Lumber Company, such information having apparently been furnished by officers of the railroad company. Is that incorrect?

Mr. Neimeyer: It is incorrect. Mr. McCarley owns the mill.

Examiner Burchmore: Does he own any stock in the railroad company?

Mr. Neimeyer: No.

Examiner Burchmore: In the Neimeyer Lumber Company?
Mr. Neimeyer: No, sir.
Commissioner Harlan: That mill is not operated directly or indirectly for the Neimeyer interests?
Mr. Neimeyer: The logs are furnished by the Neimeyer
991 Lumber Company.
Commissioner Harlan: That is all?
Mr. Neimeyer: Yes, sir; and he charges them so much per thousand. They are not sold to him; the lumber belongs to the Neimeyer Lumber Company. He charges $3.00 per thousand for sawing that oak timber into lumber.
Commissioner Harlan: And the lumber thus manufactured is marketed by the Neimeyer Lumber Company?
Mr. Neimeyer: Yes, sir; it is the property of the Neimeyer Lumber Company.
Commissioner Harlan: But the stave mills use their own product?
Mr. Neimeyer: Yes.
Examiner Burchmore: The reports to the Commission seem to indicate, as I stated a moment ago, operating expenses for the fiscal year of 5993.34. Is that the correct figure as you remember it?
Mr. Neimeyer: No, sir; I do not remember it.
Examiner Burchmore: What is the total operating expenses per annum?
Mr. Neimeyer: I could not give you those figures. Our traffic manager will give them to you.
Examiner Burchmore: Have you a copy of the annual report here?
992 Mr. Neimeyer: Our traffic manager has it.
Commissioner Harlan: Have you some questions to put to this witness?
Mr. Mehaffy: Yes, but would you like to take up the Saginaw & Ouachita River? He is the same witness we will use there.
Commissioner Harlan: We will go through the examination first on this line.
993 Mr. Mehaffy: Do you know, Mr. Neimeyer, which corporation was organized first, the lumber company or the Little Rock, Maumelle & Western?
Mr. Neimeyer: The lumber company.
Mr. Mehaffy: It was some time near the same time, the building of the two?
Mr. Neimeyer: No, sir; the Neimeyer Lumber Company was incorporated in 1904 and the railroad company in 1907.
Mr. Mehaffy: I believe that you have already stated that your right of way not only belonged to the railway company but that it was acquired by donation, purchase and condemnation?
Mr. Neimeyer: Yes, sir.
Mr. Mehaffy: Has the railroad company actually condemned right of way there in the courts of Arkansas?
Mr. Neimeyer: It has.
Mr. Mehaffy: Does the railroad company charge the Neimeyer

Lumber Company the same rates for services performed for it that it does these other industries on its line?

Mr. Neimeyer: It does.

Mr. Mehaffy: Were these industries on the line of the railroad put there after the road was built?

994 Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: Have they any other means of transportation except to haul it to the Iron Mountain or the Rock Island?

Mr. Neimeyer: They have not.

Commissioner Harlan: Let me interrupt just a moment at that point. From this map I see that your railroad runs substantially parallel to a branch of the Rock Island out of Little Rock. Do you know how far apart the two lines are?

Mr. Neimeyer: The railroad line and the Rock Island?

Commissioner Harland: Yes.

Mr. Neimeyer: Well, I think that they run parallel there a distance of seven miles at least.

Mr. Mehaffy: Becker is really and practically part of Little Rock, is it not?

Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: And you were asked about a post office there. The mail addressed there is addressed to Little Rock?

Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: There are quite a number of stock holders in the railroad company that are not interested in any way at all in the lumber company, are there not?

Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: The lumber company itself does not own

995 any stock in the railroad company, does it?

Mr. Neimeyer: How is that?

(Question repeated.)

Mr. Neimeyer: No, sir.

Mr. Mehaffy: But some of the stockholders own stock?

Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: I believe you stated you ran these trains, two a day, on schedule time?

Mr. Neimeyer: Yes.

Mr. Mehaffy: You charge everybody who rides the regular passenger fare?

Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: How is that rate fixed; by the Arkansas law or the Arkansas Railroad Commission?

Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: These other factories, Clark & Gay—that is entirely independent of the lumber company and the railroad company, is it?

Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: Has that been established there since the organization of the railroad?

Mr. Neimeyer: Shortly afterward.

996 Mr. Mehaffy: In bringing the logs into the mill for the lumber company, does the railroad company bring them in at a certain price and charge the lumber company for the service?

Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: What is that charge, do you know?

Mr. Neimeyer: Two cents per 100 pounds.

Mr. Mehaffy: Is it or not true that you are preparing for a connection also with the Rock Island Railroad?

Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: That has not yet been completed?

Mr. Neimeyer: No, sir.

Mr. Mehaffy: What sort of country is that in the direction in which the Little Rock, Maumelle & Western is going? It is built out 16 miles. The charter, I believe, provides for 25 miles. What is out there to be hauled or transported?

Mr. Neimeyer: It is considerable of an agricultural country; there is a large amount of rock and wood, stave timber, also a large tract of timber which the Neimeyer Lumber Company is not interested in.

Mr. Mehaffy: The timber of the Neimeyer Lumber Company, and then other large tracts of timber, in which they have no interest at all?

997 Mr. Neimeyer: Yes, sir. Not within the 25 miles, though, the other timber.

Mr. Mehaffy: It is beyond that?

Mr. Neimeyer: Yes.

Mr. Mehaffy: Is there any means of getting that to market at all except by this railroad?

Mr. Neimeyer: I think not.

Mr. Mehaffy: Do you comply with all the regulations of the Arkansas Railroad Commission, and the rules and regulations of the Interstate Commerce Commission?

Mr. Neimeyer: We do.

Mr. Mehaffy: I believe that is all.

Examiner Burchmore: The figures that I referred to a few moments ago as being the operating revenue and operating expenses were apparently for the year 1908. This purports to be a copy of your annual report for the year ending June 30, 1910, and it shows on page 91 six general officers receiving an annual compensation aggregating $6,150. I understood you to refer to four general officers, who received an aggregate annual salary, as I footed it up, of $3,300. That leaves a discrepancy in the figures. Will you state again who the officers are who receive salaries, and what
998 those salaries are?

Mr. Neimeyer: The president receives $200; the secretary I think is $50; the treasurer $25; traffic manager, $150, and the auditor $50.

Examiner Burchmore: And one other.

Mr. Neimeyer: The general attorney, I think, $100. I think that is the six. I cannot give you those exact figures. Our traffic manager can furnish that.

Commissioner Harlan: Is the general attorney also attorney for the lumber company?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: Does he receive any salary from the lumber company?

Mr. Neimeyer: He does not.

Commissioner Harlan: What about the auditor, does he receive a salary from the lumber company?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: What amount?

Mr. Neimeyer: $50.

Commissioner Harlan: So from the two companies he gets $100 a month?

Mr. Neimeyer: Yes.

999 Commissioner Harlan: Then who is it that gets $150, the traffic manager?

Mr. Neimeyer: Yes.

Commissioner Harlan: He does not get any salary from the lumber company?

Mr. Neimeyer: No.

Commissioner Harlan: The secretary of the railroad company gets $50.

Mr. Neimeyer: I think that is $50.

Commissioner Harlan: Does he get a salary from the lumber company?

Mr. Neimeyer: Yes, sir.

Commissioner Harlan: How much?

Mr. Neimeyer: $75.

Commissioner Harlan: And the president's salary from the lumber company is what?

Mr. Neimeyer: $200.

Examiner Burchmore: The operating revenues for the same year as given in this report on page 45 are $47,341.83, and the operating expenses were $22,607.68, apparently, divided as follows: $3,977.10 for maintenance of way, $3,590.90 for maintenance of equipment, $350.10 for traffic expenses, $10,427.00 for trans-

1000 portation expenses, and $4,262.43 for general expenses. I presume it is unnecessary to ask any question about that, except to call attention to the fact that the salaries of the general officers and general office clerks are $4,000, which compares to $4,000 for maintenance of way, $3,500 for maintenance of equipment, and is the largest single item of expense, with the exception of transportation expenses. The difference between the total operating expenses and total operating revenue is apparently in excess of $25,000. That, I understand, is the sum used for the payment of the interest on the bonds and mortgage indebtedness.

Mr. Neimeyer: Do you want me to give a full list of the salaries paid by the railroad company?

Examiner Burchmore: No. This report indicates that for your engineers, firemen and brakemen.

Mr. Neimeyer: And trackmen.

Examiner Burchmore: There are some general office clerks in addition?

Mr. Neimeyer: Yes, sir; that is what I wanted to get at.

Examiner Burchmore: Do those general office clerks work exclusively for the railroad company?

1001 Mr. Neimeyer: They do not.

Examiner Burchmore: What proportion of their time is devoted to the service of the railroad company?

Mr. Neimeyer: I could not say exactly, but the amount paid them is supposed to pay them for the time that they put in for the railroad company.

Examiner Burchmore: The proportion between the time devoted to the work of the railroad company and the total time that they work is supposed to be the same as the proportion in their salaries?

Mr. Neimeyer: Yes, sir.

Examiner Burchmore: Are any passes issued to the officers of your company?

Mr. Neimeyer: They are.

Examiner Burchmore: To what officers?

Mr. Neimeyer: Speaking of the railroad company?

Examiner Burchmore: Yes, the railroad company.

Mr. Neimeyer: The president, vice president, secretary, treasurer, traffic manager.

Examiner Burchmore: Are those annual passes?

Mr. Neimeyer: Yes, sir, on our road.

Examiner Burchmore: Exchange transportation, is that is-

1002 sued by the Iron Mountain to your officers?

Mr. Neimeyer: Yes, sir, but not to all of them.

Examiner Burchmore: The passes you referred to were Little Rock, Maumelle & Western passes?

Mr. Neimeyer: Yes, sir.

Examiner Burchmore: What transportation do the officers of the railroad company hold over foreign lines?

Mr. Neimeyer: The president has an annual over the St. Louis, Iron Mountain & Southern, and the Burlington, and possibly one or two other lines that I do not know of.

Examiner Burchmore: The Rock Island?

Mr. Neimeyer: No, sir. The vice-president receives no transportation from being connected with our line. The treasurer holds an annual from the Rock Island and the Iron Mountain, L. & A. and a few other lines.

Examiner Burchmore: The vice-president holds transportation by virtue of his office in other railroad companies?

Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: There is one question I forgot to ask. You were asked about this Little Rock, Maumelle & Western running parallel with the Rock Island. Is it not true that where it does parallel the Rock Island and in the direction in which it goes, that

1003 it would be practically impossible, because of the mountains, to get from one railroad to the other?

Mr. Neimeyer: Yes, sir.

Mr. Mehaffy: Or for shippers or persons who wanted to transport goods in the territory of the Little Rock, Maumelle & Western to get to the Rock Island at all?

Mr. Neimeyer: Yes, sir.

Mr. Cowan: You are pretty well acquainted with the saw mill situation, and their location with respect to the different railroad lines in Arkansas?

Mr. Neimeyer: A few of them.

Mr. Cowan: Do you know any case where the main railroad, trunk line, I will call it, builds any industry spurs to saw mills, loading tracks of saw mills?

Mr. Neimeyer: No, sir; I do not know of any.

Mr. Cowan: Is it not a fact that to all other industries, however, like cottonseed oil mills, and the like, the railroad does build an industrial spur to the industry?

Mr. Neimeyer: I am not familiar with that.

Mr. Cowan: Is it not a fact that the scheme is worked and everybody knows about it, and it is a matter of common understanding, that a railroad company in the case of a saw mill industry

1004 builds no spurs to the loading tracks, but leaves the saw mill interests to do it in order to get a division of the rate, is not that commonly understood to be the case?

Mr. Neimeyer: I don't know what other people do or how that is arranged.

Mr. Cowan: Well, that is the way it is in your own case?

Mr. Neimeyer: Yes, I guess so.

Mr. Cowan: There is not any obstacle to a railroad company building a spur to a saw mill loading track, just as well as it can build a spur to a cotton oil mill or to a warehouse for a wholesale grocer, is there?

Mr. Neimeyer: I would think so.

Mr. Cowan: You think there is an obstacle to doing it?

Mr. Neimeyer: I do not know as there is one.

Mr. Cowan: You spoke of the owners of the stock of this railroad company. Inasmuch as the railroad is in debt on account of its bonds, and money borrowed for as much as it is worth, or as much as it costs, the stock is a matter of no particular value, is it, except just to control the corporation?

Mr. Neimeyer: Well, we hope it will be.

Mr. Cowan: But at present it is not?

1005 Mr. Neimeyer: No, sir.

Mr. Cowan: So it does not matter much whether a man who owns the stock is an owner in the saw mill or not, he has not got anything at present, whether he is the owner of the stock in the saw mill or not, and he has got nothing by owning the stock in the railroad company?

Mr. Neimeyer: I don't think he has got much in either one at the present time.

Mr. Cowan: Now, the funds that arise from the operation of this railroad go to the bondholders and to the creditors?

Mr. Neimeyer: Yes, sir.

Mr. Cowan: For interest?
Mr. Neimeyer: Yes.
Mr. Cowan: Who are the bondholders?
Mr. Neimeyer: They are individuals.
Commissioner Harlan: He said the same people own the bonds that own the lumber company.
Mr. Neimeyer: Part of the same people.
Mr. Cowan: The people to whom the indebtedness is owing are also the same interests?
Mr. Neimeyer: Yes, sir.
Mr. Cowan: So that the man having the stock in the rail-
1006 road company, the proceeds of the operation do not go to him anyhow, really?
(No response.)
Mr. Cowan: You have a man here who does know about the billing and the like. You do not claim to know anything about the billing and handling of the traffic?
Mr. Neimeyer: No, the traffic manager will tell you that.
Mr. Cowan: That is all.
(Witness excused.)

G. W. SMITH was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: State your name.
Mr. Smith: G. W. Smith.
Commissioner Harlan: What relation do you bear to the railroad company we have just been talking about?
Mr. Smith: Traffic manager.
Commissioner Harlan: How long have you been connected with it as traffic manager?
Mr. Smith: About three years.
Commissioner Harlan: You have no relation to the lumber company, as I understand?
1007 Mr. Smith: No.
Commissioner Harlan: Perform no duties for them at all?
Mr. Smith: No.
Commissioner Harlan: What sort of billing does the Little Rock, Maumelle & Western Railroad Company issue on lumber hauled by it, or logs hauled by it? Just describe the whole rate situation.
Mr. Smith: On the logs brought in at the mill they issue local billing.
Commissioner Harlan: Where is the billing issued?
Mr. Smith: At Becker.
Commissioner Harlan: At the mill?
Mr. Smith: At the office at Becker.
Commissioner Harlan: What charge does the company make for that service, and against whom?
Mr. Smith: They make a charge of two cents per 100 pounds against the mill company.
Commissioner Harlan: And that is regularly paid, is it?

Mr. Smith: Yes, sir.

Commissioner Harlan: How often are settlements made?

Mr. Smith: They settle once a month.

Commissioner Harlan: And what service is performed by
1008 the railroad company for that charge? Just describe the exact service.

Mr. Smith: They haul those logs from Maumelle to Becker, a distance of 16 miles.

Commissioner Harlan: And then the railroad employees join with others in unloading the logs into the pond?

Mr. Smith: Yes, sir.

Commissioner Harlan: Is that all the service that the railroad company does for the two cents?

Mr. Smith: Yes.

Commissioner Harlan: Is that two cents a thousand feet log measure?

Mr. Smith: Yes, sir—no, it is two cents per 100 pounds, estimated weights.

Mr. Andrews: He has used the two cents interchangeably. I do not know whether he means two cents per 100 pounds or per 1,000 feet of logs.

Commissioner Harlan: Explain that.

Mr. Smith: It is two cents per 100 pounds. Pine logs are estimated 7½ pounds to the foot, and hard wood at ten pounds to the foot.

Commissioner Harlan: Are the logs actually weighed?

1009 Mr. Smith: No.

Mr. Cowan: What does that amount to per car?

Commissioner Harlan: Yes, what does that amount to per car?

Mr. Smith: It goes about $4.50 to $5.00 a car.

Commissioner Harlan: How many cars are in an ordinary train?

Mr. Smith: About 20 cars.

Commissioner Harlan: About how many trains do you move in a given period?

Mr. Smith: We move two trains a day.

Commissioner Harlan: Does the two cents cover the haul of the empties back to the junction of the logging road?

Mr. Smith: Yes.

Commissioner Harlan: You make no charge for that service?

Mr. Smith: No.

Commissioner Harlan: What other source of revenue has the railroad company?

Mr. Smith: Well, on the outbound business; that is, on through cars, they get a division, as shown by that sheet.

Commissioner Harlan: That is to say, on manufactured lumber
you get to all points on the Missouri Pacific and the Iron
1010 Mountain except points in Oklahoma, Arkansas, Louisiana and Texas six cents per 100 pounds.

Mr. Smith: Yes.

Commissioner Harlan: What service do you perform for that compensation?

Mr. Smith: You will notice at the bottom of that sheet that we add two cents; we get really two cents off of that on the division.

Commissioner Harlan: Explain that.

Mr. Smith: We add for the service of the Little Rock, Maumelle & Western two cents on the finished product, and on that we get six cents per 100 pounds, we get from the connecting line, the trunk line, four cents, and the lumber company pays the two cents.

Commissioner Harlan: Now, you charge the lumber company two cents for bringing the logs into the mill and you also charge the lumber company two cents out of the through rate.

Mr. Smith: On the finished product; yes, sir. In other words, we add two cents to the through rate.

Commissioner Harlan: And then you add two cents to the through rate?

Mr. Smith: Yes, sir, to the trunk line rate.

Commissioner Harlan: Take a shipment to a typical point
1011 on the Missouri Pacific, and state the through rate.

Mr. Smith: We will say to Jefferson City, it will be six cents, and——

Commissioner Harlan: Just a moment. I want to know what is the joint through rate from Becker to Jefferson City.

Mr. Smith: I think it is 26 cents.

Commissioner Harlan: And you add two cents to that rate?

Mr. Smith: No, it would be 22 cents. I guess the Jefferson City rate is probably 18 cents.

Commissioner Harlan: Have you in mind any definite rate on manufactured lumber from Becker to any given point?

Mr. Smith: I can give you St. Louis. The Iron Mountain rate to St. Louis is 18 cents. We would add two cents——

Commissioner Harlan: From what point?

Mr. Smith: From Little Rock; from our connection.

Commissioner Harlan: Well, your connection with the Iron Mountain is at Becker, eight miles out?

Mr. Smith: Well, it is about—I think that is meant for 8/10 of a mile.

Commissioner Harlan: You think it ought to be .8 of a mile.

Mr. Smith: Yes.

Commissioner Harlan: Is that at Becker?

Mr. Smith: No, that is at the connection of the Iron
1012 Mountain.

Commissioner Harlan: What is the joint through rate from the mill to St. Louis, if there is a joint through rate?

Mr. Smith: Twenty cents.

Commissioner Harlan: Is that published as a joint through rate from your mill, or from Becker?

Mr. Smith: Yes, sir; that is published as a joint through rate.

Commissioner Harlan: That is the total charge that the lumber company pays?

Mr. Smith: Yes.

Commissioner Harlan: What part of that charge do you get?

Mr. Smith: We get five cents.

Commissioner Harlan: You get that from whom?

Mr. Smith: From the Iron Mountain.

Commissioner Harlan: That is a division?

Mr. Smith: Yes, sir.

Commissioner Harlan: What relation has this two cents which you have referred to, to that divsion; what is the two cents?

Mr. Smith: Well, the two cents is supposed to cover the mill service; the railroad service from the mill to the junction.

1013 because the division that they give the railroad company would not earn as much money as it should on the division that they allow.

Commissioner Harlan: You are a traffic man and you ought to know about rates, and I wish you would just explain in your own way what the rate is on the through cars, whatever it is or however it is published, on manufactured lumber from the mill to St. Louis, and what part your railroad company gets out of it.

Mr. Smith: The through rate as published from Becker to St. Louis is 20 cents, and our line gets in settlement with the Iron Mountain five cents and the Iron Mountain gets 15 cents.

Commissioner Harlan: What service do you perform for that five cents?

Mr. Smith: That five cents in addition to the two cents which is charged on the logs into the mill covers the entire service from the end of the line to the junction.

Commissioner Harlan: We are talking now about the rates on manufactured lumber. You have already disposed of your charge of two cents on the logs.

Mr. Smith: That would cover the service from the mill to

1014 the junction.

Commissioner Harlan: That would cover the service from the mill to the junction with the Iron Mountain?

Mr. Smith: Yes, sir; to the connection.

Commissioner Harlan: For that compensation you set the empty car at the mill?

Mr. Smith: Yes.

Commissioner Harlan: And you take it from the junction?

Mr. Smith: Yes.

Commissioner Harlan: And set it at the mill?

Mr. Smith: Yes.

Commissioner Harlan: And then the loaded car you set back on the interchange track?

Mr. Smith: Yes, sir. Now, there is one feature in there we have not touched. The mill company, as shown by this tariff, gets a milling in transit rate. When the finished product is billed out, we allow them credit for that tonnage on what we have charged them on the logs hauled in.

Commissioner Harlan: Just explain that transaction. There is a shipment of the manufactured lumber out on a 20 cent rate, of which you get five cents?

Mr. Smith: Yes.

1015 Commissioner Harlan: You have already received two cents on the logs coming in?

Mr. Smith: Yes, sir. Now, if that car weighs 60,000 pounds, we would allow the mill company a credit on their logging bill of two cents a hundred on that finished product.

Commissioner Harlan: That is, of the inbound log bills?

Mr. Smith: Yes.

Commissioner Harlan: You make a refund, in other words?

Mr. Smith: Yes, sir. A milling in transit arrangement, the same as made on all railroads where their products are manufactured or finished en route.

Commissioner Harlan: So, as a matter of fact, then, on the logs that enter into a carload of manufactured lumber, the lumber company pays a through charge of 20 cents?

Mr. Smith: Yes, the lumber company pays a through charge of 20 cents, less the credit they are allowed on the logs coming in.

Commissioner Harlan: Well, it pays a through charge of 20 cents, as I understand you to say, and then you get out of that five cents?

Mr. Smith: And we pay to the mill company, we allow them credit on their previous log bill. When the logs come into
1016 the mills, we assess a freight and collect it. When the finished product is shipped out, then we allow them credit for the tonnage of the finished product, on their log bill, which virtually represents their log bill.

Commissioner Harlan: Well, I though- so. How many carloads of logs make one carload of lumber?

Mr. Smith: I believe they figure about 40 per cent.

Commissioner Harlan: Can you answer the question a little more directly? I asked how many carloads of logs make one carload of manufactured lumber?

Mr. Smith: I think about eight.

Commissioner Harlan: I may be a little bit dull about this, but I would like to know what the lumber company pays, starting from the junction of your line with the logging road on eight carloads of logs manufactured into one carload of lumber and sent on to St. Louis.

Mr. Smith: Well, we will say the eight carloads of logs would cost them $40; the finished product would be $20; that is $60, and——

Commissioner Harlan: I do not mean the total, but the rate.

Mr. Smith: Well, it would be seven cents through—no, it would not. I will have to figure that out, I guess. The logs
1017 coming into the mill and the finished product out, on the average, is about 40 per cent, and the balance is wasted; it is slabs, and so on.

Mr. Mehaffy: I think he is just a little mixed on it.

Commissioner Harlan: I do not know who is mixed; I suspect I am, but I would like to know about it.

Mr. Mehaffy: That is exactly what I am undertaking to do. I think I can state it to him.

Commissioner Harlan: Very well, if you will go at it.

Mr. Mehaffy: I will try. Forty per cent, you mean when the

logs come in from the woods, the amount that goes out in finished product is about 40 per cent of what comes in?

Mr. Smith: Yes, sir.

Mr. Mehaffy: But when you load the cars out in the woods it takes eight of those cars practically to make one carload of lumber?

Mr. Smith: Yes.

Mr. Mehaffy: Now, you stated you got two cents for bringing them in and then got a division of the rate to St. Louis, and the Commissioner wants to know about that two cents. Explain that.

Mr. Smith: You mean the two cents on the logs in, or two
1018 cents on the finished product out?

Commissioner Harlan: The question is, what you mean.

Mr. Mehaffy: Well, the railroad company gets the division on the finished product, does it not?

Mr. Smith: Yes.

Mr. Mehaffy: The mill company pays the railroad company two cents for bringing the logs in?

Mr. Smith: Yes.

Mr. Mehaffy: You state because of the milling in transit privilege that you give the mill company then credit for the two cents back. Now, that is what the Commissioner wanted you to explain, I think.

Mr. Smith: Yes.

1019 Commissioner Harlan: Then your five cents covers the two cents in, is that it? Do you refund that to the lumber company?

Mr. Smith: It will not cover quite that, because the finished product does not equal the amount that is brought in of the raw material, as I tried to explain; there is a certain wastage in there that does not go out in the finished product, therefore the railroad does not refund quite two cents, it refunds the difference between the amount of manufactured product and the wastage in the logs that are manufactured.

Commissioner Harlan: And the result of the transaction is that the lumber company does pay something on the inbound movement?

Mr. Smith: Yes, sir. I would change that—well, forty per cent, they would pay 1.2 cents per hundred.

Commissioner Harlan: They would pay on the 60 per cent of the inbound movement of logs?

Mr. Smith: Yes, sir.

Commissioner Harlan: So that the lumber company actually does pay you 60 per cent of two cents per 100 pounds?

Mr. Smith: Yes.

1020 Commissioner Harlan: Estimated weight?

Mr. Smith: That gets at it.

Commissioner Harlan: What authority in the published tariffs is there for a refund by you to the lumber company of 40 per cent of the two cents inbound?

Mr. Smith: That tariff is open to anyone who does a milling in transit business on the line; it is filed with the Interstate Commerce

Commission and approved by them, and approved by the Railroad Commission of Arkansas.

Commissioner Harlan: It is a regular milling in transit tariff?

Mr. Smith: Yes, sir the same as all other milling in transit rates, on grain and so on.

Commissioner Harlan: You have stated the total tonnage?

Mr. Smith: Yes.

Commissioner Harlan: I observe on these two sheets which you have handed to me, and which I understand to be your division sheets, you get as high as 6 cents per 100 pounds from the outbound movements of manufactured lumber, and at other points on other lines you get 5 cents, and it runs down to nothing to points in Arkansas, Louisiana and Texas. Now what does that mean, that you receive no compensation for your participation——

1021 Mr. Smith: We receive no divisions from the trunk lines.

Commissioner Harlan: To Arkansas, Louisiana and Texas points?

Mr. Smith: Yes.

Commissioner Harlan: What charge do you make?

Mr. Smith: We make the regular service charge.

Commissioner Harlan: Is that a charge per 100 pounds or per car?

Mr. Smith: No, per car.

Commissioner Harlan: On the manufactured lumber?

Mr. Smith: As fixed by the Railroad Commission of Arkansas. We never shipped anything except into the State of Arkansas, we never shipped anything to Louisiana.

Commissioner Harlan: And that charge which you call a charge per car includes the haul from the mill to the junction point?

Mr. Smith: Yes, sir.

Commissioner Harlan: And that is in addition to the haul of the logs inbound?

Mr. Smith: Yes, sir.

Examiner Burchmore: That charge is $3.00 per car for

1022 switching?

Mr. Smith: Yes, sir.

Examiner Burchmore: Does that compensate you for the service of switching out?

Mr. Smith: Well, I could not say. That is what they were willing to make the charge.

Examiner Burchmore: In your opinion is that sufficient?

Mr. Smith: Well, we could not go higher than that. The Railroad Commission of Arkansas would not allow it. They fixed the rate of switching for anything under three miles at $3.00.

Examiner Burchmore: You regard that $3.00 a car as inadequate?

Mr. Smith: I really could not say as to that.

Examiner Burchmore: It never occurred to you that it is inadequate?

Mr. Smith: No.

Examiner Burchmore: Have you any contracts with the Rock

Island Railroad, aside from their division sheets, with regard to rates or divisions?

Mr. Smith: No, sir.

Examiner Burchmore: What percentage of your finished
1023 lumber moved out over the Rock Island?

Mr. Smith: I should judge about 40 per cent.

Examiner Burchmore: And the remaining 60 per cent over the Iron Mountain?

Mr. Smith: Yes, sir.

Examiner Burchmore: When did you first establish joint traffic arrangements with the Rock Island?

Mr. Smith: I believe it was in June, 1908, the first of June.

Examiner Burchmore: That was after the road had been in operation over a year?

Mr. Smith: It was opened January 1st, 1908.

Examiner Burchmore: Under the present rates in effect in connection with the Rock Island, the Iron Mountain received a switching charge for the movement from your junction to the Rock Island tracks?

Mr. Smith: Yes, sir.

Mr. Burchmore: What is that charge?

Mr. Smith: $3.50 per car.

Examiner Burchmore: Does the Iron Mountain concur in those joint tariffs in effect over the Rock Island?

Mr. Smith: No.

1024 Examiner Burchmore: Does the Iron Mountain handle traffic under a through rate?

Mr. Smith: Just the switching charge.

Examiner Burchmore: You issue your waybill from Becker?

Mr. Smith: Yes, sir.

Examiner Burchmore: So that the waybill does not read from the Iron Mountain?

Mr. Smith: No.

Examiner Burchmore: When you established these traffic arrangements with the Rock Island in June, 1908, was there any increase at that time in the amount of your division?

Mr. Smith: No.

Examiner Burchmore: The result of establishing traffic arrangements with the second trunk line was not to increase the amount of your divisions on traffic?

Mr. Smith: No.

Examiner Burchmore: Had the Iron Mountain allowed you previously as high as 6 cents on divisions on certain rates?

Mr. Smith: I think that was the first division, yes, sir.

Examiner Burchmore: Has there been any objection on the part of the Iron Mountain in participating in the movements that move out over the Rock Island?

1025 Mr. Smith: No, sir.

Examiner Burchmore: Have you any written contract with the Rock Island covering divisions, rates or tonnage?

Mr. Smith: No.

Examiner Burchmore: Then you have no contracts whatsoever with trunk lines?

Mr. Smith: Nothing further than the published tariffs.

Examiner Burchmore: And division sheets?

Mr. Smith: Yes.

Examiner Burchmore: Is this I. C. C. No. 5 of the Little Rock, Maumelle & Western, being its milling in transit rules, referred to in the tariffs naming the joint through rates.

Mr. Smith: In what?

Examiner Burchmore: Is there a cross reference in the tariffs?

Mr. Smith: You mean in the tariffs issued by the trunk lines covering through rates?

Examiner Burchmore: Yes.

Mr. Smith: No, that is not mentioned. They mention the two cents we add on the finished product, but they do not——

Examiner Burchmore: Those joint tariffs then contain practically the same provisions as this I. C. C. No. 5?

1026 Mr. Smith: Yes.

Commissioner Harlan: Mr. Mehaffy, have you any questions?

Mr. Mehaffy: No.

Mr. Cowan: The mill, of course, could not be operated without the railroad?

Mr. Smith: No, sir.

Mr. Cowan: Do you have through rates to ship out staves and lumber which come from the hardwood mill?

Mr. Smith: Yes, sir.

Mr. Cowan: What do you get out of that?

Mr. Smith: The same division applies on hardwood and pine.

Mr. Cowan: Do you charge them for bringing the logs to their mills?

Mr. Smith: Yes, sir, the same as the other.

Mr. Cowan: You give them the same refund?

Mr. Smith: Yes.

Mr. Cowan: The rates then from points on your lines are two cents higher than they are on the Iron Mountain?

Mr. Smith: Yes.

Mr. Cowan: That two cents goes to make up part of the aggregate of the rate, as I understand you, and when you give it to the

1027 Iron Mountain they take 15 cents out of the rate to St. Louis and you take five?

Mr. Smith: Yes.

Mr. Cowan: And that is the only money you get on the transaction except what the mill pays you for hauling the logs in?

Mr. Smith: Yes, sir.

Mr. Cowan: And you refund that to the extent of two cents per 100 pounds on the lumber?

Mr. Smith: Yes, sir—no, we figured out, I believe, an amount of 8 mills per hundred.

Mr. Cowan: How is that?

Mr. Smith: We have just been figuring that out, and it amounts to nearly one-half, the refund amounts to about one cent.

Mr. Cowan: At all events the refund is simply a refund of 2 cents per 100 pounds on the lumber shipped on out.

Mr. Smith: Yes, sir.

Mr. Cowan: Whatever that weight amounts to?

Mr. Smith: Yes.

Mr. Cowan: So that the mill company, if it is to be treated
1028 as paying for the freight on the logs, really gets a refund of two cents per 100 pounds on the lumber?

Mr. Smith: Yes, sir.

Mr. Cowan: And if you deduct that from what it costs to haul the logs in, it just about breaks even, about one cent?

Mr. Smith: It amounts to nearly one-half of what it costs to get the logs in.

Mr. Cowan: Well, one-half of two cents?

Mr. Smith: Yes, sir.

Mr. Cowan: When you make your bill of landing, it shows a shipment from Becker to St. Louis, for example?

Mr. Smith: Yes, sir.

Mr. Cowan: And when you make the shipment of the hardwood the billing shows from the station there, whatever the name of the station is?

Mr. Smith: Yes, sir.

Mr. Cowan: And this money is used for the purpose of paying interest on the indebtedness of the railroad company to the lumber company?

Mr. Smith: Well, I could not say what they do with the money.

Mr. Cowan: But it never gets out of the hands of the
1029 interests which own the mill and the railroad?

Mr. Mehaffy: If he could not say what they do with it, I do not see how he could answer that question. He has just told you he did not know.

Examiner Burchmore: Have you any joint class and commodity rates other than lumber rates?

Mr. Smith: Yes, sir.

Examiner Burchmore: They are carried in I. C. C. No. 8, issued by your company, that is the local freight tariff?

Mr. Smith: The commodity rates are in there, local rates. We have no through commodity rates.

Examiner Burchmore: Then class or commodity freight moving to or from points on your line is handled under the combination of local rates to and from the junction points?

Mr. Smith: Yes, sir.

Mr. Cowan: Who pays that $3.00 switching charge when it goes to the Rock Island?

Mr. Smith: Over the Rock Island?

Mr. Cowan: Yes.

Mr. Smith: The Rock Island absorbs the Iron Mountain switching.

Mr. Cowan: And then gives you 6 cents division in addi-
1030 tion to that?

Mr. Smith: Yes.

Mr. Cowan: You have not stated in the record, but I suppose the division sheets show—you get 6 cents to points in Texas?

Mr. Smith: No, sir, we get nothing to Texas.

Mr. Cowan: You do not ship anything there?

Mr. Smith: No.

Mr. Cowan: Who controls the routing of the traffic, who controls the traffic?

Mr. Smith: I do the routing.

Mr. Cowan: Of course the mill company does not sell lumber anywhere except where it gets a division of the rates, naturally?

Mr. Smith: No, they never have.

Mr. Cowan: Do you have cases where divisions are made— —

Mr. Smith: Excuse me; except they sell a great deal of lumber in Arkansas where we get no division. I expect probably 25 per cent of their output goes to Arkansas.

Mr. Cowan: And you get no division?

Mr. Smith: No.

1031 Mr. Cowan: But you charge the local rate?

Mr. Smith: No, we charge them $3.00 a car switching.

Mr. Cowan: And in that case you do not refund anything to the mill company on the logs?

Mr. Smith: No.

Commissioner Harlan: What is the length of that switch movement by the Iron Mountain over to the Rock Island tracks?

Mr. Smith: I think it is between three and four miles; the commission allows them, I believe, $3.00 for three miles and under, and $3.50 for three to four miles, and it is between three and four miles.

Commissioner Harlan: And the Rock Island absorbs that switching charge?

Mr. Smith: The Rock Island absorbs that switching charge.

Commissioner Harlan: And then reaches over the Iron Mountain and pays you a division?

Mr. Smith: Yes, sir.

Mr. Cowan: Did you have an arrangement before you built this railroad that you would get these divisions, or do you know?

Mr. Smith: I do not know as to that. I was not with the
1032 company when the railroad was built.

Mr. Cowan: Are you acquainted with the sawmill industry and the way the business is handled in Arkansas?

Mr. Smith: No, this is the first time I have ever been connected with a sawmill railroad.

Mr. Jeffery: As I understand it, your railroad is building towards the Rock Island now, to connect with the Rock Island?

Mr. Smith: The survey has been made and the estimates furnished.

Mr. Jeffery: What was your reason for that?

Mr. Smith: Shortage of money, I guess.

Mr. Jeffery: I mean why are you building to the Rock Island?

Commissioner Harlan: He says there is a shortage of money and they are not building. They have only made a survey.

Mr. Jeffery: Then you do not contemplate building over there?

Mr. Smith: I suppose they will build when they get in better shape.

Mr. Jeffery: Have you got a promise of a higher division from the Rock Island?

1033 Mr. Smith: No; it will give us a more valuable location in Little Rock, and give us trackage in there where we could locate industries.

Mr. Jeffery: As I understand the 6 cent division applies really where you make a local charge of 2 cents, in other words, the net division either from the Iron Mountain or the Rock Island is 4 cents.

Mr. Smith: 3 and 4 cents. The net allowance is 2 cents less than the statement we have here.

Mr. Jeffery: That 2 cents is your own money coming back, you might say?

Mr. Smith: Yes.

Mr. Jeffery: Has your allowance always been that 6 cents ever since?

Mr. Smith: Yes, sir, ever since the arrangement has been made with both lines.

Mr. Jeffery: It was made about the same time with both lines?

Mr. Smith: The Rock Island about six months after the Iron Mountain.

Mr. Jeffery: But you negotiated for that at about the
1034 same time with both lines?

Mr. Smith: Yes, sir, the only reason for the delay was that they could not get their tariffs out.

Mr. Cowan: No agreement as to giving any particular percentage of the traffic to either line?

Mr. Smith: No.

(Witness excused.)

Mr. Mehaffy: I ask to introduce a certified copy of the charter.

Commissioner Harlan: That will not be necessary.

Mr. Mehaffy: And also a certified copy of the order of the Board of Railroad Commissioners authorizing the incorporation of the railroad.

Commissioner Harlan: That may be filed. We will ask counsel to file as soon as possible a map showing the exact conditions of the mills and their relation to the tracks, the distances, and a statement of the actual distance to the Iron Mountain. A reduced copy of what you have will doubtless suffice.

(The original map marked Exhibit No. 1 was returned
1035 to Mr. Neimeyer for the purpose of securing a copy to be filed with the Commission.)

1036 Commissioner Harlan: There are a number of other Rock Island roads who are represented by Mr. Walter who is engaged at this time in some litigation for the Commission, and it is understood they will be deferred for the present. We will come now to the Iron Mountain. The first one noted is the Antoine Valley. Is that road represented this morning?

(No response.)

Commissioner Harlan: The next is the Arkansas & Gulf.

Mr. Kimball: I am here for that road.

Arkansas & Gulf Railroad.

PHIN KIMBALL, was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: What is your name?

Mr. Kimball: Phin Kimball.

Commissioner Harlan: Your business?

Mr. Kimball: Sawmill business and real estate.

Commissioner Harlan: Where do you reside?

Mr. Kimball: St. Louis.

1037 Commissioner Harlan: Where do you conduct any sawmill business?

Mr. Kimball: At Laark, La., in the northeast part of the state, west of the river.

Commissioner Harlan: Your mill is at Laark?

Mr. Kimball: Yes, sir.

Commissioner Harlan: How long have you been engaged there in the lumber business?

Mr. Kimball: Since 1904.

Commissioner Harlan: And the name of your lumber company is what?

Mr. Kimball: The Kimball Lumber & Manufacturing Company, hardwood business, also cypress.

Commissioner Harlan: What lumber lands does your company own?

Mr. Kimball: Well, we own between 35,000 and 40,000 acres.

Commissioner Harlan: Do you own that in fee?

Mr. Kimball: Well, we have a bond and mortgage on it.

Commissioner Harlan: Well, I mean you own fee title, you own the timber and the land?

Mr. Kimball: Yes, sir. Now I would like to explain, I
1038 have no partners. When I say we, really the company is not incorporated yet, and never has been.

Commissioner Harlan: Just your self?

Mr. Kimball: Yes, sir.

Commissioner Harlan: You refer to the lumber company?

Mr. Kimball: Yes.

Commissioner Harlan: You own about 35,000 to 40,000 acres, in that neighborhood?

Mr. Kimball: About in that neighborhood, yes, sir.

Commissioner Harlan: Have you any timber rights?

Mr. Kimball: Nothing except what is in fee.
Commissioner Harlan: And the timber is cypress——
Mr. Kimball: Mostly oak and gum, and some little cypress and elm.
Commissioner Harlan: No pine?
Mr. Kimball: No pine.
Commissioner Harlan: So your mill is a hardwood mill?
Mr. Kimball: Yes, sir.
Commissioner Harlan: How do you reach the market?
Mr. Kimball: Well, Laark is seven miles from a station now called Kimball. It used to be Cypress.
Commissioner Harlan: On what line?
1039 Mr. Kimball: The Iron Mountain.
Commissioner Harlan: How do you reach Kimball?
Mr. Kimball: By the Arkansas & Gulf.
Commissioner Harlan: Is that a railroad company incorporated under the Laws of the State of Louisiana?
Mr. Kimball: It is incorporated under the Laws of Louisiana, but we never issued any stock. I own it. I have a few local partners but they only own $300 or $400.
Commissioner Harlan: It is seven miles long. When was this company incorporated?
Mr. Kimball: I think 1904 or 1905.
Commissioner Harlan: Was the road built by the railroad company?
Mr. Kimball: The road was built by me. I never issued any stock.
Commissioner Harlan: So that you really own the whole investment?
Mr. Kimball: That is right. I intended to build further, you understand, and thought I would have more money, but we could not build any further, so I never issued any stock.
Commissioner Harlan: And the town of Kimball I pre-
1040 sume is a town that you own?
Mr. Kimball: Yes, sir, mostly. It used to be Cypress, and we changed that name to Kimball this year.
Commissioner Harlan: What is there at Kimball; do you have a post office?
Mr. Kimball: Nothing but the farm; there is no post office there now. There is no agent. The station burned down last June.
Commissioner Harlan: Was it built by you or the Iron Mountain?
Mr. Kimball: It was built by the Iron Mountain before I went there.
Commissioner Harlan: Kimball is simply an interchange point?
Mr. Kimball: Yes, sir.
Commissioner Harlan: It is not a community there?
Mr. Kimball: I have about 850 acres of open farm lands there.
Commissioner Harlan: Which you farm yourself?
Mr. Kimball: Which I rent out, unfortunately.
Commissioner Harlan: What sort of track have you?

Mr. Kimball: Between Kimball and Laark is 35 and 40
1041 pound. Outside of that it is mostly 45 and 60 pound.

Commissioner Harlan: Any stone ballast?

Mr. Kimball: No. We are putting sand on it. I have a steam shovel on it, and have been putting sand on it for two years.

Commissioner Harlan: What equipment have you?

Mr. Kimball: Two locomotives and about 26 log cars, three flat cars, three boxes and a caboose, and one motor car seating 12 passengers, and another little motor car I have there for emergencies. That is a gasolene motor car, in case the other breaks down.

Commissioner Harlan: Is there any passenger traffic between Laark and Kimball?

Mr. Kimball: Yes, sir, we carry a little; it amounts to just about what it costs to run the motor car, about $75.00 to $100.00 a month income.

Commissioner Harlan: Do you sell tickets?

Mr. Kimball: No, there is no agent at Kimball, so we collect cash fares and give receipts the same as they do on the Iron Mountain.

Commissioner Harlan: Have you a passenger layout at Kimball or Laark?

1042 Mr. Kimball: It is just in the store.

Commissioner Harlan: It is your company's store?

Mr. Kimball: It is not incorporated, but I run it in my name.

Commissioner Harlan: It is your store?

Mr. Kimball: Yes.

Commissioner Harlan: From Laark there is apparently a log road?

Mr. Kimball: I have about ten miles of branches.

Commissioner Harlan: You have one——

Mr. Kimball: Two—one of them goes back into Arkansas.

Commissioner Harlan: Kimball is in Louisiana.

Mr. Kimball: No, in Arkansas.

Commissioner Harlan: Just over the line?

Mr. Kimball: Just over the line, a mile and a half up on the Iron Mountain.

Commissioner Harlan: To the south in Louisiana you seem to have a logging road?

Mr. Kimball: Southeast into Louisiana beyond Laark.

Commissioner Harlan: What is the length of that logging road?

Mr. Kimball: That is not a logging road, that is what I call the Arkansas & Gulf, that is seven miles long.

1043 Commissioner Harlan: From Laark to the southeast is not there a logging road?

Mr. Kimball: Well, no—probably a mile and then I have one which runs northeast, and then one due east two or three or four miles.

Commissioner Harlan: What is the total mileage of logging roads that join the main line at Laark?

Mr. Kimball: Between nine and ten miles of track.

Commissioner Harlan: Have you any special equipment that you use solely on those roads?

Mr. Kimball: No, I will tell you how I do that. The logging cars and all of the equipment belonging to the railroad proper is owned by the railroad, as I call it. The engines haul these cars for $1.50 a car.

Commissioner Harlan: $1.50 a car from the——

Mr. Kimball: From the log camps to Laark.

Commissioner Harlan: Where the mill is?

Mr. Kimball: Yes, sir.

Commissioner Harlan: Then the logs are milled and the lumber is moved to Kimball?

Mr. Kimball: That is right. Now we haul millions of feet of lumber from Kimball, formerly Cypress, to Laark away from the
1044 Iron Mountain seven miles, and take it back again.

Commissioner Harlan: Is that your own timber?

Mr. Kimball: Yes, sir.

Commissioner Harlan: Does that come from Arkansas or Louisiana?

Mr. Kimball: That comes from Arkansas. This last year I hauled about three million feet to what we call the State line, it came from Louisiana but was hauled up into Arkansas by switch and then brought back from State Line to Laark and I manufactured it there and took it back to the Iron Mountain.

Commissioner Harlan: What was your total tonnage last year?

Mr. Kimball: I could not tell you. We saw about 20,000 feet a day and run about 275 days as a rule. 20,000 feet of hardwood would weigh about 80,000 pounds. I could figure it up and give you that, though, if you desire.

Commissioner Harlan: Do you file any tariffs with the Commission?

Mr. Kimball: Yes, sir, we have concurred through the Missouri Pacific. While I am President and Traffic Manager and
1045 some of the other officers, I really don't know much about the traffic.

Commissioner Harlan: Do you file annual reports with the Commission?

Mr. Kimball: Yes, sir, I think we did file reports for awhile.

Examiner Burchmore: When did you file your first annual report?

Mr. Kimball: I could not tell you that.

Examiner Burchmore: It is only recently you have been filing them?

Mr. Kimball: Yes, sir.

Commissioner Harlan: That is, you do not know that date either as President, Secretary or Treasurer of the company?

Mr. Kimball: I am not the Treasurer, unfortunately.

Commissioner Harlan: Do you move any traffic for anyone else?

Mr. Kimball: Very little. There is nothing out there much; when I first went there we went through some farms for two miles, that is about five years ago. I know we left some stock and they

ate up the cotton and we had to pay for it. But since then
1046 the farms have been abandoned and there is no development in there.

Commissioner Harlan: So practically you only move your own lumber?

Mr. Kimball: Practically. We move some little passenger business, but the lumber business is nineteen*ths*-twentieths of it.

Commissioner Harlan: Did you have any local rates filed with the Commission?

Mr. Kimball: I think so, yes, sir—well, we use the commodity and class rates for the store. The Laark Mercantile Company is not the Kimball Manufacturing Company in any sense. Our store burned down on September 21st, and we lost our store and office and I am building a brick store 30 x 100 feet, and a brick office alongside of it.

Commissioner Harlan: Of course you understand you are an interstate road?

Mr. Kimball: Yes, sir.

Commissioner Harlan: You run across the State line?

Mr. Kimball: Yes.

Commissioner Harlan: So that in a special sense you are under the jurisdiction of the Commission if you do any traffic at
1047 all as a common carrier?

Mr. Kimball: Yes.

Commissioner Harlan: What rates do you carry in connection with the Iron Mountain on lumber to interstate destinations?

Mr. Kimball: Well, usually the way they figure that, they give us—we have to pay four cents above Little Rock on some shipments, and five cents above Little Rock and Pine Bluff, but it figures out about one cent higher than Kimball or Cypress, it used to be, and then they give us back two or three cents. We really make two cents and one cent division that the Iron Mountain pays. We charge that against the lumber company, but the Iron Mountain really gives the railroad two cents and one cent. We do not get any five and six cent divisions.

Commissioner Harlan: Have you any milling in transit rates?

Mr. Kimball: No, we charge the lumber company $1.50 a car.

Commissioner Harlan: Into Laark?

Mr. Kimball: Into Laark, yes, sir.

Commissioner Harlan: In either direction?

Mr. Kimball: Well, yes, on the logs in either direction,
1048 on the log cars.

Commissioner Harlan: And then for carrying the manufactured lumber from Laark to your junction with the Iron Mountain you get from two to three and a half cents?

Mr. Kimball: No, from two to three cents, but the published rate is one cent higher than the Kimball rate.

Examiner Burchmore: You get from two to three cents plus this one cent?

Mr. Kimball: Say from Laark to St. Louis it is 16 cents and Kimball to St. Louis is 15 cents. The railroad company is credited

with three cents so that sawmill pays one cent and the Iron Mountain two cents to St. Louis, and the same going through Thebes gateway or Cairo.

Commissioner Harlan: I suppose you know these facts from conferring with your traffic manager?

Mr. Kimball: Yes, sir.

Examiner Burchmore: We have here a copy of your I. C. C. No. 1, issued by the Arkansas & Gulf, Phin Kimball, General Freight Agent, St. Louis, which contains your merchandise and carload rates between all stations on your line.

Mr. Kimball: Yes, sir.

Examiner Burchmore: So they are filed with the Commission.

1049 Mr. Kimball: Yes.

Examiner Burchmore: Do you maintain a regular train service.

Mr. Kimball: No, not on freight. On passengers we go twice a day with the motor car; it leaves at 11:00 and 2:20, and meets the Iron Mountain trains going north, and carries the mail out to meet the trains going south. We have carried the mail out for five years.

Examiner Burchmore: You carry passengers also?

Mr. Kimball: Yes, sir.

Examiner Burchmore: Was that regular train service recently established?

Mr. Kimball: Yes, sir, I have had the car about two years, but the track was so rough we were afraid to run it, we were afraid it would break it up, until we got the steam shovel on it and put some sand on it.

Examiner Burchmore: Do you receive passenger fares from these passengers?

Mr. Kimball: Yes, sir.

Examiner Burchmore: Do you sell any tickets?

Mr. Kimball: No, there is no agent except at one end I have an agent at Laark, and we have a cash fare slip they turn out that is sent into St. Louis. I do not know as it makes any dif-

1050 ference, I told you I resided in St. Louis. I am a legal resident of Louisiana and am Postmaster at Laark.

Examiner Burchmore: Has the railroad company paid any dividends?

Mr. Kimball: No, it does very little business.

Examiner Burchmore: Has it any surplus?

Mr. Kimball: No.

Examiner Burchmore: Do you receive a salary as officer of the railroad company?

Mr. Kimball: I am credited with one but have never received it.

Examiner Burchmore: Never have been paid?

Mr. Kimball: Never have been paid.

Examiner Burchmore: Do you keep the books of account of the railroad company in accordance with the rules of the Interstate Commerce Commission?

Mr. Kimball: Well, I suppose we do. We keep everything

separate. The lumber company and the railroad company are entirely separate and so is the store company.

Examiner Burchmore: The railroad company has an auditor or bookkeeper?

Mr. Kimball: Well, he gets a pro rate; we have a lady in
1051 St. Louis, and a timekeeper and agent at Laark, and we prorate their salaries.

Examiner Burchmore: That proportion of their salaries is in proportion to their service?

Mr. Kimball: Yes, sir, practically, as near as we can come at it.

Examiner Burchmore: Are those bookkeepers advised of the requirements of the Interstate Commerce Commission with reference to accounting?

Mr. Kimball: Well, I do not know. I would judge so.

Examiner Burchmore: You do not know whether they have been made acquainted with the Commission's rules?

Mr. Kimball: I think when your representatives were there, they made us acquainted with them to a certain extent.

Examiner Burchmore: Are your cars equipped with automatic couplers?

Mr. Kimball: Yes, sir, the flat cars are. The log cars are not. But we do not use the automatic couplers there because the road is so rough they would not couple. I want to say to you we use our flat cars mostly for sand. We overhauled about 18 of them this year, and we have a steam plow and plow the sand off the cuts.

1052 Commissioner Harlan: You are ballasting your road?

Mr. Kimball: Yes, sir.

Examiner Burchmore: Do your employés work more than eight hours?

Mr. Kimball: We work eleven hours a day.

Examiner Burchmore: Do you observe the Hours of Service Law?

Mr. Kimball: Oh, yes, sir, as I understand it, we cannot work longer than 17 hours unless in the case of a wreck. I wish to say to you in explanation that I made considerable effort in making surveys, I think you have the correspondence on your record; I spent over $5,000 in surveying and prospecting to build this road further.

Commissioner Harlan: To what track?

Mr. Kimball: Well, we expected some tracks, there was a whole lot of surveying done several years ago east of me, in East Carroll and West Carroll Parishes, the Frisco, and a road called the Alexandria, Greenville & Eastern, and that also made it pretty lively down there, but it all died out after awhile by the Iron Mountain's building a stub down there and killing it.

Commissioner Harlan: Do the railroad company employés
1053 load or unload the cars?

Mr. Kimball: No, we have a steam loader, and we do not unload them at the mills. The cars are hauled right up in the mill and it is a trap car and we do not handle them like they unload them into a pond, and all of that is done by the milling com-

pany. The railroad simply hauls them and gets $1.50 for hauling the loaded car, and it hauls the empty back free.

Examiner Burchmore: What did this railroad cost you to build?

Mr. Kimball: I would judge about $5,000 a mile.

Commissioner Harlan: There are no cuts and fills?

Mr. Kimball: No.

Commissioner Harlan: Are there any bridges?

Mr. Kimball: No except log bridges.

Commissioner Harlan: Do you receive any passes from the Iron Mountain?

Mr. Kimball: One annual over the Iron Mountain.

Commissioner Harlan: As President of the railroad company?

Mr. Kimball: As President of the railroad company.

Commissioner Harlan: And from its connections?

Mr. Kimball: What connections do you mean?

1054 Commissioner Harlan: The connections to the market, like the Burlington and other roads?

Mr. Kimball: Yes, sir, I have received transportation, but they have cut them off of late years. I have the small annuals and one over the Burlington east of the river.

Commissioner Harlan: Have you issued any transportation over your line to officers of connections?

Mr. Kimball: No, sir; they won't come. I wrote one time to the Commission, I used to issue passes to the lumber company customers, and I wrote to the Commission and Senator Cockrell answered it and said I had better quit it.

Commissioner Harlan: Will you be kind enough to get your engineering department to send us just a rough map of this road and its logging connections, showing the distances and the character of its connections with the Iron Mountain?

Mr. Kimball: Yes, sir.

Commissioner Harlan: Have you any questions, Judge Cowan?

Mr. Cowan: Are you pretty well acquainted in Louisiana as to the sawmill operations generally?

Mr. Kimball: Not very greatly, no.

Mr. Cowan: I suppose this railroad of yours is complying with these regulations of one kind and another, in order to keep

1055 the divisions you are getting out of the rates; that is the reason for it?

Mr. Kimball: I didn't quite catch that.

Mr. Cowan: Whatever compliance you make with the regulations of the Interstate Commerce Commission is so that you can hold on to the divisions that you get from the Iron Mountain Railroad?

Mr. Kimball: I don't know as I just quite catch your meaning.

Mr. Cowan: You get your lumber out cheaper than you would if you did not profess to have a railroad?

Mr. Kimball: Well, yes, in one way; yes, sir.

Mr. Cowan: You get two cents per 100 pounds——

Mr. Kimball: To me as owner of the company, I naturally would get that back.

Mr. Cowan: You would have to operate your sawmill with a railroad anyhow, if you operated it?

Mr. Kimball: No, I would not have put it out there if I had not expected and expect still to build a railroad which would be permanent. It is permanent now.

Mr. Cowan: I do not see how you could operate a sawmill without a railroad.

1056 Mr. Kimball: I probably would not have built there. When I first built the road I was talking to a man, a Mr. Louis Houck, who had made some success in it. In fact I was trying to interest him down there, but I could not. But I figured on building the road somewheres, and I spent enough money, if I had to build a road somewhere, to come out even or make anything on it, and I expect to.

Mr. Cowan: If you do not do that you have still to go ahead with this meagre division of one or two cents, but if you could reach the Rock Island I guess you have observed from the evidence you would get a good deal more money.

Mr. Kimball: Yes, sir, I expect to go to the Mississippi River.

Mr. Cowan: Is it not a fact that the sawmill interests generally in that part of the country are getting divisions out of the rates, the interests are getting divisions either by tap lines or some other method?

Mr. Kimball: I don't know a thing about them except what I have heard here.

Mr. Cowan: If you only get two cents on yours and another man competing with you gets six or seven cents on his, he has undoubtedly got an advantage over you?

1057 Mr. Kimball: Well, I think hardwood mills pay a lower rate of freight than yellow pine. It would be 16 cents from Laark on hardwood and 18 cents on pine, but we have no pine in that country.

Mr. Jeffery: That is to St. Louis?

Mr. Kimball: That is to St. Louis, yes, sir, and proportionate to Thebes.

Mr. Cowan: I thought it was just the other way, that hardwood paid a higher rate.

Mr. Kimball: Not in there. I do not know as to other points.

Mr. Cowan: You do not know the situation as to other people?

Mr. Kimball: No. We do not buy lumber, we are simply a sawmill firm and practically do not buy any.

Mr. Jeffery: The 16 cents is the rate from Laark to St. Louis?

Mr. Kimball: Yes, sir.

Mr. Jeffery: What is the rate from the junction?

Mr. Kimball: 15 cents from Kimball. We add one cent.

Mr. Jeffery: What division do you get out of that rate?

Mr. Kimball: Three cents.

1058 Mr. Jeffery: So your net division is two cents; you get your own one cent back and two cents division?

Mr. Kimball: Yes. Some places we only get one cent.

Commissioner Harlan: Your interest in the rate is simply the

cost to you of laying down your lumber in St. Louis and other markets, is that it?

Mr. Kimball: I do not understand you.

Commissioner Harlan: Suppose the divisions were cut off and the rate reduced from Kimball, you would be as well off as you are now, would you not?

Mr. Kimball: No, I do not look at it that way. I do not look at the mill connected with the railroad. Naturally I own the two——

Commissioner Harlan: I am speaking of the entire investment which you now have. Individually you own everything there?

Mr. Kimball: Yes.

Commissioner Harlan: The town and the lumber company and the railroad?

Mr. Kimball: Practically, yes, sir.

Commissioner Harlan: Speaking of your individual interests and eliminating these different companies, you would be as well
1059 off without a division of the through rate, if the rate itself to St. Louis were reduced to the extent of your present division?

Mr. Kimball: In the present instance it might, but the railroad is not going to stop. I am expecting—now this summer there was a party came to St. Louis a third time to see me and to ask me to come over in West Carroll, and I am now building to the Beth River and it is going to be a stationary line, I think, I am going to call that a stationary place, and I want to get over there, and if we do not have something to work with it will naturally flatten that part out.

Commissioner Harlan: Take the present investment, excluding this proposed extension, you would be as well off without the division if the rates were reduced to that extent, would you not?

Mr. Kimball: I might in dollars and cents, but I would not feel that way. I expect the railroad to make itself. While I might get as many dollars myself if I got any, still I would not feel as much interested in trying to do something for the road unless I found I could get some help. I think a trunk line should be in
1060 a position to assist a developing line, that is the way I feel about it. While in the present instance, as you say, if they reduce the rate three cents, naturally the lumber company would get as much for the lumber, but that would not encourage me to develop that road, which I am going to do.

Commissioner Harlan: Your investment would be as well off?

Mr. Kimball: No, sir, the sawmill might, but the railroad would not.

Commissioner Harlan: Well, your whole investment.

Mr. Kimball: I do not think so, because the Iron Mountain would not help me. I expect to get some help.

Commissioner Harlan: You do not think the reduced rate would be a help to you?

Mr. Kimball: It would be there, but it would not if I shipped something else, which I expect to. I could not charge a local which

would justify the shipment of the other products. That is, nobody would want to come down there.

Commissioner Harlan: We will confine the inquiry to your interest as a lumber man.

Mr. Kimball: I do not own half the timber in the country, and I own all I want to, and I would be very glad to do what I could to induce something to come there. I would build a spur,
1061 side track or anything in reason to get someone to come out there and put up some sort of a plant and get the business.

Commissioner Harlan: You are now speaking as a railroad man?

Mr. Kimball: I am now speaking as a railroad man, yes, sir.

Commissioner Harlan: I am directing your attention to your interests as a lumber man. You would be as well off as a lumber man——

Mr. Kimball: The sawmill would individually; I would not as a whole.

Commissioner Harlan: Of course, we are a little confused by your mingled interests here.

Mr. Kimball: I am trying to make myself plain. The sawmill part of it would, but individually I would not be as well off. It would take away the feeling that I would get something by building a little road and I could not get anybody to come down there. I cannot get them anyway so far. I think I might when times go along, but if I have to charge the full local I do not think I can get them down there for some time yet.

Mr. Cowan: They are afraid to ride on the railroad.

1062 Mr. Kimball: They could walk.

Commissioner Harlan: That seems to be all.

Mr. Kimball: If you are through with me I will leave the town.

(Witness excused.)

Commissioner Harlan: The Berne & Clear Lake Railroad?

(No response.)

Commissioner Harlan: The Brookings & Peach Orchard Railroad?

(No response.)

Commissioner Harlan: The Caddo & Choctaw Railway.

Mr. McRea: We are ready.

1063 Caddo & Choctaw Railway Company.

T. W. ROSBOROUGH, was called as a witness and having been duly sworn, testified as follows:

Commissioner Harlan: What is your name?

Mr. Rosborough: T. W. Rosborough.

Commissioner Harlan: What is your business?

Mr. Rosborough: Railroading, and lumber business.

Commissioner Harlan: At what point?

Mr. Rosborough: Rosboro, Ark.

Commissioner Harlan: What are the termini of your road and what is the road called?

Mr. Rosborough: It is Rosboro and Cooper, and it is called the Caddo & Choctaw.

Commissioner Harlan: When was it incorporated?

Mr. Rosborough: In April 1907.

Commissioner Harlan: Where is Rosboro with reference to Little Rock?

Mr. Rosborough: It is about 35 miles west of Hot Springs.

Commissioner Harlan: Is it east or west of Little Rock?

Mr. Rosborough: Southwest; it is west of Hot Springs too.

Commissioner Harlan: I have Rosboro. Now what is the
1064 other terminus?

Mr. Rosboro: Cooper; it is a new station. The road has just been built to it.

Commissioner Harlan: With what road does it connect?

Mr. Rosborough: The Iron Mountain.

Commissioner Harlan: At Rosboro?

Mr. Rosborough: Yes, sir.

Commissioner Harlan: What is the length of the line to Cooper?

Mr. Rosborough: 14 miles at present.

Commissioner Harlan: When was it built?

Mr. Rosborough: It was built at different times, from the date of organization until the present.

Commissioner Harlan: You say the date of organization of the railroad company?

Mr. Rosborough: Yes, sir.

Commissioner Harlan: Was it all built by the railroad company?

Mr. Rosborough: Yes.

Commissioner Harlan: When was the first mileage constructed and how much?

Mr. Rosborough: The first was in 1907, it was built—
1065 the grading was about seven miles, and the track was laid about four miles.

Commissioner Harlan: To what point, what did you call that end there?

Mr. Rosboro: We first called our end Spears.

Commissioner Harlan: Was there any lumbering at Spears or near Spears?

Mr. Rosborough: Yes, sir, there was logging off the main line, a spur leading off the main line.

Commissioner Harlan: What was the length of that spur?

Mr. Rosborough: The first spur was about two miles long.

Commissioner Harlan: By whom was that built?

Mr. Rosborough: The spur was built by the Caddo River Lumber Company.

Commissioner Harlan: Is that the company that owns the Caddo & Choctaw Railroad?

Mr. Rosborough: The individual stockholders of the Caddo River Lumber Company own the Caddo & Choctaw Railroad Company.

Commissioner Harlan: Is the ownership about the same?

Mr. Rosborough: There are some exceptions.

Commissioner Harlan: Did the Lumber Company furnish the capital for the construction of the railroad?

1066 Mr. Rosborough: The stockholders of the lumber company are the stockholders of the railroad company and the stockholders of the railroad company have about one-half—the stock is divided about two to one in favor of the lumber company; each stockholder of the lumber company that owns two shares of stock in the lumber company owns one share in the railroad company.

Commissioner Harlan: The point I wanted to get at was this, did the railroad company actually receive cash capital and with that build the road, or was the road built under some contract by the lumber company and its stockholders, and then turned over to the railroad in payment of the stock that was issued?

Mr. Rosborough: No, it was understood that—the railroad was chartered before the road was constructed at all, and $50,000 of that stock was subscribed proportionately to begin with, with the stockholders of the company.

Commissioner Harlan: So the railroad was built by the railroad company?

Mr. Rosborough: The railroad was actually built by the railroad company.

1067 Commissioner Harlan: And what was the cost of the entire road?

Mr. Rosborough: Well, according to the annual reports that you have, there was only 12 miles of road finished when that report went in, and it cost $166,183.84.

Commissioner Harlan: Well, what is the capital stock of the railroad?

Mr. Rosborough: $250,000.

Commissioner Harlan: Is that issued?

Mr. Rosborough: There has been $50,000 of it issued.

Commissioner Harlan: Has it any bonds outstanding?

Mr. Rosborough: No, sir.

Commissioner Harlan: Any indebtedness?

Mr. Rosborough: Yes, sir.

Commissioner Harlan: To what amount?

Mr. Rosborough: Well, the annual report shows; I haven't it exactly.

Commissioner Harlan: It is simply a current account or indebtedness for the construction of the road?

Mr. Rosborough: The Caddo & Choctaw Railroad Company owes the Caddo River Lumber Company for all over and above the difference of the money that was paid in and what they

1068 have earned—they owe the difference to the Caddo Lumber Company.

Commissioner Harlan: Can you just say in round numbers what that amount is?

Mr. Rosborough: I can get at it reasonably close—no, I can not give that to you now, but I can furnish it to you if you like a little later.

Mr. McRea: It is the difference between the cost of the road and $50,000.

Mr. Rosborough: Well, plus the earnings that the road earned; it is $50,000 plus the earnings, and deduct that from the cost of the road.

Examiner Burchmore: The profit from operation each year is credited on the indebtedness to the lumber company.

Mr. Rosborough: Yes, that is the idea.

Commissioner Harlan: What equipment has the Caddo & Choctaw?

Mr. Rosborough: It has at present one locomotive and 18 cars.

Commissioner Harlan: What rails have you used there?

Mr. Rosborough: 55 pound steel rail.

Commissioner Harlan: Is there any ballast on the road?

1069 Mr. Rosborough: Why, only the ballast that was taken out of the dumps. Our country is a rocky country and slaty, and the slate makes a good ballast, and it has been all surfaced up with this style of ballast.

Commissioner Harlan: Standard gauge?

Mr. Rosborough: Yes, sir.

Commissioner Harlan: Does it operate the logging roads also that are attached to it?

Mr. Rosborough: The Caddo & Choctaw?

Commissioner Harlan: Yes.

Mr. Rosborough: The lumber company build these spurs and pay for the ties that are under them, and pay for all the construction of the spurs, and the Caddo & Choctaw operate over them.

Commissioner Harlan: The lumber company has no equipment then?

Mr. Rosborough: Not a bit, no, sir.

Commissioner Harlan: Who owns the forest into which the logging roads run?

Mr. Rosborough: Well, there is a greater part of it owned by the Caddo River Lumber Company, but the Caddo River Lumber Company's holdings is a very narrow strip ranging from one

1070 to two miles wide the first 12 miles, and then it branches out and gets to be four or five miles wide, and the territory adjoining their holding is held by other parties.

Commissioner Harlan: What is the total length of the Caddo & Choctaw Road?

Mr. Rosborough: 14 miles; it was on the report we made to you 12 miles, though.

Commissioner Harlan: Do you haul any logs over the logging roads and into Rosboro for any shippers other than the Caddo River Lumber Company?

Mr. Rosborough: No logs. We haul other forest products.

Commissioner Harlan: Over the logging roads?

Mr. Rosborough: No, over the main line.

Commissioner Harlan: That is the point I want to get at. Have you any mills on the main line?

Mr. Rosborough: Not exactly on the main line. We have several

small mills off the main line, but the price of lumber has been so low of late years they have not been doing very much business. They could not, they had to haul it to our road to ship it.

Commissioner Harlan: Are they stave mills?

1071 Mr. Rosborough: No, lumber mills, these small jerkwater sawmills.

Commissioner Harlan: And they haul the lumber to your line?

Mr. Rosborough: They haul their rough lumber to our line, and it is shipped from there.

Commissioner Harlan: Do you plane it?

Mr. Rosborough: No—well, we have bought some from them, but do not make a practice of it.

Commissioner Harlan: How far are their mills from the line?

Mr. Rosborough: They vary all the way from one to five miles.

Commissioner Harlan: And they haul their rough lumber to the track by wagons?

Mr. Rosborough: Yes.

Commissioner Harlan: Do they lumber in the forests of the Caddo River Lumber Company?

Mr. Rosborough: No.

Commissioner Harlan: They have their own holdings?

Mr. Rosborough: Yes.

Commissioner Harlan: But they are not now in operation?

Mr. Rosborough: Well, we hauled a little stuff this month

1072 out there; they are not operating very freely, no, sir.

Commissioner Harlan: Is there any other traffic that you move; any cotton or farm produce?

Mr. Rosborough: We have not handled any cotton up to the present. We have handled some stave bolts and staves.

Commissioner Harlan: It is rather small traffic, I infer.

Mr. Rosborough: Yes, sir; we handle all traffic that is offered us, and encourage traffic in carload lots.

Commissioner Harlan: Not less than carload lots?

Mr. Rosborough: We have not handled anything to speak of in less than carload lots, and that which we have handled we have handled for cost.

Commissioner Harlan: Any stations on your line?

Mr. Rosborough: We are now building a first class station at Cooper. We have not any station completed at present.

Commissioner Harlan: For what use are you building that?

Mr. Rosborough: We have a town that is located at Cooper.

Commissioner Harlan: Is that sort of a company town?

Mr. Rosborough: No, it is not really on the company's land; it is on an individual's land, and we——

Commissioner Harlan: Is there a post office there?

Mr. Rosborough: There is a post office applied for there.

Commissioner Harlan: How many people live there?

1073 Mr. Rosborough: This town of Cooper is two and one-half miles from a town by the name of Daisy, that is inland, and we could not reach Daisy with our railroad on account of the topography of the country, and we therefore stopped at Cooper and ex-

pect for the Daisy merchants to move to Cooper. In Daisy there are about 500 people.

Commissioner Harlan: Well, are they moving?

Mr. Rosborough: They are. I do not know that they will all move, but the principal merchants are moving.

Commissioner Harlan: And in contemplation of that movement you are erecting the station?

Mr. Rosborough: We are erecting a station there that is right on the same lines of those of the Iron Mountain, it is built on the same architecture, on a concrete foundation, and is to be a permanent building.

Commissioner Harlan: Have you any passenger trains?

Mr. Rosborough: We have not at present, no. We expect to put on——

Commissioner Harlan: Have you any mail or express?

Mr. Rosborough: No; we have made application for a mail contract to Cooper.

Commissioner Harlan: How much of general merchan-
1074 dise, just in general terms, do you move?

Mr. Rosborough: Well, only a very small percentage; in fact we have made no charge for handling local shipments of any kind, or passengers; our charges have been for carload lots only. We were not equipped to handle local shipments or passengers, and for that reason have made no charge for them.

Commissioner Harlan: So that at this time you are practically moving no traffic except for the lumber company?

Mr. Rosborough: Yes, sir; we are moving any traffic in carload lots for outsiders, but no small shipments.

Commissioner Harlan: What traffic is offering in carload lots? I understood you to say these mills were not running.

Mr. Rosborough: Well, staves and stave bolts from the forests in, and fertilizers and foods and such stuff going out. Cotton seed meal and cake in carload lots.

Commissioner Harlan: What is the extent of that traffic?

Mr. Rosborough: It is a very small percentage.

Commissioner Harlan: The staves come from what forest?

Mr. Rosborough: They do not come off from ours.

Commissioner Harlan: Is the railroad company paying any dividends?

1075 Mr. Rosborough: No, sir.

Commissioner Harlan: Paying interest on its indebtedness?

Mr. Rosborough: Yes, sir.

Commissioner Harlan: At what rate?

Mr. Rosborough: Six per cent.

Commissioner Harlan: What was its total tonnage last year?

Mr. Rosborough: I have an estimate of that. This is not absolutely authentic, but I figured that our tonnage for last year was about 150,000 tons.

Commissioner Harlan: And of that, what amount came from and went to the Caddo River Lumber Company?

Mr. Rosborough: Well, a very large percentage of it.

Commissioner Harlan: Well, 95 per cent?

Mr. Rosborough: I would say perhaps about 95 per cent; I could not get at it any closer than that. Now, of course the stuff, the lumber going out from the Caddo River Lumber Company's mill, you included that in the Caddo River lumber?

Commissioner Harlan: Yes.

Mr. Rosborough: Yes. That was logs coming into the mill and lumber going out, principally.

Commissioner Harlan: Total tonnage?

Mr. Rosborough: Yes, sir.

1076 Commissioner Harlan: The mill as it is at Rosborough—how is it located with reference to the tracks of the regular carrier there, the Iron Mountain, is it not?

Mr. Rosborough: It is about a quarter of a mile, I should say, from the Iron Mountain station.

Commissioner Harlan: Well, to the Iron Mountain tracks, how close is it?

Mr. Rosborough: The Iron Mountain tracks are at the Iron Mountain station.

Commissioner Harlan: There is no Iron Mountain spur track running over to the mill?

Mr. Rosborough: Well, the planer track was graded and tied by the Caddo & Choctaw Railroad; the Iron Mountain people then furnished the steel and fastenings and laid the track and charged us up with it, and after we delivered to them a certain number of cars they refunded to us what was charged.

Commissioner Harlan: For the labor?

Mr. Rosborough: Yes, sir.

Commissioner Harlan: How far is your planing mill from the saw mill?

Mr. Rosborough: About 200 feet or a little over.

Commissioner Harlan: And then your planing mill is on

1077 this spur track your have just referred to?

Mr. Rosborough: Yes, sir.

Commissioner Harlan: Is not that for all intents and purposes an Iron Mountain spur track?

Mr. Rosborough: Well, I have given you the exact record of it.

Commissioner Harlan: Well, is not that the general basis on which the Iron Mountain builds all spur tracks to industries?

Mr. Rosborough: Well, I could not answer that intelligently.

Commissioner Harlan: Your manufactured lumber is loaded into cars on that track?

Mr. Rosborough: Yes, sir.

Examiner Burchmore: Was that siding constructed under the standard form of side track agreement, written contract?

Mr. Rosborough: I do not know what that is.

Examiner Burchmore: Did you have a contract?

Mr. Rosborough: We signed a contract regarding that side track.

Commissioner Harlan: Have you that here?

Mr. Rosborough: No. I presume likely you have it in
1078 your records.

Commissioner Harlan: I think possibly we have.

Mr. Rosborough: Yes, sir; I haven't it.

Commissioner Harlan: If we haven't it, you can furnish us a copy?

Mr. Rosborough: I suppose we could get a copy; yes, sir.

Commissioner Harlan: Well, we will ask the Iron Mountain to furnish it. Now, what rates do you have in effect for the movement of lumber, and what is their application with reference to the logs?

Mr. Rosborough: I do not quite get your question.

Commissioner Harlan: Just tell us about your rates on lumber, what the lumber company has to pay.

Mr. Rosborough: What the lumber company has to pay?

Commissioner Harlan: Yes. On what rate does it get its manufactured lumber to market; is it a milling in transit rate?

Mr. Rosborough: Yes, sir.

Commissioner Harlan: Just describe the application of that rate to a shipment of logs from back in the forest.

Mr. Rosborough: Well, the Caddo & Choctaw Railroad gets fifty cents a thousand for hauling the logs in, plus a four cent division.

1079 Commissioner Harlan: That is, hauling the logs in over the logging road to the mill at Rosboro?

Mr. Rosborough: Yes, sir.

Commissioner Harlan: Fifty cents a thousand feet in the logs?

Mr. Rosborough: Fifty cents a thousand feet in the logs, plus a four cent division that they receive from the Iron Mountain Road.

Commissioner Harlan: On the manufactured product out?

Mr. Rosborough: On the manufactured product out.

Commissioner Harlan: What is the earnings at fifty cents a thousand feet on an ordinary logging car from the forest to the mill?

Mr. Rosborough: That is about $2.50. We put about 5,000 feet of logs on one of our logging cars, on an average; our logging cars are standard flat cars, 40 feet long, 60,000 pounds capacity.

Commissioner Harlan: And for that compensation you haul the logs from out in the forest over the logging road and then over your main line to the mill?

Mr. Rosborough: Plus the four cent division we get: the fifty cents would not compensate us, but with that four cent division it makes it possible for the logging road to live.

1080 Commissioner Harlan: At the mill, then, the logs are sawed and then they pass from the saw mill to the planing mill by trucks, I suppose?

Mr. Rosborough: The logs are dumped off into the pond, and are taken up in a slip to the mill, manufactured into lumber and taken back to the yard, and part to the dry kiln and part to the yard, and after it is in condition it is taken through the planing mill and loaded on the cars.

Commissioner Harlan: And then it goes through on the through rate, and you get four cents out of that?

Mr. Rosborough: Yes, sir.

Examiner Burchmore: The Caddo & Choctaw began operation in July, 1907?

Mr. Rosborough: The Caddo & Choctaw Railroad was incorporated April 19, 1907, and began construction at once.

Examiner Burchmore: Does it own the right of way on which it operates?

Mr. Rosborough: It owns all the right of way which has been purchased outside. The transfer of the title has never been made from the Caddo River Lumber Company to the Caddo & Choctaw Railroad Company for the right of way that it actually owns.

1081 The idea was to finish the road to Cooper and then make one transfer of the whole title on a basis of $5.00 per acre.

Examiner Burchmore: There is no lease of that road?

Mr. Rosborough: Just an agreement to that effect. The agreement is on that basis.

Examiner Burchmore: The railroad company pays nothing to the lumber company for the use of the land in the interim?

Mr. Rosborough: No; it is understood they are to buy that land at $5.00 per acre, all the land, 100 foot right of way from the mill out to Cooper.

Examiner Burchmore: What proportion of the right of way was furnished by the Caddo River Lumber Company?

Mr. Rosborough: Practically all of it; probably a mile, a mile and a half or two miles of that, that the Caddo & Choctaw Railroad Company has bought.

Commissioner Harlan: Who owns the right of way from this spur track to the planing mill to the Iron Mountain main line?

Mr. Rosborough: That is owned by the Caddo River Lumber Company.

Examiner Burchmore: If you had signed a standard form of switch track agreement covering that I think it is probable

1082 that the title under that agreement would rest in the Iron Mountain. Is not that the usual provision?

Commissioner Harlan: It differs on different roads, and will have to be ascertained.

Examiner Burchmore: I understood you to say the Iron Mountain furnished the steel rails out of which a part of this road was built.

Mr. Rosborough: No; part of it was bought new. We bought our rail right from the rolling mills new, 55 pound steel. I told you that the Iron Mountain furnished the rail for the spur track.

Examiner Burchmore: You stated, though, that the Caddo & Choctaw furnished the steel rail for this private logging road.

Mr. Rosborough: The Caddo & Choctaw owns the rail on the logging road. The Caddo River Lumber Company owns no rails or railroad equipment or fastenings whatever, and have never spent a dollar for equipment.

Examiner Burchmore: Does the lumber company pay any rental for the use of that steel rail?

Mr. Rosborough: No, the rails all belong to the railroad com-

pany. The lumber company pays them fifty cents a thousand.

1083 Commissioner Harlan: The logging roads are moved from time to time?

Mr. Rosborough: When the timber is taken off, the track is moved ahead.

Commissioner Harlan: Is that done by the railroad company?

Mr. Rosborough: No, that is done by the Caddo River Lumber Company. They estimate the amount of timber that is on a spur; they have all that estimated, and they charge off so much per thousand to cover the cost of constructing that spur and taking it up.

Commissioner Harlan: And they do that?

Mr. Rosborough: They do that; yes, sir.

Commissioner Harlan: The railroad does not do it at all?

Mr. Rosborough: The railroad has absolutely nothing to do with it.

Commissioner Harlan: The railroad owns the ties and rails and operates it.

Mr. Rosborough: The railroad does not own the spur ties, only the main line ties.

Comm. Harlan: It only owns the rails?

Mr. Rosborough: Yes.

Examiner Burchmore: If the Caddo & Choctaw owns the
1084 steel rails composing the private lumber road, and also operates the trains over that lumber road, why is not that private lumber road considered a part of the railroad system?

Mr. Rosborough: Because the mill company builds these tracks. They build these tracks and the railroad company gets the logs off of them and brings them into the mill.

Examiner Burchmore: Is there any particular reason why these private roads reaching into the forest are considered private roads and are not considered as part of the system of the Caddo & Choctaw Railroad as a common carrier?

Mr. Rosborough: You see, our charter provides for the main line and does not provide for the spurs off of it. Our spurs are short. The longest we have up to the present time is only about three miles long.

Examiner Burchmore: Do you operate a regular train service?

Mr. Rosborough: Yes, sir.

Examiner Burchmore: Any time tables?

Mr. Rosborough: No; there is no time table.

Examiner Burchmore: How many trains daily?

Mr. Rosborough: One train each way.

Examiner Burchmore: Does that train make connections with the Iron Mountain passenger trains?

Mr. Rosborough: No; it leaves the mill at 6:30 and goes
1085 back about 5:30.

Examiner Burchmore: Does it carry any passengers at the present time?

Mr. Rosborough: We permit passengers to ride on it free of charge at their own risk.

Examiner Burchmore: It is contemplated to establish a passenger service?

Mr. Rosborough: We expect to have a passenger and mail service in the next 60 days.

Examiner Burchmore: You handle less than carload freight without charge to the public?

Mr. Rosborough: We do to all that is offered us.

Examiner Burchmore: Does that less than carload freight come to you under through billing from the Iron Mountain?

Mr. Rosborough: No, the only freight that we have taken in that way has been brought by the people living out on our line from various concerns and shipped out.

Examiner Burchmore: Does the Iron Mountain agent at Rosborough ever tender to your trainmen package shipments to be taken out and delivered to shippers along your line?

Mr. Rosborough: He never has to my knowledge.

Examiner Burchmore: You estimated the tonnage taken
1086 last year as 150,000 tons. For the previous fiscal year our records would indicate that the tonnage was about 107,000 tons.

Mr. Rosborough: Well, we ran the mill day and night part of the past year.

Examiner Burchmore: That is a substantial increase in your tonnage?

Mr. Rosborough: Yes.

Examiner Burchmore: For the preceding fiscal year, out of that 107,000 estimated total tonnage of your road, our records indicate that 106,875 tons, that is, all but 50 tons, was furnished by the Caddo River Lumber Company; that is a little in excess of 99 per cent. In your opinion, are those figures accurate for the preceding fiscal year?

Mr. Rosborough: We keep our records very accurately, and I think you can reasonably count on anything we sent you in the way of records as being correct.

Examiner Burchmore: There has been, then, a fifty per cent increase, substantially, in your total tonnage for the present fiscal year over the preceding fiscal year. Has there been a similar increase in the tonnage offered by the public, or a greater increase?

1087 Mr. Rosborough: I could not answer that intelligently.

Examiner Burchmore: In other words, for the year ending June 30, 1910, was 99 per cent of your traffic handled for the controlling interests?

Mr. Rosborough: I could not answer that.

Examiner Burchmore: Does the Iron Mountain Railroad set the empty cars at your mill for loading the lumber?

Mr. Rosborough: No, the Caddo & Choctaw set all the cars and do all the switching.

Examiner Burchmore: Set them back and switch them, and all?

Mr. Rosborough: Yes.

Examiner Burchmore: Where is the bill of lading issued and by whom?

Mr. Rosborough: It is issued by the Caddo & Choctaw Railroad Company.

Examiner Burchmore: At its office in Rosboro?

Mr. Rosborough: Yes, sir.

Examiner Burchmore: When is it issued?

Mr. Rosborough: It is issued when the cars are loaded.

Examiner Burchmore: With finished lumber?

Mr. Rosborough: Yes, sir.

Examiner Burchmore: Where is the bill of lading dated
1088 as to point of origin?

Mr. Rosborough: Spears, Arkansas.

Examiner Burchmore: Then the bill of lading is issued for a carload of lumber as originating at Spears?

Mr. Rosborough: Yes.

Examiner Burchmore: But is actually issued when that carload has just been loaded at the mill in Rosboro?

Mr. Rosborough: Yes, sir.

Examiner Burchmore: Do you issue any way bills?

Mr. Rosborough: Yes.

Examiner Burchmore: Where do those way bills read from?

Mr. Rosborough: From Spears.

Examiner Burchmore: And they show your company as the carrier up to Rosboro?

Mr. Rosborough: They show the Caddo & Choctaw Railroad Company as delivering this stuff to the Iron Mountain at Rosboro.

Commissioner Harlan: Do the railway employees load or unload the cars or participate in the loading or unloading?

Mr. Rosborough: Yes, sir.

Commissioner Harlan: At both ends?

Mr. Rosborough: Yes, sir.

1089 Examiner Burchmore: Do you receive a salary as an officer of the railroad company?

Mr. Rosborough: No.

Examiner Burchmore: Do any of the officers of the railroad company receive salaries?

Mr. Rosborough: Yes.

Examiner Burchmore: What ones?

Mr. Rosborough: The auditor and traffic manager.

Examiner Burchmore: Those are two different persons?

Mr. Rosborough: That is one person.

Examiner Burchmore: Who is the traffic manager today?

Mr. Rosborough: O. H. Helwig.

Examiner Burchmore: Is he an officer of any other tap line?

Mr. Rosborough: I think perhaps he is.

Examiner Burchmore: He seems to be the traffic manager also of the Prescott & Northwestern, of Prescott, Arkansas.

Mr. Rosborough: Yes, sir.

Examiner Burchmore: Any relation between that company and your company?

Mr. Rosborough: None other than that part of the stockholders

of the Ozan Land & Lumber Company are stockholders in the Caddo River Lumber Company.

1090 Examiner Burchmore: Do you receive any interstate passes over the Iron Mountain?

Mr. Rosborough: Yes, sir.

Examiner Burchmore: Over any other railroad?

Mr. Rosborough: One other.

Examiner Burchmore: What railroad?

Mr. Rosborough: The Chicago & Alton.

Examiner Burchmore: Do the other officers, or any of them——

Mr. Rosborough: I can only answer for myself.

Examiner Burchmore: You do not know whether the other officers receive passes?

Mr. Rosborough: No, I have never seen any.

Examiner Burchmore: Do you actually use those passes?

Mr. Rosborough: I have never used the Chicago & Alton; I have the Iron Mountain.

Examiner Burchmore: Does the Caddo & Choctaw Railroad Company issue any passes?

Mr. Rosborough: It has not up to the present.

Examiner Burchmore: What is the basis of the rates applied on lumber from points on your line; that is, does the junction line rate apply back to points on your line?

Mr. Rosborough: I do not understand your question. Give it to me a little differently.

1091 Examiner Burchmore: What is the rate published by the Iron Mountain on lumber from its station at Rosboro to St. Louis?

Mr. Rosborough: Eighteen cents.

Examiner Burchmore: What is the joint rate applying from Spears?

Mr. Rosborough: Eighteen cents.

Examiner Burchmore: It is the same rate?

Mr. Rosborough: Yes.

Examiner Burchmore: And that is true of all destinations, practically?

Mr. Rosborough: It is, so far as I know.

Examiner Burchmore: You receive a uniform division of four cents per 100 pounds?

Mr. Rosborough: Yes, sir—well, I think that there are some few points in Oklahoma on the Rock Island Road perhaps where there is a two cent division.

Examiner Burchmore: Is there any lumber traffic on which you do not receive a division?

Mr. Rosborough: We do not receive any for Arkansas.

Examiner Burchmore: What earnings do you receive on a car shipped in Arkansas?

1092 Mr. Rosborough: We have a local tariff of four cents per 100 pounds, the Arkansas tariff. I have it in my pocket, if you would like it.

Examiner Burchmore: You actually charge that on that lumber?

Mr. Rosborough: Anything we ship to Arkansas, yes, sir.

Commissioner Harlan: What is the relation between the Caddo River Lumber Company and the other company to which you have just referred?

Mr. Rosborough: Well, the interests are not identical, by any means. More than half of the stock owned by the Caddo River Lumber Company has no connection with the Ozan Lumber Company.

Commissioner Harlan: What is the relation between the Prescott & Northwestern and the Caddo River Lumber Company?

Mr. Rosborough: The same as there is between the two mills, I suppose. They have nothing in common at all.

Commissioner Harlan: There simply happens to be stockholders in both companies that are the same?

Mr. Rosborough: Yes, sir, but it is not the same capital at all.

Commissioner Harlan: It is not directed by any holding
1093 company?

Mr. Rosborough: No.

Commissioner Harlan: The policies of the two companies have no relation to each other?

Mr. Rosborough: No, they are absolutely different. I have not a penny of stock in the Ozan Lumber Company or the Prescott & Northwestern.

Commissioner Harlan: Not interested in its policy?

Mr. Rosborough: Not a particle, and have nothing to do with it.

Examiner Burchmore: We have not the figures here for the last fiscal year ending June 30, 1910.

Mr. Rosborough: Well, they have been furnished. It was a little late on account of my being absent.

Examiner Burchmore: Well, for the fiscal year ending June 30, 1909, the operating revenues of your company were apparently $19,660.60, on traffic supplied by the Caddo River Lumber Company, $25 on other traffic, and $2.96 of miscellaneous revenue, making $19,688.62 as the total revenue. The total operating expenses were but $6,924.40. This leaves a net revenue of $12,764.22, which was carried to surplus, according to your report.

Mr. Rosborough: Yes, sir, that is true.

1094 Examiner Burchmore: That represents approximately the profit from the operation of the road?

Mr. Rosborough: Yes.

Examiner Burchmore: Is the profit for the year ending June 30, 1910, substantially the same?

Mr. Rosborough: I will give it to you.

Examiner Burchmore: Give the figures.

Mr. Rosborough: Yes, sir. The net, after taxes and everything has been paid, is $12,167.29.

Examiner Burchmore: That is, excluding any interest payments?

Mr. Rosborough: That is excluding any interest payments, yes, sir.

Examiner Burchmore: And that is on a total operating revenue of what amount?

Mr. Rosborough: $24,550.53.

Commissioner Harlan: Mr. McRae, have you any questions?

Mr. McRae: Will you state the grade upon which your road is built?

Mr. Rosborough: Practically on a one per cent grade. There were two short places in the road that we have had to build on
1095 a two per cent grade. We try to maintain a one per cent grade.

Mr. McRae: In building this road, did you build it with a view of making it a permanent road?

Mr. Rosborough: Yes, sir, we did.

Mr. McRae: How far is it from the present western terminus of that road, or southwestern terminus, to the northwestern terminus of the Prescott & Northwestern?

Mr. Rosborough: Well, here is only a distance—I don't know exactly, but I should not suppose there was over six or seven miles distance.

Mr. McRae: How far to the eastern terminus of the De Queen & Eastern?

Mr. Rosborough: I think about 20 miles.

Mr. McRae: How far is the western terminus at Rosborough from the eastern terminus of the Glenwood & Hot Springs?

Mr. Rosborough: Four miles.

Mr. McRae: How far is it from Glenwood to Hot Springs?

Mr. Rosborough: About 35 miles.

Mr. McRae: Is it practicable to build a railroad through there to Hot Springs?

Mr. Rosborough: Yes, sir.

Mr. McRae: Is it practicable to extend your road west or
1096 southwest to connect with these other roads I have mentioned?

Mr. Rosborough: Yes.

Mr. McRae: In constructing this road, you have built it on this grade, standard gauge, and equipped it with 56 pound steel with a view of utilizing it as a railroad?

Mr. Rosborough: Our steel is 55 pound.

Mr. McRae: Your steel is 55 pound?

Mr. Rosborough: Yes, sir, but that was the intention.

Mr. McRae: Is the country through which you have built this 14 miles of road such as can be developed, and is there agriculture and other interests there to be served by a railroad?

Mr. Rosborough: Yes, sir, on both sides of it.

Mr. McRae: Have you built your road only up to your timber, or have you built it into your timber, and if so, how far into the timber?

Mr. Rosborough: Well, we are getting our logs now from about eight miles from the mill and the road is completed 14 miles.

Mr. McRae: What is the object of building your road beyond the point where you get your logs?

Mr. Rosborough: To increase the revenue of the road, and
1097 to build up the country, and satisfy the people.

Mr. McRae: Serve the people that you speak of at Daisy, and are there other communities?

Mr. Rosborough: Yes.

Mr. McRae: How about Kirby?

Mr. Rosborough: There is a town of Kirby.

Mr. McRae: And is there a prosperous agricultural community within two or three miles of the railroad?

Mr. Rosborough: Yes, sir.

Mr. McRae: Who have assured you of business if you would equip your road for commercial purposes?

Mr. Rosborough: Yes.

Mr. McRae: And you have built it as rapidly as has been practicable under the conditions since you incorporated?

Mr. Rosborough: Yes, as fast as we could get the money.

Mr. McRae: You incorporated about the time the panic began?

Mr. Rosborough: Yes.

Mr. McRae: And had a pretty hard time to get money?

Mr. Rosborough: Yes.

Mr. McRae: And you have put all the money you could into it, and have built it as rapidly as you could, with an idea
1098 of making a permanent road?

Mr. Rosborough: Yes.

Mr. McRae: No idea of abandoning it?

Mr. Rosborough: No, no idea whatever. It is chartered under the State of Arkansas, and we could not abandon it if we wanted to.

Mr. McRae: You feel that if you get the usual divisions allowed a railroad you will make a financial success?

Mr. Rosborough: Yes, sir. Our earnings last year showed a little over six per cent earnings.

Mr. McRae: Is your road assessed for taxes as the Fort Smith & Gurdon branch of the Iron Mountain is?

Mr. Rosborough: Yes, sir.

Mr. McRae: Does the company report to the State Commission?

Mr. Rosborough: Yes.

Mr. McRae: Do you make your reports annually and monthly to the Interstate Commerce Commission?

Mr. Rosborough: Yes.

Mr. McRae: Have you the certified copy from the record of the Railroad Board of Commissioners with you?

Mr. Rosborough: It is in the hotel. I haven't it with me here.

Mr. McRae: Will you file that with the stenographer as
1099 an exhibit to your deposition?

Mr. Rosborough: Yes, sir.

Commissioner Harlan: What does that show?

Mr. McRae: It is a certificate of the incorporation by the Railroad Board of the State.

Commissioner Harlan: It is proffered to show that it is regarded by the State Commission as a common carrier.

Mr. McRae: Yes.

Commissioner Harlan: It need not be filed, but it will be understood that that does show that it was authorized by the State Commission to act as a common carrier in the State of Arkansas.

Mr. McRae: Do you keep the books of your railroad separate from those of the lumber company?

Mr. Rosborough: Yes.

Mr. McRae: And your bank account the same way?

Mr. Rosborough: Yes, sir, we have separate bank accounts.

Mr. McRae: Do you publish your tariff?

Mr. Rosborough: Yes.

Mr. McRae: And concur in the tariffs of the road with which you connect?

Mr. Rosborough: Yes, sir.

Mr. McRae: And in which you are named as a party?

1100 Mr. Rosborough: Yes.

Mr. McRae: Have you stated the number of employees you have in the railroad company?

Mr. Rosborough: We now have about 25, but when our last year's report was put in, we had about 15.

Mr. McRae: You say you have made application for carrying the mail. Have there been applications from the people there for the appointment of post offices, and if so, how many between Rosboro and Cooper?

Mr. Rosborough: Two post offices.

Mr. McRae: You say you have arranged for the laying out and platting of a town at Cooper?

Mr. Rosborough: Yes, sir.

Mr. McRae: How far have you progressed with that?

Mr. Rosborough: We have had an abstract—lands have been abstracted and a depot has been under construction.

Mr. McRae: You spoke of 50 cents on the log road. When you refer to the log road, you mean the tram road; that is, the spur. That is not the Caddo & Choctaw Railroad?

Mr. Rosborough: Well, I really mean that the mill company pays in addition to the divisions 50 cents per thousand for the train service.

1101 Mr. McRae: Is that train service over the Caddo & Choctaw incorporated line, or for hauling it over the spurs?

Mr. Rosborough: Well, they can construe that just as they choose. That is what they get out of it.

Mr. McRae: You go out over the spurs and bring it in, and charge 50 cents?

Mr. Rosborough: Yes.

Mr. McRae: Is it worth 50 cents to haul it over the spurs?

Mr. Rosborough: Yes, sir.

Mr. McRae: You said you have one engine. Have you any orders for another engine?

Mr. Rosborough: Yes, sir, we have another order in that has been in since last July for a fully equipped engine that is to cost us between $12,000 and $13,000, equipped with headlight and all modern appliances.

Mr. McRae: I believe that is all.

Commissioner Harlan: How many acres of timber does the Caddo River Lumber Company own?

Mr. Rosborough: In the neighborhood of 30,000 acres.

Commissioner Harlan: Has it any timber rights in addition to that?

Mr. Rosborough: You mean timber on land that does not
1102 belong to the company?

Commissioner Harlan: Yes.

Mr. Rosborough: Yes, there is some of that.

Commissioner Harlan: What is the extent of that?

Mr. Rosborough: I don't know. It is all mixed up together, it is all told in this 30,000 acres.

Mr. McRae: Is it not true that the majority of the Stock of the Caddo River Lumber Company and also a majority of the stock of the Caddo & Choctaw Railroad Company is owned by people who are not in any way connected with the Prescott & Northwestern Railroad Company?

Mr. Rosborough: Yes, sir, that is absolutely true.

Mr. McRae: From whom did you buy the first timber holdings for the Caddo River Lumber Company?

Mr. Rosborough: From the Ozan Lumber Company.

Mr. McRae: And in that negotiation the stockholders of that company took a certain per cent of the stock for the purchase money; is not that true?

Mr. Rosborough: That is true?

Mr. McRae: And in that way they are interested?

Mr. Rosborough: Yes.

1103 Mr. McRae: They have no control over it?

Mr. Rosborough: No, sir; they have no control over it, or management.

Mr. McRae: And your company has no control over the management connected with its line or the mill operated by that management?

Mr. Rosborough: No.

Commissioner Harlan: Judge Cowan, have you any questions?

Mr. Cowan: Are all these logging roads projected to Hot Springs practicable as railroad propositions?

Mr. Rosborough: Well——

Mr. Cowan: There have been a good many gentlemen testifying and it seems everybody intends to build a road to Hot Springs, and I am curious to know whether there is traffic there to build all these roads into Hot Springs.

Mr. Rosborough: Well, the Hot Springs people offered $100,000 for a road running in there from our country.

Mr. Cowan: Well, I was speaking of the traffic; that is all.

Mr. Rosborough: Well, I guess that is sufficient, is it not, to know that they have wanted one coming in from the West?

1104 Mr. Cowan: That is a sufficient answer, no doubt. You are handling pine timber altogether, are you?

Mr. Rosborough: Well, no; the railroad company hauls staves and stave bolts, and that is oak.

Mr. Cowan: Well, your lumber company is engaged in the manufacture of pine?

Mr. Rosborough: They are manufacturing pine except with the exception they do saw a little oak for bridge timbers for the Caddo & Choctaw Railroad Company.

Mr. Cowan: The tariff rates on the logs at 50 cents a hundred, applies over all timber spurs?

Mr. Rosborough: Well, I think——

Mr. Cowan: You charge 50 cents a thousand. I do not know as I understand it exactly, but I suppose it means for the entire haul from the spurs where they get the logs on the car up to the mill.

Mr. Rosborough: We get a 4 cent division, you know.

Mr. Cowan: I understand that, but I am speaking of the 50 cents on the logs. What service does that pay for, the entire service from the stump?

Mr. Rosborough: No, we would not be satisfied with 50 cents a thousand.

1105 Mr. Cowan: Well, in so far as it pays for anything, it pays partly for that service from the stump to the mill?

Mr. Rosborough: Well, the railroad equipment hauls the logs off the spurs to the main line, and from the main line they take it on into the mill and——

Mr. Cowan: What does the 50 cents pay for, or does it pay for both?

Mr. Rosborough: It certainly does not pay for both.

Mr. Cowan: It is applied in the direction of which movement?

Mr. Rosborough: I will tell you how we figure that. We figure that the railroad company gets for their service $1.50 per thousand. We figure that the four cents brings them in $1.00 and the 50 cents brings them in 50 cents, and we figure they get $1.50 a thousand through that channel.

Mr. Cowan: But you do not try to segregate the service, one part performed by you where the logging road connects with the railroad tracks, and the other up to the mill, you do not try to segregate the two services on the logs?

Mr. Rosborough: Well, the 50 cents practically covers the spur work, hauling it over the spurs, it is certainly worth 50 cents to haul logs over the spur.

1106 Mr. Cowan: You keep no accounts which show the separation of the service?

Mr. Rosborough: No, we do not.

Mr. Cowan: Is any of that refunded?

Mr. Rosborough: No, sir, not a penny of it.

Mr. Cowan: So that the railroad company is logging your mill, and you are paying them 50 cents a thousand feet for that, and the lumber rate you consider pays from the junction point when the lumber is shipped out, four cents, is that the way of it?

Mr. Rosborough: I think so, yes, sir.

Mr. Cowan: You do not connect with any other railroad except the Iron Mountain?

Mr. Rosborough: No, sir.

Mr. Cowan: Are you acquainted with the situation of saw mills

in Arkansas generally, with respect to the way the business is handled with trunk line railroads?

Mr. Rosborough: I can only speak from our own standpoint, sir.

Mr. Cowan: Well, personally, do you know the location and situation of the saw mill industry tracks, and the trunk line tracks?

1107 Mr. Rosborough: No, I do not personally know anything about anything *about anything*, except our own business.

Mr. Cowan: Well, you find out whether other people get divisions of the rates, of course, and you want to get as good as they do?

Mr. Rosborough: Well, I find we are not getting as good as some of them, but I didn't really know it until I came to this meeting.

Mr. Cowan: Does that put you to a disadvantage?

Mr. Rosborough: Well, perhaps they are giving more service than we are. We would take more, of course, if that is what you are getting at.

Mr. Cowan: Well, does the fact that one man gets four cents and another gets six cents affect the profit of your lumber transactions?

Mr. Rosborough: Not if it costs two cents more for the other man to perform his railroad service.

Mr. Cowan: Suppose it costs the same.

Mr. Rosborough: Well, if it costs the same there might be some discrimination, but I am not able to say whether they are the same. As we extend our road, we will expect greater divisions.

1108 Mr. Cowan: Although your saw mill still remains at the junction point of the main line road?

Mr. Rosborough: Yes, sir.

Mr. Cowan: How much service do you perform in handling the lumber from your mill over to the Iron Mountain?

Mr. Rosborough: Well, that has been answered.

Mr. Cowan: Has it?

Mr. Rosborough: Yes, sir.

Mr. Cowan: All right. In regard to the ownership of stock in the railroad company, is that a beneficial thing in the way of getting money? There are no dividends paid.

Mr. Rosborough: Not a cent.

Mr. Cowan: All the earnings go to pay the interest or into surplus account, and it does not accumulate to the stockholders in the form of dividends?

Mr. Rosborough: The stockholders never have been paid a cent of the Caddo & Choctaw earnings.

Mr. McRae: All of the earnings have gone into the construction and equipment of the road?

Mr. Rosborough: Yes, sir.

Mr. McRae: This 50 cent charge, what would it cost to haul the logs from the stump where the logs are cut, after they are

1109 loaded on the car, over the spur to the line of your road? Your incorporated road? What is that service worth?

Mr. Rosborough: Well, it is certainly worth 50 cents.

Mr. McRae: When you say you get 50 cents for hauling the logs, you do not mean to say that you get any more for that service than it is worth to haul it to the line?

Mr. Rosborough: No.

Mr. McRae: But in a general way you just understand you have gotten the 50 cents?

Mr. Rosborough: Yes.

Mr. McRae: Speaking of the road through to Hot Springs, if those connections were made, what would you estimate would be the difference in time in reaching Hot Springs from north Texas and south Oklahoma over those lines instead of around by the Iron Mountain by way of Benton?

Mr. Rosborough: I have really never figured on that, from a time table standpoint, but it would certainly save a good many miles and perhaps a day's time.

Mr. McRae: What would it cost to get the log from the stump onto the car, loaded?

Mr. Rosborough: You mean from the woods, the log haul?

Mr. McRae: Yes.

1110 Mr. Rosborough: About $2.50 a thousand.

Mr. McRae: The loading in addition to the haul?

Mr. Rosborough: I do not really understand that question.

Mr. McRae: In addition to the hauling of the load, what would it cost to load the logs from the stump onto the car?

Mr. Rosborough: You mean to cut the trees in the woods, bring them to the spur lines and load them on the cars?

Mr. McRae: Yes.

Mr. Rosborough: That would cost an average of at least $2.50.

Mr. McRae: So it would cost about $5.00 a thousand, including transportation from the tree to the mill?

Mr. Rosborough: Yes.

Commissioner Harlan: Mr. Jeffery, will you furnish a copy of the spur track agreement with the Caddo & Choctaw Railroad?

Mr. Jeffery: Yes, sir.

Mr. Cowan: I would like for you to file that tariff.

Mr. Rosborough: Which tariff?

Mr. Cowan: That shows that 50 cent charge, to show where the tariff says that the tariff applies to and from.

Mr. Rosborough: There is no tariff issued on that basis.

Mr. Cowan: Well, then there is no basis for making the 1111 charge over the spur, if there is no tariff issued.

Mr. Rosborough: Well, yes, there is an agreement between the mill company and the railroad company, and the railroad company is getting credited that way each month, and their books will show it.

Mr. Cowan: But there is no tariff for that movement?

Mr. Rosborough: No, there is no tariff for that movement. We have an Arkansas tariff, which I have in my pocket, which I can leave with the Commissioner, if he wants it, but we have no tariff on that basis.

Mr. Cowan: I would like you to do that.

Mr. Rosborough: Yes.

Mr. Cowan: That part of the road called a spur built out into the timber is not incorporated as a railroad?

Mr. Rosborough: No.

Mr. Cowan: So the Arkansas tariff could not apply to that?

Mr. Rosborough: No, but the railroad equipment engines haul that; they go down on the spurs and take their cars down there, and they get these logs and bring them down to the main line.

Mr. Cowan: But there could be no legal tariff over that line as a railroad, because it is not incorporated?

1112 Mr. Rosborough: I don't know anything about that.

Commissioner Harlan: You will not undertake to answer that question.

Mr. Rosborough: I will not undertake to answer that question.

(Witness excused.)

Whereupon, at 1:00 P. M. a recess was taken until 2:00 P. M.

1113 After Recess.

2:00 P. M.

Commissioner Harlan: Is the Elmore & Southwestern before the Commission?

(No response.)

Commissioner Harlan: The Enterprise Railway?

(No response.)

Commissioner Harlan: I thought the Enterprise Railway was represented.

Mr. Brown: The Enterprise Railway is one of the four railroads of the Southern Pine System, and I am sure it would facilitate the inquiry if that could be postponed until the other roads making up that system are present.

Commissioner Harlan: How many are there?

Mr. Brown: Four.

Commissioner Harlan: There are three of them listed here now, and we will take the other one with those three, if you are ready to go on now.

Mr. Brown: We are not quite ready to go on now, because there is some data we are expecting this afternoon with regard to the other three. That data pertains to the Enterprise Railway very largely.

1114 Commissioner Harlan: What kind of data?

Mr. Brown: Showing the contract relations and the manner of operation with respect to the mill.

Commissioner Harlan: We will set the whole group, then, for the first thing in the morning. The Greenfield & Southwestern, or Greenfield & Southeastern, possibly; it is a little obscure at this point.

(No response.)

Commissioner Harlan: The Helena, Parkin & Northern.

(No response.)

Commissioner Harlan: The Homan & Southeastern.

(No response.)

Commissioner Harlan: The Homan & Eastern Line.

(No response.)

Commissioner Harlan: The Cornie & Sheridan.

(No response.)

Commissioner Harlan: The L'Anguille River Railway.

Mr. Brown: Mr. Fry is here for that railroad, your Honor.

Mr. J. J. Coleman: Before going on with that, may I state that in the Chicago Lumber & Coal Company versus the Tioga & Southeastern, a great deal of testimony was taken in connection with tap line rates and divisions, and if your Honor pleases; we
1115 would like to ask that that be made part of the record in this case.

Commissioner Harlan: You refer to the testimony taken in New Orleans?

Mr. Coleman: I refer to the testimony taken in New Orleans and in St. Louis.

Commissioner Harlan: Well, it is my understanding that on that hearing the testimony then taken was attached, by order of the Commission, to the Star Grain & Lumber Case, and therefore that testimony will be before us in this investigation in connection with the Star Grain & Lumber case. It will be understood that that testimony will form a part of this general record.

Mr. Cowan: Before your Honor begins, I make a suggestion probably the Commission can get it easier than the attorneys can, that we apply to the Louisiana Commission for a railroad map which shows the tap lines and logging roads in Louisiana. They have an excellent map of that sort. I have seen one copy, and it will be of great advantage if we can get it in the record. I mention it now lest we forget it.

Commissioner Harlan: Commissioner Taylor of that Commission was here a day or two ago.

1116 Mr. Cowan: Mr. Barrow, the Secretary, is here

Commissioner Harlan: Is Mr. Barrow here now?

Mr. Cowan: He is not in the room.

Commissioner Harlan: We will make that application.

Mr. Cowan: On application, I have no doubt they will furnish a sufficient number of copies for the parties interested.

1117 *L'Anguille River Railway Company.*

THOMAS W. FRY was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: Your name is——

Mr. Frey: Thomas W. Fry.

Commissioner Harlan: Where do you live?

Mr. Fry: St. Louis.

Commissioner Harlan: What is your business?

Mr. Fry: I am secretary of the Charles F. Luehrmann Lumber Company.

Commissioner Harlan: Is that an incorporated company?

Mr. Fry: Yes, sir, at St. Louis, Missouri.

Commissioner Harlan: Has it any relations with any railroad company?

Mr. Fry: Not directly, no, sir.

Commissioner Harlan: Have its stockholders any relation to any railroad company?

Mr. Fry: Some of the stockholders of the Luehrmann Lumber Company have stock in the L'Anguille River Railway Company.

Commissioner Harlan: Are you personally connected with the railroad company?

1118 Mr. Fry: I have some stock in it.

Commissioner Harlan: You are not an officer in it?

Mr. Fry: No.

Commissioner Harlan: Do you know anything about it?

Mr. Fry: Well, somewhat about the organization of it.

Commissioner Harlan: Is there any officer of that company here?

Mr. Fry: No.

Commissioner Harlan: Are you prepared to give us all we want about the history of that road and its organization?

Mr. Fry: Yes, sir.

Commissioner Harlan: And the details of its operations?

Mr. Fry: I think so.

Commissioner Harlan: And all about its annual reports, and things of that kind?

Mr. Fry: I will try to give you all I can.

Commissioner Harlan: Can you tell us why there is not some officer of the road here?

Mr. Fry: I do not know a thing about that, except on Saturday afternoon Mr. Luehrmann, who had intended to come down here, who is president of the road, wired me about four o'clock in the afternoon that he could not come down, and asked me

1119 to come down.

Commissioner Harlan: You think you are qualified with the necessary information to tell us about this road?

Mr. Fry: I think so; yes, sir.

Commissioner Harlan: Very well; now, tell us when that road was organized.

Mr. Fry: In 1902.

Commissioner Harlan: Under the laws of what state?

Mr. Fry: Arkansas.

Commissioner Harlan: And for what general purposes?

Mr. Fry: For hauling merchandise from the L'Anguille River to the Iron Mountain Railroad.

Commissioner Harlan: Was the road constructed at the time of the incorporation of the railroad company?

Mr. Fry: No, sir.

Commissioner Harlan: How soon afterwards was it constructed?

Mr. Fry: Immediately afterward.

Commissioner Harlan: Starting out from what point?

Mr. Fry: From a connection with the Iron Mountain, and running in a general circular direction to the L'Anguille River.

1120 Commissioner Harlan: What do you call that junction point?

Mr. Fry: That is at Marianna proper.

Commissioner Harlan: Where is Marianna on the map of Arkansas?

Mr. Fry: Right on the Helena & Winn branch of the Iron Mountain.

Mr. Cowan: That is in the hard wood district?

Mr. Fry: Yes, sir.

Commissioner Harlan: What is the length of that road?

Mr. Fry: 1.7 miles.

Commissioner Harlan: How long did it take the railroad company to construct it?

Mr. Fry: I think it was about four or five months.

Commissioner Harlan: And at what cost?

Mr. Fry: The total cost of the railroad right of way and rails, without the equipment, was a little over $13,000.

Commissioner Harlan: From whom was the right of way purchased?

Mr. Fry: From a variety of persons, and one small piece by condemnation.

Commissioner Harlan: Has it station facilities at Marianna?

Mr. Fry: That is the junction with the Iron Mountain
1121 Railroad.

Commissioner Harlan: That is not a town?

Mr. Fry: Marianna is a town, and the junction is right in part of the town; the Iron Mountain runs through Marianna.

Commissioner Harlan: Has the L'Anguille River Railroad any station of its own there?

Mr. Fry: No.

Commissioner Harlan: It joins with the Iron Mountain?

Mr. Fry: It joins with the Iron Mountain on an interchange track.

Commissioner Harlan: It does not have any station expense there at all?

Mr. Fry: No.

Commissioner Harlan: Is there any mill near its junction with the Iron Mountain?

Mr. Fry: There is one mill near there, but it does not ship on the L'Anguille River Railway. It ships on the Iron Mountain.

Commissioner Harlan: Is there any mill on the L'Anguille River Railway?

Mr. Fry: Two on the other end. One is named Deutsch, owned by the Indiana-Arkansas Lumber & Manufacturing Com-
1122 pany, and the other is River, on which the Miller Lumber Company is located, and there is a lumber yard belonging to McDonald Brothers at a point called Hilly.

Commissioner Harlan: Has the L'Anguille River Railway any equipment?

Mr. Fry: Just two locomotives.

Commissioner Harlan: No cars?

Mr. Fry: No, no cars.

Commissioner Harlan: Is there any logging railroad that joins it?

Mr. Fry: No, sir; all of the logs for the mills we ship over it are brought in by the river, and have nothing whatever to do with it.

Commissioner Harlan: Brought in on the L'Anguille River?

Mr. Fry: Yes, sir.

Commissioner Harlan: And is the mill of the Miller Lumber Company on the river?

Mr. Fry: Yes, sir.

Commissioner Harlan: How close to the rails of the L'Anguille River Railway?

Mr. Fry: They have a little spur track running right down to the river; likewise with the Indiana & Arkansas Company;
1123 they are also located on the river, and bring in all their logs by river.

Commissioner Harlan: Their logs are floated?

Mr. Fry: They are pulled up; they are floated down the St. Francis to the L'Anguille River, and pulled up by boats.

Commissioner Harlan: Those boats are operated by whom?

Mr. Fry: The lumber company.

Commissioner Harlan: And belong to them?

Mr. Fry: Yes, sir.

Commissioner Harlan: What distance are the logs floated and pulled by water?

Mr. Fry: From ten miles to about 75 miles.

Commissioner Harlan: And from forests belonging to these lumber companies?

Mr. Fry: Largely belonging to them, and from logs purchased in the open market.

Commissioner Harlan: The logs so purchased are also floated and pulled here by water?

Mr. Fry: Yes, sir.

Commissioner Harlan: Is it all hard wood?

Mr. Fry: Yes, sir, except some cypress.

Commissioner Harlan: Who furnished the capital for the
1124 construction of this railroad?

Mr. Fry: The stockholders.

Commissioner Harlan: Who are the officers?

Mr. Fry: Mr. George Luehrmann and Mr. Ed Luehrmann.

Commissioner Harlan: Is he president?

Mr. Fry: Mr. George Luehrmann is president.

Commissioner Harlan: And Mr. Ed Luehrmann?

Mr. Fry: Treasurer.

Commissioner Harlan: Who are the other officers?

Mr. Fry: Mr. Miller is vice-president and Mr. Max Miller is general manager.

Commissioner Harlan: Are they officers of the lumber company?

Mr. Fry: Mr. George Luehrmann is president of the Indiana & Arkansas Lumber Company and Mr. Ed Luehrmann is vice-president of the Luehrmann Lumber Company and Mr. Miller is president of the Miller Lumber Company and Mr. Houck the secretary of the L'Anguille River Railway is an officer, but I am not sure what officer he is, of the Miller Lumber Company.

Commissioner Harlan: What is the authorized capital stock of the company?

1125 Mr. Fry: $10,000

Commissioner Harlan: And it has expended $13,000?

Mr. Fry: On railway roadbed, and about $5,000 on equipment.

Commissioner Harlan: What about the rails?

Mr. Fry: I say, on the railroad roadbed and rails, about $13,000, and on equipment a little over $5,000.

Commissioner Harlan: Who owns that stock, the $10,000 that has been issued?

Mr. Fry: I can give you all the names of the stockholders, if you would like.

Commissioner Harlan: If you will, please, and the amounts.

Mr. Fry: I would have to refer to—I telegraphed this morning for an exact list, to see if there had been any changes in the stock book. I will have that answer this afternoon, and if you will permit me, I would like to file it afterwards.

Commissioner Harlan: Very well, that may be done. But in general, are the stockholders of the railroad company also stockholders in the Luehrmann Lumber Company?

Mr. Fry: No, sir, about half of them are.

Commissioner Harlan: And the other half are stockholders in some other lumber company?

1126 Mr. Fry: The Miller Lumber Company and the Indiana & Arkansas.

Commissioner Harlan: The mill here belongs to the Luehrmann Lumber Company?

Mr. Fry: To the Indiana & Arkansas Lumber & Manufacturing Company, and the Miller Lumber Company.

Commissioner Harlan: There are two mills?

Mr. Fry: Yes, sir.

Commissioner Harlan: Where is the mill of the Luehrmann Lumber Company?

Mr. Fry: We have no mill there. They have a mill up further in Arkansas, but not at Marianna.

Commissioner Harlan: And neither of these lumber companies have a mill on this line, owning a forest on the line?

Mr. Fry: I did not catch that.

Commissioner Harlan: Neither of these mills own any timber land along this road?

Mr. Fry: Not on the line, but on the L'Anguille River.

Commissioner Harlan: Well, you said that was 75 miles away.

Mr. Fry: From ten to 75 miles away; that is, by river; of course those distances vary on account of the river line.

1127 Commissioner Harlan: Does the Miller Company own any mill elsewhere?

Mr. Fry: I think in Louisiana, but I am not sure.

Commissioner Harlan: Have they on the lien of the Luehrmann & Western Railway?

Mr. Fry: No.

Commissioner Harlan: Has the Indiana & Arkansas Company any mill on that line?

Mr. Fry: No, sir.

Commissioner Harlan: Has the Luehrmann Lumber Company?

Mr. Fry: Yes, sir.

Commissioner Harlan: Where is that line? The Luehrmann & Western?

Mr. Fry: Running down from a point at the intersection of the Iron Mountain and the Black River, immediately north of Knobel and south of Corning.

Commissioner Harlan: The Miller Lumber Company and the Indiana & Arkansas Lumber Company own all the stock in this railroad?

Mr. Fry: No, the stockholders of those two companies own all the stock.

Commissioner Harlan: Well, I meant it in that sense.

1128 Mr. Fry: Yes, sir.

Commissioner Harlan: Have you any station at Deutsch?

Mr. Fry: We have no regular separate building; no, sir.

Commissioner Harlan: You mentioned another point near Deutsch, did you not?

Mr. Fry: Hilly and River.

Commissioner Harlan: You have not any station there, either?

Mr. Fry: No separate station.

Commissioner Harlan: Is there any community on the line of this railroad?

Mr. Fry: Other industries?

Commissioner Harlan: Any community, any population?

Mr. Fry: Well, Marianna. If you will look at the map, Marianna occupies this ground in and around here (indicating). The farther you get away from here, the farther you are away from the town.

Commissioner Harlan: That is the point of connection with the Iron Mountain, or substantially so?

Mr. Fry: Yes, sir.

Commissioner Harlan: At the other end of the track, is there any population, farming population?

1129 Mr. Fry: Right across the river, the farther you get away from the town the more farms there are.

Commissioner Harlan: Do you move any traffic for them?

Mr. Fry: A slight amount, but not a great deal, but it is growing as the ground is being opened up.

Commissioner Harlan: What was the total tonnage last year?

Mr. Fry: About 35,000 tons.

Commissioner Harlan: And of that amount, what came from these outside shippers?

Mr. Fry: I have not got that exactly in tons, but it is practically about 15 per cent outside. I will file a statement with the Commission, with your permission, giving the exact amount.

Commissioner Harlan: If you will, very well. Do you move any mail or express matter?

Mr. Fry: No.

Commissioner Harlan: Carry any passengers?

Mr. Fry: No.

Commissioner Harlan: Pay any dividends on the railroad stock?

Mr. Fry: Not yet.

Commissioner Harlan: Have you made any net profits?

1130 Mr. Fry: We have accumulated a surplus of about $8,000.

Commissioner Harlan: From the beginning in 1902 to date?

Mr. Fry: Yes, sir.

Commissioner Harlan: Have you made any expenditures out of income on the roadbed?

Mr. Fry: We have expended our surplus.

Commissioner Harlan: The surplus you have just mentioned has been expended on the improvement of the roadbed?

Mr. Fry: Yes, sir.

Commissioner Harlan: What is the character of the track there?

Mr. Fry: Circular and very hilly and a grade of about 43½ feet in the mile.

Commissioner Harlan: Is it ballasted?

Mr. Fry: As well as we can; yes, sir.

Commissioner Harlan: What kind of rail have you?

Mr. Fry: 56 and 60 pound.

Commissioner Harlan: Do the officers of the railroad company receive any salaries?

Mr. Fry: Yes, sir.

Commissioner Harlan: Will you be kind enough to state what the salaries are?

1131 Mr. Fry: The salaries of the general officers last year were $6,480.

Commissioner Harlan: Do they also receive salaries from the lumber company?

Mr. Fry: Well, neither of the two first officers receive any salaries from the Indiana & Arkansas Company, and I presume that Mr. Miller does receive some salary from his own company, but I am not sure of it.

Commissioner Harlan: This road, then, hauls only the manufactured lumber?

Mr. Fry: Yes, sir.

Commissioner Harlan: And it goes into Memphis, I suppose, largely, does it not?

Mr. Fry: No, it goes to the north central states, a majority of it.

Commissioner Harlan: Over the Iron Mountain?

Mr. Fry: Over the Iron Mountain.

Commissioner Harlan: And what kind of rates are in effect for that traffic?

Mr. Fry: The rate is 12 cents into St. Louis, and 20 cents into Chicago.

Commissioner Harlan: Of the 20 cent rate, what division
1132 does the L'Anguille River Railway receive?

Mr. Fry: Two cents.

Commissioner Harlan: And to St. Louis?

Mr. Fry: Two cents; a flat division on interstate business.

Commissioner Harlan: On all interstate business?

Mr. Fry: Yes, sir.

Commissioner Harlan: On state business, what does it receive?

Mr. Fry: Nothing.

Commissioner Harlan: Is there any state business?

Mr. Fry: Some.

Commissioner Harlan: And that is free of charge?

Mr. Fry: Free of any division from the railroad. The railroad makes an extra charge of two cents per 100 pounds.

Commissioner Harlan: But the L'Anguille River Railroad does not receive anything?

Mr. Fry: From the connecting roads, no, sir.

Commissioner Harlan: Does it receive anything from the shippers?

Mr. Fry: Two cents.

Commissioner Harlan: How many employes has the railroad?

Mr. Fry: I think about ten or eleven.

1133 Commissioner Harlan: Well, you said it only had two locomotives and has no equipment. Whose equipment is used?

Mr. Fry: The Iron Mountain.

Commissioner Harlan: And you haul it in to the mill?

Mr. Fry: Haul it in and haul it out.

Commissioner Harlan: What do these ten or eleven employees do? I do not refer to the engineer and firemen, but the others?

Mr. Fry: The trackman and——

Commissioner Harlan: Do they do any loading or unloading?

Mr. Fry: No, sir.

Commissioner Harlan: Where is the car loaded, at the planing mill?

Mr. Fry: There are two planing mills and two saw mills. Of course the planing mill products are loaded at the respective planing mills and the saw mill products at the respective saw mills, and the rough lumber is also loaded from the McDonald Lumber Company's accumulation yard.

Commissioner Harlan: The saw mill product is rough lumber?

Mr. Fry: Yes, sir. We also handled some considerable lumber from the Walstein Lumber Company which has a little mill

1134 up on the St. Francis which brought it in by boat and it was unloaded there and loaded on to cars on our road.

Commissioner Harlan: What charge did you make for that?

Mr. Fry: Two cents, except where it went through interstate, and then we did not charge anything but billed it from there.

Commissioner Harlan: There is no relation between the stockholders of that company and the railroad?

Mr. Fry: Of neither one of those companies, no, sir.

Examiner Burchmore: What companies did you state the stockholders were in who owned the stock of your line?

Mr. Fry: The stockholders of the Indiana & Arkansas and the Miller Lumber Company.

Examiner Burchmore: The mills on the line are owned by what companies?

Mr. Fry: The Miller Company and the Indiana & Arkansas.

Examiner Burchmore: The L'Anguille Lumber Company has a mill on your line?

Mr. Fry: The Miller Lumber Company now used to be the
1135 L'Anguille Lumber Company, and they changed the name a year ago.

Commissioner Harlan: They are both incorporated companies?

Mr. Fry: I think so, yes, sir.

Examiner Burchmore: All the stockholders in the Indiana & Arkansas Lumber & Manufacturing Company are also stockholders in the Miller Lumber Company; the two lumber companies have common stockholders?

Mr. Fry: No, sir; they are entirely separate and distinct.

Commissioner Harlan: Are the stockholders of the Luehrmann Lumber Company common with the stockholders of any other company?

Mr. Fry: Some of the stockholders of the Luehrmann Company own stock in the Indiana & Arkansas Company.

Examiner Burchmore: As a matter of fact, do not all the stockholders in the Indiana & Arkansas Lumber Company own stock in the Luehrmann Lumber Company?

Mr. Fry: I do not think so. One stockholder, I believe.

Examiner Burchmore: What is his holding?

Mr. Fry: About 30 or 40 per cent of the Luehrmann Lumber Company.

Commissioner Harlan: Has that been so for the last three
1136 or four years?

Mr. Fry: I think it was about four years ago.

Commissioner Harlan: Do all your answers relating to the ownership by stockholders cover the period of the last three or four years substantially?

Mr. Fry: I think so.

Commissioner Harlan: There has been no recent change of any importance?

Mr. Fry: No; there was one stockholder in the Indiana & Arkansas, I have forgotten the exact date, but I think it was about three years ago, that sold out and did not remain a holder.

Examiner Burchmore: The junction point with the Iron Mountain is known as Marianna?

Mr. Fry: Yes, sir.

Examiner Burchmore: And Deutsch is at the other end of the line?

Mr. Fry: Yes, sir.

Examiner Burchmore: You referred to Hilly and River as two stations. Are they the stations at the two mills referred to?

Mr. Fry: Deutsch is one mill, right up here, and then River and Hilly are right down here at these respective points, one is
1137 the loading point of the Miller Lumber Company and the other is the loading point of the McDonald Lumber Com-

pany, and at River there is also a small elevator being built to take care of river shipments. They do not amount to very much, but they are growing.

Examiner Burchmore: Has the Iron Mountain a public or private track extending from its general right of way up to the river?

Mr. Fry: No, sir.

Examiner Burchmore: It has none?

Mr. Fry: No.

Examiner Burchmore: There is no way in which shipments coming down the river could be loaded directly into the cars standing on the tracks of the Iron Mountain Railroad?

Mr. Fry: The only way they could do would be to load them on our railroad, or haul it by wagon.

Examiner Burchmore: Are there any joint through rates on lumber applying from Deutsch to interstate destinations?

Mr. Fry: Yes, sir.

Examiner Burchmore: Are those the same as the junction point Marianna rates?

Mr. Fry: Yes, sir.

1138 Examiner Burchmore: They are no higher?

Mr. Fry: No.

Examiner Burchmore: You receive a uniform division of two cents per hundred pounds on all outbound lumber?

Mr. Fry: Except to some southwestern points. The tariff of the Iron Mountain on file with the Commission shows that. I have forgotten.

Commissioner Harlan: Without those things, is it less or more?

Mr. Fry: Less.

Examiner Burchmore: Do any logs move into the mill of the Miller Lumber Company over your rails?

Mr. Fry: No.

Examiner Burchmore. Do any logs move into the mill of the lumber company by rail?

Mr. Fry: No.

Examiner Burchmore: They are all floated down by the river?

Mr. Fry: Yes, sir, floated down the St. Francis and brought up the L'Anguille River.

Examiner Burchmore: There is no transportation service rendered by your company with reference to these lumber movements, except on the finished product out of the mill?

1139 Mr. Fry: Yes, sir.

Examiner Burchmore: And that transportation service consists in one case of one-quarter of a mile?

Mr. Fry: I did not state that.

Examiner Burchmore: What is the distance from the mills to the junction point?

Mr. Fry. About one mile and a fifth.

Examiner Burchmore: And in the case of the other mill?

Mr. Fry: It is practically the same. The other extension is a little extension to the road.

Examiner Burchmore: The report of the examination of this

company seems to indicate that the mills are respectively three-quarter and seven-eighths of a mile from the junction point.

Mr. Fry: I can't be sure. Here is the scale, 100 feet, and you can count them (indicating). It shows 5,700 feet; that is over a mile.

Examiner Burchmore: To what mill?

Mr. Fry: The Indiana & Arkansas.

Commissioner Harlan: Did the Iron Mountain ever have a spur track down to the river?

Mr. Fry: When we started down there, we had an arrange-
1140 ment with the Iron Mountain for furnishing us rails with the consideration that we give them all the freight made by the lumber company, and the rail was put down and kept there a short while and then we returned the rail to the Iron Mountain and put down our own rail, and purchased it in the open market.

Commissioner Harlan: When was that done?

Mr. Fry. I think that was done in 1906 or 1904.

Commissioner Harlan: And what was the length of the rail so furnished to you by the Iron Mountain?

Mr. Fry: I could not give you the exact feet, but it was about as long as the rail is now. I could secure that information and file it also.

Commissioner Harlan: Was the bed of that road graded?

Mr. Fry: Graded, and there was a good big cut up there at the first curve; that was all done by the L'Anguille River Railway Company.

Commissioner Harlan: The Iron Mountain had no expense in connection with the track which was laid, except in furnishing the rail?

Mr. Fry: No.

Commissioner Harlan: And they furnished the labor?

1141 Mr. Fry: No.

Commissioner Harlan: What charge did they make for the use of the rails?

Mr. Fry: They simply gave us the rail; loaned it to us without charge.

Commissioner Harlan: Did you have any equipment at that time, any locomotives?

Mr. Fry: We bought a locomotive.

Commissioner Harlan: You did the hauling at that time?

Mr. Fry: Always did the hauling.

Examiner Burchmore: You referred to a mill of the Luehrmann Lumber Company located further up in Arkansas.

Mr. Fry: I answered a question in regard to that from the Commissioner.

Examiner Burchmore: Does this railroad handle any logs or lumber moving to or from that mill further up in Arkansas?

Mr. Fry: No.

Examiner Burchmore: I am not advised as to the geographical location——

473

Mr. Fry: They are not at all similar, and cannot be considered, because one is 100 miles north of this point.

Examiner Burchmore: You stated the total salaries of the
1142 general officers were $6,480 per annum, as I understood it. What portion is that of the total operating expenses of the company?

Mr. Fry: About six to eleven, I think.

Examiner Burchmore: The report before me apparently for the fiscal year ending June 30, 1909, indicates that the total operating expenses of that railroad for the year 1909 was $9,911.60, of which $6,480 was general office salaries. That would leave about $3,500 to take care of the track and transportation and traffic expenses. Those figures are approximately the same for the fiscal year ending June 30, 1910.

Mr. Fry: No, the total cost was greater, and the salaries remained the same. You have a report on file for 1910.

Examiner Burchmore: It is not here.

Commissioner Harlan: What seems to be a branch of your road runs up to a brick factory, and also to the cemetery. Do you get any traffic from the brick factory?

Mr. Fry: We get some little traffic from the brick yard, and they are just growing and we expect to get considerable business as soon as they are able to ship out stuff.

Examiner Burchmore: Your I. C. C. No. 1 of the L'Anguille River Road, which is the tariff of local rates applying to
1143 points on your road, names a rate of $3.00 per car for the movement of coal from Marianna, Arkansas, the connection with the Iron Mountain, to the Light & Power Company's switch at Marianna, and names a minimum rate of $5.00 per car on cotton from River to Marianna, and similar rates on other commodities, a few of them. Do you consider those rates compensatory for the service rendered under them?

Mr. Fry: The rate for coal, I think, has been changed. Haven't you a later tariff than that?

Examiner Burchmore: This is the latest tariff I have before me. What is the present rate on coal?

Mr. Brown: You have a copy of the last issue of the tariff have you not, Mr. Fry?

Mr. Fry (handing paper): It is down to $3.00.

Examiner Burchmore: $3.00 per car?

Mr. Fry: Yes, sir.

Examiner Burchmore: The same rate apparently applies on brick, lumber, cement, sand and gravel.

Mr. Fry: Yes, sir.

Examiner Burchmore: Do you consider that rate a compensatory rate for the service rendered thereunder?

Mr. Fry: No, I hardly do.

1144 Commissioner Harlan: How far is it by the county road from the brick factory over to the Iron Mountain's freight station or loading track?

Mr. Fry: By the way the road runs?

Commissioner Harlan: Yes.

Mr. Fry: I suppose it is a mile and a half, up hill.

Examiner Burchmore: There are joint through rates on lumber from Deutsch to interstate destinations. Is there a milling in transit privilege in connection with those rates?

Mr. Fry: Not that I know of.

Commissioner Harlan: Have you any questions, Mr. Brown?

Mr. Brown: I notice on your map here that a part of the railroad is constructed on Louisiana Street of the town of Marianna. Will you please state whether the permission to lay the track on that street was secured by an ordinance from the town?

Mr. Fry: That is my impression. I know we received permission?

Mr. Brown: We would like permission to file a copy of the ordinance.

Commissioner Harlan: No, the record may show it is done by ordinance, or a permit of the municipal authorities, and this
1145 map may be attached to the record.

(The map so offered and identified was received in evidence and thereupon marked L'Anguille River Railway Exhibit No. 1, witness Fry, received in evidence December 12, 1910, and is attached hereto.)

Mr. Brown: You stated in your direct examination that part of your right of way was acquired under condemnation proceedings?

Mr. Fry: Yes, sir.

Mr. Brown: Did you secure the deed for that part under the decree of the board?

Mr. Fry: I think so; that is my impression. I was not there at that time, but I remember having a letter notifying us that on a stretch right on the curve it was necessary to institute condemnation proceedings to go through. The man was asking an exorbitant price.

Mr. Brown: You stated in response to a question from Commissioner Harlan that you had no station buildings out on your road.

Mr. Fry: Yes.

Mr. Brown: I notice on your plat exhibit 1 a building marked "River Warehouse." Please explain that to the Com-
1146 missioner and also explain the use that that structure is put to.

Mr. Fry: A small building on the river at the landing of the packets; in the summer time, when the water is good there are a couple of lines that run a regular packet service between Marianna and the St. Francis River, and the lands along the St. Francis are opening up as fast as the Indiana & Arkansas Lumber Company cuts the timber, they are opening up farms, and as they cultivate it, we expect to have considerable business over L'Anguille River Railroad. This little station is a landing place, with a little elevator for elevating material from the boats so it can be loaded onto the cars.

Mr. Brown: And you interchange traffic with the packet lines?

Mr. Fry: To a small extent.

Mr. Brown: Is that business increasing or on the decline?

Mr. Fry: It is increasing.

Mr. Brown: What, in your opinion, is the prospect for the future growth of that interchange business on the river?

Mr. Fry: We expect it will occupy a very respectable per-
1147 centage of the entire revenues, because of the fact that the land has been a wilderness up to the present time, and is being rapidly opened to cultivation.

Mr. Brown: What is its character after being cleared of the timber, with respect to being suitable for agricultural purposes?

Mr. Fry: All my railroad friends tell me it is the richest natural ground in the United States, the St. Francis Valley.

Mr. Brown: Is it the bottom land of the St. Francis River?

Mr. Fry: Yes, sir, very thick, deep, alluvial soil.

Mr. Brown: What do they grow that would be articles of commerce?

Mr. Fry: Cotton largely, and some alfalfa and farm products.

Mr. Brown: Do you have any inbound business for this railroad?

Mr. Fry: There is quite a respectable amount.

Mr. Brown: Have you any figures that would indicate what that was?

Mr. Fry: Yes, sir, inbound last year was 168 cars, and 3,540 tons.

1148 Mr. Brown: Do you have a division with the Iron Mountain on the inbound as well as outbound business?

Mr Fry: No.

Mr. Brown: What charge do you make on the inbound business?

Mr. Fry: Two cents per 100 pounds.

Mr. Brown: Is that your local rate?

Mr. Fry: Yes, sir.

Commissioner Harlan: What was that tonnage inbound?

Mr. Fry: Lumber coming in to the box factory at Miller.

Mr. Brown: Where did that come from largely?

Mr. Fry: All points on the Iron Mountain, some on the Frisco, and some from the Rock Island.

Mr. Brown: Within the State of Arkansas or beyond?

Mr. Fry: Yes, sir; all within the state.

Commissioner Harlan: Do you move the box material out again?

Mr. Fry: We reship it.

Mr. Brown: It goes on, on what sort of a rate, a milling in transit rate?

Mr. Fry: I think the Miller Lumber Company, they own that box factory; I am not conversant with it, but I am under the impression they have a milling in transit arrangement with the
1149 Iron Mountain for lumber that is converted into shooks.

Mr. Brown: From whom do you collect the freight?

Mr. Fry: From the Miller Lumber Company direct.

Mr. Brown: There is no absorption of that by the Iron Mountain on the outbound movement?

Mr. Fry: No.

Mr. Brown: Who bears the expense of maintaining this river warehouse station?

Mr. Fry: The L'Anguille River Railway.

Mr. Brown: So that you do have some station expenses along your line?

Mr. Fry: Nominal.

Commissioner Harlan: What traffic do you interchange there with the river lines?

Mr. Fry: Some cotton and cotton seed. We had a couple of carloads of household goods a couple of months ago.

Mr. Brown: Was that an interstate shipment of household goods which you refer to?

Mr. Fry: I think it was; yes, sir.

Commissioner Harlan: On what sort of tariff?

Mr. Fry: I am not sure whether it was an interstate shipment or within the state.

1150 Commissioner Harlan: Did you take it from the water lines and load it onto the cars?

Mr. Fry: We took it down and shipped it by boat.

Mr Brown: It came in over the Iron Mountain?

Mr. Fry: Yes, sir.

Commissioner Harlan: Did you load it on the boat?

Mr. Fry: No, we did not perform that duty.

Commissioner Harlan: Who did it?

Mr. Fry: The boat company.

Commissioner Harlan: The other way, do you get some traffic from the packets?

Mr. Fry: Some little; it is growing.

Commissioner Harlan: Who loads it on the cars?

Mr. Fry: Anything that comes in the shippers load.

Commissioner Harlan: The shippers?

Mr. Fry: The shippers will load any lumber or things of that kind.

Commissioner Harlan: But traffic which comes off the boats into your track and then on to the Iron Mountain?

Mr. Fry: If the boats bring any, they have to load it themselves.

Commissioner Harlan: Does that traffic proceed under a
1151 tariff filed with the Commission?

Mr. Fry: What little we have handled, yes, sir.

Commissioner Harlan: There is a tariff?

Mr. Fry: It has been largely local. I think I gave it to you.

Mr. Brown: You have a class and commodity tariff there, have you?

Mr. Fry: Yes, sir.

Mr. Brown: What is the I. C. C. number of that tariff, Mr. Fry?

Mr. Fry: No. 3.

Mr. Brown: That is the independent tariff of your railroad company, is it?

Mr. Fry: Yes, sir.

Examiner Burchmore: This is a copy of your annual report for 1910?

Mr. Fry: Yes, sir.

Examiner Burchmore: How much cotton did you handle during the year ending June 30, 1910?

Mr. Fry: I am not able to state.

(Book handed witness.)

1152 Mr. Fry: There was not any. We handled some hay.

Examiner Burchmore: You did not handle any cotton during the year ending June 30, 1910?

Mr. Fry: No.

Examiner Burchmore: How much have you handled since June 30, 1910?

Mr. Fry: I cannot tell you, but I can find out.

Examiner Burchmore: An increased tonnage?

Mr. Fry: I am not able to state.

Commissioner Harlan: Will you be good enough to prepare and send to the Commission a statement showing your total tonnage during the year ending June 30, 1910, and also showing what part of that approximately, if not accurately, belonged to the Indiana & Arkansas Lumber & Manufacturing Company and what part to the Miller Lumber Company and what part to other companies?

Mr. Fry: I will be very glad to.

Mr. Brown: May we bring that down to date?

Commissioner Harlan: Yes, if you will make that year complete in itself and then show additionally down to date?

Mr. Brown: Yes.

Commissioner Harlan: Then also show your total operat-

1153 ing revenue, divided in the same manner; that is, showing what was paid to you by the Indiana & Arkansas Company.

Mr. Fry: I will show the tonnage and revenue.

Commissioner Harlan: The total revenue, divided by these various shippers, the details.

Mr. Fry: I will show you each shipper and the tonnage and the revenue.

Commissioner Harlan: You need not show any of the independent shippers, but show the two companies.

Mr. Fry: Yes, sir.

Commissioner Harlan: And then group the other shippers.

Mr. Fry: Yes, sir.

Mr. Brown: How far up and down the river do these packet lines run, if you know?

Mr. Fry: I think one boat to Rajah, and the other to the cut off.

Mr. Brown: Where do they start?

Mr. Fry: At Marianna.

Mr. Brown: How far is that?

Mr. Fry: I think about 75 miles.

Mr. Brown: Do you file your tariffs with the State Commission of Arkansas?

1154 Mr. Fry: I do not attend to that, but I think we comply with the regulations.

Mr. Brown: Do you make your reports and pay your taxes to the Railroad Commission of Arkansas as a railroad corporation?

Mr. Fry: Yes, sir.

Mr. Brown: What is the possibility of hauling from the river to the Iron Mountain by wagon, considering the topography of the country?

Mr. Fry: Well, it is hilly, and in dry weather of course it can be hauled, but in wet weather it is a practical impossibility to do anything regularly.

Mr. Brown: What proportion of the year ordinarily would it be impossible to handle the business by wagon?

Mr. Fry: In the early summer, commencing with June, July, August and September, on up possibly to November, and it commences to get wet about now.

Mr. Brown: Are you a member of the per diem agreement?

Mr. Fry: We operate under demurrage.

Mr. Brown: You are on a demurrage basis with respect to the Iron Mountain, are you?

Mr. Fry: Yes, sir.

1155 Mr. Brown: When you receive cars from the Iron Mountain, where does the Iron Mountain place them for delivery to your company?

Mr. Fry: On an interchange track at Marianna.

Mr. Brown: Does the locomotive power of the Iron Mountain come onto your rails for any purpose?

Mr. Fry: No.

Mr. Brown: Your locomotives receive the empty cars on the interchange track, do they?

Mr. Fry: Yes, sir.

Mr. Brown: And they pull them to the proper place on your line for loading, and then haul the loaded car back and make delivery to the Iron Mountain on the interchange track?

Mr. Fry: Yes, sir.

Mr. Brown: Is that interchange track indicated on this blue print map of your railroad?

Mr. Fry: I think just that continuation of our road up there.

Mr. Brown: It is the continuation up there beyond the point of the connection?

Mr. Fry: Yes, sir.

Mr. Brown: If the Commissioner would like to have it, I will file a statement of the stockholders of the two lumber companies

1156 referred to, showing just what relation they bear.

Commissioner Harlan: Very well.

Mr. Brown: Have you any plans or purposes looking to the extension of this railroad beyond its present terminus?

Mr. Frey: We have had under contemplation——

Commissioner Harlan: Now, Mr. Fry, don't tell us you are going to Hot Springs.

Mr. Fry: We have not, but we have 35,000 acres a little northeast of Marianna which we have never cut any timber from. The Crittenden Railway Company running south from Earl down to

Heth has a terminus immediately north of our land and we have had it up with the possible view of ultimately building up and connecting with that road and rushing a larger system. We have not gone any further than talking about it.

Commissioner Harlan: Had you contemplated that plan of reaching the tracks of the Rock Island?

1157 Mr. Fry: We had only a connection with that, the reaching of the Midland Lumber Company. Of course we appreciate to the full the advantages of connecting up with the other railroads.

Mr. Cowan: I suppose you have heard the evidence of the Crittenden Railroad Company here the other day?

Mr. Fry: I was not here.

Mr. Cowan: You will find in the record that there is no use of your extending your line, as they are building very rapidly in that direction.

Mr. Fry: That will save us some money, then.

Mr. Cowan: Undoubtedly. Is it not a fact that these lumber companies through that country handling hard wood and other lumber have their mills and track so arranged that they all get a part of the rate from the through lines, greater or less, according to their ability to do trading, of course?

Mr. Fry: I am not very familiar *expect* what I have heard since I have been here. I have had considerable illumination since I got here this morning.

Mr. Cowan: You have no chance to connect up with the Rock Island anywhere, have you?

Mr. Fry: Not unless I connect the way I spoke of.

1158 Mr. Cowan: And even then you would increase your division?

Mr. Fry: Sir?

Mr. Cowan: Do you know of any lumber concern in the countrwhere the railroad company builds its side tracks and spurs out as a proposition of its own to handle the saw mill output? In all cases you know of, the lumber company has its own tracks and has some sort of an arrangement whereby they get part of the rate?

Mr. Fry: I am not particularly familiar with what the other people do.

Mr. Cowan: I said so far as you know, that is the question.

Mr. Fry: No, I do not.

Mr. Cowan: You look out and see whether the other fellows get more than you do?

Mr. Fry: I have since I got here this morning.

Mr. Cowan: It will make you a little more industrious.

Mr. Fry: I am going to.

Mr. Brown: Does your company issue the regular and usual railroad forms of bills of lading and way bills?

Mr. Fry: Yes, sir.

Mr. Brown: Under your own name?

1159 Mr. Fry: Yes, sir.

Examiner Burchmore: Where is Miller Junction?

Mr. Fry: It is right here (indicating).

Examiner Burchmore: It is the junction between the line to the planing mill of the Miller Lumber Company and the line to the McDonald plant?

Mr. Fry: Yes.

Commissioner Harlan: That seems to be all. The Little Rock, Sheridan & Saline River Railway.

Mr. Booth: I represent that company.

1160 *Little Rock, Sheridan & Saline River Railway Company.*

EDWIN BOOTH was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: What is your business?

Mr. Booth: I am auditor of the Little Rock, Sheridan & Saline River Railway.

Commissioner Harlan: How long have you been connected with that company?

Mr. Booth: Since 1907.

Commissioner Harlan: Do you know all about its *his* history and its organization?

Mr. Booth: No, sir.

Commissioner Harlan: What do you know about that company, what part of its business are you familiar with?

Mr. Booth: Most of the accounting since 1907.

Commissioner Harlan: Is there any other officer of the road here?

Mr. Booth: The president is here, but he is not familiar with that part of it.

Commissioner Harlan: Do you know who built it, and those details?

1161 Mr. Booth: Yes, sir.

Commissioner Harlan: Do you know when it was organized?

Mr. Booth: February, 1892.

Commissioner Harlan: Under the laws of what state?

Mr. Booth: Arkansas.

Commissioner Harlan: When was it built?

Mr. Booth: It was started about that time.

Commissioner Harlan: By whom?

Mr. Booth: By the William Farrell Lumber Company.

Commissioner Harlan: From Farrell, Arkansas?

Mr. Booth: I don't know if it was started from there at that time or not.

Commissioner Harlan: How much of the line did the William Farrell Lumber Company build?

Mr. Booth: I don't know that.

Commissioner Harlan: Has any other officer of your road been here during this session?

Mr. Booth: No, sir.

Comm. Harlan: Do you expect any other officer here?
Mr. Booth: No, sir.
Commissioner Harlan: Do you know anything about the cost of this road?
Mr. Booth: Yes, sir.
1162 Commissioner Harlan: Its relations to the lumber company and who holds its capital and all that?
Mr. Booth: Yes, sir.
Commissioner Harlan: Where is Farrell, Arkansas?
Mr. Booth: Abut 19 miles south of Little Rock on the Iron Mountain.
Commissioner Harlan: Is it Farrell or Farrells?
Mr. Booth: Farrell.
Commissioner Harlan: What sort of a town is it?
Mr. Booth: Principally made up of saw mill people.
Commissioner Harlan: Just a saw mill town?
Mr. Booth: Yes, sir.
Commissioner Harlan: And is there more than one mill there?
Mr. Booth: Only one.
Commissioner Harlan: And that is owned by the William Farrell Lumber Company?
Mr. Booth: Yes, sir.
Commissioner Harlan: And the railroad is owned by your lumber company?
Mr. Booth: Yes, sir.
Commissioner Harlan: What is the length of it?
Mr. Booth: About 17 miles of main line.
1163 Commissioner Harlan: Does the railroad company own its own right of way?
Mr. Booth: Yes, sir.
Commissioner Harlan: And its equipment?
Mr. Booth: Yes, sir.
Commissioner Harlan: What equipment has it?
Mr. Booth: Three locomotives and 36 cars.
Commissioner Harlan: Has it a station at Farrell?
Mr. Booth: The lumber company office.
Commissioner Harlan: In the office of the lumber company?
Mr. Booth: Yes.
Commissioner Harlan: Is that also the general office of the railroad company?
Mr. Booth: Yes,
Commissioner Harlan: Does it own its equipment?
Mr. Booth: Yes.
Commissioner Harlan: Is the track ballasted?
Mr. Booth: Some parts of it.
Commissioner Harlan: What sort of rail have they?
Mr. Booth: 35 pound.
Commissioner Harlan: Who is the president of the railroad company?
1164 Mr. Booth: Mr. S. H. Fullerton, of St. Louis.
Commissioner Harlan: Was not Mr. Fullerton here the other day?

Mr. Booth: Yes, sir.
Commissioner Harlan: Is he here now?
Mr. Booth: Yes, sir.
Commissioner Harlan: Mr. Fullerton, you know about the organization of the road, and all its details?
Mr. Fullerton: I do not, your Honor.
Commissioner Harlan: When did you become associated with it?
Mr. Fullerton: Four or five years ago, but I never had any—they made me president of the lumber company and railroad company, but I never took any active part in the management of the business.
Commissioner Harlan: Neither of the railroad company nor the lumber company?
Mr. Fullerton: Neither one or the other. It was organized by the Farrell Lumber Company and they are still running it, and operating it.
Commissioner Harlan: Are there any communities or villages on the line of this railway?
1165 Mr. Booth: Yes, sir; there are some villages out there.
Commissioner Harlan: Will you give me the names?
Mr. Booth: There is Ico.
Commissioner Harlan: What is the population?
Mr. Booth: Mostly farm houses. There is a post office there.
Commissioner Harlan: What other business?
Mr. Booth: And a town called Tightwad, about six miles from Farrell.
Commissioner Harlan: Is that a post office?
Mr. Booth: No.
Commissioner Harlan: I suppose there are no divisions at Tightwad?
(No response.)
Commissioner Harlan: What other points?
Mr. Booth: Craigs Mill.
Commissioner Harlan: What is that, a lumber point?
Mr. Booth: That is the terminus of the road, and also a post office?
Commissioner Harlan: That is the terminus of your road?
Mr. Booth: Yes, sir.
Commissioner Harlan: What is the population of that town?
1166 Mr. Booth: I could not say.
Commissioner Harlan: Is it sort of a lumbering town?
Mr. Booth: No, it is principally farmers; it is about three miles from Boxeye.
Commissioner Harlan: It is the point where the Farrell Lumber Company has its mill?
Mr. Booth: It is where it has most of its logging operations.
Commissioner Harlan: The mill is up near Farrell?
Mr. Booth: Yes.
Commissioner Harlan: I started to ask you who were the officers of the company. You stated Mr. Farrell. Who are the others?

Mr. Booth: R. A. Farrell, treasurer, and William E. Farrell, vice-president.

Commissioner Harlan: Are they also officers of the Farrell Lumber Company?

Mr. Booth: Mr. Fullerton and Mr. R. A. Farrell are.

Commissioner Harlan: Do they get salaries as officers of the railroad company?

Mr. Booth: No.

Commissioner Harlan: Does anyone get a salary as an
1167 officer of the railroad company?

Mr. Booth: No.

Commissioner Harlan: Do you get a salary as officer of the railroad company?

Mr. Booth: No.

Commissioner Harlan: There are no salary items, then, except for the employees that run the locomotives and your train crews?

Mr. Booth: A general office clerk.

Commissioner Harlan: And your track men?

Mr. Booth: Yes.

Commissioner Harlan: They are all paid by the railroad company?

Mr. Booth: Yes, sir.

Commissioner Harlan: Do they do any work for the lumber company?

Mr. Booth: No, sir.

Commissioner Harlan: Any of them?

Mr. Booth: No.

Commissioner Harlan: Out at the mill point, which is the terminus of your line, Craigs Mill, I believe you called it, there are some logging roads, are there not?

1168 Mr. Booth: Do you mean spurs?

Commissioner Harlan: Yes.

Mr. Booth: Yes, sir.

Commissioner Harlan: Are they owned by the railroad company?

Mr. Booth: No, by the lumber company.

Commissioner Harlan: By whom are they operated?

Mr. Booth: The lumber company.

Commissioner Harlan. With what equipment?

Mr. Booth: The leased equipment.

Commissioner Harlan: They lease it from whom?

Mr. Booth: The Little Rock, Sheridan & Saline River Railway.

Commissioner Harlan: When you stated your equipment a little while ago, did you give us the number of cars that you retained possession of and operate?

Mr. Booth: Yes, sir.

Commissioner Harlan: In addition to those, you own the cars that the lumber company is using on the logging road?

Mr. Booth: We both use them.

Commissioner Harlan: Do you run your locomotives on the logging road?

1169 Mr. Booth: No.

Commissioner Harlan: What do they pay you for those cars?

Mr. Booth: They do not pay us anything for those cars.

Commissioner Harlan: Do they pay you for anything else?

Mr. Booth: The locomotives.

Commissioner Harlan: They use your locomotives?

Mr. Booth: Yes, sir.

Commissioner Harlan: What do they pay for that?

Mr. Booth: $20 a day.

Commissioner Harlan: What locomotives are there?

Mr. Booth: What type, do you mean?

Commissioner Harlan: Yes.

Mr. Booth: I think there are two class B and one class C, two 30 tons and one 35 tons.

Commissioner Harlan: Do your employees unload the logs at the pond, the railroad employees?

Mr. Booth: They do not have to, but sometimes they help.

Commissioner Harlan: Ordinarily do they do it?

Mr. Booth: Yes, sir.

Commissioner Harlan: Do they do it alone?

Mr. Booth: No, the lumber employees do——

Commissioner Harlan: But ordinarily they do participate
1170 in the unloading?

Mr. Booth: Yes, sir.

Commissioner Harlan. Do they do any loading at the junction with the logging road?

Mr. Booth: No.

Commissioner Harlan: Do they go out on the logging roads?

Mr. Booth: Yes, sir.

Commissioner Harlan: And help to do some loading there?

Mr. Booth: No.

Commissioner Harlan: Ordinarily who pulls the train in from the logging roads to your line?

Mr. Booth: The lumber company.

Commissioner Harlan: What forest has the Farrell Lumber Company out at the end of your line, or around it?

Mr. Booth: I cannot say; it is right around the end of the line, but we have 54,000 acres altogether.

Commissioner Harlan. Do you receive from the logging line any logs belonging to any other company than the William Farrell Lumber Company?

Mr. Booth: No.

Commissioner Harlan: Do you haul any outside traffic for anybody?

1171 Mr. Booth: Very little.

Commissioner Harlan: Are there any mills on the line?

Mr. Booth: No, sir.

Commissioner Harlan: What kind of traffic do you haul for outsiders?

Mr. Booth: Very little of any kind.

Commissioner Harlan: Any cotton or farm produce?
Mr. Booth: No.
Commissioner Harlan. Do you haul any supplies or general merchandise out on your line?
Mr. Booth: Yes, sir.
Commissioner Harlan: What is the extent of that traffic?
Mr. Booth: Oh, $150 worth of freight a month, merchandise and feed.
Commissioner Harlan: Does that come from Little Rock mostly on local billing?
Mr. Booth: We rebill it from Farrell.
Commissioner Harlan: On the local rate?
Mr. Booth: Yes, sir.
Commissioner Harlan: What is the extent of your logging traffic from the junction of the logging roads to the mill: how many cars a year?
1172 Mr. Booth: Oh, about 10,000 cars.
Commissioner Harlan. And where is your mill with relation to the Iron Mountain tracks?
Mr. Booth: The saw mill is about 200 yards.
Commissioner Harlan: And your planing mill?
Mr. Booth: It is about 100 feet.
Commissioner Harlan: Is there a spur track of the Iron Mountain alongside the planing mill?
Mr. Booth: Yes, sir.
Commissioner Harlan: So that the dressed lumber—and that is all you ship, is it not?
Mr. Booth: No.
Commissioner Harlan: Do you ship a lot of rough lumber?
Mr. Booth: Yes, sir.
Commissioner Harlan. How much in proportion to the dressed lumber?
Mr. Booth: The greater portion is rough timbers.
Commissioner Harlan: The greater portion is timber?
Mr. Booth: Yes, sir.
Commissioner Harlan: The dressed lumber you load right onto the Iron Mountain cars on their own spur tracks?
Mr. Booth: Yes, sir.
1173 Commissioner Harlan: Or do you own the spur tracks?
Mr. Booth: I cannot say that positively, whether we own it or not.
Commissioner Harlan: Is there any milling in transit rate in effect?
Mr. Booth: Yes, sir.
Commissioner Harlan. What is the rate to St. Louis?
Mr. Booth: Eighteen cents from Farrell.
Commissioner Harlan: From Farrell?
Mr. Booth: Yes, sir.
Commissioner Harlan: Well, that is the rate on the dressed lumber or the rough lumber from the mill point?
Mr. Booth: Yes, sir.

Commissioner Harlan: Is there any milling in transit arrangement on logs?

Mr. Booth: It is purely a milling in transit arrangement with us altogether.

Commissioner Harlan: Tell us how that applies.

Mr. Booth: It is the same from our road as from the junction with the Iron Mountain.

Commissioner Harlan. So the 18 cent rate extends back to your logging operations?

1174 Mr. Booth: Yes, sir.

Commissioner Harlan: What division do you receive?

Mr. Booth: We receive four cents to territory known as Central Freight Association territory and five cents west.

Commissioner Harlan: Is that the highest allowance you get?

Mr. Booth: Yes, sir.

Commissioner Harlan: I suppose you interchange free transportation?

Mr. Booth: Yes, sir.

Commissioner Harlan: Who gets the free transportation on your road?

Mr. Booth: The treasurer and myself.

Commissioner Harlan. The treasurer and yourself?

Mr. Booth: Yes, sir.

Commissioner Harlan: Do you represent the lumber company in any way?

Mr. Booth: Yes, sir.

Commissioner Harlan: What is your relation with the lumber company?

Mr. Booth: Auditor.

Commissioner Harlan: As such, do you have to do any traveling?

1175 Mr. Booth: Yes, sir.

Commissioner Harlan: Do you participate in the selling of lumber for the lumber company?

Mr. Booth: Yes, sir; to some extent.

Commissioner Harlan. Do you go to St. Louis and Chicago?

Mr. Booth: Yes, sir; principally to St. Louis.

Commissioner Harlan: Have you passes on other roads than the Iron Mountain?

Mr. Booth: Yes, sir.

Examiner Burchmore: It is about 200 yards from the saw mill to the line of the Iron Mountain Railroad?

Mr. Booth: Yes, sir.

Examiner Burchmore: Is that a standard gauge or narrow gauge track?

Mr. Booth: To the line of the Iron Mountain?

Examiner Burchmore: Yes.

Mr. Booth: Standard gauge.

Examiner Burchmore. The main line of the Little Rock, Sheridan & Saline River is broad gauge or narrow gauge?

Mr. Booth: Narrow gauge.

Examiner Burchmore: Is there not a third rail between the saw mill and the Iron Mountain tracks?

1176 Mr. Booth: Not all the way.

Examiner Burchmore: How are the empty cars placed at the mill?

Mr. Booth: By the Iron Mountain.

Examiner Burchmore: And taken away by the Iron Mountain?

Mr. Booth: Yes, sir.

Examiner Burchmore: I am referring to the saw mill.

Mr. Booth: Yes, sir.

Examiner Burchmore: Then the Little Rock, Sheridan & Saline River Railway Company does not touch the cars containing the lumber coming out of the mills?

Mr. Booth: No.

Examiner Burchmore: They are handled by the Iron Mountain Railroad?

Mr. Booth: Yes, sir.

Examiner Burchmore: Are there any joint through rates in effect from Craigs Mill to interstate destinations?

Mr. Booth: Yes, sir.

Examiner Burchmore: With milling in transit privileges?

Mr. Booth: Yes, sir.

Examiner Burchmore: Have you any means of weighing the logs which move to your mill?

1177 Mr. Booth: No.

Examiner Burchmore: How do you ascertain what the weight of those logs is?

Mr. Booth: We have taken years of manufacturing, and find that it takes six logging cars to make one railroad car of the manufactured product, and our local tariff provides we get $4.00 a car for the logs.

Examiner Burchmore: Into the mill?

Mr. Booth: Into the mill, and an average railroad car is figured about 60,000 pounds on the material we ship, and we charge them $4.00 a car for the six log cars, which would bring about $24.00, and our division is most of it four cents and an average of 60,000 pounds would make $24.00.

Examiner Burchmore: In other words, when six cars of logs move into the saw mill, the railroad company charges the lumber company $24.00 for those six cars of logs?

Mr. Booth: Yes, sir.

Examiner Burchmore: Subsequently when one 60,000 pound car of lumber manufactured from those logs is moved out, you credit that $24.00 you have received on the in-movement against the out-movement.

Mr. Booth: Yes, sir.

1178 Examiner Burchmore: And the railroad retains it as its division?

Mr. Booth: Yes, sir.

Examiner Burchmore: But as a matter of fact, you have no

accurate knowledge of what the actual weight of those logs moving in was?

Mr. Booth: No.

Examiner Burchmore: Is there any bill of lading issued for the movement of logs into the mill?

Mr. Booth: Yes, sir.

Examiner Burchmore: Where is that bill of lading issued?

Mr. Booth: It is issued by the billing clerk at Farrell.

Examiner Burchmore: Does he issue that bill of lading before the logs leave the other end of the line?

Mr. Booth: The bill of lading comes in with them.

Examiner Burchmore: I don't just understand that. The billing clerk at Farrell makes out a bill of lading and sends it to the other end of the line to come back with the logs?

Mr. Booth: No, the man at the mill when the cars come in, keeps a memorandum of the train, and the billing clerk hunts out the way bill.

Examiner Burchmore: Then, as I understand it, the prac-
1179 tice is similar to that of another company into which we have already examined, and is this: a train load of logs from the woods comes into the mill, and the conductor or official of that train advises the billing clerk in the mill how many logs he has brought with him, and bills of lading are issued for that quantity of logs?

Mr. Booth: Yes, sir.

Examiner Burchmore: Are any way bills issued for the movement into the mill?

Mr. Booth: I could not state positively.

Examiner Burchmore: Not so far as you are advised?

Mr. Booth: No.

Examiner Burchmore: What bills of lading are issued on the movements of lumber out of the mill?

Mr. Booth: The Little Rock, Sheridan & Saline River bill them.

Examiner Burchmore: New bills of lading?

Mr. Booth: Yes, sir.

Examiner Burchmore: Independent of those previously issued on the logs.

Mr. Booth: Yes, sir.

Examiner Burchmore: Where are those bills of lading dated?

1180 Mr. Booth: At Farrell.

Examiner Burchmore: They are dated at Farrell?

Mr. Booth: And the way bills at Craigs Mill.

Examiner Burchmore: Then you issue bills of lading at Farrell and way bill it from Craigs Mill?

Mr. Booth: Yes.

Examiner Burchmore: The way bill and the bill of lading on the same shipment do not agree?

Mr. Booth: I thought you meant at the time the shipment moved. They are all way billed from Craigs Mill.

Examiner Burchmore: From Craigs Mill to St. Louis, for example, you have a through way bill?

Mr. Booth: Yes, sir.

Examiner Burchmore: And that through way bill shows the Little Rock, Sheridan & Saline River Railroad as the first participating carrier?

Mr. Booth: Yes, sir.

Examiner Burchmore: And as participating up to Farrell?

Mr. Booth: Yes, sir.

Examiner Burchmore: Does the conductor of the Little Rock, Sheridan & Saline River Railway ever receive that through way bill?

1181 Mr. Booth: No.

Examiner Burchmore: Then it is handed right over to the Iron Mountain?

Mr. Booth: Yes, sir.

Examiner Burchmore: And the Iron Mountain switches the car from the mill to its mail line?

Mr. Booth: Yes, sir.

Examiner Burchmore: And then it moves to interstate destination?

Mr. Booth: Yes, sir.

Examiner Burchmore: I understood you to state the division received was four cents to C. F. A. territory.

Mr. Booth: Yes, sir.

Examiner Burchmore: And five cents to Western territory?

Mr. Booth: Yes, sir, west of Pueblo.

Examiner Burchmore: What is it east of Pueblo?

Mr. Booth: To some points we get four cents.

Examiner Burchmore: Three cents to any points?

Mr. Booth: Oklahoma points.

Examiner Burchmore: How long have you been receiving a four and five cents division on western traffic?

Mr. Booth: I cannot say. About a year, the five cents.

1182 Examiner Burchmore: Within a year or two?

Mr. Booth: Yes, sir.

Examiner Burchmore: Previous to that the highest division you received on traffic to points west of the Mississippi River was three cents per 100 pounds, was it not?

Mr. Booth: Yes, sir.

Examiner Burchmore: What is the explanation for this increase in divisions, if you know it?

Mr. Booth: I cannot say. I found out that others were getting that much, and we solicited it.

Commissioner Harlan: You thought you ought to have it?

Mr. Booth: Yes.

Commissioner Harlan: If the others got it?

Mr. Booth: Yes, sir.

Examiner Burchmore: And the railroad officials agreed with you?

Mr. Booth: Yes, sir.

Examiner Burchmore: I understood you to say that the inbound movements of merchandise amounted to $150 a month.

Mr. Booth: About that; yes, sir.

Examiner Burchmore: For the fiscal year ending June 30, 1909, if these figures are correct, the total tonnage of this road
1183 seems to have been 41,471 tons, of which 41,361 tons all but 110 tons, was supplied by the lumber company; is that about the present proportion of the traffic?

Mr. Booth: No, I think it is heavier last year.

Examiner Burchmore: What purpose is served by the third rail that runs up a portion of the distance from your saw mill to the main line of the Iron Mountain?

Mr. Booth: For the purpose of switching the cars of coal to the coal docks.

Examiner Burchmore: Where are those coal docks located?

Mr. Booth: About 400 feet back of the saw mill, beyond the end of the standard gauge tracks, back of the saw mill.

Commissioner Harlan: What track is not standard gauge?

Examiner Burchmore: The whole railroad is narrow gauge.

Commissioner Harlan: Your whole line is narrow gauge except the spur track next the planing mill?

Mr. Booth: Next the saw mill.

Examiner Burchmore: Does this company pay any dividends?

Mr. Booth: No.

Examiner Burchmore: Has it accumulated a surplus?

Mr. Booth: We have a small surplus.

Examiner Burchmore: What amount?

1184 Mr. Booth: It is simply a cash surplus; about $10,000 at the present date.

Examiner Burchmore: $10,000 cash surplus?

Mr. Booth: Yes, sir.

Examiner Burchmore: How many years have you been accumulating that surplus?

Mr. Booth: Since 1907.

Examiner Burchmore: What was the cost of construction of the whole railroad?

Mr. Booth: About 120 some odd thousand dollars.

Examiner Burchmore: $120,000 in round figures?

Mr. Booth: Yes, sir.

Examiner Burchmore: What is the capital stock of the road?

Mr. Booth: $125,000.

Examiner Burchmore: Any bonds outstanding?

Mr. Booth: Yes, sir.

Examiner Burchmore: To what amount?

Mr. Booth: $75,000.

Examiner Burchmore: What is the rate of interest on those bonds?

Mr. Booth: Five per cent.

Examiner Burchmore: Has the interest been paid?

1185 Mr. Booth: Yes, sir.

Examiner Burchmore: Who holds those bonds?

Mr. Booth: The William Farrell Lumber Company.

Examiner Burchmore: Who holds the stock, the stockholders of the William Farrell Lumber Company?

Mr. Booth: Yes, sir, practically the same.

Examiner Burchmore: This rental of $20 a day for the use of locomotives; does that include the crew?

Mr. Booth: Yes, sir.

Examiner Burchmore: And the coal?

Mr. Booth: Yes, sir.

Commissioner Harlan: Have you any questions, Judge Cowan?

Mr. Cowan: No questions.

Mr. Jeffery: Your division at this time of five cents applies only to trans-Missouri Territory, does it not?

Mr. Booth: Well, I am not positive about all that western business. We do not ship very much stuff out there.

Mr. Jeffery: And it is four cents to Western Trunk Line territory?

Mr. Booth: Yes, sir.

Commissioner Harlan: Will you be kind enough to see whether there is any spur track agreement with this road, Mr. Jeffery, and send us a copy?

1186 Mr. Jeffery: Yes.

(At a later hour in the day Mr. Booth reappeared and stated that he desired to correct a portion of his testimony as follows:)

Commissioner Harlan: Have you any correction to make to the testimony you gave in connection with the Little Rock, Sheridan & Saline River Railway Company?

Mr. Booth: I understood one question from your attorney, if we made two bills of lading, one for the logs coming into the mill and one on the outbound manufactured lumber. I understand that I said yes. W do not make two bills of lading. We only make two way bills. I am not positive that that is correct as to the question, but I was told that after I left by some one acquainted with the fact, that we only make one bill, which is made by the lumber company for the manufactured product on shipments going to territory where there is a division received.

Commissioner Harlan: Is there any other correction you wish to make?

Mr. Booth: We do not get any division to points in Arkansas or to Eastern Trunk lines. Then the lumber company does not receive that credit back for the $24, as stated in my testimony. They

1187 receive only credit for the lumber going to points where the railroad receives divisions, and the charge of $4.00 a car still stands against the lumber company and my replies as to tonnage and revenue were based on 1910 business.

Commissioner Harlan: And you think the Examiner had in mind your report for 1909?

Mr. Booth: Yes.

Commissioner Harlan: Well, your testimony will be read with these suggestions before us.

Commissioner Harlan: We have secured another stenographer, and Mr. Burchmore will hear the east of the river cases, and the Jackson Railway at this time in the adjoining room, and all persons who are

connected with those cases will please retire with Examiner Burchmore to that room.

In connection with the testimony of this witness, Mr. Fullerton, I wish you would be good enough to enlighten the Commission as to what on our record is referred to as the Colonial System. Do you know anything about that?

Mr. Fullerton: Of railroads?

Commissioner Harlan: Yes.

1188 Mr. Fullerton: I know nothing whatever about it.

Commissioner Harlan: The Little Rock, Sheridan & Saline River is indicated as a railroad belonging to the Colonial System. Have you ever heard of that?

Mr. Fullerton: I never heard of that before and never knew that it belonged to any such system.

Commissioner Harlan: And the Mill Creek & Little River Railway & Navigation Company.

Mr. Fullerton: I never knew anything about it. It must have been several years ago.

Commissioner Harlan: You are not connected with the last named road?

Mr. Fullerton: I think that our company owns some stock in that company, but has only acquired it in the last three years, and it has not been a member of any Colonial System of railroad that I know anything of.

Commissioner Harlan: What about the Tioga & Southeastern; are you associated with that in any way?

Mr. Fullerton: Yes, sir.

Commissioner Harlan: Are you associated with any other road, the Gulf & Sabine River?

Mr. Fullerton: Yes, sir.

1189 Commissioner Harlan: But you do not recognize that as a system?

Mr. Fullerton: No, sir.

Commissioner Harlan: Are they owned about by the same people?

Mr. Fullerton: I am connected with the Warren, Johnsville & Saline River, the Gulf & Sabine and the Little Rock, Sheridan & Saline River, and the Tioga & Southeastern.

Commissioner Harlan: We may ask you later to give us some further light on that question. The next road is the Louisiana Railway.

1190 *Louisiana Railway Company.*

J. M. BERNARDIN was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: What is your business?

Mr. Berdardin: I am president of the Louisiana Railway Company, and secretary and treasurer of the Grant Timber & Manufacting Company.

Commissioner Harlan: When was the Louisiana Railway Company organized?

Mr. Bernardin: In 1900.

Commissioner Harlan: Under the laws of the State of Louisiana?

Mr. Bernardin: Yes.

Commissioner Harlan: With what capital stock?

Mr. Bernardin: $25,000.

Commissioner Harlan: Who were its officers?

Mr. Bernardin: I think the first incorporators were W. L. Whittaker. I have a copy here of the charter. I was not connected with it at the time, and I can only give you what this charter says.

Commissioner Harlan: We will not stop on it. Who are
1191 its present officers?

Mr. Bernardin: I am president, Mr. T. H. Garrett, of St. Louis, is vice-president. E. E. Fitzgerald is secretary and treasurer.

Commissioner Harlan: Are all of these officers also officers of any lumber company or interested in any way?

Mr. Bernardin: Mr. Garrett is vice-president of the Grant Timber & Manufacturing Company and Mr. Fitzgerald is general manager.

Commissioner Harlan: Are you connected with that company?

Mr. Bernardin: I am secretary and treasurer of the Grant Timber & Manufacturing Company.

Commissioner Harlan: Is there a company known as the Grant Lumber & Land Company?

Mr. Bernardin: It is in liquidation. There was at one time. It owned a mill, and this company of which I gave you the name owned the timber, and the Louisiana Railway Company owned the railroad.

Commissioner Harlan: And who owned all three?

Mr. Bernardin: The same stockholders.

Commissioner Harlan: So it is practically one investment by the same people?

1192 Mr. Bernardin: Yes, sir.

Commissioner Harlan: And as I understand it, your road is about 30 miles long?

Mr. Bernardin: No, it is about 16 miles of main line, and then we own the steel of about 13 or 14 miles more, that we lease to the mill company for spur purposes.

Commissioner Harlan: Your main line starts out at what point?

Mr. Bernardin: At Grant, on the Louisiana & Arkansas, and it crosses the Iron Mountain at Selma, Louisiana, and then it runs, or it did run, in a westerly or northwesterly direction, and I expect since you have got your map that we have moved, because I will show you——

(Witness indicates on map to the Commissioner.)

Commissioner Harlan: Grant is a point on what road?

Mr. Bernardin: The Louisiana & Arkansas Railroad.

Commissioner Harlan: And from Grant you run how many miles southwesterly to Selma?

Mr. Bernardin: It is two and one-quarter miles, I think.

Commissioner Harlan: In what direction does your track run?

Mr. Bernardin: It runs west, and then there was a line went up northwest.

1193 Commissioner Harlan: How far west?

Mr. Bernardin: Well, it went out there about eight miles, and then we stopped and we went north, say, about six miles.

Commissioner Harlan: By whom was the track from Grant to Selma built, and when?

Mr. Bernardin: It was built by the Louisiana Railway Company.

Commissioner Harlan: By the Louisiana Railway Company?

Mr. Bernardin: Yes, sir.

Commissioner Harlan: When?

Mr. Bernardin: Well, I was not connected with it until 1905, and it was built then, but I think about a year before I became connected with it.

Commissioner Harlan: Who built the track from Selma west?

Mr. Bernardin: The Louisiana Railway Company.

Commissioner Harlan: And then to the north and west?

Mr. Bernardin: Well, the Louisiana Railway Company.

Commissioner Harlan: What part of this track is ballasted track?

Mr. Bernardin: Very little.

Commissioner Harlan: What rail have you on the track?

Mr. Bernardin: 35 and 45 pound.

1194 Commissioner Harlan: What is the length of the track that you have just described from Grant to Selma, and then west and then north?

Mr. Bernardin: Two and a quarter miles, and then it is about eight miles from Selma out, and then six; that is, the 16 miles of the main line.

Commissioner Harlan: Do you also own some logging lines?

Mr. Bernardin: No, but we buy all the steel and lease it to the Grant Timber & Manufacturing Company and they use it for spurs off, getting the logs.

Commissioner Harlan: What logging lines have they in extent?

Mr. Bernardin: They used that whole 13 or 14 miles of steel in their operation.

Commissioner Harlan: Do you lay the tracks for them and move them?

Mr. Bernardin: No, we just furnish the track and splices.

Commissioner Harlan: What do they pay you?

Mr. Bernardin: $1.00 a thousand. I have here a copy of the contract which is on file, which shows how we have handled that.

Mr. McRae: Is that on file with the Commission?

1195 Mr. Bernardin: Yes, sir; that is on file with the Commission, and that——

Commissioner Harlan: That $1.00 a thousand is for the use of the steel?

Mr. Bernardin: For the use of the steel, and the Louisiana Railway Company taking the empty cars out on their spurs for them and bringing the loads back to the Louisiana Railway Company's main line, and then as the contract reads, the compensation for that

has been derived out of the division of the through rate for the haul after it reaches the main line of the Louisiana Railway Company.

Commissioner Harlan: That becomes another transaction?

Mr. Bernardin: Yes, sir.

Commissioner Harlan: So then you operate the logging roads for the lumber company; that is, with your equipment?

Mr. Bernardin: Well, practically so; yes, sir.

Commissioner Harlan: And with your crews?

Mr. Bernardin: And with our crews.

Commissioner Harlan: And do you load the logs on the cars?

Mr. Bernardin: No, we do not load the logs, they load them but we gather them up. They may have them scattered around on several little spurs after they branch off there, before we
1196 gather them on the main line, and sometimes we stop and go on a little further and get enough more to make a train.

Commissioner Harlan: But they load them on the cars?

Mr. Bernardin: Yes.

Commissioner Harlan: Your men do not help in that work?

Mr. Bernardin: No.

Commissioner Harlan: Do your men help unload at the mill?

Mr. Bernardin: No, we deliver them at the mill and they have what they call a pond crew, which unload and put them in the mill.

Commissioner Harlan: What mill have you?

Mr. Bernardin: Two at Selma.

Commissioner Harlan: What mill at Grant?

Mr. Bernardin: Nothing; just a connection with the Louisiana & Arkansas Railroad.

Commissioner Harlan: Why did you build to Grant?

Mr. Bernardin: As I told you, it was built before I went there, but they were there, I think, to get another connection and get a better car service.

Commissioner Harlan: Have you any station at Grant?

Mr. Bernardin: No.

Commissioner Harlan: Just a track connection——

1197 Mr. Bernardin: Well, there is a little shed there, to which the Louisiana & Arkansas trainmen have a key and our men have a key.

Commissioner Harlan: You do not keep any agent there?

Mr. Bernardin: No.

Commissioner Harlan: Have you a station at Selma?

Mr. Bernardin: No.

Commissioner Harlan: Have you a station anywhere along the line?

Mr. Bernardin: No.

Commissioner Harlan: Do you carry any traffic for outsiders?

Mr. Bernardin: Well, that is practically nil; what we can get.

Commissioner Harlan: What was your tonnage in lumber from the junction of the logging road to the mill at Selma last year?

Mr. Bernardin: In logs it was 260,000 some odd tons.

Commissioner Harlan: You have explained how the lumber com-

pany pays you for the service of gathering up logging cars and bringing them to your main line.

Mr. Bernardin: Yes.

Commissioner Harlan: What compensation do you receive from that point, and from whom?

1198 Mr. Bernardin: Well, we figure our compensation was from our connection. When we delivered them the product of those logs in the shape of lumber; that is, the tonnage those logs would make, we got compensation from the connecting lines.

Commissioner Harlan: Well, what is that?

Mr. Bernardin: It varies; it is from two to four cents, with possibly a few exceptions. I am not sure whether or not there were not a few points where there was five cents.

Mr. Jeffery: I do not think there is.

Mr. Bernardin: Well, rather than to be caught up on that for the record, I will say possibly there might be a few places, but in a general way, it is two cents and four cents.

Commissioner Harlan: Has it ever been higher?

Mr. Bernardin: No.

Commissioner Harlan: What allowances do you get from the Louisiana & Arkansas?

Mr. Bernardin: They are practically the same from both lines, as near as I remember.

Commissioner Harlan: Do you have any connection with the Rock Island in this immediate vicinity?

Mr. Bernardin: No, sir.

Commissioner Harlan: Did you ever get less divisions than
1199 those you have just named?

Mr. Bernardin: Not during my time, because they have never been changed except perhaps in a few cases, maybe eight or ten cases since I have been there, but they were less at some times in the history of the road.

Commissioner Harlan: Have you any trackage rights with any line?

Mr. Bernardin: We have now. The timber company owns some timber quite a ways off, and it was thought best for them to spur off from the Louisiana & Arkansas. There are, I think, two trackage contracts with the Louisiana & Arkansas; they are all on file with the Commission.

Commissioner Harlan: Just explain now to what point. Is that east from Grant or west from Grant?

Mr. Bernardin: We go west from Grant, and they spurred off first at a station above Packton, Arkansas, and after they got some timber there, I think they went still farther west.

Commissioner Harlan: What acreage is owned by the lumber company?

Mr. Bernardin: About 105,000 acres.

Commissioner Harlan: Do you give that as the ownership at this time?

1200 Mr. Bernardin: Yes.

Commissioner Harlan: Some of it has been lumbered off, I suppose?

Mr. Bernardin: Yes, sir. There are about 30,000 acres which have been denuded.

Commissioner Harlan: Are there any other interests upon your logging rails?

Mr. Bernardin: No, there is not a mill out there?

Commissioner Harlan: No stave mill?

Mr. Bernardin: Not a stave mill; no, sir.

Commissioner Harlan: No cotton or farm produce?

Mr. Bernardin: No.

Commissioner Harlan: Practically nothing but logs?

1201 Mr. Bernardin: That is all there is we have hauled out; I think we had divisions on staves and stave bolts, but it is practically nothing.

Commissioner Harlan: You do not make use of them to speak of?

Mr. Bernardin: If anybody wants them, we have several set-out tracks, and if they want to put anything there we will get a car for them and set it so they can load it.

Commissioner Harlan: What is the geographical situation at Selma? I have in mind the saw mill and planing mill and the tracks of the Iron Mountain. How far is the saw mill from the Iron Mountain tracks?

Mr. Bernardin: What we call the old mill, the mill site, comes right up to the Iron Mountain right of way. I think the loading track there just clears their right of way. On the other side of the Iron Mountain track I think that must be two or three hundred feet from the Iron Mountain right of way.

Commissioner Harlan: Are both mills in operation?

Mr. Bernardin: Yes, sir.

Commissioner: What did you call it, the old mill?

Mr. Bernardin: The old mill and new mill. We built a new mill there after the present people acquired the property.

1202 Commissioner Harlan: And the planing mill is on the right of way of the Iron Mountain?

Mr. Bernardin: Well, it is located so, of course, they can load on the loading track; that is, at the old mill. If I am not mistaken it just clears the Iron Mountain right of way; it is parallel to it. On the other side it is between two and three hundred feet.

Commissioner Harlan: The Iron Mountain has a spur track running to both mills?

Mr. Bernardin: No, sir; they only own their track up to their right of way and from there on the mill company owns the track.

Commissioner Harlan: And the mill companies built them in the beginning, or did the Iron Mountain lay them for them?

Mr. Bernardin: I cannot say as to the old one but I know when the new one was built the mill company built that themselves.

Commissioner Harlan: And owns the rail?

Mr. Bernardin: And owns the rail.

Commissioner Harlan: Where is your lumber marketed generally?

Mr. Bernardin: Oh, from Pennsylvania to Colorado and north of the Ohio River, and probably half east and west of the Mississippi River.

1203 Commissioner Harlan: Generally speaking do you get five cents on the bulk of your product?

Mr. Bernardin: No.

Commissioner Harlan: What was your highest percentage?

Mr. Bernardin: I thought there was maybe some five cents; here is a statement, your Honor, that may give you some light on the divisions. I would be glad for you to have it.

Mr. McRae: You said from two to four cents.

Mr. Bernardin: Yes, sir; from two to four cents, they vary according to the revenue the trunk lines get out of it.

(The paper so offered and identified was received in evidence and thereupon marked "Louisiana Railway, Exhibit No. 1, Witness Bernardin," received in evidence December 12, 1910, and is attached hereto.)

Commissioner Harlan: There seems to be some average figures here, 3.24; would you say that is correct?

Mr. Bernardin: Yes, sir; that is what I got it up for, to determine the average divisions we got, and that was taken from the remittances as we received them.

1204 Commissioner Harlan: Do you move out any manufactured lumber over the Louisiana and Arkansas?

Mr. Bernardin: Yes, sir; that two and one-quarter mile haul from Selma to Grant.

Commissioner Harlan: What proportion of your manufactured product goes out in that way?

Mr. Bernardin: I think that tells right there. It gives the two lines; it is about half and half I think. I saw here where—it is about half and half, it runs here.

Commissioner Harlan: Are there any understandings or agreements that produce that result?

Mr. Bernardin: Not a thing, except that you cannot play ball with one fellow part of the time and not all the time. If you do not kind of divide it up, when cars are scarce they remember you did not give them any business when they had plenty of cars and they don't wait on you.

Commissioner Harlan: And that is the reason you do divide it up?

Mr. Bernardin: Yes, sir.

Commissioner Harlan: That is a stub of the Louisiana and Arkansas?

Mr. Bernardin: No.

Commissioner Harlan: Where does it run to the east from Grant?

1205 Mr. Bernardin: It runs over to Jena.

Commissioner Harlan: What does it connect with there?

Mr. Bernardin: That is its terminus. It does not connect with any line.

Commissioner Harlan: That is the reason I called it a stub.

Mr. Bernardin: Oh, yes, sir; I see. There was a time when that was its main line over there into Hope, Arkansas, and later they built from Packton down to Alexandria.

Commissioner Harlan: Did I ask you what your capital stock is?

Mr. Bernardin: Of the railroad company?

Commissioner Harlan: Yes, sir.

Mr. Bernardin. Yes, sir, it is $25,000, but we subsequently increased it to $100,000.

Commissioner Harlan: What did it cost?

Mr. Bernardin: Well, we have about $200,000 in there now. $204,000.

Commissioner Harlan: Actual investment?

Mr. Bernardin: Yes, sir.

Commissioner Harlan: And you have $100,000 in stock and $100,000 bonds?

Mr. Bernardin: No, no bonds. The surplus or earnings
1206 which were left were put into the property.

Commissioner Harlan: Have you paid any dividends?

Mr. Bernardin: No.

Commissioner Harlan: You have put the net earnings back into the property?

Mr. Bernardin: Yes.

Commissioner Harlan: To the extent of about $100,000?

Mr. Bernardin: Yes, sir.

Commissioner Harlan: In what period of time?

Mr. Bernardin: Well, when these people bought the property the stock was $25,000 and we gave $85,000 for the railroad; in other words 340 for the stock, and with what surplus there was in then and what we have left in after, so that the surplus and capital was more than $100,000. We declared a $75,000 stock dividend.

Commissioner Harlan: I am not sure that I get the details. You say you bought the road at $25,000?

Mr. Bernardin: Well we bought it from the stockholders; I mean these present stockholders gave what was equal to $340 a share for this stock of the Louisiana Railway Company, and as I say, with the surplus that they then had and what was left in, when we equalled more than $100,000 so we could declare out
$75,000 in a stock dividend we did so, to make the capital
1207 $100,000.

Commissioner Harlan: Have you stated what the road originally cost or do you know?

Mr. Bernardin: Well, we thought it was worth $85,000 when we bought it. But I do know——

Commissioner Harlan: I do not mean what you bought it for, but what did the original builders of the road pay for it?

Mr. Bernardin: I think it cost $85,000, because so far as I know the actual money——

Mr. McRae: He was not connected with the first organization.

Commissioner Harlan: You do not know what it originally cost?

Mr. Bernardin: No, but we sort of appraised the thing when we bought it and considered it worth that much money.

Commissioner Harlan: $85,000?

Mr. Bernardin: Yes, sir. And I know that since then whatever has gone on the books has been actually spent.

Commissioner Harlan: What accumulated surplus did you find when you bought the road?

Mr. Bernardin: There was about $65,000 we thought in there at the time.

1208 Commissioner Harlan: You mean the surplus was in the form of an invested asset, it was not cash?

Mr. Bernardin: No.

Commissioner Harlan: It was simply the investment value of the road?

Mr. Bernardin: Yes.

Commissioner Harlan: That equalled $25,000 and a surplus of $60,000?

Mr. Bernardin: Yes, sir.

Commissioner Harlan: And then you put in some more capital and that brought up the capital——

Mr. Bernardin: We did not put in any more money but we left the earnings in, we did not take anything out.

Commissioner Harlan: And you finally issued $100,000 of stock?

Mr. Bernardin: $75,000 more, to make it $100,000 issue.

Commissioner Harlan: What was the mileage at that time when you bought the road?

Mr. Bernardin: I think it was about eight or nine miles; I do not recall just what it was, and they have the usual amount of stuff for spur tracks.

Commissioner Harlan: At the time you bought the road there were eight or nine miles?

Mr. Bernardin: Yes.

1209 Commissioner Harlan: And you appraised it at $85,000?

Mr. Bernardin: Yes, sir.

Commissioner Harlan: And you issued $100,000 of capital?

Mr. Bernardin: We did not do that immediately.

Commissioner Harlan: No, but after a while.

Mr. Bernardin: Yes.

Commissioner Harlan: How did you build the other eight miles, was that built with earnings?

Mr. Bernardin: As far as they would go and the balance of it the lumber company would let them use their credit; that is in this way, they would buy steel for them and charge it to them; the railroad company did not have any credit except with its stockholders, and as they were all interested one way with the other, you might say that the lumber company financed the railroad.

Commissioner Harlan: For the other eight miles?

Mr. Bernardin: Yes.

Commissioner Harlan: How did it do that?

Mr. Bernardin: In that way, that I tell you.

Commissioner Harlan: How did the railroad pay the timber company back, in service?

Mr. Bernardin: In service; yes, sir and in money.

1210 Commissioner Harlan: The other eight miles were finally built out of the earnings of the railroad company, is not that the case?

Mr. Bernardin: Yes.

Commissioner Harlan: What do you regard or understand to be the present value of this railroad? I will put that in a little different way. What do you understand to be the investment up to this time?

Mr. Bernardin: $204,485.

Commissioner Harlan: Then in effect out of surplus income you have added $100,000 to the investment?

Mr. Bernardin: Yes.

Commissioner Harlan: In what period of time did you do that?

Mr. Bernardin: In five years; but you understand they still owe about $18,000 or $20,000 that they have not paid, but of course that is spent on the property.

Commissioner Harlan: With the exception of that, say, $20,000, the railroad is paid for?

Mr. Bernardin: Yes, sir.

Commissioner Harlan: In what form is that debt represented?

Mr. Bernardin: In just an open account.

1211 Commissioner Harlan: An open account between the railroad company and the lumber company?

Mr. Bernardin: Yes.

Commissioner Harlan: That is to say the lumber company is still your creditor to the extent of $18,000 or $20,000?

Mr. Bernardin: Yes.

Commissioner Harlan: What were the net revenues for last year?

Mr. Bernardin: Do you mean the fiscal year?

Commissioner Harlan: Ending June 30, 1910.

Mr. Bernardin: About $40,000. Let me get it from the books and have it right—well it was $39,824.71, after paying the taxes.

Commissioner Harlan: And interest on this deferred payment to the lumber company?

Mr. Bernardin: They have never charged us any interest; it was just an open running account, sometimes more and sometimes less.

Commissioner Harlan: That approximates forty per cent on your original cash investment of $100,000?

Mr. Bernardin: Yes, sir; and twenty per cent on what is in there.

1212 Commissioner Harlan: It comes to this, does it not, that taking the operations of the railroad for the last year, that on June 30, 1910, you find yourselves in the position of a railroad that originally cost $110,000 cash, in one way and another, to which you had added earnings to the extent of $100,000 less $18,000 re-

maining unpaid in open account, and you cleared net last year approximately $40,000?

Mr. Bernardin: Yes, sir.

Commissioner Harlan: Have you stated what the total outbound tonnage was last year of all kinds?

Mr. Bernardin: If you mean what we delivered to the other lines, I do not believe I can give it to you—yes, I can. It was 75,848 tons of lumber. We have the lumber tonnage separated from the logs.

Commissioner Harlan: Do you remember the number of cars?

Mr. Bernardin: No, but that would be about 3,000 cars.

Commissioner Harlan: Have you any other source of revenue?

Mr. Bernardin: No, sir.

Commissioner Harlan: And the lumber company competes with other lumber companies in the general markets I presume?

Mr. Bernardin: Yes, sir.

Commissioner Harlan: Rather an active competitor, is it not?

1213

Mr. Bernardin: We do the best we can.

Commissioner Harlan: And your lumber is pine, generally?

Mr. Bernardin: All pine.

Commissioner Harlan: Have you some questions Mr. McRae?

Mr. McRae: I believe I would like to file this charter or at least call attention to it.

You have stated this railroad was incorporated before you had any connection with it?

Mr. Bernardin: Yes, sir.

Mr. McRae: From where to where? Can you state that without my finding it?

Mr. Bernardin: No, I cannot. I will have to find it in there myself. It says from a point in Concordia Parish, Louisiana, at or near Vidalia extending westward through the parishes of Concordia and Catahoula to a point on Little River at or near Simon's Ferry; thence through the Parish of Grant to the line of the St. Louis, Iron Mounain and Southern Railway, crossing the same in the northwest quarter of the northeast quarter of Section 29, Township 9, North Range 1 E., 342 feet from the point on the north line of said section, where said St. Louis, Iron Mountain and

1214

Southern enters it, the angle of crossing being such a degree, and thence in a westerly direction through the parish of Grant and Winn to a point on the Red River between Montgomery and Colfax at or near Lake Nautachas.

Commissioner Harlan: That seems to be news to you.

Mr. Bernardin: Yes, because it was all chartered and taken out before I had any connection with it.

Commissioner Harlan: You do not mean to say there is any plan before your company for carrying out this route?

Mr. Bernardin: I rather think there was because----

Commissioner Harlan: I do not mean that there was, but is there now?

Mr. Bernardin: No.

Mr. McRae: I was going to have you explain. Now, since you bought the stock on this road, which was projected into this territory, has another one of the defendant carriers built into the territory this charter sought to cover?

Mr. Bernardin: The Louisiana and Arkansas running from Grant to Jena covers a part of the territory named in the charter.

Mr. McRae: Did you understand that this was a real railroad projected at the time by the original promoters of it?

1215 Mr. Bernardin: My understanding is that at the time the charter was taken out for this road that they had no saw mill interests whatever.

Mr. McRae: Was it receiving divisions at the time you bought the stock in it?

Mr. Bernardin: It was.

Mr. McRae: The same divisions it is receiving now or substantially so?

Mr. Bernardin: Yes.

Mr. McRae: Would you have made the investment in the timber land there if you had not supposed you could continue the same divisions?

Mr. Bernardin: We would not have paid that price for it.

Mr. McRae: Is the Louisiana Railway recognized by the authorities in Louisiana as a railroad and assessed by the same Board as the defendant carriers?

Mr. Bernardin: They are.

Mr. McRae: Does it report to the Louisiana Commission in the form required of it?

Mr. Bernardin: Yes, sir.

Mr. McRae: Does it make a monthly and annual report to the Interstate Commerce Commission?

1216 Mr. Bernardin: Yes.

Mr. McRae: And complies with all regulations of that Commission?

Mr. Bernardin: Yes.

Mr. McRae: Does it keep its accounts separate?

Mr. Bernardin: Yes.

Mr. McRae: Do you pay per diem and charge demurrage?

Mr. Bernardin: We do.

Commissioner Harlan: Tell us about that. Do you charge demurrage against the lumber company?

Mr. Bernardin: Yes.

Mr. McRae: Do you publish tariffs and concur in tariffs of the other roads to which you are made a party?

Mr. Bernardin: Yes.

Mr. McRae: The company issues bills of lading?

Mr. Bernardin: Yes.

Mr. McRae: I believe you have explained the amount of holdings you have. I think his Honor asked you that.

Mr. Bernardin: Yes.

Mr. McRae: How far is the timber from the mill, have you stated that?

Mr. Bernardin: No, but it covers an area of about—it is
1217 three townships one way and about four another; it is pretty well scattered in those townships; it would be about eighteen miles by twenty-four.

Mr. McRae: What would this road be worth if it was denied the through routes and joint rates and a division thereof?

Mr. Bernardin: I do not know, but they can have my stock for half price. I don't know what it would be worth.

Mr. McRae: I believe that is all.

Commissioner Harlan: Do the state laws provide a different basis for taxing the logging roads and common carrier roads?

Mr. Bernardin: I think not. You know all roads in Louisiana have a period of about ten years, that is roads built during the period of ten years were exempt from taxes and that has expired, and I notice where our taxes have gone up.

Commissioner Harlan: It expired with your company?

Mr. Bernardin: Yes, sir. Well, it expired with all companies, and I mean those companies built during that time are now subject to taxation.

Mr. McRae: I will ask you to examine that and see if it represents correctly the position of the two railroads and your
1218 mill. (Handing paper.)

Mr. Bernardin: Yes.

(The paper so offered and identified was received in evidence and thereupon marked Louisiana Railway Exhibit No. 2, Witness Bernardin, received in evidence December 12, 1910, and is attached hereto.)

Mr. Cowan: Speaking of demurrage, do you operate under demurrage or per diem?

Mr. Bernardin: The railway company pays per diem. If the mill company keeps the cars too long they charge them demurrage

Mr. Cowan: You have ninety-six hours free time, have you not?

Mr. Bernardin: What is that?

Mr. Cowan: Don't you have ninety-six hours before you begin to pay per diem?

Mr. Bernardin: Not as I understand it. Per diem commences when you take them off the connecting line tracks, unless they have changed them recently.

Mr. Cowan: The information we have recently from the examination made by the Commission is that you have ninety-six
1219 hours.

Mr. Bernardin: Whatever it is, it is done according to the rules of the Commission.

Mr. Cowan: Then that means that you do not know how that is done?

Mr. Bernardin: No, I do not know about the details except I do know if there is any mill which keeps the car longer than they are allowed to, we charge them demurrage, and I know the connecting lines surely make us pay per diem.

Mr. Cowan: You were talking about the mill and I was talking about your railroad.

Mr. Bernardin: I was talking about both of them.

Mr. Cowan: Your railroad gets a car from its connecting line and it goes out on this track and you turn it over to the mill company. Now the settlement between your railroad company and the Iron Mountain, for example, is based on a certain number of days of free time before you pay anything, is it not?

Mr. Bernardin: I do not think there is any free time between railroads.

Mr. Jeffery: Not on per diem.

Mr. Bernardin: On per diem there is no free time between railroads.

1220 Mr. Cowan: Is there any per diem charge or demurrage charge by you against the lumber company?

Mr. Bernardin: I stated there was.

Mr. Cowan: How much free time do you give them?

Mr. Bernardin: Whatever the other lines give them; I think it is forty-eight hours.

Mr. Cowan: It it not a fact that all the saw mills operating in Louisiana that you are acquainted with operate under some sort of plan or scheme whereby they get a division of the rate on the shipment of the lumber out from the mill?

Mr. Bernardin: I think most of them do. I cannot testify certainly, but I think they do in a general way.

Mr. Cowan: You said if the allowances or whatever we may call them were cancelled that then they could have your stock??

Mr. Bernardin: Yes, sir.

Mr. Cowan: At half price I believe you said. Would it not be necessary to operate this railroad in order to operate the saw mills?

Mr. Bernardin: I do not know that it would be necessary for the railroad to operate it. It would be necessary for some one, I reckon, or else the mill would have to go out of business. They would have to get their logs in there.

1221 Mr. Cowan: A logging railroad in some form or other is necessary in the transaction of the saw mill business; they cannot carry it on without it?

Mr. Bernardin: They cannot run it without logs, that is sure, and you have to get them in some way.

Mr. Cowan: The most economical way is to get them in by rail?

Mr. Bernardin: I think it is, yes, sir.

Mr. Cowan: Do you ship lumber to Texas?

Mr. Bernardin: Yes, sir.

Mr. Cowan: You have divisions on all the roads to destinations on all different roads or parts of them?

Mr. Bernardin: Except the Santa Fe, I think.

Mr. Cowan: Do you have divisions with the Cotton Belt?

Mr. Bernardin: Yes, sir.

Mr. Cowan: And you get the same divisions to points other than the Santa Fe, no matter on what railroad the station is located to which you ship lumber?

Mr. Bernardin: You mean competitive points?

Mr. Cowan: Uniform divisions.

Mr. Bernardin: No, they are not uniform I stated they vary from two to four cents.

1222 Mr. Cowan: Suppose you ship over the Iron Mountain to a point on the Cotton Belt in Texas, say Waco, would you get the same division?

Mr. Bernardin: No, we have no joint rates with the Iron Mountain and Cotton Belt.

Mr. Cowan: That is why I was asking you. How would you reach the Cotton Belt?

Mr. Bernardin: By the Louisiana and Arkansas.

Mr. Cowan: What divisions would you get in such a case?

Mr. Bernardin: I cannot give you the details, they run from two to four cents.

Mr. Jeffery: You would get one cent in that case, would you not?

Mr. Bernardin: I do not think there is any on which we get as little as one cent.

Mr. Jeffery: In Texas business on the Iron Mountain you would.

Mr. Bernardin: I do not think we have any joint rates with the Iron Mountain to Texas points.

Mr. Cowan: Do you get any division on shipments made within the State of Arkansas?

Mr. Bernardin: No, I think not.

1223 Mr. Cowan: Why is that? It has been stated here several times.

Mr. Bernardin: I don't know myself, but I do not think we ever did have a division on business going to the State of Arkansas.

Mr. Cowan: Do you haul that lumber and logs for nothing?

Mr. Bernardin: They do not sell any up there; the mill does not sell any lumber in Arkansas, Mr. Cowan.

Mr. McRae: We manufacture more lumber in Arkansas than we can consume.

Mr. Cowan: I know that, but somebody testified they sold twenty-five per cent of their output in Arkansas.

Mr. Bernardin: Well, we do not sell.

Mr. Cowan: Do you sell any in Louisiana?

Mr. Bernardin: No, I don't think we ever made a shipment in that state.

Mr. Cowan: But if you did, do you have divisions?

Mr. Bernardin: No, I think that would be the sums of the locals.

Mr. Cowan: You said you would not have paid as much for the timber if you had not had the division of the rates?

Mr. Bernardin: No, what I want to get in is this, we would

1224 not have paid as much for that property if it had not had divisions at the time we bought it, because we bought that property subsequent to the time that the Commission had passed on this tap line division and we took it into consideration and we thought that that was a reasonably safe judgment to go on, and my opinion is we would have bought that property for considerably less if the tap line divisions were not in, because it was a consideration.

Mr. Cowan: You say "we" would have bought it. Did not "we" buy it from "we"?

Mr. Bernardin: No, we did not.

Mr. Cowan: I misunderstood you then.

Mr. Bernardin: No, we bought it from other people.

Mr. Cowan: That is the railroad.

Mr. Bernardin: I am speaking now, when I speak about buying the property, of the thing as a whole, that is the railroad, saw mill and timber land; it was all one transaction, all made, all at one time.

Mr. Cowan: Does the amount of the division of the rate enter into the price of the lumber or——

Mr. Bernardin: To whom?

Mr. Cowan: Anybody.

1225 Mr. Bernardin: I don't think so.

Mr. Cowan: Then somebody gets that division, of course, if it does not enter into the price of the lumber?

Mr. Bernardin: Yes, sir.

Mr. Cowan: Who else can get that except the parties who have the beneficial ownership in the railroad?

Mr. Bernardin: Who else could get the division? Do you mean if there was no division?

Mr. Cowan: No; where there is a division, who gets the benefit of it if it does not enter into the price of the lumber? If it enters into the price of the lumber you said that the man that buys the lumber may get the benefit of it, but if it does not, somebody gets the benefit of the four cents.

Mr. Bernardin: Well, we as stockholders of the railroad company are getting the benefit of it.

Mr. Cowan: And they are the same people who own the saw mill and own the lumber?

Mr. Bernardin: Yes, sir.

Mr. Cowan: Take some man who is operating a saw mill with a railroad to log his mill who does not get that division, he is at that much disadvantage.

1226 Mr. Bernardin: Yes, sir; he certainly is, unless he has got something in lieu of the division.

Mr. Cowan: Well, that is another question.

Mr. Bernardin: Well——

Mr. Cowan: There has been some reference to having something in lieu, and somebody getting the benefit in some other way. Do you know of any case in which any person has?

Mr. Bernardin: I cannot testify to what I have not seen, but it is pretty well known that there are other considerations besides tap line divisions that some saw mill men have received from railroad companies, and I think that one of them so testified in this room about two days ago.

Mr. Cowan: The disposition then is to find some sort of a scheme where somebody gets some benefit out of the through rate?

Mr. Bernardin: You will find that somewhere or some how they are all getting in the game and getting about the same thing;

they may not get it on tap line divisions, but some way or somehow they are pretty nearly on the same basis.

Mr. Cowan: Do you sell to Santa Fe stations, for instance, to Wichita?

1227 Mr. Bernardin: No, we have no divisions—yes, sir, into competitive points.

Mr. Cowan: You do not sell a shipment over the Santa Fe to that point?

Mr. Bernardin: No.

Mr. Cowan: Because you have no rates on the Santa Fe?

Mr. Bernardin: No.

Mr. Cowan: If you meet a man in competition at Wichita, whose mill is on the Santa Fe, and who cannot get in there on the same net rate you do and you ship in on the Rock Island and you get four cents division, are you not in a position to outbid him?

Mr. Bernardin: I presume we would, if it came around to the point, we would take it away from the railroad company and give it to the mill company; but I want to answer you in another way. I do not believe that the saw mill man that gets a division takes that into consideration when he sells his lumber, because he always tries to sell it for all he can get for it, and he naturally would take pride in selling his lumber and getting just as much for it as the man did who had no division.

Mr. Cowan: Wherever he could do that, of course, he

1228 pockets the swag.

Mr. Bernardin: Sure he does. If I get four cents and another man does not get it and does not get anything in lieu of it, I have that much advantage over him, no doubt about that.

Mr. Cowan: If these divisions were canceled would that raise the price of lumber in your opinion?

Mr. Bernardin: I think it would not. I think it would reduce it to the buyer.

Mr. Cowan: Why do you think it would reduce it?

Mr. Bernardin: Because the cost of lumber to the buyer is predicated on the cost at the mill and the freight added, and if you reduce the freight he will get it.

Mr. Cowan: I say if the divisions were canceled.

Mr. Bernardin: If the divisions were canceled?

Mr. Cowan: Yes.

Mr. Bernardin: I thought you said the rate.

Mr. Cowan: I made a slip of the tongue, then.

Mr. Bernardin: Yes.

Mr. Cowan. I mean if the divisions were canceled would that increase the price of lumber if the rates remained the same and the divisions were canceled to the tap lines?

1229 Mr. Bernardin: I do not think it would. I think the mill man through this ownership would make just that much less money.

Mr. Cowan: If the flat rate were reduced and the divisions canceled, then what would be the effect on the price of lumber?

Mr. Bernardin: It means cheaper lumber in St. Louis and Chicago, wherever those rates go.

Mr. Cowan: You seem to be a very intelligent man. Thank you for the answer.

Mr. Bernardin: Well, it is probably what you wanted.

Mr. Cowan: Just how would you figure that out? You are an experienced man in the business. Tell the Commissioner how you reckon it would tend to reduce the price of lumber if you reduced the flat rate and cancel out the divisions to tap lines.

Mr. Bernardin: I already answered that.

Mr. Cowan: You said it would do it. How would it?

Mr. Bernardin: The mill man would add just that much less freight to the price you try to get at the mill for it. For example, we will say ten dollars at the mill for the lumber. The rate
1230 to St. Louis now is eighteen cents, that is four dollars and fifty cents freight as an average. That would be fourteen dollars and fifty cents. If you would reduce that rate to fifteen cents per hundred pounds then he would only add three dollars and seventy-five cents to his ten dollars.

Commissioner Harlan: He would add nothing to his price?

Mr. Bernardin: No, he would just give it to the man in St. Louis. You will find that the lumber men have price lists figured out on rates from I think sixteen cents to forty-five cents and when they go to quote a man on lumber they first look up his rate and then refer to that price list and quote him. You can see now that there are frequently times, as when they reduced the Omaha rates, the very day in fact some man anticipated it because they could not ship it until it went into effect, but they began to sell lumber in Omaha cheaper immediately after the rate was reduced from twenty-six cents to twenty-five cents.

Commissioner Harlan: Cheaper by the difference in the rate?

Mr. Bernardin: Yes, sir.

Mr. Cowan: Now, then, the man who is not getting any tap line division and who is not getting some advantage in some other fashion necessarily is at that much disadvantage so far as the profits
1231 of his business is concerned compared to the tap line saw mill that is getting the division?

Mr. Bernardin: I have so stated.

Mr. Cowan: And that in your opinion lies in the profit of the manufacturing enterprise?

Mr. Bernardin: Yes.

Mr. Cowan: Does it not result, if the man without the tap line division and without securing some sort of beneficial arrangement otherwise cuts his lumber and sells it in competitive markets, it means he is marketing his timber cheaper than the man *has to* who gets the tap line division?

Mr. Bernardin: He can put it in his timber or lumber. In the general operations he is handicapped that much.

Mr. Cowan: How do you estimate the net cost to a lumber company of the lumber?

Mr. Bernardin: We do not estimate it. We take our books for it.

Mr. Cowan: I assume you carry your lumber at a certain estimated cost of production, the lumber you have on hand?

Mr. Bernardin: Oh, I think for purposes of taking stock every month we take ten dollars, but when we go to find out what the cost is we do not take ten dollars; we take our books for it.

1232 Mr. Cowan: Then you estimate the value of stumpage, the value of your timber in the tree?

Mr. Bernardin: Well we have an arbitrary price that we charge the saw mill for stumpage and credit it to the timber account.

Mr. Cowan: Is that affected by the fact of having your tap line divisions or by the amount of the rate?

Mr. Bernardin: It is not now, no; but it would have been affected if there had been none, because we are charging this out at a price now to work that account down. If the account had been less we could have charged less to the account.

Mr. Cowan: That is all.

Mr. Garwood: I would like to ask a question. If the Santa Fe has canceled out the through rates with its connections, tap lines and various trunk lines, and industries not situated upon the Santa Fe must ship upon the sums of the locals, does not that operate to give industries situated on the Santa Fe a monopoly of the Santa Fe local market?

Mr. Bernardin. Yes, sir.

Mr. Garwood: Are not industries not situated on the Santa Fe therefore shut out of competition with industries situated on the Santa Fe for all local markets upon the Santa Fe?

1233 Mr. Bernardin: They are.

Mr. Garwood: Does not the fact as to whether the tap line divisions are an ultimate advantage to the stock owning interests, whoever they may be, depend upon whether or not the operations of the investment in the railroad are profitable and remunerative?

Mr. Bernardin: That is such a long question I could not keep it.

(Question read.)

Mr. Bernardin: I do not understand it yet. I don't know what you are driving at.

Mr. Garwood: In other words, if the railroad that is denominated here a tap line, that is built and owned by the same stock owning interests as own an industry, if that is not a profitable investment. then there can be no ultimate advantage to its owners, can there?

Mr. Bernardin: Certainly not.

Mr. Garwood: Then that question inquired into by counsel depends wholly upon the question whether there is a profit made in that enterprise?

Mr. Bernardin: Yes, sir.

1234 Mr. Garwood: You have stated that the cancelation of the through rate by the Santa Fe operates to give industries situated upon the Santa Fe a monopoly of its local market. Does it not also follow that those local markets are in the control, at least to that extent, of the industries situated upon the Santa Fe and are not those industries therefore in position to charge the

ultimate consumer at those local markets a higher price for th lumber if they choose to do so?

Mr. Bernardin: They would probably have to, because they woul not buy lumber as cheap as the fellow who was across the countr on a line which had rates from this whole market down here.

Mr. Jeffery: When did you connect with the L. & A.?

Mr. Bernardin: As I say, it was connected there prior to 1905 when I got there.

Mr. Jeffery: So you don't know——

Mr. Bernardin: No, I think I stated it was about a year o eighteen months prior to that.

Mr. Jeffery: I notice you have a higher division to Oklahoma tha to anywhere else?

Mr. Bernardin: Yes.

1235 Mr. Jeffery: How do you account for that?

Mr. Bernardin: I don't know unless it is a short hau maybe out there and there was more to divide up on it.

Mr. Jeffery: A short haul via the L. & A.?

Mr. Bernardin: Yes.

Mr. Jeffery: As a matter of fact, don't you know that the divisio to Oklahoma was increased when you connected with the L. & A.?

Mr. Bernardin: No, as I say, they never have been changed, s far as I know, since we have been connected with them, and we wer connected with them about a year before I came here.

Commissioner Harlan: What do you understand, Mr. Jeffery?

Mr. Jeffery: I understand there was an increase. I noticed ther was a greater division to Oklahoma, which caught my eye, becaus ordinarily they are less.

Mr. Garwood: You gave some figures as to the result of your opera tion for the last fiscal year.

Mr. Bernardin: Yes, sir.

Mr. Garwood: Those figures did not include any interest on th sum total of the investment in the railroad?

Mr. Bernardin: No.

Mr. Garwood: It was a mere operating account in othe

1236 words?

Mr. Bernardin: Yes, sir.

Mr. Coleman: Is your testimony with respect to the cancelation o any lumber rates from points on other lines to be understood as you belief that the Santa Fe has canceled some rates of lumber from othe lines?

Mr. Bernardin: Do you mean recently?

Mr. Coleman: Well, you were a witness for the complainant i the Star Grain & Lumber case?

Mr. Bernardin: Yes.

Mr. Coleman: Your testimony which you gave there was wha you heard from others as to who canceled the lumber rates?

Mr. Bernardin: I expect the record can tell better than I. M recollection is that the Santa Fe and the Cotton Belt were unable t divide the rate——

Mr. Coleman: I am speaking about the cancelation now.

Mr. Bernardin: I was going to say I don't know whether Mr. Hershey canceled them or Mr. Farrell, but I do remember they were canceled out and I believe a complaint filed before the Commission. I could not say on whom the responsibility rested for the cancelation of those rates.

Mr. Coleman: You complained pretty seriously of the al-
1237 leged disability you labored under in selling lumber for the Buchanan Mills so-called.

Mr. Bernardin: Yes, sir.

Mr. Coleman: You do not know what course this cancelation took?

Mr. Bernardin: That was several years ago. I don't remember the details, only that I will say this, that the Santa Fe among lumber men had the credit for canceling out those rates. Whether they did or not I don't know.

Mr. Coleman: The record will show for itself, your Honor.

Commissioner Harlan: Yes.

Mr. Coleman: I would like to ask another question. You have been actively engaged in selling lumber for a great many years in the territory traversed by the Santa Fe rails, what is known as Trans-Missouri and Western Trunk Lines territory?

Mr. Bernardin: Yes, sir.

Mr. Coleman: Do you find any other lumber that you must compete against, except the lumber that originates at mills exclusively located on the Santa Fe rails to the Santa Fe markets?

1238 Mr. Bernardin: No, we have to compete with all this lumber produced in the Southwest.

Mr. Coleman: What is your information or experience as to the mills that are available on other lines to Santa Fe markets, mills other than Santa Fe mills? Judge Garwood's question might give the inference that the Santa Fe mills have the exclusive access to local Santa Fe points. Do you not meet the competition of other saw mills that have through rates to Santa Fe points?

Mr. Bernardin: Yes, I think the Southern Pacific Mills get on to the Santa Fe and some few Texas and Pacific mills.

Mr. Coleman: Any others?

Mr. Bernardin: Now, Mr. Coleman, after we got out of the Santa Fe's territory, at that time I just sort of dropped it, and I am not as familiar perhaps with the mills that get to local Santa Fe stations as I ought to be, or as others are, and it is only in a general way that I know now who really is on the local Santa Fe points.

Mr. Coleman: Do you know of any lines connected——

Mr. Bernardin: I do know one too; the Frisco, running across from De Quincy to Baton Rouge. They have joint rates with you because I have lately shipped some lumber from stations
1239 over there to stations on your line.

Mr. Coleman: Have you ever shipped any on the I. & G. N.?

Mr. Bernardin: No.

Mr. Coleman: Do you know whether they have joint rates?

Mr. Bernardin: No. If you say so I will take your word for it.

Mr. Coleman: Do you know whether the Texas & Pacific have?

Mr. Bernardin: I said the Texas & Pacific.

Mr. Coleman: Do you know the lines connecting at Fort Worth have through rates to Santa Fe points?

Commissioner Harlan: The tariffs will disclose that. I do not think we need go further with that.

Mr. Cowan: You spoke of getting out of Santa Fe territory.

Mr. Bernardin: What I mean is, we did not pay the attention to the customers along that line we did to other places. We could not get rates in there and could not pay attention to them if we sold them.

Mr. Cowan: So you naturally went to the best place you could get divisions, as the Santa Fe did not give divisions?

Mr. Bernardin: Yes.

1240 Mr. McRae: Do you mean that the people who were affiliated with that road in some way were able to undersell you and you had to get other markets?

Mr. Bernardin: It was that, and also because we went to other markets, we did not want to go up against the game.

Mr. McRae: Is that the contract you read between the Grant Lumber Company and the railroad company?

Mr. Bernardin: Yes, sir.

(The paper so offered and identified was received in evidence and thereupon marked Louisiana Railway Exhibit No. 3, Witness Bernardin, received in evidence December 12, 1910, and is attached thereto.)

1241 *Mill Creek and Little River Railway and Navigation Company.*

W. A. MURRAY was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: State your full name.

Mr. Murray: W. A. Murray.

Commissioner Harlan: Where do you live?

Mr. Murray: Manistee, Louisiana.

Commissioner Harlan: What is your business?

Mr. Murray: Lumber man and railroading.

Commissioner Harlan: With what railroad are you connected?

Mr. Murray: The Mill Creek and Little River Railway and Navigation Company.

Commissioner Harlan: What are the terminii of that road?

Mr. Murray: Bryants Spur on the west to right close to the Little River or at the Little River on the east.

Commissioner Harlan: With what regular line do you connect?

Mr. Murray: The Iron Mountain.

Commissioner Harlan: At Bryants Spur?

Mr. Murray: Yes, sir.

1242 Commissioner Harlan: When was the Mill Creek and Little River Railway and Navigation Company organized?

Mr. Murray: In November, 1905.
Commissioner Harlan: At what time was the railroad built?
Mr. Murray: It was started I think in August, 1905.
Commissioner Harlan: By whom?
Mr. Murray: It was started by the Little River Lumber Company; it was started before the charter was gotten out.
Commissioner Harlan: How much of a track was built during that year?
Mr. Murray: I expect about six miles was built in the first year.
Commissioner Harlan: What was the total length of the constructed track at this time?
Mr. Murray: Close to ten miles.
Commissioner Harlan: When did the railroad company acquire title to the railroad property?
Mr. Murray: Not until 1908, I think it was.
Commissioner Harlan: Was that after the entire ten miles had been built?
Mr. Murray: No, some was built since then.
1243 Commissioner Harlan: How did it acquire the title, by purchase?
Mr. Murray: Yes, sir; it acquired title by purchase and by building part of it.
Commissioner Harlan: Who furnished the capital for the construction of the railroad?
Mr. Murray: The Little River Lumber Company.
Commissioner Harlan: And what was the total cost of the railroad?
Mr. Murray: $31,935.
Commissioner Harlan: Does that include the equipment?
Mr. Murray: No.
Commissioner Harlan: Is that the cost of the total completed track at this time?
Mr. Murray: Yes, sir.
Commissioner Harlan: What did the equipment cost and what equipment have you?
Mr. Murray: We have two locomotives and twelve logging cars.
Commissioner Harlan: What did it cost?
Mr. Murray: The equipment, $8,606.66.
Commissioner Harlan: So that the total investment ap-
1244 proximates $38,000?
Mr. Murray: Yes, sir.
Commissioner Harlan: Have you any stations on that road?
Mr. Murray: Yes, sir.
Commissioner Harlan: Passenger stations?
Mr. Murray: No, sir; we carry no passengers.
Commissioner Harlan: Do you carry any mail?
Mr. Murray: No.
Commissioner Harlan: Express?
Mr. Murray: No.
Commissioner Harlan: Do you own the right of way?

Mr. Murray: Part of it runs over the land of the Little River Lumber Company.

Commissioner Harlan: How much of it?

Mr. Murray: About eight miles I think.

Commissioner Harlan: How did you get the other two miles?

Mr. Murray: We have a lead of two miles.

Commissioner Harlan: So you do not own the fee title to any of the right of way?

Mr. Murray: Not as railroad people.

Commissioner Harlan: Not as a railroad. Where is the
1245 mill of the lumber company?

Mr. Murray: At Manistee.

Commissioner Harlan: Where is Manistee with reference to Bryants Spur?

Mr. Murray: Three miles northeast.

Commissioner Harlan: Is the mill reached by the Mill Creek and Little River Railway and Navigation Company's rails?

Mr. Murray: Yes.

Commissioner Harlan: Have you a map of that road here?

Mr. Murray: No, sir; I have not.

Commissioner Harlan: I do not quite understand how it is that the mill is three miles north of Bryant's Spur. In what direction does the track run?

Mr. Murray: North and east.

Commissioner Harlan: Then the mill is how far from the Iron Mountain's rails?

Mr. Murray: About three miles.

Commissioner Harlan: How far is the planing mill from the Iron Mountain's rails?

Mr. Murray: It is a part of the saw mill and joins it.

Commissioner Harlan: Was the mill built after the rail-
1246 road or before?

Mr. Murray: Before.

Commissioner Harlan: How long before?

Mr. Murray: I don't know. We did not build the mill.

Commissioner Harlan: You did not build the mill?

Mr. Murray: No.

Commissioner Harlan: You mean the Little River Lumber Company did not build it?

1247 Mr. Murray: No, we did not build it.

Commissioner Harlan: Had it been built several years before?

Mr. Murray: Yes, sir.

Commissioner Harlan: Was there any rail connection?

Mr. Murray: No.

Commissioner Harlan: How did it get its lumber over to the Iron Mountain rails?

Mr. Murray: On a wooden tram, and they got their logs into the mill with oxen and wagons as long as they could do so profitably, and then they had to quit.

Commissioner Harlan: At that time they were lumbering rather near the mill, were they not?

Mr. Murray: Yes, sir.

Commissioner Harlan: And after that was cut out, they had to find some more economical way of getting the logs?

Mr. Murray: They had no money to go ahead, and had to quit.

Commissioner Harlan: They had to quit?

Mr. Murray: Yes, sir.

Commissioner Harlan: And then your people came along and bought the mill?

Mr. Murray: Yes, sir.

Commissioner Harlan: And the lands?

1248 Mr. Murray: Well, they didn't have much land.

Commissioner Harlan: And your people came along and bought the mill.

Mr. Murray: Yes.

Commissioner Harlan: And acquired additional lands?

Mr. Murray: Yes.

Commissioner Harlan: And constructed the road?

Mr. Murray: Yes.

Commissioner Harlan: How much of this road is logging road?

Mr. Murray: We haul logs over the road east of the mill; we are hauling logs over that part of the road between Manistee and Bryant Spur.

Commissioner Harlan: I had in mind rather the character of the road. From Bryant Spur to Manistee is it ballasted?

Mr. Murray: Yes, sir.

Commissioner Harlan: With what?

Mr. Murray: Well, with the soil which is there, which is kind of a gravelly soil, and makes a good ballast.

Commissioner Harlan: What rail have you between Bryants Spur and the mill?

Mr. Murray: 35 pound steel.

Commissioner Harlan: What is the character of the road-

1249 bed beyond the mill toward the forest?

Mr. Murray: It is about just the same; it is a very hilly country; extremely hilly.

Commissioner Harlan: Cuts and fills?

Mr. Murray: Yes, sir; a great many.

Commissioner Harlan: And the same weight of rail?

Mr. Murray: Yes, sir.

Commissioner Harlan: Then that part of the road, the ten miles, is operated by the railroad company?

Mr. Murray: Yes, sir.

Commissioner Harlan: Are there any logging roads that run into the main line?

Mr. Murray: After you get out about three miles beyond the mill there are logging spurs there.

Commissioner Harlan: Who own those spurs?

Mr. Murray: The railroad company.

Commissioner Harlan: Does it own the rails also?

Mr. Murray: Yes, sir.

Commissioner Harlan: And lays them down?
Mr. Murray: No, sir.
Commissioner Harlan: Who does the moving of those roads?
Mr. Murray: The lumber company.
1250 Commissioner Harlan: But you supply the material?
Mr. Murray: We supply the rails only.
Commissioner Harlan: They supply the right of way and the sleepers.
Mr. Murray: And the ties and construction.
Commissioner Harlan: And the construction?
Mr. Murray: Yes, sir.
Commissioner Harlan: And you operate them for the lumber company?
Mr. Murray: Yes, sir.
Commissioner Harlan: I observe this railroad is also called a navigation company.
Mr. Murray: Yes, sir.
Commissioner Harlan: What is the meaning of that?
Mr. Murray: We figured at one time that we might operate floating property in connection with it.
Commissioner Harlan: Up what river?
Mr. Murray: The Little River.
Commissioner Harlan: How far is that from the eastern terminus of your road?
Mr. Murray: It is right at it.
Comimssioner Harlan: Your road runs right to the river bank?
1251 Mr. Murray: Yes.
Commissioner Harlan: Is there a landing there?
Mr. Murray: Not now there is not, because we never have carried out our original intention up to date.
Commissioner Harlan: You have not any boats on the river now?
Mr. Murray: No.
Commissioner Harlan: Do not receive any traffic that way?
Mr. Murray: No, we have no connection now.
Commissioner Harlan: Are there any communities on your line?
Mr. Murray: There are several settlers.
Commissioner Harlan: Is Bryants Spur a town or just a railroad connection?
Mr. Murray: No, sir, just a railroad connection.
Commissioner Harlan: What about Manistee?
Mr. Murray: Manistee is a town of about two or three hundred people, I guess.
Commissioner Harlan: A company town?
Mr. Murray: That is all.
Commissioner Harlan: Is there any other community on your line?
Mr. Murray: You mean town?
1252 Commissioner Harlan: Towns?
Mr. Murray: No.
Commissioner Harlan: No post offices?
Mr. Murray: Manistee is a post office.

Commissioner Harlan: But I mean east of Manistee.
Mr. Murray: No.
Commissioner Harlan: Just a few farmers?
Mr. Murray: Yes, sir.
Commissioner Harlan: Do you move any hay or produce for the farmers in or out?
Mr. Murray: No, sir.
Commissioner Harlan: Do you get any lumber from the tram lines except the lumber belonging to the Little River Lumber Company?
Mr. Murray: No.
Commissioner Harlan: You have not any other outside traffic?
Mr. Murray: Not much; not to speak of, I don't think any.
Commissioner Harlan: Who are the officers of the railroad company?
Mr. Murray: John Pennington is president; M. L. Fleishel, is vice-president, H. R. Swartz is secretary, and I am treasurer
1253 and auditor.
Commissioner Harlan: Are those men also officers of the lumber company or stockholders?
Mr. Murray: Yes, sir.
Commissioner Harlan: And the railroad is owned by the lumber company or its stockholders?
Mr. Murray: Owned by its stockholders, the same stockholders.
Commissioner Harlan: It is the same investment?
Mr. Murray: Practically.
Commissioner Harlan: Do the officers of the railroad company receive salaries from the railroad company?
Mr. Murray: Yes, sir; some of them.
Commissioner Harlan: What is the aggregate salary list; what does it amount to per year?
Mr. Murray: A little over $2,000.
Commissioner Harlan: And they also receive salaries from the lumber company?
Mr. Murray: Yes, sir.
Commissioner Harlan: Where is the office of the railroad company?
Mr. Murray: Manistee.
1254 Commissioner Harlan: In the office of the lumber company?
Mr. Murray: Yes.
Commissioner Harlan: Have you train crews and track employees?
Mr. Murray: Yes, sir.
Commissioner Harlan: Do they load and unload the cars and participate in the loading and unloading?
Mr. Murray: In the unloading. The train crew unloads the cars.
Commissioner Harlan: But they do not load them?
Mr. Murray: They do not load them.
Commissioner Harlan: I would like to know in detail about that.

You take a train load of cars and distribute them on the logging roads, do you not?

Mr. Murray: Yes, sir.

Commissioner Harlan: Do those railroad employees simply stay there idle until the other lumber employees load the cars?

Mr. Murray: No.

Commissioner Harlan: Or do they participate in it?

Mr. Murray: No, they bring the empty cars back and set them in on one spur, and they come up on another spur and get the
1255 loads that have been loaded while they have been making the trip.

Commissioner Harlan: So they do not spend any time at that point?

Mr. Murray: No.

Commissioner Harlan: Except in making up the train?

Mr. Murray: They simply spot the cars and go and back up to other cars and go on.

Commissioner Harlan: But at the mill point they do the unloading into the pond?

Mr. Murray: They dump the logs off the cars.

Commissioner Harlan: What divisions do you have under through rates on manufactured lumber?

Mr. Murray: Two cents per 100 pounds both east and west of the river.

Commissioner Harlan: What service do you perform for that compensation?

Mr. Murray: We haul the empty Iron Mountain cars from our connection at Bryants Spur to Manistee and spot them at the mill of the lumber company for loading, and then switch them out to our connection at Bryants Spur with the Iron Mountain, three miles; three miles empty and three miles loaded.

1256 Commissioner Harlan: Do you know what allowance or division the mill had from the Iron Mountain before you bought it out?

Mr. Murray: They had none.

Commissioner Harlan: You know that to be the fact?

Mr. Murray: I do not know that to be the fact; but I should not suppose they had, because they had no railroad.

Commissioner Harlan: Well, they had a wooden rail?

Mr. Murray: Yes, sir.

Commissioner Harlan: What was the power?

Mr. Murray: Four mules.

Commissioner Harlan: Do you get any compensation for the hauling of logs into the mill?

Mr. Murray: Yes.

Commissioner Harlan: What compensation do you get?

Mr. Murray: Four dollars per car.

Commissioner Harlan: You take the empty cars out and distribute them on the spurs and you provide the motive power and haul the loaded cars back to the mill and unload them?

Mr. Murray: Yes, sir.

Commissioner Harlan: What was your total tonnage during the last fiscal year?

1257 Mr. Cowan: State it separately as to lumber and logs.

Mr. Murray: 52,622 tons.

Commissioner Harlan: That was all tonnage belonging to the Little River Lumber Company?

Mr. Murray: Not all logs or lumber; there was 197 tons of miscellaneous freight.

Commissioner Harlan: How much was miscellaneous?

Mr. Murray: 197 tons.

Commissioner Harlan: But it belonged to the lumber company, most of it?

Mr. Murray: Most of it; yes, sir.

Commissioner Harlan: Does the company have a company store?

Mr. Murray: It has a store in which not all the lumber company stockholders are interested; it has an interest.

Commissioner Harlan: Now, what was your total revenue last year, and how much was on lumber, and how much on other traffic?

Mr. Murray: $18,379.23.

Commissioner Harlan: And what was the operating expense?

Mr. Murray: Total, $17,129.91.

Commissioner Harlan: You had net revenue about $1,000; is that it?

1258 Mr. Murray: Yes, sir.

Commissioner Harlan: You show transportation expenses of $6,000 and maintenance of way $5,600, maintenance of equipment $2,800, general expenses $2,200. Do you know about what your net operating expenses of the year before were?

Mr. Murray: I think they were some less, because there were two months of the fiscal year ending June 30, 1909 in which the road did not operate.

Commissioner Harlan: Have you ever declared any dividend?

Mr. Murray: No.

Commissioner Harlan: Have you stated what capital stock was outstanding?

Mr. Murray: $25,000.

Commissioner Harlan: In bonds?

Mr. Murray: No, sir.

Commissioner Harlan: The total cost of the road was about $40,000, you said?

Mr. Murray: How much?

Commissioner Harlan: $40,000, you said, for road and equipment.

Mr. Murray: Pretty close to that; yes, sir.

Commissioner Harlan: Judge Cowan, have you any ques-

1259 tions to ask?

Mr. Cowan: Just one or two questions. You haul the car out from the Iron Mountain without expense to it for loading, and deliver it back without expense to the Iron Mountain?

Mr. Murray: I do not catch the question.

Mr. Cowan: You perform the service for receiving the car, taking

it to the mill and delivering it back to the Iron Mountain without any expense to the Iron Mountain?

Mr. Murray: Except our two cents per 100 pounds.

Mr. Cowan: I understand, but there is no expense for the service?

Mr. Murray: Yes, sir.

Mr. Cowan: And they give you two cents per 100 pounds?

Mr. Murray: Yes.

Mr. Cowan: You sell your lumber, of course, in competition with some of these gentlemen who have been on the stand here, where the Iron Mountain goes into the siding by the planing mill and sets the car there and comes in and gets it and takes it out, and where they pay four cents division in such cases.

Mr. Murray: I don't understand——

Commissioner Harlan: This is the point. Judge Cowan says that you go and take an empty car of the Iron Mountain and
1260 set it at the mill where it is loaded and take it out again and get two cents. Now, he directs your attention to other cases testified to here by witnesses where the Iron Mountain does that same thing and pays somebody four cents.

Mr. Murray: Yes, sir.

Mr. Cowan: Now, I will lay that as a predicate to ask the question. If you do not operate your business at a disadvantage compared to the man who gets the four cents, when it comes to selling in the end.

Mr. Murray: Not from selling our lumber, but from operating a railroad, we do.

Mr. Cowan: But when you come to sell lumber, you are at that much disadvantage.

Mr. Murray: Not as a lumber company we are not.

Mr. Cowan: Well, it is all one investment you have said.

Mr. Murray: Well?

Mr. Cowan: And so it was in the other cases testified about.

Commissioner Harlan: As the representative of this investment, would you object to that or not?

Mr. Murray: To the question?

Commissioner Harlan: No, not to the question, but to the
1261 practice.

Mr. Murray: Of the other people getting this four cents?

Commissioner Harlan: Yes.

Mr. Murray: I think they get a pretty good plum.

Commissioner Harlan: Well, doesn't it put you, as the representative of this investment, at a disadvantage, compared to the other investments?

Mr. Murray: Yes, he gets more out of his investment than we do, of course.

Commissioner Harlan: He also gets more out of the Iron Mountain than you do?

Mr. Murray: Yes, sir. That part of it is wrong.

Mr. Garwood: May I ask a question? Mr. Murray, a short line that connects with two or three or four trunk lines has a strategic

position which naturally enables it to get better divisions than a short line that is tied onto one trunk line, does it not?

Mr. Murray: I never enjoyed that distinction.

Mr. Garwood: Well, that is a fact, is it not?

Mr. Murray: I am only speaking from experience.

Mr. Garwood: Well, that is the natural result, is it not?

Mr. Murray: Maybe you know.

1262 Mr. Garwood: Is not that what short lines are built for, to connect main trunk lines, to play one against the other and get the best trade they can out of the connecting trunk lines?

Mr. Murray: If there were two or three more adjacent to our mill, I would certainly connect up with them.

Mr. Cowan: I had one other question I wanted to follow up with. Now, you have had your attention directed to the fact of the man getting four cents, whereas you get two cents. Now, let us take a case, and I will assume there are such cases, where a man who is situated somewhat as you are, and gets a car from the railroad and takes it out to his mill, performing the same sort of service you do, loads it and takes it back to the trunk line and gets no division for performing the same service. That puts you in a position compared to him of having two cents the best of it, as an investment proposition, does it not?

Mr. Murray: There might be other matters——

Mr. Cowan: Assuming there are not.

Mr. Murray: Assuming that there are not?

Mr. Cowan: Yes.

Mr. Murray: I assume he could not do it very long.

1263 Mr. Cowan: Why?

Mr. Murray: Because he would go out of business.

Mr. Cowan: Is competition in the sale of lumber such that it would put him out of business by the tap line saw mills having that advantage in the market?

Mr. Murray: Well, he might have some exceptionally good timber, or something like that, that might enable him to go on——

Mr. Cowan: But the tendency would be to hurt his business?

Mr. Murray: Yes.

Mr. Cowan: Now, you do know of manufacturers of lumber who do not get any divisions at all, do you not?

Mr. Murray: I am not very well acquainted with only a few of the lumber interests about.

Mr. Cowan: Well, do you know of any which do not get divisions?

Mr. Murray: Yes, I expect I do, who have not any railroads, though.

Mr. Cowan: What is that?

Mr. Murray: They have no railroads.

Mr. Cowan: Well, they may be situated about like you are in that particular.

1264 Commissioner Harlan: Mr. Jeffery, have you any questions?

Mr. Jeffery: No.

Commissioner Harlan: Is that all, Judge Cowan?

Mr. Cowan: That is all.

Commissioner Harlan: Mr. Murray, I have marked opposite the name of your road the phrase "Colonial System." Do you know anything about that?

Mr. Murray: No, sir, I do not know anything about that.

Commissioner Harlan: You are not connected with any other railroad of this kind.

Mr. Murray: No.

Commissioner Harlan: Or any other lumber company than the Little River Lumber Company?

Mr. Murray: No.

(Witness excused.)

Commissioner Harlan: Is the Mississippi, Arkansas & Western before the Commission?

(No response.)

Commissioner Harlan: The Mississippi Valley Railroad.

Mr. Ziebold: My client was here a number of days and he said it was urgent for him to be home, and he left Saturday and said he would be back tomorrow on the eleven o'clock train.

1265 Commissioner Harlan: We will endeavor to call that case tomorrow; I am not certain that we can arrange it. The Monroe & Southwestern Railway.

Mr. Mason: I am here for that company.

Mr. R. G. Pleasant: The Attorney General of the State has requested me to file an intervention in these proceedings in the name of the Railroad Commission of the State of Louisiana.

Commissioner Harlan: Have you prepared the petition?

Mr. Pleasant: Yes, sir; the petition is prepared.

Commissioner Harlan: Very well, it may be received. I assume that the petition presents no new issue requiring answer by any of the defendants.

Mr. Pleasant: I think not.

Commissioner Harlan: It will be received with that understanding.

Paper marked Filed, December 12, 1910, and is attached hereto.

1266 *Monroe & Southwestern Railway Company.*

J. E. MASON was called as a witness and having been duly sworn, testified as follows:

Commissioner Harlan: Where do you reside?

Mr. Mason: Monroe, Louisiana.

Commissioner Harlan: What is your business?

Mr. Mason: Auditor of the Monroe & Southwestern Railway.

Commissioner Harlan: Will you tell me where Monroe is with respect to Alexandria?

Mr. Mason: Just north.

Commissioner Harlan: On the line of what railroad?

Mr. Mason: The Vicksburg, Shreveport & Pacific and the Iron Mountain, at the intersection.

Commissioner Harlan: Is Monroe the junction point with the Iron Mountain?

Mr. Mason: Yes, sir.

Commissioner Harlan: How long is your railroad?

Mr. Mason: The main line is 10⅜ miles, and the side track and spurs 6¾ miles.

Commissioner Harlan: When was your company organized?

Mr. Mason: I think it was in April, 1904.

1267 Commissioner Harlan: And what capital stock is authorized?

Mr. Mason: $1,000,000.

Commissioner Harlan: And what issued?

Mr. Mason: $172,000.

Commissioner Harlan: Have you any bond issue?

Mr. Mason: No bonds. There was an issue authorized, but it was never issued.

Commissioner Harlan: Who are the officers of this company?

Mr. Mason: R. Henderson, president; A. E. Nicholson, vice-president; Nelson Sharpe, secretary; P. S. McLurg, treasurer; J. C. Pierce attorney, and myself, auditor. P. S. McLurg, general manager, and C. C. Goodlett, superintendent.

Commissioner Harlan: Are those gentlemen also officers of the Grayling Lumber Company?

Mr. Mason: About two-thirds of them.

Commissioner Harlan: Are the stockholders of the railroad substantially the stockholders of that lumber company?

Mr. Mason: Practically.

Commissioner Harlan: It is practically one and the same investment, by the same people?

Mr Mason: Yes, sir.

Commissioner Harlan: Do the officers of the railroad com-

1268 pany receive salaries?

Mr. Mason: Well, the general officers do not. I receive a salary, and one clerk and the superintendent.

Commissioner Harlan: Where are you offices?

Mr. Mason: At Monroe.

Commissioner Harlan: In the office of the lumber company?

Mr. Mason: In the same office.

Commissioner Harlan: How many locomotives have you?

Mr. Mason: We have four locomotives.

Commissioner Harlan: How many cars?

Mr. Mason: I think 91.

Commissioner Harlan: By whom was the road built?

Mr. Mason: It was built originally by the Monroe Lumber Company.

Commissioner Harlan: Was that the predecessor of the Grayling Lumber Company?

Mr. Mason: Yes, sir.

Commissioner Harlan: The entire road was built by that com
pany, including the spur tracks?
Mr. Mason: Yes, sir.
Commissioner Harlan: Did that company purchase and own th
equipment?
1269 Mr. Mason: It owned the whole thing.
Commissioner Harlan: When did the Grayling Lumb
Company succeed that lumber company as the owner of the railroad
Mr. Mason: That was three years ago last January, 1906, I think
Commissioner Harlan: Did you catch my question. Did th
Grayling Lumber Company succeed the other lumber company
the owner of the railroad?
Mr. Mason: Yes, sir; they did.
Commissioner Harlan: When did the railroad company itse
acquire title to the railroad?
Mr. Mason: By purchase from the Monroe Lumber Compan
in 1904, when it was chartered.
Commissioner Harlan: Then the railroad company owned th
railroad before the Grayling Lumber Company acquired the oth
property of the original lumber company?
Mr. Mason: Yes, sir.
Commissioner Harlan: What lumber lands has the Grayling Lum
ber Company?
Mr. Mason: You mean their timber rights or what does it own
Commissioner Harlan: What does it own in fee and wh
1270 timber rights?
Mr. Mason: I cannot say exactly; somewhere about 40,00
acres in fee, I think; I am not sure.
Commissioner Harlan: And how many acres in timber right
about?
Mr. Mason: Probably 5,000.
Commissioner Harlan: Does the railroad own its right of way?
Mr. Mason: Yes, sir.
Commissioner Harlan: And owns all of its rails?
Mr. Mason: Yes, sir.
Commissioner Harlan: Do you know what it originally cost?
Mr. Mason: No, I do not.
Commissioner Harlan: Has it any station at Monroe?
Mr. Mason: Yes, sir.
Commissioner Harlan: A joint station with any other company
Mr. Mason: No, a station of its own.
Commissioner Harlan: What kind of station has it?
Mr. Mason: A small building; one room with the place par
tioned out for the station agent.
Commissioner Harlan: Does it receive less than carlo
1271 freight?
Mr. Mason: Yes, sir.
Commissioner Harlan: Has it any other station on its line?
Mr. Mason: Only at Chatham, we have a man looking after o
interests there.
Commissioner Harlan: How far is that from Monroe?

Mr. Mason: Ten miles.
Commissioner Harlan: That is the other terminus?
Mr. Mason: Practically, yes, sir.
Commissioner Harlan: Do you receive less than carload freight at that point?
Mr. Mason: Yes, sir.
Commissioner Harlan: Do you carry mail?
Mr. Mason: No.
Commissioner Harlan: Passengers?
Mr. Mason: Yes, sir.
Commissioner Harlan: Do you charge fare for passengers?
Mr. Mason: Yes, sir.
Commissioner Harlan: Sell tickets?
Mr. Mason: Yes, sir.
Commissioner Harlan: Run regular passenger trains?
Mr. Mason: Run regular passenger trains.
1272 Commissioner Harlan: How many?
Mr. Mason: Two a day each way.
Commissioner Harlan: Do you carry any express matter?
Mr. Mason: No.
Commissioner Harlan: Who are these passengers?
Mr. Mason: Anyone who wants to travel; country people, employees, it makes no difference.
Commissioner Harlan: Very largely employees of the lumber company and their families?
Mr. Mason: Not necessarily; there are a good many settlers out in the country who come to Monroe that way.
Commissioner Harlan: Is Monroe quite a town?
Mr. Mason: About 16,000.
Commissioner Harlan: Any industries besides your mill?
Mr. Mason: Yes, sir; there are other industries there.
Commissioner Harlan: Other mills?
Mr. Mason: We have one located on our road outside of the Grayling Lumber Company.
Commissioner Harlan: Where is that?
Mr. Mason: About half a mile from West Monroe.
Commissioner Harlan: To whom does that belong?
Mr. Mason: To the Riverside Lumber Company.
1273 Commissioner Harlan: Is the Grayling Lumber Company interested in that lumber company?
Mr. Mason: No.
Commissioner Harlan: Are its stockholders interested?
Mr. Mason: No.
Commissioner Harlan: Is it wholly independent?
Mr. Mason: It is wholly independent.
Commissioner Harlan: It uses your rails for what?
Mr. Mason: To get its product on to the market; that is the only outlet for it.
Commissioner Harlan: You mean its manufactured lumber?
Mr. Mason: Its manufactured lumber; yes, sir.
Commissioner Harlan: Do you haul any logs to that mill?

Mr. Mason: We have not so far.

Commissioner Harlan: How does it get its logs?

Mr. Mason: By the river.

Commissioner Harlan: What river is that?

Mr. Mason: The Ouachita River.

Commissioner Harlan: How much of a haul do you have on its manufactured lumber to the Iron Mountain?

Mr. Mason: We deliver to the Vicksburg, Shreveport & Pacific.

1274 Commissioner Harlan: How much of a haul do you have?

Mr. Mason: About a mile.

Commissioner Harlan: Over your own rails?

Mr. Mason: Yes.

Commissioner Harlan: Your own right of way?

Mr. Mason: Our own right of way.

Commissioner Harlan: What allowance do you get on that lumber?

Mr. Mason: $5.00 a car switching charge.

Commissioner Harlan: That is a switching charge?

Mr. Mason: Yes, sir.

Commissioner Harlan: That is absorbed by the Vicksburg, Shreveport & Pacific?

Mr. Mason: No, that is our charge according to the tariff under authority from the Commission.

Commissioner Harlan: Who pays it?

Mr. Mason: The Riverside Lumber Company.

Commissioner Harlan: That is in addition to the rate?

Mr. Mason: That is in addition to the rate?

Commissioner Harlan: That does not come out of the rate charged to the Riverside Lumber Company on the through movement?

1275 Mr. Mason: We do not bill out anything; they bill it themselves from West Monroe.

Commissioner Harlan: They pay you the $5.00 switching charge?

Mr. Mason: Yes, sir.

Commissioner Harlan: Do you know whether the Vicksburg, Shreveport & Pacific returns that or absorbs that in any way?

Mr. Mason: No, I have no information.

Commissioner Harlan: You have no information as to that?

Mr. Mason: No.

Commissioner Harlan: To come back to your own lumber, or the lumber of the Grayling Lumber Company, how do the logs of that company reach your line?

Mr. Mason: By rail over the Monroe & Southwestern Road.

Commissioner Harlan: That is your line. How are they brought to your line?

Mr. Mason: They are loaded on cars, and the cars are bunched by locomotives, and then the regular train draws them to the mill.

Commissioner Harlan: The point is this, are there logging roads connected with your line that your company does not own?

Mr. Mason: No.

1276 Commissioner Harlan: There are no logging roads?

Mr. Mason: No.

Commissioner Harlan: You have not any spur tracks out into the woods?

Mr. Mason: Yes, sir; we have spur tracks out into the woods, but these are handled by the Monroe Lumber Company, outside of the railroad company.

Commissioner Harlan: That is the point I was trying to get at.

Mr. Mason: They are moved from time to time without any cost to the railroad company, to assist the logging operations.

Commissioner Harlan: You spoke of the Monroe Lumber Company. You mean the Grayling Lumber Company?

Mr. Mason: I should say the Grayling Lumber Company.

Commissioner Harlan: That company owns some spur tracks?

Mr. Mason: It does not own the steel. The railroad furnishes the steel.

Commissioner Harlan: Your company furnishes the steel?

Mr. Mason: Yes, sir.

Commissioner Harlan: And the lumber company lays the track?

Mr. Mason: Lays the steel.

1277 Commissioner Harlan: And moves the track whenever necessary?

Mr. Mason: And moves the track whenever necessary.

Commissioner Harlan: It does that all at its own expense?

Mr. Mason: Yes, sir.

Commissioner Harlan: Has the lumber company any locomotives?

Mr. Mason: No. We lend the lumber company a locomotive for that purpose.

Commissioner Harlan: So your locomotive goes out there and gets these logs on the logging cars and assembles them into a train and draws them onto your main line?

Mr. Mason: Exactly.

Commissioner Harlan: What charge do you make to the lumber company up to the junction point with your line?

Mr. Mason: One and one-half cents a hundred.

Commissioner Harlan: That is 100 feet log measure?

Mr. Mason: 100 pounds.

Commissioner Harlan: 100 pounds?

Mr. Mason: One and one-half cents per 100 pounds.

Commissioner Harlan: And the service performed is simply to bring the log cars to your own rails?

Mr. Mason: Yes, sir.

1278 Commissioner Harlan: Then over your own rails up to the mill what do you charge?

Mr. Mason: One and one-half cents.

Commissioner Harlan: Another cent and a half?

Mr Mason: No, that is the same one and one-half cents; that is from where the logs are assembled in carloads.

Commissioner Harlan: Then you haul the logs from the forest to the mill for one and one-half cents?

Mr. Mason: Yes, that is it.

Commissioner Harlan: Do you haul the logs of any other lumber company over your rails?

Mr. Mason: No.

Commissioner Harlan: Do you haul any other merchandise over your rails?

Mr. Mason: Yes, sir; we haul ties, staves and stave bolts.

Commissioner Harlan: Where do those things come from?

Mr. Mason: From out of the woods that the people cut.

Commissioner Harlan: Are they the woods of the Grayling Lumber Company?

Mr. Mason: Some of them are.

Commissioner Harlan: Most of them?

Mr. Mason: Yes.

1279 Commissioner Harlan: And the staves?

Mr. Mason: Most of them are made by outside parties.

Commissioner Harlan: From what forest?

Mr. Mason: From forests adjacent to the railroad.

Commissioner Harlan: Are they Grayling Lumber Company's forests?

Mr. Mason: Some of them are from the Grayling forests.

Commissioner Harlan. Most of them?

Mr. Mason: I could not say, I am sure.

Commissioner Harlan: Is that a large movement?

Mr. Mason: Not very large.

Commissioner Harlan: How many cars?

Mr. Mason: Probably two or three cars a month.

Commissioner Harlan: And of ties, how many?

Mr. Mason: Of ties it will average about the same.

Commissioner Harlan: What charge do you make on the ties?

Mr. Mason: According to the regular tariff; I don't know what it is without referring to it.

Commissioner Harlan: It is the same rate which is in effect from Monroe, is it not?

Mr. Mason: I do not understand the question.

Commissioner Harlan: Is it a joint through rate or a

1280 local rate?

Mr. Mason: Local rate on our line.

Commissioner Harlan: You haul them up to Monroe?

Mr. Mason: Yes, sir.

Commissioner Harlan: And make a local charge?

Mr. Mason: Yes, sir.

Commissioner Harlan: You don't know what that is?

Mr. Mason: Not without referring to the tariff.

Commissioner Harlan: Do you move these staves in the same way on a local rate?

Mr. Mason. Yes, sir.

Commissioner Harlan: Aside from that small movement, you have no traffic except the traffic of the lumber company which owns the railway?

Mr. Mason: And such traffic as we will get from people out in the country hauling in their produce, and such things as that.

Commissioner Harlan: How much does that amount to?

Mr. Mason: It will amount to not more than five per cent.

Commissioner Harlan: Is that all carload?

Mr. Mason: No.

Commissioner Harlan: You have less than carload freight?

1281 Mr. Mason: We have less than carload freight; yes, sir.

Commissioner Harlan: Where is that delivered?

Mr. Mason: To Strozier, at Chatham.

Commissioner Harlan: You have a station there for less than carload freight?

Mr. Mason: We have no stations, but have people meet the trains to receive it.

Commissioner Harlan: All that traffic amounts to about five per cent of the total?

Mr. Mason: Yes, sir.

Commissioner Harlan: That includes the inbound traffic, too?

Mr. Mason: Yes, sir.

Commissioner Harlan. The general merchandise?

Mr. Mason: The general merchandise.

Commissioner Harlan: 95 per cent is the traffic of the lumber company?

Mr. Mason: Of the lumber company, I should judge it would be that.

Commissioner Harlan: Do the railroad employees load these cars out in the forest?

Mr. Mason: No, the lumber company's employees.

1282 Commissioner Harlan: Do you unload them at the mill?

Mr. Mason: The lumber company unloads them.

Commissioner Harlan: The railroad company employees do not participate in that at all?

Mr. Mason: No.

Commissioner Harlan: How far is your planing mill from the tracks of the regular line?

Mr. Mason: You mean the Monroe & Southwestern Railroad line?

Commissioner Harlan: No, the Iron Mountain.

Mr. Mason: The Iron Mountain railroad tracks, the spur runs up to the planing mill.

Commissioner Harlan: That spur belongs to the Iron Mountain?

Mr. Mason: The steel does. We furnish the ties.

Commissioner Harlan: Do you have a contract with them for a spur track?

Mr. Mason: I don't know; I think there is a contract of some sort, but I am not positive.

Commissioner Harlan: Mr. Jeffery, will you furnish that contract also?

Mr. Jeffery: What is the name of that lumber company?

1283 Commissioner Harlan: The Grayling Lumber Company, of Monroe. Does the Iron Mountain ever put any cars on that spur track that you do not use?

Mr. Mason: I do not think they do.

Commissioner Harlan: The lumber is loaded right out of the planing mill onto the Iron Mountain cars, or such cars as they send there?

Mr. Mason: Yes, sir.

Commissioner Harlan: And the Iron Mountain carries them to their own main line?

Mr. Mason: Yes, sir.

Commissioner Harlan: Your railroad does not move that lumber at all?

Mr. Mason: Not after it is loaded in the cars.

Commissioner Harlan: Does it set the empty cars there?

Mr. Mason: No.

Commissioner Harlan: Is most of your lumber dressed lumber?

Mr. Mason: Yes, sir.

Commissioner Harlan: You ship out very little of the rough lumber?

Mr. Mason: Very little.

1284 Commissioner Harlan: What compensation does your railroad company get from the Iron Mountain on the outbound lumber?

Mr. Mason: Four cents.

Commissioner Harlan: Now, as I understand it, you have not done any service at all in connection with the outbound shipments, and yet you get four cents per 100 pounds. Just why do you get that?

Mr. Mason: We get it for developing that country; developing that business.

Commissioner Harlan: For developing the traffic?

Mr. Mason: Yes, certainly.

Commissioner Harlan: Is that the basis of the payment that is made to you?

Mr. Mason: I could not say. I have not seen the paper myself.

Commissioner Harlan: No; I mean is it your understanding that you get four cents per 100 pounds on this outbound lumber as an inducement or to aid you in developing this traffic?

Mr. Mason: That is my understanding.

Commissioner Harlan: Not because you do any transportation service?

1285 Mr. Mason: No.

Commissioner Harlan: Is the four cents a fixed allowance on all outbound shipments?

Mr. Mason: No, we only get three cents on some. It just depends. On some we do not get any.

Commissioner Harlan: On what traffic do you get nothing?

Mr. Mason: On the local points in Arkansas and Louisiana.

Commisisoner Harlan. What do you get to Oklahoma?

Mr Mason: Four cents; that is, providing the junction point is not Little Rock.

Commissioner Harlan: What do you get to Little Rock?

Mr. Mason: Nothing.

Commissioner Harlan: You get nothing to Little Rock?

Mr. Mason: We get nothing to Little Rock.

Commissioner Harlan: Suppose you move out rough lumber, do you get anything to Little Rock then?

Mr. Mason: No, nothing to Little Rock.

Commissioner Harlan: What was your total tonnage last year?

Mr. Mason: 99,338 tons.

Commissioner Harlan: And your total revenue, and your net revenue also.

1286 Mr. Mason: Total revenue $41,864.11, and net revenue with taxes deducted was $9,321.58.

Commissioner Harlan: And your company does not pay any dividends, does it?

Mr. Mason: No.

Commissioner Harlan: And you have no bond issue?

Mr. Mason: No bond issue.

Commissioner Harlan: No interest to pay?

Mr. Mason: No, sir.

Commissioner Harlan: Have you an accumulated surplus?

Mr. Mason: Yes, sir; $23,988.50.

Commissioner Harlan: That is not cash, of course?

Mr. Mason: No.

Commissioner Harlan: It is money you put back from earnings into the property?

Mr. Mason: Yes, sir; that would be reduced if that four cents was taken off; it would be a losing proposition then.

Commissioner Harlan: In other words, your net earnings are helping you to build up a railroad there; is not that it?

Mr. Mason: Yes, sir.

Commissioner Harlan: That is the way it is being used?

Mr. Mason: That is the way practically it is used.

1287 Commissioner Harlan: Do you file your reports with the Interstate Commerce Commission?

Mr. Mason: Yes.

Commissioner Harlan: You filed your annual report for 1909 and in that you say that you moved during that year some 16,000 tons of lumber. What did you move in 1910 of lumber?

Mr. Mason: 16,635 tons.

Commissioner Harlan: Now, as a matter of fact, did you move any lumber in either year?

Mr. Mason: Well, that was a question that I have been trying to find out; whether it was correct or not to put it in. I tried to find out from the young man who was here asking questions today, when he came around getting data from us, I think it was last Spring, and he could not give me an answer on that. I brought up that very point with him as to whether that should be included in that tonnage or not.

Commissioner Harlan: Well, I suppose what you mean to say is that he did not give you an answer.

Mr. Mason: He did not give me an answer.

Commissioner Harlan: Well, that is a little different from "could not give it."

Mr. Mason: Well, that is what I mean.

1288 Commissioner Harlan: He declined to answer the question?

Mr. Mason: Yes. I wanted that information.

Commissioner Harlan: Where is the mill of your company with reference to the river?

Mr. Mason: Alongside the river, on the river banks.

Commissioner Harlan: On which side of the river?

Mr. Mason: On the east side.

Commissioner Harlan: And where is your rail terminus?

Mr. Mason: On the west side.

Commissioner Harlan: How does the lumber get across the river?

Mr. Mason: By cable transfer.

Commissioner Harlan: I mean how do the logs get across the river?

Mr. Mason: By cable transfer.

Commissioner Harlan: So that as a rail proposition, you do not get a chance to handle lumber at all?

Mr. Mason: Only from that Riverside mill; that is the lumber proper. The logs are way billed as in transit, for manufacture in transit.

Commissioner Harlan: Your rails do not cross the river?

Mr. Mason: No.

1289 Commissioner Harlan: And your mill is across the river?

Mr. Mason: Yes, sir.

Commissioner Harlan: And you have a sort of pipe line in between?

Mr. Mason: Well, it is a transfer, just like the T. & P. has a transfer across this river, only a little different style; that is all.

Commissioner Harlan: Have you any questions, Judge Cowan?

Mr. Cowan: In case of the local movement to points in Louisiana and Arkansas, where you do not get a division of the rates with the Iron Mountain, what does your railroad company charge the lumber company for moving that sort of traffic?

Mr. Mason: It does not charge anything, only what it gets out of the logs, for hauling the logs to be manufactured.

Mr. Cowan: One and one-half cents per 100 pounds?

Mr. Mason: One and a half cents per 100 pounds.

Mr. Cowan: Does that one and one-half cents enter into your receipts for hauling logs that go out in lumber to interstate points, where you get a division on the lumber, or do you refund that?

Mr. Mason: Do we refund that?

1290 Mr. Cowan: Yes.

Mr. Mason: No, we do not.

Mr. Cowan: Do you refund any part of it under any circumstances, of the one and a half cents?

Mr. Mason: No, I cannot say that we do. We sell very little locally.

Mr. Cowan: What sort of lumber do you manufacture; pine?
Mr. Mason: Pine lumber.
Mr. Cowan: Now, this man who has a saw mill situated on your line, other than your own, he pays $5.00 a car?
Mr. Mason: Yes.
Mr. Cowan: And then he pays the rate from Monroe to wherever it goes?
Mr. Mason: Yes.
Mr. Cowan: And you do not know of that being refunded?
Mr. Mason: No, I do not.
Mr. Cowan: Have you heard anything about it?
Mr. Mason: What is that?
Mr. Cowan: Have you any understanding about it?
Mr. Mason: No.
Mr. Cowan: If it is not refunded, he would be to the disadvantage of paying $5.00 more per car and doing without his
1291 division, compared with the Grayling Lumber Company?
Mr. Mason: I didn't exactly hear that.
(Question read.)
Mr. Mason: I do not see that he gets any division out of it.
Mr. Cowan: What is that?
Mr. Mason: I cannot see where that other lumber company would get any division.
Mr. Cowan: That is what I was saying.
Mr. Mason: Yes, he would really pay $5.00 a car, besides the regular freight rates.
Mr. Cowan: The Grayling Lumber Company, or rather, the beneficial owners of the property, save that $5.00 a car, and get an allowance of four cents per 100 pounds in marketing their lumber?
Mr. Mason: How is that?
(Question read.)
Commissioner Harlan: Judge Cowan, there is a different railroad, and I have not put to this witness any questions as to his allowances from the Vicksburg, Shreveport & Pacific. What do you get from them?
Mr. Mason: We do not get anything from them, conse-
1292 quently we do not ship by the Vicksburg, Shreveport & Pacific.
Commissioner Harlan: The Vicksburg, Shreveport and Pacific is on the other side of the river?
Mr. Mason: Yes.
Commissioner Harlan: And that switch movement is west of the river for this other mill over the Vicksburg, Shreveport & Pacific, and the Grayling Lumber Company sends its logs across by wire, across the river, and they do not ship by the Vicksburg, Shreveport & Pacific, and do not get any allowances by that road.
Mr. Cowan: I understand that now. That just makes the case that much worse, from my viewpoint. Take a car of lumber from the Grayling Lumber Company to St. Louis, over the Iron Mountain; they have not paid the $5.00 switching charge per car, and the stockholders of that Grayling Lumber Company have received

back through the railroad which they own a division of four cents per 100 pounds on that car of lumber when it is delivered in St. Louis.

Mr. Mason: The railroad company receives the four cents, yes, but the lumber company pays the cost of transportation of those logs across the river; they pay for that.

Mr. Cowan: The other man ships a carload of lumber to
1293 be sold in competition with this, and he has paid $5.00 a car, and there is no division allowed on it. Now, is there not a preference by virtue of that transaction of——

Mr. Mason: I cannot see why it would be, because he has not to put his lumber across the river, and we have to put the logs across the river.

Commissioner Harlan: But does it not work out this way, that he gets his lumber across the river and pays for it and you get it across the river and you are paid for it?

Mr. Mason: I don't catch that exactly.

Commissioner Harlan: Well, he puts his lumber across the river, and he pays the cost of doing it.

Mr. Mason: No, he does not have to put his lumber across the river at all. It is already on the west side of the river, and he pays us the switching charge from his mill, that our railroad company handles, to West Monroe.

Commissioner Harlan: Well, put it in another way; his rate to St. Louis is the same as your rate to St. Louis?

Mr. Mason: Yes.

Commissioner Harlan: And he pays the full rate?

Mr. Mason: Yes.

Commissioner Harlan: And you get something allowed
1294 out the rate?

Mr. Mason: No, we don't get anything.

Commissioner Harlan: Well, your railroad company does.

Mr. Mason: No, sir.

Commissioner Harlan: You get a division of four cents per 100 pounds.

Mr. Mason: Not from his lumber.

Commissioner Harlan: No, not from his lumber, but from your own.

Mr. Mason: From our own, yes, sir, but not from his lumber.

Commissioner Harlan: He pays $5.00 and the full rate, and you pay——

Mr. Mason: He pays us for the service we render him.

Commissioner Harlan: Yes, he pays you the switching charge of $5.00 and then he pays the full rate.

Mr. Mason: Just the same as if we have any stuff coming in over the Vicksburg, Shreveport & Pacific to our mill, we have to pay the Iron Mountain a switching charge of $5.00, or if it is anything to be manufactured and reconsigned, we get it for $3.00.

Commissioner Harlan: Now you have not told us of any——

1295 Mr. Mason: And then if we have to ship anything, if the lumber company ships anything via the Vicksburg, Shreveport & Pacific, we have to pay the Iron Mountain two cents per 100 pounds to get it switched to the Vicksburg, Shreveport & Pacific tracks.

Commissioner Harlan: Just to get your idea, you think that he is in no worse position than you are under existing conditions?

Mr. Mason: Shipping by the same railroad, he is in better shape.

Commissioner Harlan: Well, shipping by one railroad, and you shipping by another, do you get into St. Louis on a substantial equality; is that your view?

Mr. Mason: Exactly, with the exception that he pays our railroad company $5.00 extra switching charges, whereas the lumber company has to foot the bill of getting the logs across the river.

Mr. Cowan: Where do you bill the lumber from that you ship on the main line?

Mr. Mason: Chatham.

Mr. Cowan: The bill shows from Chatham?

Mr. Mason: Yes, sir.

1296 Mr. Cowan: That is down on your line on the other side of the river from the saw mill?

Mr. Mason: Yes, sir.

Mr. Cowan: Why do you bill it from down there?

Mr. Mason: It is way billed to Monroe to be worked in transit; the logs are, and then we rebill it from the same point as lumber. That was *out* instructions from the railroad company when that road was chartered.

Mr. Cowan: Where is the lumber billed from that goes out from the other mill that you do the switching on?

Mr. Mason: From the Vicksburg, Shreveport & Pacific station as West Monroe.

Mr. Jeffery: What kind of a mill have you got there, a hard wood or yellow pine mill?

Mr. Mason: Yellow pine.

Mr. Jeffery: Are all the mills there yellow pine?

Mr. Mason: No, the Riverside Company's mill is a hard wood mill, but they do saw pine as well as hard wood, mixed.

(Witness excused.)

1297 *North Louisiana and Gulf Railroad.*

JAMES L. DORMON was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: Where do you live?

Mr. Dormon: At present I am living in Bienville Parish, where we are installing a salt works.

Commissioner Harlan: What company are you connected with?

Mr. Dormon: I am president of the Central Salt and Mineral Company.

Commissioner Harlan: Is your works or present place of business near the tracks of the North Louisiana & Gulf?

Mr. Dormon: It is.

Commissioner Harlan: How near?

Mr. Dormon: They have a temporary spur to our plant now and have surveyed for a permanent line to their main line between three and four miles away, so I am informed by their civil engineer a few days ago.

Commissioner Harlan: How long is that temporary spur?

Mr. Dormon: Well, it would be hard to say because there are so many spurs there. I suppose two or three miles long.

Commissioner Harlan: It was put in especially for your
1298 plant?

Mr. Dormon: I don't think it was put in entirely for my plant, but largely, because there is more track there than I think they would have any use for without our plant; but understand, I don't know exactly what holdings they have around there in the way of timber holdings, so I could not say whether that would serve some more of their timber holdings, but I rather think not.

Commissioner Harlan: You are using that spur at present?

Mr. Dormon: Yes.

Commissioner Harlan: You are shipping?

Mr. Dormon: Yes, sir; we are shipping in; our plant is not entirely completed yet, but we are shipping in machinery.

Commissioner Harlan: At the completion of your plant you expect to be an outbound shipper?

Mr. Dormon: Yes.

Commissioner Harlan: To what territory?

Mr. Dormon: Arkansas, Louisiana, Alabama, Mississippi principally, and of those four probably more inside the State of Louisiana than outside.

Commissioner Harlan: Will you be a carload shipper?

Mr. Dormon: Exclusively.

1299 Commissioner Harlan: What tonnage do you expect to ship out?

Mr. Dormon: We are installing our salt plant there for the capacity of three to four cars a day to begin with. In addition to that we shall also develop our crushed rock business.

Commissioner Harlan: Is that a by-product of your salt operations?

Mr. Dormon: No. The property is all on the same tract of land in a sense, but the operation of one has nothing to do with the other.

Commissioner Harlan: Do you mine salt there?

Mr. Dormon: Not at present. The first plant we are putting up is to take the brine from a deep well which we have dug, and evaporate it with steam.

Commissioner Harlan: Then you are to have a different mill for the rock?

Mr. Dormon: Yes, sir.

Commissioner Harlan: What will you do with your rock?

Mr. Dormon: The hard rock we will sell for concrete and road making and such things as that.

Commissioner Harlan: What tonnage are you anticipat-
1300 ing of that character?

Mr. Dormon: I will give an instance which will illustrate it. I know four weeks ago there was a contractor who almost begged me to make a contract to supply him with about three hundred carloads of crushed rock, and we were not quite ready and I had to refuse to make the contract, because we could not say we could do it right then.

Commissioner Harlan: Do you want to be understood as being engaged in two different manufacturing enterprises, one manufacturing of salt and the other of crushed rock?

Mr. Dormon: They are different, but they are related. It is all the same. Our company is the Central Salt and Mineral Company. It was organized to manufacture salt or other minerals or natural rock or lime or any of those things.

Commissioner Harlan: What have you to say as to your interest in this general question?

Mr. Dormon: Our interest in this question of the survival of these short railroads is almost acute, because we are making quite an investment there in the plant. I was over east in October and bought a six hundred horse power boiler plant and we have already ordered eight or ten carloads of lumber and have invested
1301 quite an amount there for labor and if these short railroads get put out of business and leave us without transportation we would be in very bad position and liable to lose our investment.

Commissioner Harlan: Have you understood from any source that there is any danger of the destruction of this railroad investment by any order of the Commission in this proceeding?

Mr. Dormon: No, sir; I have not, but——

Commissioner Harlan: Your interest as a shipper is only in the rates you have to pay?

Mr. Dormon: In getting the service and the rate.

Commissioner Harlan: Getting the service and the rate.

Mr. Dormon: Yes.

Commissioner Harlan: Good service and rates.

Mr. Dormon: Good service and reasonable rates.

Commissioner Harlan: And if your rates are not disturbed your interest is not acute?

Mr. Dormon: If we get good service and reasonable rates we are perfectly satisfied. If we can get that. The reason I made that remark in the form I did is that there is some newspaper talk I noticed some little article a long while back when this subject first came up, whoever wrote the paper spoke as if it might be a
1302 very serious thing, and might put a good many of the short roads out of business, and I had that in mind in framing the answer as I did just now. I could not say whether it would or would not, I am not a lumber man or a railroad man and do not know anything about that kind of business.

Commissioner Harlan: Is there any other statement you wish to make?

Mr. Dormon: Well, I might state this, that the North Louisiana

& Gulf Railroad nor the Huie-Hodge Lumber Company, neither one has any interest whatever in my company, and none of our stockholders hold any interest in those companies.

Commissioner Harlan: I assumed that was so or else you would have so stated in the beginning.

Mr. Dormon: Yes, that is correct. I might add that I am now negotiating quite a large contract with a gentleman here for Swift & Company for a large order *on* this soft rock which we also have a deposit of there, to use for agricultural purposes, to be pulverized and spread upon the soil. That would be quite a large order itself. We will undoubtedly handle quite a large tonnage out of that.

Mr. Hodge: You have been over the line and from your
1303 observation of our equipment and road do you think we are in a position to handle your outbound tonnage or not?

Mr. Dormon: I am perfectly satisfied of it, from the fact you have already handled some inbound shipment carloads and less than carload shipments satisfactorily.

Commissioner Harlan: As a merchant and shipper at this point, you will not be disturbed, as I understand it, if your rates are not affected and your service is not affected?

Mr. Dormon: No, sir; if we can get a fair rate and good service, of course that will be perfectly *satisfieid*. That is all we ask for and all we have any right to ask for.

Commissioner Harlan: I so understand it.

Mr. Dormon: Certainly.

Commissioner Harlan: Is that all you care to speak of?

Mr. Dormon: Yes.

(Whereupon, at 6:10 o'clock p. m., an adjournment was taken to Tuesday, December 13, 1910 at 9:30 o'clock a. m.)

1304 NEW ORLEANS, LA., *December* 13, 1910.

Met pursuant to adjournment at 9:30 A. M.

Present: Parties as before.

Commissioner Harlan: In calling over the Iron Mountain cases we passed the Enterprise Railway, the Griffen, Magnolia & Western, the Lester & Ouachita Valley Railroad, composing what is commonly spoken of as the Southern Pine system.

Mr. Gaughan: The Lester & Ouachita Valley Railroad has not entered any appearance and will not appear.

Mr. Brown: That road is not a part of the Southern Pine System.

Commissioner Harlan: Do you represent the Enterprise Railway?

Mr. Brown: Yes, sir.

Commissioner Harlan: And those others, if you will call all the witnesses who expect to be sworn in any of those cases——

Mr. Brown: Mr. Pierce, the General Auditor, represents all of those roads. I may say with reference to the Natchez, Ball & Shreveport, the report is not in the room. It is on the express wagon. Mr. Pierce may be able to satisfy your Honor as
1305 to all the facts without the detailed statement, which is not in the room at this time.

Enterprise Railroad Company; Griffen, Magnolia & Western Railway Company; Saline Bayou Railway Company; Natchez, Ball & Shreveport Railroad Company (Southern Pine System).

F. R. PIERCE, was called as a witness and having been duly sworn, testified as follows:

Commissioner Harlan: Where do you live?

Mr. Pierce: St. Louis.

Commissioner Harlan: What is your position?

Mr. Pierce: I am the Auditor of the roads composing the Southern Pine System.

Commissioner Harlan: What roads are in that System?

Mr. Pierce: The Griffen, Magnolia & Western, the Enterprise Railroad; the Saline Bayou Railroad, and the Natchez, Ball & Shreveport.

Mr. Pierce: There is one other line in the system, the
1306 owners of which have not authorized me to make any presentation here for their account, the Lester and Ouachita Valley.

Commissioner Harlan: You are not able then to give us the facts about that road?

Mr. Pierce: I am not.

Commissioner Harlan: We will start with the Enterprise Railway. What is your relation to that road?

Mr. Pierce: I am the Auditor.

Commissioner Harlan: That is a Louisiana corporation?

Mr. Pierce: That is a Louisiana corporation.

Commissioner Harlan: The Griffen, Magnolia & Western Railway is an Arkansas corporation?

Mr. Pierce: Yes, sir. The Saline Bayou road is an Arkansas corporation, and the Natchez, Ball & Shreveport is a Louisiana corporation.

Commissioner Harlan: When was the Enterprise Railroad incorporated?

Mr. Pierce: 1903.

Commissioner Harlan: What is its authorized capital?

Mr. Pierce: $30,000.

Commissioner Harlan: What capital has been issued?
1307 Mr. Pierce: $20,500, is my recollection.

Commissioner Harlan: Has it any issue of bonds?

Mr. Pierce: It has not.

Commissioner Harlan: Just state the names of the officers of that road?

Mr. Pierce: The president is J. A. Bentley; the treasurer is Paul Lisso; the auditor is F. R. Pierce; assistant auditor is H. H. Furby. I do not now recall the other officers. There have been some recent changes.

Commissioner Harlan: Well, are they also officers of the Enterprise Lumber Company?

Mr. Pierce: Mr. Bentley is the president of the Enterprise Lumber Company. The other officers I do not know that they have any official connection with the Enterprise Lumber Company.

Commissioner Harlan: Who owns the Enterprise Railway?

Mr. Pierce: The Enterprise Railroad Company is owned by its own stockholders, but the controlling interest in the road is owned by the stockholders who own the Enterprise Lumber Company.

Commissioner Harlan: How much is the ownership in the railway by stockholders in the lumber company.

1308 Mr. Pierce: It is practically entire.

Commissioner Harlan: Where is the mill of the Enterprise Lumber Company?

Mr. Pierce: The Enterprise Lumber Company owns a mill located at Alexandria, Louisiana.

Commissioner Harlan: And is that one of the terminii of the Enterprise Railroad?

Mr. Pierce: It is a terminus in this sense, that the Enterprise Railroad Company has a trackage right over the Iron Mountain road from Simms to Alexandria and it reaches Alexandria over the rails of the Iron Mountain road.

Commissioner Harlan: Where is Simms with relation to Alexandria?

Mr. Pierce: Twelve miles north.

Commissioner Harlan: Then the lumber company's mill is at Simms, on the Iron Mountain?

Mr. Pierce: No, sir.

Commissioner Harlan: Where is the mill?

Mr. Pierce: At Alexandria.

Commissioner Harlan: Well, running east from Simms on the Iron Mountain is the track of the Enterprise Railroad Com-

1309 pany.

Mr. Pierce: Yes, sir.

Commissioner Harlan: And it is some eighteen miles long?

Mr. Pierce: I believe the mileage is less than that; I think it is twelve miles of main line.

Commissioner Harlan: Standard gauge?

Mr. Pierce: Standard gauge, 52 and 60 pound rail.

Commissioner Harlan: How is it ballasted?

Mr. Pierce: It is a dirt road.

Commissioner Harlan: What equipment has the railroad company?

Mr. Pierce: It has a caboose, standard flat cars, locomotives of the ordinary type.

Commissioner Harlan: We have here seventy-one cars and three locomotives. Is that about right?

Mr. Pierce: I think that is absolutely correct; four locomotives, however, is my recollection.

Commissioner Harlan: That is owned by the railroad company?

Mr. Pierce: That is owned by the railroad company.

Commissioner Harlan: Does the railroad company own its right of way?

Mr. Pierce: It does.

1310 Commissioner Harlan: Tell us when that railroad was built.

Mr. Pierce: The road was built in 1903.

Commissioner Harlan: By the railroad company?

Mr. Pierce: It was inaugurated by the lumber company, but the railroad company was formed immediately after and as soon as its charter came out it took over the property.

Commissioner Harlan: Had the property been constructed at that time?

Mr. Pierce: Only initiated.

Commissioner Harlan: Did it acquire the right of way over lands of the Enterprise Lumber Company and from the lumber company?

Mr. Pierce: It did partially and partially over the land of citizens.

Commissioner Harlan: What logging roads connect with the Enterprise Railway?

Mr. Pierce: There are no logging roads connecting with the Enterprise Railroad. The Enterprise Railroad Company builds spurs into the timber in that territory belonging to the Enterprise Railroad Company and handles their timber for them from the woods to the main line.

Commissioner Harlan: Do they supply all the materials

1311 and do the labor at the expense of the railroad company?

Mr. Pierce: They supply all the materials and do the labor for a compensation.

Commissioner Harlan: What is that compensation?

Mr. Pierce: I don't know.

Commissioner Harlan: Is that compensation received in the way of a rate for the hauling of the logs or is it a special compensation for the service?

Mr. Pierce: It is a special compensation based on the per thousand feet of logs basis.

Commissioner Harlan: Tell us what stations you have on that line.

Mr. Pierce: Clear Creek is our only station.

Commissioner Harlan: Where is that with relation to Simms?

Mr. Pierce: It is twelve miles east of Simms.

Commissioner Harlan: At the eastern terminus of the Enterprise Railroad?

Mr. Pierce: Practically at the terminus.

Commissioner Harlan: Have you a station building there?

Mr. Pierce: We have only a warehouse there.

Commissioner Harlan: A warehouse?

1312 Mr. Pierce: Well, a shed for receiving freight.

Commissioner Harlan: Do you move less than carload freight?

Mr. Pierce: We do.

Commissioner Harlan: Do you move mail and express matter?

Mr. Pierce: We do not.

Commissioner Harlan: Run any passenger trains?

Mr. Pierce: We do not. We handle passengers only free on our trains; we haul the citizens whenever they care to ride with us, but

there is not sufficient traffic there to warrant the maintenance of service which would meet the requirements of the Commission, if we hauled them for hire.

Commissioner Harlan: What is the timber land which is being lumbered by the Enterprise Lumber Company, what is the extent of it?

Mr. Pierce: I am not able to answer that within a reasonably accurate statement.

Commissioner Harlan: Can you approximate it, is it fifty thousand or one hundred thousand acres?

Mr. Pierce: The original purchase there, if I recall it, as a matter of gossip, was twenty-one thousand acres.

1313 Commissioner Harlan: Original purchase by the Enterprise Lumber Company?

Mr. Pierce: Original purchase by the Enterprise Lumber Company.

Commissioner Harlan: Have they added to that since?

Mr. Pierce: They have.

Commissioner Harlan: Do they own as much as one hundred thousand acres, do you think, at this time?

Mr. Pierce: That would be mere conjecture. I should say they did not.

Commissioner Harlan: As much as fifty thousand acres?

Mr. Pierce: It is possible.

Commissioner Harlan: Mr. Pierce, does your railroad haul any logs for any one other than the Enterprise Lumber Company?

Mr. Pierce: We do not, that I recall now.

Commissioner Harlan: Have you any outside traffic except in less than carload freight you have just referred to?

Mr. Pierce: We have some outside traffic in the way of forest products.

Commissioner Harlan: And manufactured by mills on the line or near the line?

1314 Mr. Pierce: It is mostly of a character that does not pass through mills; stave bolts, cordwood and various products of that character, which is not milled.

Commissioner Harlan: Are those products made from lumber cut on the lands of the Enterprise Lumber Company?

Mr. Pierce: It is not.

Commissioner Harlan: What is the extent of that tonnage?

Mr. Pierce: It constitutes about three or four per cent of our road revenue.

Commissioner Harlan: Does that go into Alexandria?

Mr. Pierce: It does.

Commissioner Harlan: On the local rate?

Mr. Pierce: Most of it does—no, not a local rate but a through rate.

Commissioner Harlan: Through rate to Alexandria?

Mr. Pierce: Through rate to Alexandria.

Commissioner Harlan: Joint through rate?

Mr. Pierce: Joint through rate covered by tariffs.

Commissioner Harlan: That is not hauled then by you into Alexandria under a trackage right?

Mr. Pierce: No, the Iron Mountain performs the service on that beyond Simms. We give that to them at Simms and they
1315 haul it in; our trackage right there only contemplates the handling of logs designed for this one mills.

Commissioner Harlan: Well, it is less than carload stuff usually, is it not, or does it move in carloads?

Mr. Pierce: This forest product?

Commissioner Harlan: Yes.

Mr. Pierce: Carload always.

Commissioner Harlan: What was your total tonnage last year?

Mr. Pierce: I will have to refer to the report. The total outside tonnage is given as 113,735 tons of lumber. Now, manifestly, in making up this statement Mr. Furby has construed as lumber everything in the nature of forest products.

Commissioner Harlan: Including logs?

Mr. Pierce: Including logs?

Mr. Pierce: Does your road move any lumber?

Mr. Pierce: We do not.

Commissioner Harlan: State in general terms what is the nature of this trackage arrangement that you have with the Iron Mountain?

Mr. Pierce: If you will permit me to amend that by saying
1316 we do not move any manufactured lumber.

Commissioner Harlan: What is the character of the agreement for trackage rights which you have with the Iron Mountain, what are the general terms?

Mr. Pierce: The general terms are on a basis of fifty cents a train mile either way regardless of the size of the train.

Commissioner Harlan: Empty and loaded?

Mr. Pierce: Yes, sir; the same charge for moving an empty train as loaded.

Commissioner Harlan: Do you haul the trains with your own power into Alexandria?

Mr. Pierce: We do.

Commissioner Harlan: And is your mill at Alexandria directly on the tracks of the Iron Mountain?

Mr. Pierce: You mean the mill of the Enterprise Lumber Company?

Commissioner Harlan: When I say "your" I address you in two relations——

Mr. Pierce: I have no relations with the Enterprise Lumber Company.

Commissioner Harlan: Very well, I mean the Enterprise
1317 Lumber Company.

Mr. Pierce: Their mill is located on the tracks of the Iron Mountain and the Texas & Pacific, both have switches in there.

Commissioner Harlan: Who owns the switch into the plant of the Enterprise Lumber Company?

Mr. Pierce: There are switches into this plant owned by the T. & P. and by the Iron Mountain and by the Enterprise.

Commissioner Harlan: Just how is that joint ownership arranged?

Mr. Pierce: These are separate switches.

Commissioner Harlan: Oh, they are separate switches?

Mr. Pierce: Separate switching facilities for the three roads there.

Commissioner Harlan: Have you a little sketch showing these switches?

Mr. Brown (producing paper): I think this shows them.

Mr. Cowan: When you use the term "Enterprise" on the tracks, you mean the railroad company or lumber company?

Mr. Pierce: I mean the railroad company always.

Commissioner Harlan: Mr. Pierce is not an officer of the lumber company. Now, here is a map called plat showing Enterprise
1318 Lumber Company's proposed spurs at Alexandria. Just point out the location of the mill.

Mr. Brown: This may show it a little more clearly.

Mr. Pierce: This is the saw mill of the Enterprise Lumber Company down here (indicating).

Commissioner Harlan: Near the Bayou File?

Mr. Pierce: Yes, sir. Now, this is our spur here.

Commissioner Harlan: Marked A line?

Mr. Pierce: Yes, sir.

Commissioner Harlan: I observe here another line marked C line, which at a point separates into two spurs, one marked D line, which approaches your saw mill on the south, and one still further to the south, marked "To Red River T. & P. spur." What is this D line spur?

Mr. Pierce: The ownership is T. & P.

Commissioner Harlan: That reaches your mill, does it?

Mr. Pierce: It does.

Commissioner Harlan: It is very close to your mill, is it not?

Mr. Pierce: At the mill.

Commissioner Harlan: Now, your own spur marked A line is not so close to the mill as this D line spur, is it?

1319 Mr. Pierce: It is practically as close, but it is on the opposite side of the mill.

Commissioner Harlan: Well, this map would seem to indicate it is some distance from the mill.

Mr. Pierce: If the trend of the question is to determine on what line we load, we do not load any outbound business on the spurs of the Enterprise road; that is for inbound business, and the outbound business is over the Iron Mountain and the T. & P. spur.

Commissioner Harlan: From the A line is another line running down through your mill. What is that; is it simply a survey line or a rail line?

Mr. Pierce: That does not indiate a track at all.

Commissioner Harlan: It is perhaps a survey line.

Mr. Pierce: These were survey lines for the purpose of determin-in the location of the log pond.

Commissioner Harlan: Does the log pond lie between your spur and the mill?

Mr. Pierce: No, our spur track runs around the edge of the log pond, but the log pond comes up to the rear of the mill.

Commissioner Harlan: These logging trains are operated over the Iron Mountain with your own engines and your own
1320 crews, using your own cars?

Mr. Pierce: They are.

Commissioner Harlan: And who dumps the logs into the pond?

Mr. Pierce: Our train crew.

Commissioner Harlan: Then the logs are taken from the pond into the mill and they are sawed and loaded out over this D line spur, which belongs to the T. & P., is that it?

Mr. Pierce: Partially so and partially over the Iron Mountain spur.

Commissioner Harlan: Does the Iron Mountain spur reach the mill?

Mr. Pierce: It does.

Commissioner Harlan: Which is the Iron Mountain spur?

(Witness indicates on diagram.)

Commissioner Harlan: Then this map seems to indicate that the Iron Mountain spur comes in below the spur I refer to as being marked "To Red River T. & P. spur?"

Mr. Pierce: Yes, sir; they are both located there.

Commissioner Harlan: Where is your planing mill?

Mr. Pierce: The Enterprise Lumber Company has no planing mill.

Commissioner Harlan: All their shipments are of the rough
1321 lumber?

Mr. Pierce: The shipments are not all what is known in the trade as rough lumber; there is in the saw mill of the Enterprise Lumber Company a single planing machine.

Commissioner Harlan: What is your general market; your largest market?

Mr. Pierce: The question is difficult to answer. We take lumber from that mill consigned to all parts of the country. I am not sufficiently acquainted with their business to know what they consider the largest part.

Commissioner Harlan: Is it pine or hard wood?

Mr. Pierce: It is pine.

(The map so offered and identified was received in evidence and thereupon marked Enterprise Railway Company Exhibit No. 1, witness Pierce, received in evidence December 13, 1910, and is attached hereto.)

Commissioner Harlan: What proportion of your shipments go out over the Iron Mountain?

Mr. Pierce: The general division is around 75 per cent to the Iron Mountain.

Commissioner Harlan: Has that been so for the last three or four years?

1322 Mr. Pierce: I think that is about the percentage.

Commissioner Harlan: Were both spur tracks at the mill when your road was constructed?

Mr. Pierce: I am not prepared to say.

Commissioner Harlan: I wish you would find that out. Is there anyone here that knows? Do you know the facts, Mr. Brown?

Mr. Brown: I think the Iron Mountain spur, if your Honor will notice this map, it is dated August 27, 1903; I think at the time the Enterprise Road was constructed out there from Simms that the Enterprise Lumber Company at the same time took up with the Iron Mountain the question of constructing the spur into the mill at Alexandria.

Commissioner Harlan: Then the Iron Mountain was not there at that time?

Mr. Brown: No, I do not think so.

Commissioner Harlan: Mr. Pierce, will you find out just when it was put in there? When you were first able to make shipments over the Iron Mountain on a spur near your mill. Do you receive any compensation from these two roads on outbound shipments, any payments, allowances or divisions?

1323 Mr. Pierce: The Enterprise Railroad Company has in through rates and divisions with the Iron Mountain Road, but not with the T. & P. Road on general traffic.

Commissioner Harlan: Has it ever had any divisions with the Texas & Pacific on lumber?

Mr. Pierce: We never have.

Commissioner Harlan: What are your divisions at this time with the Iron Mountain on through shipments of lumber?

Mr. Pierce: The quantity of the division?

Commissioner Harlan: Yes, the lowest and highest you receive under all available rates.

Mr. Pierce: Our divisions run from two cents to five cents; the average is three and something.

Commissioner Harlan: What service do you understand that the Enterprise Railroad Company does for that money?

Mr. Pierce: We perform the service of initiating this traffic on our own lines. The movement commences with us and we haul it to Alexandria.

Commissioner Harlan: Well, is the through rate a rate on lumber?

Mr. Pierce: It is a rate on lumber in the log from the point of origin to destination, with the privilege of milling at any point on the Enterprise Road, or at junctions with the Iron Mountain.

1324 Commissioner Harlan: Is the Iron Mountain's rate from Alexandria on lumber the same as the joint rate of the Iron Mountain and the Enterprise Railroad Company from the eastern terminus of the Enterprise Railway?

Mr. Pierce: I am not prepared to say what the rate from Alexandria is, because I am not interested in it, but my understanding is that Alexandria comes in the blanket there, and the blanket is maintained over that territory.

Commissioner Harlan: The blanket goes back to the point where you——

Mr. Pierce: The blanket goes back to Clear Creek.

Commissioner Harlan: You say you are not interested in the rate. What do you mean by that?

Mr. Pierce: I mean there is nothing in my affairs that call upon me to know what the rate from Alexandria is. There is a general blanket rate on forest products from that territory.

Commissioner Harlan: Are you familiar with general conditions around this territory, so far as the lumber traffic is concerned?

Mr. Pierce: Yes, sir.

Commissioner Harlan: Mr. Pierce, I would like to know
1325 whether in your judgment it is possible for small mills to successfully compete with your mill, when you get divisions of this kind, and they do not get any?

Mr. Pierce: You are assuming that I am interested in the Enterprise Lumber Company. You mean whether or not the Enterprise Lumber Company would have an advantage over these small mills?

Commissioner Harlan: Yes, you can put it that way if you like.

Mr. Pierce: Not the slightest.

Commissioner Harlan: The mill that has to haul its product to the Iron Mountain station by wagon, now, can such a mill successfully compete with a mill that has this relation to a special railroad and gets an allowance on delivering the manufactured lumber by rail at the junction?

Mr. Pierce: My experience would lead me to believe that the small mill that has its timber close enough to the trunk line to be able to handle it on wagons or lumber close enough to handle the lumber on wagons, would have an advantage over people of this character who are compelled to invest large sums of money in railroads in order to develop the timber territory.

1326 Commissioner Harlan: Are there a good many small mills around here?

Mr. Pierce: There is very little timber left on the main lines of these trunk line roads in that territory today that is available. That is a condition that existed at the time the trunk lines were built through the territory, but time has taken the timber away. It has been used up and there are not many of those mills left.

Commissioner Harlan: You think it is simply because the lumber has gone and not because they are not able to compete?

Mr. Pierce: Not by any means. Because the timber is gone and there is no opportunity for them.

Commissioner Harlan: But it is true, is it not, that there are no small concerns around your country; I mean within 25, 30, 40 or 50 miles?

Mr. Pierce: It is true they would have an advantage over a mill located as this is.

Commissioner Harlan: That is not quite the question. I want to know if there are any small concerns now in existence.

Mr. Pierce: There are a few.

Commissioner Harlan: They are very few?

Mr. Pierce: They are very few.

1327 Commissioner Harlan: And their output is inconsiderable, compared with the output of mills equipped such as yours is, with a railroad?

Mr. Pierce: Their output is inconsiderable. There have been statistics made up on that, which might be submitted to you if you care to see them.

Commissioner Harlan: By whom?

Mr. Pierce: George K. Smith, the secretary of the Yellow Pine Manufacturers' Association, I believe.

Commissioner Harlan: The output of mills which have to haul the lumber to the mill and the product to the station.

Mr. Pierce: The output of mills that do not have to develop their territory by the investment in railroads.

Commissioner Harlan: Do you know just what that investment showed in a general way? I do not mean accurate figures.

Mr. Pierce: It showed that the number of those mills and the quantity of their output was very inconsiderable, as compared with the larger concerns that had to develop the country.

Commissioner Harlan: Then that investigation shows that for one reason or another there are very few small mills; is not that it?

1328 Mr. Pierce: Not that there are so few small mills, but their product as compared with the general output of pine lumber is inconsiderable.

Commissioner Harlan: Didn't the investigation show that there are a great many small mills regardless of their output that are in operation?

Mr. Pierce: It showed that the number of mills of the individuals was very much greater than what is known as the large concerns who are investing large sums of money and developing their holdings by means of railroads.

Commissioner Harlan: Such mills, then, are more numerous than the larger mills, but their output is a very small proportion of the total.

Mr. Pierce: Their output is quite small compared with the number.

Commissioner Harlan: Am I to understand that under existing conditions those small mills are nevertheless able to keep going.

Mr. Pierce: They are always successful where they can find timber.

Commissioner Harlan: What charge does your company make for hauling the logs of the Enterprise Lumber Company to

1329 the mill?

Mr. Pierce: We make no charge for hauling the logs to the mill. Our rate is from Clear Creek to destination.

Commissioner Harlan: That is a lumber rate, with a milling in transit privilege.

Mr. Pierce: That is a lumber rate.

Commissioner Harlan: Does not that mean, then, that the through rate to St. Louis—what is it, 18 cents?

Mr. Jeffery: Eighteen cents; yes, sir.

Commissioner Harlan: That the 18 cents rate on the lumber to St. Louis picks up the log and carries it to and through the mill and on to the market without additional expense to the lumber company?

Mr. Pierce: It does.

Commissioner Harlan: And the fellow that has no railroad, and does not have his logs picked up for him, he has to do that himself, and he does not have his lumber picked up for him, but he has to haul it to the station; are not those the relative conditions under which the business is done by these two classes of mills?

Mr. Pierce: Is it your desire that I should set up his opposing advantages?

1330 Commissioner Harlan: You can do that if you like, but I want an answer to the question first, and then you can say what you like. I want to know the facts first.

Mr. Pierce: You have stated the matter correctly as to the facts.

Commissioner Harlan: Now if you have any comment to make upon those facts, I would like to know what it is.

Mr. Pierce: If it is proper for me to say, I would say that the man with the small mill, who is located on the trunk line is not required to go out and organize a railroad company and invest his money in that, often with very little return. He has his timber more cheaply——

Commissioner Harlan: Pardon me a moment. You are now proceeding on the case stated. A number have been spoken of here by various witnesses, where the mill is not on the trunk line, but there is a substantial haul of the lumber to the receiving station of the trunk line, and there is a substantial haul of the logs to the mill. Now those conditions exist and witnesses have so stated here. Now, I want to know in your judgment, based on your practical experience with the lumber interests, if the small fellow can successfully compete with the large fellow who has a railroad, and if

1331 he does it successfully and keeps his mill going?

Mr. Pierce: He does.

Commissioner Harlan: Do you know of such cases?

Mr. Pierce: I do.

Commissioner Harlan: Do they exist around you?

Mr. Pierce: I have been in this territory but very little in the last four years. I have now in mind only one mill in that territory of that character, though doubtless others exist. As to that immediate locality, you could find much more competent witnesses than I am.

Commissioner Harlan: The point in my mind is this. Up in my country everybody is a small miller, and everybody hauls his logs and everybody hauls his lumber; there are no big concerns. I want to know whether the small man and the big man can exist success-

fully side by side down in this country, and you say there is only one man you know of in your part of the country.

Mr. Pierce: That has a body of timber close enough to the trunk line to warrant him having his mill on the line.

Commissioner Harlan: I do not know where the timber is, but there is only one you can state in your country that is a going concern?

1332 Mr. Pierce: Unless I can think about it. There is no question about the ability of the small mill to compete with the large mill in this country.

Commissioner Harlan: Well, that one man is doing it.

Mr. Pierce: Oh, he is doing it successfully.

Commissioner Harlan: Does the Enterprise Railway Company own any other track than the track you have just described?

Mr. Pierce: No other track.

Commissioner Harlan: We have some record of another bit of track somewhere else in the neighborhood that is supposed to belong to your company a little closer to Alexandria. Do you know of any such tract?

Mr. Pierce: I do not.

Commissioner Harlan: You say you pay 50 cents per train mile?

Mr. Pierce: That is my recollection.

Commissioner Harlan: Our records seem to indicate that you pay $1.00 a train mile.

Mr. Pierce: Well, that is incorrect.

Commissioner Harlan: Very well. Our records seem to indicate that you charge the lumber company $1.50 for handling the logs to Alexandria?

1333 Mr. Pierce: That is also incorrect.

Commissioner Harlan: This is a report made up by an examiner who conferred with your officials in December, 1909.

Mr. Pierce: Well, the information—either the officers have not understood the query of the examiner, or in some way or another he has gotten it down wrong. The service for which we charge the lumber company is for the construction of spurs in their holdings, for the loading of their logs and switching of their logs out to our main line. We keep two locomotives out there for the purpose of handling their stuff to the main line.

Commissioner Harlan: What do you charge for that service?

Mr. Pierce: My recollection is it is $1.50 per thousand. I am not positive on that.

Commissioner Harlan: Who knows better than you about this? We ought to get the information without delay, and we ought to have it accurately. I understood you to say in the beginning that you could tell——

Mr. Pierce: That is correct. It is $1.50 per thousand.

Commissioner Harlan: Just what service does that cover?

Mr. Pierce: That covers the construction of spurs, the operation of those spurs, the loading of the logs and the switching of
1334 the logs to the main line.

Commissioner Harlan: That is in addition to the divisions which you get?

Mr. Pierce: That is a separate earning.

Commissioner Harlan: What were your total revenues last year, and your net?

Mr. Pierce: Freight revenue, $53,045.15; operating expenses, $56,049.47, leaving a deficit of $3,257.28.

Commissioner Harlan: Do the officers of the railroad get salaries?

Mr. Pierce: They do not, except myself; I receive a salary.

Commissioner Harlan: What is the Southern Pine System?

Mr. Pierce: It is a trade name used for convenience in handling the affairs of these five roads.

Commissioner Harlan: Is it a corporation?

Mr. Pierce: It is not.

Commissioner Harlan: It is simply a selling agency, or is it——

Mr. Pierce: No, it is a trade name, under which we conduct the correspondence of these five roads for convenience. For instance, with the Commission, they allow us in filing accident re-
1335 ports, to file our reports under this trade name for economy of time.

Commissioner Harlan: Is there an inter-corporate relation between these several lumber companies?

Mr. Pierce: There is not.

Commissioner Harlan: Is there one company that owns the stock in the several lumber companies?

Mr. Pierce: There is not.

Commissioner Harlan: What about the railroad stock?

Mr. Pierce: It is all separate; they are separate corporations.

Commissioner Harlan: Are the stockholders the same, or substantially so, in all these different companies?

Mr. Pierce: They are not.

Commissioner Harlan: Is there complete identity as to all companies, or are one or two closely related in stock ownership?

Mr. Pierce: There is complete identity, except the Saline Bayou and the Griffen, Magnolia & Western, which are practically owned by the same people.

Commissioner Harlan: You perhaps used the wrong expression. You mean separation?

1336 Mr. Pierce: I mean each one of these companies is in itself a complete identity, and that there is no inter-relation between the companies, except the Saline Bayou and the Griffen, Magnolia & Western.

Commissioner Harlan: What is that relation?

Mr. Pierce: The stockholders of one are practically the same as the stockholders of the other.

Commissioner Harlan: You refer there to the lumber companies or the railroad company?

Mr. Pierce: The railroad company.

Commissioner Harlan: Are the two railroad companies owned by stockholders who also own the stock of one lumber company or two lumber companies?

Mr. Pierce: Two lumber companies, but the stockholders of both those lumber companies are practically the same.

Commissioner Harlan: So that those two lumber companies and those two railroads represent practically one investment by the same people, but through different corporations?

Mr. Pierce: Well, they are two forks to the same stem, the sap comes from the same trunk.

Commissioner Harlan: What was the total cost of the Enterprise Railroad?

1337 Mr. Pierce: $73,352.36,—oh, no; road and equipment?

Commissioner Harlan: Yes.

Mr. Pierce: $132,852.26.

Commissioner Harlan: Do you know what the cost of the equipment was?

Mr. Pierce: Segregated?

Commissioner Harlan: Yes.

Mr. Pierce: $54,500.

Commissioner Harlan: I observe that last year you had an expense for maintenance of equipment, according to your annual report, of $14,000, which was about 25 or 30 per cent of the value of the equipment, and an item of $19,000 practically $20,000, for maintenance of way and structures. Do you recall what those items were respectively, for the year before?

Mr. Pierce: I am sorry, but I cannot, Mr. Commissioner.

Commissioner Harlan: Were they about as large?

Mr. Pierce: I have not the slightest recollection of them.

Commissioner Harlan: Your company has not paid any dividends?

Mr. Pierce: No, sir.

Commissioner Harlan: Has it any cash capital, working

1338 capital?

Mr. Pierce: Cash on hand?

Commissioner Harlan: Cash on hand.

Mr. Pierce: Very little. It is in debt.

Commissioner Harlan: How do you take care of this deficit?

Mr. Pierce: We borrow the money from the Enterprise Lumber Company.

Commissioner Harlan: Have you had to borrow money year after year?

Mr. Pierce: We have.

Commissioner Harlan: What does the total debt now amount to?

Mr. Pierce: About $112,000.

Commissioner Harlan: That covers what period of time?

Mr. Pierce: Eight years.

Commissioner Harlan: In other words, there has been a deficit each year?

Mr. Pierce: There has been a deficit each year.

Commissioner Harlan: Do you pay interest on that debt?

Mr. Pierce: We do. It is charged up to us.

Commissoner Harlan: Well, do you pay it?

Mr. Pierce: When we have the money we pay it.

1339 Commissioner Harlan: Is that the way your deficit was created last year, by paying the interest, or did the interest enter into the expense side of the account?

Mr. Pierce: The interest was charged up to us, and the general result of our operation was that we were at this much of a deficit.

Commissioner Harlan: So that the deficit is predicated on the proposition that the interest in one form or another has been paid?

Mr. Pierce: That it has been paid.

Commissioner Harlan: If you have had a deficit for every year, it is not likely that the lumber company can look forward to the early payment of that debt, is it?

Mr. Pierce: There is no reassuring prospect on that subject.

Commissioner Harlan: If you put in 25 per cent each year on your equipment and a very large percentage on your maintenance of way and structures, you are all the time building up a substantial asset in this road and roadbed and the equipment?

Mr. Pierce: We hope it is.

1340 Commissioner Harlan: So that even if you declare no dividend to the stockholders, the value of the investment is yearly increasing?

Mr. Pierce: We hope so.

Mr. Brown: You are a stockholder of the Enterprise Railway?

Mr. Pierce: I am.

Mr. Brown: You are not interested in the Enterprise Lumber Company?

Mr. Pierce: No, I am not.

Commissioner Harlan: The witness has stated that, and I hope counsel will avoid repetition as far as possible.

Mr. Brown: I will try to. Referring to the trackage agreement, and the Commissioner's remark about the payment of $1.00, as you stated, and as the contract reads, as I understand it, it is 50 cents a train mile. Now, that is in or out, loaded or empty; is that your understanding of it?

Mr. Pierce: Any mile that we move a train over the Iron Mountain we pay 50 cents, regardless of the character of the train.

Mr. Brown: So when a train comes in and out, it would cost $1.00 a mile to move the train in and out; that is probably the explanation of the dollar charge.

Mr. Pierce: For the double track movement.

1341 Mr. Brown: You have a station or a village or a town called Stone's Camp upon the line of the Enterprise Railroad, have you not?

Mr. Pierce: We have.

Mr. Brown: Is there a general store located at that place?

Mr. Pierce: There is.

Commissioner Harlan: Does the Enterprise Lumber Company have any interest in that store?

Mr. Pierce: They have not.

Mr. Brown: Does your railroad handle any business either in or out for that store?

Mr. Pierce: We do.

Mr. Brown: What is the general nature of that business?

Mr. Pierce: It is usually class business, merchandise, feed stuffs, and flour and produce.

Mr. Brown: How is that handled, on joint through rates, or do you handle it on the local rate from Simms?

Mr. Pierce: On the local from Simms.

Mr. Brown: Are your locomotives and your cars equipped with safety appliances, as required by the Federal Act?

Mr. Pierce: They are.

Mr. Brown: Do you make your accident reports to the
1342 Interstate Commerce Commission?

Mr. Pierce: We do.

Mr. Brown: Keep your accounts in accordance with the rules of the Commission, as you understand them?

Mr. Pierce: We endeavor to do so.

Mr. Brown: File with the Commission your annual reports?

Mr. Pierce: We do.

Mr. Brown: Have you filed your annual report for the year ending June 30, 1910?

Mr. Pierce: We have.

Mr. Brown: It is true, is it not, Mr. Pierce, that the tracts of timber along the main line of these railroads have been largely consumed?

Mr. Pierce: It is.

Mr. Brown: And it is also true that the timber that furnishes the supply of lumber is now located to a considerable extent away from the main line of the railroads?

Mr. Pierce: It is practically all remote from trunk lines.

Mr. Brown: Is it not also true throughout this part of the country that these timber tracts have been bought up in large bodies, large acreage, by these large lumber companies?

Mr. Pierce: It is necessary that they should buy these
1343 tracts in large quantities in order to supply a raw material to warrant such an investment as is requisite now to be made in railroads and mills to handle a proposition of that character.

Mr. Brown: Well, notwithstanding that, there are in many places all over this country small tracts of timber land are there not?

Mr. Pierce: There are.

Mr. Brown: That is not all in one interest, and is it not also true that the small mills that the Commissioner referred to, are, to a large extent, located upon what are here denominated as tap lines?

Mr. Pierce: There are more of them located on lines of that character than there are on the trunk lines.

Mr. Brown: And they are using these so-called tap lines as their means of transportation, are they not?

Mr. Pierce: That is their only outlet to the market.

Mr. Brown: And these joint through rates that the Enterprise Lumber Company pays over the rails of the Enterprise Railroad are available to and permit the small mill located upon these tap lines to do business upon exactly the same basis as a large mill like the Enterprise Lumber Company?

1344 Mr. Pierce: They do.

Mr. Brown: What would be the effect upon the small mill located upon the so-called tap line, if the joint through rate was discontinued?

Mr. Pierce: He would be compelled to pay the sums of the locals through the junction of the trunk line.

Mr. Brown: What, in your opinion, would be the effect of that sort of a combination of freight rates upon the business of the small mill located upon the so-called tap line?

Mr. Pierce: He would be put at a serious disadvantage over mills that might be located on the trunk line; the probabilities are he would be driven out of business.

Mr. Brown: I think that is all I have with respect to the Enterprise Railroad.

Commissioner Harlan: Is this a copy of your annual report for last year? (Handing paper.)

Mr. Pierce: It is.

Commissioner Harlan: An exact copy?

Mr. Pierce: It is.

Commissioner Harlan: And you are the auditor of this road?

Mr. Pierce: Yes.

Commissioner Harlan: Will you point out where it shows
1345 the payment of interest, either by credit or cash, to the lumber company?

Mr. Pierce: Mr. Commissioner, it was not made up by me, but by the assistant auditor, and I am not prepared to say that I personally understand how the entries were made in connection with it.

Commissioner Harlan: I understood you to say that it was made up by the assistant auditor?

Mr. Pierce: Yes, sir.

Commissioner Harlan: And you have not given it personal examination?

Mr. Pierce: I have not.

Commissioner Harlan: If it does not show here that the interest has been charged against your company and credited to the lumber company, that means that the lumber company has not received the interest in any form, does it not?

Mr. Pierce: I think that would be the proper inference.

Commissioner Harlan: I put the question, Mr. Pierce, because I have been impressed by the fact that you are the auditor of this road, and yet apparently so large an item as interest on $120,000, I believe you said, has not lodged itself in your mind sufficiently to know whether you paid it or not, and it leads
1346 possibly to the inference or suggests the inference that this whole system of accounting for the railroad company is more or less a nominal or formal matter, and that your real interest lies largely in the lumber company. Here you are the auditor, and you tell me the interest has been paid, and yet this account furnished to the Commission and supposed to be correct, does not seem to indicate that it has been paid.

Mr. Pierce: There is an earnest endeavor to keep these accounts properly.

Commissioner Harlan: I am sure of that, but I direct your attention to that one fact that as auditor of this road, that fact has not lodged itself definitely in your mind, whether you paid interest on this large indebtedness or not, and you are not quite sure as to what your trackage arrangement was with the Iron Mountain, and you stated it 50 cents and counsel suggests it is $1.00 a mile, and I am left in doubt as to what it really is.

Mr. Brown: I have the contract and will be glad to file it.

Commissioner Harlan: That is the point. The contract is all available, but it apparently is not lodged definitely in the mind of the auditor of the railroad who has daily to deal with
1347 the accounts of this railroad.

Mr. Pierce: I beg pardon, but I stated positively it was fifty cents a train mile.

Commissioner Harlan: Very well; if that is your positive conviction, it will depend upon what the record discloses.

Mr. Pierce: That is my positive knowledge.

Commissioner Harlan: The statement was made to the examiner of the Commission, and it is now in the records of the Commission, indicating you get $1.00 a train mile.

Mr. Pierce: This is a payment; we pay it to the Iron Mountain.

Commissioner Harlan: Yes, you pay the Iron Mountain——

Mr. Pierce: Fifty cents a train mile either way.

Commissioner Harlan: Yes. Judge Cowan, have you any questions of this witness?

Mr. Cowan: Yes. I did not understad your position. You say you are a stockholder in this company that you are auditor of, and you are not interested in the lumber company?

Mr. Pierce: I am not interested in the lumber company. I am a stockholder in this railroad company.

Mr. Cowan: How did you happen to have that stock in this company that continually has a deficit, and auditor of a com-
1348 pany where you own the stock and do not know whether you paid the interest or not?

Mr. Pierce: I believe that my acquisition of the stock was perfectly honorable, Judge.

Mr. Cowan: I have no doubt of that, but it might have been a very foolish business undertaking if they do not pay anything, and I wondered how you came to be a stockholder in a company of this sort.

Mr. Pierce: I have not claimed that it was paying investment.

Mr. Cowan: What is the object of having it, then?

Mr. Pierce: I got it in the way that a good many people get mining stocks, when they are not looking.

Mr. Cowan: Who sold it to you—is that the way the Enterprise Company deals, or did they sell you the stock?

Mr. Pierce: The stock was acquired from a friend of mine and in a perfectly legitimate way, I assure you, Judge.

Mr. Cowan: Well, how much salary do you draw as auditor?

Mr. Pierce: Well, that is a personal matter.

Mr. Cowan: I don't know about that.

Commissioner Harlan: I think we ought to know that, and
1349 other witnesses have been required to state that.

Mr. Pierce: The salary is made up of the contributions for the different lines, Mr. Commissioner. My salary is $300 a month.

Commissioner Harlan: You are auditor for all these lines?

Mr. Pierce: Yes.

Mr. Cowan: What is the quantity of stock you own, just enough to qualify you as an official?

Mr. Pierce: Fifteen shares is my recollection.

Mr. Cowan: Where do you keep your office?

Mr. Pierce: St. Louis.

Mr. Cowan: Where does the lumber company, or companies connected with these lines keep their offices?

Mr. Pierce: The office of the Enterprise Lumber Company is at Alexandria.

Mr. Cowan: Do these lumber companies served by the railroads of which you are auditor have an office and place of business jointly or singly in St. Louis?

Mr. Pierce: They have separate offices; some of them in St. Louis and some of them not there.

Mr. Cowan: Is it the same place where your office is?

Mr. Pierce: It is the same place where my office is.

1350 Mr. Cowan: All the offices in the same rooms?

Mr. Pierce: All offices in the same rooms. We have a suite of rooms.

Mr. Cowan: This Southern Pine—what do you call it?

Mr. Pierce: Southern Pine System.

Mr. Cowan: The Southern Pine System has these offices where you keep your office, does it?

Mr. Pierce: Yes, sir.

Mr. Cowan: And they have a sales agent there for the lumber?

Mr. Pierce: Yes, sir.

Mr. Cowan: Is it a joint sales agency?

Mr. Pierce: I beg your pardon. You asked me if the Southern Pine System had a sales agent for lumber?

Mr. Cowan: Yes, that was my question.

Mr. Pierce: The Southern Pine System is not in the lumber business. If the information you want is as to whether or not the stockholders interested in the Southern Pine System are also stockholders of lumber companies, I will say that they are and that they run an office in St. Louis and that they there employ all such people as would naturally be employed in a lumber business.

1351 Mr. Cowan: Well, there is a sales agent for these lumber companies occupying the same office with you?

Mr. Pierce: They do; the same suite.

Mr. Cowan: I cannot understand this. How many lumber companies are there that do business on the Southern Pine or Yellow Pine System?

Mr. Pierce: Well, do you mean—those interested in the community, that have the community of interest taint on them; is that what you mean?

Mr. Cowan: I don't know as it is a taint; it is just a business proposition. They have a sales agent there, I understand.

Mr. Pierce: There are five of those companies.

Mr. Cowan: And one of them is the Enterprise Company which we have been talking about?

Mr. Pierce: They do not have an office in St. Louis.

Mr. Cowan: Well, have they any interest in this joint sales agent we have been talking about?

1352 Mr. Pierce: I did not say anything about a joint sales agent.

Mr. Cowan: Well, I did. I made a mistake, I guess. I asked you if they had a joint sales agent in the office you occupy, and I thought you said they did.

Mr. Pierce: The five lumber companies interested in these railroad companies have no joint sales agent.

Mr. Cowan: Do each of them have a sales agent there?

Mr. Pierce: Each one of them has a sales agent, but not there.

Mr. Cowan: And the people who are in the office with you represent whom?

Mr. Pierce: The people who are in the office with me represent the Southern Pine System, and also represent two of the lumber companies that are interested in the stock—whose stockholders are interested in the stock of these roads.

Mr. Cowan: What companies are those?

Mr. Pierce: Louis Werner Company and the Oak Leaf Mill.

Mr. Cowan: Do you keep the books of each one of these railroad companies at St. Louis; is that where the books are kept?

Mr. Pierce: We do not.

1353 Mr. Cowan: Where are they kept?

Mr. Pierce: At the local offices of the roads.

Mr. Cowan: And are you familiar with where the local office is in the case of the Enterprise Lumber Company?

Mr. Pierce: St. Louis—at Alexandria.

Mr. Cowan: Is that in the lumber company's office?

Mr. Pierce: I do not know. It is in the same building.

Mr. Cowan: And you have been down there, of course?

Mr. Pierce: I have.

Mr. Cowan: Have you an assistant auditor there?

Mr. Pierce: I have.

Mr. Cowan: You supervise what he does?

Mr. Pierce: Possibly not as closely as I should. In a general way.

Mr. Cowan: Well, there is a little indication here that you do not.

Mr. Pierce: Yes; the Commissioner has just called my attention to that.

Mr. Cowan: Now, you say you don't know whether the office is in the lumber company's office or not?

Mr. Pierce: I said that I did know that it was.

Mr. Cowan: And that is in the office of the bookkeepers
1354 of the lumber company?

Mr. Pierce: All of the lumber company's people are in this office.

Mr. Cowan: Does this assistant auditor you have spoken of do anything else except audit the business of the Enterprise Railroad Company?

Mr. Pierce: I do not know of his other employment. I take it he is employed also by the Enterprise Lumber Company. So fas as my relations with him are concerned, he is simply my associate in the service of the Enterprise Railroad.

Mr. Cowan: What do you pay him?

Mr. Pierce: I don't know. He reports direct to——

Mr. Cowan: You do not know what the Enterprise Railroad pays him?

Mr. Pierce: I do not, no.

Mr. Cowan: Do they pay him anything?

Mr. Pierce: I don't know.

Mr. Cowan: Is it not a fact that the Enterprise Lumber Company has already written off this indebtedness that the railroad is supposed to owe it, off its books?

Mr. Pierce: I am not familiar with the books of the Enterprise Lumber Company. I could not say whether that was a fact
1355 or not. I do not think it likely they would do anything of the kind.

Mr. Cowan: Do you have any understanding of it?

Mr. Pierce: They have never given us a receipt for it, by any means, or declared to us that they think it is a lost account.

Mr. Cowan: How long have you been owing it?

Mr. Pierce: We have been accumulating it for the last eight years.

Mr. Cowan: It is barred by the Statute of Limitations.

Mr. Pierce: No, it is accumulating. There is ten years' limitation in Louisiana.

Mr. Cowan: Any notes outstanding for it?

Mr. Pierce: No.

Mr. Cowan: Any sort of security given for it?

Mr. Pierce: No.

Commissioner Harlan: Right at that point let me interrupt and ask you whether such an indebtedness would appear as a funded debt or not on our formal report.

Mr. Pierce: Our idea of a funded debt is one for which a bond is given, and it would not appear on a road of that character. We have no bonds.

1356 Commissioner Harlan: How would it appear?

Mr. Pierce: As an open account.

Commissioner Harlan: Does it appear here, do you know?

Mr. Pierce: I think it does.

Commissioner Harlan: If you will go on, Judge Cowan, Mr. Sanford will look it up.

Mr. Cowan: I do not want to consume much time on this, but I want to ask about the man who does the small business on a tap line,

which your counsel asked about, and the advantages that he has b
paying the rate of freight, as compared to the saw mill which own
the tap line and gets a division out of the rate. I understood yo
to put it that the man operating the small mill on the tap line is
an advantage as compared to the man who is the owner of the ta
line and operating his mill. Did I understand you correctly?

Mr. Pierce: I feel that he is.

Mr. Cowan: Do you know of such a case?

Mr. Pierce: I think so.

Mr. Cowan: Just give us an instance of that case, and let us s
what his situation is. Where is the man operating a saw mill whi
is independent of tap line ownership on a tap line?

1357 Mr. Pierce: Do you want a concrete example?

Mr. Cowan: Yes; I want to find the case.

Mr. Pierce: By names and locations, and so on?

Mr. Cowan: Yes; that is the only way to do it.

Mr. Pierce: Just as an illustration, the usual saw mill of th
character is small, the timber is bought in small blocks——

Mr. Cowan: No, just tell me the place where the mill is. On wh
tap line is that mill you have in mind? You said you knew of o

Mr. Pierce: There is a mill located at Mount Holly, Arkansas.

Mr. Cowan: What line is that on?

Mr. Pierce: On one of our lines, the Griffen, Magnolia & Weste

Mr. Cowan: How far from the junction point of the main lin

Mr. Pierce: About 18 miles.

Mr. Cowan: You haul his lumber on your tap line?

Mr. Pierce: We do.

Mr. Cowan: Do you get anything for it?

Mr. Pierce: We do.

Mr. Cowan: How?

1358 Mr. Pierce: Through the division of the through rate.

Mr. Cowan: How much division do you get on his lumbe

Mr. Pierue: About 3.4 cents average on it.

Mr. Cowan: He pays the full rate?

Mr. Pierce: He pays the full rate.

Mr. Cowan: Where is your mill located?

Mr. Pierce: I haven't any mill.

Mr. Cowan: I mean the mill that belongs to the interests of t
tap line.

Mr. Pierce: Located at Griffen.

Mr. Cowan: They pay the same through rate that he does?

Mr. Pierce: The same through rate.

Mr. Cowan: Do they own the stock in the railroad?

Mr. Pierce: They do.

Mr. Cowan: And there comes back to the railroad company
of the rate they pay this 3.4 cents, and there comes back to
railroad company out of the lumber that he ships the same
cents.

Mr. Pierce: Yes, sir.

Mr. Cowan: You say that gives this man an advantage who p
the full rate and who does not get anything back, as compa

with the saw mill interests which do get it back on their
1359 lumber and on his?

Mr. Pierce: No, I did not say that. You misunderstood me.

Mr. Cowan: I am giving a concrete example, because I thought that was what you meant when you said he was working at an advantage.

Mr. Pierce: I said there were certain advantages to the small mill man that the large one did not enjoy. I did not say there was any advantage in the rate.

Mr. Cowan: What are the advantages this man enjoys, just taking this concrete example?

Mr. Pierce: He is relieved from the investment in a large quantity of raw material, in the first place. Many of these people investing in large saw mill propositions in the South are carrying raw material for 25 years. In the second place, he is relieved of the investment in railroads, for the purpose of developing his property, and he is accumulating his timber in small quantities at a very low price. Usually he buys it from his brother-in-law, his mother-in-law or his old friends, and they get their timber together for 25 to 50 cents a thousand, and he handles his business in a small, concrete way at small expense, and makes his lumber for less money
than the big people do, and enjoys the same rate out that
1360 they do.

Mr. Cowan: The enjoyment of the rate is that he enjoys the opportunity to pay the rate, but does not get any division?

Mr. Pierce: The rate from this country is the same.

Mr. Cowan: I understand that, but the divisions seem to be different.

Mr. Pierce: Very trifling, if any, so far as I know.

Mr. Cowan: Then you say that he is relieved of the investment in a railroad for developing his property?

Mr. Pierce: That is what I said.

Mr. Cowan: So I assume that that means that you treat the investment of the lumber company in these instances where you are auditor of the railroad, as being the real investment that is in the railroad, the lumber company made the investment.

Mr. Pierce: There is no question but what these railroads would not have been built had it not been for the fact that they were needed to transport the tonnage of the country.

Mr. Cowan: Well, you consider, then, that the investment of one of these big lumber concerns in a railroad is a necessity to the operation of the business?

Mr. Pierce: It is a necessity to the movement of freight
1361 of a railroad.

Mr. Cowan: Well, but is it not necessary to the operation of the saw mill business on a large scale to build and operate a railroad for that purpose?

Mr. Pierce: It is a necessity for that mill to get logs to its mill in some way.

Mr. Cowan: I did not ask that. I asked the other question, and that you might answer, if it is a necessity for them to operate the railroad or not, in the operation of a large saw mill business.

Mr. Pierce: No, the only necessity to them is to devise some means to get the logs to their mill.

Commissioner Harlan: Well, the means they devise is a railroad, and the other fellow devises a horse and wagon or a couple of mules; is not that about the only difference?

Mr. Pierce: Well, it is technically so.

Mr. Cowan: Take the man who operates the railroad in the development of his logging business, and who does not get a division of the rate at all; is he not at a great disadvantage as compared to the saw mill interest, which develops its railroad, but gets a division of the rate for it,

Mr. Pierce: I am not prepared to say. I have not had
1362 any experience with that kind of railroading.

Mr. Cowan: That is all.

Commissioner Harlan: Mr. Jeffery, have you any questions?

Mr. Jeffery: No.

Mr. Brown: Just one question about the billing arrangement. Will you please explain how the lumber is billed out, whether it is on the through billing from the eastern terminus of your Enterprise Railroad.

Mr. Pierce: It moves on through billing.

Mr. Brown: What is the initial point?

Mr. Pierce: Clear Creek.

Mr. Brown: Does this traffic move under the usual and customary bill of lading and railroad form of way bill?

Mr. Pierce: Uniform bills of lading, and standard form of way bill.

Mr. Brown: Of your railroad company?

Mr. Pierce: Yes, sir.

Mr. Brown: That is all.

Mr. Cowan: One question about that billing. Have you examined the bills made out by the Iron Mountain Railroad when they ship this lumber out?

Mr. Pierce: The Iron Mountain does not issue any bills
1363 for this lumber.

Mr. Cowan: Who issues the bills.

Mr. Pierce: The Enterprise Railroad.

Mr. Cowan: At Alexandria?

Mr. Pierce: At Alexandria.

Commissioner Harlan: No, you said at Clear Creek.

Mr. Pierce: He is talking about the bill of lading.

Commissioner Harlan: Were you talking about the way bill?

Mr. Brown: I asked about both. I asked him from what point it was way billed.

Commissioner Harlan: You said Clear Creek?

Mr. Pierce: Yes, sir.

Commissioner Harlan: And the lading papers are issued at Alexandria?

Mr. Pierce: Yes, sir.

Mr. Cowan: Then the bill of lading would read a shipment of a carload of lumber to St Louis from Clear Creek?

Mr. Pierce: Yes.

Mr. Cowan: You are certain of that, are you?

Mr. Pierce: I am.

Mr. Cowan: And there would be a way bill issued on that to whom?

1364 Mr. Pierce: To the conductor.

Mr. Cowan: Of what train?

Mr. Pierce: Whatever train took it out, whichever train switched it out

Mr. Cowan: And in the operation of the Iron Mountain you say the way bill will read from Clear Creek, to this conductor?

Mr. Pierce: Yes, sir.

Mr. Cowan: Is there anything else you ship from Clear Creek?

Mr. Pierce: Than lumber?

Mr. Cowan: Yes, is there other stuff shipped from Clear Creek besides logs?

Mr. Pierce: Practically no outbound movement, except forest products, as I testified.

Mr. Cowan: You have seen these way bills and bills of lading, and know?

Mr. Pierce: I have.

Mr. Cowan: What is the purpose of making a false billing. It is true it is not shipped from there. What is the purpose of billing it?

Mr. Pierce: Why do you call it false? It is not.

1365 Mr. Cowan: Because you say it is shipped from Clear Creek, but it is not. It is shipped from Alexandria.

Mr. Pierce: It is shipped from Clear Creek, and the tariff so provides for it.

Commissioner Harlan: That is a question, I think, that can be reserved for the argument.

Mr. Pierce: The object of putting the bill the way it is is to throw the responsibility for the routing on the Enterprise Railroad.

Mr. Jeffery: The arrangement is the ordinary so-called milling in transit?

Mr. Pierce: Yes, sir.

Mr. Jeffery: And it is a milling in transit tariff which you ship under?

Mr. Pierce: Yes, sir.

1366 *Griffen, Magnolia & Western Railroad Company.*

Commissioner Harlan: Now, Mr. Pierce, do you sustain the same relation to the Griffen, Magnolia & Western?

Mr. Pierce: I do.

Commissioner Harlan: That is in Arkansas?

Mr. Pierce: It is.

Commissioner Harlan: In order that I may find the point, will you tell me where Griffen is in relation to Little Rock?

Mr. Pierce: It is 125 miles south.

Commissioner Harlan: That company is controlled by the Louis Werner Saw Mill Company?

Mr. Pierce: The stockholders.

Commissioner Harlan: I mean in the same way; the stockholders are identical?

Mr. Pierce: Yes, sir.

Commissioner Harlan: What is its capital?

Mr. Pierce: $50,000.

Commissioner Harlan: Is that authorized and issued?

Mr. Pierce: Authorized and issued.

Commissioner Harlan: Have you any bonded indebtedness?

Mr. Pierce: None whatever.

1367 Commissioner Harlan: Any other debt except current accounts?

Mr. Pierce: No other debt except current accounts.

Commissioner Harlan: What is the length of that road?

Mr. Pierce: Eighteen miles of main line.

Commissioner Harlan: And it owns some logging line which is connected with it?

Mr. Pierce: Yes.

Commissioner Harlan: The total mileage is what?

Mr. Pierce: 28 or 30 miles.

Commissioner Harlan: It is a standard gauge?

Mr. Pierce: It is a standard gauge, 35 to 40 pound rail, third track.

Commissioner Harlan: What equipment has it?

Mr. Pierce: Three locomotives and equipped with 50 standard flat cars and a caboose.

Commissioner Harlan: Any passenger cars?

Mr. Pierce: There has been no passenger service for hire.

Commissioner Harlan: Do you carry any mail or express?

Mr. Pierce: We do not.

Commissioner Harlan: And what is the southwestern or most southerly terminus of your line?

1368 Mr. Pierce: Graham.

Commissioner Harlan: I observe here a point called Maryville.

Mr. Pierce: We are not into Maryville.

Commissioner Harlan: You say you have some logging lines connected with the main line. Do you own the logging lines?

Mr. Pierce: We own the logging lines.

Commissioner Harlan: Do you operate them?

Mr. Pierce: And operate them.

Commissioner Harlan: Do you make any charge for that service, distinct from any other charge which you make?

Mr. Pierce: We do. We make a charge against the parties for whom the logging is done on these spurs.

Commissioner Harlan: Do any logs come off the spur tracks except the logs of the Louis Werner Saw Mill Company?

Mr. Pierce: They do.

Commissioner Harlan: For whom else do you haul logs?

Mr. Pierce: Several parties.

Commissioner Harlan: Who have mills?

Mr. Pierce: Mills not on our lines, but mostly on the Iron Mountain.

Commissioner Harlan: The mill of the Louis Werner Saw
1369 Mill Company is at Griffen?

Mr. Pierce: At Griffen.

Commissioner Harlan: And these other mills are where?

Mr. Pierce: They are located at various points.

Commissioner Harlan: On the Iron Mountain?

Mr. Pierce: On the Iron Mountain.

Commissioner Harlan: North and south of Griffen?

Mr. Pierce: I believe these is only one I recall south; the others are all north.

Commissioner Harlan: How far south?

Mr. Pierce: Eighteen miles, located at El Dorado.

Commissioner Harlan: The others are north of Griffen, and what is the most distant one of those mills?

Mr. Pierce: I take it part of this tonnage goes to Newport, Arkansas, which I would judge was the most northerly of these points.

Commissioner Harlan: How far is that from Griffen?

Mr. Pierce: About 300 miles. It is only fair to state that most of this logging movement is hard woods, heavy logs.

Commissioner Harlan: Do the logging roads connected with the Griffen, Magnolia & Western run into any forests that belong to other people than the Louis Werner Saw Mill Company?

1370 Mr. Pierce: The Louis Werner Saw Mill Company owns but a very small percentage of the total acreage in that territory, and they run mostly into the holdings of other people.

Commissioner Harlan: What is the extent of the holdings of the Louis Werner Saw Mill Company?

Mr. Pierce: The percentage?

Commissioner Harlan: No, the extent of it, how many acres?

Mr. Pierce: 5,000 or 6,000 acres of timber, and land, fee simple.

Commissioner Harlan: What is the total tonnage which you move annually over that line? Take last year, for instance.

Mr. Pierce: 59,740 tons.

Commissioner Harlan: What part of that belonged to the Louis Werner Saw Mill Company and what part to others?

Mr. Pierce: I am unable to say. The tonnage runs about 55 to 65 per cent for the Louis Werner Saw Mill Company, and the balance for others.

Commissioner Harlan: And that is hauled to its mill at or near Griffen?

Mr. Pierce: The tonnage they have is taken to Griffen.

Commissioner Harlan: Is their mill on the Iron Mountain
1371 rails?

Mr. Pierce: The saw mill is not. The planing mill is.

Commissioner Harlan: So the manufactured lumber is loaded right out of the planing mill onto the Iron Mountain tracks?

Mr. Pierce: Both lines have loading tracks there.

(The witness here explained diagram to the Commissioner.)

Commissioner Harlan: This sketch which you have just examined seems to indicate that your saw mill is approached by two spur tracks. To whom do they belong?

Mr. Pierce: The Griffen, Magnolia & Western.

Commissioner Harlan: Both of them?

Mr. Pierce: Both of them.

Commissioner Harlan: This and that (indicating)?

Mr. Pierce: Yes, sir.

Commissioner Harlan: Do you know about what proportion of their lumber is shipped in the rough?

Mr. Pierce: This is an interior mill, and not to exceed five per cent moves in the rough.

Commissioner Harlan: Then the rough lumber is carried in some form over to the planing mill, which seems to be served by two tracks. Now, to whom do those tracks belong?

Mr. Pierce. The principal track belongs to the Iron Moun-
1372 tain; it is its passing track.

Commissioner Harlan: That is their main line?

Mr. Pierce: No, that is a passing track.

Commissioner Harlan: Then inside of that, and closer to the mill, is another track. That belongs to whom?

Mr. Pierce: That belongs to us.

Commissioner Harlan: To the railroad company?

Mr. Pierce: To the Griffen, Magnolia & Western.

Commissioner Harlan: And not to the mill?

Mr. Pierce: Not to the mill. It connects with that passing track.

Commissioner Harlan: And are both tracks used in shipping dressed lumber from the planing mill?

Mr. Pierce: No, only the Iron Mountain track.

Commissioner Harlan: I will put the general inquiry: On whose tracks do the cars stand that are loaded at the planing mill ordinarily?

Mr. Pierce: The Iron Mountain's tracks.

Commissioner Harlan: Is your own track ever used in carrying such shipments to destination?

Mr. Pierce: It is.

Commissioner Harlan: Just explain when your track is
1373 used, and when the Iron Mountain track is used, and why this different use is made of the two tracks.

Mr. Pierce: It is a matter of convenience in handling the mill people's business; if we can spot a car for them and the Iron Mountain's service is not there at the time, and we can spot it to advance their interests, we do it.

Commissioner Harlan: Is there any distinction made under published tariffs or division sheets in the compensation that your company receives?

Mr. Pierce: None at all.

Commissioner Harlan: What is the lowest and what is the highest division you get?

Mr. Pierce: We get from two to five cents on the business off this road.

Commissioner Harlan: Is it not two and a half to five cents?

Mr. Pierce: No it is from two to five cents.

Commissioner Harlan: And it is substantially the same sort of a rate which you described a few minutes ago in connection with another line?

Mr. Pierce: It is.

Commissioner Harlan: It is a milling in transit rate?

Mr. Pierce: Yes, sir, it is on this business or on any other
1374 business of this character.

Commissioner Harlan: On the business of the Werner Saw Mill Company it is that kind of a rate?

Mr. Pierce: It is.

Commissioner Harlan: That is to say, you haul the logs from your junction with the tram line to the mill and then the dressed lumber goes out on a milling in transit rate which extends back as a lumber rate to the junction with your tram line?

Mr. Pierce: Yes, sir.

Commissioner Harlan: And you get divisions for the whole service you perform in that connection?

Mr. Pierce: We do.

Commissioner Harlan: But in this case, as in the other, your road does not haul ordinarily any dressed lumber; it sometimes does from the switch track——

Mr. Pierce: We do not haul any dressed lumber of the Griffen Mill Company.

Commissioner Harlan: Yes, I am limiting my inquiry now to the Werner Saw Mill Company.

Mr. Pierce: Yes, that is correct. The Griffen Mill Company is a trade name used locally there.

1375 Commissioner Harlan: There is no Griffen Mill Company as a corporation?

Mr. Pierce: No.

Commissioner Harlan: But that trade name is used to indicate the product of the Werner Saw Mill Company?

Mr. Pierce: That trade name is used to indicate the property of the Louis Werner Saw Mill Company at this point.

Commissioner Harlan: But the lumber is not sold as the Griffen Company's lumber?

Mr. Pierce: No.

Commissioner Harlan: It is sold as the Werner Company's lumber?

Mr. Pierce: Yes.

Commissioner Harlan: And as I said a moment ago, you perform no service on the dressed lumber, except occasionally when

565

as a matter of convenience you set an empty car at the mill over this little spur track you have described?

Mr. Pierce: Yes, sir. We perform no service on the lumber after it is dressed. We have performed our service prior to that.

Commissioner Harlan: On the logs?

Mr. Pierce: Yes.

1376 Commissioner Harlan: Do you haul any dressed lumber for anyone else?

Mr. Pierce: We do.

Commissioner Harlan: State who these people are out in the woods that hand you logs on these tram roads.

Mr. Pierce: S. Stone, John Ray—do you class bolts as logs?

Commissioner Harlan: Yes.

Mr. Pierce: W. T. Flournoy.

Commissioner Harlan: They hand you what?

Mr. Pierce: Logs, bolts and staves; F. L. Graham, G. J. Childs and J. A. Flournoy.

Commissioner Harlan: Well, in all, how many are there?

Mr. Pierce: I presume there are 25 of those shippers there.

Commissioner Harlan: And do they get the logs from their own forests?

Mr. Pierce: They get the logs from the purchasers: they buy it from the settlers.

Commissioner Harlan: They do not buy from the Werner Saw Mill Company?

Mr. Pierce: They do not.

Commissioner Harlan: Do you make a charge to them——

1377 Mr. Pierce: Pardon me; when we have a class of logs they want on a piece of ground of ours, we sell it to them, but of course that is only a very small amount of traffic.

Commissioner Harlan: Do you make a separate charge to those men for hauling their logs and bolts to the junction point of your line with the tram line, or do you make the charge clear through to their mill?

Mr. Pierce: We charge through to where this traffic moves, to points to which we have through rates we apply the through rate; otherwise we apply the local Arkansas distance tariff.

Commissioner Harlan: Do you quite get my point? I assume in this case, as in the case of the other railroad, that you built the tram roads; they do not belong to the lumber company, do they?

Mr. Pierce: No.

Commissioner Harlan: You supply the rails and you pay the labor for putting down the tram roads. Now, in the other case you made a separate charge for hauling the logs from the woods to the junction of the train lines with your main line. Do you make such a charge in this case against the Werner Saw Mill Company?

1378 Mr. Pierce: We do.

Commissioner Harlan: What is that charge?

Mr. Pierce: $1.50 per thousand feet.

Commissioner Harlan: As in the other case?

Mr. Pierce: As in the other case.

Commissioner Harlan: What charge, if any separate charge, is made against these other people whose logs you haul over the same tram lines to their junctions with your main line?

Mr. Pierce: Where it is a case of milling on our own road, we would make the same charge we did with the Louis Werner Saw Mill Company; where it moves out intact onto another line, we treat it as though it were a local shipment.

Commissioner Harlan: Of logs or bolts, as the case may be?

Mr. Pierce: Yes, sir, applying the local distance tariff to it.

Commissioner Harlan: So that those shippers pay a rate over all the mileage that they use belonging to your company, whether tram line or main line?

Mr. Pierce: Yes, sir.

Commisisoner Harlan: Do you deliver it to the Iron Mountain at Griffen?

Mr. Pierce: We do.

1379 Commissioner Harlan: And they carry it on to the mills?

Mr. Pierce: Yes, sir.

Commissioner Harlan: You charge the local rate to Griffen?

Mr. Pierce: We do where we have not through rates and divisions. Where it moves on a through rate——

Commissioner Harlan: Are there any through rates on logs to these mills?

Mr. Pierce: I think not on logs. I do not recall any.

Commissioner Harlan: Are there any through lumber rates?

Mr. Pierce: There are.

Commisisoner Harlan: Can you give a typical point?

Mr. Pierce: Any basing point, Mississippi River crossings.

Commissioner Harlan: In that case what division do you get out of the through rate?

Mr. Pierce: On this particular traffic to the Mississippi River crossings?

Commissioner Harlan: Yes.

Mr. Pierce: Four cents.

Commissioner Harlan: Then those through rates on lumber extend back to the southern terminus of your tram lines?

Mr. Pierce: They do.

Commissioner Harlan: And these logs move over your
1380 tram lines and their main line to Griffen, and there are handed to the Iron Mountain and transported to the mill point and there are milled, and then on to the Mississippi River on the through rate?

Mr. Pierce: I do not know whether the logs stop at the milling in transit at those milling points, or how the Iron Mountain handles that. We collect the revenue due us in a junction settlement at Griffen, and then turn the business over to the Iron Mountain, and how they handle it I am not prepared to say.

Commissioner Harlan: Is that four cents in all cases, or is it less?

Mr. Pierce: I am speaking then of a division of the through rate.

Commissioner Harlan: Yes, to the Mississippi River.

Mr. Pierce: Now, the local distance tariff is the local Arkansas court tariff, and varies.

Commissioner Harlan: What does that give you?

Mr. Pierce: Practicaly four to five cents.

Commissioner Harlan: So that your division in that case is less than your local?

Mr. Pierce: Yes, sir.

1381 Commissioner Harlan: What is the lowest division you receive on through shipments for these other people?

Mr. Pierce: Two cents per 100 pounds.

Commissioner Harlan: The divisions are the same on their logs as on the logs of the Werner Saw Mill Company?

Mr. Pierce: The divisions are the same.

Commissioner Harlan: Do you carry any other stuff, farming produce or cotton?

Mr. Pierce: We carry general freight of all kinds.

Commissioner Harlan: What was the extent of that last year?

Mr. Pierce: 42 tons of merchandise and 200 tones of products of agriculture, and various forms of lumber tonnage and forest products other than lumber, 37,720 tons.

Commissioner Harlan: Let this map be marked as an exhibit.

(The map so offered and identified was received in evidence and thereupon marked Griffen, Magnolia & Western Railroad Exhibit No. 1, witness Pierce, received in evidence December 13, 1910, and is attached hereto.)

Commissioner Harlan: Mr. Pierce, the mill of the Werner Saw Mill Company is on the other side of the Iron Mountain tracks, is it not?

1382 Mr. Pierce: From the side on which we approach them with our main line, it is.

Commissioner Harlan: Do you know whether any other mills whose logs go over your line actualy have the benefit of milling in transit rates?

Mr. Pierce: I am not advised at all, Mr. Commissioner, as to how the Iron Mountain handles the business beyond our rails.

Commissioner Harlan: Is it not your understanding that they do not have that advantage and have to move on the local rate?

Mr. Pierce: I know absolutely nothing of it.

Commisioner Harlan: Is there anyone here that does know about that; any other officer of your road here?

Mr. Pierce: No other officer of our road here who would know anything about it.

Commissioner Harlan: Mr. Jeffery, are you an officer of this Griffen, Magnolia & Western Company?

Mr. Jeffery: No, sir; I have not the honor. I am not an officer of any railroad. But our traffic man has just left the room, and I will get him up here, and if there is anything we can enlighten you on, we would be very glad to do it.

1383 Commissioner Harlan: We would like to know, then, if it is not a fact that these other mills have to move their logs on the local rate.

Mr. Jeffery: From this particular tap line?

Commissioner Harlan: Yes.

Mr. Jeffery: I will get Mr. Perkins up here.

Mr. Cowan: If I understand right, the witness states where that moves on the through rate they get a division of the rate from the Iron Mountain, and where it moves on a local rate, of course he collects the local rate. The question as to what traffic of logs he moves on other than the local rate for these other people going beyond Griffen would illustrate whether it may move on a milling in transit rate.

Commissioner Harlan: What do you say to that suggestion?

Mr. Pierce: Really, I did not just get the drift of Judge Cowan's query.

Commissioner Harlan: Just let me put it in another way. Do you not collect from two to four cents from those shippers right at Griffen?

Mr. Pierce: Station settlements?

Commissioner Harlan: Station settlements.

Mr. Pierce: No, we do not collect it from the shipper.

1384 We collect it from the Iron Mountain as advance charges.

Commissioner Harlan: That is, when it goes through as a through shipment. I am now talking about the cases where you get the Arkansas tariff.

Mr. Pierce: That is only where it is local. Where it moves as a through shipment, it is settled as an inter-line account through my office. We take a car of logs—to make a concrete illustration of it, from a station on our line, moving to a mill on the Iron Mountain, we haul these logs up to Griffen, turn them over to the Iron Mountain and bill on the Iron Mountain for our charges, and at stated intervals we settle with them in station accounts for our charges on that load of logs, and we have nothing further to do with that load of logs. They take it to the milling point. When it is milled, and how they handle it beyond there, I do not know.

Commissioner Harlan: Where is it billed, what is the ordinary way bill on those logs?

Mr. Pierce: Way billed to our station at Griffen to the conductor.

Commissioner Harlan: Do you not issue bills of lading?

Mr. Pierce: We do issue a bill of lading for that, by the conductor.

1385 Commissioner Harlan: Only up to Griffen?

Mr. Pierce: Only up to Griffen.

Commissioner Harlan: It is not a through bill?

Mr. Pierce: It is not a through bill.

Commissioner Harlan: Then you must charge the Arkansas local tariff.

Mr. Pierce: Arkansas distance tariff is charged on it.

Commissioner Harlan: Is it not a fact that most of the logs for

those other companies move in that way on the local tariff to Griffen?

Mr. Pierce: The most of them do.

Commissioner Harlan: So they pay the local rates, while the Werner Saw Mill Company pays on the bulk of its shipments, the through rate?

Mr. Pierce: Yes, that is true.

Commissioner Harlan: Now, is it not also true that you are frequently requested, and when I say "you" I mean the Werner Saw Mill Company, to fill orders received by these other companies for lumber?

Mr. Pierce: Received by these other companies for lumber?

Commissioner Harlan: Yes.

Mr. Pierce: No.

1386 Commissioner Harlan: Has not that ever happened?

Mr. Pierce: I am not thoroughly familiar with the details, but I do not recollect of ever hearing of an instance of that character.

Commissioner Harlan: You do not remember, then, within the last year any such instances where these other lumber people received orders and you filled them? I mean by you, the Werner Saw Mill Company.

Mr. Pierce: I do not get the drift of that, Mr. Commissioner. Do you mean the other shippers on our line received orders for lumber?

Commissioner Harlan: Yes, and asked you to fill them.

Mr. Pierce: And asked us to fill them?

Commissioner Harlan: Yes.

Mr. Pierce: I do not. This logging movement is of a character of logs that the Werner Company, the shipper at Griffen, does not handle as a rule at all.

Commisisoner Harlan: Do you know something about the past history of the Werner Saw Mill Company?

Mr. Pierce: I do.

Commissioner Harlan: Did it not at one time own a road, or its stockholders own a road called the Little Rock & Monroe?

1387 Mr. Pierce: It did not.

Commissioner Harlan: Who did own that road?

Mr. Pierce: The Little Rock & Monroe Railroad Company.

Commissioner Harlan: I mean what stockholders.

Mr. Pierce: I only know two or three of the stockholders.

Commissioner Harlan: Was it not owned by people who were interested, then or now, in the Louis Werner Saw Mill Company?

Mr. Pierce: No, sir.

Commissioner Harlan: Was it owned by people interested in any other saw mill company?

Mr. Pierce: Yes, sir.

Commissioner Harlan: What saw mill company?

Mr. Pierce: The Union Saw Mill Company was one.

Commissioner Harlan: Where were its operations?

Mr. Pierce: The plant is located at Huttig, Arkansas.

Commissioner Harlan: What were the total gross earnings last year of this company?

Mr. Pierce: $29,618.36.

Commissioner Harlan: What was its net?

Mr. Pierce: $1,746.10.

Commissioner Harlan: I want to put my inquiry in another form; the one I put to you a few minutes ago. Is it not true
1388 that the Werner Saw Mill Company often fills requisitions from neighoring mills for lumber?

Mr. Pierce: No, that is not the case. The Werner Saw Mill Company is a constant solicitor of business in the lumber markets throughout the country, and is a manufacturing concern, and has very little interchange business with any of its neighbors.

Commissioner Harlan: Do not the other companies turn over orders to that company that they cannot fill at the price offered; has not that frequently happened?

Mr. Pierce: It has not, to the best of my knowledge. If the Commissioner will kindly tell me what it is that is wanted, I will endeavor to answer.

Commissioner Harlan: I think the questions themselves indicate.

Mr. Pierce: If there is something improper——

Commissioner Harlan: Well, I have not indicated any impropriety except the taking advantage of the opportunities. You say no such opportunities come to you, no such requisitions are made on this Werner Saw Mill Company?

Mr. Pierce: So far as I know, there is practically no interchange business between that company and its neighbors.

1389 Commissioner Harlan: Have you some questions, Mr. Brown?

Mr. Brown: Does the Griffen, Magnolia & Western Railroad serve the town of Mount Holly?

Mr. Pierce: It does.

Mr. Brown: Does any other railroad serve that community?

Mr. Pierce: No.

Mr. Brown: Do you have any division with the Iron Mountain or are you a party to any joint tariffs on the classes? Class freight?

Mr. Pierce: We have not.

Mr. Brown: Your divisions are confined to the lumber and lumber products?

Mr. Pierce: They are.

Mr. Brown: In connection with the Griffen, Magnolia & Western?

Mr. Pierce: Yes, sir; class and commodity rates are all made on the Arkansas distance tariff.

1390 Mr. Brown: Your equipment is equipped as required by the Federal Safety Appliance Act?

Mr. Pierce: To the best of our ability it is.

Mr. Brown: Do you move your traffic under the usual uniform bill of lading?

Mr. Pierce: Yes, sir.

Mr. Brown: Issued by the Griffen, Magnolia & Western Railroad?
Mr. Pierce: We do.
Mr. Brown: You make your monthly and annual reports and accident reports to the Commission?
Mr. Pierce: We do.
Mr. Brown: I believe you gave the percentage of outside business moved over this road?
Mr. Pierce: I did.
Mr. Brown: What stations have you on the road west of the crossing of the Iron Mountain tracks?
Mr. Pierce: Lisbon and Graham.
Mr. Brown: Are those your billing stations?
Mr. Pierce: We bill from both stations.
Mr. Brown: And on the traffic on which you enjoy a division of the rates, the traffic is billed from either Graham or Lisbon?
1391 Mr. Pierce: We usually use Lisbon as a billing point.
Mr. Brown: That is all.
Mr. Cowan: Where is the billing made out, at these stations you speak of or at some central point?
Mr. Pierce: Billing is made out at Griffen.
Mr. Cowan: Have you depots and station agents at these points?
Mr. Pierce: No, we have warehouses.
Mr. Cowan: Are they stations or just places to receive freight on a side track?
Mr. Pierce: We have nothing there but a small warehouse for taking care of packages. It meets all the requirements, however, of the traffic.
Mr. Cowan: There are some other roads with which you are connected that you are going to testify about?
Mr. Pierce: There are.
Mr. Cowan: After you get through with all of them I want to examine the witness.
Commissioner Harlan: Is it not true that the combination of local rates that these people pay and have to pay under the published tariffs exceeds the through rate paid by the Werner Saw Mill Company to the same destination? It must necessarily be so,
1392 must it not?
Mr. Pierce: No, sir, the combination rate applies only to such points as we have not any through rates to. If the Werner Saw Mill Company is making shipments of that character, exactly the same rates would apply to them. There is no disposition to prefer anybody on this road.
Commissioner Harlan: But the Werner Saw Mill Company gets the milling and transit privilege quite generally, does it not?
Mr. Pierce: It gets the milling and transit privilege quite generally, and any one else can have the milling and transit privilege who desires to avail himself of it.
Commissioner Harlan: Well, as a matter of fact, you have said yourself, the other people in the great majority of cases pay the combination of locals?

Mr. Pierce: They do because their shipments are moving to points where there are no through rates and division in.

Commissioner Harlan: Very well. They move to those points in competition with your lumber or lumber of this saw mill company?

Mr. Pierce: Those movements do not compete with the Louis Werner Saw Mill Company.

1393 Commissioner Harlan: That was my inquiry. Are they in a position to compete?

Mr. Pierce: No, they do not compete; it is not the same commodity, it is not the same character of material.

Commissioner Harlan: Tell us about that. That may be important.

Mr. Pierce: The Louis Werner Saw Mill Company is engaged in the manufacture of pine lumber. The logs and material of that character moving off our road onto the Iron Mountain for milling on the Iron Mountain are exclusively, I might say, hard woods, that go into assembling plants on the Iron Mountain, and there is no more relation between them than there is between railroad steel and structural steel.

Commissioner Harlan: Then you do not move pine for anyone else but the Louis Werner Company?

Mr. Pierce: We move manufactured pine for several other parties, but that is manufactured pine moving on the through rates.

Commissioner Harlan: Where do you get that, at what point on your line?

Mr. Pierce: At Graham and at Lisbon.

Commissioner Harlan: In what quantity?

1394 Mr. Pierce: Oh, the movement sometimes will run forty cars a month and sometimes down to nothing.

Commissioner Harlan: From what mills, are they on your line?

Mr. Pierce: They are close to it, practically on the line; they haul the stuff in.

Commissioner Harlan: Is that pine which comes from the forests of the Werner Saw Mill Company?

Mr. Pierce: No.

Commissioner Harlan: Those people get the benefit of through rates, do they?

Mr. Pierce: They get the benefit of the through rate.

Commissioner Harlan: And they mill at their own mills?

Mr. Pierce: And they mill at their own mills.

Commissioner Harlan: You are not authorized to speak for the Lester & Ouachita Valley?

Mr. Pierce: I am not.

Commissioner Harlan: But you can speak for the Natchez, Ball & Shreveport?

Mr. Pierce: Yes.

Mr. Jeffery: I have Mr. Perkins here now, if you would like to question him about that tariff.

1395 Commissioner Harlan: Well, the witness has thrown some light on that question. I may ask Mr. Perkins later, Mr. Jeffery.

When was that company organized?

Mr. Brown: I will say that the information we have not received relates to that road so I do not know how much information Mr. Pierce will be able to give you of the details respecting that road.

Mr. Pierce: Mr. Commissioner, my knowledge of this road is confined almost entirely to its accounts; its connections and the information which we expected to get seems to have gotten lost by the express company. I am perfectly willing to go ahead and do the very best I can to inform the Commissioner.

Commissioner Harlan: There is no one else who can speak more definitely?

Mr. Brown: No.

Commissioner Harlan: Under those circumstances I do not think we will undertake to examine into that road with this witness, because it would not get us anywhere.

Mr. Cowan: I should think not.

Mr. Brown: We think Mr. Pierce can give you the general
1396 layout of the tracks there.

Commissioner Harlan: I think we will in some other way get the information about that. Have you any further inquiries to put to the witness?

Mr. Cowan: Does that constitute all the roads?

Mr. Brown: There is one other road.

Commissioner Harlan: The Saline Bayou Railroad. When was that road organized?

Mr. Pierce: June 2, 1905, is the date of their charter.

Commissioner Harlan: What is its authorized and issued capital?

Mr. Pierce: $30,000.

Commissioner Harlan: Has it any bonded indebtedness?

Mr. Pierce: It has none.

Commissioner Harlan: Are the officers of that road the officers also of the Oak Leaf Mill Company?

Mr. Pierce: The stockholders of that road are the stockholders of the Oak Leaf Mill Company.

Commissioner Harlan: But the two companies have different officers?

Mr. Pierce: Different officers.

Commissioner Harlan: And you are the auditor?

1397 Mr. Pierce: I am the auditor.

Commisioner Harlan: Do the officers of that road receive salaries?

Mr. Pierce: They do—I do.

Commissioner Harlan: Any others?

Mr. Pierce: I think not, that I know of.

Commissioner Harlan: What is the length of the road?

Mr. Pierce: About fourteen miles.

Commissioner Harlan: Standard gauge?

Mr. Pierce: Standard gauge.

Commissioner Harlan: What rails?

Mr. Pierce: 35 and 40 pound rails, third track.

Commissioner Harlan: How many locomotives?
Mr. Pierce: Two.
Commissioner Harlan: How many freight cars?
Mr. Pierce: The freight cars are logging cars. The business of freight is handled with equipment from foreign lines entirely.
Commissioner Harlan: The mill of the Oak Leaf Mill Company is at a point called Oak Leaf on the Iron Mountain, is it not?
Mr. Pierce: It is.
1398 Commissioner Harlan: How near to the tracks of the Iron Mountain is that built?
Mr. Pierce: The loading platform is right up against the tracks of the Iron Mountain and abuts on them.
Commissioner Harlan: So that the Iron Mountain sends the cars there and takes them away?
Mr. Pierce: Yes, sir.
Commissioner Harlan: Does that track belong to the Iron Mountain or to the mill company?
Mr. Pierce: It belongs to the mill company beyond their right of way.
Commissioner Harlan: It was constructed under some contract or agreement with the Iron Mountain?
Mr. Pierce: I am not prepared to say because I was not familiar with the making of this contract.

Commissioner Harlan: Let the map of this road be marked as an exhibit.
(The paper so offered and identified was received in evidence and thereupon marked Saline Bayou Railroad Exhibit No. 1, Witness Pierce, received in evidence December 13, 1910, and is attached hereto.)
Commissioner Harlan: Mr. Jeffery, we would like a copy
1399 also of the spur track agreement that you have with the Saline Bayou Railroad at Oak Leaf, probably with the Oak Leaf Mill Company.
Mr. Jeffery: All right.
Commissioner Harlan: I understand you to say, Mr. Pierce, that ordinarily the cars are spotted at the planing mill and taken away by the Iron Mountain?
Mr. Pierce: They are.
Commissioner Harlan: But occasionally your line does not work.
Mr. Pierce: Yes, in emergencies.
Commissioner Harlan: In emergency cases only?
Mr. Pierce: Yes.
Commissioner Harlan: Does that mill company ship out much undressed or rough lumber?
Mr. Pierce: Practically none.
Commissioner Harlan: What is the character of the lumber, is it pine or hard wood?
Mr. Pierce: Pine.
Commissioner Harlan: Has the Saline Bayou Railroad spur track connections?

Mr. Pierce: It has.

1400 Commissioner Harlan: Owned by it?

Mr. Pierce: Owned by it

Commissioner Harlan: Or by the lumber company?

Mr. Pierce: All owned by the railroad company?

Commissioner Harlan: And operated by it?

Mr. Pierce: And operated by it.

Commissioner Harlan: Do they make a separate charge for hauling over the tram tracks?

Mr. Pierce: They make a separate charge for the construction of these spurs and assembling of the logs.

Commissioner Harlan: And that is how much?

Mr. Pierce: $1.50 per thousand.

Commissioner Harlan: And that was the case with the last road that we considered, was it not?

Mr. Pierce: It was.

Commissioner Harlan: The lumber company has no locomotives of its own?

Mr. Pierce: None.

Commissioner Harlan: And no cars?

Mr. Pierce: No cars.

Commissioner Harlan: And who does the loading out at the end of the tram tracks?

1401 Mr. Pierce: We do it.

Commissioner Harlan: And you also do the unloading at the mill?

Mr. Pierce: We do the unloading at the mill.

Commissioner Harlan: And for the service of loading out in the woods and building these tram tracks for the haul on the tram tracks to their junctions with the main line you charge $1.50 a thousand?

Mr. Pierce: $1.50 per thousand feet of log.

Commissioner Harlan: What other source of revenue have you?

Mr. Pierce: The movement of the freight over our line, freight operations.

Commissioner Harlan: On logs what other revenue do you make?

Mr. Pierce: We have no other revenue on the logs.

Commissioner Harlan: Well you get divisions—

Mr. Pierce: Construing the movement of the logs from our stations on our main lines to destination as a lumber movement there is no other revenue from the logging department.

Commissioner Harlan: The so-called lumber movement under the milling and transit rates starts at the junction of the tram

1402 lines with the main line?

Mr. Pierce: It does.

Commissioner Harlan: And $1.50 takes care of all service up to that point?

Mr. Pierce: Up to that point.

Commissioner Harlan: Well your milling and transit arrangement on this road is substantially the arrangement you have just related in connection with the two other roads?

Mr. Pierce: It is.

Commissioner Harlan: And what are the lowest and highest divisions?

Mr. Pierce: One and one-half cents to four cents.

Commissioner Harlan: Do you know where the bulk of the shipments of that company go to?

Mr. Pierce: I could not state offhand.

Commissioner Harlan: Well, what is your average division on all shipments?

Mr. Pierce: About three cents.

Commissioner Harlan: Do you haul the logs of any other milling company over that line or its tram connections?

Mr. Pierce: We do not. We handle the hard wood logs over the line for companies other than our own.

1403 Commissioner Harlan: What is the extent of that movement.

Mr. Pierce: Small, probably six per cent. of our road movement is from outside business.

Commissioner Harlan: Do those logs come from land owned by the Oak Leaf Company?

Mr. Pierce: No.

Commissioner Harlan: Do you haul any general merchandise and farm products?

Mr. Pierce: We do.

Commissioner Harlan: To what extent?

Mr. Pierce: The extent is extremely small for the reason the country is very small and has not been developed.

Commissioner Harlan: Would you say as much as ninety-five per cent. of your tonnage was of the lumber company?

Mr. Pierce: Ninety-five per cent. of the tonnage is farm products arising from the business of the Oak Leaf Mill Company, and the other five per cent. is general business.

Commissioner Harlan: What was the total tonnage last year and the total revenues and net revenues?

Mr. Pierce: The total tonnage was 48,480 tons.

Commissioner Harlan: What was the outside tonnage, if

1404 that shows?

Mr. Pierce: I am unable to say. There was an operating deficit of $2,307.20.

Commissioner Harlan: Who supplies that deficit?

Mr. Pierce: The Oak Leaf Mill Company.

Commissioner Harlan: Has that railroad company accumulated a debt to the mill company?

Mr. Pierce: $2,312.22.

Commissioner Harlan: Is the accumulated debt today.

Mr. Pierce: Is the total amount of indebtedness.

Commissioner Harlan: I neglected to ask you whether the Griffen Magnolia & Western has any debt due to the Werner Lumber Company. Let me ask first whether it has paid any dividend?

Mr. Pierce: It has not. There is a debit balance of $6,097.45, accumulated indebtedness.

Commissioner Harlan: All owing to the lumber company?

Mr. Pierce: All owing to the lumber company.

Commissioner Harlan: You do not run any passenger trains on this line?

Mr. Pierce: We do not.

Commissioner Harlan: Or carry mail or express?

Mr. Pierce: We do not.

1405 Commissioner Harlan: Have your divisions been recently increased?

Mr. Pierce: They have not.

Commissioner Harlan: How long have you received as much as four cents on some shipments?

Mr. Pierce: For five years.

Commissioner Harlan: From our records the Examiner was informed that two cents per hundred miles was the highest division. That does not agree with your information.

Mr. Pierce: If he got his information from me he certainly must have misunderstood me.

Commissioner Harlan: Have you some questions?

Mr. Brown: This road is incorporated under the laws of Arkansas?

Mr. Pierce: It is.

Commissioner Harlan: Do you report to the railroad Commission and pay taxes to the Commission as a railroad corporation?

Mr. Pierce: We do.

Mr. Brown: How about the Griffen, Magnolia & Western? I forgot *ab* ask you about the taxes. Under the laws of what state is that railroad incorporated?

1406 Mr. Pierce: Arkansas.

Mr. Brown: Does that railroad report to the State Commission and pay taxes as a railroad corporation?

Mr. Pierce: It does.

Mr. Brown: With respect to the Saline Bayou road, do you keep your accounts and make your reports to the Interstate Commerce Commission the same as with the other roads?

Mr. Pierce: We do.

Mr. Brown: I think that is all.

Commissioner Harlan: Is this a railroad or railway, under its terms?

Mr. Pierce: I think it is a railroad—railway is the name apparently.

Mr. Cowan: Did you say that you had no interest in any of the lumber companies?

Mr. Pierce: I said I had no interest in the Enterprise Lumber Company.

Mr. Cowan: Well, I judged from your familiarity with this subject that you have some sort of relation to some of the lumber companies, and I thought you said you had no interest in any of them. I may have misunderstood you.

Mr. Pierce: I am not an employee in any lumber company.

1407 Mr. Cowan: In what lumber companies are you interested?

Mr. Pierce: I am interested in the Lester Mill Company, the Oak Leaf Mill Company, and Louis Werner Saw Mill Company.

Mr. Cowan: Is that all?
Mr. Pierce: I do not recall any others now.
Mr. Cowan: All those companies have an agency or at least some of them have an agency in the same office you are in in St. Louis?
Mr. Pierce: Yes, sir.
Mr. Cowan: You are the auditor of each one of those railroad companies?
Mr. Pierce: I am.
Mr. Cowan: And also of the one about which you did not testify?
Mr. Pierce: I am.
Mr. Cowan: Each of these companies keeps its books, however, at the local point where they have their office, at the lumber company's plant.
Mr. Pierce: They do.
Mr. Cowan: Do you actually keep a set of books at St. Louis or do you simply get them from the local office, for the railroad company, I am talking about.
1408 Mr. Pierce: We keep all the records that are necessary for the handling of my end of the accounts at St. Louis.
Mr. Cowan: What end of the accounts do you handle?
Mr. Pierce: Interline accounts with connecting lines.
Mr. Cowan: You do not handle any of the accounts of the railroad company as between itself and its employees and as between itself and the lumber company, in the operation of the road?
Mr. Pierce: I do not.
Mr. Cowan: That is done at the local office of each one of the railroad companies?
Mr. Pierce: Yes, sir.
Mr. Cowan: And that is at the lumber company's office in each case?
Mr. Pierce: Yes, sir.
Mr. Cowan: I will group them together to save time.
Mr. Pierce: Yes.
Mr. Cowan: The arrangement is substantially the same as to each one of them, so far as your part of it is concerned and your relation to the local office of each railroad company?
Mr. Pierce: I think so.
1409 Mr. Cowan: The amount that each one charges the lumber company which it serves is on the same basis for service.
Mr. Pierce: I think so.
Mr. Cowan: And the amount of the division that is received from the Iron Mountain railroad is upon the same basis exactly, wherever the destination is the same, or at least I assume that is so.
Mr. Pierce: No, that is a mistake. It varies somewhat.
Mr. Cowan: The manner however of handling the interline accounts, which you handle, is the same respecting each company?
Mr. Pierce: It is.
Mr. Cowan: The accounts which come into your hands as auditor are the funds arising from settlements with the Iron Mountain railroad?
Mr. Pierce: They are.

Mr. Cowan: If I recall correctly your mills are all situated on the Iron Mountain.

Mr. Pierce: The Iron Mountain does not make all the settlements however; that is not material, however.

Mr. Cowan: You might explain that. Where it moves off the Iron Mountain onto some other line?

1410 Mr. Pierce: It may move onto other lines and we have settlements with other roads.

Mr. Cowan: You do not connect with any other railroad companies than the Iron Mountain except in the case of the T. & P. at Alexandria?

Mr. Pierce: We have connections with other roads but not joint rates and divisions with any of them.

Mr. Cowan: As I understood all these saw mills were located on the Iron Mountain road and there was no other road at the point of junction except the T. & P. at Alexandria?

Mr. Pierce: There are other lines with which we connect, but we do not interchange business with them.

Mr. Cowan: Which one of these other roads connect with other lines?

Mr. Pierce: Well the Enterprise road connects with other lines at Alexandria. The Natchez, Ball & Shreveport connects with the L. & A., and the Saline Bayou connects with the Memphis, Dallas & Gulf.

Mr. Cowan: But you confine your business to the Iron Mountain?

Mr. Pierce: We confine our business to the Iron Mountain.

Mr. Cowan: Your connection with the lumber company,

1411 are you interested in the Werner Company?

Mr. Pierce: I am.

Mr. Cowan: And its office is at St. Louis in the same office you are in?

Mr. Pierce: It is.

Mr. Cowan: Are you an officer of the company?

Mr. Pierce: I am.

Mr. Cowan: What position?

Mr. Pierce: The very humble one of vice-president, which does not amount to much as a rule.

Commissioner Harlan: Do you get a salary as vice-president?

Mr. Pierce: I do not.

Mr. Cowan: You represent the company in business transactions?

Mr. Pierce: Only in an advisory capacity.

Mr. Cowan: Without desiring to go into your private business, are you pretty largely interested in the Werner Company?

Mr. Pierce: I own some of the stock.

Mr. Cowan: A substantial interest in the business I assume?

Mr. Pierce: I would say yes.

1412 Mr. Cowan: In what other lumber company are you an officer?

Mr. Pierce: I am an officer of the Lester Mill Company.

Mr. Cowan: What office is that?

Mr. Pierce: Vice-president again.

Mr. Cowan: And you own a substantial interest in that concern?
Mr. Pierce: I do.
Commissioner Harlan: Are you vice-president without emoluments?
Mr. Pierce: Without emoluments.
Mr. Cowan: You may just tell us about the others without my questioning.
Mr. Pierce: I am also connected with the Oak Leaf Mill Company.
Mr. Cowan: And you own a substantial interest in that?
Mr. Pierce: Yes, sir.
Mr. Cowan: Vice-president of that on the same salary?
Mr. Pierce: I am president of the Oak Leaf Company.
Mr. Cowan: And you received a salary as president, of course?
Mr. Pierce: I do not.
Mr. Cowan: Those are all the mill companies you are in-
1413 terested in?
Mr. Pierce: Those are all the mill companies of which I am an officer.
Mr. Cowan: What others are you interested in?
Mr. Pierce: I have some mill interests in Mississippi.
Mr. Cowan: But not in the mills that are connected with these roads you have been testifying about?
Mr. Pierce: Not any connection with these roads.
Mr. Cowan: Do all of these mills have a sales agent or some other agent in this office building where you have your office?
Mr. Pierce: They do, except the Lester Mill Company; they have no sales agent there.
Commissioner Harlan: All of these companies interchange transportation with other lines?
Mr. Pierce: Yes, sir.
Commissioner Harlan: The Iron Mountain?
Mr. Pierce: Yes, sir.
Commissioner Harlan: And that transportation is used, is it not?
Mr. Pierce: Well, the transportation, Mr. Commissioner, is only
requested for myself and one officer, the superintendent of the
1414 road. We use it, of course.
Commissioner Harlan: Have you transportation over other lines than the Iron Mountain?
Mr. Pierce: I have.
Commissioner Harlan: In general, how many roads send you transportation?
Mr. Pierce: Four or five. I make no practice of requesting it of any great number.
Mr. Cowan: What service do you perform for each of these lumber companies for which you are vice-president, and what service do you perform for the one you are president of?
Mr. Pierce: Practically none; merely in an advisory capacity.
Mr. Cowan: Are you connected with the management of the business?
Mr. Pierce: No, I am not.
Mr. Cowan: Just in an advisory capacity. Of course I do not

know, you can explain what that means. I don't know exactly what you had in mind. Is that advice with respect to the management of the business in each of the companies?

Mr. Pierce: It would be advice as to the policy of the company in any direction.

1415 Mr. Cowan: Financial operations?

Mr. Pierce: Financial operations, purchase of timber, extensions of investments in any direction.

Mr. Cowan: And in the extension of your trade in various directions?

Mr. Pierce: Yes, sir; anything to advance the general interest.

Mr. Cowan: And that would include of course the selling——

Mr. Pierce: Well, that is a detail with which I am not familiar.

Mr. Cowan. Your companies, I will call them for the sake of shortening up the language, sell extensively in Texas, Oklahoma, and Kansas?

Mr. Pierce: They do not.

Mr. Cowan: Why?

Mr. Pierce: I presume because it is they have not solicited the trade in that territory.

Mr. Cowan: Where does the principal output go?

Mr. Pierce: From the Alleghany Mountains to Denver, from St. Louis to Duluth; it is mostly sent to Central Freight Association and trans-Mississippi territory.

Mr. Cowan: You do sell, I presume, some lumber in Okla-

1416 homa and some in Kansas?

Mr. Pierce: I do not recall any special movement to those territories. Some in Kansas, yes. We have quite a fair movement to Kansas, and a little movement to Texas and Oklahoma.

Mr. Cowan: On your Denver Business, can you state what division you get?

Mr. Pierce: We get five cents on Denver business.

Mr. Jeffery: What is the rate to Denver?

Mr. Pierce: Thirty-seven cents, the same to Pueblo.

Mr. Cowan: Do you sell railroad ties and timber to any of the railroads reaching Colorado common points like the Denver & Rio Grande for example?

Mr. Pierce: I do not know enough about the sales department to be able to answer that question. I do not recall any instance of that kind.

Commissioner Harlan: I understood you to say your highest division was four cents, from two to four cents; you now speak of a five cent division.

Mr. Pierce: I said five cents.

1417 Mr. Cowan: He said two to five cents. You do not receive any divisions in the local Arkansas business, I assume, from what has been testified to here; if you supply any trade, you do not have any divisions?

Mr. Pierce: We have no movement there.

Mr. Cowan. Of course you attempt to sell your lumber where you get the best divisions if you can get the right price for your lumber?

Mr. Pierce: I have nothing to do with that, as to where they attempt to sell it. I presume they attempt to sell it where they can get the best price.

Mr. Cowan: Being in an advisory capacity that is undoubtedly what you would advise?

Mr. Pierce: Well, I would not work against the interests of my own road, no.

Commissioner Harlan: When you travel do you look into the markets and see what the demands are and in that way direct the policy of any of these lumber companies and indicate where efforts should be made to dispose of the lumber, where they can find a market?

Mr. Pierce: I do no traveling on this subject.

Commissioner Harlan: No, but when you do travel I say, do you endeavor to look at the market conditions?

Mr. Pierce: I endeavor to have my mind closely on all
1418 the business with which I am connected, and I would gladly advise any one whom I found seeking lumber to place an order with the mills on our road.

Mr. Cowan: Do you have any divisions to points in Texas?

Mr. Pierce: We do.

Mr. Cowan: And what are those divisions?

Mr. Pierce: One cent.

Mr. Cowan: And it is the same as the State of Arkansas, there is no movement on that, I assume?

Mr. Pierce: Well, we have had no movement that I recall of any magnitude.

Mr. Cowan: You said in the case of Alexandria, in the Enterprise Lumber Company, 75 per cent you thought went over the Iron Mountain and then that you had no divisions with the T. & P., and I wondered what road took the other 25 per cent.

Mr. Pierce: The other moves out over the other lines, the T. & P. Southern Pacific and Rock Island.

Mr. Cowan: You ship some lumber then where you get no divisions at all, going to the T. & P., I believe you said you got no division with the T. & P.

Mr. Pierce: We get no division with the T. & P.

1419 Mr. Cowan: And I suppose therefore it takes very little of your business?

Mr. Pierce. I don't know what percentage is with them.

Mr. Cowan: Well, it does get divisions with some connections.

Mr. Pierce: I have nothing to do with it because I get no money from them.

Mr. Cowan: What divisions do you get from the Rock Island at Alexandria?

Mr. Pierce: Two to five cents.

Mr. Cowan: The same basis as the Iron Mountain?

Mr. Pierce: Yes, sir.

Mr. Cowan: But they do not carry the business into Texas on that division from that point?

Mr. Pierce: No.

Mr. Cowan: Taking all these saw mills together the same interests own the road in each case which own the mill in that particular case substantially?

Mr. Pierce: In each case, Judge, the people who own the largest shipper on each one of these lines are the people who own the road.

Mr. Cowan: And the roads were constructed for that
1420 industrial purpose you spoke of in case of the Enterprise Company?

Mr. Pierce: The roads were constructed under agreements with the trunk line with which they connected, to develop certain territory.

Mr. Cowan: And are there agreements with the Iron Mountain in each case?

Mr. Pierce: There are. Not in writing.

Commissioner Harlan: These agreements or understandings preceded the construction of the road or followed the construction?

Mr. Pierce: They preceded the construction of the road.

Commissioner Harlan: And were all verbal?

Mr. Pierce: And were all verbal.

Mr. Cowan: There is an inter-ownership relation in the interest in the saw mills by the stockholders in all these mills, that is the principal owners in every one of these mills are the principal owners in each one of the others, if I gather it right?

Mr. Pierce: No, that is incorrect. There is a separate set of stockholders for each one of these mills. Now the same set of
1421 stockholders are not directly interested in any two of these mills except in the case of the Oak Leaf and Louis Werner Saw Mill.

Mr. Cowan: I understood you were substantially in each one except the Enterprise?

Mr. Pierce: I am not interested in either the Enterprise or the Ball mill or the Pollock mill, but I am interested in the other three.

Mr. Cowan: What community of interests put this business together and you as the auditor of all these different roads? Of course somebody did that. What community of interests put these companies together and you as auditor to make settlements with the Iron Mountain?

Mr. Pierce: There is no community of interest, but simply for convenience of handling the business among ourselves.

Mr. Cowan: Then you as auditor of the railroad in each case know of course all of the transactions of each of the roads with the Iron Mountain?

Mr. Pierce: Yes, sir.

Mr. Cowan: And the owners of each lumber company know that you know these transactions?

Mr. Pierce: Yes, sir.

Mr. Cowan: And you control all of the matters of settlement?

1422 Mr. Pierce: Yes, sir.

Mr. Cowan: And who controls the direction of the traffic?

Mr. Pierce: The people who sell the lumber.

Mr. Cowan: What have you to do with the matter of directing and controlling the routing?

Mr. Pierce: Nothing at all.

Mr. Cowan: Who does that?

Mr. Pierce: Salesmen at the different mills.

Mr. Cowan: How many officers have these mills in the offices you keep, does each mill just have one man?

Mr. Pierce: In the office where I have my suite there are only two of these mills that are represented and they have there a general sales agent.

Mr. Cowan: All you are represented in are represented in an advisory capacity at least, which you occupy?

Mr. Pierce: Well, yes.

Mr. Cowan: Who is there then for you to advise with if the other mills haven't somebody there?

Mr. Pierce: The president of the company, bookkeepers, cashiers, treasurer, second vice-president.

Mr. Cowan: Are they located there?

Mr. Pierce: They are all located there.

1423 Commissioner Harlan: Let me put a question which will go to the point you are trying to arrive at in a little different form. Is there one dominating or predominating interest in all these companies?

Mr. Pierce: There is not.

Commissioner Harlan: Are there one or two men that are large stockholders in all the companies?

Mr. Pierce: There is not.

Mr. Cowan: I was leading up only to the point of finding out what is this Southern Pine—what is the name of that?

Mr. Jeffery: The Southern Pine System.

Mr. Cowan: Southern Pine System. I was just leading up to a final question to know how it came about there was such a thing known in this transaction as the Southern Pine System, and it seems for trade convenience and so forth.

Mr. Pierce: I have stated it was a trade name for convenience in handling all the business of these roads without handling all the names at once.

Mr. Cowan: So in your correspondence with the Iron Moun-

1424 tain no matter which one it is for, it is under the name of——

Mr. Pierce: The Southern Pine System.

Commissioner Harlan: It seems to be a system without any vertebræ.

Mr. Cowan: I think it has got pretty good vertebræ in Mr. Pierce.

Commissioner Harlan: I think Mr. Pierce has given us all the information he has on the question.

Mr. Jeffery: I notice in all these short line railroads you are auditor of they all have the same division. I suppose in the capacity of the auditor of the various roads you knew what the other roads were getting so you could get the same?

Mr. Pierce: Did you notice they were all the same?

Mr. Jeffery: The divisions are the same.

Mr. Pierce: You noticed they were all the same?

Mr. Jeffery: I understood so.

Mr. Pierce: You are sure you noticed that?

Mr. Jeffery: I thought I had, but I see I am mistaken, so I withdraw that.

Commissioner Harlan: There is just one question to which
1425 I wish to direct your attention before you leave the stand, and that is that although you know the affairs of these several railroad companies, and something of the affairs of these several lumber companies, you have only indicated one small going concern in all this region that hauls its logs to the mill and its lumber to the station. Now, before you get off the stand, do you know any others who are successfully operating under those conditions in competition with you and others who are getting divisions?

Mr. Pierce: Would the Commissioner permit me to take that under thought and hand in a memorandum later?

Commissioner Harlan: Yes, I think that is only fair.

Mr. Pierce: I would like to.

Commissioner Harlan: I think the record ought to show, it has a direct relation, Mr. Pierce, to my inquiry, that at this time you are not able, notwithstanding your familiarity with all these matters, to show more than one. But I think it is entirely fair for you to look into the matter.

Mr. Cowan: There is one question I want to ask about all the roads
1426 that I had asked about one or two, and that is, is it not a fact that the auditor who makes up these annual reports which you have before you for each of the railroad companies you are general auditor of, keeps his office in the lumber company's office and is an employee of the lumber company?

Mr. Pierce: He is an employee of the railroad company, Judge, but he has his office in the lumber company's office as a rule. I do not recollect now the exact circumstances with regard to each one of these cases.

1427 Mr. Cowan: Is he not also in each case the bookkeeper or auditor for the lumber company?

Mr. Pierce: He generally has joint duties.

Mr. Cowan: Is there an arrangement between the railroad company and the lumber company as to how much salary each one pays?

Mr. Pierce: I am not familiar with it, but I presume there is.

Mr. Cowan: That you do not handle?

Mr. Pierce: No.

Mr. Cowan: They agree or somebody agrees on the $300 a month they pay you as Auditor, and that is distributed equally between each railroad company?

Mr. Pierce: Yes, sir.

Mr. Jeffery: When was the last one of these roads built?

Mr. Pierce: The last one of these roads was—I do not know, Mr. Jeffery.

Mr. Jeffery: Was it not about 1904? Your attorney suggests that it was about that year. Was not that correct?

Mr. Pierce: Yes, sir, I would say that the Saline Bayou was the last road built.

1428 Mr. Jeffery: The Saline Bayou?

Mr. Pierce: Yes, sir.

Mr. Jeffery: You say they were built pursuant to a verbal understanding or verbal agreement, I suppose prior to the time of the building and completion. With whom were those agreements?

Mr. Pierce: Do you want me to go into the detail of the history of this matter, Mr. Jeffery?

Mr. Jeffery: No, I am just asking you to give the names of the parties with whom you had the understanding.

Mr. Pierce: The suggestion was originally brought to my attention by Col. Dean's office, of the Land Department, and the traffic arrangements were made with Mr. Lincoln, is my present recollection.

Mr. Jeffery: Mr. J. C. Lincoln?

Mr. Pierce: Yes, sir.

Mr. Jeffery: And there was no further negotiation—I mean when the contract was actually made, was it made with the Vice President or any higher official or with just the traffic official?

Mr. Pierce: With the traffic official. There was no contract in the sense of a written document.

1429 Mr. Jeffery: I understand, but you can have a verbal contract.

Mr. Pierce: It was an interchange of views between traffic officials.

Mr. Jeffery: And I suppose at that time they made an agreement with you to give you so much of a division if you gave them the business and built the roads, that was the substance of it.

Mr. Pierce: That was the substance of it.

Mr. Jeffery: And this was all prior to 1904?

Mr. Pierce: Yes, sir.

Mr. Brown: You stated in response to Mr. Jeffery's question that all these arrangements were made prior to the construction of any of these roads. Is that true of what is now the Griffen, Magnolia & Western?

Mr. Pierce: The road was commenced by another concern that met with misfortune.

Mr. Brown: You mean they failed financially?

Mr. Pierce: With which these people had nothing to do, that is what I mean. They met with financial misfortune.

Mr. Brown: What did your company do when you went
1430 into business there at Griffen, how much road had been constructed there at that time?

Mr. Pierce: About five miles of road been constructed there.

Mr. Brown: Was the road incorporated at that time?

Mr. Pierce: It was not.

Mr. Brown: Just what did your company do there?

Mr. Pierce: We extended this road, and we found that the mill

was pushing the road into a territory where there was a great deal of business which came to it outside of the logging business, and we found that we were performing the functions of a common carrier without being properly incorporated. Our attention was brought to this fact by a member of the Arkansas State Commission and it was suggested that if we wanted to act with propriety we would incorporate our property, and would commence to maintain the right relations toward the State and Federal Commissions. In this way the corporation was brought about.

Mr. Brown: Taking that road, have you ever had under consideration or have you now any plan for its extension?

Mr. Pierce: We have had and have now under consideration plans for its extension both east and west.

1431 Mr. Brown: To what point?

Mr. Pierce: Magnolia.

Mr. Brown: Not Hot Springs?

Mr. Pierce: No, not Hot Springs. I tried to say that soon enough so as to avoid all criticism. We were intending to reach Magnolia on the west, and either El Dorado or Champion on the east.

Mr. Brown: Has there ever been any serious negotiation looking to that extension?

Mr. Pierce: There has been serious negotiation looking to the extension in that——

Mr. Brown: When was that?

Mr. Pierce: In 1907, just before the panic. The town of Magnolia made us a very handsome offer to put our connection there, and the town of El Dorado also approached us on the subject and we were practically guaranteed a bonus and an assisting fund of $2,000 a mile in the construction of this road, but the panic of 1907 came on and we were unable to finance it. The conditions since that time with regard to lines of this character have been so chaotic there has been nothing further done with the matter.

Mr. Brown: Is it the purpose of this company in the nat-

1432 ural course of events to make these connections you speak of?

Mr. Pierce: We expect to be able to do so.

Mr. Brown: And extend to the towns you mentioned?

Mr. Pierce: Yes, sir, we expect to do so.

Mr. Brown: With respect to each of these roads there has been a good deal said about the lumber companies and mills at each of these points. In your opinion do each of these roads serve a public purpose and perform a public service independently of and without reference to these various mills?

Commissioner Harlan: I think that will not do. This witness has shown the facts. You can ask him what the facts are, and we have gone over that.

Mr. Brown: My only purpose is to develop whether there was any need for a railroad in the vicinity, if the mill was taken away. I think the witness ought to be permitted to state what the facts are about that.

Commissioner Harlan: He has already stated the facts. There is no objection to his answering that question.

Mr. Brown: Assuming the mills were taken away, is there any public need for the railroad concerning which you have testified this morning?

1433 Mr. Pierce: There is a public need for them.

Mr. Brown: Is that true of each one of them?

Mr. Pierce: It is true of each one of them in a varying degree.

Commissioner Harlan: Well, in the natural course of events and the development of the country through which these various roads run, would it increase and naturally increase the traffic——

Commissioner Harlan: That does not add to the value of the record. I think in all but one case there is a deficit shown with the lumber traffic at this time.

Mr. Brown: That is true of some trunk lines and yet they may serve a public purpose.

Commissioner Harlan: I do not know of any trunk line that does not pay the cost of operations. There may be one or two, but generally speaking there are not. I think the facts on that question are sufficiently in the record. You are leading the witness beyond Hot Springs to the Sunset, in what you are doing.

Mr. Brown: My purpose was to show whether there would be any traffic developed there out-side of the lumber business.

1434 Commissioner Harlan: Is there any traffic now or in the immediate future to pay the running expenses of these roads, if the lumber business is suspended?

Mr. Pierce: There is in connection with the Griffen, Magnolia & Western; if it was economically managed it would pay its own expenses independent of the business of the controlling interest.

Commissioner Harlan: Is that true of any other roads you have mentioned?

Mr. Pierce: I do not think it is true of any of the others yet.

Mr. Brown: Is there any prospects of development on these other roads?

Mr. Pierce: There is a prospect of it. We cannot develop unless we have facilities for transportation.

Mr. Brown: Are the character and amount of the products of the soil served by these various roads such as will bring traffic to the road when it is developed?

Mr. Pierce: Traffic is bound to be developed when the timber is taken off.

Mr. Brown: Do your various companies at all times accept all the freight traffic that is tendered to them and hold

1435 themselves as carriers for hire on all the traffic tendered to them for transportation?

Mr. Pierce: We do.

Mr. Brown: That is all.

Mr. Cowan: There is one question opened up or that seems to be opened up by Mr. Jeffery's inquiry, and that is when the arrangement was made with the Iron Mountain Railroad which he states was suggested by the land man, or Land Commissioner, I believe he said, that these lumber companies then proceeded to capitalize and provide the means for its development.

Mr. Pierce: You understand me, do you, correctly, that I said the investment in this particular mill property was suggested by the Land Department of the Iron Mountain?

Mr. Cowan: I thought you said——

Mr. Pierce: They did do so.

Mr. Cowan: And then you made the traffic arrangement with Mr. Lincoln.

Mr. Pierce: Yes, sir, afterwards.

Mr. Cowan: And that was before any of these railroads were built except a little part of the Griffen, Magnolia &
1436 Western?

Mr. Pierce: Well, this other property was also in a similar situation at that time.

Mr. Cowan: The present interests which own these railroads and sawmills made their arrangements for the financing of the transaction after the arrangement had been made with the railroad company which you have just spoken of?

Mr. Pierce: That is practically true.

Mr. Cowan: And the financing involved, of course, the railroad as well as the sawmill structures and timber lands and whatever else was necessary to the undertaking?

Mr. Pierce: The revenue came from the same source.

Mr. Cowan: That seems to be all.

(Witness excused.)

Mr. Jeffery: We have not gone into the question of the basis of divisions. Of course they are based on the distances and amounts charged. I assume that is in the record because in each case you have your own tariffs with the tap lines.

Commissioner Harlan: Yes.

1437 *Natchez, Urania & Ruston Railway.*

Q. T. HARDTNER, was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: Where do you reside?

Mr. Hardtner: Urania.

Commissioner Harlan: What is your position?

Mr. Hardtner: Auditor and General Freight Agent of the Natchez, Urania & Ruston.

Commissioner Harlan: When was that organized?

Mr. Hardtner: In 1899.

Commissioner Harlan: Under the laws of the State of Indiana?

Mr. Hardtner: And chartered in 1902, March 29th, 1902.

Commissioner Harlan: You draw a distinction between the organization of that company and its chartering?

Mr. Hardtner: Yes, sir.

Commissioner Harlan: Just what do you mean by that?

Mr. Hardtner: The charter was not made until 1902.

Commissioner Harlan: Was it a going concern as a railroad in 1899?

1438 Mr. Hardtner: It was.

Commissioner Harlan: Built by whom?

Mr. Hardtner: The Urania Lumber Company.

Commissioner Harlan: When you organized the railroad company in 1902 what was the authorized capital?

Mr. Hardtner: $100,000.

Commissioner Harlan: What has been paid in?

Mr. Hardtner: $50,000.

Commissioner Harlan: Have you any bonded indebtedness?

Mr. Hardtner: We have not.

Commissioner Harlan: How did the railroad company acquire title to the railroad and equipment?

Mr. Hardtner: By purchase from the Urania Lumber Company.

Commissioner Harlan: The payment was made by turning over this capital stock?

Mr. Hardtner: Yes, sir.

Commissioner Harlan: That included the title to the roadbed?

Mr. Hardtner: No, the right of way belonged to the Urania Lumber Company.

Commissioner Harlan: Then the railroad company ac-
1439 quired only the rails and the equipment?

Mr. Hardtner: Rails and the equipment.

Commissioner Harlan: And the ties?

Mr. Hardtner: Yes.

Commissioner Harlan: Was there any lease by the lumber company to the railroad company of the right of way?

Mr. Hardtner: Nominally so, yes, sir; a service is rendered.

Commissioner Harlan: Nothing in writing?

Mr. Hardtner: No.

Commissioner Harlan: Do you regard the Natchez, Urania & Ruston as a railroad company under the laws of the State of Louisiana?

Mr. Hardtner: We do.

Commissioner Harlan: Can a railroad under the laws of Louisiana be a railroad company without owning its right of way or having a definite lease for it?

Mr. Hardtner: I do not know.

Commissioner Harlan: Well, we will not go into that question. Who are the officers of the railroad company?

Mr. Hardtner: Henry E. Hardtner, President, A. J. Hardt-
1440 ner, Secretary and Treasurer, Q. T. Hardtner, Auditor and General Freight Agent.

Commissioner Harlan: Are they also officers of the Urania Lumber Company?

Mr. Hardtner: Yes.

Commissioner Harlan: And are the stockholders in the two companies substantially identical?

Mr. Hardtner: Substantially so.

Commissioner Hardtner: What is the length of the railroad?

Mr. Hardtner: About 14 miles; I do not know just exactly.

Commissioner Harlan: Standard gauge?

Mr. Hardtner: Standard gauge.
Commissioner Harlan: What rail?
Mr. Hardtner: 35 and 56 pound.
Commissioner Harlan: Where is your junction with the Iron Mountain?
Mr. Hardtner: Urania.
Commissioner Harlan: In the State of Louisiana?
Mr. Hardtner: Yes, sir.
Commissioner Harlan: Have you any station of your own at Urania?
Mr. Hardtner: We have not.
1441 Commissioner Harlan: Is the mill of the lumber company on the tracks of the Iron Mountain?
Mr. Hardtner: On the tracks of the Natchez, Urania & Ruston.
Commissioner Harlan: Does not the lumber yard go right up to the right of way of the Iron Mountain?
Mr. Hardtner: Part of it, yes, sir.
Commissioner Harlan: Where is the planing mill?
Mr. Hardtner: The planing mill is right at the mill. We have no regular planing mill. We saw timbers, and——
Commissioner Harlan: How far is the sawmill from the tracks of the Iron Mountain?
Mr. Hardtner: About 300 yards.
Commissioner Harlan: Does not the Iron Mountain spur reach right up to the mill?
Mr. Hardtner: Up to their right of way. I think it shows right on that map just where it is (indicating).
Commissioner Harlan: Before the railroad was organized did the Iron Mountain build a spur track into your mill?
Mr. Hardtner: The old mill, there was an old mill right on the Iron Mountain track, and the old mill has been torn down and a new mill built.
Commissioner Harlan: When was the new mill built?
1442 Mr. Hardtner: Latter part of 1900 or early in 1901.
Commissioner Harlan: Was it the transfer of the old mill to a new site?
Mr. Hardtner: No, we built a new mill.
Commissioner Harlan: And new machinery?
Mr. Hardtner: Yes, sir.
Mr. Cowan: What is the output of the mill?
Mr. Hardtner: About 80,000 a day, about 15,000,000 to 18,000,000 feet a year.
Mr. Cowan: Of pine lumber?
Mr. Hardtner: Pine.
Commissioner Harlan: What is the extent of the pine lands owned by the Urania Lumber Company?
Mr. Hardtner: They own about 30,000 acres at present.
Commissioner Harlan: Does that company own any tram lines that join with your line?
Mr. Hardtner: No.
Commissioner Harlan: Do you own any tram line?

Mr. Hardtner: The Natchez, Urania & Ruston own the spur tracks.

Commissioner Harlan: What is the mileage of those spur
1443 tracks?

Mr. Hardtner: Those spur tracks are very short; they are not over a quarter of a mile in length.

Commissioner Harlan: You own them, build them and operate them?

Mr. Hardtner: Yes.

Commissioner Harlan: And the lumber company has no locomotive?

Mr. Hardtner: No.

Commissioner Harlan: How many have you?

Mr. Hardtner: Two.

Commissioner Harlan: How many cars have you?

Mr. Hardtner: 25, I think.

Commissioner Harlan: The lumber company has none?

Mr. Hardtner: No.

Commissioner Harlan: Do you load the logs of the lumber company on to the cars?

Mr. Hardtner: We do.

Commissioner Harlan: And you unload them at the mill?

Mr. Hardtner: We do.

Commissioner Harlan: You haul them over these spur tracks to your main line?

1444 Mr. Hardtner: Yes, sir.

Commissioner Harlan: Do you make any special charge for that?

Mr. Hardtner: We charge $1.50 a thousand for loading and hauling the logs to the mainline, and also for keeping up the track.

Commissioner Harlan: Well, but that track is yours.

Mr. Hardtner: What is that?

Commissioner Harlan: That track is yours, it belongs to the railroad company.

Mr. Hardtner: Yes.

Commissioner Harlan: You do not charge them anything for keeping up the track which you own?

Mr. Hardtner: I say this $1.50 charge covers loading the logs and hauling out to the main line.

Commissioner Harlan: And unloading at the pond?

Mr. Hardtner: Yes—no, the main line crew unload at the pond.

Commissioner Harlan: From the junction of the main line with the logging lines, what charge do you make tc the lumber company?

1445 Mr. Hardtner: We do not make any.

Commissioner Harlan: You do not know that is a free service?

Mr. Hardtner: We get a division.

Commissioner Harlan: That is the through rate to destination on lumber extends back to what point?

Mr. Hardtner: Yes, sir; Hinton is the point.

Commissioner Harlan: Hinton is the junction on your line?

Mr. Hardtner: No, that is the shipping point.

Commissioner Harlan: That is the shipping point?

Mr. Hardtner: Yes, sir, in the woods; in fact it is the centre of the logging operations. Urania is the junction point with the Iron Mountain.

Commissioner Harlan: Yes, but is Hinton on the logging lines or on your main line?

Mr. Hardtner: It is on the main line.

Commissioner Harlan: Then it is the point where the logging lines join your main line?

Mr. Hardtner: Yes.

Commissioner Harlan: What is the lowest division you get to any destination on lumber from Hinton?

1446 Mr. Hardtner: Two cents.

Commissioner Harlan: And what is the highest?

Mr. Hardtner: Well, on one road we get four cents, there was one road in Oklahoma, but the principal division is three cents.

Commissioner Harlan: I do not quite understand that. What main lines do you join? Only the Iron Mountain.

Mr. Hardtner: Only the Iron Mountain, that is all.

Commissioner Harlan: And they give you two cents to some points, and you then said that one line gives you four cents to Oklahoma.

Mr. Hardtner: Our settlements come from the delivering line, our division settlements; for instance, if we ship to the Missouri, Oklahoma & Gulf, that is, if they deliver the lumber, the divisions come from that road.

Commissioner Harlan: Is that the road that gives you three cents?

Mr. Hardtner: Four cents.

Commissioner Harlan: And that is your highest division?

Mr. Hardtner: That is our highest division.

Commissioner Harlan: And your average division on all traffic is what?

1447 Mr. Hardtner: About two and a half cents.

Commissioner Harlan: Did you say how many acres of land the lumber company owns out there?

Mr. Hardtner: Yes, sir; about 30,000 acres.

Commissioner Harlan: Does anyone else own any out there?

Mr. Hardtner: Yes.

Commissioner Harlan: Do you haul out logs over the tram lines and on to your main line for any other lumber company?

Mr. Hardtner: No.

Commissioner Harlan: Well, how do these other people reach the Iron Mountain?

Mr. Hardtner: Well, they have not shipped any logs. They still own the land. It is farmers and settlers.

Commissioner Harlan: But they are not doing any logging operations?

Mr. Hardtner: Only stave bolts and ties.

Commissioner Harlan: That is all hardwood?

Mr. Hardtner: Hardwood, yes, sir.

Commissioner Harlan: Do they own pine woods also?
Mr. Hardtner: Yes.
Commissioner Harlan: But none of them are making any logs?
1448 Mr. Hardtner: No.
Commissioner Harlan: Why is that?
Mr. Hardtner: Well, I don't suppose they have enough to justify them putting up a mill. There was a small mill on the line, but it is now discontinued.
Commissioner Harlan: Whereabouts on your line was that mill?
Mr. Hardtner: It was about half way out to Hinton.
Commissioner Harlan: Was it right on your line?
Mr. Hardtner: Yes.
Commissioner Harlan: How long did it continue in operation?
Mr. Hardtner: Well, it was in operation when we built out there, I think. It was just the local business throughout the country, a small mill.
Commissioner Harlan: What was its output, do you remember?
Mr. Hardtner: I suppose about 1,000 to 2,000 feet a day.
Commissioner Harlan: Did it operate at any time after the railroad was organized in 1902, or had it ceased the operations before that time?
Mr. Hardtner: I don't really remember. It may have operated a short time after that.
Commissioner Harlan: Did the Urania Lumber Company get any divisions before the railroad company was organized?
1449 The railroad was there.
Mr. Hardtner: Yes.
Commissioner Harlan: And the lumber company operated the locomotives and cars for itself?
Mr. Hardtner: The Natchez, Urania & Ruston did.
Commissioner Harlan: And it took the logs to its mill, and then they were made into lumber and they got no allowance of any kind from the Iron Mountain?
Mr. Hardtner: No.
Commissioner Harlan: You did not commence to get any divisions or allowances until after the railroad company was organized?
Mr. Hardtner: No.
Commissioner Harlan: And I assume it was organized for that purpose, was it not?
Mr. Hardtner: No, it was organized primarily, of course, to haul logs.
Commissioner Harlan: But the railroad was built primarily to haul logs?
Mr. Hardtner: Yes.
Commissioner Harlan: And was there?
1450 Mr. Hardtner: Yes.
Commissioner Harlan: Now then there came a point in 1902 when you organized a railroad company. Why did you organize a railroad company?

Mr. Andrews: I think the witness misconstrues that. He does not understand that you mean chartered. He stated in the beginning that he organized back some time before the chartering.

Commissioner Harlan: I see. This is the question. You make a distinction between the word organized and the word charter?

Mr. Hardtner: Yes.

Commissioner Harlan: We do not want any misunderstanding. Now then you organized the railroad in the sense of building it in 1899?

Mr. Hardtner: Yes.

Commissioner Harlan: It was built by the lumber company?

Mr. Hardtner: Yes.

Commissioner Harlan: I understood you to say the lumber company got no allowance or divisions at that time?

1451 Mr. Hardtner: Yes, sir, it got divisions from the beginning when it was first built.

Commissioner Harlan: Now we understand one another. How much of a division did you get at that time, I refer to the lumber company.

Mr. Hardtner: I think our divisions are the same now as they were in the beginning.

Commissioner Harlan: So after the railroad was chartered there was no change in the divisions?

Mr. Hardtner: No.

Commissioner Harlan: Now what was the extent of your tonnage last year?

Mr. Hardtner: Your Honor, I haven't it exact; I could give it approximately.

Commissioner Harlan: Yes, that will do.

Mr. Hardtner: Our tonnage was about 17,500 tons of lumber in all.

Commissioner Harlan: And that all belonged to the Urania Lumber Company except some staves and things of that kind?

Mr. Hardtner: Yes, sir.

Commissioner Harlan: You do not have any mail service?

Mr. Hardtner: No.

Commissioner Harlan: Or passenger service?

1452 Mr. Hardtner: We have made application for mail service now. There is a post office at Hinton and it is now supplied by what they call the Star Route, driven around through the country, and the government has sent out papers asking for measurements, and so forth, with a view of establishing a mail route on the line.

Commissioner Harlan: Do you carry express?

Mr. Hardtner: No.

Commissioner Harlan: Any passengers?

Mr. Hardtner: Only those connected with the tap line, free.

Commissioner Harlan: Free of charge?

Mr. Hardtner: Yes.

Commissioner Harlan: You do not carry any less than carload freight outbound?

Mr. Hardtner: Yes, sir.

Commissioner Harlan: What kind?
Mr. Hardtner: Local shipments for which we make no charge.
Commissioner Harlan: You carry it simply to the junction points?
Mr. Hardtner: Yes, sir, or along the line.
1453 Commissioner Harlan: What is it, cotton or farm produce?
Mr. Hardtner: We have handled some cotton, but not the last two or three years because there is no cotton raised down there now.
Commissioner Harlan: Is there any general inbound merchandise carried over your line?
Mr. Hardtner: Yes, sir.
Commissioner Harlan: On local rates.
Mr. Hardtner: Well, we make no charge.
Commissioner Harlan: You have no revenue from any source except on the movement of logs and lumber in staves?
Mr. Hardtner: Yes, sir, that is all.
Commissioner Harlan: Your logging road dumps the logs into the pond and then they are taken into the mill and made into lumber?
Mr. Hardtner: Yes.
Commissioner Harlan: Who sets the cars at the mill for loading?
Mr. Hardtner: The Iron Mountain pushes the cars in and we do part of the switching. We spot some of the cars, but as a rule the Iron Mountain local will spot the cars on the side
1454 track. They come in on our main line.
Commissioner Harlan: Do you do any switching for outsiders?
Mr. Hardtner: Yes, sir.
Commissioner Harlan: There is a little town, is there, at the junction point?
Mr. Hardtner: There is.
Commissioner Harlan: And you have some spur tracks there leading to industries?
Mr. Hardtner: Yes, sir.
Commissioner Harlan: What are those industries?
Mr. Hardtner: Well, staves and ties that are shipped out to New Orleans or other points.
Commissioner Harlan: They are not made at Urania, are they?
Mr. Hardtner: Oh, no.
Commissioner Harlan: You bring them in——
Mr. Hardtner: They are made by the farmers as a rule.
Commissioner Harlan: On your line?
Mr. Hardtner: Yes.
Commissioner Harlan: And you bring them in and they are stored here?
Mr. Hardtner: No, they are shipped on out, that is in carloads.
1455 Commissioner Harlan: What charge do you make for that service?
Mr. Hardtner: We have a minimum charge of $15.00 a car.
Commimssioner Harlan: Do you move any logs over your line to Urania on a local rate of $15.00?

Mr. Hardtner: No. We have shipped some hardwood logs out to New Orleans and also north, but it is a very small percentage.

Commissioner Harlan: What service do you perform for these divisions? As I understand it, you take the logs of the lumber company at the junction of the tram lines with your main line?

Mr. Hardtner: Yes.

Commissioner Harlan: You make no charge against the lumber company for hauling them to the mill?

Mr. Hardtner: No.

Commissioner Harlan: But under a milling in transit rate the logs are there made into lumber and the Iron Mountain usually spots the cars?

Mr. Hardtner: Yes.

Commissioner Harlan: And then the manufactured lum-
1456 ber moves out to destination on the through rate?

Mr. Hardtner: Yes, sir.

Commissioner Harlan: And then you get the divisions of the through rates?

Mr. Hardtner: Yes.

Commissioner Harlan: Have you any other source of revenue?

Mr. Hardtner: No.

Commissioner Harlan: No trackage rights?

Mr. Hardtner: No.

Commissioner Harlan: You say you have issued $50,000 of capital stock?

Mr. Hardtner: Yes.

Commissioner Harlan: Does that represent the original cost of the road and equipment?

Mr. Hardtner: Practically; that is up to that time. Now the cost of the road to date is more than that.

Commissioner Harlan: What is it to date?

Mr. Hardtner: $70,805.

Commissioner Harlan: Up to date?

Mr. Hardtner: Yes.

Commissioner Harlan: What were your net earnings last
1457 year approximately?

Mr. Hardtner: Approximately——

Commissioner Harlan: Give your gross first, if you have it?

Mr. Hardtner: The gross was about $28,250.

Commissioner Harlan: And your net?

Mr. Hardtner: Net earnings—I do not know, I think it was about $2,000.

Commissioner Harlan: Do you file reports with the Commission annually?

Mr. Hardtner: We have not yet. We wanted to ask permission to file the report before the end of the year for this last year's business. We file reports with the State Railroad Commission and have been filing monthly reports.

Commissioner Harlan: What do your reports to the State Commission show as net earnings for the year 1909?

Mr. Hardtner: I don't know. The President made out the report.

Commissioner Harlan: You have stated to our Examiner, or some officer of the railroad did, that your net recenue for that year was in excess of $10,000. Is that your recollection?

1458 Mr. Hardtner: I suppose it was. It was some less than this year.

Commissioner Harlan: You mean it is more this year than it was last?

Mr. Hardtner: Yes.

Commissioner Harlan: Well, that was a net revenue on a total investment of $70,000?

Mr. Hardtner: Yes.

Commissioner Harlan: About 15 per cent, something like that.

Mr. Hardtner: Well, the net investment was not as much last year as this, because we have expended some more this year.

Commissioner Harlan: So that the percentage of earnings last year was in excess perhaps of 15 per cent, and about 15 per cent this year?

Mr. Hardtner: It is about 15 this year. I have no recollection of last year.

Commissioner Harlan: Do you find any small lumber people about you that are successfully competing with you that have to haul their logs by wagon to mill, and haul the lumber to the station?

1459 Mr. Hardtner: I do not know of any small mills in our territory.

Commissioner Harlan: Small people cannot compete with you?

Mr. Hardtner: There is no timber along the Iron Mountain that can be bought; in fact there is none at all. It has all been cut out. The only timber there is is out from the road.

Commissioner Harlan: Didn't you say there were some people who owned timber on your line?

Mr. Hardtner: Yes. I was speaking of the Iron Mountain now. Probably 50 per cent of the lands out through the interior on our road, that is not owned by the Urania Lumber Company.

Commissioner Harlan: 50 per cent?

Mr. Hardtner: Yes, sir.

Commissioner Harlan: And they are not logging them at all?

Mr. Hardtner: No.

Mr. Brown: This 50 per cent of the outside holdings on the lands along your railroad, is that held in large or small tracts?

Mr. Hardtner: Small tracts.

Mr. Brown: You stated, I believe, that about 10 per cent

1460 of your earnings were from business other than the lumber company?

Mr. Hardtner: Practically just about that; maybe a little less.

Mr. Brown: Are there any agricultural lands——

Commissioner Harlan: I do not remember that the witness stated that. What is that percentage?

Mr. Hardtner: Of the outside business, it is about 10 per cent or probably a little less, that is ties, staves and business of that kind.

Mr. Brown: Are there any agricultural lands contiguous to your railroad?

Mr. Hardtner: There are.

Mr. Brown: What is the character of that land, fertile or——

Mr. Hardtner: Agricultural lands, creek bottoms.

Mr. Brown: Fertile or otherwise?

Mr. Hardtner: Fertile. Not all of them, but the creek bottoms are.

Mr. Brown: About what is the acreage of this agricultural land along the line?

Mr. Hardtner: I do not know, I could not state how much.

1461 Mr. Brown: Is there a considerable acreage or just small tracts?

Mr. Hardtner: Well, I do not know, I could not say just what amount. I suppose probably 20 per cent are agricultural lands.

Mr. Brown: The timber holdings of the Urania Lumber Company extend almost to Winnfield on the west, and Jena on the east, do they not?

Mr. Hardtner: Yes, sir.

Mr. Brown: Have you cut out any part of the timber on the east of the Iron Mountain tracks?

Mr. Hardtner: We have not.

Mr. Brown: This town of Hinton, is that a town or just a village station?

Mr. Hardtner: It is the loading operations—it is a town.

Mr. Brown: It has a post office?

Mr. Hardtner: It has a post office but it is not an incorporated town.

Mr. Brown: The town of Urania, how is that built, is it up along the Iron Mountain track or along the line of your railroad?

1462 Mr. Hardtner: It is built up along the line of our railroad.

Mr. Brown: Are the loading tracks and side tracks on your track there or on the tracks of the Iron Mountain?

Mr. Hardtner: On our tracks.

Mr. Brown: And those are the tracks which serve the town of Urania?

Mr. Hardtner: Yes, sir.

Mr. Brown: Are you familiar with the country traversed by your railroad?

Mr. Hardtner: Rather.

Mr. Brown: Considering its general character, do you think there are sufficient resources there to support your railroad independently of the mill business of the Urania Lumber Company?

Mr. Hardtner: Well, I don't know whether there is or not.

Mr. Brown: You are not able to say?

Mr. Hardtner: No.

Mr. Brown: I think that is all.

Commissioner Harlan: I want to direct your attention to the fact that our examination of your books showed that less than two

1463 per cent of your gross revenues for the year 1909 came from traffic not supplied by the lumber company; $600 all told.

Mr. Brown: I would like to ask him, do you use the regular and uniform bills of lading?

Mr. Hardtner: Yes.

Mr. Brown: And the waybilling?

Mr. Hardtner: Yes.

Mr. Brown: Are these copies of the bills used (handing papers)?

Mr. Hardtner: Yes, sir.

Mr. Brown: We would like to file them.

(The papers so offered and identified, were received in evidence and thereupon marked Natchez, Urania & Ruston Railway Exhibits Nos. 1 and 2, Witness Hardtner, received in evidence December 13th, 1910, and are attached hereto.)

Mr. Brown: If you would like, we will file a blue print showing the connection with the Iron Mountain and the spur tracks and mills, showing the distances, and so forth.

Mr. Cowan: The statement for 1909 shows $40,540 of traffic supplied by the lumber company, and the other traffic $600, a total of $41,140 and the operating expenses $30,957, leaving a net
1464 revenue of $10,183. Do those figures conform to your recollection?

Mr. Hardtner: I don't remember. I did not make the report.

Mr. Cowan: If so, it appears that your operating expenses of that road were $30,957. If you had not had any divisions of the rates, your expenses of operation of course, would have been the same, because you had to operate for the purposes of supplying the mill with logs. Would not that be true?

Mr. Hardtner: Yes.

Mr. Cowan: So you received out of the divisions of these rates almost $10,000 more than the total cost of operating the logging roads for supplying the mill with logs.

Mr. Hardtner: And divisions?

Mr. Cowan: Yes.

Mr. Hardtner: Yes. I suppose so. I don't know just what the figures are.

Mr. Cowan: Do you know of any lumber concerns in the country who are operating their sawmills by rail logging propositions similar to your mill which are not getting a division of the rates?
1465 Mr. Hardtner: I don't know. I presume they all get divisions.

Mr. Cowan: The $15.00 per car which you charge on the stave bolts and the like, is simply a local charge from delivery points to the Iron Mountain?

Mr. Hardtner: Yes.

Mr. Cowan: Is that covered by a tariff of any sort?

Mr. Hardtner: I think it is. We have a tariff to New Orleans.

Mr. Cowan: But would the haul on your line be covered by a tariff?

Mr. Hardtner: Yes. We have a tariff, I think it is filed with the State Commission.

Mr. Cowan: With the State Commission?

Mr. Hardtner: Yes, sir.

(Witness excused.)

Whereupon, at 1:00 P. M. a recess was taken until 2:00 P. M.

1466 After Recess.

Mr. Brown: Mr. F. R. Pierce, who was on the stand for the lines representing the Southern Pine System, gave testimony before your Honors two years ago in the case of the Chicago Coal & Lumber Company against the Tioga & Southeastern along the general lines involved in this hearing, and I would like permission to have the testimony he gave in that case made part of his testimony given this morning.

Commissioner Harlan: It was understood yesterday that the entire testimony in that case would be attached to this case, and could be referred to as a part of the record here.

Among the cases reserved for Tuesday were two Rock Island cases, the Doniphan, Kensett & Searcy, and that will be heard by Examiner Burchmore in a few minutes, as I understand; and the other was the Woodworth & Louisiana Central Railroad. Is that road represented?

Mr. Thurmond: I represent that road.

Commissioner Harlan: Are your witnesses here?

Mr. Thurmond: Yes, they are around the building. They are not all here now.

Commissioner Harlan: Have you any witnesses here now?

1467 Mr. Thurmond: No. Will you take that up in connection with the two other roads, the Sibley, Lake Bistineau & Southern and——

Commissioner Harlan: Are the witnesses here?

Mr. Thurmond: They are all within call.

Mr. Riddell: Just before adjournment your Honor called the Ouachita & Northwestern, and I presumed you were going to take it up immediately after adjournment. It follows the Natchez, Urania & Ruston and is an Iron Mountain connection.

Commissioner Harlan: Well, we will reach that this afternoon, I hope; in fact I know we shall.

Mr. Riddell: I thought as the other lines were not ready immediately on the call we might take that up now.

Commissioner Harlan: How many witnesses have you?

Mr. Riddell: Just one. It will not take very long.

Commissioner Harlan: While counsel is getting his witnesses we will hear your witness.

1468 *Ouachita & Northwestern Railroad.*

C. E. SLAGLE, was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: Where do you reside?
Mr. Slagle: Clarks, Louisiana.
Commissioner Harlan: Where is that with relation to Alexandria?
Mr. Slagle: 62 miles north of Alexandria and 36 miles south of Monroe.
Mr. Riddell: You might indicate it to the Commissioner.
Mr. Slagle: Here is a map of the road which might be of some service.

(Witness indicates position of Clarks on map before the Commissioner.)

(The map so offered and identified, was received in evidence and thereupon marked Ouachita & Northwestern Railroad Exhibit No. 1, Witness Slagle, received in evidence December 13th, 1910, and is attached hereto.)

Commissioner Harlan: When was that line organized?
Mr. Slagle: It was incorporated May 27th, 1905, and amended on November 11th, 1908.
1469 Commissioner Harlan: When was the road built?
Mr. Slagle: The Standard division part of it was purchased from another company in 1906, and the northwest line from Clarks, the construction was commenced also in 1906.
Commissioner Harlan: Have you a line on one side of the Iron Mountain and one on the other side?
Mr. Slagle: The line on the east side has been taken up.
Commissioner Harlan: And now you have a line only on the west side?
Mr. Slagle: In a northwesterly direction.
Commissioner Harlan: From Clarks?
Mr. Slagle: From Clarks.
Commissioner Harlan: What was the name of the line running from Clarks towards the east and south?
Mr. Slagle: Ouachita & Northwestern.
Commissioner Harlan: And that is also the name of the line running west from Clarks?
Mr. Slagle: Yes.
Mr. Riddell: I want to correct a mistake. You say you only have a line west of the Iron Mountain. That is from Clarks?
1470 Mr. Slagle: Yes, and east from Standard.
Commissioner Harlan: Is that all the investment of one company?
Mr. Slagle: Yes, sir.
Commissioner Harlan: Those three lines?
Mr. Slagle: Yes, sir.
Commissioner Harlan: We will start from the one running west from Clarks. What division do you call that?

Mr. Slagle: The Jackson Division.

Commissioner Harlan: What is the length of that line?

Mr. Slagle: It is under construction; as the new construction, the grading was finished in September of this year, 24⅝ miles, and the steel has been laid to date approximately 20 miles, and it is now being laid about two miles a month.

Commissioner Harlan: Is it in operation?

Mr. Slagle: It is up to the end of the steel and increases as they finish it.

Commissioner Harlan: Have you at this time constructed any logging connections?

Mr. Slagle: The railroad company owns all the railroad property of every description serving its company.

Commissioner Harlan: You have tram lines running into
1471 the main line?

Mr. Slagle: Yes, sir, about 15 miles.

Commissioner Harlan: Now the line that ran west and somewhat southerly from Clarks you say has been removed?

Mr. Slagle: Yes, sir, southeast.

Commissioner Harlan: Easterly and somewhat southerly?

Mr. Slagle: Yes.

Commissioner Harlan: What was the length of that line?

Mr. Slagle: That line was originally about 14 miles.

Commissioner Harlan: And when was it built?

Mr. Slagle: The construction was commenced in November, 1903.

Commissioner Harlan: That was before the organization of the railroad company?

Mr. Slagle: It was before the incorporation of it.

Commissioner Harlan: Then it was originally built by whom?

Mr. Slagle: We built it in the name of the Ouachita & Northwestern but as a matter of fact the Louisiana Central Lumber Company built it.

Commissioner Harlan: How long was it operated?

Mr. Slagle: It was operated until 1909.

Commissioner Harlan: And its title passed to the railroad
1472 company?

Mr. Slagle: Yes, sir, by deed. The property was all deeded to the Ouachita & Northwestern with a right of way northwest, not southeast, in 1908.

Commissioner Harlan: Was there any lease to it of the southeast property?

Mr. Slagle: Yes, sir, there was a letter from the lumber company to the railroad company authorizing the use of the right of way through that country.

Commissioner: Harlan: That lumber was all taken off and then the road itself removed between the termini?

Mr. Slagle: We purchased at Standard a mill property in 1906 which changed the operations at Clarks, leaving the balance of the property of that company for the sawing at Standard, and hence the operations were somewhat changed by that increased purchase of timber in that territory.

Commissioner Harlan: Well, in the meantime had you taken off all of the timber that was on that southeast or Standard branch?

Mr. Slagle: As far as it extended?

Commissioner Harlan: As far as it extended, yes.

1473 Mr. Slagle: Yes, sir.

Commissioner Harlan: And you took up the tram lines and connected with it?

Mr. Slagle: Yes.

Commissioner Harlan: Or did you leave those tram lines and run them over to your Standard branch?

Mr. Slagle: No, they did not connect.

Commissioner Harlan: You took up all the tracks there?

Mr. Slagle: Yes, sir.

Commissioner Harlan: Did the Louisiana Central Lumber Company then have a mill at Clarks?

Mr. Slagle: Yes.

Commissioner Harlan: Has it still a mill at Clarks?

Mr. Slagle: We have two mills at Clarks.

Commissioner Harlan: Then they acquired this other property at Standard?

Mr. Slagle: Yes.

Commissioner Harlan: That is a mill property?

Mr. Slagle: It is a small mill property, but they rebuilt it entirely and enlarged it.

Commissioner Harlan: Are there any farms around what we call the southeast branch?

1474 Mr. Slagle: A good many farms, yes, sir.

Commissioner Harlan: Were there any other mills or interests?

Mr. Slagle: We ship from one of the spurs of that tram, from what is called Cruse Lumber Company, and served them while the tram was there, but that part was never incorporated, you understand.

Commissioner Harlan: Where was their mill?

Mr. Slagle: About six miles from Clarks.

Commissioner Harlan: And east?

Mr. Slagle: Southeast, but it was on a spur and not on the main line of that track.

Commissioner Harlan: Was there any other mill on that line?

Mr. Slagle: No.

Commissioner Harlan: Was that mill using lumber from the lands of the Louisiana Central Lumber Company?

Mr. Slagle: No.

Commissioner Harlan: It owned its own lands?

Mr. Slagle: It owned its own land and is still in operation.

Commissioner Harlan: Did you move any general mer-

1475 chandise or farm produce?

Mr. Slagle: We moved some, but an inconsiderable amount.

Commissioner Harlan: While that line was there?

Mr. Slagle: Yes, sir. And there was some hay moved.

Commissioner Harlan: Did you have some stations on that line?
Mr. Slagle: Three buildings.
Commissioner Harlan: And you used some locomotives and equipment on that line that were later transferred to the other line when that line was taken up?
Mr. Slagle: Yes, sir, when we incorporated, by deed, the property was all sold.
Commissioner Harlan: Well, but this line we have referred to as the southeastern line was owned by the Ouachita & Northwestern Road, that is the title——
Mr. Slagle: The deed passed in 1908.
Commissioner Harlan: And at that time it was in operation?
Mr. Slagle: Yes.
Commissioner Harlan: But it is not in operation at this time?
Mr. Slagle: No, sir.
Commissioner Harlan: But the two mills at Clarks are still
1476 running?
Mr. Slagle: Yes.
Commissioner Harlan: And they belong to the Louisiana Central Lumber Company?
Mr. Slagle: They belong to the Louisiana Central Lumber Company.
Commissioner Harlan: When was the branch built that extends easterly from Standard?
Mr. Slagle: By purchase, there was five miles of that line passed to the Louisiana Central Lumber Company, and in turn was transferred by this deed to the Ouachita & Northwestern Railroad Company, and it has been extended since approximately nine miles southeast.
Commissioner Harlan: Making a total mileage of about 13 miles of main track.
Mr. Slagle: Well, nine miles from that, exclusive of the sidings at Standard.
Commissioner Harlan: What is the total length of the main line from Standard?
Mr. Slagle: Nine miles approximately.
Commissioner Harlan: Now you have in connection with that a lot of tram roads?
1477 Mr. Slagle: About five miles and a half in that division.
Commissioner Harlan: What is the capital stock authorized?
Mr. Slagle: $600,000.
Commissioner Harlan: And what have you issued?
Mr. Slagle: $303,000.
Commissioner Harlan: Have you any bonded indebtedness?
Mr. Slagle: No, sir.
Commissioner Harlan: What was the cost of the construction of those three branches, the original actual cost?
Mr. Slagle: You mean the one southeast, that has been taken——
Commissioner Harlan: No, the one to the west, the one to the southeast and the one that runs from Standard.

Mr. Slagle: About $334,000 or $335,000.

Commissioner Harlan: That was the actual cost of those three roads with the equipment?

Mr. Slagle: Yes.

Commissioner Harlan: And the capital was furnished by the Louisiana Central Lumber Company?

Mr. Slagle: In this way. At the time of the incorporation a dividend was declared of $303,000 payable in stock of the
1478 Ouachita & Northwestern, issued to each stockholder, their pro rata as a stockholder of the Ouachita & Northwestern, with one exception, there is Mr. J. P. Stubbs, our general attorney, holds one share.

Commissioner Harlan: With that exception the stock ownership in the two enterprises is substantially the same?

Mr. Slagle: The individual stockholders are the same with that one exception.

Commissioner Harlan: What is the total mileage now in operation?

Mr. Slagle: Including the spurs, or exclusive of the spurs?

Commissioner Harlan: Main line?

Mr. Slagle: About 29 miles.

Commissioner Harlan: And including the spurs?

Mr. Slagle: About 50½ miles of track, 56 pound steel, with the exception of four miles, which is 40 pound, and that is part of the trams into the woods.

Commissioner Harlan: Is it ballasted?

Mr. Slagle: Well ballasted with dirt only.

Commissioner Harlan: Standard gauge?

1479 Mr. Slagle: Exceptionally well ballasted, especially toward the northwest.

Commissioner Harlan: The gauge is standard gauge?

Mr. Slagle: Yes, sir.

Commissioner Harlan: How many locomotives?

Mr. Slagle: Seven locomotives.

Commissioner Harlan: And 149 freight cars?

Mr. Slagle: 146 freight cars—there are 150 altogether, of all kinds of cars.

Commissioner Harlan: What is that other car?

Mr. Slagle: I think a stock car.

Commissioner Harlan: What traffic do you move other than lumber manufactured, and log lumber?

Mr. Slagle: You understand the road is new now. They are just taking out the first crop of the forest, but up to June 30th of this year we handled 412,205 tons, of which 1,661 tons was other than the Louisiana Central Lumber Company.

Commissioner Harlan: Can you give us some idea of the tonnage on that southeastern branch we have spoken of?

Mr. Slagle: That was taken up?

Commissioner Harlan: Yes, before it was taken up.

Mr. Slagle: It was mostly forest products excepting this
1480 mill that we served from one of the spurs, and we had an understanding that we would move their traffic until we took up that particular spur.

Commissioner Harlan: Well, you said you had some farms there?
Mr. Slagle: Yes, sir.
Commissioner Harlan: Any cotton?
Mr. Slagle: A few bales.
Commissioner Harlan: General merchandise and hay?
Mr. Slagle: Some merchandise out to what they call Copenhagen, about seven miles, and there was a hay farm from which we moved some hay into Clarks.
Commissioner Harlan: But it was small?
Mr. Slagle: Yes, sir.
Commissioner Harlan: But you have not had a full year's operation on the new line northwest——
Mr. Slagle: No.
Commissioner Harlan: Or the new line east from Standard?
Mr. Slagle: Yes, sir, they have been there since 1907.
Commissioner Harlan: That was what my question was. I am taking the railroad company as one investment. and I want to
1481 know what the total tonnage was last year on the two branches now in operation.
Mr. Slagle: 412,205 tons up to June 30th of this year.
Commissioner Harlan: Both branches?
Mr. Slagle: Yes, sir.
Commissioner Harlan: And of that some 1600 tons was outside traffic?
Mr. Slagle: Yes, sir.
Commissioner Harlan: What were your gross receipts?
Mr. Slagle: $155,936.47.
Commissioner Harlan: And your operating expenses?
Mr. Slagle: $131,793.79.
Commissioner Harlan: And your net?
Mr. Slagle: $24,142.68.
Commissioner Harlan: And you had operated the western branch how many months?
Mr. Slagle: We had operated up until January 1st, 1910, eight miles of it. The balance was constructed in 1910 up to a junction with the Tremont & Gulf Railroad, excepting the laying of steel. The ties had been assembled, and excepting the laying of steel on about four miles, which is now being laid at the rate of two miles a month.
1482 Commissioner Harlan: You are then connecting up with the Tremont & Gulf at the west end of the line?
Mr. Slagle: Yes, sir, and we have a surveying crew beyond that now. They are in the field now.
Commissioner Harlan: That is the line Mr. Seaman spoke of the other day?
Mr. Slagle: Yes, sir.
Commissioner Harlan: What is the total acreage owned by the Louisiana Central Lumber Company?
Mr. Slagle: Uncut, or since its purchase, or both?
Commissioner Harlan: Both?
Mr. Slagle: We have acquired in fee simple and by timber deed

approximately 235,000 acres, and there is uncut today, including the timber deed, approximately 180,000 acres.

Commissioner Harlan: Of that amount of timber land what part lies west of the Iron Mountain?

Mr. Slagle: West of the Iron Mountain uncut, you mean?

Commissioner Harlan: Well, no, both.

Mr. Slagle: It want to explain that we have sold about practically 15,000 acres to a colonization company.

Commissioner Harlan: Is that east of the Iron Mountain?

1483 Mr. Slagle: That is east of the Iron Mountain where the track is taken up. Do you wish to include that now?

Commissioner Harlan: Well, you had better let us know what you have. Explain your holdings?

Mr. Slagle: I should judge about 60,000 acres.

Commissioner Harlan: East of the Iron Mountain?

Mr. Slagle: Yes, sir.

Commissioner Harlan: And of that about 15,000 acres have been sold recently?

Mr. Slagle: Yes, sir.

Commissioner Harlan: To some colonizing company?

Mr. Slagle: Yes, sir, and that leaves uncut there about 35,000 or 38,000 acres probably.

Commissioner Harlan: Is that colony an agricultural community?

Mr. Slagle: That is the idea, yes, sir.

Commissioner Harlan: That is along the line of the original branch to the southeast?

Mr. Slagle: Yes, sir.

Commissioner Harlan: They are all farmers?

Mr. Slagle: Yes, sir, that is their idea, of adding to the settlers already there; it is an experiment, in fact.

1484 Commissioner Harlan: Have they entered upon farms?

Mr. Slagle: The deed has just passed about five or six months ago and they have not perfected their plans.

Commissioner Harlan: How far east of Clarks is that?

Mr. Slagle: Commencing four miles from Clarks, and it runs through townships 12, 11, 3 and 4 east.

Commissioner Harlan: How distant is the farthest part of the track you have sold?

Mr. Slagle: About 14 miles from Clarks.

Commissioner Harlan: At that point does the land approach your branch from Standard?

Mr. Slagle: The uncut portion of the timber holdings.

Commissioner Harlan: But not the colony?

Mr. Slagle: Well, the uncut lands go up to where the timber has not been removed, but I should say it is about ten miles from the end of the track southeast from Standard.

Commissioner Harlan: Is this pine or hardwood, or both?

Mr. Slagle: Both.

Commissioner Harlan: Does pine predominate?

Mr. Slagle: Largely.

Commissioner Harlan: Are your mills pine mills?

1485 Mr. Slagle: We built one of the mills at Clarks with the idea of cutting hardwood, but for a time that idea has been abandoned, and it is now cutting pine, so all the mills at this time are cutting pine.

Commissioner Harlan: You have one mill at Standard or two?

Mr. Slagle: One mill.

Commissioner Harlan: So you are operating three mills. What is your total daily output on the average?

Mr. Slagle: In carloads, or feet?

Commissioner Harlan: Well, feet?

Mr. Slagle: I should say about 325,000 feet; five bands and a gang is the equipment.

Commissioner Harlan: How many carloads approximately does that make a day?

Mr. Slagle: I should say something like 20 cars.

Commissioner Harlan: Do you have any trackage rights over the Iron Mountain between the mills?

Mr. Slagle: We had a contract with the Iron Mountain that expired November 27th, 1910, but an application has been made for its renewal and it will probably be renewed within the next 30 days.

1486 Commissioner Harlan: What use did you make of that?

Mr. Slagle: For the running of the trains of the Ouachita & Northwestern Railroad between Clarks and Standard at a per train mile basis of 50 cents per train mile.

Commissioner Harlan: Trains of logs?

Mr. Slagle: And empties, either way.

Commissioner Harlan: What was the purpose of that, to use another mill when the other two were busy or pressed, or what?

1487 Mr. Slagle: One idea was to connect up the two roads, and you will notice from the map there is a road under construction now connecting up the two tracks.

Commissioner Harlan: Did you make substantial use of this trackage privilege?

Mr. Slagle: No great use of it; no, sir.

Commissioner Harlan: Did you haul over either of the branches now in operation or over the train connecting with the branches the logs of any other than the Louisiana Central Lumber Company?

Mr. Slagle: Some hickory logs have moved.

Commissioner Harlan: Do they come in over the tram line to the main line?

Mr. Slagle: They are there assembled, yes, sir, and cars are switched off to any of the spurs and loaded.

Commissioner Harlan: Have you such movements on both branches?

Mr. Slagle: Yes, sir.

Commissioner Harlan: And what do they amount to?

Mr. Slagle: Very small amount up to the present time.

Commissioner Harlan: With that exception do you move lum-

ber for any one other than the Louisiana Central Lumber Company?

1488 Mr. Slagle: As I explained a while ago, the Cruse Lumber Company southeast had a mill and we served them until that was taken up, probably two or three cars a week, and there are two mills now planned to locate on the line northwest between Clarks and the Tremont & Gulf Road. You understand that is a new road and they are just starting. The Pioneer Pole & Shaft Company.

Commissioner Harlan: Have they some lumber lands up there?

Mr. Slagle: They have some and they propose to buy from the Louisiana & Central Lumber Company some hickory logs. Hickory is their lumber.

Commissioner Harlan: Will that be the main source of their supply?

Mr. Slagle: I should judge it would be about divided half and half.

Commissioner Harlan: Those mills are not in operation?

Mr. Slagle: No, we are just making the arrangements now for the location of them on our line.

Commissioner Harlan: With those exceptions do you now haul lumber or logs for anybody other than the Louisiana & Central Lumber Company?

1489 Mr. Slagle: We are getting out a good many staves and stave bolts.

Commissioner Harlan: For outside interests?

Mr. Slagle: For outside interests.

Commissioner Harlan: And other lands not belonging to the Louisiana & Central Company?

Mr. Slagle: Not belonging to the Louisiana & Central Lumber Company.

Commissioner Harlan: What is the extent of that movement?

Mr. Slagle: It is quite a lot since July of this year. Prior to that it was not a great amount. There seems to have been renewed activity starting in with beginning about mid-summer this year; five or six of them have gone in there with the idea of buying the unsold portions of the hard wood and working it into staves and stave bolts.

Commissioner Harlan: Are there any towns on either of these two branches?

Mr. Slagle: The town of Chester, thirteen miles from Clarks northwest has been established and there is also a post office and some stores, two stores I believe have located there within the last six months.

1490 Commissioner Harlan: They are not company stores?

Mr. Slagle: They are not company stores. And the town of Newport, which is a post office, a mile and a half away as I believe, a mile and a half farther out; and we have a petition from the Jackson Parish officials in the Southern part of Jackson Parish asking us to extend our line to a point at Weston wi-h the idea of locating the County Seat of Jackson Parish there. We told them we would put in our engineering force there and see the advisability of the con-

struction of that line and with the idea of either extending it beyond or to the Rock Island and we would let them know before they voted on the proposition in January. Outside of that I know of no industries likely to locate in the near future.

Commissioner Harlan: Taking the tonnage of all these outside industries and shippers, does it amount to as much as five per cent of your whole tonnage?

Mr. Slagle: I don't think so. It is sixteen hundred and sixty-one tons up to July of this year.

Commissioner Harlan: That is less than one per cent?

Mr. Slagle: Yes. But the country is new and the timber will have to be first removed before it will be materially increased,
1491 so that the country can settle up. That is our belief as to the improvements which will come to the earth, that the timber will first have to be removed.

Commissioner Harlan: Where is the general office of the road?

Mr. Slagle: Clarks, Louisiana.

Commissioner Harlan: Is it in one of the mills?

Mr. Slagle: It is in the general office of the lumber company.

Commissioner Harlan: Are the officers of the railroad company substantially the officers of the lumber company?

Mr. Slagle: Practically so. There are some few variations.

Commissioner Harlan: Do they get salaries as officers of the railroad company?

Mr. Slagle: None, except myself.

Commissioner Harlan: How many clerks do you have in the office of the railroad company or connected with its work?

Mr. Slagle: There are three of them looking after it, but they also work for the lumber company and are paid proportionately to the service rendered to either company, for economy.

1492 Commissioner Harlan: How many train and track crews?

Mr. Slagle: There are 60 or 70 all together.

Commissioner Harlan: They do not appear on the lumber company's accounts at all?

Mr. Slagle: No.

Commissioner Harlan: You operate the tram lines?

Mr. Slagle: Yes.

Commissioner Harlan: And you move them as may be required?

Mr. Slagle: Yes.

Commissioner Harlan: To what account do you charge the cost of moving out of your tram line connections?

Mr. Slagle: For the purpose of not mixing up the accounts, the railroad company took all this property over, and by agreement with the lumber company they proposed to build these spurs and take them up and re-lay them and connect with *with* the main line of the Ouachita & Northwestern, for which they would charge a service of $1.50 a thousand, log scale, on the logs, and we charge the spurs—a spur is taken up, as it will appear in the Commission's report.

Commissioner Harlan: Does it go to the expense of maintenance of way and structures?

1493 Mr. Slagle: No, it is a separate account, $53,683.68 last year.

Commissioner Harlan: Was any part of that for taking up your southeast branch from Clarks?

Mr. Slagle: Yes, sir, part of that is in there.

Commissioner Harlan: What was the cost of that?

Mr. Slagle: Of course, it was not well constructed like our present line; it was about $70,000 altogether, and last year about $14,000 went into this $53,000.

Commissioner Harlan: I am not sure that I understand that. My question is how much did it cost you to take up the southeast branch?

Mr. Slagle: Regardless of the period?

Commissioner Harlan: Yes, the operation of taking it up. It was all done at one time?

Mr. Slagle: No.

Commissioner Harlan: As one operation?

Mr. Slagle: No. You see we left some timber with which to operate on while we were taking it up, and we were probably two years taking up the entire 14 miles.

Commissioner Harlan: For this $1.50 do you load the logs

1494 on the cars?

Mr. Slagle: No, the lumber company loads them. The railroad company delivers the cars to the steam log loaders of the lumber company.

Commissioner Harlan: You do not participate in it at all?

Mr. Slagle: No.

Commissioner Harlan: You do no work of any kind for the lumber company?

Mr. Slagle: No.

Commissioner Harlan: Do they unload them in the pond?

Mr. Slagle: They do. They deliver them in the pond.

Commissioner Harlan: Then you have this transit privilege?

Mr. Slagle: Milling in transit.

Commissioner Harlan: And the lumber rate under the milling in transit rate commences with the junction of the tram line, between the tram line and your main line?

Mr. Slagle: Yes, sir, Oakland and Somerville are the two billing points.

Commissioner Harlan: Somerville is on the Standard Division?

Mr. Slagle: Yes.

Commissioner Harlan: And Oakland on the northwest

1495 branch?

Mr. Slagle: Yes.

Commissioner Harlan: Have you any particular market to which you send a greater volume than to another market, I refer now to the lumber company?

Mr. Slagle: Generally yard stock trade is where most of it goes. Do you want to know the districts?

Commissioner Harlan: Yes.

Mr. Slagle: That will vary of course as the orders are delivered to

the lumber company; I should judge that Missouri, Kansas, Nebraska, Illinois, Indiana and Ohio get the bulk of it.

Commissioner Harlan: What division do you get to Illinois, for instance?

Mr. Slagle: From two to four cents. The State of Illinois?

Commissioner Harlan:

Mr. Slagle: I think it is four cents to Illinois. I am not sure about that.

Commissioner Harlan: Do you get any five cent divisions?

Mr. Slagle: No, sir.

Commissioner Harlan: We will come back to the Standard branch. Where is the mill of the Louisiana Central Lumber
1496 Company with relation to the Iron Mountain tracks?

Mr. Slagle: About half a mile.

Commissioner Harlan: Where is the planing mill?

Mr. Slagle: You mean the sawmill?

Commissioner Harlan: I meant the sawmill in my first question.

Mr. Slagle: It is about ⅜ of a mile, and the planing mill is a fraction over half a mile.

Commissioner Harlan: Is it reached by a spur track of the Iron Mountain?

Mr. Slagle: No, no spur tracks or sidings of any description belonging to the Iron Mountain reach beyond their right of way.

Commissioner Harlan: Did they ever have a spur track?

Mr. Slagle: Never.

Commissioner Harlan: Is that true of the mill at Clarks?

Mr. Slagle: Both places.

Commissioner Harlan: They never had any spur track?

Mr. Slagle: No, sir.

Commissioner Harlan: What service do you understand you perform for these divisions? I know about the logs up to the mill——

1497 Mr. Slagle: The service performed is the milling in transit from points on their line to Clarks, where they are converted into lumber from the logs, and then the lumber is re-assembled and loaded and the railroad company receives from the Iron Mountain Road empties from the receiving track, and after they are loaded the Ouachita & Northwestern switches from the planing mill, weighs the lumber and delivers it to the rails of the Iron Mountain on their delivering tracks.

Commissioner Harlan: Where are your scales?

Mr. Slagle: One at Clarks and one at Standard, about half a mile from each station—a mile from Clarks and half a mile from Standard.

Commissioner Harlan: They are car scales, are they?

Mr. Slagle: Yes, sir, Fairbanks scales.

Commissioner Harlan: They weigh the lumber in the cars?

Mr. Slagle: Yes, sir.

Commissioner Harlan: Now how far is this interchange track from your sawmill?

Mr. Slagle: It is a little over a mile from Clarks and a little over half a mile from Standard.

Commissioner Harlan: Does the Louisiana Lumber Company ship timber out?

1498 Mr. Slagle: Do you mean construction timbers?

Commissioner Harlan: Yes, construction timbers.

Mr. Slagle: There is a very small per cent of that class.

Commissioner Harlan: How about rough lumber, a small percentage of that?

Mr. Slagle: Yes, sir.

Commissioner Harlan: Most of it is dressed lumber?

Mr. Slagle: Yes, sir.

Commissioner Harlan: I would like to know how long you have been engaged either as a railroad man or as a lumber man down in this part of the country?

Mr. Slagle: About a little over nine years.

Commissioner Harlan: You know it pretty well, don't you?

Mr. Slagle: Well——

Commissioner Harlan: You know the country pretty well?

Mr. Slagle: I have tried to observe.

Commissioner Harlan: Do you know any small mills carrying on a successful lumber business?

Mr. Slagle: This Cruse Lumber Company I am speaking of is still pulling to the Iron Mountain since we ceased to serve them.

Commissioner Harlan: Why did you cease to serve them?

1499 Mr. Slagle: Because they were located on one of our spurs which reached their mill, and it was agreed we would serve them so long as that spur was located there. I explained to them that it was not incorporated in the company.

Commissioner Harlan: Do you speak of a spur as what we call tram or logging roads?

Mr. Slagle: No, it was a spur from the main line, and it was explained to them it would be mutually satisfactory after the timber was cut, as it was not an incorporated part of the line, to take it up.

Commissioner Harlan: What do you mean by saying it was not an incorporated part of the line?

Mr. Slagle: That is, the original charter reads from a point northwest from Clarks in the vicinity of Weston, that is the principal part.

Commissioner Harlan: You built a main line and then you built a spur connecting with it and you own the right of way and you own the rails and ties and you regard that as not being a part——

Mr. Slagle: It is a part, I did not mean to say it was not a part of the system, because the deeds passed in 1908 to the

1500 property, except the right of way southeast.

Commissioner Harlan: Apparently you do not regard it as part of the incorporated road?

Mr. Slagle: Not part of the permanent location.

Commissioner Harlan: But that was a spur track connecting with your main line?

Mr. Slagle. Yes, sir.

Commissioner Harlan: It was not a logging track connecting with your main line?

Mr. Slagle: Spur track connecting with the main line.

Commissioner Harlan: And you thought you could take it up any time you wished, whether this mill wanted you to or not?

Mr. Slagle: The reason I had the conference with them was to see whether they would let us.

Commissioner Harlan: You were willing to respect their wishes, but you could have stood on your right to take it up?

Mr. Slagle: I believe we could.

Commissioner Harlan: And you did take it up, that southeastern branch?

Mr. Slagle: Yes.

Commissioner Harlan: And left there some farmers that
1501 you had been serving?

Mr. Slagle: Yes.

Commissioner Harlan: Now there is a colony of people going in there?

Mr. Slagle: We sold them some 15,000 acres and they had acquired by purchase 5,000 more, making 20,000 all together, which they proposed to settle up, a colonization scheme of some kind.

Commissioner Harlan: And that sale was made after you had taken up the tracks?

Mr. Slagle: Yes, sir. They asked for the price on the lands, and we told them they would not be for sale until after we did take the road up.

Commissioner Harlan: Now the railroad company owned the right of way?

Mr. Slagle: We did not, no, sir.

Commissioner Harlan: You did not own that right of way?

Mr. Slagle: No, sir.

Commissioner Harlan: It does own the right of way on the other two branches.

Mr. Slagle: Yes, sir.

1502 Commissioner Harlan: And it is your impression, is it, under the laws of the State of Louisiana, that if the right of way belongs to someone else the railroad can be removed?

Mr. Slagle: That is my impression. The owner of the land can——

Commissioner Harlan: Can oust you, can eject you.

Mr. Slagle: Yes, sir. In this case there was an agreement or an understanding that they had permission to use those rights of way, but that was in the form of an agreement and not a deed.

Commissioner Harlan: It was understood in the form of a letter?

Mr. Slagle: Yes, sir.

Commissioner Harlan: It was not even in the form of a lease?

Mr. Slagle: No.

Commissioner Harlan: It was simply that the railroad company was a tenant at will for a definite period?

Mr. Slagle: That southeast——

Commissioner Harlan: It was just a tenancy at will?

Mr. Slagle: They were given permission to enter upon the
1503 lands of the Louisiana Central Lumber Company for the purpose of serving them in removing this pine timber southeast. When I speak of southeast from Clarks, I do not speak of the other line.

Commissioner Harlan: Well, you were given that permission but there was some track there before the railroad company was chartered?

Mr. Slagle: Yes, sir.

Commissioner Harlan: But the railroad company extended that track?

Mr. Slagle: No, sir; they began to take up coming back before that. Fourteen miles was originally constructed, and part of it had been taken up before the deed passed. This was treated the same as spur tracks leading from the main line now in all directions, under the $1.50 contract with the Louisiana Central Lumber Company, that they lay the spurs and take them up for the purpose of assembling logs to the main line and finally reaching the mills of this company, and that construction southeast was regarded in the same way.

Commissioner Harlan: Well, you say it was regarded in the same light, but it was nevertheless operated by the railroad company?

1504 Mr. Slagle: Yes, sir.

Commissioner Harlan: And you got joint through rates on lumber from the eastern terminus on the main line where the tram roads joined them?

Mr. Slagle: Yes, sir. In 1906——

Commissioner Harlan: Wait a minute. Did you not get such divisions of joint through rates?

Mr. Slagle: Yes, sir.

Commissioner Harlan: So that the published rates in which your line was named as a party extended to the joining of that line to the junction with the tram lines?

Mr. Slagle: Yes, sir.

Commissioner Harlan: And you purported to carry lumber over it as a common carrier?

Mr. Slagle: Yes, sir.

Commissioner Harlan: And you did carry some outside stuff, very little for other people, as a common carrier?

Mr. Slagle: Yes, sir.

Commissioner Harlan: Under the published rates?

Mr. Slagle: Yes, sir.

Commissioner Harlan: And then you took the track up?

Mr. Slagle: Yes.

1505 Commissioner Harlan: Now I asked you whether you were familiar with this country, and I understood you to say that you were.

Mr. Slagle: As far as my observation has gone. I do not know just how familiar I may appear after putting the question.

Commissioner Harlan: I will put the question to you that I put

to other witnesses this morning, whether you know any one within good driving distance from your mills who is successfully conducting at this time a lumber business involving a wagon haul of the logs to the mill and a wagon haul of the lumber to a railroad track?

Mr. Slagle: Excepting the one that I spoke of, the Cruse Lumber Company.

Commissioner Harlan: But that lumber company——

Mr. Slagle: Is still doing business.

Commissioner Harlan: Well, it got a good start on your line.

Mr. Slagle: It was operated before we reached them.

Commissioner Harlan: *Was*—its wagon haul now?

Mr. Slagle: About five miles to the town of Kelly?

Commissioner Harlan: What is its output?

1506 Mr. Slagle: Yellow pine principally, some of both. It is a small mill.

Commissioner Harlan: How long has it been operating there?

Mr. Slagle: I should judge since 1901 they have been operating around in that country, and their present location, they have been operating there, I should judge, about five or six years.

Commissioner Harlan: Was that on your Standard Branch or on your southeast branch?

Mr. Slagle: On the southeast branch from Clarks. They originally located on what they call the Monroe Lumber Company's spur leading out from Spaulding, which was taken up years ago. After that spur was taken up, they moved to a point about five miles from Kelly where they had purchased some timber land, and were operating there when one of the spurs of the Ouachita & Northwestern reached their mill, and while that spur was located there we served them, shipping out two or three cars a week.

Commissioner Harlan: You say it is still in operation?

Mr. Slagle: Yes.

Commissioner Harlan: What is its output, do you know?

Mr. Slagle: I should judge about two cars a week.

1507 Commissioner Harlan: Do you understand it is a successful enterprise and prosperous?

Mr. Slagle: I do not know as I could answer just how prosperous. They seem to be doing a little business there, have a little store and getting out this product and shipping it to the town of Kelly. Now they operate a farm in connection with this mill, and there are times when the mill crew put in a crop, so it is not *an* operation of the full 312 days of the year; I should judge about two-thirds of the time the mill runs.

Commissioner Harlan: It appears from your testimony that the railroad Company owned by the Louisiana Central Lumber Company is operating at a substantial profit yearly.

Mr. Slagle: About four and a half per cent.

Commissioner Harlan: Well, you had in 1909 net revenues from operation of $69,000.

Mr. Slagle: No, sir.

Commissioner Harlan: What were they?

Mr. Slagle: About $7,000 up to June 30th, 1900, was the accumulated surplus.

Commissioner Harlan: What was the accumulated surplus?

Mr. Slagle: About $7,000.

1508 Commissioner Harlan: No, but in that year your earnings as shown by your reports were something in excess of $130,000.

Mr. Slagle: I think you have failed to take off the taking up of the spurs.

Commissioner Harlan: Well, that is not a revenue from operation?

Mr. Slagle: No, I thought you said net operation.

Commissioner Harlan: No, I was talking about revenue from operation, $131,000.

Mr. Slagle: Yes, sir.

Commissioner Harlan: And your expenses were $68,000 and your net revenue as shown on your own report was $62,000.

Mr. Slagle: From which you were to deduct the taking up of the spurs.

Commissioner Harlan: Well, you do not do that every year?

Mr. Slagle: As they are taken up they are charged off each year.

Commissioner Harlan: I thought you referred to the southeastern branch, the expense of taking that up?

Mr. Slagle: No.

Commissioner Harlan: Well, taking out that expense you

1509 had a substantial net?

Mr. Slagle: For the year ending June 30th, 1909, it was about $4,000.

Commissioner Harlan: Well, you said four and one-half per cent.

Mr. Slagle: Well, I was speaking of the year ending June 30th, 1910.

Commissioner Harlan: What is your operating ratio, do you remember, the ratio of operating expenses to revenue?

Mr. Slagle: The straight operating expenses, do you mean?

Commissioner Harlan: Have you not figured out an operating ratio?

Mr. Slagle: About 49 per cent, I think, of the regular operating expense.

Commissioner Harlan: This last year?

Mr. Slagle: Yes, sir. I will tell you exactly.

Commissioner Harlan: Well, the ordinary percentage of a railroad is what, on the regular line?

Mr. Slagle: About 70, I understand.

Commissioner Harlan: Considering the fact that you are making four and a half per cent on your money, do you or do you

1510 not—I now refer to the lumber company, enjoy an advantage, having a division, over the man who has to haul his lumber and logs?

Mr. Slagle: It depends entirely on the timber back of the mill. In this particular case, let me illustrate what I mean by that. In this particular case nine years ago we saw this advantage as a lumber

company, a great tract of timber and undeveloped country between Clarks in a northwesterly direction to the Vicksburg, Shreveport & Pacific north, and a so-called tap line running from Ruston known as the Arkansas Southern, which is now part of the Rock Island. And I was sent into that country to look it over and I reported to my principal that there was an area of some 30 or 40 miles of undeveloped country, but it would require a large expenditure to develop it. The land would have first to be purchased and then developed by building up a main line railroad.

Commissioner Harlan: I follow all that and understand it all, but you have done all that.

Mr: Slagle: We bought the timber before we put the railroad in.

Commissioner Harlan: Very well, you did that, and you have got everything now in running order. Now I put to you the inquiry as to whether at this moment this investment, and it
1511 is all one investment, does not give you an advantage over the small fellow, because you get this division of the through rate and he does not, and he has adopted wagons and you have adopted a railroad to get your stuff to the main line of the Iron Mountain.

Mr. Slagle: I will answer that this way. To the party with the tract of timber on the main line of a railroad I would say we were not, nor would the Louisiana Central have an advantage over the individual located at a point on the Ouachita & Northwestern or any other tap line; but to the party located farther in the interior in an undeveloped country off the main line of a trunk line or so-called tap line, we would.

Commissioner Harlan: Well, you talk of a party located in the interior. Now his lumber is just where yours is, or we will assume that it is.

Mr. Slagle: No, these particular lands have been developed by building this main line through.

Commissioner Harlan: No, but he has a haul of his logs sometimes three or four miles. We have heard of cases here where there was a haul three or four miles, and I believe one case of five
1512 miles to the mill, and then there was in one case a longer haul than that, I believe, of the lumber to the railroad. So that that fellow is substantially circumstanced as you are.

Mr. Slagle: Except he has no investment.

Commissioner Harlan: Yes, he has invested in horses and wagons, and you have invested in rails. You have adopted one method to get to the Iron Mountain and he has another. Now you get a division and he does not. I ask you as a practical man whether that does not give you an advantage over him in getting the lumber to the market?

Mr. Slagle: To the man located off the main line or tap line, it would.

Commissioner Harlan: Well, we are talking about that particular man who is located off of both.

Mr. Slagle: Yes, we would to that particular man.

Commissioner Harlan: You get divisions from what line?

Mr. Slagle: St. Louis, Iron Mountain & Southern.
Commissioner Harlan: You do not reach any other line?
Mr. Slagle: It will be very few months until we have arrangements in with other lines.
Commissioner Harlan: The Tremont & Gulf?
Mr. Slagle: The Tremont & Gulf, and probably——
1513 Commissioner Harlan: Have you some understanding with them about divisions?
Mr. Slagle: We have had a conference, but no definite understanding has been reached, excepting when we are ready to operate that the traffic departments of both companies will get together and work out a tariff satisfactory to both for that arrangement.
Mr. Riddell: Does the Ouachita and Northwestern concur in joint tariffs issued by the Iron Mountain?
Mr. Slagle: They do.
Mr. Riddell: And does it issue its own interstate tariffs to cover shipments for which there are no joint rates?
Mr. Slagle: They do.
Mr. Riddell: Does it make all the reports to the Federal and State Commissions that are required of it?
Mr. Slagle: They do.
Mr. Riddell: Who makes the waybills for the lumber that moves from points on the Ouachita & Northwestern covered by the joint rates?
Mr. Slagle: The agent of the Ouachita & Northwestern.
Mr. Riddell: And who issues the bills of lading for that lumber that is moving on joint through rates, that moves on through
1514 waybills?
Mr. Slagle: The Ouachita & Northwestern signs the bill of lading issued by the lumber company.
Mr. Riddell: It might be made out by the lumber company, but it is issued by the railroad?
Mr. Slagle: They are signed by the Ouachita & Northwestern.
Mr. Riddell: That is what I wanted to know. Is the Ouachita & Northwestern recognized by the Louisiana Railroad Commission as a common carrier?
Mr. Slagle: It is.
Mr. Riddell: Does the Ouachita & Northwestern receive in the shape of divisions from the Iron Mountain anything in excess of the original divisions?
Mr. Slagle: It does not.
Mr. Riddell: As a matter of fact in the case of tonnage for Colorado common points it gets less, does it not? Did it not some years ago and for perhaps a short period have an arrangement which contemplated an allowance to it of five cents?
Mr. Slagle: Yes, sir.
Mr. Riddell: hat is no longer effective, is it?
1515 Mr. Slagle: No, sir.
Mr. Riddell: You spoke about an extension of the line to its intersection with the Tremont & Gulf, to Jonesboro, I believe, or perhaps to Winnfield, through a trackage arrangement with

the Tremont & Gulf. What consideration would prompt that extension?

Mr. Slagle: Do you mean to the Rock Island?

Mr. Riddell: No, the extension that you spoke about being in contemplation to Jonesboro or to a connection with the Rock Island at Winnfield through the Tremont & Gulf.

Mr. Slagle: There were two reasons. One to secure additional terminal facilities with other roads, and the survey now under way is due to a petition from the Parish of Jackson, with the idea of extending our line to the Rock Island and locating the Parish seat thereupon and we have not decided as yet whether we will negotiate for trackage right over the Tremont & Gulf into Winnfield or extend our line to the Rock Island, but either one will probably be carried out.

Mr. Riddell: Were you influenced by a desire to make more tonnage tributary to the Ouachita & Northwestern?

Mr. Slagle: Yes, sir.

Mr. Riddell: And to enable you to secure a better car
1516 supply with which to accommodate the traffic which you originated?

Mr. Slagle: Yes, sir. And another idea, that after the timber is removed we consider that there is a vast country through which the road would pass that when settled up would make it a good permanent line.

Mr. Riddell: Is the country along this line of yours which runs from Clarks northwest, of a character which would make it suitable for agricultural purposes?

Mr. Slagle: Yes, sir; it is largely short leaf, which carries a good soil.

Mr. Riddell: Do you feel justified in the belief that it is sufficiently good for agricultural purposes so that that country would be calculated to support a railroad after the timber was cut out?

Mr. Slagle: We feel positive that that will be the case.

Mr. Riddell: Who owns the rails of the Ouachita & Northwestern Railroad?

Mr. Slagle: The Ouachita & Northwestern Railroad Company.

Mr. Riddell: They were acquired by ordinary purchase, were they, I suppose?

Mr. Slagle: Purchased by deed from the lumber company
1517 in 1908.

Mr. Riddell: You were asked as to whether a lumber company operating under the conditions that environ the Louisiana Central would enjoy an advantage over some smaller lumber man who was compelled to haul his logs into his mill by team. Do you know whether or not it is a fact that these larger lumber operators whose operations are supplemented by these incorporated so-called tap lines have also to haul their logs into the points where they are loaded on to the cars?

Mr. Slagle: We are compelled to, yes, sir.

Mr. Riddell: You do not know how much of an average distance that is, and how it compares with the distance over which the man operating without a tap line has to haul his logs, do you?

Mr. Slagle: To any spur extended by the Ouachita & Northwestern at or near any land not owned or already acquired, they would have a right to also cut that timber to be transported to some point on our line for the purpose of manufacture the same as we would serve the Louisiana Central Lumber Company.

Mr. Riddell: I think you misunderstood my question. The small operator, if we may term him such, who is not served by
1518 a tap line, and who has to log his mill through the medium of teams, has to haul those logs a certain average distance, and a large operator whose efforts are supplemented by the tap line has also to haul his logs up to the points where they are loaded on the logging cars?

Mr. Slagle: Yes, sir.

Mr. Riddell: I wanted to know if you could say as to how the wagon haul in the one instance compared with the wagon haul in the other. Do you know which one hauls it the greater distance?

Mr. Slagle: The average distance for the lumber company I think is about a mile and a half. Two miles would be the maximum haul, while the small operator runs as a rule from the tree out from his mill four, five or six miles.

Mr. Riddell: He hauls it further on an average?

Mr. Slagle: Yes, sir.

Mr. Riddell: But still both of them have a haul by wagon?

Mr. Slagle: Yes, sir.

Mr. Riddell: That is all.

Mr. Cowan: You spoke about the agricultural possibilities of all this country over here, and we have heard a great many other witnesses tell about it, and I find when you build a line out
1519 there when the lumber is taken out the line is taken out. Why did you not leave it there, if this is such an agricultural country?

Mr. Slagle: I spoke of the northwest branch.

Mr. Cowan: What about the other?

Mr. Slagle: We think that is all right, and I would not be surprised if it was not put down again to cut out the hardwood. The hardwood is still there, a large part of it.

Mr. Cowan: You are general manager of the lumber company?

Mr. Slagle: Yes, sir.

Mr. Cowan: And of the railroad company?

Mr. Slagle: Yes, sir.

Mr. Cowan: You were acting as general manager of which when you determined to take out this line which was in this good agricultural country where you sold 20,000 acres? Were you acting as general manager of the lumber company or as general manager of the railroad company when you decided to take it up?

Mr. Slagle: The arrangements were that the spurs would be built upon the lands of the lumber company to enable them to remove the pine, after which they would have a right to take up the spurs and move them to other locations, and this tram
1520 southeast did not have the same permanent construction as the lines southeast from Standard or northwest from Clarks

now have. In fact probably twice as much money per mile has been spent.

Commissioner Harlan: He asked a little different question. He wants to know whether Mr. Slagle of the lumber company told Mr. Slagle of the railroad company to clear out.

Mr. Cowan: Who decided to take that up?

Mr. Slagle: The railroad company decided to take it up after it had performed the service of removing the pine and there was no other traffic offered.

Mr. Cowan: That is just my point. According to your present statement, if you did not have the pine on the other line you would have the traffic, enough to operate a railroad?

Mr. Slagle: It has not been developed yet as to its agricultural possibilities.

Mr. Cowan: As a matter of fact is not all this talk about these roads having traffic to support them when the lumber is gone just simply talk, there is nothing else to it.

Mr. Slagle: No, I do not believe it is.

Mr. Cowan: I certainly do, if you ask me the question.

Mr. Slagle: I do not.

1521 Mr. Cowan: Here is the Tremont & Gulf going to extend its line to develop agricultural traffic, and you are going to extend your line. How are these railroads to be supported by an agricultural country which does not produce anything hardly?

Mr. Slagle: I think if you will examine the map, you will find we have the advantage of not being so close to some other tracks which you speak of.

Mr. Cowan: If you go across the territory occupied by the Tremont & Gulf you would be pretty close to it.

Mr. Garwood: I suggest to counsel if he wants an answer to that question he ought to go into West Texas somewhere, where they are not building roads.

Mr. Cowan: Now when you did have the opportunity to leave a railroad down for the purpose of agricultural development either Mr. Slagle as general manager of the lumber company or of the railroad company decided to tke it up.

Mr. Slagle: There was not the opportunity for a terminal southeast from Clarks as we would have northwest from Clarks, and the purchase of the property at Standard would enable the Ouachita & Northwestern Railroad Company to extend their line southeast from Standard and reach a part of the same line and in that way

1522 we could serve a large part of the people on this line that is taken up.

Mr. Cowan: Now when you were operating this line that you did take up the Louisiana Railroad Commission recognized you as a railroad just the same as they do with the others, did they not?

Mr. Slagle: You misunderstand it. A part of our line northwest has been graded since 1906, and that was the part that we have developed, and then the line southeast from Standard is being extended to develop this same country that has been abandoned on the southeast line from Clarks.

Mr. Cowan: Well, but then you escape my question. When you did operate it, the Louisiana Railroad Commission recognized it as a railroad, and you got divisions of the rates, and so on, is that right?

Mr. Slagle: We got a division of the rates, but we also had this line constructed northwest.

Mr. Cowan: I know, but you might answer the question as to whether the Louisiana Railroad Commission recognized it as a railroad?

Mr. Slagle: They recognized the whole system. We had five miles constructed north from Clarks.

1523 Mr. Cowan: Did they recognize that which you took up, as a railroad, that is subject to a perfectly plain answer yes or no.

Mr. Slagle: I think they did.

Mr. Cowan: Now then, of what importance is it that the Louisiana Commission recognizes a railroad as a railroad, when you can go and take it up the next day, as you did in that case?

Mr. Slagle: We considered that that was not the permanent line.

Mr. Cowan: Did you talk with the Louisiana Commission about it before you took it up?

Mr. Slagle: No.

Mr. Cowan: In other words, you had a railroad out there where you were operating as common carrier, getting divisions of rates, and when you concluded to take it up you simply took it up.

Mr. Slagle: The charter does not provide for that being a permanent line.

Mr. Cowan: Does your charter in the other case provide for its being a permanent line?

Mr. Slagle: Yes.

1524 Mr. Cowan: Is there any difference in the wording of the charter?

Mr. Slagle: Which line do you refer to?

Mr. Cowan: Well, the ones you were talking about. I am referring to the ones you are referring to.

Mr. Slagle: Yes.

Mr. Cowan: Now what is the difference in the charter in the one you built that you took up, and the charter of the one that you have reference to that you have not taken up?

Mr. Slagle: It specifies the country through which it is to be built.

Commissioner Harlan: I suggest that you pass to some other point.

Mr. Cowan: I believe you said awhile ago that the country cannot develop as a farming country until the timber is cut off?

Mr. Slagle: No, sir, not to its full capacity.

Mr. Cowan: We all know you have to clear land in order to cultivate it and you cannot do that until the timber is taken off Until that is done there are no agricultural products to be hauled are there?

Mr. Slagle: There are some.

1525 Mr. Cowan: Well, very small.

Mr. Slagle: On the contrary, about 15 per cent, I should judge, throughout the territory we are going now, and as the timber is removed that will increase.

Mr. Cowan: The railroad is building in there for the purpose of handling timber, of course.

Mr. Slagle: Primarily so.

Mr. Cowan: And the capital was advanced by the people who bought the timber lands both for the purpose of building the railroad and establishing the sawmill industry?

Mr. Slagle: Yes.

Mr. Cowan: And the one could not have been established without the other, it could not have been supported without the other?

Mr. Slagle: Not on the first, no, sir.

Mr. Cowan: Up to this time.

Mr. Slagle: Up to this time. We have faith in the future of that country and believe that after that is done it will develop into a good country.

Mr. Cowan: Yes, but it was not the faith in the future of the farming part of it that led the people who invested in the
1526 timber lands, and in the sawmill industry and in the railroad to make the investment. They did it on account of the timber.

Mr. Slagle: It encouraged us to make a better line than would otherwise be constructed if it was for the purpose of removing the timber only.

Mr. Cowan: In regard to the bills of lading, I wish to ask you as a man of undoubtedly wide experience, if it is not a fact that all these sawmills of any importance make out their own bills of lading and take them over to the railroad agent to sign them?

Mr. Slagle: That is the custom with both trunk lines and tap lines.

Mr. Cowan: It does not matter if a man is getting a division of rates or not, he does it?

Mr. Slagle: Every shipper is required to do that.

Mr. Cowan: Whether he is getting a division or not?

Mr. Slagle: Yes, sir, that is the law, I believe.

Mr. Cowan: When did the five cent division cease? You spoke about having a five cent division at one time. When did that cease?

Mr. Slagle: I think in 1903. The records will show.

Mr. Cowan: And why was that?

1527 Mr. Slagle: I believe they advanced the argument that the divisions to Colorado points would not justify a larger division than the Mississippi and Missouri River crossings.

Mr. Cowan: What was the division which you received prior to 1908?

Mr. Slagle: Two to four cents.

Mr. Cowan: Do you know of any lumber companies in the country which are operating where they log the mill by a railroad who do not receive divisions of rates?

Mr. Slagle: That is a pretty big question. I would have to examine into the matter——

Mr. Cowan: I just asked you if you knew of any?

Mr. Slagle: No, I do not know of any.

Mr. Cowan: Do you ship your lumber and sell lumber to Texas?

Mr. Slagle: No.
Mr. Cowan: Why?
Mr. Slagle: We have no joint through rates to Texas.
Mr. Cowan: Do you ship to Oklahoma?
Mr. Slagle: Yes.
Mr. Cowan: And your division there is what? Four cents?
1528 Mr. Slagle: Four cents.
Mr. Cowan: And to Kansas?
Mr. Slagle: Four cents.
Mr. Cowan: And then to the Missouri River territory you get four cents in all that territory which the Iron Mountain reaches?
Mr. Slagle: With a few exceptions.
Mr. Cowan: Mainly your divisions, I assume, are four cents?
Mr. Slagle: I do not know how it would figure out, but largely four cents.
Mr. Cowan: Do you sell railway supplies, materials?
Mr. Slagle: We sell some. A large part of it is yard stock trade, of the lumber company.
Mr. Cowan: When you come to sell your products on the market at various places, you meet competition of lumber that is produced in the yellow pine district everywhere?
Mr. Slagle: The lumber of the Louisiana Central Lumber Company is sold by the sales department in Kansas City and——
Mr. Cowan: That is one thing I wanted to ask you about. What relation has the Louisiana Central Lumber Company to the Missouri Land & Exchange——
1529 Mr. Riddell: The Missouri Lumber & Land Exchange?
Mr. Cowan: Yes.
Mr. Slagle: They are our sales agents.
Mr. Cowan: Are they exclusive sales agents?
Mr. Slagle: Yes, sir, excepting that we have the privilege of selling any one that should come to the mill.
Mr. Cowan: What other companies are operating through this Missouri Land & Lumber Exchange Company?
Mr. Slagle: What other lumber companies?
Mr. Cowan: Yes.
Mr. Slagle: The Louisiana Central Lumber Company, the Louisiana Long Leaf Lumber Company, and the Missouri Lumber & Mining Company, and the Ozark Land & Lumber Company.
Mr. Cowan: What are the relation- of these companies to the owners of your company that you have been testifying about.
Mr. Slagle: What are their relations?
Mr. Cowan: Yes.
Mr. Slagle: The corporate existence of each is separate, but some of the principal stockholders are the same in the majority of them, although the majority of the largest stockholders in one company are not interested in the other.
Mr. Cowan: There is a community of interests so far as
1530 the interest of one company being the interest of the other in the matter of the sale and disposition of the product?
Mr. Slagle: I think not, excepting that the president of some of

these companies stands well with the others, and that their confidence there forms this community of interests. But you take the Missouri Company, for instance, the people that own half the interest in the Missouri Company own not a dollar of stock in the Louisiana Long Leaf Lumber Company, and it is more by a mutual arrangement rather than by ownership arrangement.

Mr. Cowan: I assumed it probably incorrectly because they had the common agent for the sale of their output, and I assumed, of course, there was some common ownership.

Mr. Slagle: It is an economical arrangement as a matter of fact, and that is what prompted it more than anything else.

Mr. Cowan: At all events the relations are such that they do not want to compete with one another or they would not employ a common agent.

Mr. Slagle: It does not take so many salesmen. You take several companies which join together instead of each having a salesman for the same territory they have but one.

1531 Mr. Cowan: Does not the fact that you get a division out of this rate give you an advantage in the market selling lumber over a man that is put to the same expense you are to log his mill, who does not get a division?

Mr. Slagle: I do not think they pay any attention to it. That is, they meet competition, and the market is such that they get what they can for the lumber. Whether the salesmen know anything about the railroad I don't know.

Mr. Cowan: Now these companies that you mentioned are operating in Louisiana, the ones which have the common agent at Kansas City.

Mr. Slagle: No, sir, two of them in Louisiana.

Mr. Cowan: Which ones are those?

Mr. Slagle: The Louisiana Long Leaf Lumber Company and Louisiana Central Lumber Company.

Mr. Cowan: Where do the others operate?

Mr. Slagle: The Missouri Lumber & Mining Company, and the Ozark Land & Lumber Company operate in Missouri.

Mr. Cowan: They do not handle pine, of course?

Mr. Slagle: Yes.

Mr. Cowan: Is their pine in Missouri?

Mr. Slagle: Yes, sir.

1532 Mr. Cowan: I am just so ignorant about it I don't know about it.

Mr. Slagle: There is the best kind of pine up in Missouri.

Mr. Riddell: There is not very much of it left though.

Mr. Cowan: Each of them operate their mill by a railroad in somewhat similar fashion to what you do.

Mr. Slagle: I think not. I think the Ozark Land & Lumber Company, I do not know whether Mr. Riddell could answer that question. I do not know whether they have a railroad or not.

Mr. Riddell: They have an incorporated railroad, yes, sir.

Mr. Cowan: Don't they get any divisions?

Mr. Riddell: No.

Mr. Cowan: That is the only one we have been able to hear of. Do the ones you operate in Louisiana have a railroad somewhat similar to yours?

Mr. Slagle: Yes, sir, I believe the one in Louisiana connects from the Kansas City Southern to the T. & P.

Mr. Riddell: The others will go on here. The railroad
1533 that serves the Louisiana Long Leaf Company is before the Commission.

Mr. Cowan: I did not know that, and I was just inquiring at this point.

Commissioner Harlan: Does your line exchange free transportation as other tap lines do?

Mr. Slagle: Yes, sir.

Commissioner Harlan: It is used by the officers of the railroad company?

Mr. Slagle: Yes, sir.

Commissioner Harlan: And some of these officers are officers of the lumber company?

Mr. Slagle: Yes, sir.

Commissioner Harlan: Where is Grandin, on the southeast?

Mr. Slagle: Grandid, Missouri, is located on the branch of the Frisco running out from Willow Springs, Missouri, about 80 miles.

Mr. Riddell: I think that is a matter which may come up in connection with the Salem, Winona & Southern. It was formerly a mill point, but it is not to-day.

Mr. Cowan: Is it not a fact that the general sales agent of this Missouri Lumber & Land Exchange controls the salesmen
1534 who make the prices for lumber that is sold by all the companies belonging to that Exchange?

Mr. Slagle: Each company has the right to return any and all orders that do not suit them.

Mr. Cowan: But it all comes through this general sales agent?

Mr. Slagle: Most of it does.

Mr. Cowan: Now it appears from a statement made to the Commission that the traffic that was supplied by the controlling interest of the Ouachita & Northwestern Railroad was $125,000 in the year 1909, and other traffic $6,125, making a total revenue of $131,000, operating expenses $68,000 in round figures, and net revenue $63,000. Do those figures conform to your recollection?

Mr. Slagle: Excepting that you want to deduct for the spurs taken up.

Commissioner Harlan: We have been over those figures?

Mr. Cowan: I thought so.

Mr. Riddell: You expressed the belief that the country through which this line leading northwest from Clarks is operating, is of a character that will probably support a railroad after the tim-
1535 ber is cut out.

Mr. Slagle: Yes.

Mr. Riddle: How long will it be before the timber is cut out?

Mr. Slagle: From one year to 25 years.

Mr. Riddell: You did not think when you offered that opinion

that that country would support a railroad if the lumber were all cut out in six months or a year, did you?

Mr. Slagle: I did not. It would be a gradual development.

Mr. Riddell: Before the timber is all cut down you believe it will support a railroad?

Mr. Slagle: Before the first crop of timber has been removed there will have sprung up sufficient agricultural districts to keep the railroad going after it loses that revenue.

Mr. Riddell: I want to go back to the divisions for a moment. Was any consideration given to the matter of divisions that would be allowed to a railroad of the character of the Ouachita & Northwestern before the timber holdings of the Louisiana Central were purchased?

Mr. Slagle: Yes, sir.

Mr. Riddell: Were you given to understand by the Iron
1536 Mountain people that such division allowances would be made? I do not care for the detail.

Mr. Slagle: I was sent south by our people——

Mr. Riddell: No, you had better answer the question whether you were given to understand that?

Mr. Slagle: Yes.

Mr. Riddell: You were given to understand that?

Mr. Slagle: Yes.

Mr. Riddell: Did the knowledge of that fact influence the purchase of the property?

Mr. Slagle: The purchase of the timber?

Mr. Riddell: Yes.

Mr. Slagle: Yes. They are from one mile to about 35 miles away from the Iron Mountain.

Mr. Riddell: You know that the building of this road would be necessary in order to develop that timber?

Mr. Slagle: Yes, it was so far away from the Iron Mountain.

Mr. Riddell: And you would not have purchased it if you had not been assured that that railroad would be accorded adequate divisions or in line with what others were getting?

Mr. Slagle: No, sir, we had better opportunities to buy
1537 timber on the tracks rather than to buy so far away at that time.

Mr. Riddell: You would have bought elsewhere but for the knowledge of that fact?

Mr. Slagle: Yes, sir.

Mr. Garwood: From what branch of your line is the extension which is to connect with the Tremont & Gulf constructed, the Northwestern, or——

Mr. Slagle: Northwest branch from Clarks.

Mr. Garwood: Are you building on directly from Clarks or from the——

Mr. Slagle: Direct from Clarks. The line has all been graded to the Tremont & Gulf and finished in September, and ties laid.

Mr. Garwood: How far is it out there?

Mr. Slagle: 24½ miles.

Mr. Garwood: You spoke of a short line from the Vicksburg, Shreveport & Pacific, from Houston southward——

Mr. Slagle: Ruston.

Mr. Garwood: Or Ruston. That subsequently became a part of the Rock Island?

Mr. Slagle: Yes, sir.

1538 Mr. Garwood: What was the name of that line?

Mr. Slagle: The Arkansas Southern.

Mr. Garwood: Was Ruston one of the termini of that line?

Mr. Slagle: No, north of that.

Mr. Garwood: About how long was that line?

Mr. Slagle: It ran from a point north of Ruston to Winnfield. Some lumber company built it down there.

Mr. Garwood: It was built by a lumber company?

Mr. Slagle: Yes, sir.

Mr. Garwood: It is not a part of the Rock Island System?

Mr. Slagle: It is not a part of the Rock Island System, yes, sir.

Mr. Garwood: Are you familiar with the several steps by which the Louisiana & Arkansas Railroad expanded into one of the large and prosperous lines of Louisiana?

Mr. Slagle: Yes, sir.

Mr. Garwood: Was not that built originally as short line lumber roads and gradually became connected up into a long and prosperous railway?

Mr. Slagle: Yes, sir, and that encouraged us to believe that we could do something of the same kind.

Mr. Garwood: Is not that process of development now going on all over the State of Louisiana?

1539 Mr. Slagle: Yes.

Mr. Garwood: Counsel seemed to have the theory that the railroad should not build into the country until it was fully developed. I will ask you if it is not the boast of the railways that they have developed the country, rather than that the country developed the railroads?

Mr. Slagle: Yes, sir.

Mr. Garwood: Are you familiar with the fact that the system of the Gulf, Colorado & Santa Fe in East Texas, which has expanded into a large and prosperous line, and thence has crossed over into Louisiana was made up of lumber roads, small railroads built by one of our lumber kings in Texas?

Mr. Slagle: That is my understanding. I was over part of that line two years ago.

Mr. Cowan: Did he build that while he was a lumber king or before? Did he not before he ever went into the lumber business? You know that the general impression is that he built it as a lumberman and sold it to the Santa Fe, but the fact is he built it before he ever went into the lumber business.

Mr. Garwood: I did not say when he built it, but the fact is he did build it and they were short lines and they were welded

1540 into a railroad which now penetrates a rich lumber country.

Mr. Slagle: That is my understanding.

Mr. Garwood: And is doing much, both for the development of Texas and Louisiana.

Mr. Slagle: Yes, sir.

Mr. Garwood: That is all.

Mr. Cowan: Just one question about the returning of these orders from the general sales agent. You say each company has the right to refuse the orders that the general sales agent may turn in?

Mr. Slagle: Yes, sir.

Mr. Cowan: Is that other than the right which all lumber companies have to refuse them if they do not have the stuff to fill them?

Mr. Slagle: Well, the Missouri Lumber & Land Exchange Company in that case would have to go on the market and buy the lumber if they could not get any of the mills to fill it.

Mr. Cowan: But he is the agent, and when he makes the sale you recognize that, if you have the stuff to fill it?

1541 Mr. Slagle: If we could fill the order conveniently without loss to the Louisiana Central Lumber Company, we would accept it, otnerwise we would return it.

Mr. Cowan: You would not have an agent up there to go out and make sales and turn them down if you had the lumber to fill them?

Mr. Slagle: If he made a mistake we would return it.

Mr. Cowan: Who fixes the price, he or your company?

Mr. Slagle: As a matter of fact I think the retail dealer has been fixing it.

Mr. Cowan: And that is the price, including the freight rate?

Mr. Slagle: I do not think that enters into it. He just gets his orders, and you will have to do the best you can and if you make a loss you will have to stand it.

(Witness excused.)

Commissioner Harlan: The Woodworth & Louisiana Central and the other two roads. How many witnesses have you?

Mr. Thurmond: Five or six.

Commissioner Harlan: Have them all stand and be sworn.

1542 (Thereupon the several witnesses were duly sworn.)

Mr. Thurmond: I would like to have the Louisiana & Pacific called first.

1543 *Louisiana & Pacific Railway.*

DAVID MCLEAN, was called as a witness, having been duly sworn, testified as follows:

Commissioner Harlan: Where do you live?

Mr. McLean: De Ridder, Louisiana.

Commissioner Harlan: What is your position?

Mr. McLean: I am Auditor for the Louisiana & Pacific Railway.

Commissioner Harlan: How long have you been connected with that road in that or any other capacity?

Mr. McLean: Three years.

Commissioner Harlan: When was it organized and chartered as a railroad company?

Mr. McLean: In 1906.

Commissioner Harlan: When was the road built?

Mr. McLean: Your Honor, I am not familiar with all of that detail. It was——

Mr. Thurmond: It was constructed during the year 1906.

Commissioner Harlan: Was it completed before the railroad company was organized and chartered?

1544 Mr. Thurmond: No, sir, it was completed——

Commissioner Harlan: By the railroad company?

Mr. Thurmond: Yes, sir. There is a history of that we can give by another witness if your Honor desires.

Commissioner Harlan: Well, was any part of the railroad built by the lumber company?

Mr. Thurmond: This railroad was made up by connecting together three lumber railroads.

Commissioner Harlan: Then belonging to lumber companies?

Mr. Thurmond: Then belonging to lumber companies.

Commissioner Harlan: And unorganized and not chartered as railroad companies?

Mr. Thurmond: Yes, they had charters from the state, I believe, at that time. One of them perhaps did not, but this particular road, the Louisiana & Pacific originally was a lumber road.

Commissioner Harlan: What is the principal terminus of the Louisiana & Pacific?

Mr. McLean: De Ridder, Louisiana, and Lake Charles, Louisiana.

Commissioner Harlan: What is that distance?

Mr. McLean: 43 miles.

1545 Mr. Thurmond: Would your Honor care for this map (producing map)?

Commissioner Harlan: Let it be marked as an exhibit.

(The map so offered and identified, was received in evidence and thereupon marked Louisiana & Pacific Railway Company Exhibit No. 1, Witness McLean, received in evidence December 13th, 1910, and is attached hereto.)

Commissioner Harlan: Let us know the character of the roadbed and what rail is used?

Mr. McLean: That is 60 pound rail used over the most of the line.

Commissioner Harlan: What sort of roadbed, is it ballasted?

Mr. McLean: It is a dirt roadbed.

Commissioner Harlan: What is the authorized capital?

Mr. McLean: The capital stock is $50,000.

Commissioner Harlan: How much has been issued?

Mr. McLean: All of it.

Commissioner Harlan: Any bonded indebtedness?

Mr. McLean: Yes, sir, $600,000, of which $582,200 has been issued?

Commissioner Harlan: Covered by mortgage on the property?

McLean: Yes, sir, first mortgage bonds.

1546 Commissioner Harlan: What per cent of interest?

Mr. McLean: Six per cent.

Commissioner Harlan: What property does it cover besides the railroad?

Mr. McLean: Just the roadbed and equipment.

Commissioner Harlan: What do you understand to have been the cost to the present company of the road and equipment?

Mr. McLean: To June 30th, 1910, $607,000.

Commissioner Harlan: What is that rate per mile of road?

Mr. McLean: I could not say right now.

Commissioner Harlan: We can work that out.

Mr. Thurmond: It would be 65 into that amount he gave.

Commissioner Harlan: Will some one do that sum? I would like to know what it is. You are an auditor. Will you work that out?

Mr. McLean: That would be approximately $8,900 per mile.

Commissioner Harlan: Now does your company own all the right of way from De Ridder to Lake Charles?

Mr. McLean: No, sir. They have trackage rights.

Commissioner Harlan: What mileage then have you used in this last calculation, the mileage that you own, or the mileage that you own and lease?

1547 Mr. McLean: I have used the mileage that we own and lease. That would be 69.8 miles.

Commissioner Harlan: Now what mileage do you own and what do you lease?

Mr. McLean: We lease 42.3 miles.

Commissioner Harlan: Suppose you take the balance and then tell us what your capital is per mile of road owned. Well, we will do that sum ourselves. Why did you take the mileage leased?

Mr. McLean: I just happened to take the mileage the gentleman gave me. I overlooked the fact.

Mr. Thurmond: It was suggested from here. Your Honor, we have that mileage divided up here.

Commissioner Harlan: Just tell us what the company owns and between what points. Start at De Ridder. Do you own a station at De Ridder?

Mr. McLean: No.

Commissioner Harlan: Do you lease a station there?

Mr. McLean: Yes, sir. That is covered by our lease, the use of it.

Commissioner Harlan: At what point south of De Ridder

1548 do you commence to own any tracks?

Mr. McLean: At a point a little less than a mile south of De Ridder.

Commissioner Harlan: Is that called De Ridder Junction?

Mr. McLean: That is called De Ridder Junction. From there to Bundick, La.

Commissioner Harlan: What is that mileage?

Mr. McLean: Eight miles.

Commissioner Harlan: What is the character of the rail on that track?

Mr. McLean: That is all 60 pound rail.
Commissioner Harlan: And is it rock ballasted?
Mr. McLean: No, sir, dirt.
Commissioner Harlan: From De Ridder Junction to the south to Bonami do you own any track?
Mr. McLean: No, sir.
Commissioner Harlan: What is the point at which you commence to own track?
Mr. McLean: At Lilly Junction.
Commissioner Harlan: What track do you own at that point?
Mr. McLean: We own from there to Walla, a distance of seven and a half miles.
1549 Commissioner Harlan: What rail have you on that?
Mr. McLean: 60 pound rail.
Commissioner Harlan: At what point towards the south do you own further tracks?
Mr. McLean: Fayette, La.
Commissioner Harlan: There you run to the west, do you?
Mr. McLean: To Camp Curtis.
Commissioner Harlan: Through Barn Creek?
Mr. McLean: Yes, sir.
Commissioner Harlan: What is the length of that?
Mr. McLean: Nine miles.
Commissioner Harlan: And the rail is what?
Mr. McLean: 60 pound rail.
Commissioner Harlan: On to the south again where do you own further tracks?
Mr. McLean: We start in at Bridge Junction and we own about a mile of track, or better than a mile into the Lake Charles station, Goosport Yard.
Commissioner Harlan: Who owns the terminals at Lake Charles?
Mr. McLean: We do, the Louisiana & Pacific Railway.
Mr. Thurmond: Will your Honor look at this plat as to the
1550 terminals at Lake Charles (handing paper)?
Commissioner Harlan: Then you own from Bridge Junction into Lake Charles?
Mr. McLean: Yes, sir.
Commissioner Harlan: And all the tracks and station?
Mr. McLean: Yes.
Commissioner Harlan: What is this, a map of the Lake Charles terminal?
Mr. Thurmond: It is a map of the tracks owned by the Louisiana & Pacific, in Lake Charles, and shows the tracks into the mills from Bridge Junction over to what is called Goosport, a part of Lake Charles.
Commissioner Harlan: Who owns the intervening tracks from De Ridder to Bridge Junction.
Mr. McLean: The Lake Charles & Northern Railroad Company.
Commissioner Harlan: And your company has acquired the right to the use of that track by lease?
Mr. McLean: Yes.

Commissioner Harlan: Has that lease been filed with the Commission?

Mr. McLean: It has, I believe.

Mr. Thurmond: It has.

1551 Commissioner Harlan: What is the general basis of the lease, what is the rental?

Mr. McLean: Trackage rental; we pay a trackage rental of 2[illegible] cents per train mile.

Commissioner Harlan: What did that amount to last year?

Mr. McLean: Approximately $7,000. I can give the exact figures.

Commissioner Harlan: Do you operate the road yourselves with your own power and equipment?

McLean: Yes.

Commissioner Harlan: And run the stations?

Mr. McLean: We have joint agents at all the stations except Lake Charles.

Commissioner Harlan: Is the lessor road an operating road?

Mr. McLean: Yes, sir.

Mr. Cowan: It is the Southern Pacific interests that own the Lake Charles & Northern, so I understand. I am not speaking by the card.

Mr. Thurmond: Correct.

Commissioner Harlan: Well, that is not the main line of the Southern Pacific, is it? It ends at De Ridder.

Mr. Blair: The Lake Charles & Northern is a separate in-

1552 corporation and begins at Lake Charles and goes to De Ridder, and by trackage rights 25 or 30 miles beyond.

Mr. Thurmond: Here is a map of the Lake Charles & Northern.

Commissioner Harlan: Are you accurate in saying it begins at Lake Charles?

Mr. Blair: Yes.

Commissioner Harlan: This witness seems to have said that the terminals belong to the Louisiana & Pacific.

Mr. Blair: They have their own terminals, and the Lake Charles & Northern has its own terminals.

Commissioner Harlan: Now, who are the officers of the Louisiana & Pacific Railway Company?

Mr. McLean: President, R. A. Long; Vice President, C. B. Sweet; Treasurer, F. J. Bannister; General Superintendent, C. M. Boswell; General Auditor, P. C. Rickey; Auditor, D. McLean.

Commissioner Harlan: Which one of those officers are also officers of the lumber companies?

Mr. McLean: I understand that Messrs. Long, Sweet, Bannister and Rickey are officers of lumber companies.

Commissioner Harlan: And of what lumber companies?

Mr. McLean: The Long-Bell Lumber Company.

1553 Commissioner Harlan: Are they not interested in, or officers of a number of other companies?

Mr. McLean: Now I don't know anything about the organization of the lumber companies.

Commissioner Harlan: Well, do you know anything in response to my inquiry?
Mr. McLean: If they are interested in other companies?
Commissioner Harlan: Yes.
Mr. McLean: No, I do not, not of my own knowledge.
Commissioner Harlan: Do you know whether they are interested in the Hudson River Lumber Company?
Mr. McLean: It is my understanding they are.
Commissioner Harlan: The Kansas Fuel Company?
Mr. McLean: I do not know.
Commissioner Harlan: The King Ryder Lumber Company?
Mr. McLean: I understand they are.
Commissioner Harlan: The Long-Bell Experimental Farm & Mercantile Company?
Mr. McLean: I understand they are, yes, sir.
Commissioner Harlan: The Long-Bell Mercantile Company?
Mr. McLean: Yes, sir.
Mr. Thurmond: We will hand you a list of the stock-
1554 holders of the Louisiana & Pacific, and the stockholders of the lumber mills that are on the Louisiana & Pacific, and put it into the record.

(The paper so offered and identified, was received in evidence and thereupon marked Louisiana & Pacific Railway Exhibit No. 2, Witness McLean, received in evidence December 13th, 1910, and is attached hereto.)

Commissioner Harlan: Are all these companies on that railroad, the Louisiana & Pacific?
Mr. McLean: What companies?
Commissioner Harlan: I have read them. And the Calcasieu Long-Leaf Lumber Company?
Mr. McLean: Yes, sir.
Commissioner Harlan: That is at Lake Charles?
Mr. McLean: Yes, sir.
Commissioner Harlan: The Hudson River Lumber Company at De Ridder?
Mr. McLean: Yes, sir.
Commissioner Harlan: The Kansas Fuel Company at Bonami?
Mr. McLean: Yes, sir.
Commissioner Harlan: The King Ryder Company at Bonami?
Mr. McLean: Yes, sir.
Commissioner Harlan: The Experimental Farm Company at the same place, and also at De Ridder, is that right?
Mr. McLean: Yes.
Commissioner Harlan: And Long-Bell Lumber Company
1555 at Bundick?
Mr. McLean: Yes, sir.
Commissioner Harlan: The Long-Bell Naval Stores Company at the same place?
Mr. McLean: Yes, sir.

Commissioner Harlan: And the Long Leaf Lumber Company at Longville?

Mr. McLean: Yes, sir.

Commissioner Harlan: Is it not true that the stockholders of this company are substantially the stockholders of one or more of the companies that I have just mentioned?

Mr. McLean: Your Honor, I don't know. I only know the stockholders of the Louisiana & Pacific Railway. I don't know who are the stockholders in the lumber companies you mentioned.

Commissioner Harlan: Your list here does not show the actual ownership of the stock, the amount of it?

Mr. Thurmond: No. We will show that Mr. R. A. Long owns, I believe, a majority of the stock in all those companies and owns a majority of the stock in the Louisiana & Pacific Railway Company.

1556 Commissioner Harlan: Does not his general ownership in these companies and in the railroad company, he and his family, largely exceed the majority?

Mr. Thurmond: Doubtless so, probably 70 per cent.

Commissioner Harlan: Has your line any contracts relating to the traffic of these lumber companies and other companies on your line?

Mr. McLean: Yes, sir.

Commissioner Harlan: In a general way what is the object and purpose of those contracts?

Mr. Thurmond: If your Honor please, the contracts are all on file with the Commission and for those details outside of those figures we have witnesses who are much more familiar than this witness. I thought perhaps your Honor wanted the auditor first.

Commissioner Harlan: Very well, if this witness does not know those details we can go ahead.

Mr. Thurmond: You left out the name of the traffic manager?

Mr. McLean: Yes, sir.

Mr. Thurmond: Give it, please.

1557 Mr. McLean: Mr. R. S. Davis.

Commissioner Harlan: Have you the traffic statistics of your road?

Mr. McLean: For the year ending June 30th, 1910, I have a copy of the report to the Commission.

Commissioner Harlan: Will you state what the gross tonnage was?

Mr. McLean: Gross tonnage 251,409 tons.

Commissioner Harlan: What part of that was lumber?

Mr. McLean: 242,590 tons.

Commissioner Harlan: What part of the whole gross tonnage was furnished by these mills and industries I have just mentioned?

Mr. McLean: I would say approximately 98 per cent in connection with those companies.

Commissioner Harlan: What was the character of the outside tonnage?

Mr. McLean: Merchandise and various commodities.

Commissioner Harlan: Commodities that move under class rates, too?

Mr. McLean: Yes, sir.

Commissioner Harlan: And general merchandise?

1558 Mr. McLean: And general merchandise.

Commissioner Harlan: Does this line carry express and mail matter?

Mr. McLean: No, sir.

Commissioner Harlan: Any passengers?

Mr. McLean: Yes, sir.

Commissioner Harlan: What is the extent of its passenger traffic?

Mr. McLean: If I remember correctly, its passenger revenue for the fiscal year ending June 30th, 1910, was $300.

Commissioner Harlan: Do you run any passenger cars?

Mr. McLean: No, we do not.

Commissioner Harlan: You have not any regular time?

Mr. McLean: Yes, we run on schedule.

Commissioner Harlan: How many trains a day?

Mr. McLean: Two, one each way.

Commissioner Harlan: What was the gross revenue from operation last year?

Mr. McLean: The gross operating revenues were $220,985.94.

Commissioner Harlan: And what was the operating expenses?

Mr. McLean: $145,433.69.

1559 Commissioner Harlan: And the net operating revenues?

Mr. McLean: $75,552.25.

Commissioner Harlan: Is that net after the payment of interest?

Mr. McLean: No, sir, that is the net after the deduction of operating expenses.

Commissioner Harlan: And did not include taxes and interest?

Mr. McLean: No.

Commissioner Harlan: After the payment of taxes and interest what was the net revenue?

Mr. McLean: $16,781.95.

Commissioner Harlan: In addition to the $600,000 of bonds, only part of which were issued, have you any other outstanding obligations?

Mr. McLean: No, sir, excepting open accounts, that is all.

Commissioner Harlan: Are there not some notes payable to these various lumber companies?

Mr. McLean: No, sir.

Commissioner Harlan: Were those obligations taken up recently?

Mr. McLean: Yes, sir.

1560 Commissioner Harlan: By this issue of bonds?

Mr. McLean: By bond issue, yes, sir.

Commissioner Harlan: As I understand it, on April 30th, 1909, you had notes payable aggregating half a million dollars?

Mr. McLean: Something like that, yes, sir.

Commissioner Harlan: Approximating that sum due to several of these companies I have just named?

Mr. McLean: Yes, sir.

Commissioner Harlan: What is the significance of that indebtedness, does it mean that the money for the construction of this road and the purchase of equipment was furnished by these companies?

Mr. McLean: That transaction was completed before I came with the company. It is my understanding, and I believe I am correct, that that represented the purchase price of the road from those various companies.

Commissioner Harlan: You are now talking about the road that your company owns?

Mr. McLean: Yes, sir.

Commissioner Harlan: Does your answer imply that these several lumber companies had built those portions of the road and
1561 later sold it to the railroad company?

Mr. McLean: Yes, sir.

Commissioner Harlan: It means that, does it?

Mr. McLean: Yes.

Commissioner Harlan: At that time were these railway companies independent of one another in the sense that they had no affiliations?

Mr. McLean: So far as I know, I am not familiar with that, but so far as I know they are independent of one another.

Commissioner Harlan: Does anyone know the history of these lumber companies and their relation to one another and the railroad?

Mr. Thurmond: Yes, sir, they were organized at different times. Mr. R. A. Long owns a majority of the stock in the four main mill companies named there.

Commissioner Harlan: I want to know about the history of them.

Mr. Thurmond: We can give you all that complete by another witness, who will be able to do so.

Commissioner Harlan: Have you stated what is the equipment of your road?

1562 Mr. McLean: No, sir, I have not.

Commissioner Harlan: Will you be good enough to do that now.

Mr. McLean: We own 22 locomotives, one pile driver, six cabooses, three stock cars, one refrigerator, 14 box cars, 10 outfit cars, one tank, 15 flat cars, 8 gondolas, and 270 log cars.

Commissioner Harlan: Do you lease any cars?

Mr. McLean: Do we lease any? No, sir.

Commissioner Harlan: I mean are you using any cars under lease from some lessor?

Mr. McLean: No.

Commissioner Harlan: You own all these cars?

Mr. McLean: We own all these cars.

Commissioner Harlan: And those are all the cars in operation?

Mr. McLean: Well, of course, you understand the cars we receive, we interchange service with connecting lines.

Commissioner Harlan: Do these several lumber companies own any cars and locomotives?

Mr. McLean: Not to my knowledge.

1563 Commissioner Harlan: Are there any logging roads that join the Louisiana & Pacific?

Mr. McLean: No, sir.

Commissioner Harlan. Now, are you sure of that?

Mr. McLean: Well, now, I believe there is a logging road that connects with the main line, a line running over from Carson, I don't know the name of it.

Mr. Thurmond: I expect the Commissioner refers to the logging roads that brings the logs up to the ends of these branch lines.

Mr. McLean: Is that what you refer to?

1564 Commissioner Harlan: I simply referred to logging roads, whether they joined the line of the Louisiana & Pacific Railway.

Mr. McLean: Yes, each one of the lumber company's logging road.

Commissioner Harlan: We will take the branch that goes out to Bundick. Are there not some lines that join the main line there?

Mr. McLean: Yes, sir.

Commissioner Harlan: How many of them are there?

Mr. McLean: One.

Commissioner Harlan: To whom does that belong?

Mr. McLean: The rails belong to the Louisiana & Pacific, the rails and fastenings.

Commissioner Harlan: And the ties and labor to the lumber company?

Mr. McLean: The ties and labor to the lumber company.

Commissioner Harlan: Do you operate that logging road?

Mr. McLean: No, sir.

Commissioner Harlan: What is the length of that logging road at Walla, is not there a logging road there?

1565 Mr. McLean: Yes, sir. The same condition.

Commissioner Harlan: Is there anyone else that can give these facts more accurately?

Mr. Thurmond: Yes, we put this witness on more particularly as to the tonnage and that sort of thing.

Commissioner Harlan: If you have some questions to put to this witness we will proceed to get these facts from some one else.

Mr. Thurmond: Will you give the number of employees of the Louisiana and Pacific now?

Mr. McLean: Well, it employs a general superintendent and local auditor and car accountant, chief despatcher, five agents, four telegraph operators, about fifteen clerks, five stenographers, three porters, eight train crews and the necessary trackmen. The number of trackmen vary from time to time.

Mr. Thurmond: Have you made out a tabulated statement of the lumber originating on the Louisiana and Pacific and delivered to connecting lines for six months ending October 31, 1910.

Mr. McLean: Yes, sir.

Mr. Thurmond: And forest products handled locally on

1566 the Louisiana & Pacific for the six months ending October 31, 1910?

Mr. McLean: Yes, sir.

Mr. Thurmond: A statement of carloads and less than carloads originating on the Louisiana & Pacific delivered to various connecting carriers for the same period?

Mr. McLean: Yes, sir.

Mr. Thurmond: A statement of carloads and less than carloads received by the Louisiana & Pacific Railway Company from connecting carriers?

Mr. McLean: Yes, sir.

Mr. Thurmond: And the freight handled for other than these four lumber companies mentioned?

Mr. McLean: Yes, sir.

Mr. Thurmond: Is this correct?

Mr. McLean: It is, to the best of my knowledge and belief.

Mr. Cowan: Does that cover logs as well as lumber?

Mr. McLean: No.

(The paper so offered and identified was received in evidence and thereupon marked Louisiana & Pacific Railway Company Ex-
1567 hibit 3, Witness McLean, received in evidence December 13, 1910, and is attached hereto.)

Mr. Thurmond: Are you familiar with the stations on the line of this road?

Mr. McLean: Yes.

Mr. Thurmond: The towns, I mean.

Mr. McLean: Yes.

Mr. Thurmond: Will you give the principal towns and industries on this road?

Mr. McLean: Starting out at De Ridder, Louisiana, it has a population of approximately five thousand people. The principal industries there are the Gulf Refining Company, Waters-Pierce Oil Company, Hudson River Lumber Company, Crystal Ice Company, Ridder Bottle Works and some thirty or more mercantile houses and two banks.

The next station is what is known as the experimental farm; the principal industry located there is the Long Mill Experimental Farm Company.

Mr. Thurmond: What does it do?

Mr. McLean: General farming and fruit raising and stock raising.

Mr. Thurmond: Fruit specialties and farm products?

Mr. McLean: The next is Bonami, Louisiana.

Mr. Thurmond: Can you say about what investment that
1568 farm represents?

Mr. McLean: I could not. It it quite extensive. Bonami, the population is approximately two thousand people and the principal industry is the King-Ryder Lumber Company and the King-Ryder Mercantile Company.

The next is Bannester, Louisiana, a small population. The W. A. Brown Lumber Company is located at that point, and they also have a mercantile company.

Longville, Louisiana, has a population approximating two thousand and the principal industry is the Longville Long Leaf Lumber Company and Mercantile Company. Besides those two industries at that town there are a number of independent stores.

Mr. Thurmond: Does any mercandise go over the Louisiana & Pacific to those stores?

Mr. McLean: Yes, sir.

The next is Fulton, our junction with the N. O., T. & N.

Mr. Thurmond: That is the junction with the Frisco system?

Mr. McLean: That is the junction with the Frisco System. The population of that town is about one hundred, and the Merchandise Store is about the only industry there.

1569 Gaytine, Louisiana, has a small population. The Calcasieu Naval Stores are located at that point.

Gillis, Louisiana, is a small town with a population perhaps about two hundred. General merchandise store and a branch of the Calcasieu Naval Stores is located at that place.

Lake Charles has a population of about 23,000; quite a jobbing center and supports a large population. On our branch line, on the branch running from De Ridder, the principal town is Bundick with a population of perhaps two hundred to two hundred and fifty. The industries there are the Hudson River Lumber Company's store and the Longville Naval Stores and the Hudson River Mercantile Company.

On the Bonami branch, Walla is about seven and a half miles west of Lilly Junction, with a population of about two hundred and fifty. The principal industry is the King-Ryder Lumber Company. There is also a small Lumber Company there named the Bundick Creek Lumber Company, which ships several carloads of lumber every month.

On the branch from Fayette is Camp Curtis, about nine miles west. The population is about two hundred. The principal industry is the Calcasieu Long Leaf Lumber Company and their

1570 Mercantile Company. That I believe is all the towns of any distinction on the line.

Mr. Thurmond: What is the average haul of the logs hauled over the Louisiana & Pacific rails from the origin of the logs to their delivery to the connecting lines?

Mr. McLean: About thirty miles.

Mr. Thurmond: What is the average haul of the finished products from the mills hauled over these connecting lines?

Mr. McLean: Approximately twenty miles.

Commissioner Harlan: Do you lease any equipment to the lumber companies?

Mr. McLean: Yes, sir.

Commissioner Harlan: Take the mill at De Ridder Junction, or is there a mill there?

Mr. McLean: At De Ridder Junction, no. The mill is located at De Ridder.

Commissioner Harlan: It operates with your equipment the tram line into Bundick?

Mr. McLean: Yes.

Commissioner Harlan: What is the consideration for the lease by your company of that equipment?

Mr. McLean: There is no consideration except in the
1571 terms of the contract.

Commissioner Harlan: Well, what is the general consideration as expressed in that contract?

Mr. McLean: That we get one hundred per cent of the output of the mill, the entire output of the mill.

Commissioner Harlan: You are now talking about one hundred per cent of the lumber milled?

Mr. McLean: What haul do you perform on that lumber?

Mr. McLean: We take the logs at Bundick and handle them into De Ridder and we take the finished product at the mill and deliver it to the various connecting lines.

Commissioner Harlan: What connecting line gets most of the output at De Ridder?

Mr. McLean: That I could not answer. It varies. I perhaps could give you the entire output of all the mills better than I could any one mill.

Commissioner Harlan: Where do you take the logs, at Bundick or out on the tram line?

Mr. McLean: At Bundick.

Commissioner Harlan: They are delivered to you there by the lumber company?

Mr. McLean: Yes.

1572 Commissioner Harlan: With its own locomotives?

Mr. McLean: Yes.

Commissioner Harlan: Do you unload them at the mill?

Mr. McLean: Yes, sir; our crew unloads the logs at the mill into the pond.

Commissioner Harlan: Do you make any charge against the lumber company for that service?

Mr. McLean: No.

Commissioner Harlan: Are you paid anything for the service and if so by whom and how?

Mr. McLean: We get our proportion of the through rate.

Commissioner Harlan: The through rate goes back to Bundick?

Mr. McLean: The through rate goes back to Bundick.

Commissioner Harlan: It is just a milling in transit.

Mr. McLean: It is just a milling in transit arrangement.

Commissioner Harlan: What are your divisions?

Mr. McLean: They vary from one and a half cents to five and a half cents.

Commissioner Harlan: On what traffic do you get five and a half cents?

Mr. Thurmond: The traffic manager will give all those
1573 details.

Commissioner Harlan: Very well. Do you have a similar arrangement with mills who get their logs from logging lines that join your road at Walla?

Mr. McLean: Yes.

Commissioner Harlan: That is to say you lease them equipment on the condition that you get one hundred per cent of their traffic?

Mr. McLean: Yes.

Commissioner Harlan: You have that arrangement with all the mills?

Mr. McLean: Yes.

Commissioner Harlan: Have you any written contracts with any of the regular lines for division? Can the traffic man give us that?

Mr. Thurmond: That is on file with the Commission.

Commissioner Harlan: How long does this lease run with the Lake Charles & Northern?

Mr. McLean: Twenty years, from 1906.

Commissioner Harlan: Now is not the Lake Charles & Northern physically in good condition?

Mr. McLean: Yes.

1574 Commissioner Harlan: Well ballasted?

Mr. McLean: Not ballasted.

Commissioner Harlan: What rails has it?

Mr. McLean: I think it is sixty pound rail all the way through.

Commissioner Harlan: It is as good a road as your branches to Bundick, Walla and Camp Curtis?

Mr. McLean: The same kind.

Commissioner Harlan: The same kind of a road?

Mr. McLean: Yes.

Commissioner Harlan: Is it not equipped with power and cars?

Mr. McLean: I do not know what the equipment is.

Commissioner Harlan: Is it not in a physical condition to haul all this traffic just as well as your road?

Mr. McLean: That I could not say. I do not know what its equipment is.

Commissioner Harlan: Do you handle business for the general public along the line of that road?

Mr. McLean: We do.

Commissioner Harlan: Is that controlled by the contract in any way?

Mr. McLean: No.

1575 Commissioner Harlan: The contract is silent on that question?

Mr. McLean: Yes.

Commissioner Harlan: You do not haul many passengers though, do you?

Mr. McLean: No.

Commissioner Harlan: Do you engage in the through haul of outside products on your road?

Mr. McLean: Yes, sir.

Commissioner Harlan: But the Lake Charles & Northern gets practically all that outside tonnage, does it not?

Mr. McLean: No I don't believe it gets as much as we do. Now, of course, that is just my observation, but I believe we are handling more outside tonnage than the Lake Charles & Northern is.

Mr. Cowan: Because of the fact that they have operating men and traffic men who know more about the details, I would rather postpone any cross examination now of Mr. McLean for the present.

Mr. Thurmond: Did you state to the Commission that your road pays sixty per cent of the salaries of the joint agents?

Mr. McLean: I did not.

1576 Mr. Thurmond: That is a fact?

Mr. McLean: Yes.

Mr. Thurmond: Except as to Lake Charles, where they have their own agent and pay it all?

Mr. McLean: Yes.

Commissioner Harlan: Have you the custody of the contracts with the company?

Mr. McLean: No, I have not.

Commissioner Harlan: Who has?

Mr. McLean: I have copies of them.

Commissioner Harlan: You have copies of all the contracts?

Mr. McLean: Yes, sir.

Commissioner Harlan: Is there any contract between your company and the Lake Charles & Northern which limits or purports to limit the operations of your company to the Long-Bell traffic?

Mr. McLean: Not to my knowledge, absolutely not.

Commissioner Harlan: Did you ever hear of any such?

Mr. McLean: I never did.

(Witness excused.)

1577 R. S. DAVIS, was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: How long have you been connected with the Louisiana & Pacific Railway as traffic manager?

Mr. Davis: About 6 years.

Commissioner Harlan: Prior to that time had you any relation with that road in any other capacity?

Mr. Davis: No, sir.

Commissioner Harlan: Have you been a railroad man for some time?

Mr. Davis: Yes, sir.

Commissioner Harlan: Are you familiar with the contracts between this road and other companies with relation to traffic?

Mr. Davis: To some extent, so far as relating to traffic, yes, sir.

Commissioner Harlan: Is there any contract between the Lake Charles & Northern and the Louisiana & Pacific that limits the operations of the latter to the Long-Bell traffic?

Mr. Davis: No, sir, no contract

Commissioner Harlan: Any understanding of that kind?

1578 Mr. Davis: I don't know. I have heard that there was such an understanding. I am not familiar with it. There has been some question about our soliciting traffic in that way.

Commissioner Harlan: As to your right to solicit traffic?

Mr. Davis: Yes, sir.

Commissioner Harlan: Well, what arrangement is there between the two roads for the division of revenue from traffic which originates on the Lake Charles & Northern and is handled by the Louisiana & Pacific?

Mr. Davis: There is no arrangement—did you state originating on the Lake Charles & Northern?

Commissioner Harlan: Yes.

Mr. Davis: We are absolutely separate and distinct from the Lake Charles & Northern. The Louisana & Pacific operates a railroad that originates and delivers tonnage and has absolutely no connection with the Lake Charles & Northern.

Commissioner Harlan: There is no contract relating to the revenues from traffic originating on the Lake Charles & Northern but handled exclusively by your road?

Mr. Davis: Originating on the Lake Charles & Northern?

Commissioner Harlan: In the sense that it is the lessor
1579 company and owns this line. It originates not on your branch lines, but on the leased part of your line.

Mr. Davis: The Lake Charles & Northern traverses the same territory between De Ridder and Lake Charles that we do. If they originate any tonnage, we do not get a haul on it. I do not believe I understand your question.

Commissioner Harlan: Well, perhaps not. I am not talking about traffic originating on the Lake Charles & Northern that the Lake Charles & Northern hauls, but traffic originating on the Lake Charles & Northern as distinguished from your branch lines that you own yourself and handle exclusively by your line. Is there any obscurity in that question? If there is, I will try to put it another way.

Mr. Davis: I don't understand the question.

Commissioner Harlan: Well, here is a point called Bannister which is on your leased line.

Mr. Davis: Yes.

Commissioner Harlan: And it is on a line that is owned by the Lake Charles & Northern and operated by the Lake Charles & Northern.

Mr. Davis: Yes.

1580 Commissioner Harlan: Now suppose there is a shipment of general merchandise offered to you at that point, I refer to traffic originating on the Lake Charles & Northern, but suppose it is handled——

Mr. Davis: I catch your point, handled by the Louisiana & Pacific line?

Commissioner Harlan: Yes. Is there an understanding or agreement with respect to the division of revenue?

Mr. Davis: No, sir, none that I know of.

Commissioner Harlan: Does your line get all of the revenue?

Mr. Davis: Yes, sir.

Commissioner Harlan: They get it all?

Mr. Davis: All, so far as the haul is concerned. If we handled shipments from Bannister to Lake Charles going to New Orleans we get our proportion of the through rate.

Commissioner Harlan: And the Lake Charles & Northern does not get any of it?

Mr. Davis: No, sir. That is our own line and we pay for the privilege of operating over it.

Commissioner Harlan: Is there any understanding by which the output of these mills is divided up between the Southern
1581 Pacific and the Frisco?

Mr. Davis: There is a contract with each line, a contract with the Frisco and one with the Southern Pacific.

Commissioner Harlan: What is the general result of those contracts?

Mr. Davis: The general result of those contracts is that 40 per cent of the tonnage goes to the Southern Pacific and 60 per cent to the Frisco, providing they furnish the equipment.

Commissioner Harlan: If they do not furnish the equipment you have the privilege of giving it to the other line?

Mr. Davis: Yes.

Commissioner Harlan: Is it not true that the Lake Charles & Northern is physically able to haul all of this traffic for the Long-Bell lines as well as your line?

Mr. Davis: I believe so. I do not know, I suppose if they are not now, they could furnish enough motive power to handle it. I do not know whether they are able now or not. The condition of the road, it is one line, and I suppose they can do what we are doing in the matter of operating.

Commissioner Harlan: Then as I understand it, you have the right to pick up traffic at any point along the line?

1582 Mr. Davis: Yes.

Commissioner Harlan: And move it and get all the revenue from it?

Mr. Davis: Yes.

Commissioner Harlan: And that your understanding has been that there is some understanding or agreement which gives you all the Long-Bell traffic?

Mr. Davis: There is an understanding that we get all the tonnage originating from the timber handled by our company under a milling in transit arrangement, all the product of that timber.

Mr. Thurmond: That understanding is with these various lumber companies.

Mr. Davis: Yes.

Commissioner Harlan: You heard the testimony of Mr. McLean about the rates?

Mr. Davis: Yes, sir, I think so.

Commissioner Harlan: Is there any correction you wish to make?

Mr. Davis: I don't now remember just what he said. We carry a full line of class and commodity rates with all connections except the Santa Fe.

1583 Commissioner Harlan: About 98 per cent of all your tonnage is tonnage coming from these companies?

Mr. Davis: I presume that is a fair statement. I have not a statement here that shows that actually.

Commissioner Harlan: Can you tell us what the average division you receive on all your lumber shipments is?

Mr. Davis: I should think the average would run about 3.9 cents per 100 pounds. I am not sure but that is—I have in mind a statement made up some time ago which furnished that information, and that was the figure. It may be more or less.

Commissioner Harlan: Are there not wholly independent mills in this country that you serve?

Mr. Davis: Adjacent or tributary to the Louisiana & Pacific?

Commissioner Harlan: Yes.

Mr. Davis: There is one small mill at Walla, I believe.

Commissioner Harlan: Is it situated on your line?

Mr. Davis: I have never seen the mill. I understand it is right on the line, yes, sir.

Commissioner Harlan: That is the only one you know that is wholly independent?

1584 Mr. Davis: Yes, sir. The W. A. Brown Lumber Company at Bannister.

Commissioner Harlan: Do those people get their logs from lands owned by any of these Long-Bell interests?

Mr. Davis: I cannot answer that question. I don't know.

Commissioner Harlan: You do not know what is the case with the Brown people at Bannister?

Mr. Davis: No. I know we handle some of their business, and that is all.

Commissioner Harlan: What do you understand to be the service that your line performs for these divisions?

Mr. Davis: An average service on lumber of 19.9 miles, and on the logs about 30 miles.

Commissioner Harlan: Do you haul any logs on the main line that have not reached the main line over these branch lines?

Mr. Davis: I do not think so, no. I do not know of any logging movement at all on the main line from one point to another. They all go into the mill.

Commissioner Harlan: Which branch line gives you the largest logging movement?

Mr. Davis: Well, that would be a guess on my part. It is reasonable to say that the mill that ships the largest amount of

1585 manufactured lumber would do that. I do not know. I am not a lumber man.

Commissioner Harlan: Which mill ships the largest amount?

Mr. Davis: The mill at Lake Charles. The annual capacity of the mill at De Ridder is 1800 cars, at Bonami 3000 cars, and at Longville 3500 cars, and Lake Charles 3000 cars.

Commissioner Harlan: Where do the logs come from that reach the mill at Lake Charles?

Mr. Davis: From a point called Camp Curtis.

Commissioner Harlan: Then when the logs are milled there which way does the lumber go out ordinarily?

Mr. Davis: The lumber ordinarily, as a transportation proposition should go out over the Southern Pacific; but on account of the

car supply we have to haul it to Fulton very often. We aim to give a large percentage of that tonnage to the Southern Pacific, but it is not always possible to do it.

Commissioner Harlan: There is considerable back haul on that?

Mr. Davis: Yes, sir, about 18 miles.

Commissioner Harlan: 18 miles?

Mr. Davis: Yes, sir.

1586 Commissioner Harlan: Is there any back haul from the lumber mill at De Ridder, in actual practice?

Mr. Davis: No, that is a direct haul from the mill to the various connections.

Commissioner Harlan: Have you some questions, Mr. Thurmond?

Mr. Thurmond: Mr. Davis, you say you have been with the Louisiana & Pacific for six years?

Mr. Davis: About that time, yes, sir; six or seven.

Mr. Thurmond: You are familiar with how that road grew up and how these smaller roads were brought together and the big line constructed?

Mr. Davis: I know something of the conditions existing then, yes, sir.

Mr. Thurmond: I think if you would go into that and explain it, I think it would answer the question the Commissioner asked of the other witness, and also carry it right on up and explain what this Louisiana & Pacific Road does with reference to connecting up with these other roads.

Mr. Davis: In 1905, I think it was, 1904 or 1905, the largest owner in the Louisiana & Pacific, Mr. Long, made an effort to find other outlets for his tonnage. The facilities we had at

1587 that time were limited. We only had one connection, the Kansas City Southern. And negotiations were conducted between the Missouri Pacific, in connection with the line for the terminus of the Louisiana & Pacific to Alexandria, and also with the Santa Fe. The proposition with the Santa Fe was to connect up with them over about the Sabine River. The Santa Fe proposition fell through, the Santa Fe deciding to build their own line over into Louisiana. Nothing came of the Missouri Pacific's proposition at that time on account of the—I really don't know the reason why, the Gould people could not meet the terms or conditions or were not willing to enter into negotiations at that time, and the road was started south. Mr. Harriman, as I understand it, had been looking for an outlet north, and entered into negotiations with Mr. Long. As the result of those negotiations Mr. Long, who had completed his road I believe to a point south of Fulton about a mile, sold his line to the Southern Pacific people at the book cost, whatever that was. It was handled by their engineers and other expert men.

Mr. Thurmond: Begin just a little back of that point and tell about what there was already there prior to the time that you have told about in the way of roads which served the mills,

1588 for instance, the Bradley-Ramsey Road.

Mr. Davis: Before Mr. Long started south with this prop-

erty he organized the Louisiana & Pacific Railway, taking over the De Ridder & Eastern Road, which was running at that time between Bundick and De Ridder; also the line of the Louisiana & Pacific, running from Bonami out to Walla. Those two lines were in existence at that time. He had this Lake Charles & Leesville Road, which was a narrow gauge line, which had just been purchased, running from a point on the Calcasieu River north over towards Camp Curtis. Those three roads were taken over by this company, and as I stated, this extension south was started when these negotiations with the Southern Pacific people were entered into. Mr. Harriman wanted a line north, and Mr. Long wanted a line south. The result was that the road was sold, as I understand—I was not present when the terms were made—at its actual value, and the compensation being the cost of the road plus the right to operate at a certain rental, which I believe is 25 cents per mile, the Louisiana & Pacific Railway paying 60 per cent of the station expenses and salaries, and so forth, of the agents.

1589 Commissioner Harlan: Who maintains the track?

Mr. Davis: The Lake Charles & Northern, I believe.

Mr. Thurmond: What connection does that give the Louisiana & Pacific Road as completed, as it is now?

Mr. Davis: The Louisiana & Pacific at the time it started to build had but one connection, the Kansas City Southern. That line was not able to furnish equipment, and there were days and weeks at a time when the mills could not get cars. The extension of this line and the arrangement made for a track into Lake Charles has given us connection with the Frisco, Iron Mountain, Kansas City Southern at Lake Charles and the Southern Pacific at Lake Charles, and the Frisco at Fulton.

Mr. Andrews: To better understand what he is now saying would you mind my asking what line was physically on the ground that was sold in this sale he is speaking about? I did not get from him just what was there to sell. Will you explain?

Mr. Davis: What railroad was there to sell?

Mr. Andrews: Yes, sir, what was physically on the ground which you explain was sold to the Harriman System?

Mr. Davis: Well, I do not know what was physically on the

1590 ground except the rail.

Mr. Andrews: Well, what part of it there on the map, from where to where?

Mr. Davis: From De Ridder down to a point just south of Fulton, I understand it is about a mile.

Mr. Andrews: That is what was sold?

Mr. Davis: That was sold by the Louisiana & Pacific to the Lake Charles & Northern.

Mr. Andrews: And it had not reached Lake Charles then, as shown on this map?

Mr. Davis: It had not reached Lake Charles when the Lake Charles & Leesville Road was purchased; it was a narrow gauge road, and that was part of the trade.

Mr. Andrews: I did not know what was included in that sale.

Mr. Thurmond: Mr. Garwood says he does not understand about the Lake Charles & Leesville. That was the road which was bought from the Bradley-Ramsey Milling Company.

Mr. Davis: Yes, sir.

Mr. Thurmond: Extended from where to where?

Mr. Davis: The road was originally owned by the Bradley-Ramsey people and extended from a place called Banks, on the
1591 Calcasieu River north, as I remember, 25 or 30 miles in this section.

Mr. Thurmond: Up to where Camp Curtis is now?

Mr. Davis: Yes.

Mr. Thurmond: About 30 miles of road?

1592 Mr. Davis: That is my recollection.

Mr. Thurmond: And that part of the Bradley & Ramsey Road was incorporated into the Louisiana & Pacific, and sold to the Lake Charles & Northern?

Mr. Davis: Yes.

Mr. Thurmond: Part of the De Ridder Road south was sold to that road?

Mr. Davis: Yes, sir.

Mr. Garwood: Was the narrow gauge brought up to standard gauge before the sale to the Lake Charles & Northern?

Mr. Davis: Well, when the Louisiana & Pacific sold the right of way, or that narrow gauge property, it was with the understanding that it would be a standard gauge into Lake Charles, they having the right to operate over it.

Mr. Garwood: Then the Lake Charles & Northern built its own road down then from a point a little below Fulton to Calcasieu River?

Mr. Davis: They built their own line down to the Calcasieu River, and crossing the river near Goosport and——

Mr. Garwood: So that the Louisiana & Pacific when it sold out to the Lake Charles & Northern, returned the right to use the tracks?

1593 Mr. Davis: Absolutely; otherwise the road would not have been sold.

Mr. Garwood: It retained that much of an estate in the line which it itself owned and constructed?

Mr. Davis: Yes.

Mr. Garwood: And acquired the additional estate of the right to use the track of the Lake Charles & Northern, constructed from a point below Fulton into Lake Charles?

Mr. Davis: Yes.

Mr. Garwood: I understand now.

Mr. Thurmond: Further, I will get you to state if it is not a fact that these contracts were made simultaneously?

Mr. Davis: I think so.

Mr. Thurmond: The contract of sale to the Lake Charles & Northern containing the right to a trackage contract which was afterwards executed and is on file with the Commission, and also a contract with the Louisiana & Western part of the Southern Pacific System providing for joint routes and through rates with that company?

Mr. Davis: Yes, sir.

1594 Mr. Thurmond: I will ask you if that was not all one transaction at the time.

Mr. Davis: I understand so; yes, sir.

Commissioner Harlan: Did that contract provide for divisions also?

Mr. Thurmond: I believe the contract with the Louisiana & Western provides for joint rates and through routes and divisions.

Mr. Davis: It provides for a four cent division, except on export business, and that was to be——

Commissioner Harlan: Were the lumber companies made parties to that contract?

Mr. Davis: I think so.

Commissioner Harlan: The four lumber companies?

Mr. Davis: I think so.

Commissioner Harlan: Are not those lumber companies also actual parties to other contracts for divisions?

Mr. Davis: I think they are also parties to the contract with the Frisco. The question of tonnage was involved there.

Commissioner Harlan: This lease, as I understand it, has about 18 years to run?

1595 Mr. Davis: I do not know. I heard Mr. McLean say about twenty years. I am not sure.

Mr. Thurmond: It has sixteen years now.

Commissioner Harlan: Is it not pretty well understood around there that that lumber will all be cut out in about fifteen years?

Mr. Davis: I really don't know. I imagine——

Commissioner Harlan: Is not that the general gossip and understanding?

Mr. Davis: Some of that timber will be cut out in five years.

Commissioner Harlan: I mean that there will be none left in fifteen years.

Mr. Davis: In that section?

Commissioner Harlan: I mean that can be conveniently reached by these lines.

Mr. Davis: I do not know about that, Mr. Commissioner.

Commissioner Harlan: Well, I suppose you are not familiar with those details, but is not that the general current gossip?

Mr. Davis: Well, I have heard it said that the yellow pine business will cease to be a business in about 25 years or 30

1596 years. I do not know how true that is.

Commissioner Harlan: I had in mind this territory served by this particular line.

Mr. Davis: I suppose that gossip that you refer to will apply to that line.

Commissioner Harlan: Now, as I understood it, you said that you understood that there was some contract or agreement or understanding that limits the Louisiana & Pacific activity to the Long-Bell traffic?

Mr. Davis: Yes, sir, I said something to that effect.

Commissioner Harlan: That, at any rate, is the actual practice,

is it not? The Louisiana & Pacific does not move any traffic except what comes from those interests?

Mr. Davis: The Louisiana & Pacific have through rates and divisions with the Kansas City Southern, the Frisco, the St. Louis, Iron Mountain & Southern, and Lake Charles, also the Kansas City Southern at Lake Charles. We have gone to a good deal of expense in supplying our agents and ourselves with tariffs, and the public, and we have made an earnest effort to secure a good share of the business going to all of those stations, and I think the records of the Lake Charles & Northern will show that we have been more than successful.

1597 Commissioner Harlan: General merchandise, class and commodity rates?

Mr. Davis: Yes, sir. I have some friends among the railroads, and there is a little hot air connected with this railroad business, but they promise great things, and I try to check them up and interchange reports show that they are giving us a good share of the merchandise for De Ridder, Bonami, Longville, Bannister and Walla; Walla, of course, we are bound to get, as that is a local point.

Mr. Blair: You spoke of the lumber companies being parties to the contract for a division of rates. Did not that same contract provide for a routing of traffic by the lumber companies?

Mr. Davis: Yes. I think I explained that to the Commissioner that there was a tonnage obligation there, and on that account they had to.

Mr. Blair: And their participation in the contract was as to the routing of traffic and not as to a share in the division?

Mr. Davis: Oh, absolutely no; they simply held that the Louisiana & Pacific was obligated to give the Southern Pacific 40

1598 per cent of the traffic if they furnished the cars.

Commissioner Harlan: I did not intend to be understood as thinking that they were to get any part of the division.

Mr. Blair: I just wanted to call attention that it was not simply a contract for divisions of rates, but for routing.

Commissioner Harlan: They were parties to a contract in which the division was settled?

Mr. Blair: Yes, sir, and a division as to traffic, to which they were necessarily parties.

Mr. Thurmond: But in the general operating contracts, the lumber companies are not parties, as to how the track shall be used.

Commissioner Harlan: I have not asked you, Mr. Davis, whether the Louisiana & Pacific makes any charge against the lumber compaines for hauling the logs.

Mr. Davis: They do not. The rate we publish now, Mr. Commissioner, includes transportation of the logs to the mill and the products to the connecting line.

Commissioner Harlan: And no charge for that service is made to the lumber company?

Mr. Davis: No, sir. That basis has been in effect in the Southwest for years, milling in transit, is in effect today

1599 on the trunk lines, as well as the short lines, and I am personally responsible for putting it in there, I think. In put-

ting in that adjustment I figured that it was an productive business, and I put in the milling in transit rate.

Commissioner Harlan: Does not that give the lumber company a very great advantage in the general markets over other companies, if it has its logs hauled to the mill for it without cost?

Mr. Davis: Well, I am not familiar, Mr. Harlan, with the lumber business, but I am sure, from the inquiries I have made on that point, that the investigation will show, if you care to go into it, that if there is any advantage in the cost to manufacture. I cannot say as to that, but it does not appear that this advantage is shown up in the cost of selling lumber, and that is what you want to get at. Whether this milling in transit enables the mills to produce lumber and sell it cheaper than somebody else.

Commissioner Harlan: Well, in all of its aspects, whether it is not a great advantage.

Mr. Davis: Well, I cannot say as to that.

Commissioner Harlan: You do know, do you not, that a number of lumber roads have been bought by the regular
1600 lines?

Mr. Davis: Yes.

Commissioner Harlan: Some of them at very high mileage prices.

Mr. Davis: Yes, sir.

Commissioner Harlan: And I assume that if not your road, some of the other roads, are looking forward to the consummation of some such agreement. Now, considering it as one investment by the same people, looking forward to such an ultimate result, does not the situation daily build up a very substantial asset for those people and thus give them a very great and decided advantage over other people that do not have tap lines and divisions?

Mr. Davis: Do you refer to the cost of manufacture?

Commissioner Harlan: The general result of the investment. They own the railroad; they own the mill, and they make earnings on the railroad, and these earnings go back into the property and prepare it for purchase at a high price by the regular line. Taking the result of the whole investment, does it not give them a very decided advantage?

Mr. Davis: I cannot see that it does. I do not think that—
1601 the blanket system of making rates in the South is pretty well observed, and I do not believe that this question, if there is any advantage which can be shown by the lumber companies' books in this milling in transit business, I do not believe that enters into the selling of lumber, and that is what you are trying to get at, is it not?

Commissioner Harlan: The sale of the lumber?

Mr. Davis: Yes, sir. The proposition, as I understand it is, that you are trying to ascertain if this allowance or milling in transit proposition discriminates in any way for or against.

Commissioner Harlan: Yes.

Mr. Davis: If that is what you are trying to get at, I am not in position to say as a lumber man whether it does or does not, but it is my own belief that it does not, from my own observation and inquiry.

Commissioner Harlan: What does 4 cents per 100 pounds on an ordinary carload of lumber amount to?

Mr. Davis: Four cents per 100 pounds would amount to about $20.00 a car, and I think we run about an average of 50,000 pounds to the car.

Commissioner Harlan: And some of those mills will turn out how many cars a year? One of them 2500, I think you
1602 said.

Mr. Davis: Yes, sir.

Commissioner Harlan: Well, that amounts to $70,000 a year.

Mr. Davis: Yes, sir.

Commissioner Harlan: Now do you mean to say that that is not reflected in the cost of the producing of the lumber, if the same interest owns a mill and a railroad, and the railroad is finally sold at a high price.

Mr. Davis: If it is, I do not know it, and I have tried to find it out and I have not been able to. This tap line question has been before us for a number of years, and my friends, Judge Cowan and others, have been claiming that and I have been trying to satisfy myself personally. The blanket system of rate making is in this section, and I do not believe that the cost to manufacture enters into the sale of lumber at all. I remember four years ago we had a meeting in Austin, Mr. Farley claiming to represent 200,000 farmers, appeared there and asked for a reduction in the rates on lumber in the State of Texas. The chief witness for the railroads at that time was Mr. Bonner, who is now connected with the Kirby Lumber Company. He told the Commission that a reduction
1603 in those rates would not benefit the farmer, that the lumber was sold on a blanket rate, and if there was any reduction made it would go to the manufacturer, and I think that any—the point I am trying to make is this, that any advantage the manufacturer may have through this common ownership of owning his railroad and owning his lumber mill is something that he is working for, and he keeps it, he does not give it away.

Commissioner Harlan: You mean he does not give it away in the price of the lumber?

Mr. Davis: Yes.

Commissioner Harlan: But does not he accumulate it in the less cost of manufacturing lumber?

Mr. Davis: One mill without a tram road may manufacture lumber $1.00 a thousand less than one which does have a road. Some men may have poor sawmill managers. Those are conditions you cannot equalize by freight rates. The mills on the Louisiana & Pacific may sell lumber at a higher average rate than a mill on some other line. Those are matters which all have a bearing on the question.

Commissioner Harlan: Have you looked into the tap line question from a broad point of view to see what the practice
1604 is elsewhere?

Mr. Davis: Do you mean all over this section of the country?

Commissioner Harlan: Yes.

Mr. Davis: I have in a general way kept close touch with it for the last few years.

Commissioner Harlan: Is it not true that the tap lines which do not receive divisions represent about as much capital and about as much mileage as the tap lines that do receive divisions?

Mr. Davis: I could not answer that. I do not believe that is true, but I would not attempt to discuss that with you.

Commissioner Harlan: Assuming that is true, is there no advantage in the divisions that are given to some of these lines?

Mr. Davis: I would have to know all the conditions surrounding the man who has a road and receives no divisions before I can answer that question. There may be some other compensations. That was brought out here last year when Mr. Park testified that he did not believe in taking divisions, but he would take $4,000,000
1605 or three and a half million dollars. Those are all matters which enter into the general question, and you would have to know all the facts before you could reach a decision. At least I would before I would answer the question.

Commissioner Harlan: But as a mere fact on the surface, as you see the surface of things, it would make a difference?

Mr. Davis: It would make a difference just as two trunk lines, one running parallel to the other and one getting divisions and the other not getting divisions; one would operate at a loss and the other may be paying operating expenses.

Commissioner Harlan: Well, but Mr. Davis, it seems to me you are looking at this thing from a little different aspect. Here are the surface conditions. Now assume that as many tap lines do not get allowances and have as much mileage as those that do, and assume also there is a certain average cost per mile, a certain average degree of efficiency, to use the term which has been used once recently. Assume all those conditions, and we have got to assume them for the general purposes in philosophizing about these things. Does the division make any difference?

1606 Mr. Davis: It is bound to make a difference, as I say, if you take two lines, one getting a division and the other operating under similar conditions and not getting a division, if it has not any other means of support, it is bound to make a difference, as a railroad proposition: that is the way I view it. But whether or not it makes a difference to a man who has a railroad and will not take a division or not, I cannot say.

Mr. Garwood: Would not the considerations suggested which would tend to show that the man who owns the tap line has a supposed or possible advantage over one that does not, apply equally as strongly to the man who had the large, improved and modern sawmill as against the man who has the small unimproved and ancient machinery and poor operation?

Mr. Davis: I should think so, yes, sir, without question.

Mr. Garwood: And do not all of those general considerations to which your attention has been called, go rather to the size of the investment and the manner of conduct of the industry?

Mr. Davis: Yes, sir.

Mr. Garwood: A railroad assumes heavier liabilities first as a common carrier of freight, does it not?

1607 Mr. Davis: That is my understanding, yes, sir.

Mr. Garwood: It is a guarantor, except as against the act of God and the common enemy; it is also subject to heavy libilities for damages of all character, is it not?

Mr. Davis: It is.

Mr. Garwood: It complies with excessively burdensome regulations, both State and Federal?

Mr. Davis: Yes, sir.

Mr. Garwood: It is compelled under severe penalties, to receive all freight tendered to it, to properly equip and operate its cars, and so forth, with all of those liabilities, and not only direct liabilities but possibly heavy losses, counting also the interest upon the heavy investments, it is not more than likely that the man with the tap line, in so far as possible loss is concerned and the general risks of a large and heavy business, is in a worse condition than the man who has no tap line investment?

Mr. Davis: I should think so. That is a pretty long question and covers a good deal of ground.

Mr. Garwood: I intended it to, because it does cover a good deal of ground.

Mr. Davis: But I think your proposition that the man that

1608 is burdened with the railroad, as you mean?

Mr. Garwood: Yes.

Mr. Davis: Yes, sir; he is up against it.

Commissioner Harlan: Well, Mr. Davis, if he is burdened with a railroad that carries 98 per cent of his traffic, is that liability to loss a very serious one, and if 100 per cent of the traffic is his traffic where is the liability that the other fellow does not have?

Mr. Garwood: I have seen single damage suits in Texas which resulted in verdicts for damages which would wipe off many of the tap lines which have appeared before your Honor.

Mr. Cowan: I wonder why they incorporated, if there is any such danger?

Commissioner Harlan: I come back just at this point, because it relates to the question—I asked Mr. Davis a moment ago whether he made any charge against the lumber company for hauling logs to the mill, and he said no. Now I would like to know whether that cost is not a very substantial element in the cost of producing lumber?

Mr. Davis: Well, that is a matter of record. I do not know a thing about the lumber business.

Commissioner Harlan: Well, but would you not, just from

1609 your practical experience in railroading——

Mr. Davis: As compared with whom?

Mr. Andrews: As a transportation item.

Commissioner Harlan: Would you not regard that as a practical element in the cost of the lumber f. o. b. the mill, the cost of getting the logs to the mill?

Mr. Davis: Yes, sir, the effect of that is shown in the cost of manufacture. To what extent I do not know.

Commissioner Harlan: Limiting the inquiry to just that item, you have said that in this particular case you make no charge against the mills that own this road.

Mr. Davis: No.

Commissioner Harlan: For hauling the logs to the mill?

Mr. Davis: That is right.

Commissioner Harlan: There are many other mills that have logging roads that receive no divisions and have to bear the burden of hauling the logs to the mill. Does not that make a difference in the cost of lumber f. o. b. the mill?

Mr. Davis: On the face of it I would imagine there would appear to be some difference.

Commissioner Harlan: And that would be manifested, would it not, where the man has to haul his logs by wagon?

1610 Mr. Davis: Pardon me. I answer that question by stating that before I would attempt to form an opinion or conclusion I would like to know something about the conditions under which this other man was operating. I think it is only fair if you make a comparison of that kind that we get all the facts.

Commissioner Harlan: Well, you want to go back into the woods and see whether his men are working efficiently and go into his mill and see if he has up-to-date machinery——

Mr. Davis: No.

Commissioner Harlan: And in that way you might find possibly conditions would equalize themselves.

Mr. Davis: No. You see to illustrate, here is a man running a logging road of 20 miles, and he does not get a division, and another one alongside of him the same distance does. The practice of recognizing these roads if they perform a service to the public is almost universal, as well as this man that does not get a division is at a disadvantage or not is the question you asked me, and I answered that I would want to know why he did not incorporate his road and take a division before I answered the question. All incorporated roads receive divisions, so I do not think it is a fair comparison.

1611 Commissioner Harlan: Well, if he does not take advantage of his opportunity, then he is at fault.

Mr. Davis: He is at fault, and I do not think the Commission can help him on that, because there is something wrong with his make-up if he has a railroad and a transportation company, and does not want to do business with any one.

Mr. Garwood: Relative to these milling in transit rates, suppose you shipped out from De Ridder a car of lumber, manufactured product, to a point to which your through rate did not apply, would there not then be a payment in such a case as that by the lumber company to the railroad company representing the cost of the transportation of the logs to De Ridder?

Mr. Davis: We charge them our regular local rates, yes, sir.

Mr. Garwood: In such a case there would be a charge of the regular local rate?

Mr. Davis: Yes, sir.

Mr. Garwood: And the other case is the ordinary application of milling in transit principle?

Mr. Davis: Yes, sir.

Mr. Garwood: Now I do not remember what divisions you
1612 stated you had with the Kansas City Southern.

Mr. Davis: Well, it runs, my recollection is, from one and a half to five cents.

Mr. Garwood: Do you do any considerable amount of your business with the Kansas City Southern?

Mr. Davis: We have been doing considerable, yes, sir.

Mr. Garwood: When you deliver cars to the Louisiana Western at Lake Charles, what service do you perform there? I see from the map here that you have very extensive terminals there. What service would you perform in making those deliveries?

Mr. Davis: This map as I understand it, represents—this is the unloading part. The timber docks are here. In delivering to the Louisiana Western, we take timber right over this line, switch it back and deliver it to the Louisiana & Western at this point here.

Commissioner Harlan: What distance is it?

Mr. Davis: I should say about three-quarters of a mile.

Mr. Thurmond: It is a mile from here to here (indicating).

Mr. Davis: And the dressed lumber is loaded from this track
here. We have several tracks in there and that is switched
1613 to the Louisiana & Western, and if it goes to the Kansas City Southern it is brought down here.

Commissioner Harlan: Did the Louisiana & Western never have a track of its own along those sheds?

Mr. Davis: No, I do not think so; in fact, I am sure of it. That represents the Louisiana & Pacific.

Commissioner Harlan: I say did it ever have?

Mr. Davis: I do not think they were ever in there.

Mr. Garwood: Can you state or have you any knowledge of the value of those terminals?

Mr Davis: I have not.

Mr. Garwood: I will not say the value. I will say the cost.

Mr. Davis: It is merely a matter of hearsay. I think they cost a matter of $40,000 or $50,000.

Mr. Thurmond: $64,000.

Mr. Davis: $64,000 was it?

Mr. Blair: Before that shipment reaches Lake Charles say from the mill at Bonami, what haul has your road performed?

Mr. Davis: 40 miles.

Mr. Blair: That is a haul of the finished product?

1614 Mr. Davis: Yes.

Mr. Blair: That is the service you perform in connection with the other service for the four cent division, so far as the Southern Pacific is concerned?

Mr. Davis: Yes.

Mr. Blair: You have a mill at Longville?

Mr. Davis: Yes, sir.

Mr. Blair: What length haul of the finished product do you perform in connection with the shipments delivered to the Louisiana & Western at Lake Charles?

Mr. Davis: 25 miles.

Commissioner Harlan: Mr. Davis, do you know what assessment is made by the state authorities on main line track?

Mr. Davis: I do not, no, sir.

Commissioner Harlan: Mr. McLean, do you know what assessment is made by the state authorities on main line track?

Mr. McLean: No, sir, I do not.

Commissioner Harlan: Is it not $2,500?

Mr. Rickey: $1,500.

Mr. Garwood: I do not think he understands the question.

Commissioner Harlan: What valuation is assessed upon a mile of road by the state authorities for the purpose of taxation?

1615 Mr. Blair: That differs with each road. They assess each road and sometimes different parts of the road at different valuations according to what they consider its value.

Commissioner Harlan: But is there not some general basis for main line track?

Mr. Blair: No, sir. Our main line is valued, I believe, at $12,000 for some miles.

Commissioner Harlan: Is there some fixed valuation for logging lines?

Mr. Rickey: I do not know.

Commissioner Harlan: Do you know that, Mr. McLean?

Mr. McLean: No, sir, I do not.

Mr. Thurmond: Mr. Davis, your road files its tariffs with the Interstate Commerce Commission?

Mr. Davis: It does.

Mr. Thurmond: You comply with the rules and regulations of the state authorities?

Mr. Davis: Yes, sir.

Mr. Thurmond: I am going to take this up one road at a time, but I will ask if the same is true with the Woodworth & 1616 Louisiana Central and the Sibley, Lake Bistineau & Southern?

Mr. Davis: Yes, sir.

Mr. Thurmond: Your Honor spoke about hauling by wagon. Is it not a fact that the lumber companies mentioned gather their logs up themselves and in their own way to the end of these termini of these branch roads?

Mr. Davis: What lumber companies? Are you talking about the small man?

Mr. Thurmond: I am talking about these on the line of this road which has been referred to.

Mr. Davis: I understand that they build spurs out from the terminus of our track, and——

Mr. Thurmond: So that the lumber company does bring those logs to the terminus of your line and assemble them by team, the same as the other man would have to do.

566

Mr. Davis: That is generally understood, I think, everywhere.
Mr. Thurmond: They do that at their own expense?
Mr. Davis: Yes, sir.
Mr. Thurmond: His Honor said something about 98 per cent, where the mill owners were doing 98 per cent of the business. I would like to offer in that connection a certificate made by the
1617 Secretary of the State Board of Railroad Commissioners of Louisiana, showing the percentage of lumber, logs and staves hauled by the various railroads in Louisiana. Answering directly your Honor's question, or in reply to that, I think the average lumber haul is about 66 miles, but noting some of these main line roads, the Rock Island is 68 per cent; the Santa Fe 92, and this particular road of ours is given in this list as 96 instead of 98. The Sibley, Lake Bi-tineau & Southern is 84, and the Woodworth & Louisiana Central 93. Those are comparative figures which may interest your Honor, and I would offer it.

(The paper so offered and identified, was received in evidence and thereupon marked Louisiana & Pacific Railway Exhibit No. 4, Witness Davis, received in evidence December 13th, 1910, and is attached hereto.)

Mr. Coleman: I think if you will look further you will find that is tonnage on the Santa Fe which terminates in Louisiana.
Mr. Thurmond: It shows for itself. You may take the witness, Mr. Cowan.
Mr. Cowan: It is now half-past five, and I have a big job with him.
1618 Commissioner Harlan: We will adjourn the further hearing of this case until 9.30 tomorrow morning.

1619 After the hour of adjournment was stated the Commissioner proceeded with the hearing of the Arkansas Eastern Railroad.

Arkansas Eastern Railroad.

F. E. GARY, was called as a witness, and having been duly sworn, testified as follows:

Mr. S. P. Andrews: What position do you hold with the Arkansas Eastern?
Mr. Gary: President.
Mr. Andrews: How long is that road?
Mr. Gary: It is between six and seven miles in operation.
Mr. Andrews: It extends from where?
Mr. Gary: From Turrell to Hafer.
Mr. Andrews: About six miles?
Mr. Gary: Between six and seven.
Mr. Andrews: Turrell is on what road?
Mr. Gary: The Frisco.
Mr. Andrews: What lumber company is at Turrell?
Mr. Gary: The Baker Lumber Company.

Mr. Andrews: Was this road built to Hafer prior to its incorporation, by the Baker Lumber Company?

1620 Mr. Gary: It was.

Mr. Andrews: When was the road incorporated?

Mr. Gary: In 1907.

Mr. Andrews: After it was incorporated, is it a fact that the stock of the railroad company was taken by the stockholders of the Lumber Company?

Mr. Gary: Most of it was; a little of it was sold outside.

Mr. Andrews: The stockholders of the lumber company own a controlling interest in the railroad company?

Mr. Gary: Yes, sir.

Mr. Andrews: I would like to file—I do not know whether you have been taking them, a certified copy of the articles of association

Commissioner Harlan: No, we have not been taking them.

Mr. Andrews: There was something on it that I wanted to call attention to.

Commissioner Harlan: It can be referred to.

Mr. Andrews: Very well. I offer a certified copy of the certificate.

(Paper not marked as an exhibit.)

Mr. Andrews: What is the capital stock of the railroad

1621 company?

Mr. Gary: $112,000.

Mr. Andrews: Divided into 1,120 shares.

Mr. Andrews: How much stock has been issued?

Mr. Gary: 425 Shares.

Mr. Andrews: And between what points has it been authorized to build its road?

Mr. Gary: From Big Creek to Earl, Arkansas.

Mr. Andrews: What is that total distance?

Mr. Gary: Sixteen miles.

Mr. Andrews: And Earl is at a point on the Crittenden Railroad?

Mr. Gary: Well, on the Iron Mountain; it connects with the Crittenden there; yes, sir.

Mr. Andrews: Have you had any negotiations with the owners of that Crittenden Railroad towards extending that road to Earl and form a connection with it or a consolidation?

Mr. Gary: Yes, sir.

Mr. Andrews: Why have you not completed the road from Hafer to Earl?

Mr. Gary: Well, we started to build before this agitation came up about the tap line and money was pretty tight for the last year or two, so we have not done it.

1622 Commissioner Harlan: What is that distance?

Mr. Andrews: It is sixteen miles total length, and they have built six miles from the town of Hafer.

Mr. Andrews: What is the population of Big Creek or Turrell? It seems to have two names.

Mr. Gary: About four hundred, I guess.

Mr. Andrews: And Earl, what is the population?

Mr. Gary: I think about one thousand, possibly more, maybe about fifteen hundred.

Mr. Andrews: What is the population of this town Hafer, where the road now ends?

Mr. Gary: I should say in the neighborhood of two hundred people.

Mr. Andrews: Is there a post office there?

Mr. Gary: Yes.

Mr. Andrews: Please state whether or not you are constructing an extension beyond the town of Hafter towards Earl.

Mr. Gary: We have got three miles now of the dump thrown up ready to put on the ties and iron.

Mr. Andrews: You say it is about ready to put on the iron and ties?

1623 Mr. Gary: Yes, sir; practically ready.

Mr. Andrews: Has the entire route of your railroad been surveyed?

Mr. Gary: Yes, sir.

Mr. Andrews: And a plat showing the location and alignment of the road has been made?

Mr. Gary: Yes, sir.

Mr. Andrews: And a profile?

Mr. Gary: Yes, sir.

Mr. Andrews: When was that made, was it shortly after you incorporated?

Mr. Gary: I think it was the same fall; it was incorporated in June and that work was done that fall.

Mr. Andrews: Has this plat and profile been filed in the proper state offices in Arkansas?

Mr. Gary: Yes, sir.

Mr. Andrews: Have you a map showing the line already built as well as this projected line?

Mr. Gary: Yes, sir. This is not my regular railroad line.

(The map so offered and identified was received in evidence and thereupon marked Arkansas Eastern Exhibit 1, Witness
1624 Gary, received in evidence December 13th, and is attached hereto.)

(Witness explains map to the Commissioner.)

Mr. Andrews: From point A on that map at Turrell the road line extends from there to the point marked B, and B is at Hafer, is it?

Mr. Gary: Yes, sir.

Mr. Andrews: And that is the completed road?

Mr. Gary: That is the completed road.

Mr. Andrews: The extension is represented by another red line extending from B to a point marked C; is that right?

Mr. Gary: Yes, sir.

Mr. Andrews: That you say is about ready for the iron?

Mr. Gary: That is ready for the iron; yes, sir.

Mr. Andrews: The rest of your line from C to Earl on the Iron Mountain, no work has been done on that?

Mr. Gary: No work has been done on that.

Mr. Andrews: But it has been surveyed and the plat and profile made and filed?

Mr. Gary: Yes, sir.

Commissioner Harlan: There the proposed right of way meets the Crittenden Road?

1625 Mr. Gary: Yes, sir.

Mr. Andrews: What is the Baker Lumber Company, a corporation?

Mr. Gary: Yes, sir.

Mr. Andrews: An Illinois corporation?

Mr. Gary: Yes, sir.

Mr. Andrews: Where is its mill?

Mr. Gary: At Turrell.

Mr. Andrews: What kind of lumber does it handle?

Mr. Gary: Hardwood.

Mr. Andrews: No yellow pine?

Mr. Gary: No.

Mr. Andrews: Who are its officers?

Mr. Gary: L. K. Baker, is president; I am vice-president and John W. Gary secretary and treasurer.

Mr. Andrews: Are any of the officers of the lumber company officers of the railroad company?

Mr. Gary: I am the only one. I am president of the railroad company.

Mr. Andrews: The organizations of the two companies are kept separate and distinct?

Mr. Gary: Yes.

1626 Commissioner Harlan: Do you get a salary from both companies?

Mr. Gary: No, not from the railroad company.

Commissioner Harlan: Does any other railroad officer get any salary?

Mr. Gary: Only the traffic manager.

Mr. Andrews: Have you a map showing the land originally owned by the lumber company?

Mr. Gary: Yes, sir.

Commissioner Harlan: What is the acreage?

Mr. Gary: 25,000 Acres.

Commissioner Harlan: That is originally owned?

Mr. Gary: Yes, sir.

Mr. Andrews: I wish to file this map showing the land originally owned by the Baker Lumber Company.

(The map so offered and identified was received in evidence and thereupon marked Arkansas & Eastern Exhibit No. 2, Witness Gary, received in evidence December 13, 1910, and is attached hereto.)

Mr. Andrews: How many acres did it originally own?

Mr. Gary: 25,000.

Mr. Andrews: Has it sold any of the lands?

1627 Mr. Gary: We have practically sold them all.

Mr. Andrews: Have you delivered deeds for a great part of it?

Mr. Gary: All those marked "S" have been deeded, and the balance are under contract.

Mr. Andrews: And on this map, this portion that is marked pink or red, was that your land originally?

Mr. Gary: Yes, sir.

Mr. Andrews: And deeds to that have not been given yet?

Mr. Gary: Deeds have not been issued. Well, possibly there are a few pieces of it have, but not all of it.

Mr. Andrews: But it has been sold?

A. It is under contract, yes, sir.

Mr. Andrews: And that marked "S", the deeds have been given?

Mr. Gary: Yes.

Mr. Andrews: The conveyances made to purchasers?

Mr. Gary: Yes, sir.

Commissioner Harlan: Different purchasers?

Mr. Gary: Yes.

Mr. Andrews: Was that sold in large or small tracts?

Mr. Gary: Well, from 160 acres up to 1000 acres.

Commissioner Harlan: Had the land been cut over?

1628 Mr. Gary: Yes, we sold it after we cut it over.

Commissioner Harlan: It was sold for agricultural purposes?

Mr. Gary: Yes.

Mr. Andrews: What was the market value of that land when you sold it, on the average?

Mr. Gary: The first sale I made was $5.00 an acre.

Mr. Andrews: What is it now selling for?

Mr. Gary: From $20.00 to $30.00 an acre.

Mr. Andrews: That is what you call St. Francis bottom land, is it?

Mr. Gary: Yes.

Mr. Andrews: What equipment has this railroad company?

Mr. Gary: We have three locomotives and about 50 cars.

Mr. Andrews: How do you get your logs from the woods to the main line or to the tap line?

Mr. Gary: To the tap line with teams. You mean from the tree?

Mr. Andrews: From the tree into Hafer?

Mr. Gary: We build spur tracks from Hafer into the woods.

Mr. Andrews: Who builds spur tracks into the woods?

Mr. Gary: The lumber company builds those.

Commissioner Harlan: Does the railroad company furnish

1629 the rail?

Mr. Gary: The railroad company furnishes the rail. They own all that rail. We build the tracks and the lumber company uses that as part of their logging plant, and they load the logs on to the car.

Commissioner Harlan: Who loads the logs?

Mr. Gary: The lumber company does all that work.

Mr. Andrews: Does the railroad company make any charge for the hauling of the logs from the woods to the junction with the tap line?

Mr. Gary: We make a $20.00 a day charge, I think it is either $20.00 or $25.00.

Mr. Andrews: $25.00, is it not?
Mr. Gary: I think it is $25.00 a day.
Mr. Andrews: They charge that and collect it from the Baker Lumber Company?
Mr. Gary: Yes, sir, for the train service.
Commissioner Harlan: For the train service on these tram lines?
Mr. Gary: Yes.
Mr. Andrews: Does that cover your expense in building the tram line?
1630 Mr. Gary: No, those spur tracks are all done by the lumber company.
Mr. Andrews: You said the railroad company before.
Mr. Gary: I did not mean that.
Mr. Andrews: The rails are owned by the railroad company?
Mr. Gary: Yes.
Mr. Andrews: And loaned to the lumber company?
Mr. Gary: Yes.
Mr. Andrews: And the lumber company pays all the labor for moving the tracks?
Mr. Gary: Yes.
Mr. Andrews: Have you had an estimate made of the cost to the Baker Lumber Company for logging its timber or logs from the tree to the mill?
Mr. Gary: Well, my report last year shows what the yearly cost was.
Mr. Andrews: What was that?
Mr. Gary: It was between 7.50 and 7.75 for the year, all kinds of timber.
Mr. Andrews: Do you mean that was the average cost per thousand?
Mr. Gary: Average cost from the stump to the sawmill.
Mr. Andrews: To the mill at Turrell?
1631 Mr. Gary: Yes.
Mr. Andrews: $7.50 to $8.00?
Mr. Gary: A little over $7.50, between $7.50 and $7.75.
Commissioner Harlan: That was the cost to the lumber company?
Mr. Gary: That was the cost to the lumber company.
Commissioner Harlan: Of moving what quantity of logs?
Mr. Gary: It is hardly logs; that would be a thousand feet, $7.50 a thousand.
Commissioner Harlan: $7.50 a thousand feet for felling the tree, loading the logs on the car, and taking them into the mill?
Mr. Gary: That was the lumber company's cost from the stump to the mill.
Mr. Andrews: You do not mean cutting the tree down?
Mr. Gary: Oh, yes.
Mr. Andrews: I thought you meant getting the logs from the tree to the mill?
Mr. Gary: No, that is logging expense and all.
Mr. Andrews: You did not separate the cost of felling the tree from the cost of transporting the logs from the tree to the mill.

1632 Mr. Gary: We have each one of those items separate, but I do not know as I could tell you.

Mr. Andrews: I would like to have the privilege of filing that in this case, that is the cost of the Baker Lumber Company, of getting the log that is cut down from the woods to the mill at Turrell.

Commissioner Harlan: That would be the figure he has just given less the cost of felling the tree and cross-sawing the tree.

Mr. Gary: Yes.

Mr. Andrews: That is all.

Commissioner Harlan: Let me ask, Mr. Gary, that figure you have just given includes some payment made by the lumber company to the railroad company, does it not?

Mr. Gary: I did not just catch that.

Commissioner Harlan: You have just stated it cost $7.50 a thousand feet. Is that log measure?

Mr. Gary: Yes, sir, log measure.

Commissioner Harlan: For felling the tree and cutting the log, and getting the log to the mill?

Mr. Gary: Yes, sir.

Commissioner Harlan: That is the cost to the lumber
1633 company?

Mr. Gary: That is the cost to the lumber company, yes, sir.

Commissioner Harlan: What part of that, if any, is paid by the lumber company to the railroad company which hauls the logs to the mill?

Mr. Gary: It would be that train service.

Commissioner Harlan: You have not stated the basis of train service on logs to the mill?

Mr. Andrews: He said $25.00 a day, they charged for the use of the engines and equipment.

Commissioner Harlan: I thought that was on the logging road?

Mr. Andrews: Yes, sir.

Commissioner Harlan: I am talking now of an item of $7.50 which fells the tree and gets the logs to the mill.

Mr. Gary: Well, of course, those are figures made up for my lumber business, and that means a total cost from the time it starts from the tree until it is landed at the mill.

Commissioner Harlan: Now does that mean in the pond?

Mr. Gary: We have no pond; we unload our logs from the car right on to the log deck.

1634 Commissioner Harlan: You must pay some service to the railroad company, something to the railroad company for its service?

Mr. Andrews: Only the through rate.

Commissioner Harlan: That was the point I wanted to get at.

Mr. Gary: There is the milling in transit in that.

Commissioner Harlan: In other words, the lumber company does not pay your road anything?

Mr. Gary: Only what they get through this division.

Commissioner Harlan: Except this $25.00 a day for operating the tram connections to the tap line?

Mr. Gary: Yes, sir.

Commissioner Harlan: So that the lumber company gets its logs hauled to the mill free of charge?

Mr. Gary: Well, we figure that they get their portion through the through rate when the lumber is shipped out.

Commissioner Harlan: There is no transaction between the railroad and the lumber company that results in the payment by the lumber company to your road for that service of hauling the logs to the mill?

Mr. Gary: We pay nothing more than that train service,
1635 no, sir.

Commissioner Harlan: So then there really is a free haul of the logs, so far as the railing company is concerned?

Mr. Gary: Yes, the Baker Lumber Company pays for hauling it, though.

Commissioner Harlan: Do you as a railroad haul logs over your line for any other lumber company?

Mr. Gary: Yes, sir.

Commissioner Harlan: For whom?

Mr. Gary: Well, we are taking out some logs at the present time for the Wisarkana Lumber Company.

Commissioner Harlan: To what mill are those logs hauled?

Mr. Gary: That is the Wisarkana mill up at Nettleton, Arkansas; it is state business.

Commissioner Harlan: It goes beyond your line?

Mr. Gary: Yes, sir; it is turned over to the Frisco.

Mr. Andrews: I had not overlooked that. I was going to ask the traffic man about hauling that stuff.

Commissioner Harlan: Well, do you charge that company for hauling the logs on your line?

Mr. Gary: As I understand, it would be charged the tariff rate.

1636 Commissioner Harlan: The local Arkansas rate?

Mr. Gary: I think so; I am not very familiar with that.

Mr. Andrews: I will put the traffic man on to show what he charges for that and what industries are there.

Commissioner Harlan: Who loads the logs on your cars?

Mr. Gary: The Baker Lumber Company loads their own.

Commissioner Harlan: Your railroad men do not participate?

Mr. Gary: No.

Mr. Andrews: Who unloads them from the cars?

Mr. Gary: The Baker Lumber Company.

Commissioner Harlan: Your railroad men do not participate in that?

Mr. Gary: No.

Commissioner Harlan: Then your railroad employees, your train and track crews, do no labor at all for the lumber company?

Mr. Gary: No.

Commissioner Harlan: But the clerks in the lumber company office do?

Mr. Gary: No.

Commissioner Harlan: You have a clerk who does that work for the railroad company?

1637 Mr. Gary: Yes, sir.

Commissioner Harlan: He is paid by the railroad?

Mr. Gary: Yes, sir.

Commissioner Harlan: And receives nothing from the lumber company?

Mr. Gary: Well, I did not know that he was, but he was just telling me that he did get a small part of his salary from the lumber company.

Commissioner Harlan: That seems usually to be the case that the clerk who serves the railroad has not enough to do, so he also serves the lumber company and is a joint employé and is paid by both. I assume that is so with yours.

Mr. Gary: I understand from him today that he does get some of his pay from the lumber company. I did not know it. I should have asked that question, but did not.

Commissioner Harlan: But you do not?

Mr. Gary: No.

Commissioner Harlan: Do you remember the total tonnage you moved last year?

Mr. Gary: I have not those figures.

Mr. Andrews: I am going to give the revenue and as much as we can of that data from the traffic man.

1638 Commissioner Harlan: I think of nothing else from Mr. Gary.

(Witness excused.)

H. F. Willis, was called as a witness, and having been duly sworn, testified as follows:

Mr. Andrews: Where do you live?

Mr. Willis: Turrell, Arkansas.

Mr. Andrews: How long have you been connected with the Arkansas Eastern Railway?

Mr. Willis: A little over three years.

Mr. Andrews: If you are in the employ of the lumber company, please state as briefly as you can what your duties for the lumber company are?

Mr. Willis: Originally I was not in the employ of the Baker Lumber Company; my employment originally was to attend to the railroad work. Later on there was a small amount of clerical work given to me belonging to the Baker Lumber Company's work for which a small portion of my salary is paid; that is an additional allowance was made me for that work.

1639 Mr. Andrews: You do not do anything else for the lumber company except what you have spoken of?

Mr. Willis: That is all.

Mr. Andrews: Please state to the Commissioner what industries are on the line of this railroad?

Mr. Willis: We have two cotton gins, a stave mill and general merchandise store.

Mr. Andrews: Where is this store?
Mr. Willis: At Hafer.
Mr. Andrews: Is there a postoffice at Hafer?
Mr. Willis: Yes, sir, there is a postoffice at Hafer.
Mr. Andrews: Do you know whether or not there is another stave factory about to be erected on the line of the road?
Mr. Willis: We have just about completed the arrangements for another stave factory to locate on our line, the plant of which will cost about $35,000.
Mr. Andrews: There is a saw mill, I understand, also on the line?
Mr. Willis: There is a saw mill south——
Mr. Andrews: On this extension, excuse me.
Mr. Willis: Yes, sir, south of Hafer, which we are now endeavoring to reach with the extension of the road, or which we will
1640 reach with the extension of the road which has been testified to.
Mr. Andrews: That saw mill, does it belong to the Baker Lumber Company?
Mr. Willis: No, sir, the Baker Lumber Company has no connection with it absolutely.
Mr. Andrews: You expect to get the movement of that lumber on your road to Turrell?
Mr. Willis: We will get that movement.
Mr. Andrews: Is there any other way for that lumber to go out?
Mr. Willis: Only by wagon, hauling it 8 to 10 miles.
Mr. Andrews: These industries you have spoken of, have they all been located on this line since your connection with it?
Mr. Willis: Yes, sir, with the exception of the stave mill; it was just about ready for operation when I left there, as I remember it.
Mr. Andrews: How much cotton will you carry this year?
Mr. Willis: About 300 bales, possibly a little more than that.
Mr. Andrews: What amount of cotton do you estimate you
1641 will carry next year?
Mr. Willis: We should handle from 1500 to 2500 bales next year, if crop conditions are the average.
Mr. Andrews: I understand they are now opening a county road from Hafer west; is that true?
Mr. Willis: Yes, sir.
Mr. Andrews: Will this increase your traffic, and if so, why?
Mr. Willis: It will give us a connection with the well developed farming community over there in that territory, from which our information is that we should get next year 1000 to 1500 bales of cotton alone.
Mr. Andrews: How far is this community from Hafer?
Mr. Willis: It would be about four to five miles from Hafer, but nearer to that extension that we are making.
Mr. Andrews: Has that community any other railroad reaching it?
Mr. Willis: No, sir.
Mr. Andrews: Or is your road the nearest one?
Mr. Willis: Our road is the nearest, and will be the proper road to serve it.

Mr. Andrews: How near is any other railroad to it?

1642 Mr. Willis: 8 to 10 miles away.

Mr. Andrews: Had you through rates on cotton before the railroads cancelled your through rates?

Mr. Willis: Yes, sir.

Mr. Andrews: Through rates to where?

Mr. Willis: To Memphis points; that is our cotton market.

Mr. Andrews: Did you have any through rates on your classes and commodities, both in and out?

Mr. Willis: No, sir, we did not. The necessity for class and commodity rates had developed about a year and a half ago, and I had had the matter up with the Frisco traffic department, and they had agreed with me on putting in class and commodity rates both in and out, and it only lacked the detail of making up the tariffs about the time that this last agitation of the tap line question came out, and then they declined to put them in. They said that they thought we had better just stop where we were until the whole question was settled.

Mr. Andrews: At the present time, then, cotton that is being shipped from Hafer through to Memphis does not move under the joint rate?

Mr. Willis: It moves on the combination of the two locals.

1643 Mr. Andrews: What per cent of land adjacent to this road had been made ready for cultivation, approximately?

Mr. Willis: Well, about 60 per cent of it, I should judge, has been made ready for cultivation in its different stages; not all of it absolutely ready to plow, but deadened and cut down.

Commissioner Harlan: You refer to the land of the Baker Lumber Company?

Mr. Willis: Yes, sir, the land adjacent to the road through that territory.

Mr. Andrews: Immediately adjacent on either side of the road?

Mr. Willis: Well, my answer would apply to that general territory through which that line runs.

Mr. Andrews: How does this acreage compare with what it was two years ago?

Mr. Willis: Well, 200 to 300 per cent increase, I would say.

Mr. Andrews: There is a man named Hafer who lives at the town of Hafer. What acreage has he in cultivation now?

Mr. Willis: I think he got in about 600 acres this year. Last year he probably had in 400, and the year before that I am quite

1644 sure he did not have in over 200, and then it was in rather a raw state.

Mr. Andrews: Now what has been the growth of Hafer during the past three years, the number of buildings or houses?

Mr. Willis: Three years ago there was practically nothing there, one or two or possibly three houses. Now I should think they have got 25 to 30 houses there.

Mr. Andrews: Has the railroad company a team track at Hafer?

Mr. Willis: Yes, sir.

Mr. Andrews: Accommodating how many cars?

Mr. Willis: Six or seven cars.

Mr. Andrews: Name your stations from Turrell, on your road, the first station from Turrell?

Mr. Willis: Sousa, Wise and Hafer.

Mr. Andrews: In billing the logs that go through, I mean to Turrell for beyond, from what point do you bill them?

Mr. Willis: Those logs are all billed from Wise.

Mr. Andrews: Why not from Hafer?

Mr. Willis: Well, at the time the through rates were put in that was the farthest station out, and the tariffs have never been corrected to read Hafer yet.

1645 Mr. Andrews: Well, where do you bill your cotton from that you get from the gins at Hafer?

Mr. Willis: That is billed from Hafer.

Mr. Andrews: About what population does your road serve approximately?

Mr. Willis: I think between 2000 and 3000 people at the present time.

Mr. Andrews: And what population has this particular district that you say will be reached by the county road, how much will that add to the population served by your road?

Mr. Willis: I understand about 1500 people, 1000 to 1500, I suppose.

Mr. Andrews: What extent of territory would you say on each side of your road does your road serve. I mean that has a population?

Mr. Willis: Well, we expect to draw an average territory of between five to ten miles.

Mr. Andrews: Is it settled back from your road for quite a distance?

Mr. Willis: It is settling and will be settled.

Mr. Andrews: How far is it settled back now?

Mr. Willis: Oh, back that distance even.

1646 Mr. Andrews: By the way, what cars do you use in shipping cotton from Hafer?

Mr. Willis: We use cars from the Frisco connection.

Mr. Andrews: Foreign cars?

Mr. Willis: Yes, sir, foreign cars.

Mr. Andrews: Have you a per diem rule in force on foreign cars on your road?

Mr. Willis: Yes, sir.

Mr. Andrews: I wish you would describe very briefly the method of handling logs from points on your road to Turrell for beyond?

Mr. Willis: They are moved under the usual milling in transit arrangement; that is, the logs originate out on the line and move into Turrell or other points for milling, and then one or two cents is deducted on the through rate.

Mr. Andrews: The billing is from the point where you accept the logs on the tap line?

Mr. Willis: Yes, sir.

Commissioner Harlan: Is that so? Did you not say the lumber is billed from Wise?

Mr. Willis: Yes, sir

Mr. Andrews: I will change that. He explained why it
1647 was billed from Wise, because the present tariffs had never been changed and they stopped at Wise, and the published through rate in the Frisco tariffs, as I understand, gives a rate from Wise.

Mr. Willis: That is the farthest point out that a rate has been published from.

Commissioner Harlan: But as a matter of fact you haul it over your main line from some point beyond?

Mr. Willis: Yes, sir.

Mr. Andrews: State the divisions you receive on lumber or on interstate shipments?

Mr. Willis: On interstate shipments, one and one-half cents to Memphis on a six cent rate; two cents to Thebes on a 10 cent rate; three cents to St. Louis on a 12 cent rate, and three cents to Kansas City on a 12 cent rate.

Commissioner Harlan: Is three cents the highest division?

Mr. Willis: Three cents is the highest division we receive.

Mr. Andrews: How do these divisions on lumber compare with your divisions on cotton?

Mr. Willis: They are less than the division we did have on cotton.

Mr. Andrews: What was your division on cotton?

1648 Mr. Willis: Out of a rate of $1.00 per bale to Memphis, we received 35 cents per bale.

Mr. Andrews: Has your company paid any dividends?

Mr. Willis: No.

Mr. Andrews: What have you done with your surplus, if you have had any?

Mr. Willis: It has been used in additions and betterments to the road, that part of it that has been used.

Mr. Andrews: What is the amount of freight revenue for the year ending June 30th, 1910?

Mr. Willis: $17,161.95.

Mr. Andrews: What was the amount of that freight revenue during the said year from freight other than lumber on which you got divisions?

Mr. Willis: Well, it is not other than lumber.

Mr. Andrews: Well, what is it?

Mr. Willis: It is business other than that of which the holding company, or whatever it is termed, was interested.

Mr. Andrews: You mean the Baker Lumber Company?

Mr. Willis: Yes, sir.

Mr. Andrews: I will get that straight now. What is it, the amount of freight revenue during that year from freight
1649 other than the logs——

Mr. Willis: Other than business with which the Baker Lumber Company was interested.

Mr. Andrews: All right. Put it that way.

Mr. Willis: $5,111.04.

Mr. Andrews: What were the operating expenses for that fiscal year?

Mr Willis: $23,130.80.
Mr. Andrews: Did you pay any taxes, and how much?
Mr. Willis: $1,224.70.
Mr. Andrews: Making a total of what?
Mr. Willis: $24,355.50.
Mr. Andrews: Now your freight revenue was $17,161.95. Did you have any non-transportation revenue?
Mr. Willis: Yes, sir, $7,775.
Mr. Andrews: What was that for?
Mr. Willis: That was for special service out on the logging road, the $25.00 a day service.
Mr. Andrews: Those two together made a total of how much?
Mr. Willis: $24,936.95.
Commissioner Harlan: That is gross revenue from all
1650 sources?
Mr. Willis: Yes, sir.
Mr. Andrews: Leaving a surplus for the year of——
Mr. Willis: $581.45.
Mr. Andrews: You have not any bonded debt?
Mr. Willis: No, sir.
Mr. Andrews: You have filed concurrences in interstate tariffs and make annual and monthly reports to the Interstate Commerce Commission?
Mr. Willis: Yes, sir.
Mr. Andrews: Is your present equipment sufficient for your present track?
Mr. Willis: Yes, sir.
Mr. Andrews: You operate your trains regularly?
Mr. Willis: Yes.
Mr. Andrews: How many?
Mr. Willis: We operate a daily service and sometimes one and sometimes two trains a day.
Mr. Andrews: Do you carry passengers?
Mr. Willis: No.
Mr. Andrews: Have you furnished the Arkansas Tax Commission a list of your taxable property?
Mr. Willis: We are required to furnish that return annu-
1651 ally.
Mr. Andrews: Has the road been assessed as a railroad in Arkansas?
Mr. Willis: Yes, sir; we are assessed the same as other railroads.
Mr. Andrews: Have you a local tariff?
Mr. Willis: Yes, sir.
Mr. Andrews: We would like to file a copy of it.
Commissioner Harlan: Very well. It is not filed with the Interstate Commerce Commission?
Mr. Willis: No, sir, it is a local tariff.

(The paper so offered and identified, was received in evidence and thereupon marked Arkansas Eastern Railroad Exhibit 3, Witness Willis, received in evidence December 13th, 1910, and is attached hereto.)

Mr. Andrews: Has the railroad company a depot at Turrell?

Mr. Willis: We have a freight house there.

Mr. Andrews: Do you handle any carload shipments?

Mr. Willis: Yes, sir, considerable amount of them.

Mr. Andrews: Well, you handle all traffic, I suppose, that that general store at Hafer gets?

Mr. Willis: Absolutely all of it.

1652 Commissioner Harlan: Is that a company store?

Mr. Willis: It has no connection whatever with the company.

Mr. Andrews: About that Wisarkana Lumber Company, where is their timber tract, how far from the tap line?

Mr. Willis: They acquired a timber tract about two miles from our main line, and arranged to get it handled out over one of the logging trams, and we have been handling that traffic out for them. It moved about 150 cars in the last two months of that business.

Mr. Andrews: Let me understand that. Does the railroad company own the tracks over which those logs move to the Arkansas Eastern Railroad?

Mr. Willis: No, sir, those logs come up to the Arkansas Eastern over one of the Baker Lumber Company's tram roads.

Mr. Andrews: And where you connect with your Arkansas Eastern track is how far from Turrell?

Commissioner Harlan: What is that?

Mr. Andrews: I want to know where the tramway connects with the Arkansas Eastern, how far is it from Turrell.

Mr. Willis: That tram is about three miles out.

Mr. Andrews: About three miles from Turrell?

Mr. Willis: Yes, sir.

1653 Mr. Andrews: What rate do you charge that lumber company for hauling those logs?

Mr. Willis: We have charged our local rate to Turrell.

Mr. Andrews: What is it?

Mr. Willis: Two cents.

Mr. Andrews: Two cents per 100 pounds?

Mr. Willis: Yes, sir.

Mr. Andrews: Does that include the movement from where they chop the trees down?

Mr. Willis: No, sir.

Mr. Andrews: Over the tram?

Mr. Willis: No, that is the movement over the Arkansas Eastern Railroad.

Mr. Andrews: Who hauls the logs from the woods up to the Arkansas Eastern Railroad?

Mr. Willis: Well, we do under that other arrangement of $25.00 a day, which they arrange through the Baker Lumber Company.

Mr. Andrews: And that $25.00 a day includes, as I understand, the expense of your engine and your train crew?

Mr. Willis: Yes, sir.

Mr. Andrews: That is practically all, is it not?

1654 Mr. Willis: Yes, sir.

Mr. Andrews: What cars do you use in hauling those logs for this Wisarkana Lumber Company?

Mr. Willis: Foreign equipment furnished by the Frisco Railroad.

Mr. Andrews: So you bring those cars out to your road and your engine carries them over the tram?

Mr. Willis: Yes, sir.

Mr. Andrews: Does your railroad company load them?

Mr. Willis: No.

Mr. Andrews: Your engine brings them back to the Arkansas Eastern?

Mr. Willis: Yes, sir.

Mr. Andrews: About three miles from Turrell?

Mr. Willis: Yes, sir.

Mr. Andrews: Then your engine takes the cars down to Turrell?

Mr. Willis: Yes, sir.

Mr. Andrews: And delivers it where?

Mr. Willis: To the Frisco.

Mr. Andrews: These logs are not removed from the car?

Mr. Willis: No.

1655 Mr. Andrews: They go through to the destination?

Mr. Willis: Yes, sir.

Mr. Andrews: The destination is an Arkansas point?

Mr. Willis: Yes, sir.

Mr. Andrews: That is where the mill is located?

Mr. Willis: About 50 miles from Turrell on the Frisco Railroad.

Mr. Andrews: I have not any other questions.

Commissioner Harlan: Your rate is a local rate to Turrell on that stuff?

Mr. Willis: Yes, sir.

Commissioner Harlan: That amounts to about how much a car?

Mr. Willis: About $5.00 a car.

Commissioner Harlan: What is the weight of the logs, a carload?

Mr. Willis: We have no track scales and they are not weighed, and we are using the minimum weight on the car.

Commissioner Harlan: You haul logs a much further distance for the Baker Lumber Company without making any charge, do you not?

Mr. Willis: Yes, sir, we make a charge for that in the division of the trough rate.

1656 Commissioner Harlan: Do you make a charge against the lumber company?

Mr. Willis: We get a revenue for it in the division of the through rate for that haul.

Commissioner Harlan: Well, even so it is a much longer haul, is it not?

Mr. Willis: Yes, sir.

Commissioner Harlan: About twice——

Mr. Willis: About three miles. We would haul those same logs from the end of our line on the same rate.

Commissioner Harlan: But as a matter of fact you haul for the Baker Lumber Company some logs at a very much less rate than you haul for this lumber company for about half the distance?

Mr. Willis: Well, to figure it out it would perhaps be some less, but through rates generally are lower than local rates.

Commissioner Harlan: Yes. Now, Mr. Gary, let me ask at this point, did I understand that you had arranged—I infer the Baker Lumber Company, for the sale of all the lands not already sold?

Mr. Gary: Yes.

1657 Commissioner Harlan: And that would leave the Baker Lumber Company without any timber?

Mr. Gary: Without any land there. We own more or less timber; well, we own all the timber on the land that we have not cut over, but we have made a contract with a man whose name is on the top of that——

Commissioner Harlan: You keep your timber rights and sell the land?

Mr. Gary: Yes, sir.

Commissioner Harlan: Do your railroad employés do any loading of the logs on to the cars?

Mr. Willis: No.

Commissioner Harlan: Do not throw them off at the mill?

Mr. Willis: No.

Mr. Andrews: How many employés has the railroad company got in its exclusive service?

Mr. Willis: About 15.

Commissioner Harlan: How many locomotives?

Mr. Willis: Three.

Commissioner Harlan: How many cars?

Mr. Willis: About 50.

Commissioner Harlan: Now the mill is where in relation

1658 to the Frisco tracks?

Mr. Willis: It is at the junction of the Frisco and the Arkansas Eastern tracks.

Commissioner Harlan: Does the Baker Lumber Company ship out dressed lumber for the most part?

Mr. Willis: No, sir, their lumber is all rough shaped hardwood lumber.

Commissioner Harlan: It is loaded from the mill into the car at the Frisco track?

Mr. Willis: It is loaded from the yard, they have to have a large storage track, at the end of the cars which are on the connecting track which joins the Frisco and Arkansas Eastern.

Commissioner Harlan: Does not the Frisco's spur track run down to the mill?

Mr. Willis: The Frisco's spur track runs down to the mill, yes, sir.

Commissioner Harlan: A car is placed by the Frisco on that track?

Mr. Willis: Yes, sir.

Commissioner Harlan: A car is hauled out by the Frisco?

Mr. Willis: Yes, sir.

1659 Commissioner Harlan: So that you do not have any haul of the manufactured lumber?

Mr. Willis: We make no haul on the finished product of the lumber company, no, sir.

Commissioner Harlan: I believe that is all.

Mr. Andrews: If there are any statements, of course, we will be glad to furnish them.

Commissioner Harlan: Mr. Willis has already stated your gross revenue and given the amount derived from other sources.

Mr. Andrews: Yes, but he has not given the tonnage.

Commissioner Harlan: Do you haul lumber for any other than the Wisarkana Mill? Do you haul any staves?

Mr. Willis: Yes, sir, we haul staves for the stave company.

Commissioner Harlan: Where do they get their logs?

Mr. Willis: Their timber?

Commissioner Harlan: Their timber?

Mr. Willis: Out on the line—well, out on this Baker Lumber Company's tram lines.

Commissioner Harlan: Is that Baker Company's land?

Mr. Willis: Some of it, and some of it is not.

Commissioner Harlan: Well, for the most part?

1660 Mr. Wills: For the most part, yes, sir.

Commissioner Harlan: I would assume that that was the case.

Mr. Willis: Yes, sir; but on those lands that have not been sold there now a large lot of stuff has come off of those lines.

Commissioner Harlan: Does the Baker Lumber Company retain the lumber rights on a lot of that?

Mr. Willis: They retain it, but they do not get it always; sometimes when the fellow comes in and buys it he finds he has got something pretty nice and he sells it.

Commissioner Harlan: You do not carry mail and express matter?

Mr. Willis: No.

Commissioner Harlan: Or passengers?

Mr. Willis: No. Our freight service is equal to the express. That is daily, and we do not carry any mail. Our railroad is used for getting the mail out to Hafer, but it is through no arrangement with the railroad.

Mr. Andrews: You carry the man that carries the mail, I suppose?

Mr. Willis: Yes, sir.

1661 Commissioner Harlan: Are there any mills around there that haul the logs to the mill?

Mr. Willis: You mean immediately there?

Commissioner Harlan: Well, in that general neighborhood?

Mr. Willis: Yes, sir, there was one small mill about 10 or 15 miles away down on the Frisco Line that hauled their logs to the mill or hauled them in over the Frisco, one or the other.

Commissioner Harlan: I think that is all.

Mr. Andrews: The hauling of the logs from the tree up to the tramway, how is that done, by teams?

Mr. Willis: That is done by teams.

Mr. Andrews: That is the first movement?

Mr. Willis: That is the first movement.

Mr. Andrews: Then it is loaded on the tramway and it is pulled to the tap line?

Mr. Willis: Yes, sir; it requires teams in all cases to put logs to the tram.

(Witness excused.)

Mr. Andrews: I have a little technical matter here. I offer a certain article of the constitution of Arkansas, and some of
1662 the sections from the statutes of Arkansas regarding the incorporation of these roads, showing there is a Board in Arkansas composed of the Governor, Secretary of State and a number of officials who first pass on the public necessity of granting a charter, whether there is public necessity for the granting of the charter. So I offer this instead of bringing the book itself. I have had it compared, and it is correct.

(The paper so offered and identified, was received in evidence and thereupon marked Arkansas Eastern Exhibit No. 4, received in evidence December 13th, 1910, and is attached hereto.)

Whereupon, an adjournment was taken as per the announcement of the Commissioner, to Wednesday, December 14th, 1910, at 9:30 A. M.

1663 NEW ORLEANS, LA., *December* 14, 1910.

Met pursuant to adjournment at 9:30 A. M.

Present: Parties as before.

Mr. Jeffery: Before resuming this morning, I have been requested by Mr. Albert S. Brandeis, of the Louisville & Nashville Railroad Company to request leave to file a brief if he sees fit in this case. I simply make the motion in his behalf.

Commissioner Harlan: Very well. The motion will be of record, and some conclusion will be reached.

Mr. Jeffery: When I say in this case, I mean on the general subject.

Commissioner Harlan: The Paragould & Memphis Railway, is that before the Commission this morning?

(No response.)

Commissioner Harlan. The Prescott & Northwestern.

Mr. McRae: Yes.

Commissioner Harlan: Will you report in the other room before Examiner Burchmore?

The Saginaw & Ouachita River.

Mr. Mehaffy: Yes.

1664 Commissioner Harlan: Will you also report with your witnesses in the adjoining room? I believe Mr. Davis was on the stand for the Louisiana & Pacific Railway when the adjournment was taken.

Mr. Thurmond: Yes, sir. Before proceeding, counsel for the intervenors have asked us for a copy of that trackage contract. Now,

it occurs to me it would clear up this whole situation and it will not take us very long, and possibly the Commission has not got the contracts fully in mind, and I believe it would save time to read these contracts. It is all right in here, all this question of operation, and all, in these three contracts, and if the parties have not them in mind, they can get them here.

Commissioner Harlan: Judge Cowan, will it facilitate your cross examination?

Mr. Cowan: Of course the trouble about that is the consumption of time. The holiday season is approaching.

Mr. Thurmond: I believe it will save the time of the Commission.

Commissioner Harlan: I do not think I can undertake to carry the details of that contract. The Commission would have to examine them.

1665 Mr. Thurmond: I thought when we began that the Commissioner had the substance of them before him.

Commissioner Harlan: Well, we probably have. We will proceed. If you will, let me have them.

Mr. Thurmond: Those are my originals (handing papers).

Commissioner Harlan: Is Mr. Davis here? Will you resume the stand?

R. S. DAVIS, resumed the stand, and further examination continued.

Mr. Thurmond: I omitted to ask you about your membership in railway associations, car service associations. State what the fact is as to the Louisiana & Pacific Road in that respect.

Mr. Davis: We are members of the Western Weighing Association and Southern Car Service Association and the Louisiana Freight Bureau.

Mr. Thurmond: You operate under the rules of those associations?

Mr. Davis: Yes, sir.

Mr. Thurmond: Have you track scales along the line?

Mr. Davis: Yes, sir, a track scale at De Ridder, Bonami
1666 and Fulton.

Commissioner Harlan: You may proceed, Judge Cowan.

Mr. Cowan: For whom are you Traffic Manager?

Mr. Davis: The Louisiana & Pacific Railway, the Sibley, Lake Bistineau & Southern, and the Woodworth & Louisiana Central Railways.

Mr. Cowan: What individual employed you in that capacity?

Mr. Davis: Mr. Long.

Mr. Cowan: R. A. Long?

Mr. Davis: Yes, sir.

Mr. Cowan: And as Traffic Manager to whom do you make any report?

Mr. Davis: In regard to what?

Mr. Cowan: What you do?

Mr. Davis: Well, I do not make very many reports. Mr. Long does not attempt to keep up with the details of the business. I

confer with Mr. Sweet quite often. He is in active charge of the property.

Mr. Cowan: Do you make any formal official report to anybody?

Mr. Davis: If I am asked to I do, yes, sir.

Mr. Cowan: Well, do you?

1667 Mr. Davis: Well, I do not spend my time making reports. I don't understand your question.

Mr. Cowan: I am asking you if you make any formal written report to either of the railroad companies that you are traffic manager for?

Mr. Davis: About what, about my conduct?

Mr. Cowan: About anything.

Mr. Davis: If I am asked to I do, yes, sir.

Mr. Cowan: You might just say whether you make it or not. I do not know. You are asked this plain question, do you make any formal report?

Mr. Davis: If you will tell me what kind of an answer you want, I will make it.

Mr. Cowan: Say yes or no.

Mr. Davis: Well, if I am asked to make a report I make it, or if I have anything to report I make it.

Mr. Cowan: Well, you decline to answer the question?

Mr. Davis: No, sir, I do not.

Commissioner Harlan: Well, does it fall within the line of your duty to make formal and stated reports?

Mr. Davis: I should think so. I am simply an employé.

Commissioner Harlan: Have you made such reports?

1668 Mr. Davis: I think so.

Commissioner Harlan: And does it fall within your duties to make special reports when requested?

Mr. Davis: I should think it would, yes, sir.

Commissioner Harlan: And have you made special reports of particular questions responsively to special requests?

Mr. Davis: I do not recall any particular reports, but I think I have, yes.

Mr. Cowan: To whom did you make them?

Mr. Davis: Well, I would report to Mr. Long or Mr. Sweet.

Mr. Cowan: As a matter of fact to whom did you make such reports, if you made any?

Mr. Davis: I do not recall having made any particular reports now on any subject. If you will refer to any particular subject which you have in mind I will tell you.

Mr. Cowan: It would be impossible for me to, because I don't know.

Mr. Davis: It is impossible for me to pick out some particular subject and say I made a report on that subject.

Mr. Cowan: Have you as traffic manager of either one of these railroad companies made annual, quarterly or at any other stated period, reports of the operation of the traffic department of

1669 such railroad?

Mr. Davis: No, sir.

Mr. Cowan: Now have you reported the business you have been carrying on to anybody, verbally, or otherwise?

Mr. Davis: Yes, sir.

Mr. Cowan: And to whom did you make such report?

Mr. Davis: To Mr. Sweet.

Mr. Cowan: Who is Mr. Sweet?

Mr. Davis: He is Vice-President of the company.

Mr. Cowan: Which company?

Mr. Davis: The Louisiana & Pacific and the other two companies named.

Mr. Cowan: And is he also an official of each one of the lumber companies served by those roads?

Mr. Davis: I understand he is, yes, sir.

Mr. Cowan: Are you traffic manager also for any lumber company?

Mr. Davis: No.

Mr. Cowan: Who is the traffic manager of the lumber companies which your line serves?

Mr. Davis: Mr. Cowan, my relation to those companies is exactly the same as Mr. Hershey's of the Santa Fe. He looks after
1670 the traffic on the line and the shippers on the line look to me to furnish them with rates and cars and handle their claims and handle all matters pertaining to traffic.

Mr. Cowan: Is there a traffic manager of either one of the lumber companies, or of all of the lumber companies in the aggregate?

Mr. Davis: No, sir, I do not know of any.

Mr. Cowan: In dealing with each of these lumber companies respecting their traffic, with whom do you deal?

Mr. Davis: I would deal with the party who brought up the particular subject that was before me; maybe the manager of the mill, maybe the shipping clerk, the man who wrote the letter——

Mr. Cowan: There is no particular individual representing a control of the traffic of either lumber company, with whom you customarily deal?

Mr. Davis: No, I think the control of the traffic is governed by the contract under which we are operating.

Mr. Cowan: Who do you understand controls the traffic?

Mr. Davis: The Louisiana & Pacific, or the Woodworth & Louisiana Central, or the Sibley, Lake Bisteneau & Southern.

1671 Mr. Cowan: And they control the traffic of the respective lumber mills which were situated on their line and are served by them?

Mr. Davis: No, sir; of the particular mills you have in mind, the mills in which Mr. Long is interested.

Mr. Cowan: Well, that is what I mean.

Mr. Davis: There are other mills on the line that use their own judgment in the matter of routing.

Mr. Cowan: Well, that is what I mean. And you are the officer of the Louisiana & Pacific, the Sibley, Lake Bisteneau & Southern, and this other railroad, whatever the name is, who performs the service with respect to the control of the traffic?

Mr. Davis: Yes, sir. I have general supervision over it.

Mr. Cowan: Now, what control have you over the traffic? Do you direct what connecting lines it shall move over by any general rules which you issue to anyone, or by special directions in each shipment?

Mr. Davis: We are talking of lumber are we?

Mr. Cowan: Lumber of the Long-Bell Lumber Companies.

Mr. Davis: That is what you want to know about?

Mr. Cowan: Yes.

1672 Mr. Davis: We attempt to carry out the contracts the best we can, but the car supply controls the routing.

Mr. Cowan: A shipment from a station on the line of the Louisiana & Pacific must move either over the Frisco or the Southern Pacific lines first?

Mr. Davis: Not necessarily, no.

Mr. Cowan: Well, the Kansas City Southern then, I believe you stated?

Mr. Davis: Or the Iron Mountain.

Mr. Cowan: And many of the shipments go to points beyond each one of these lines?

Mr. Davis: Yes, sir.

Mr. Cowan: Who directs the routing from the point of origin to the destination?

Mr. Davis: We undertake to do that, unless there is some specific routing given by the shipper. In a number of cases we leave it to the connecting line.

Mr. Cowan: Well, who is the shipper?

Mr. Davis: Well, the shipper would be the man who loaded the car and delivered the car to us for transportation.

Mr. Cowan: And that would be one of these lumber companies?

Mr. Davis: Yes, sir, or somebody else on the line.

1673 Mr. Cowan: And they have turned over to the Louisiana & Pacific and the other lines for which you are traffic manager, the full right to control that routing?

Mr. Davis: Why, yes, they do not know anything about routing, I imagine.

Mr. Cowan: Have you submitted the names of the lumber companies which belong to the Long-Bell interests and are served by these railroads? Has that list been submitted—I suppose it will be.

Mr. Thurmond: I handed to the Commissioner a list of the stockholders in each of the four companies on the line in which Mr. Long has an interest. Was it put into the record and marked?

Commissioner Harlan: Yes, it was put in last night, I believe.

Mr. Cowan: We should like to have the amount of the holdings, as well as the list of the stockholders.

Commissioner Harlan: I think the list in its present form is not complete, and I so stated yesterday, that it ought to show the respective holdings in order to be of service.

Mr. Thurmond: There is such a bunch of them that I will

1674 have to ask to hand it in later, if you want it in that detail.

Commissioner Harlan: I would like it to show what the list was in 1910, indicating any change since that date.

Mr. Cowan: When were you employed, Mr. Davis, as traffic manager?

Mr. Davis: I was employed, I believe, in 1903.

Mr. Cowan: And you made your contract with Mr. Long?

Mr. Davis: No.

Mr. Cowan: Mr. Sweet? With whom did you make it?

Mr. Davis: Mr. Long simply employed me; I did not know whether I was going to be there a month or ten years.

Mr. Cowan: You agreed upon some salary, I presume?

Mr. Davis: Yes, the salary was agreed upon, I guess; I did not have much to say about the salary.

Mr. Cowan: Well, who designated how much you would get?

Mr. Davis: Mr. Long.

Mr. Cowan: Previous to that time what was your position with that business or industry?

Mr. Davis: Well, previous to that time I was with the Cotton Belt for about 20 years.

Mr. Cowan: Were you at any time employed by any of
1675 these lumber companies before the organization of the railroad?

Mr. Davis: When I went over to Kansas City I was employed as Traffic Manager of the Long-Bell Lumber Company, and was also traffic manager of two lines in which Mr. Long was interested; one was the De Ridder & Eastern and the other the Louisiana & Pacific Railway.

Mr. Cowan: And you were employed by Mr. Long in both these capacities?

Mr. Davis: Yes.

Mr. Thurmond: That was not the present Louisiana & Pacific?

Mr. Davis: No.

Mr. Thurmond: It was a road which ran out east.

Mr. Davis: No, when we reorganized and made a railroad out of those properties, I was appointed traffic manager, and I do not think it is worth while quibbling over that. I am traffic manager of everything and my duties are to look after the traffic, and I try to do it.

Mr. Thurmond: No. Counsel understands that the Louisiana & Pacific there was not the Louisiana & Pacific at this time?

Mr. Cowan: I just wanted to get your relation to the business industries previous to the time of the organization of the present
1676 company.

Mr. Davis: Previous to that I was Traffic Manager of the Long-Bell Lumber Company, and also Traffic Manager of these two short lines.

Mr. Cowan: And no one took your place as Traffic Manager of the lumber company?

Mr. Davis: Well, the Long-Bell Lumber Company—the business of that company, the Pacific Coast business, is handled by Mr. Breckenridge and the retail yard business is handled by Mr. Lewis. I have nothing to do with it.

Mr. Cowan: By that you mean the traffic or the sales?

Mr. Davis: The routing of the freight.

Mr. Cowan: The routing of the freight?
Mr. Davis: Yes.
Mr. Cowan: You have nothing to do with that?
Mr. Davis: No.
Mr. Cowan: So that the Louisiana & Pacific then does not control that?
Mr. Davis: They have absolutely nothing to do with it.
Mr. Cowan: Where do you keep your office?
Mr. Davis: We are in the R. A. Long Building, sixth floor, Kansas City.

1677 Mr. Cowan: Have you any assistants, any persons who assist you as traffic manager?

Mr. Davis: I have a chief clerk, chief rate clerk, two claim clerks and three stenographers.
Mr. Cowan: Who employed them?
Mr. Davis: I did.
Mr. Cowan: Who pays them?
Mr. Davis: The expense is divided between the three companies named a short time ago.
Mr. Thurmond: The three railroad companies?
Mr. Davis: The three railroad companies, yes, sir.
Mr. Cowan: Are there vouchers and accounts made out and sent in to the Auditor for the payment of these people?
Mr. Davis: We receive the money direct, separate accounts; it comes from the railroad company.
Mr. Cowan: Are either one of these persons whose names you have given as assistants—or rather you did not give the names, but that you mentioned as being assistants—are they employed by the lumber company?
Mr. Davis: No, sir.
Mr. Cowan: Do they perform any service for the lumber company?

1678 Mr. Davis: Nothing except in an indirect way. Our principal business is lumber, and we are naturally performing all the service we can to further the interests of those lumber men. I don't know just what——

Mr. Cowan: You are doing the same thing, of course, to further their interests?
Mr. Davis: Yes, sir; anybody on the line who wants me to do something for him, I am willing to do it.
Mr. Cowan: Where is the office of these lumber companies, the R. A. Long interests?
Mr. Davis: The King-Ryder Lumber Company is located at Bonami; the Hudson River Lumber Company at De Ridder; the Long-Bell Lumber Company at Longville, and the Calcasieu Long Leaf Lumber Company at Lake Charles.
Mr. Cowan: Do they have any general sales agent or other general agent at Kansas City?
Mr. Davis: I understand that the sales of those companies—the sales department, rather, is represented in Kansas City by Mr. Nelson.

Mr. Cowan: Where does Mr. Nelson have his office?
Mr. Davis: Kansas City.
Mr. Cowan: The same building you are in?
Mr. Davis: Yes, sir.
1679 Mr. Cowan: The same suite of offices?
Mr. Davis: No.
Mr. Cowan: Adjoining?
Mr. Davis: No, sir.
Mr. Cowan: Do you and Mr. Nelson consult with respect to the routing of the freight which he sells?
Mr. Davis: Occasionally, yes, sir.
Mr. Cowan: When were there any directors' meetings held by either of these railroad companies for whom you are traffic manager?
Mr. Davis: I cannot answer that.
Mr. Cowan: Did you attend any such meetings?
Mr. Davis: No, sir, I am not a director.
Mr. Cowan: When the sales agent makes a sale does he notify you of the fact and the amount of the sale and the place where it is to be delivered?
Mr. Davis: No, sir.
Mr. Cowan: He gives you no information about it?
Mr. Davis: We have information as to the shipments and furnish routing on them.
Mr. Cowan: Who gives that?
Mr. Davis: I do, my office.
1680 Mr. Cowan: I know you give the routing, but who gives you the information that a shipment is to be made?
Mr. Davis: Mr. Nelson's office.
Mr. Cowan: The general sales agent?
Mr. Davis: Yes, sir.
Mr. Cowan: And that is done in all cases, I assume?
Mr. Davis: I should think so. In a number of cases the shipper has some specific routing, I believe, mentioned in the order, and we simply follow that out.
Mr. Cowan: In routing a shipment you use the rate which of course pays your company the best results, if you can?
Mr. Davis: We aim to get all we can, yes, sir; but in routing shipments we give the mill the benefit of every available route, for the reason that the car supply controls the routing.
Mr. Cowan: What are your divisions with the Frisco?
Mr. Davis: They range from two to five and a half cents. I can give you that——
Mr. Cowan: Perhaps you could state in a short way the general proposition, the territory to which this division and that division applies by the different lines.
Mr. Davis: I think I can.
1681 Mr. Cowan: And then you may file the division sheets and save a little time that way.
Mr. Davis: Well, Oklahoma points, with the exception of certain lines, the M. K. & T., for example, gets 5 cents, and the M. K. & T. gets 4¾ cents. In Texas we get all the way from 1¾ cents up to

5½ cents, 1¾, 2¼, 4.1, 2¼, 4½—I can give a complete statement of that if you wish it.

Mr. Cowan: On what lines or what systems or to what groups do you get these different divisions, or does it go that way?

Mr. Davis: To what railroad?

Mr. Cowan: Yes. When you call the divisions, you might state.

Mr. Davis: It varies. We have divisions in nearly every Texas line, I believe; it depends largely on the volume of the through rate.

Mr. Cowan: You reach all important Texas points?

Mr. Davis: Yes, sir.

Mr. Cowan: Where do you get the Santa Fe at?

Mr. Davis: Where do we get them?

Mr. Cowan: Yes, where do you get on the Santa Fe?

Mr. Davis: We get them at De Ridder; they connect with
1682 us there. We have no through rates with them.

Mr. Cowan: So you make no shipments over the Santa Fe?

Mr. Davis: No.

Mr. Cowan: Do you make any shipments which go to the Santa Fe through Fort Worth?

Mr. Davis: No, we have no through rates with the Santa Fe.

Mr. Cowan: With the exception of the Santa Fe, do you have through rates with all lines in Texas?

Mr. Davis: Yes, I think it is pretty well covered.

Commissioner Harlan: Did not the Santa Fe at one time get a considerable part of the traffic of the Hudson River Lumber Company?

Mr. Davis: At one time they had divisions with us.

Commissioner Harlan: A good deal of traffic with other mills?

Mr. Davis: Yes, sir. Mr. Long, this gentleman we are talking about, has very heavy investments on the Santa Fe, but they shut him off and they have not been able to do anything from these mills at all.

Commissioner Harlan: Well, do you mean the Santa Fe closed its markets to you?

1683 Mr. Davis: Absolutely.

Commissioner Harlan: Well, that did not happen until you had gotten some other connections, did it?

Mr. Davis: Well, this whole thing happened so quick and such a change in the attitude of everybody in Texas and on the Santa Fe that I cannot account for it.

Commissioner Harlan: At one time the Kansas City Southern got some traffic?

Mr. Davis: Yes, sir, they get some today.

Commissioner Harlan: Well, they do not get very much. There is only about 10 per cent in which all the other lines can participate, as I remember the figures.

Mr. Davis: I noticed two weeks ago, a few days before I left home, bills of lading covering 21 cars over the Kansas City Southern in one day from two mills. We are not obligated to give our business to any particular line except in connection with the Frisco and Southern Pacific. We have a contract that provided they give us

the cars from month to month we will give them a certain division of our tonnage.

Commissioner Harlan: Is that 50 or 60 per cent?

Mr. Davis: 50 per cent to the Frisco and 40 per cent to
1684 the Southern Pacific.

Commissioner Harlan: And that means 10 per cent available for all other lines?

Mr. Davis: Yes, but there is generally 20 to 30 and sometimes 40 per cent available.

Mr. Cowan: Are there cases in which you receive divisions on shipments to points to which the division sheets do not apply?

Mr. Davis: Now will you state that again?

(Question read.)

Mr. Davis: We do in connection with the Santa Fe. We got a division, I suppose what you mean—we charge our local rate of 5 cents; there are no through rates or divisoons. We simply get our local rate.

Commissioner Harlan: Well, you refer to it as a division. Do you want that to stand?

Mr. Davis: No. He referred to it as a division. A division is simply what it says, a division of a through rate.

Commissioner Harlan: You do not get a division on Santa Fe business?

Mr. Davis: No, we simply take our local, and the effect of that is that I think the last fiscal year they had about five cars for
1685 the Santa Fe, and I think that was company material. I simply mention that to show you that this division to this so-called tap line, if it was a community of interest, might be used and Mr. Long would sell his yards on the Santa Fe if it was all in one pot.

Mr. Cowan: I understand, Mr. Davis, that the division sheets in some instances leave the divisions of the rate or the amount that is to go to each party, to the traffic officials to determine, in cases where the amount or percentage is not named in the division sheet.

Mr. Davis: Well, the division is determined before the division sheet is issued.

Mr. Cowan: Well, take it on export business, how are the divisions made there?

Mr. Davis: Well, the divisions on export business—do you want to know how they are made?

Mr. Cowan: Yes, does the division sheet name just what the division is to be?

Mr. Davis: Yes, sir.

Mr. Cowan: It is agreed upon between the traffic officials?

Mr. Davis: It is agreed upon first, and then the division
1686 sheet issued. If we had no divisions today with the Southern Pacific on export business through New Orleans we would not have any through rates. I would first undertake to fix the through rate, and then we would undertake to agree upon divisions and——

Mr. Cowan: I thought there were shipments made where they

sent some sort of a slip along with the shipment, and settlement to be made afterwards.

Mr. Davis: That is not railroading. I never heard a case of that kind.

Mr. Cowan: Then it is not done, as I understand.

Mr. Davis: Not on our line. I never heard of it.

Mr. Cowan: Do they have any such a thing as what you call a billing order?

Mr. Davis: A billing order?

Mr. Cowan: Yes.

Mr. Davis: Yes, sir; that is common throughout the country; that is an instruction to the agent as to how to bill, showing the through rate and division.

Mr. Cowan: Where there is a station to which a shipment is made, and the division sheet does not name what the divisions are to be, then does the billing order accompany the shipment?

1687 Mr. Davis: I do not know of such a case. There may be, I do not know what you have in mind——

Mr. Cowan: I don't know either. I just know what I have been told, you know.

Mr. Davis: Let me tell you about divisions. When railroads get together to fix divisions they take the general interchange of business, such as merchandise, and they group the lines, and they agree upon per cents and grade the per cents. Where they have an asset in the form of coal or cotton or lumber, that is a fixed arbitrary and it is shown up in the division sheet in that way. Now if you will tell me what you are trying to disclose I will try to help you.

Mr. Cowan: I am trying to find out if you get any division of rates other than the divisions named in the division sheets that have been filed?

Mr. Davis: I do not know of any.

Mr. Cowan: Do you know you do not get divisions other than those named in the division sheets?

Mr. Davis: Well, I do not. I think a road would be very foolish to give us a division if they did not agree to do it. I do not

1688 know of any such case.

Mr. Cowan: You said you had been closed to the Santa Fe?

Mr. Davis: Yes, sir.

Mr. Cowan: In what manner, simply by a refusal to give divisions to the Louisiana and Pacific and your other railroads?

Mr. Davis: Refusal to give us joint rates on classes and commodities, and on lumber particularly. We do not interchange any business. Any business we handle is on a combination of locals.

Mr. Cowan: They do not refuse to make through routes with you?

Mr. Davis: Positively, and they have tried to persuade other lines to refuse us through rates. I can submit that as evidence, if you wish.

Mr. Cowan: The difference comes at the point of making divisions?

Mr. Davis: There has been no difference on that score.

Mr. Cowan: Have you any local lumber yards on the Santa Fe Line?

Mr. Davis: I have not, no, sir.

Mr. Cowan: Have any of these lumber companies?

1689 Mr. Davis: No, sir. Mr. Long has.

Mr. Cowan: From what source are they supplied with lumber?

Mr. Davis: I understand the lumber is purchased in all directions. I can get that information for you.

Mr. Cowan: I do not think it is important.

Mr. Davis: It is just a guess with me.

Mr. Cowan: But your railroad gets nothing out of that at all.

Mr. Davis: Nothing.

Mr. Cowan: Do you ship off of your railroad and supply these mills that are on the Santa Fe line?

Mr. Davis: Well——

Mr. Cowan: When I say mills, I mean lumber yards.

Mr. Davis: For six months, I think I stated to Commissioner Harlan, we shipped about five cars or six cars last year for the Santa Fe. Here is a statement. I will give it to you.

Mr. Cowan: For whom were they shipped, the Long interests or somebody else?

Mr. Davis: No, I think it was railway material; I am not sure. I will be glad to give you the bills.

Mr. Cowan: No, it is not necessary. So you did not sup-

1690 ply Mr. Long's lumber yards on the Santa Fe from this road?

Mr. Davis: We were offered no business except these four or five cars.

Mr. Cowan: In making a statement to procure your divisions from the Frisco, for example, on a shipment that goes beyond the Frisco, who participates in that settlement and in the payment to you?

Mr. Davis: Who participates in the settlement on business going beyond the Frisco?

Mr. Cowan: Yes. Do you just look to the Frisco, or do the three of you, supposing there are three lines.

Mr. Davis: We look to the Frisco. We have no through billing arrangements.

Mr. Cowan: It would be immaterial to you then what the division was as between the part that is left to the Frisco and its connecting lines beyond?

Mr. Davis: So far as our company is concerned we have no interest in the divisions beyond or how it is subdivided, no, sir.

Mr. Cowan: When railroad material is shipped, your office I suppose, has a record and knows that it is railroad material?

1691 Mr. Davis: I should think so. I do not know as we get a record, but we have access to the records. We have bills of lading and way bills, and we would know whether it was railroad material or not.

Mr. Cowan: For example, a shipment to a point on a railroad like the Denver & Rio Grande, say for delivery at Grand Junction, ordinarily they get a division—I suppose always get a division out of the rate.

Mr. Davis: I think we have divisions with them on lumber. I am not sure, but I am willing to assume that we do.

Mr. Cowan: Do you have anything to do with conferring with the different lines in case of a change in the amount of the division which the line beyond your immediate connection receives?

Mr. Davis: No, sir.

Mr. Cowan: Have you in any case had conferences with the officials or employees or representatives of any of these lines beyond with respect to a change in the division of the rate which such lines are to receive.

1692 Mr. Davis: I cannot recall any. I have discussed that matter with the Rock Island people. They have very large purchases of lumber and at one time they bought from mills on our line. They stopped buying from Mr. Nelson, and Mr. Nelson in his efforts to find out why, discovered that they had found a division over in Texas from Santa Fe mills and others which reduced the proportion south of the Rock Island Road to such an extent that it forced them to buy over there and we have never been able to meet that competition. You understand how lumber is purchased by some of these lines, do you not?

Mr. Cowan: No, you might explain that in connection with what you are just telling, how it is purchased, and explain how it is that the Rock Island, for example, quit buying from you, and how the matter of divisions to lines beyond can be so handled as to change the place where the lumber may be purchased.

Mr. Davis: Well, as a general proposition, the purchasing agent of a railroad, as I understand it, tries to buy his lumber just as cheap as he possibly can. If he cannot buy that lumber on his own line he must necessarily buy it on some foreign line. In making purchases on foreign lines he ascertains what the division will be up to the junction point with, say, the Rock Island Road. He finds out what those divisions are, and it practically means the rates to

1693 him. The Commission have ruled that that is legitimate, provided the business goes to the point to which it is consigned. Now, we are at a disadvantage on that account because of the high divisions exacted in connection with the Louisiana & Pacific and its connections up to Rock Island junctions as compared with the small divisions that the Texas lines get in connection up to a point—well, I think it is 40 per cent of the rate.

Mr. Cowan: Suppose you are shipping to—take a concrete instance in the record that the laiety here may understand it—suppose you sell 50,000 cross ties to the Rock Island Railroad to be shipped over the Frisco, as they are separate now; where would those ties be delivered to the Rock Island?

Mr. Davis: Shipped from a point on the Louisiana & Pacific?

Mr. Cowan: Yes, say shipped from Fulton.

Mr. Davis: Well, they would not be shipped from Fulton; they probably would be shipped from a mill on the Louisiana & Pacific. There is no mill at Fulton that would deliver the business to the Frisco at Fulton.

Mr. Cowan: That is what I mean.

1694 Mr. Davis: And it may be the Frisco would take the shipment to Houston or over to Eunice; it depends in what section

of the country the Rock Island wanted the stuff. They have a very wide territory.

Mr. Cowan: If the Frisco exacts too much for their division up to the Rock Island points, that cuts you out of the trade?

Mr. Davis: That division plus our division is the factor used by the purchasing agent in trying to determine what the material will cost him.

Mr. Cowan: In this instance I have named what is the division the Frisco would take. You would take five cents, I think, or whatever it is. How much would you give the Frisco?

Mr. Davis: I have not figured on that. I have not heard of any ties moving. I suppose the divisions up to Eunice would be 8 or 9 cents.

Mr. Cowan: The reason you do not move it, I understand, would be because the Frisco exacts more than the Rock Island can get through some other channel.

Mr. Davis: The through divisions from the mill on the Louisiana & Pacific to the junction with the Rock Island are too great as compared with some other divisions in some other sections.

1695 Mr. Cowan: Do you know from what mill points in Texas the Rock Island buys?

Mr. Davis: No, I have no definite information on that subject.

Mr. Cowan: I suppose there are cases just reversed, where you by reason of the relation of the divisions, can sell the lumber and deliver it to the railroad company for railroad material on a better basis than the Rock Island might be able to from mills on its line?

Mr. Davis: Well, I don't know; there do not seem to be hardly any cases. It seems that we ought to be able to sell roads in Louisiana like the Southern Pacific. But they have mills on their own line. Mr. Nelson has told me he has tried to sell the Southern Pacific but has always complained that our five cent rate just puts him out of the business.

Mr. Cowan: Well, the sum and substance of the whole matter with respect to these divisions beyond your line and your divisions too, is, that in the purchase of the lumber by a railroad company that does not run into the lumber district, that company buys at the mill where it gets the least division up to its connection point.

1696 Mr. Davis: I should think so, unless some particular mill has the kind of stuff they wanted and could get it out quick, and the other could not; they might buy it then. I don't know a thing about the lumber business.

Mr. Cowan: Well, the regulation of this business between the different railroads to the one that is buying the material is the determining factor as to the place where they will buy the lumber?

Mr. Davis: I should think so, as a general proposition.

Mr. Cowan: What proportion of the outfit that goes off your railroad goes as railroad material?

Mr. Davis: It is very small. I could give you a statement of that if you wish it.

Mr. Cowan: I do not care particularly about it. I thought you might approximate it.

Mr. Davis: Well, it is very small.

Mr. Cowan: Ten per cent?

Mr. Davis: Well, I don't think so. It is just a guess with me. I might as well say ten or five.

Mr. Cowan: Does your road handle cross ties that are hewn?

Mr. Davis: The L. & P.?

Mr. Cowan: Yes.

1697 Mr. Davis: I do not know of any hewn ties on the line. I do not think we do.

Mr. Cowan: You ship lumber for other persons, as you have already said, but you do not control the routing on that lumber.

Mr. Davis: If we receive a car with routing instructions on the bill of lading, we respect that routing.

Mr. Cowan: For whom do you ship lumber other than the Long interests?

Mr. Davis: On the Louisiana & Pacific?

Mr. Cowan: Yes.

Mr. Davis: The Bundick Creek Lumber Company at Walla; the Brown Lumber Company, I think, at Bannister have a small mill. and we handle several cars every day.

Mr. Cowan: Do you move that over the line of the Lake Charles & Northern?

Mr. Davis: No, sir, we move that over the line of the Louisiana & Pacific.

Mr. Cowan: Suppose they wanted to route it over the Lake Charles & Northern, what would you do about it?

Mr. Davis: We have no through rates. We would charge our local rate from Walla up to Lilly Junction and the Lake

1698 Charles & Northern would charge their local rate from Lilly Junction.

Mr. Cowan: But there would be no such shipment made, of course.

Mr. Davis: There would be no interchange. We do not know the Lake Charles & Northern at all.

Mr. Cowan: So you do not participate in any through route or rates with the Lake Charles & Northern?

Mr. Davis: No, sir.

Mr. Cowan: Have you ever had any conference with the traffic officials of that road to see if you could make such arrangements?

Mr. Davis: Well, I would not want to. I would probably lose my position if I did.

Mr. Cowan: Have they ever conferred with you and attempted to get that?

Mr. Davis: No.

Mr. Cowan: Then they have no chance to get business on your lines?

Mr. Davis: They have some rights with us in that territory.

Mr. Cowan: But how could they get any shipment to or

1699 from points on the Louisiana & Pacific if there are no through rates or routes?

Mr. Davis: Well, the line is joint. You are talking about a mill

that is situated on the Louisiana & Pacific proper, out at Walla, eight miles from this joint track. Now that is local tonnage to us and we absolutely control it.

Commissioner Harlan: Haven't you well expressed this arrangement? You have not trackage rights over that line at all, have you?

Mr. Davis: Absolutely, yes.

Mr. Cowan: Well, you have referred to it as a joint track. Is it not a joint use of the track?

Mr. Davis: Yes.

Mr. Cowan: And it is not a trackage right at all.

Mr. Davis: Well, I would have to look at that contract to see how it is worded.

Commissioner Harlan: Well, as the thing works out in everyday practice, it is not a trackage right at all, is it?

Mr. Davis: It is a joint use of the line, yes, sir.

Commissiiner Harlan: It is a joint use of the line?

Mr. Davis: Yes, sir, the line was absolutely necessary. In the first place, Mr. Commissioner, a line had to be built. As I
1700 stated yesterday, Mr Long undertook to build the line, and Mr. Harriman purchased the line, and the line would not have been sold except for the fact that we retained our rights to operate our trains over the line.

Commissioner Harlan: Equally with them.

Mr. Davis: Yes, sir.

Commissioner Harlan: Not any trackage right, but you retained your right to operate that railway?

Mr. Davis: Yes, sir, and that is the way the contract reads, and I have never had any instructions to the contrary, and I am going to get all the business I can for that road.

Commissioner Harlan: Now, in actual practice, although you operate it as a railroad and not as a trackage right, although you asserted to the contrary yesterday, but as I understand it you get very little of the local business, and they on the other hand are not allowed to participate in joint through rates with your branch lines, and they get practically none of the lumber business from any mill?

Mr. Davis: I do not know who stated we received very little of the local business. De Ridder, Bonami, Bannister, and Fulton
1701 are joint stations, and we have rates in with the Iron Mountain and with the Frisco and with the Kansas City Southern and also with the Southern Pacific, which connect with us at Lake Charles.

Commissioner Harlan: And you stated yesterday you got your proportion of the business, and recently a little more than they did?

Mr. Davis: Mr. McLean made that statement.

Commissioner Harlan: That is your understanding?

Mr. Davis: That is my understanding. We work with our connections, and of course we cannot expect very much from the Southern Pacific because they have their own line in there, and originate a large tonnage, but with the Frisco and Iron Mountain and Kansas City Southern we have got a very reasonable proportion.

Commissioner Harlan: On the other hand they get practically none of the lumber business?

Mr. Davis: No.

Commissioner Harlan: And you do not intend they shall get any where you can help it?

Mr. Davis: Well, if I had my way they would not.

Mr. Cowan: To bring the whole matter into one concrete statement, is it not true that all traffic going on to or from the
1702 lines of the Louisiana & Pacific off of the Lake Charles & Northern must, if it is moved by the Lake Charles & Northern Railroad Company, go on local rates, the sums of the locals?

Mr. Davis: Yes, sir. We have not any through rates with the Lake Charles & Northern.

Mr. Cowan: Therefore is it not true that there is no such movement on the Lake Charles & Northern of traffic going to or from points on the Louisiana & Pacific?

Mr. Davis: I do not know of any such movement at all.

Mr. Cowan: With respect to the traffic originating at stations on the Lake Charles & Northern, over which you operate your trains, to stations between which you operate, is the depot agent the joint agent of the two companies?

Mr. Davis: Yes, sir; we pay 60 per cent of the expense.

Mr. Cowan: If he receives any traffic that is to go to points on the Louisiana & Pacific, naturally he bills it via the Louisiana & Pacific?

Mr. Davis: I suppose so.

Mr. Cowan: He acts as agent of the Louisiana & Pacific in that case?

Mr. Davis: I think so, yes, sir.

1703 Mr. Cowan: If he receives traffic to go to another station on the Lake Charles & Northern, how *he is* instructed then to ship that? I suppose it is immaterial to the shipper for whom he will bill it.

Mr. Davis: I do not know; it depends how the shipment is routed.

Mr. Cowan: Well, suppose that I bring a wagon load of pine knots—I see you are quite extensive shippers of pine knots.

Mr. Davis: No, we handle very few.

Mr. Cowan: 65 cars, that is more than I ever heard of in my life before.

Mr. Davis: That is as compared with——

Mr. Cowan: Make it potatoes then. I suppose that is a farming country.

Mr. Davis: No, you have the wrong idea; it is just a timber country, and when the timber is cut off it is a farming country.

Mr. Cowan: Well, I am going to ship something.

Commissioner Harlan: Well, Judge, suppose you ship a little hay and see where it comes.

Mr. Cowan: Yes. Is there hay there?

1704 Mr. Davis: I don't know, we will assume there is lots of hay there. I do not know.

Mr. Cowan: Well, assume there is lots of hay?

Mr. Davis: Yes.

Mr. Cowan: And I bring in ten bales of hay to ship from Longville, say, to Bannister, and the agent at Longville receives my hay and I say I want to ship it to Bannister; it makes no differenec to me whether you carry it or the Lake Charles & Northern carries it. For which railroad will the agent bill that hay?

Mr. Davis: Well, I don't know; it depends how it is routed.

Mr. Cowan: Suppose I do not route it, and I bring it in and say I want to ship it from Longville over to Bannister. It has got to go over one road.

Mr. Davis: I could not tell how he would route it.

Mr. Cowan: It has got to go over one road?

Mr. Davis: Yes.

Commissioner Harlan: Your line pays 60 per cent of his salary. I want to know whether that agent is under any instructions from you, written or verbal, as to what to do with Judge Cowan's hay.

Mr. Davis: No, he is not.

1705 Commissioner Harlan: Well, is he simply turned loose with the proportion there, and can he do as he chooses? Judge Cowan in this case did not give any routing instructions. I want to know just how that hay is going to be handled.

Mr. Davis: I cannot tell you, because I do not know. Mr. McLean may know.

Commissioner Harlan: Well, Mr. McLean, can you tell us?

1706 Mr. McLean: What is the question?

Commissioner Harlan: Judge Cowan is offering a carload of hay at Longville to be moved to Bannister without any instructions as to whether it shall go over the Louisiana & Pacific or the Lake Charles & Northern. Now, how would it go?

Mr. McLean: So far as I know, our agent or the joint agent has no written instructions as to how to handle such a shipment. I have advised them verbally that they must not solicit business for either company. If they must——

Commissioner Harlan: Well, Judge Cowan has turned up there; nobody asked him to, but he has turned up with a load of hay.

Mr. McLean: But that the shipper must be requested to state which company he wants it shipped over.

Commissioner Harlan: Is it your duty as auditor to give such instructions?

Mr. McLean: No, in the cases I have in mind the agent asks them.

Commissioner Harlan: Whose duty is it to instruct the agent?

Mr. McLean: I suppose it was the duty of the traffic

1707 manager.

Commissioner Harlan: Then the question is up to you, Mr. Davis. Mr. McLean understands such instructions would proceed from you. What instructions have you given to the agent?

Mr. Davis: I have not given any.

Commissioner Harlan: Do you mean to have it appear on the record that the agent there at Longville is at liberty to use his discretion and he has no instructions and nothing to guide him as to how he is going to move that carload of hay?

Mr. Davis: Well, I have stated the facts to you. I am willing to show in the record that we will issue instructions if that is—I have never heard of a shipment of that kind.

Commissioner Harlan: There must be some local shipments between these points.

Mr. Davis: Undoubtedly there is, and our billing will show. I can get our billing, and the Lake Charles & Northern can show theirs.

Commissioner Harlan: The specific point we want to get at is whether that agent is simply turned loose to deal with
1708 such matters at discretion or whether he has instructions.

Mr. Davis: He has no instructions from me.

Commissioner Harlan: Has he any instructions from the Lake Charles & Northern?

Mr. Davis: I really don't know as to that.

Commissioner Harlan: What salary does he get?

Mr. Thurmond: Ninety dollars.

Mr. Davis: What agent?

Mr. Thurmond: At Longville.

Mr. Davis: Ninety dollars a month.

Commissioner Harlan: Mr. Davis, I do not want anything to appear on the record that intimates a doubt on my part as to your candor in this matter, but I do direct your attention to the fact that as traffic manager of this railroad you get six thousand dollars a year, and that is the case, is it not?

Mr. Davis: No, sir.

Commissioner Harlan: What is the salary?

Mr. Davis: Do you want me to state to you personally or to these gentlemen out here?

Commissioner Harlan: Well, we will pass that matter. It
1709 is a substantial salary?

Mr. Davis: I have no objection to telling you what it is.

Commissioner Harlan: Well, if there is no objection——

Mr. Davis: If you will give me a paper I will tell you what it is.

(The witness here writes on a slip of paper which he hands to Commissioner Harlan.)

Commissioner Harlan: And you have control of the movement of the traffic. Now, are we to understand that none of the agents along the line have any instructions from you as to how to route shipments when they have the opportunity to use one of two lines operating over the same roadbed?

Mr. Davis: That is the situation, Mr. Commissioner.

Mr. Cowan: Now, Mr. Davis, do you ever go to see those agents?

Mr. Davis: I call on them. I do not make very many trips over the Louisiana & Pacific.

Mr. Cowan: Do you have them make any reports to you?

Mr. Davis: No, sir; I have nothing to do with the agents; they report direct to the accounting department.

Mr. Cowan: You said a while ago that you would not
1710 permit the Lake Charles & Northern Railroad Company to have any of the traffic hauled by the Louisiana & Pacific.

and that you would make no application to them for a division of rates?

Mr. Davis: Yes, sir.

Mr. Cowan: And if you did you ought to lose your position.

Mr. Davis: No, I did not say I ought to.

Mr. Cowan: What is that?

Mr. Davis: I don't know whether I said I ought to.

Mr. Cowan: Well, whatever you did say, I am referring to what you did say, without being able to quote it.

Mr. Davis: Well, it would be a foolish thing, if we could handle the business ourselves, to turn around and give it to somebody else.

Mr. Cowan: That is it. Now, you are looking for all the traffic you can get for your company?

Mr. Davis: Yes, sir.

Mr. Cowan: And your company is operating for twenty-five cents a train mile on the Lake Charles & Northern?

Mr. Davis: Yes, sir.

Mr. Cowan: And you pay the station agent at the
1711 station of Longville, who is getting ninely dollars a month sixty per cent of it?

Mr. Davis: Yes, sir.

Mr. Cowan: Now, why haven't you gone to that agent to get him to route everything over the Louisiana & Pacific where they will get the freight rate, instead of the Lake Charles & Northern?

Mr. Davis: Well, I guess it is simply neglect on my part.

Mr. Cowan: Now, take the traffic that moves from Lake Charles to De Ridder; I understand there are a considerable number of people to be supplied there with those things that people have to ship in.

Mr. Davis: Yes, sir.

Mr. Cowan: And you carry that traffic?

Mr. Davis: We carry a share of it; yes, sir.

Mr. Cowan: What share?

Mr. Davis: Well, I have no means of knowing the total tonnage handled into De Ritter. I have asked that question of some of our people at De Ritter, and have understood they thought we got about thirty per cent, as near as they could estimate.
1712 It is just a guess. You would have to find out first the total tonnage handled by the four lines in there and then——

Mr. Cowan: You mean you get about or you think you get about 30 per cent of the total that goes into De Ridder?

Mr. Davis: I do not think that; I do not know. I say I have been informed that we did handle about 30 per cent.

Mr. Cowan: You were informed by whom?

Mr. Davis: I think it was the Superintendent over there, Mr. Boswell or Mr. McLean.

Mr. Cowan: And you move that from Lake Charles?

Mr. Davis: Yes, sir.

Mr. Cowan: Over the Lake Charles & Northern for the entire distance?

Mr. Davis: Over the joint track between those points.

Mr. Cowan: As I understand it, the road from Lake Charles to De Ridder belongs to the Lake Charles & Northern Railroad?

Mr. Davis: Well, I suppose the road does. We are operating under a contract that is here.

Mr. Cowan: Well, is the Lake Charles & Northern operating that road between Lake Charles and De Ridder?

Mr. Davis: They are running trains over it, yes, sir.

Mr. Cowan: What proportion of the traffic that goes to
1713 supply these people that has nothing to do with lumber, between Lake Charles and De Ridder, does the Lake Charles & Northern move?

Mr. Davis: Well, I would not be able to say that. We have separate agents at Lake Charles. We have our own depot, and at the present time we are not as near the center of the city as we would like to be.

Mr. Cowan: Does your road not solicit the business from Lake Charles?

Mr. Davis: We solicit business, yes, sir.

Mr. Cowan: I assume most of your trains moving northbound in the direction of De Ridder run light?

Mr. Davis: Well, I could not answer that.

Mr. Cowan: You don't know?

Mr. Davis: I suppose the——

Mr. Cowan: You bring more logs down than you take lumber back?

Mr. Davis: We pull empties northbound together with merchandise and loads southbound.

Mr. Cowan: And your agent has a free hand to solicit
1714 business at Lake Charles for De Ridder?

Mr. Davis: He has, if he has the time; yes, sir.

Mr. Cowan: Well, you are in the business for profit, and have the opportunity of loading your trains that already run light?

Mr. Davis: Yes, sir.

Mr. Cowan: Would he not be given sufficient assistance to solicit the business?

Mr. Davis: Yes, sir, I should think so.

Mr. Cowan: Do you ever have any conference with him in regard to the amount of traffic and how he gets it and what he does to secure the traffic?

Mr. Davis: No. I have had conferences with him and some correspondence, but not a great deal; I have solicited business in Lake Charles myself, and have had men there soliciting business.

Mr. Cowan: Well, being the traffic manager of this line I should think you would have some knowledge of what proportion of that traffic you get going over that line.

Mr. Davis: Well, I have not. I do not know the total traffic moved, but I should say we get a very good proportion.

Mr. Cowan: You get nearly all of it, do you not?

1715 Mr. Davis: No, I should say not. I do not think we do.

Commissioner Harlan: If I should tell you, Mr. Davis, that the records of the St. Charles & Northern show that during the

year 1909 they received less than $2500 on all the inbound and outbound freight originating or destined to points on their line, would that or would not that indicate that the bulk of that traffic is taken by your line?

Mr. Davis: If those are the figures I would think so. Does that include the joint track over the Santa Fe? They have joint trackage rights over the Santa Fe, and operate between De Ridder and Nitram, just as they operate over our line.

Commissioner Harlan: As I understand the figures, it covers points of origin and destination between De Ridder and Lake Charles, and it was less than $2500.

Mr. Thurmond: What date was that?

Commissioner Harlan: For the year 1909.

Mr. Davis: We have not a memorandum of the earnings on the Lake Charles business here. We received from the Southern Pacific for six months ending October 31st, 106 tons, and from the Iron Mountain 147 tons, and from the Kansas City Southern 110 tons.

1716 Now I do not know—that Kansas City Southern may have been at De Ridder, part of it; but the Southern Pacific delivered us at Lake Charles 106 tons, and the New Orleans, Texas & Mexico, or the Iron Mountain, 147 tons for points on the Louisiana & Pacific north of Lake Charles. Now I cannot tell you what business we handled out of Lake Charles proper for the reason I have not got that data here.

Commissioner Harlan: Well, that is all inbound business?

Mr. Davis: This is business from connecting lines from defined territory, St. Louis, New Orleans and Seaboard.

Commissioner Harlan: The figure I gave you is inbound and outbound on the Lake Charles & Northern.

Mr. Davis: Well, our earnings on this amounted to five hundred and ninety some dollars.

Commissioner Harlan: That is inbound?

Mr. Davis: Inbound, yes, sir.

Commissioner Harlan: And through Lake Charles?

Mr. Davis: And through Lake Charles, yes, sir.

Mr. Collins: Now you have through rates with all these different lines which you mentioned that you connect with at Lake Charles, to points on the Lake Charles & Northern; the Southern Pacific, Iron Mountain and Kansas City Southern.

1717 Mr. Davis: You get that confused yourself or confuse me. We have no rates with the Lake Charles & Northern. They operate over this joint track.

Mr. Cowan: I understand, but you have joint rates with the outfit that owns the Lake Charles & Northern, the Southern Pacific.

Mr. Davis: I have just stated we have through rates on lumber and merchandise outbound with the Louisiana & Western and their connection, the Southern Pacific, and they give us that business at Lake Charles.

Mr. Cowan: The position of the matter is then that Mr. Harriman, I think you said he sought Mr. Long—at all events they got together.

Mr. Davis: That is a supposition.

Mr. Cowan: Somebody made a trade whereby the Southern Pacific interests purchased the Lake Charles & Northern, and gave you the absolute full right to operate over it in all particulars, gave you a division of the rates, and you would not make any division of the rates with the Lake Charles & Northern. That is the situation, is it not?

Mr. Davis: That is the way I understand it.

Mr. Cowan: Well, that is the way it is today?

Mr. Davis: That is the way that contract is.

1718 Mr. Cowan: Did you ever hear of any trackage rights or any rights between two railroad companies of any such character as that in your whole experience?

Mr. Davis: Mr. Ripley of the Santa Fe has given Mr. Harriman joint rights over his tracks. I do not know why he did so. You have to get to the bottom of that. Mr. Harriman was a good trader. He must have had something in mind when he did it. The Southern Pacific operates jointly with the Texas & Pacific from Cheneyville to Alexandria. And the Frisco has the L. & R. N. from Baton Rogue to New Orleans, and have joint rates. Why that is I do not know.

Mr. Cowan: And each one of those has joint routes and through rates with each other to all the stations on the other lines?

Mr. Davis: I cannot say as to that.

Mr. Cowan: Take the line from De Ridder to Nitram, who owns that?

Mr. Davis: I understand that was built by Mr. Ripley.

Mr. Cowan: It is called the Gulf, Colorado & Santa Fe, is it not?

Mr. Davis: Yes.

Mr. Cowan: Who has trackage right over that road?

1719 Mr. Davis: The Lake Charles & Northern, I understand.

Mr. Cowan: And there they connect with the Gulf & Sabine River?

Mr. Davis: I believe they do, yes, sir.

Mr. Cowan: Do you handle any of the traffic which comes to De Ridder over that line?

Mr. Davis: Do we?

Mr. Cowan: Yes, sir.

Mr. Davis: No, sir. The Santa Fe——

Mr. Cowan: Do you handle any traffic going out over that line?

Mr. Davis: No, the Santa Fe would not have anything to do with us, Judge. I would like very much to have rates with them, but we have not been able to persuade them.

Mr. Cowan: Does the Lake Charles & Northern handle the lumber that comes from the Fullerton Line, by way of De Ridder?

Mr. Davis: I understand they do, yes, sir.

Commissioner Harlan: It is a very large output, is it not?

Mr. Davis: I understand it is a very large output, and that the Lake Charles & Northern handle a very large percentage of the tonnage. It is simply a case like ours. Mr. Harriman was going up in that territory and was going to build over there, but instead

1720 of building, Mr. Ripley concluded to let him use his line.

Mr. Cowan: Does the Lake Charles & Northern handle any

other lumber except the lumber that comes over the road I have just mentioned?

Mr. Davis: I do not know.

Mr. Cowan: Do you know of any other that they handle?

Mr. Davis: No, sir, I do not. I have not any access to their records at all, Mr. Cowan.

Mr. Cowan: Do you keep a record of the output of the lumber that is actually shipped out from each one of your sawmills, and do you keep a record of the amount of logs and tonnage of the logs that actually is brought in?

Mr. Davis: We have a record of the lumber, I have. I have not a record of the logs, no, sir.

Mr. Cowan: In the estimate of tonnage then, are the logs considered in the tonnage or simply the lumber tonnage?

Mr. Davis: The division is assessed on the weight of the manufactured product.

Mr. Cowan: I mean in the reports that go to the Interstate Commerce Commission of the tonnage, is the log tonnage stated
1721 or just the lumber tonnage?

Mr. Davis: Could I ask Mr. McLean to answer that? I have nothing to do with the reports.

Mr. McLean: Will you repeat the question?

(Question read.)

Mr. McLean: Just the lumber tonnage, the tonnage of the finished product.

Mr. Cowan: And have you a record of the log tonnage?

Mr. McLean: The logs are not weighed.

Mr. Cowan: Have you a record of the estimated tonnage of logs?

Mr. McLean: A record of the number of logs.

Mr. Cowan: I will ask you to please file a statement showing the total amount of lumber output shipped out over your lines from each of the mills.

Mr. Thurmond: What is that?

Mr. Cowan: The output of the lumber shipped out from each of the mills over his line, and the amount drawn from each mill that is delivered to each main line road for transportation beyond.

Mr. Davis: Yes, sir. Do you want me to file that with the Commision?

1722 Mr. Cowan: Yes.

Mr. Garwood: For what period?

Mr. Cowan: Make it cover the period—he might just as well make it cover a year. You have that given by the year?

Mr. Davis: Yes, sir.

Mr. Cowan: Make it for the year ending June 30th, 1910.

Commissioner Harlan: Make it cover the years 1908, 1909 and 1910. You have got those years?

Mr. Garwood: The fiscal year?

Commissioner Harlan: The fiscal year.

Mr. Cowan: Do you keep any record of the traffic operation of the Louisiana & Pacific Railroad Company which would enable you to show the operating statistics separately for lumber and other traffic,

the amount for example, per train mile, and the average loading per car?

Mr. Davis: No.

Mr. Cowan: Of course, your annual report undoubtedly ought to show it for all traffic, but I wondered if you kept it separately for lumber traffic?

Mr. Davis: I think that would expedite matters. I do not know a thing about it——

1723 Mr. Cowan: Well, you do not know about it.

Mr. Davis: I do not know a thing about the accounts and how they are kept.

Mr. Cowan: Mr. McLean, have you the operating statistics to show the amount of lumber which you carry per train mile and the average loading per car mile of lumber? I suppose you have the latter, but have you it separately for lumber, as to the amount per train mile?

Mr. McLean: No.

Mr. Cowan: Mr. Davis, are you acquainted with the actual physical operation of the road, do you pay any attention to that?

Mr. Davis: No.

Mr. Cowan: You have somebody here who is well acquainted with it, I suppose?

Mr. Davis: The superintendent, yes, sir.

Mr. Cowan: You do not keep a record of the output of the lumber from these various mills, do you?

Mr. Davis: I do. I have to do that in our efforts to comply with the terms of our contracts. We have got to know what we are doing.

Mr. Cowan: With regard to the percentage that you give to each railroad?

1724 Mr. Davis: Yes.

Mr. Cowan: Let your statement which I have asked for, cover that. I suppose it will in a way, because you do not ship out any except over your own line of railroad, I suppose.

Mr. Davis: It will show all the lumber we handle and the lumber delivered to each connecting line. That will give you the per cent.

Mr. Cowan: When you receive lumber from this other company whose product you handle—you gave the name of it, and I did not recall it——

Mr. Davis: The Bundick Creek Lumber Company.

Mr. Cowan: They pay the full tariff rate?

Mr. Davis: Yes, sir.

Mr. Cowan: And do they get anything back?

Mr. Davis: No, sir.

Mr. Cowan: Do they get any service from you on their logs?

Mr. Davis: No, sir.

Mr. Cowan: Do they purchase any timber from you?

Mr. Davis: Not that I know of. They would not purchase that from the company. That would be——

Mr. Cowan: They own their own lumber?

Mr. Davis: I do not know as to that.

1725 Mr. Cowan: Will you give a statement of their tonnage separately?

Mr. Davis: Yes, sir.

Mr. Cowan: For the same period of time. They have no other railroad connection except through yours?

Mr. Davis: No.

Mr. Cowan: Has that interest any interest in your railroad company?

Mr. Davis: No, sir, not that I know of.

Mr. Cowan: No one of the interested parties are officials?

Mr. Davis: No.

Mr. Cowan: Nor in any way connected with it?

Mr. Davis: No.

Mr. Cowan: And the delivering line, I suppose, collects the entire freight on their lumber?

Mr. Davis: Uuless it is billed prepaid.

Mr. Cowan: And they pay you back how much?

Mr. Davis: It depends on the destination of the shipment.

Mr. Cowan: Well, say it was moving to Kansas City.

Mr. Davis: Well, if a car of lumber moved from Walla to Kansas City by way of our line and the Southern Pacific, we would receive four cents.

1726 Mr. Cowan: You receive the same divisions on that sort of shipment as you do if it were your own lumber?

Mr. Davis: Yes, sir.

Commissioner Harlan: Right at that point I ask again whether such lumber ever goes out by the Lake Charles & Northern.

Mr. Davis: No, sir. This is the Louisiana & Pacific and the Lake Charles & Northern joint tracks. This mill is over here, and we originate the tonnage, and therefore control it. Naturally we would want to take our own haul on it and not divide up with some other line.

Commissioner Harlan: Yes, but there are other mills on the main line, some mills.

Mr. Davis: Some mills: There is one little mill at Bannister which has just started up. We have one or two cars.

Commissioner Harlan: And as a rule you take all that lumber out and the Lake Charles & Northern does not.

Mr. Davis: Where, from this point, Bundick Creek?

Commissioner Harlan: Bannister.

Mr. Davis: I do not know that we take it all. I think that is controlled by parties at Lake Charles, is my recollection; I
1727 am pretty sure we do not handle it all. I can give you a statement of that if you wish it.

Commissioner Harlan: I do not know that that is necessary. I just wanted to know what the course of the business was.

Mr. Davis: The lumber business in that section is very small. There are no other small mills in there that I know of.

Mr. Cowan: How does the Bundick Mill get its logs?

Mr. Davis: I do not know of any lumber mill at Bundick. Have you not in mind the mill at De Ridder?

Mr. Cowan: I am talking about the little mill that is on your line.

Mr. Davis: The Bundick Creek Lumber Company?

Mr. Cowan: Yes, that is the one. I forget the name.

Mr. Davis: I have never been down there. I suppose they pull them in by teams.

Mr. Cowan: That is the same character of lumber that these other lumber companies manufacture?

Mr. Davis: I think it is all yellow pine. I am not positive.

Mr. Cowan: Going down to Lake Charles, your company owns apparently a very small amount of actual railroad mileage,
1728 but it is your terminal there for your sawmills?

Mr. Davis: Yes, sir.

Mr. Cowan: Are those terminals there for the purpose of handling other people's traffic, or for the purpose of handling the sawmill traffic?

Mr. Davis: We have a freight station there and do handle business for all parties who offer freight there.

Mr. Cowan: The big map spread out yesterday showing the extent of those terminals in and about the sawmills and lumber yards and so on.

Mr. Davis: Yes, sir.

Mr. Cowan: Such terminals are necessary for a large lumber yard, whether you handle other traffic or not, are they not?

Mr. Davis: The station is not in the lumber yard.

Mr. Cowan: Well, aside from the station that handles the other traffic at the depot these tracks are essential to the lumber plant.

Mr. Davis: I should think a large concern like that, they would have to have their own tracks, or somebody else would have to have the tracks there for them.

Mr. Cowan: Did they have that sawmill there before this Lake Charles & Northern contract was made?

1729 Mr. Davis: They had no mill. This is practically a new mill and new terminals entirely.

Commissioner Harlan: Were there any spur tracks running into that lumber yard and the old mills before your terminals were put into Lake Charles?

Mr. Davis: I think so. I think the Southern Pacific got in there, and perhaps the Kansas City Southern. I am not sure but they had a mill there and connected with those companies, because that was the only outlet for the product of their lumber mills.

Mr. Cowan: As I understood that map, the Louisiana & Pacific owns all of the tracks serving the sawmill and the planer and the lumber industry of that mill.

Mr. Davis: Judge, I do not know about the financial affairs of the company. It has been stated here that they do. I think Mr. Thurmond yesterday submitted that map with that statement, and I think it can be confirmed.

Mr. Cowan: The service you preform on the lumber there for which you receive your divisions is the delivery to the line which connects with your road and carries it out, either at Lake Charles or at Fulton?

Mr. Davis: Yes, sir.

1730 Mr. Cowan: Do you carry any lumber up as far as De Ridder to be sent out over the Kansas City Southern?

Mr. Davis: No, I do not think we do. We make delivery right there.

Mr. Cowan: Your through rates from the Kansas City Southern apply by what routes, what connections?

Mr. Davis: Via De Ridder and Lake Charles.

Mr. Cowan: You can carry it up to De Ridder if you want to, but you do not do it, of course.

Mr. Davis: No; it is an operating proposition. We would take the short haul.

Mr. Cowan: To what proportion of your lumber do the higher divisions apply, the five cents, for example?

Mr. Davis: Five cents?

Mr. Cowan: Yes, you have five cents in some cases, I believe.

Mr. Davis: The contract with the Frisco calls for 50 per cent of the tonnage, and with the Southern Pacific 40 per cent, if they furnish the cars we aim to give them 50 per cent and 40 per cent.

Mr. Cowan: But do you in fact give them more?

1731 Mr. Davis: In the last several months they have been very short of equipment and we have had to do the best we could. As I explained to the Commissioner, we have been shipping over the Kansas City Southern.

Mr. Cowan: At all events this statement I have called for will show all that?

Mr. Davis: Yes, sir.

Commissioner Harlan: Who in your company attends to the interchange of transportation?

Mr. Davis: Of annual passes?

Commissioner Harlan: Annual passes and trip passes and other transportation?

Mr. Davis: I handle that under the supervision of Mr. Long; he signs the requests.

Commissioner Harlan: And you of course, and all your officers have free transportation over your immediate connections?

Mr. Davis: Yes, sir; I think all of them but—well, I don't know, but I would be willing to say that they all have them. I am not sure but I think they do.

Commissioner Harlan: And over the main lines of those connections in the east, at Chicago——

1732 Mr. Davis: Well, no, they do not. I have a pretty full line of transportation and it varies; but all of the officers have not use for that transportation.

Commissioner Harlan: Well, you are not an officer of any of these lumber companies?

Mr. Davis: No, sir.

Commissioner Harlan: But a number of other officers of your road are officers of one or more lumber companies?

Mr. Davis: Some. Mr. Long is an officer and Mr. Sweet.

Commissioner Harlan: And they have free transportation more or less generally as far as Chicago, have they not?

Mr. Davis: They have transportation to Chicago. yes, sir.

Commissioner Harlan: And perhaps farther to the east?

Mr. Davis: No, I do not thinks so. Mr. Long may have some transportation as far east as Buffalo; I think he has a Wabash pass, but I am not sure; but the eastern lines do not interchange with us now.

Commissioner Harlan: I suppose all your ties are purchased from the lumber companies that are affiliated or in the same investment?

Mr. Davis: I should think so.

Commissioner Harlan: And all your lumber?

Mr. Davis: I do not know a thing about that, but it is
1733 natural to state that it is the case; it is a natural condition.

Commissioner Harlan: And do you know who gets salaries among the officers of your road? I am not sure that that was gone into by Mr. McLean yesterday. Did we go over that with you yesterday?

Mr. McLean: What is it?

Commissioner Harlan: The salaries paid by the Louisiana & Pacific to its officers?

Mr. McLean: No, sir, I do not think we did.

Commissioner Harlan: Are you familiar with that matter, Mr. Davis?

Mr. Davis: With the exception of my own, there is a statement, I believe, that can be furnished you on that. I do not know what the other officers get, no, sir.

Commissioner Harlan: Mr. Davis, I understand of course, that you — essentially an officer of this railroad company.

Mr. Davis: Yes, sir.

Commissioner Harlan: But do you not often participate in conferences and have more or less to do with the shipments of this lumber and the sale of the lumber and its routing and finding markets for it?

1734 Mr. Davis: No, the only conference that I could have in regard to the sale would be with Mr. Nelson, with regard to railroad material. As long as the railroads continue to buy delivered at junction points, the lumber companies throughout the southwest must know to some extent what the divisions are to those division points, and at various times I have conferred with him on that. I have nothing to do with the sale and do not know a thing about lumber.

Commissioner Harlan: Where is the repair shop of your line?

Mr. Davis: I think there is a small shop at De Ridder and a good shop at Longville.

Commissioner Harlan: Who owns the Longville shop?

Mr. Davis: I think it is owned by the Longville Lumber Company.

Commissioner Harlan: Who owns the De Ridder shop?

Mr. Davis: I do not know whether that is owned by the Hudson River Lumber Company or not. Can you say, Mr. McLean, whether repairs are made at De Ridder?

Mr. McLean: Yes.

Mr. Davis: Who makes the repairs?

Mr. McLean: The Louisiana & Pacific.

1735 Mr. Davis: They make their own repairs?

Mr. McLean: Yes.

Mr. Davis: And at Longville, the Longville Lumber Company?

Mr. McLean: Yes.

Mr. Cowan: We have been dealing with inland rates and I overlooked asking you about the export rates. I did try to do it once, but it escaped my mind in some way. Explain the application of the export rates, the divisions, the export rates, the traffic and the division of those rates.

Mr. Davis: I cannot give you much information about the volume of traffic. There is more or less traffic moving all the time. I have not a statement of that.

Mr. Cowan: In the first place, what is the export rate?

Mr. Davis: The rate to Port Arthur is 6 cents per 100 pounds, and the rate to Galveston is 6 cents per 100 pounds.

Mr. Cowan: From all points on your line?

Mr. Davis: Yes, sir; and the rate to New Orleans, I believe, at the present time, is 7 cents.

Mr. Cowan: What divisions are paid in each case?

Mr. Davis: On the Port Arthur and Galveston business we receive 2 cents, and on the New Orleans business 1½ cents, to the best of my recollection.

1736 Mr. Cowan: When were these export rates extended to cover your lines and the Lake Charles & Northern from the water points?

Mr. Davis: They were extended when the line was completed or shortly after that time.

Mr. Cowan: And by that you mean when this corporate organization was made?

Mr. Davis: Yes, sir, when the line was completed into Lake Charles. Prior to that time we got out by the Kansas City Southern.

Mr. Cowan: Did you get the application of the division by that route?

Mr. Davis: 6 cents; yes, we received 2 cents.

Commissioner Harlan: Are there any private cars owned by your company?

Mr. Davis: Yes, sir; the Louisiana & Pacific have a private car.

Commissioner Harlan: For what purpose is it used?

Mr. Davis: Well, I do not use it. Mr. Sweet uses it.

Commissioner Harlan: Can you tell us how often and for what purpose it is used?

Mr. Davis: No, I think he has used it two or three times this

1737 year.

Commissioner Harlan: Have you issued any car and party passes over your line?

Mr. Davis: I think so. Mr. Sweet—I do not think it is necessary for him as an officer of the company to have a pass, but I think he has one.

Commissioner Harlan: Well, it would be necessary for a car and party, would it not, over your line?

Mr. Davis: I think if he has one it would be issued car and so many employees; I think the Commission have a rule on that.

Commissioner Harlan: You own the telephone line, as I understand.

Mr. Davis: That matter has not been up with me.

Commissioner Harlan: Well, what is the fact? Someone said, I believe, that you used the telephone to some extent in operating trains.

Mr. Davis: Yes, sir, they use the telephone, as I understand it, on the branch lines, and telegraph on the main line.

Commissioner Harlan: Do those telephone lines belong to
1738 the railroad company?

Mr. Davis: I think they do; I am not positive as to that.

Commissioner Harlan: Well, that is the fact, is it not, Mr. McLean?

Mr. McLean: The Louisiana & Pacific does not own the telephone lines.

Commissioner Harlan: Who does own them?

Mr. McLean: Those lines were transferred to the Lake Charles & Northern at the time the road was sold.

Mr. Davis: We are talking about the line from De Ridder to Bundick. The Lake Charles & Northern have nothing to do with that.

Mr. McLean: I am not in a position to say whether the Louisiana & Pacific own that or not.

Commissioner Harlan: Are you in a position to say who pays the employés who operate that telephone?

Mr. McLean: We have no employees operating that telephone.

Commissioner Harlan: Well, they are used in running your trains are they not, those telephone lines?

Mr. McLean: Not that I know of.

Commissioner Harlan: Have you a telephone line along the main line?

1739 Mr. McLean: No, sir; not for the Louisiana & Pacific.

Commissioner Harlan: Who would know about the ownership of these telephone lines?

Mr. Rickey: What specific line are you inquiring about?

Commissioner Harlan: I will put the question to you. What specific line do you know about?

Mr. Rickey: The Louisiana & Pacific built a line which was included in the sale to the Lake Charles & Northern main line. I understand there is a station at each of the junction points along the line, Lilly Junction, De Ridder Junction and Fayette for dispatching trains, but this line was sold to the Lake Charles & Northern.

Commissioner Harlan: Mr. Davis, I understood you to say you did not use the telephone lines on the main line in the train dispatching?

Mr. Davis: That is my observation. Perhaps I should have stated that I did not know, but I got it into my head we had a telephone line through from De Ridder to Lake Charles and that on the branch lines there was some sort of communication. I have nothing to do

with the operation of the trains, and am sorry I cannot give you the information.

Commissioner Harlan: We would like to get the information from some one, some one ought to be here who knows about
1740 all these things.

Mr. Garwood: I will ask you if it is not the common practice among railways to have joint use of tracks and joint agents?

Mr. Davis: I think it is. I just cited three cases right in this vicinity. There may be more. Those are all that occurred to me.

Mr. Garwood: Where there are such contracts as a rule the agents are joint and do business for both companies?

Mr. Davis: I understand that to be the case.

Mr. Garwood: And maintain a neutral attitude in the solicitation of business for the respective roads?

Mr. Davis: Yes, sir.

Mr. Blair: You spoke of a joint line between Cheneyville and Alexandria used by the Texas & Pacific and the Morgan Road.

Mr. Davis: Yes, sir.

Mr. Blair: Would it be usual for the Texas & Pacific to make joint rates with the Morgan Railroad from points on its line to any point on that joint line?

Mr. Davis: Would it be what?

1741 (Question read.)

Mr. Davis: I cannot understand it.

(The two previous questions were again read.)

Mr. Davis: I do not believe I could say. That would be a matter of agreement. I do not see anything unusual in it.

Mr. Blair: Is it not a matter of custom that two railroads under those circumstances never make joint rates? That is the fact in regard to the Texas & Pacific and the Morgan Company. If you do not know, of course I cannot bring that fact out by you.

Mr. Davis: I tried to explain in our case that where two lines are competing it is not usual to interchange business.

Commissioner Harlan: Mr. Blair, what is your point of view in putting these inquiries? I would like to get some idea.

Mr. Blair: Some comment was made on the fact that there were no joint rates between points on the Louisiana & Pacific and some points on the joint line operated by it and the Lake Charles & Northern, and the object of my question was simply to show that there was nothing unusual in the absence of joint rates between the Lake Charles & Northern and the Louisiana & Pacific under those circumstances. I had in mind the fact that we operate a joint line
1742 with the Texas & Pacific between Cheneyville and Alexandria, but the Texas & Pacific will not make joint rates with our line for any point on its line to some point on that joint line.

Commissioner Harlan: Is it not rather usual when trackage rights are given to provide that the lessee line shall not have any local traffic, or shall not originate traffic on the leased tracks?

Mr. Blair: That does not exist in regard to the contract between the Texas & Pacific and the Morgan company.

Commissioner Harlan: Well, that is the same interest, is it not?

Mr. Blair: Oh, no. The Texas & Pacific and the Morgan, one is a Gould line and the other is a Huntington line.

Commissioner Harlan: That seems to be all for the present company.

Mr. Cowan: I understand we are to finish the Louisiana & Pacific before we take up the others?

Commissioner Harlan: Yes. You have some other witnesses?

Mr. Thurmond: Yes.

(Witness excused.)

1743 Commissioner Harlan: I would like to ask Mr. McLean to take the stand.

Mr. Thurmond: Mr. McLean is the local Auditor for the line. We have the General Auditor here. I put Mr. McLean on just to prove the correctness of the figures as to tonnage. I simply stated that, so if you ask questions beyond Mr. McLean's domain, we can probably find some one else here to answer them.

DAVID MCLEAN, was called as a witness, and having been previously sworn, testified as follows:

Commissioner Harlan: Mr. McLean, will you define again your position and the scope of your work for the Louisiana & Pacific?

Mr. McLean: My position is local auditor at De Ridder. I take care of and audit all of the revenues and expenses of the company so far as it pertains to the handling of freight and passenger service, and so on.

Commissioner Harlan: Do you mean over the whole line?

Mr. McLean: Yes.

Commissioner Harlan: Do you have to do with the expense account at all?

1744 Mr. McLean: The expense accounts of the officials?

Commissioner Harlan: The operating expense account?

Mr. McLean: Yes.

Commissioner Harlan: Do you have clerks under you who make the actual entries on the books under your supervision?

Mr. McLean: Yes, sir.

Commissioner Harlan: Then I will put to you again the question whether in the expense account or operation of this track between De Ridder and Lake Charles there is anything there which shows whether that company runs a telephone line.

Mr. McLean: I think not. I think that there were one or two items of expense connected with telephone operation last year. It pertained to the purchase of cable for passing the line under certain tracks, and that is all I know of.

Commissioner Harlan: Is there a telephone on your desk?

Mr. McLean: Yes, sir, there is a telephone in my office.

Commissioner Harlan: Where is the central to and from which it is operated?

Mr. McLean: We have a central in our own building that connects us with the De Ridder central and the various agencies, various stations.

Commissioner Harlan: If you want to call up the auditor
1745 at Lake Charles, or any accounting officer at Lake Charles, or elsewhere, over what wires do you call it up?

Mr. McLean: That would be as I understand it over the wires of the Lake Charles & Northern.

Commissioner Harlan: If you want to call up a railroad official at Bundick, what wires do you use?

Mr. McLean: As I understand that Bundick telephone, it is the property of the lumber company.

Commissioner Harlan: Do you mean that runs over your rail line?

Mr. McLean: Now, your Honor, I do not know where it runs.

Commissioner Harlan: Is any one carried on your payrolls that has to do with the operation of that telephone line at Bundick?

Mr. McLean: No, sir.

Commissioner Harlan: Is it not used in operating your trains?

Mr. McLean: I could not say.

Commissioner Harlan: Well, Mr. Davis has just said that it was. Have you no information on that point?

Mr. McLean: I have not. I simply know that there is a telephone station at some of the junction points of the branches with
1746 the main line; that is all I know about it.

Commissioner Harlan: You do not know whose telephone line that is?

Mr. McLean: I do not.

Commissioner McLean: Does anyone here know?

Mr. McLean: Why——

Commissioner Harlan: Cannot we get some information on this from some one who knows.

Mr. Sweet: The telephone line between De Ridder and Bundick belongs to the Hudson River Lumber Company.

Commissioner Harlan: And it reaches their camp?

Mr. McLean: Yes.

Commissioner Harlan: And is in use in the operation of your railroad?

Mr. Sweet: I do not think so.

Commissioner Harlan: Mr. Davis said it was.

Mr. Sweet: I do not think so.

Mr. Davis: I said I have been out over that line and I observed a telephone line. I do not think I said it was used for that, because I really do not know.

Commissioner Harlan: Perhaps I was mistaken, but I understood you to say that the main line as you call it, was operated
1747 under a telegraph system, and the branch lines by telephone system.

Mr. Davis: I may have said something to that effect, but that was simply from observation.

Commissioner Harlan: Now, Mr. Sweet, are there any offices and stations along the right of way of that branch line?

Mr. Sweet: Trains operating on the Bundick Branch, as I understand, leave De Ridder under the direction of the Dispatcher of the

main line; they have to pass out over the tracks of the main line, as you will notice on the map, and then they have 7½ miles of run to Bundick, one train operating over that track. They do not come in contact with any other trains, and they are not dispatched, as I understand.

Commissioner Harlan: Is there any telephone office out on that line?

Mr. Sweet: There is a telephone office out there, yes, sir.

Commissioner Harlan: When the train starts back, is not the telephone used?

Mr. Sweet: They have the right to the tracks; there is no necessity for them getting orders until they get to De Ridder.

1748 Commissioner Harlan: Am I to understand that the telephone is never used to give any orders by the railroad officials?

Mr. Sweet: I could not say as to that.

Commissioner Harlan: Is there anyone here who can say?

Mr. Sweet: It is used, I presume occasionally. Mr. Boswell might give you that.

Commissioner Harlan: Well, I will not pursue that inquiry any farther. No one here seems to know how the business is done on the branch lines. I will ask this further question of you, Mr. McLean: Do the operating expenses include any item for the maintenance of this telephone line?

Mr. McLean: No, sir.

Commissioner Harlan: Do you know how the taxes are assessed on the track that belongs to the Louisiana & Pacific?

Mr. McLean: I do not.

Commissioner Harlan: Have you ever looked into that matter?

Mr. McLean I have not.

Commissioner Harlan: Do you know anyone who does know?

Mr. McLean: I think our general auditor has.

Commissioner Harlan: Is the general auditor here?

Mr. McLean: Yes, sir; Mr. Rickey.

Commissioner Harlan: Mr. Rickey, will you tell us about
1749 this matter of taxes, on what basis they are assessed?

Mr. Rickey: I am not prepared to answer that, Mr. Commissioner.

Commissioner Harlan: Had you anything to do with making the return to the assessing officials?

Mr. Rickey: Yes, sir, we make annual reports required on their blanks, but I have not copies here.

Commissioner Harlan: Have you no recollection on that point?

Mr. Rickey: No.

Commissioner Harlan: Mr. Sweet, did you not make a report to the taxing official?

Mr. Sweet: We have a party who attends to that specially. It is his duty.

Commissioner Harlan: Is that party in court?

Mr. Sweet: No, sir.

Commissioner Harlan: Do you know on what basis you work that out?

Mr. Sweet: I could not say. The reports are furnished to the authorities over here in Louisiana, and we have his report here.

Commissioner Harlan: If you can, take from that report
1750 what it was.

Mr. Sweet: I think the report as to the assessment to the right of way and so forth was made on the basis of their being exempted from taxation for that part under a certain law, that is that which was constructed for a certain period. Now I do not handle that and am not familiar with it.

Commissioner Harlan: I want to know on what basis the taxes were assessed? Do you know?

Mr. Sweet: No, I do not know.

Mr. Thurmond: This book shows it for 1908 and 1909, before the Railroad Commission.

Commissioner Harlan: Mr. Sweet, do you not know that the taxes were assessed on the same basis that is applied to tap lines and logging roads, and so forth?

Mr. Sweet: I do not know about that, your Honor.

Commissioner Harlan: Did you not yourself make a return to the assessing officials to that effect?

Mr. Sweet: I do not think so. I think that was made by our Commissioner who looks after that.

Mr. Thurmond: His name is Sweet.

1751 Mr. J. W. Martin: I might be able to clear this up. I am familiar with the situation as it exists on the Southern Pacific Railway. The return is made to the State Board of Appraisers on blanks provided by the State Board. The rate of taxation or assessment, rather, is settled by that State Board of Appraisers, according to its published report. The laws of Louisiana exempt railroads constructed in the state for ten years after their construction from taxation for state and parochial taxes, but they are liable for special taxes levied in the district through which they run. For instance, for school taxes, or some special tax like a special school tax that is not a parochial school tax.

Commissioner Harlan: Well, do you know what the basis of that assessment was?

Mr. Martin: It is set forth in the report of the State Board of Appraisers. I thought that that was the report of the State Board of Appraisers that you had before you. I can find one in the city. That is the Railroad Commissioners' report I find, but the State Board of Appraisers make a report.

Mr. Rickey: I might say for the year ending June 30, 1910 our taxes amounted to approximately $2,213, as assessed by the State Board.

Commissioner Harlan: That still does not give the basis
1752 of the assessment, and that is what the Commission desires.

Mr. Martin: I will say further, for the information of the Commissioner, that I have a copy of that report at home, and I have looked it over, but I have not memorized sufficiently to state positively, but that the different roads are assessed according to the value of the material entering into them, according to the weight of

the steel, and so forth, and the equipment is assessed according to its value.

Mr. Garwood: I do not know how it is in Louisiana, but in Texas, when we go before the county boards of equalization, each railroad scrambles for the lowest valuation it can get.

Commissioner Harlan: That seems to be a usual course of conduct. Well, the Commission will advise itself on this question. Mr. McLean, it appeared yesterday that until quite recently this railroad company was indebted to a substantial amount, I have forgotten the exact figures, in the form of notes held by four different lumber companies. Do you know what the origin of that indebtedness in each case was?

Mr. McLean: I have understood, sir, that it was the purchase price of that part of the line purchased from those various lumber companies.

Commissioner Harlan: That is to say, the individual debt
1753 due to each company covers the book value of the railroad property acquired from that company?

Mr. McLean: From that company; yes, sir.

Commissioner Harlan: It amounted in all to about $306,000?

Mr. McLean: I think it amounted, when refunded by the bonds issued, to approximately $500,000.

Commissioner Harlan: Well, do you mean bonds were issued in excess of the amount of the indebtedness?

Mr. McLean: Yes, sir.

Commissioner Harlan: It was for that reason that I had lost sight of that fact. Were the bonds divided among these lumber companies in about the proportion of the indebtedness that was due to them, or did they go into other hands?

Mr. McLean: I understand that the notes held by those lumber companies were taken up and bonds in like amount given them instead.

Mr. Thurmond: The general auditor can give you more information along those lines than this man, if you want to have him do so.

Commissioner Harlan: That may be, and if so, I would like to have him give it. But Mr. McLean testified on these points yesterday. Judge Cowan, have you any questions?

1754 Mr. Cowan: There are a few question I wanted to ask Mr. McLean, but unfortunately I have forgotten most of them. How far back in this transaction were you personally acquainted with the organization of these companies and the issuance of securities, and the like?

Mr. McLean: I commenced work for the Louisiana & Pacific three years ago.

Mr. Cowan: You were not there at the inception of the organization of the railroad company and its relations with the Lake Charles & Northern by these contracts and so forth?

Mr. McLean: No. I am familiar with the contracts we operate under.

Mr. Cowan: But that is just by having seen the contracts?

Mr. McLean: Yes, sir, by having seen them.

Mr. Cowan: Do you keep up the books, the general office books,

of the Louisiana & Pacific Railway, as an auditor in charge of all of its accounts?

Mr. McLean: Yes, sir.

Mr. Cowan: And I suppose you have reported or do report the physical properties, the equipment, and everything of that kind, that is in your department, in the accounts reported to the Interstate Commerce Commission?

1755 Mr. McLean: Yes, sir, I have filed those figures.

Mr. Cowan: Is this private car part of your equipment?

Mr. McLean: It belongs to the Louisiana & Pacific Railway, yes, sir.

Mr. Cowan: What use has the Louisiana & Pacific Railway for a private car?

Mr. McLean: Why, that car is used by our vice-president.

Mr. Cowan: Who is that?

Mr. McLean: Mr. Sweet.

Mr. Cowan: Well, we have been hearing round that it was a very fine car, and all that, and I wondered how a little railroad like this could afford any such equipment. Can you tell us what it is carried at in your equipment cost?

Mr. McLean: In our equipment account it is carried at—I cannot give you an exact amount, but I can give it to you within a few hundred dollars—$20,000.

Mr. Cowan: $20,000.

Mr. McLean: Yes.

Mr. Cowan: Where do you keep it?

Mr. McLean: Wherever Mr. Sweet happens to be. I think——

Mr. Cowan: Is it kept on your line?

Mr. McLean: If he is on our line; yes, sir.

1756 Mr. Cowan: You know what I mean now?

Mr. McLean: I don't know where the car is, because I am not with the car.

Mr. Cowan: Well, you hardly ever see it?

(No response.)

Mr. Cowan: Do your accounts show the car mileage paid to other companies for the carrying of that car over their lines?

Mr. McLean: My accounts do not show any car mileage paid to other companies for the handling of that car.

Mr. Cowan: And you do not pay any?

Mr. McLean: My accounts do not show it.

Mr. Cowan: I am asking you if you pay it. You say they do not show it. Now, does the Louisiana & Pacific pay car mileage on that car over foreign lines?

Mr. McLean: If it did, it would appear in my books.

Mr. Cowan: That is what I was getting at. The fact it does not appear on the books means you do not pay it?

Mr. McLean: We do not pay it.

Mr. Cowan: Do you know whether it moves under a pass arrangement over the foreign lines?

Mr. McLean: I do not know under what arrangement it

1757 moves over foreign lines.

Mr. Cowan: Do your accounts show any repairs of that car?

Mr. McLean: Yes, sir.

Mr. Cowan: And where are those repairs made?

Mr. McLean: I believe the last time that car was repaired it was repaired at the shops at Longville, Louisiana.

Mr. Cowan: Well, that is probably some very unimportant repairs?

Mr. McLean: No, I think it was rather extensive

Mr. Cowan: From whom did your railroad company purchase that car?

Mr. McLean: I do not know.

Mr. Cowan: It was there when you came?

Mr. McLean: It was there when I went there.

Mr. Cowan: What is the average cost of maintenance of that car?

Mr. McLean: I could not state positively the average cost.

Mr. Cowan: Do you pay for the porters and, to use Mr. Kirby's expression, the "vittles" and so on?

Mr. McLean: Yes, sir.

Mr. Cowan: I suppose of course it is a prohibition car?

Mr. McLean: Undoubtedly; when in Texas it is, I think

1758 Mr. Cowan: And does Mr. Sweet eat all these supplies or does he have others of the lumber companies with him to aid him in the consumption of the commissary?

Mr. McLean: Well, now I could not say.

Mr. Cowan: Well, there must be some considerable expense in the maintenance of a car worth $20,000, and I thought maybe you would know what it was.

Mr. McLean: I do not know. I could not state exactly what the average cost of the maintenance of the car is.

Mr. Cowan: Can you state approximately what it is?

Mr. McLean: I would not care to say.

Mr. Cowan: What is that?

Mr. McLean: I would not care to say.

Mr. Cowan: Well, I know you would not——

Mr. McLean: I don't mean that. I am quite willing to say if I knew, if I knew positively I would tell you and would be glad to.

Mr. Cowan: It is not put in separately into your accounts in the reports to the Interstate Commerce Commission?

Mr. McLean: No.

Mr. Cowan: It goes in under the head of repairs and renewals of cars?

1759 Mr. McLean: The repairs to the car of course go under the passenger car repairs.

Mr. Cowan: Where do the expenses that enter into the maintenance of equipment—where do the expenses of this porter or these porters, and the commissaries—where does that go into the accounts which go to the Commission, under what head?

Mr. McLean: Under the head of salaries and expenses of clerks and attendants and general officers, of course.

Mr. Cowan: That car is not used for the purposes of your railroad is it? It is used for the purposes of the people who own the lumber companies?

Mr. McLean: Well, now, so far as I know, it is used for the purposes of the railroad.

Mr. Cowan: And what purposes of the railroad?

Mr. McLean: I never have discussed any lumber business with Mr. Sweet in that car.

Mr. Cowan: You transact railroad business with him?

Mr. McLean: I have transacted railroad business with him in that car.

Mr. Cowan: Aside from the meetings of officials in the car, for what railroad purposes is it used?

Mr. McLean: Well, positively I could not state. I pre-
1760 sume general railroad purposes.

Mr. Cowan: It is kept at Kansas City principally, is it not?

Mr. McLean: I could not say that. I do not know where the car is except when it is down on our own line.

Mr. Cowan: You answer that you do not know where it is generally kept. You are not familiar with the bond issues that are placed on the market for sale of the lumber companies, are you?

Mr. McLean: No.

Mr. Cowan: Nor the interest that they bear?

Mr. McLean: No.

Mr. Cowan: What do you do with the money? Do you get the money? You keep the accounts. Do you get the money that comes into this railroad company?

Mr. McLean: Yes, sir.

Mr. Cowan: What do you do with it?

Mr. McLean: It is deposited with the Calcasieu National Bank at Lake Charles and the First National Bank at Kansas City, Missouri.

Mr. Cowan: Principally which?

Mr. McLean: The largest balance right now is with the
1761 First National Bank of Kansas City, Missouri.

Mr. Cowan: Do you issue the vouchers for payments out of this money?

Mr. McLean: Yes, sir.

Mr. Cowan: And it principally goes for the payment of interest on the indebtedness, does it not, after the payment of operating expenses?

Mr. McLean: Well, no, the interest on the indebtedness is six per cent, on the bonded indebtedness of the road, and the operating expenses are a great deal more, and the principal part of it would be operating expenses.

Mr. Cowan: Do you have a net income over and above the fixed charges?

Mr. McLean: Yes.

Mr. Cowan: And to what account is that carried? Is that carried in a surplus?

Mr. McLean: That is carried into surplus account, yes, in accordance with the requirements of the Interstate Commerce Commission.

Mr. Cowan: How much does that amount to per year?

Mr. McLean: For the last fiscal year it was $16,000 and some hundred dollars.

1762 Mr. Cowan: You did not declare any dividends to the stockholders?

Mr. McLean: Last year?
Mr. Cowan: Yes.
Mr. McLean: Yes, sir, we did.
Mr. Cowan: How much?
Mr. McLean: Seventy per cent stock dividend.
Mr. Cowan: Seventy per cent?
Mr. McLean: Yes.
Mr. Cowan: Do you happen to know now yourself who happened to get that money?
Mr. Rickey: May I answer that question as to dividends?
Mr. Cowan: If he knows, let him answer. He said he handles the money.
Mr. Rickey: He did not answer it fully. There was a stock dividend and not a cash dividend.
Mr. Cowan: Well, I asked him if they paid a dividend and he said yes. Was it a cash or a stock dividend?
Mr. McLean: Stock dividend, I said.
Mr. Cowan: Did you pay any cash dividend?
Mr. McLean: No.
Mr. Cowan: Who got the stock dividend?
1763 Mr. McLean: The stockholders.
Mr. Cowan: You issued that, did you?
Mr. McLean: No, I did not issue the stock certificates.
Mr. Cowan: No money accrues to the stockholders of the lumber company from the operation of this railroad unless it comes from the interest on bonds?
Mr. McLean: No.
Mr. Cowan: Or in the form of advantage in the operation of the lumber company?

(No response.)

Mr. Cowan: Do you know anything about why there was a 70 per cent stock dividend issued?
Mr. McLean: No, I did not know why it was decided to issue that stock dividend.
Mr. McLean: Are you accumulating any surplus so you can pay any cash dividend on that stock?
Mr. McLean: We have a surplus. Now, what the management of the road will decide to do with it I am not advised.
Commissioner Harlan: When you issued the stock dividend, it went on the liability side of the account?
Mr. McLean: Yes.
Commissioner Harlan: What went on the other side?
1764 Mr. McLean: The surplus represented by that dividend had been used for improvements and additions.
Commissioner Harlan: How did you enter up the item on the other side of the account, in what form?
Mr. McLean: It is charged to surplus.
Commissioner Harlan: What was the amount of the stock dividend?
Mr. McLean: $21,000.

Commissioner Harlan: In the surplus account what entry did you make?

Mr. McLean: Your Honor, I do not believe I quite understand your question.

Commissioner Harlan. If you charge it to surplus, you put some entry in the surplus account, did you not?

Mr. McLean: Well, we charge surplus and credit capital stock, of course, if I can understand your question; that is the only book transaction there would be.

Commissioner Harlan: Well, Judge Cowan, will you proceed with this witness, if you have any further questions?

Mr. Cowan: I have none.

Commissioner Harlan: Have you any further questions, Mr. Thurmond?

1765 Mr. Thurmond: No, sir. We did not recall him.

(Witness excused.)

P. C. RICKEY was recalled as a witness, and having been previously sworn testified as follows:

Mr. Thurmond: You are the general auditor of the Louisiana & Pacific Railway Company?

Mr. Rickey: I am.

Mr. Thurmond: You are auditor for some number of other companies?

Mr. Rickey. Yes, sir.

Mr. Thurmond: Probably 20 or 25?

Mr. Rickey: About 27, I judge; the supervising auditor.

Mr. Thurmond: His Honor asked something about the issuance of the bonds of the Louisiana & Pacific Railway. Will you explain that bond issue?

Mr. Rickey: Well, the Louisiana & Pacific Railway is an incorporation with an authorized capital stock of about $200,000, of which only $30,000 has been issued for cash, and they were able to acquire more or less railroad material and equipment along their
1766 line on a time basis, by purchase on a time basis, for which they gave notes bearing interest at six per cent, and they issued a bond issue, authorized issue of $600,000, using these bonds, which were secured by mortgage on the entire properties to refund the notes, together with the sale of such bonds as were necessary to acquire additional working capital. For instance, the bonds were taken by various individuals for investment, by banks and trust companies.

Mr. Thurmond: You have no means of knowing where those bonds are now, unless they happen to be registered?

Mr. Rickey: I only know from hearsay and conversation with the bondholders.

Mr. Thurmond: Do you know in that way that they are scattered among a number of owners?

Mr. Rickey: Yes, sir, scattered quite largely. I know of promi-

nent banks and trust companies that have them, as well as the lumber companies from whom the property was acquired.

Mr. Thurmond: The bond issue was in excess of the debt of the company?

Mr. Rickey. The authorized issue was, not the actual issue.

Mr. Thurmond: Do you know of some blocks of those bonds being disposed of to persons who had no interest in any of
1767 these mills and lumber companies?

Mr. Rickey: Yes, sir; quite a number of bonds.

Mr. Thurmond: You might give one or two. The Commissioner seems interested in that point.

Mr. Rickey: The First National Bank of Kansas City; the Calcasieu National Bank of Lake Charles; the Merchants National of Houston, I believe has $15,000.

Commissioner Harlan: Those first two banks are banks where your accounts as a railroad are kept?

Mr. Rickey: We have an account kept with the First National—yes, the first two banks.

Mr. Thurmond: Do you know of some individuals not interested in the lumber companies that own some of those bonds, or did own them?

Mr. Rickey: I cannot recall any at this time.

Mr. Thurmond: Well, you know of some people who have bought the bonds simply as an investment?

Mr. Rickey. Yes, sir, who had a general knowledge of our property; people who were not stockholders in the company and not associated with it.

Mr. Thurmond: Have you a surplus on hand now, the Louisiana & Pacific?

1768 Mr. Rickey: Yes.

Mr. Thurmond: Have you paid interest on your indebtedness as it fell due?

Mr. Rickey: Yes, sir.

Commissioner Harlan: What is the amount of the surplus?

Mr. Rickey: It is about, around $40,000.

Commissioner Harlan: Well, you need not stop on the exact amount.

Mr. Rickey: It is $51,000.

Mr. Thurmond: Are you accumulating it at this time for any particular purpose?

Mr. Rickey. Well, we have our semi-annual interest to meet January 1st on our indebtedness, amounting to about $30,000 to $35,000.

Commissioner Harlan: Have you stated that as a surplus without making a cross entry of this accrued interest?

Mr. Rickey: No, this surplus is in addition to that accrual.

Commissioner Harlan: $51,000?

Mr. Rickey: Yes, sir. I thought he meant a surplus of cash.

Mr. Thurmond: I used the word surplus not in the accounting sense, but if you had a balance on hand.

1769 Mr. Rickey: We are conserving all the cash we can get to meet our obligations.

Mr. Thurmond: Have you bought or contracted recently for any new equipment?

Mr. Rickey: Yes, sir.

Mr. Thurmond: Cars?

Mr. Rickey. Yes, we have quite a number of cars ordered now and delivered, and several engines.

Mr. Thurmond: The Commissioner asked yesterday some one about the operating ratio. Can you give him that on the Louisiana & Pacific?

Mr. Rickey: About 65.8 per cent.

Mr. Thurmond: 65.81 we have it here.

Mr. Rickey: 65.81; that is the cost of operating, not including interest charges and depreciation.

Commissioner Harlan: Not including depreciation.

Mr. Rickey: I beg pardon; it does include depreciation; yes, sir.

Mr. Thurmond: That will give your Honor an idea of the information of the witness.

Commissioner Harlan: I merely wanted to correct that statement about depreciation.

1770 Mr. Thurmond: My questions doubtless have given your Honor an idea of what the witness is, and if you have any questions I have nothing further.

Commissioner Harlan. No, I think not.

Mr. Cowan: You spoke about being auditor of a great many companies. I suppose that includes all these lumber companies of the Long-Bell interests?

Mr. Rickey: Yes, sir.

Mr. Cowan: And includes the different railroads which have been mentioned here serving those lumber concerns?

Mr. Rickey: Yes, sir.

Mr. Cowan: And your office is kept where; at Lake Charles?

Mr. Rickey: At Kansas City.

Mr. Cowan: And do you divide the expense of this auditing office among the different lines and lumber companies?

Mr. Rickey: No, my office at Kansas City is a supervising office; the expense is borne by such companies as receive the benefits of the clerical work.

Mr. Cowan: I do not understand it, and am just trying to understand it. Are you simply an employee for these concerns only, or do you run a general auditing office in Kansas City?

1771 Mr. Rickey. No, I am employed by the Long-Bell Lumber Company's interests, and Mr. Long's interests in general.

Mr. Cowan: You have one office at which this general service is performed for all these companies?

Mr. Rickey: Yes, sir.

Mr. Cowan: And each company has its own auditor at its place of business?

Mr. Rickey: Yes.

Mr. Cowan: And you might call him a bookkeeper, I suppose?

Mr. Rickey: Chief clerk, ranking accountant, I mean.

Mr. Cowan: And that is the case with the lumber companies and each one of those railroads?

Mr. Rickey: Yes.

Mr. Cowan: They all make reports to you?

Mr. Rickey: Yes.

Mr. Cowan: Do the railroads spoken of make their annual reports to the Railroad Commission of Louisiana and to the Interstate Commerce Commission direct from their offices, or do you make those reports?

Mr. Rickey: They are prepared in the local offices. All
1772 the general records or detailed records of each railroad are kept in its own local office.

Mr. Cowan: Is there a general auditing of books of the lumber companies in the office, so that you know what the expenses and the earnings and capitalization and interest and all of that is?

Mr. Rickey: Yes.

Mr. Cowan: Your own books, then, constitute a compendium of the business of each lumber company in your office?

Mr. Rickey: No, sir; the books do not, no, sir.

Mr. Cowan: What would they contain, what general character of information?

Mr. Rickey: Business relating to the individual companies; each company has its own set of books.

Mr. Cowan: Well, that is what I meant. If Mr. Long wants to know what the situation is in regard to any one of the lumber companies, he goes to your office for it?

Mr. Rickey: Yes.

Mr. Cowan: And there you can tell him everything that there is about it, so far as all of the property owned, the indebtedness, the interest, taxes and operating expenses, the stock of lumber on hand, the sales, and the bills receivable, and so on?

1773 Mr. Rickey: Yes, sir.

Mr. Cowan: Now, that general account you get as a transcript from the local bookkeeper at a particular mill, or——

Mr. Rickey: I get the reports from him, the financial reports.

Mr. Cowan: But the local man at the mill has nothing to do with the indebtedness, interest and the general administration expenses. You would handle that at your own office?

Mr. Rickey: It is all disbursed through his office, the receipts and disbursements are handled by the local people.

Mr. Cowan: Is that directed from your office?

Mr. Rickey: Not in detail, no, sir.

Mr. Cowan: But the whole thing is concentrated there at Kansas City under your supervision, and the work performed by these fellows out where the mill is or the railroad is operated?

Mr. Rickey: I supervise their detail and outline their method of accounting, and so forth.

Mr. Cowan: Mr. Long has his office there with you or you with him?

Mr. Rickey: Yes, sir, the same building.

Mr. Cowan: The general sales agent has his office there?

1774 Mr. Rickey: Yes, sir.

Mr. Cowan: Is he general sales agent of all these lumber companies of which you are auditor?

Mr. Rickey: I might say so. He sells their output.

Mr. Cowan: Well, all of these lumber companies have one general sales department, have they not; that is, they have a general agency for the sale of the entire output of all these common interests?

Mr. Rickey: They have arranged with one sales office to handle their entire output.

Mr. Cowan: Who is in charge of that?

Mr. Rickey: Mr. N. B. Nelson.

Mr. Cowan: You have nothing to do with that?

Mr. Rickey: Not with the sales.

Mr. Cowan: Do you have to do with the collection of the money, or does it go back to each mill from which the lumber is shipped?

Mr. Rickey: No, it is collected by the Long-Bell Lumber Company.

Mr. Cowan: There at Kansas City?

Mr. Rickey: Yes, sir.

Mr. Cowan: And you keep your account with the First
1775 National Bank, somebody else said?

Mr. Rickey: No. I did not say so.

Mr. Cowan: I will ask where it is kept.

Mr. Rickey: The Long-Bell Lumber Company?

Mr. Cowan: Yes. These lumber companies; where do they keep their bank accounts?

Mr. Rickey: In various banks of Kansas City; four or five banks.

Mr. Cowan: The money is collected for lumber that is sold through this sales agency; does that money come to you at Kansas City for entry on the books?

Mr. Rickey: Yes, sir.

Mr. Cowan: And you make the deposits in the bank?

Mr. Rickey: Yes, sir.

Mr. Cowan: And in whose name?

Mr. Rickey: The Long-Bell Lumber Company?

Mr. Cowan: You are acquainted with the capitalization and all of that, of the Long-Bell Lumber Company?

Mr. Rickey: Yes, sir.

Mr. Cowan: The Long-Bell Lumber Company is composed of what, of these different companies?

Mr. Rickey: No, they are all individual companies that you speak of.

1776 Mr. Cowan: I have a circular which you must know about, offering for sale bonds, I think it is bonds, some sort of securities, which I would like to hand you for the purpose of examination to see if you are familiar with the circular.

Mr. Rickey: I recognize it, yes, sir.

Mr. Cowan: Does that circular contain a correct statement of the capitalization and various forms of bonds and securities and assets and so on of the company?

Mr. Rickey: You are asking that for the purpose of investing in these bonds?

Mr. Cowan: How is that?

Mr. Rickey: Yes, it is correct; approximately correct.

Mr. Cowan: Without going to the trouble or taking time to read it, I should like to file it.

Commissioner Harlan: It may be marked.

(The statement so offered and identified was received in evidence and thereupon marked Intervenors' Exhibit No. 1, witness Rickey, received in evidence December 14, 1910, and is attached hereto.)

Mr. Garwood: We have not seen it, and I reserve the right to make any objection. I do not know whether it has any relevancy to this matter or not.

1777 Commissioner Harlan: Of course you may make objections after you have inspected it, Mr. Garwood.

Mr. Cowan: I may not understand you correctly, and if I do not, you can attribute it to my ignorance and not to your failure to have stated it right. When the general sales agent makes a sale for some other of these lumber companies than the Long-Bell Lumber Company, the Lufkin Land & Lumber Company, for example, and you collect the money, is that money deposited first to the Long-Bell Lumber Company?

Mr. Rickey: Yes.

Mr. Cowan: And then do you distribute it to the account of the Lufkin Land & Lumber Company?

Mr. Rickey: No.

Mr. Cowan: Does the Long-Bell Lumber Company?

Mr. Rickey: We have paid the Lufkin Company for anything they have shipped for our account.

Mr. Cowan: The whole business is handled through the Long-Bell Lumber Company, but each lumber company is paid for the lumber it supplies; is that it?

Mr. Rickey: Yes, the Long-Bell Lumber Company will sell lumber, buying it from the mills which you have named, as well as other mills, buy it where they can, buy the stock to the

1778 best advantages of their sales department.

Mr. Cowan: How many mills does the Long-Bell Company operate in its own interest?

Mr. Rickey: The Long-Bell Company does not operate any mills.

Mr. Cowan: Just what is the Long-Bell Company?

Mr. Rickey: The Long-Bell Lumber Company is a selling company, you might say; a sales company.

Mr. Cowan: What are its assets?

Mr. Rickey: The Long-Bell Lumber Company's assets?

Mr. Cowan: Yes.

Mr. Rickey: The usual character of a sales company or lumber company; it is a timber holding company.

Mr. Cowan: Is it incorporated?

Mr. Rickey: Yes.

Commissioner Harlan: You mean it owns timber lands?

Mr. Rickey: Yes, sir, but no mills.

Mr. Cowan: It owns timber lands, but does not operate any saw mills, I believe you stated?

Mr. Rickey: Yes.

Mr. Cowan: Does it own the timber lands which are owned by these lumber companies of which you are auditor, which do

1779 operate the saw mills?

Mr. Rickey: No, sir.

Mr. Cowan: Does it handle the entire output of these saw mills, of which you are auditor?

Mr. Rickey: Approximately, except what they might sell within the corporate limits of their little towns.

Mr. Cowan: And fixes the prices, or rather agrees with the purchaser on the price at which the lumber is sold?

Mr. Rickey: Yes, sir; they agree with the purchaser.

Mr. Cowan: And that is through a common sales agency?

Mr. Rickey: You mean the retail yard purchaser, or whoever buys it?

Mr. Cowan: Yes.

Mr. Rickey: Yes, sir.

Mr. Cowan: Does the Long-Bell Company operate retail yards?

Mr. Rickey: Yes, sir.

Mr. Cowan: How many?

Mr. Rickey: From 70 to 80.

Mr. Cowan: Where are they principally located?

Mr. Rickey: Kansas and Oklahoma, 16 or 17 on Santa Fe points.

1780 Mr. Cowan: How do you get your lumber to the Santa Fe points?

Mr. Rickey: I do not know.

Mr. Cowan: You know nothing about the operation of the railroad, and its relation to the other carrying lines which get the lumber to the place of sale?

Mr. Rickey: No, not in that detail of routing.

Mr. Cowan: What does the Long-Bell Lumber Company get for the service of handling the output of these mills?

Mr. Rickey: A commission.

Mr. Cowan: The ordinary commission that is charged in such a case?

Mr. Rickey: I think so, yes, sir; a small commission per thousand

Mr. Cowan: Mr. R. A. Long himself owns a controlling interest in each one of these lumber concerns?

Mr. Rickey: Yes, sir.

Mr. Cowan: And are the other owners of the Long-Bell Lumber Company also interested in the different lumbering concerns, the 30 odd that you are auditor of?

Mr. Rickey: They are not all lumber concerns.

Mr. Cowan: Well, those that are lumber concerns.

1781 Mr. Rickey: To some extent, yes; so far as we, as employees—we have been permitted to invest our savings usually.

Mr. Cowan: It is perfectly legitimate and proper, and undoubt-

edly you have got a pretty good thing. You have been able to beat Mr. Harriman in a trade pretty badly, and doubtless it is a money making proposition.

Mr. Rickey: No, it is a saving proposition.

Mr. Garwood: Is that submitted by way of argument or suggestion?

Mr. Cowan: Well, I thought it was wit.

Mr. Garwood: I did not recognize it as such.

Commissioner Harlan: You took it seriously, did you, Judge Garwood?

Mr. Garwood: Yes.

Mr. Cowan: Who are the individuals who own practically all the stock in the Long-Bell Lumber Company?

Mr. Rickey: What percentage would you consider practically all the stock?

Mr. Cowan: Well, you can just use the word any way you please.

Mr. Rickey: Mr. Long, the president of the company, is the largest stockholder; Mr. Sweet, Mr. Bannister, Mr. Nelson,
1782 Mr. Forsman, myself, Mr. Davis—no, not Mr. Davis; Mr. Nelson over here, the sales manager.

Mr. Cowan: So you have left Mr. Davis out high and dry on some account. He is nothing but a traffic man?

Mr. Rickey: I don't know about that.

Mr. Cowan: Do these same individuals also hold a holding in the saw mills which operate down here?

Mr. Rickey: Mr. Long is the principal stockholder in each sawmill company.

Mr. Cowan: How long have you been with the Long-Bell Lumber Company?

Mr. Rickey: Since the middle of 1905.

Mr. Cowan: Was that about the time of the genisis of the organization of this Louisiana & Pacific and these other railroads into operating railroad companies? I just forget the date.

Mr. Rickey: I think so.

Mr. Cowan: You were there when that was planned and put through, then?

Mr. Rickey: I think so; yes.

Mr. Cowan: Were you connected with the transaction as an auditor at that time?

Mr. Rickey: I outlined the accounting methods; yes, sir.

Mr. Cowan: You also had previously been in the employ-
1783 ment of the different lumber companies comprising this interest? I assume you have at least.

Mr. Rickey: I was in my present association or connection; yes.

Mr. Cowan: Mr. Andrews calls my attention to the statement in this circular, which you doubtless can explain, as you state the Long-Bell did not own any saw mills; in stating the assets covered by the mortgage, it says "In addition, this mortgage covers seven large modern saw mill plants, together with their full equipment, including planing mills" and so on. That is correct, I suppose, being in this statement?

Mr. Rickey: For the purpose of the bond issue the property was deeded to the Long-Bell Lumber Company and in the legal manner, and an exchange of instruments between the various companies was effected, whereby the Long-Bell Lumber Company had title sufficient to execute the trust deed, and the property was then deeded back subject to the trust deed, in order that the holding companies would receive their pro rate.

Mr. Cowan: You might explain briefly how that was done.

Commissioner Harlan: I think the witness has explained.

Mr. Rickey: I think I did.

Mr. Cowan: Then I will ask this question: What com-
1784 panies were they that deeded their properties to the Long-Bell Company, and then after the trust deed was given, received it back?

Mr. Garwood: We have interposed no objection up to this time. Of course in so far as there is any community of interests, stocks and so forth of the lumber companies in the railroad, we think that would throw light on the transaction and is relevant, but it seems to me this inquiry now has passed quite beyond all that, and assumes the attitude of one lumber company pursuing an inquiry into the various details of another lumber company per se, as absolutely disconnected from any transportation problem. Now, if we are going into that, and take up the details of this matter, and then go in and take up the details of the rival company, as in common fairness, if it is going to be a fishing expedition on the part of all of us who represent lumber interests, this hearing will never end. There are a vast number of interests here who wish to put the salient points of their cases before your Honor just as rapidly and as fast as we can, and I would like to suggest that there ought to be some limit to the minuteness of this inquiry. As to the main proposition, the community of interest, as a matter of course, so far as it throws any light
1785 on this investigation, it is proper to go into it, but I submit to go into the terms and conditions of timber mortgages and all that sort of thing is pursuing the inquiry beyond any reasonable limits, and we never will get through.

Commissioner Harlan: Judge Cowan, aside from the consumption of time, I think the objection as stated by Judge Garwood is well founded. I think the community of interests has been shown, so far as this evidence tends to show it, and the other details are perhaps not of value to this record.

Mr. Cowan: I am not attempting to go into the private matters, but I am attempting to show on the record the things which are shown on the public deed records of the company. I simply wanted to know who the companies were whose mills were included in the mortgage.

Commissioner Harlan: The witness may state that.

Mr. Rickey: The Calcasieu Long-Leaf Lumber Company; Hudson River Lumber Company; King-Ryder Lumber Company; Longville Lumber Company; Lufkin Land & Lumber Company; Rapides Lumber Company.

Commissioner Harlan: Which of these lumber companies are not on the line of the Louisiana & Pacific?

Mr. Rickey: The Rapides is on the line of the Woodworth
1786 & Louisiana Central; the Lufkin Lumber Company is in Texas on the line of the Cotton Belt, and the Houston, East & West Texas.

Mr. Andrews: You named only six, as I counted them. The circular names seven.

Mr. Thurmond: Is the Globe included?

Mr. Rickey: At that time one mill company had two mills. No, the Globe is not included. That made seven mills.

Mr. Cowan: How many mills does the entire organization operate?

Mr. Rickey: Seven.

Mr. Cowan: I mean all the Long-Bell interests.

Mr. Rickey: I do not know. We have mills in California.

Mr. Cowan: I mean in this yellow pine district, how many mills?

Mr. Rickey: Seven.

Mr. Cowan: I supposed one company would have several mills sometimes. That is all.

Commissioner Harlan: Have you any questions, Mr. Coleman?

Mr. Coleman: No.

Commissioner Harlan: I observe on June 30, 1908 the total out-
standing obligation of the Louisiana & Pacific in the form
1787 of notes payable and held by these lumber companies amounted to $362,549.57. These notes were increased by adding to the obligation to each lumber company, so that on April 30, 1909 the aggregate amount was $499,094.84, an increase during the year of $136,525.27. What was the explanation of that increase?

Mr. Rickey: The building of the terminals—I cannot give it to you specifically; it was doubtless largely equipment that the Louisiana & Pacific purchased from the mills along the line, and additional equipment or railroad steel.

Commissioner Harlan: It had nothing to do with the terminals at Lake Charles?

Mr. Rickey: No, it has nothing to do with the terminals.

Commissioner Harlan: The increase in the indebtedness was confined wholly, was it not, to the branch lines?

Mr. Rickey: Yes, sir—no, we build extensive yards at Fayette.

Commissioner Harlan: Are you sure about that?

Mr. Rickey: Well, that was built in 1909 some time. You said the entire indebtedness. The increase was due to branch lines.

Commissioner Harlan: No, I did not say that. I asked
1788 you that.

Mr. Rickey: No, I think not, because we were perfecting our tracks and terminals there, and we borrowed money from the bank to assist in doing that.

Commissioner Harlan: If you borrowed money from the bank you did not give a note to these lumber companies. I have confined your attention to the indebtedness represented by notes payable, and in the notes of these four lumber companies on April 30, 1909.

Mr. Rickey: That was for equipment and steel purchased; that was all, we purchased from them.

Commissioner Harlan: It did not relate to any main line improvements or terminals at any main line points?

Mr. Rickey: No, that particular increase did not.

Commissioner Harlan: Of that aggregate amount last stated our records seem to indicate that $133,842.61 was due on a note payable to the Hudson River Lumber Company.

Mr. Rickey: That is approximately correct. There was a series of notes, or several notes, aggregating about that amount.

Commissioner Harlan: That company operates on what you call the De Ridder Branch, does it not?

1789 Mr. Rickey: Well, they have logging camps beyond the De Ridder Branch, beyond Bundick.

Commissioner Harlan: Yes, but it receives its logs from what you call the De Ridder Branch?

Mr. Rickey: Yes.

Commissioner Harlan: And that branch was originally known as the De Ridder & Eastern Railway?

Mr. Rickey: Yes, sir.

Commissioner Harlan: And it belonged to the Hudson River Lumber Company?

Mr. Rickey: Yes.

Commissioner Harlan: And was sold by the Hudson River Lumber Company to the Louisiana & Pacific?

Mr. Rickey: Yes.

Commissioner Harlan: And the total amount of the purchase price, with the equipment up to April 30, 1909 was the sum I have last stated?

Mr. Rickey: Yes, sir. I am assuming your statement is correct.

Commissioner Harlan: The figures may all be subject to correction by you later. Now, the notes held by the Hudson River Company on June 30, 1908 aggregated $115,620, and dur-

1790 ing the following year the amount of the notes so held by that company was increased to $133,842.61. What is the explanation of that increase during the year?

Mr. Rickey: I cannot answer that, except in that same general way, that from time to time in the last three years the Louisiana & Pacific has purchased railway steel and equipment from the Hudson River Lumber Company I do not recall——

Commissioner Harlan: Well, the increase represents expenditures on the De Ridder Branch, does it not?

Mr. Rickey: It represents equipment and steel purchased from the Hudson River Lumber Company which the Louisiana & Pacific are using on that branch, as well as on other branches that equipment goes off that branch and is used on various branches.

Commissioner Harlan: That branch is operated almost exclusively for the Hudson River Lumber Company's logs, is it not?

Mr. Rickey: Yes, sir, but the equipment goes to all parts of the Louisiana & Pacific property.

Commissioner Harlan: What you call the Bonami Branch was formerly the Louisiana & Pacific Railroad?

Mr. Rickey: Yes, sir; a portion of it was. We have built
1791 and rebuilt, you know, and put on 60 pound steel and standardized the rail.

Commissioner Harlan: That belongs to the King-Ryder Company?

Mr. Rickey: At one time; in the beginning.

Commissioner Harlan: And was finally acquired by the Louisiana & Pacific?

Mr. Rickey: Yes, sir.

Commissioner Harlan: It is almost exclusively operated for that company or for that company's traffic?

Mr. Rickey: Yes, sir.

Commissioner Harlan: That company held notes of the Louisiana & Pacific on June 30, 1908 to the amount of $137,113. Our records seem to show that the amount of these notes was increased during the following year to $149,820.93. My understanding is that that increase was for funds advanced by that company and used for steel and equipment that had been assigned for use on that branch. Is not that the case?

Mr. Rickey: Well, I would qualify that——

Commissioner Harlan: I understand the equipment goes off that branch, but that money was furnished by that lumber company and for the purpose of improving that branch and available
1792 equipment on that branch in one form or another.

Mr. Rickey: Well, the Louisana & Pacific purchased from that interest such property as they wanted to use in permanent operation.

1793 Commissioner Harlan: On that branch?

Mr. Rickey: Yes, sir; the lumber company did not advance funds, as you mentioned, to develop that branch, except indirectly, as you so state.

Commissioner Harlan: That company holds the notes. It must have advanced the funds.

Mr. Rickey: Yes, sir, I say except in that indirect manner.

Commissioner Harlan: Do you call that indirect, to advance the money and take a note for it?

Mr. Rickey: Well, I was merely qualifying your remark about advancing funds to the Louisiana & Pacific.

Commissioner Harlan: Well, I do not quite catch your meaning, but I think there is no misunderstanding between us. The Lake Charles branch so-called on your records, was formerly the Lake Charles & Leesville Railway?

Mr. Rickey: Well, it covers the same territory, rebuilt.

Commissioner Harlan: Rebuilt and very extensively rebuilt?

Mr. Rickey: Very extensively rebuilt.

Commissioner Harlan: And it was changed from narrow gauge to standard gauge?

1794 Mr. Rickey: Yes, sir; the Lake Charles & Leesville was not an incorporated road.

Commissioner Harlan: The original road?

Mr. Rickey: No.

Commissioner Harlan: Who changed it to standard gauge?

Mr. Rickey: The Louisiana & Pacific largely—entirely.

Commissioner Harlan: When was that change made?

Mr. Rickey: The change was made after 1906, along in 1907 and 1908.

Commissioner Harlan: On June 30, 1908, the Calcasieu Long Leaf Lumber Company held notes of the Louisiana & Pacific to the extent of $89,916.57 according to our records. Now, was the Lake Charles branch a narrow gauge road when acquired by the Louisiana & Pacific?

Mr. Rickey: Yes, sir.

Commissioner Harlan: When acquired by the Louisiana & Pacific?

Mr. Rickey: Yes, sir.

Commissioner Harlan: It was afterwards made a standard gauge road?

Mr. Rickey: Yes, sir.

1795 Commissioner Harlan: Now I find that during the following year the indebtedness of the Louisiana & Pacific to this lumber company was extended, so that the total amount of notes held by it on April 30, 1909, aggregated $151,611.34, indicating that that additional amount of funds had been placed at the disposal of the Louisiana & Pacific by that lumber company. For what purpose was it used?

Mr. Rickey: That is for equipment.

Commissioner Harlan: Had it any relation to the change in gauge?

Mr. Rickey: I do not recall that the Calcasieu Long Leaf Lumber Company did that work. My recollection is that the Louisiana & Pacific standardized the narrow gauge portion, and the Louisiana & Pacific employed the Calcasieu Company to do some work on standardizing some logging cars and old equipment, and then the Louisiana & Pacific bought additional equipment direct from the car manufacturers.

Commissioner Harlan: Where did the Louisiana & Pacific get the funds for making that change in the gauge?

Mr. Rickey: No specific reserve was set aside; it came out of their general funds, operating profits and working capital, so far as they expended any money, I mean.

1796 Commissioner Harlan: Was it charged against the income account?

Mr. Rickey: Somewhat; I cannot recall in detail. It was in 1906 or 1907, and I cannot recall.

Commissioner Harlan: Will you be good enough to ascertain that fact and file a statement of it?

Mr. Rickey: Yes, sir.

Commissioner Harlan: Giving references to your books, showing all the details, if you can.

Mr. Rickey: Yes, sir. That is the reconstruction of the narrow gauge portion of the Lake Charles track?

Commissioner Harlan: Yes, the date and cost of it, and the source of the funds and whether any funds were advanced directly or indirectly by the Calcasieu Long Leaf Lumber Company for that purpose. That branch as I understand the testimony is operated almost exclusively for that lumber company, that is, for its traffic.

Mr. Rickey: The larger percent of traffic is for that lumber company.

Commissioner Harlan: When was the Longville Branch constructed?

Mr. Rickey: In 1907.

1797 Commissioner Harlan: Who furnished the funds for that?

Mr. Rickey: Some work was done by the Longville Lumber Company and other work by the Louisiana & Pacific direct.

Commissioner Harlan: Do you know what amount the Louisiana & Pacific advanced on that account?

Mr. Rickey: No, I could not answer that. In cash, you mean?

Commissioner Harlan: Yes.

Mr. Rickey: No, I could not answer that; ten thousand to fifteen thousand dollars I recall.

Commissioner Harlan: I wish you would ascertain that fact and also the source of funds advanced to the Louisiana & Pacific. The Longville Lumber Company on April 30th, 1909, held notes of the Louisiana & Pacific to the amount of $63,819.96. Do you know what use was made of the funds of the lumber company so advanced?

Mr. Rickey: That covered railroad equipment and steel.

Commissioner Harlan: I understand Examiner Burchmore has finished the Prescott & Northwestern, and I would like to call again for the Paragould and Memphis Railway.

(No response.)

Commissioner Harlan: The Saginaw and Ouachita River Railway Company.

1798 (No response.)

Commissioner Harlan: The Tioga & Southeastern.

Mr. Garwood: I think Mr. Saunders represents the Tioga & Southeastern and he has been very seriously unwell and I have promised to render some little assistance. I have not seen him this morning and I do not know whether he is up or not. He was quite unwell yesterday, but they have been here continuously.

Commissioner Harlan: Judge Garwood, as you are in this case, we will wait.

The Victoria, Fisher & Western.

Mr. Lee: I am president of the Tioga & Southeastern and we are ready. Mr. Saunders is our attorney here.

(The last question and answer were then read as follows:

"Commissioner Harlan: What use was made of the funds of the lumber company so advanced?

"Mr. Rickey: That covered railroad equipment and steel.")

Mr. Rickey: That covered railroad equipment and steel. Under the contracts between the Louisiana & Pacific and these several lum-

ber companies, the Louisiana & Pacific is to acquire all of that railroad property and pay for it in cash.

1799 Commissioner Harlan: Is to acquire?

Mr. Rickey: Is to acquire or was to.

Commissioner Harlan: Well, has it acquired it?

Mr. Rickey: It has acquired practically all of it now.

Commissioner Harlan: That Longville branch is operated exclusively for the Longville Lumber Company, is it not; it brings their logs into Lake Charles?

Mr. Rickey: Well, the larger proportion of the tonnage is for the Longville Lumber Company. It is not operated exclusively for it.

Commissioner Harlan: Our records show, and I believe that you stated that on June 30, 1908, the outstanding capital stock amounted to $30,000?

Mr. Rickey: Yes, sir.

Commissioner Harlan: The shares are hundred dollar shares?

Mr. Rickey: Three-hundred dollar shares as I remember it.

Commissioner Harlan: So that would make how many shares?

Mr. Rickey: One hundred shares.

Commissioner Harlan: The same amount was outstanding on April 30, 1909?

1800 Mr. Rickey: Yes.

Commissioner Harlan: Is that the present amount of outstanding capital stock?

Mr. Rickey: $51,000 is the present amount.

Commissioner Harlan: Well, you have stated on your direct examination that it was $30,000, and I thought perhaps there had been a mistake.

Mr. Rickey: I thought you referred to some specific date when you mentioned $30,000 heretofore.

Commissioner Harlan: I did a moment ago, but previously in responding to some one else you said the outstanding capital stock was $30,000.

Mr. Rickey: I must have misunderstood.

Commissioner Harlan: You meant to exclude the stock dividend, did you not?

Mr. Rickey: I do not recall under what circumstances I answered that.

Commissioner Harlan: The present amount outstanding is $51,000?

Mr. Rickey: Yes, sir.

Commissioner Harlan: How was that increase made?

Mr. Rickey: By a stock dividend of 70 per cent?

1801 Commissioner Harlan: 70 per cent?

Mr. Rickey: $21,000; as much as the surplus would stand.

Commissioner Harlan: Well, you exhausted the surplus practically?

Mr. Rickey: Yes, sir; we desired to increase our capitalization to be more consistent with the investment.

Commissioner Harlan: When the thirty thousand dollars of stock was outstanding it was held by six stockholders, Mr. Long own-

ing $23,700, and the other stockholders owning the balance, $6,300. The stock dividend of course was made in proportion to the holdings of the several stockholders?

Mr. Rickey: Yes, sir.

Commissioner Harlan: And do those stockholders own the stock now, namely: $51,000, in the same proportion?

Mr. Rickey: Yes, sir; there has been no change in the stockholders since that date.

Commissioner Harlan: Do they hold that stock on their personal account?

Mr. Rickey: They own it individually; yes, sir.

Commissioner Harlan: Not as trustees in any form for
1802 one another?

Mr. Rickey: Not to my knowledge.

Commissioner Harlan: Have you ever heard that there was any trust attached to any one of these holdings?

Mr. Rickey: No, I have not. I never heard any intimation of that.

Commissioner Harlan: For instance one or two holders own but one share here. Is that to qualify them as directors?

Mr. Rickey: The wives of some of these gentlemen?

Commissioner Harlan: I did not observe that they were the names of women. Are they directors in any of the companies?

Mr. Rickey: Yes, sir. Two of them I think are. I have not the directors' list

Commissioner Harlan: I assume in those two cases that they hold the shares to qualify them as directors.

Mr. Rickey: I think in two instances. yes; in order to make five directors.

Commissioner Harlan: So their stock is held in a trust relation?

Mr. Rickey: Well, no. I know that Mrs. Long paid for her stock. She bought it from Mr. Long. I remember that
1803 particularly. I have not a definite knowledge of the other individual cases.

Commissioner Harlan: Well, there are two persons that hold nine shares each. One is Mr. Sweet. Is that held in any trust relation?

Mr. Rickey: No, he bought that and paid for it.

Commissioner Harlan: And there is another holder of nine shares.

Mr. Rickey: Mr. Bannister?

Commissioner Harlan: Yes.

Mr. Rickey: He bought that and paid for it.

Commissioner Harlan: So far as you know the holding of Mr. Long is not in any trust relation for the Longville Lumber Company or any other company?

Mr. Rickey: It is not, so far as I know.

Commissioner Harlan: Did you ever hear that it was?

Mr. Rickey: No.

Commissioner Harlan: Mr. Rickey, you said some bonds were held by two or more banks. One was a Kansas City bank. What bank is that again?

Mr. Rickey: The First National Bank.

Commissioner Harlan: Is Mr. Long a stockholder in that
1804 bank?

Mr. Rickey: No, sir; I never heard that he was. He may be, but I doubt it very much. I never heard he was.

Commissioner Harlan: But your account is kept there?

Mr. Rickey: Yes, sir.

Commissioner Harlan: Well, is it not understood——

Mr. Rickey: A small checking account is kept there unless we accumulate a large amount of cash prior to our interest period date, in which event we keep most of it there.

Commissioner Harlan: Is it not understood that Mr. Long in some way dominates or controls the policy of that bank?

Mr. Rickey: No, indeed he does not; I do not believe he is a director of the bank.

Commissionar Harlan: What is his relation to the Calcasieu Bank, if any?

Mr. Rickey: A patron only.

Commissioner Harlan: The company deposits there?

Mr. Rickey: Yes.

Commissioner Harlan: Does Mr. Long also deposit in either of those banks personally?

Mr. Rickey: No, sir—you mean the First National in
1805 Kansas City and the Calcasieu Bank?

Commissioner Harlan: Yes.

Mr. Rickey: No, he is not a personal depositor.

Commissioner Harlan: Do I understand you to wish to give us the impression that the bonds of the Louisiana & Pacific are held by those banks by way of investment?

Mr. Rickey: Yes, sir; in the case of the Calcasieu National Bank I heard the other day that their trust company wanted to buy some for investment in addition to what the Calcasieu Bank held. They have a trust company that is willing to take some as an investment, I understand.

Commissioner Harlan: Do you yourself regard them as investment securities?

Mr. Rickey: I do.

Commissioner Harlan: That is, with a lease on the main line of road that has I think fifteen years to run and branch lines which are now deriving their revenue from lumber that is gradually being exhausted; it was said by one of your witnesses yesterday they only have a limited period of years left for lumbering; you would regard those bonds as investment securities for trust banks?

Mr. Rickey: I would.

1806 Commissioner Harlan: Were they offered to the public as these other bonds were offered?

Mr. Rickey: No, sir; a larger portion of the issue was used in the refunding of the note indebtedness.

Commissioner Harlan: Did the Louisiana & Pacific ever pay any cash dividend?

Mr. Rickey: No, sir.

Commissioner Harlan: Did the branch line which it subsequently acquired ever pay any cash dividend?

Mr. Rickey: I cannot speak prior to 1905. They have not to my knowledge.

Commissioner Harlan: Never have looked into that question?

Mr. Rickey: No, I have never sought any information on it, but my impression is they have paid no dividends. They used their earnings in the further development of their property, buying equipment and steel. I know that is the case since 1905, but prior to that I think it was the case also.

Commissioner Harlan: The expense account of your line for the year 1909 assigned to traffic amounted to some $11,000. Have you looked into the items that go to make up that traffic expense
1807 account?

Mr. Rickey: You mean—that does not include transportation?

Commissioner Harlan: No.

Mr. Rickey: That referred to the traffic department? I have not looked into that in detail.

Commissioner Harlan: What do you understand to be the general items that are covered by the traffic expense account?

Mr. Rickey: The salary of traffic manager and his office force, together with other office expenses and cost of tariffs published and other legitimate charges outlined by the Commission chargeable against those accounts.

Commissioner Harlan: Does it not occur to you that is rather a large item for a road of this character to expend?

Mr. Rickey: Not considering the tonnage, no; although I am not in a position to compare it with other traffic organizations.

Commissioner Harlan: Is there not an existing agreement in writing between your line and the Southern Pacific or any other regular line or between any officer or stockholder of your line for the sale of the line of the Louisiana & Pacific after you are through
1808 with it?

Mr. Rickey: I have never heard of such an agreement. They have already sold of course all they wanted to sell.

Commissioner Harlan: I referred to the track now owned by the Louisiana & Pacific.

Mr. Rickey: No, there is no agreement to my knowledge.

Commissioner Harlan: With the Southern Pacific, or any other company, or any other representative of any other company?

Mr. Rickey: No, sir.

Commissioner Harlan: You have never heard of any such understanding?

Mr. Rickey: No, sir; I have never heard it mentioned or a possibility of such a contract.

Mr. Cowan: I would just ask if there was any provision for the redemption of the bonds?

Mr. Rickey: They are redeemable at 101½ and interest.

Commissioner Harlan: That is not the question, whether you have provided for any sinking fund or redemption fund for payment of the bonds?

Mr. Rickey: Not as yet. They were issued January 1,
1809 1910, for a period of ten years.

Mr. Thurmond: How many of those bonds are sold, and what amount?

Mr. Rickey: About $593,000.

Mr. Thurmond: Out of an authorized issue of $600,000?

Mr. Rickey: Yes, sir.

Mr. Cowan: Are they guaranteed by anybody?

Mr. Rickey: Personally? No, sir. They are secured by a deed of trust covering the property in favor of the Commerce Trust Company of Kansas City.

Mr. Cowan: But that property is only the railroad company property?

Mr. Rickey: Yes, sir, rail and equipment; roundhouses, shops and all other physical property.

Mr. Cowan: I guess you have stated who bought the bonds?

Mr. Rickey: It was largely a refunding issue to get rid of these notes and get them into a secure form. I told Mr. Gutheim when he visited us two years ago that we had started that issue before the panic came on but we postponed it.

Mr. Cowan: There is no other security outstanding against
1810 the railroad and equipment?

Mr. Rickey: No.

Mr. Garwood: It is now twelve minutes of one.

Commissioner Harlan: We will take a recess until two o'clock.

(Whereupon at 12:50 P. M. a recess was taken until 2 P. M.)

1811 After Recess.

Mr. Jeffery: Your Honor asked that the Iron Mountain file a copy of the spur track agreement with the Caddo & Choctaw. I have it here. This is the only one we have with them. It expired on the 20th of July, 1909, and by mutual agreement we are still operating under the terms of this agreement. This agreement is with the Gurdon and Fort Smith Railroad, which is one of our subsidiary companies.

Commissioner Harlan: That can be filed in connection with the testimony in that case.

(The paper so offered and identified was received in evidence and thereupon marked Caddo & Choctaw Exhibit No. 1, received in evidence December 14, 1910, and is attached hereto.)

Mr. McRae: Before you proceed I want to ask leave of the Commission, for the Arkansas Railroad Commission to intervene by petition and become a party to the proceeding and a reasonable time to present a petition.

Commissioner Harlan: There is no objection to your filing an intervening petition at this time provided it does not raise
1812 an issue that requires new parties and answers?

Mr. McRae: It will not be. It will be to the same degree

allowed by the State of Louisiana. What time will your Honor allow?

Commissioner Harlan: Well, will ten days suffice?

Mr. McRae: Very well, within ten days, then.

Commissioner Harlan: That is for the Arkansas Commission?

Mr. McRae: Yes.

Commissioner Harlan: Is the Mississippi Valley Railroad before the Commission?

(No response.)

Commission Harlan: The Victoria, Fisher & Western?

(No response.)

Commissioner Harlan: The Roosevelt & Western?

Mr. Charles T. Coleman: I have entered an appearance.

Commissioner Harlan: That will be heard in the next room by Examiner Burchmore. The Wilmar & Saline Valley will be heard before Examiner Burchmore. Mr. Thurmond, will you recall the last witness, Mr. Rickey?

1813 P. C. RICKEY, was called as a witness, and having been previously duly sworn, further testified as follows:

Commissioner Harlan: Mr. Rickey, I am not sure that the record is quit full with respect to the purchase by the Southern Pacific of the various properties now comprising its through line from De Ridder to Lake Charles. I understand that a part of that was purchased and was a railroad already in operation and that the line was completed to Lake Charles by some original construction; is that right?

Mr. Rickey: On the part of the Lake Charles & Northern?

Commissioner Harlan: Yes.

Mr. Rickey: Yes, sir. The Louisiana & Pacific——

Commissioner Harlan: Suppose we start at De Ridder——

Mr. Rickey: The Louisiana & Pacific projected a line from De Ridder to Lake Charles, that is about 43 miles, and had built a mile and a half below Fulton, standard gauge 60-pound track, when the negotiations were completed for the transfer to the Lake Charles & Northern, with the understanding that the Lake Charles and Northern would complete the line on to Lake Charles, and accord
1814 the traffic or trackage rights, or whatever you term it, at twenty-five cents a train mile.

Commissioner Harlan: Now, if you will just start at Fulton and say what happened.

Mr. Rickey: The Lake Charles and Northern in their purchase of the property from the Louisiana & Pacific bought the right of way from this point south of Fulton on to Lake Charles or to the river.

Commissioner Harlan: To the Calcasieu River?

Mr. Rickey: For fifteen thousand dollars.

Commissioner Harlan: What did the company pay for the track up to Fulton or a mile below?

Mr. Rickey: They paid the book cost.

Commissioner Harlan: What was that amount?

Mr. Rickey: About four hundred and seventy-five thousand

dollars, in round numbers; that included this fifteen thousand dollars for right of way.

Commissioner Harlan: And the constructed mileage was what?

Mr. Rickey: I do not know; from De Ridder to Fulton is about how many miles, Mr. McLean? About twenty-six miles?

Commissioner Harlan: From De Ridder to Fulton is about twenty-six miles?

1815 Mr. Rickey: Yes, sir. This purchase included station buildings as well as the track.

Commissioner Harlan: And any equipment?

Mr. Rickey: No.

Commissioner Harlan: The constructed mileage was to a point about a mile south of Fulton?

Mr. Rickey: Yes, sir.

Commissioner Harlan: And from that point there had been a survey and some grading?

Mr. Rickey: Yes, sir; on the part of engineers. The Louisiana & Pacific had surveyed that and completed it.

Commissioner Harlan: Up to the north bank of the Calcasieu River?

Mr. Rickey: Yes, sir.

Commissioner Harlan: And for that survey of roadbed you paid fifteen thousand dollars?

Mr. Rickey: The Lake Charles & Northern paid fifteen thousand dollars.

Commissioner Harlan: The Lake Charles & Northern?

Mr. Rickey: Yes, sir, for the right of way and such grading as had been performed.

1816 Commissioner Harlan: And that was included in the figure last mentioned?

Mr. Rickey: Yes, sir.

Commissioner Harlan: Then who actually built the track from this point south to the north bank of the river?

Mr. Rickey: The Lake Charles & Northern.

Commissioner Harlan: What did that cost?

Mr. Rickey: I have no idea.

Commissioner Harlan: That appears on the books of that company, does it not?

Mr. Rickey: Yes, I assume so.

Commissioner Harlan: If you will furnish the Commission with a statement——

Mr. Rickey: Of the Lake Charles & Northern, with which we have no connection.

Commissioner Harlan: How did the Lake Charles & Northern cross the river?

Mr. Rickey: They built a bridge, a steel bridge——

Commissioner Harlan: What is the length of that bridge, and its approaches?

Mr. Rickey: Of course, I have no records on that. I would estimate five or six hundred feet.

1817 Commissioner Harlan: What is the character of the bridge?

Mr. Rickey: The usual steel bridge or iron bridge.

Commissioner Harlan: Do you know what it cost?

Mr. Rickey: No, sir.

Commissioner Harlan: Have you ever heard what it cost approximately?

Mr. Rickey: No, I have never heard any estimate made.

Commissioner Harlan: Well, from the south bank of the river what new construction was there by the Lake Charles & Northern and to what point?

Mr. Rickey: They continued after crossing the river and built a line on into their main tracks or to the main tracks of the Louisiana & Western, I should judge a mile and a half or some such distance, in order that they might run on in to the Louisiana Western tracks, and in turn the Louisiana & Pacific built from the bridge a distance of about a mile to the Calcasieu Long Leaf Lumber Company's property that they might furnish transportation facilities.

Commissioner Harlan: And also built its own terminals in Lake Charles?

Mr. Rickey: Yes, sir.

Commissioner Harlan: Those were shown on the large map
1818 heretofore introduced in evidence?

Mr. Rickey: Yes, sir.

Commissioner Harlan: From the Calcasieu River there was some road built up to the northwest and along towards Camp Curtis. Just what was the line of that road, what is the starting point, on the Calcasieu River?

Mr. Thurmond: It is all set out in this contract, in this plat, your Honor.

(Question read.)

Mr. Rickey: That was a point probably four miles from the present crossing of the bridge.

Commissioner Harlan: Four miles east?

Mr. Rickey: East or northeast, yes.

Commissioner Harlan: What is that point called, or what was it called?

Mr. Rickey: Banks, I believe I have heard that term applied to it.

Commissioner Harlan: From Banks in what general direction did the main line run?

Mr. Rickey: Northerly.

Commissioner Harlan: To what point?

Mr. Rickey: Probably fifteen miles, and then west.

1819 Commissioner Harlan: Then west to Camp Curtis?

Mr. Rickey: Yes, sir.

Commissioner Harlan: Did it run as far north as Bannister?

Mr. Rickey: No.

Commissioner Harlan: As Fayette?

Mr. Rickey: Turning west at Fayette.

Commissioner Harlan: What was the name of that road?

Mr. Rickey: The Lake Charles & Leesville.

Commissioner Harlan: By whom and when was it built?

Mr. Rickey: It was an unincorporated road built by the Bradley-Ramsey Lumber Company.

Commissioner Harlan: And was a narrow gauge road?

Mr. Rickey: And was a narrow gauge road serving the saw mills in Lake Charles.

Commissioner Harlan: Did it run over this right of way you have just referred to as a surveyed and a partially constructed roadbed?

Mr. Rickey: Yes, sir. The Louisiana & Pacific acquired that property and later on sold it——

Mr. Thurmond: There is what we are talking about, the right of way and partially constructed roadbed. It runs over here
1820 (indicating).

Commissioner Harlan: This witness has testified that the Lake Charles & Northern purchased a constructed road from De Ridder to a point about one mile south of Fulton and from that point to the north bank of the Calcasieu River purchased for fifteen thousand dollars a right of way that had been surveyed and partially thrown up into the roadbed.

Mr. Thurmond: It is this piece of road right in there, if I am correct about it (indicating).

Mr. Rickey: Yes, sir, the Louisiana & Pacific engineers did not survey to this point at Banks. They covered a portion of that narrow gauge roadway and then straight on down to the river.

Mr. Thurmond: That is what your Honor is talking about, that little piece right in there (indicating).

Commissioner Harlan: Then this narrow gauge road ran somewhat to the northwest, to a point south of Fulton to which a railroad had been constructed, and which was purchased to that point by the Lake Charles & Northern.

Mr. Rickey: Yes, sir. I might qualify that. During the construction of the Louisiana & Pacific this narrow gauge was in operation.

1821 Commissioner Harlan: From Banks?

Mr. Rickey: From Banks to this point.

Commissioner Harlan: To Camp Curtis?

Mr. Rickey: Yes, sir, and a third rail was laid to assist in the construction and conversion to a standard gauge.

Commissioner Harlan: The point I want to get at is the trackage of this narrow gauge road. It ran somewhat to the northwest to a point one mile south of Fulton?

Mr. Rickey: And continued on to Fayette.

Commissioner Harlan: And continued on to Fayette on the right of way of what road, its own road?

Mr. Rickey: The Louisiana & Pacific had acquired this Lake Charles & Leesville narrow gauge road by purchase, probably in 1906. I am not sure that your Honor understands that.

Mr. Thurmond: I am going to put Mr. Sweet on the stand next, and he is familiar with those details.

Commissioner Harlan: Very well, we will get them from Mr. Sweet.

Mr. Cowan: I want to know if the evidence as to the date at which

the bonds of the Louisiana & Pacific were issued and sold and
1822 the parties to whom they were sold and who owned them has been put in the record, or is to be put in the record. Has that been called for?

Commissioner Harlan: The record shows to whom the bonds were sold, as I understand it.

Mr. Cowan: If it has not been called for I want it put in the record with the date of the sale of the bonds.

Mr. Thurmond: I do not know when they were sold. They were sold at different times. They were issued January 1, 1910.

Commissioner Harlan: If you will show that.

Mr. Cowan: The date of the bonds, the price at which they were sold, and the name of the present owner.

Commissioner Harlan: The amount, the date, when issued, when sold, and the amount of the consideration.

Mr. Rickey: We will file a statement to that effect.

Commissioner Harlan: Mr. Sweet, take the stand.

C. B. SWEET, was called as a witness, and having been duly sworn, testified as follows:

Mr. Thurmond: State your name.

Mr. Sweet: C. B. Sweet.

1823 Mr. Thurmond: Where do you reside?

Mr. Sweet: Kansas City, Missouri.

Mr. Thurmond: You are the vice-president of the Louisiana & Pacific Railway Company?

Mr. Sweet: Yes.

Mr. Thurmond: And of the Sibley, Lake Bisteneau & Southern?

Mr. Sweet: Yes.

Mr. Thurmond: And the Woodworth & Louisiana Central?

Mr. Sweet: Yes.

Mr. Thurmond. You are vice-president of these four milling companies on the line of this road, heretofore mentioned?

Mr. Sweet: Yes.

Mr. Thurmond: Vice-president of various other companies?

Mr. Sweet: Yes.

Mr. Thurmond: You need not give them all, but give the Commissioner in a general way what other companies you are connected with.

Mr. Sweet: About twenty different corporations and companies; in the lumber business in this section, in addition to those named is the Lufkin Land & — Company at Lufkin; the Globe Lum-
1824 ber Company, at Yellow Pine, Louisiana; the Rapides Lumber Company, of Woodworth, Louisiana; and then there are some lumber manufacturing companies on the Pacific Coast, the Longville Lumber Company and some coal companies and so forth.

Mr. Thurmond: How long have you been associated with Mr. R. A. Long in business?

Mr. Sweet: About twenty-five years.

Mr. Thurmond: I believe it is a fact, is it not, that your special duties are in connection with the railroad interests?

Mr. Sweet: Yes, sir; I have more to do with it.

Mr. Thurmond: At least you are the active managing officer of these roads?

Mr. Sweet: I direct some of those things; yes, sir.

Mr. Thurmond: The Commissioner has asked about the ownership of stock in this Louisiana & Pacific Road. Will you kindly state whether or not it is a fact that the stockholders, the list of whom I have given the Commissioner as owing stock in this road, are the absolute, unqualified owners of that stock?

Mr. Sweet: They are.

1825 Mr. Thurmond: Not as trustees, but in their own individual rights?

Mr. Sweet: Yes, sir.

Mr. Thurmond: Did they buy that stock and pay for it in cash?

Mr. Sweet: Yes.

Mr. Thurmond: Do they own it, or do any of them own it in trust for anybody else or any company?

Commissioner Harlan: You just asked him that and he said no.

Mr. Thurmond: The Commissioner was desirous of knowing something about how this Louisiana & Pacific was constructed. Will you please give the history of that road and say who owned each of these branches when you first knew of them and when they started and how you acquired this Lake Charles & Leesville Road, what the Louisiana & Pacific constructed, what the condition of it was when you sold out the right of way to the Lake Charles & Northern, and the object you and your associates had in building that road or starting it from De Ridder to Lake Charles and why you sold out?

Mr. Sweet: Would you like to have a history of that,

1826 your Honor?

Commissioner Harlan: Just as briefly as you can state it.

Mr. Cowan: One thing I would like the witness to tell about is where that Leesville road was. I have never been able to get that from what anybody has said. While he is going along with it he might state, and not assume that we know all about it.

Mr. Sweet: The first history that I know of the lines that make up what is called the Louisiana & Pacific was that during 1902, we will say, the De Ridder & Eastern was built, owned by the Hudson River Lumber Company, and built by them.

Commissioner Harlan: State the termini.

Mr. Sweet: From De Ridder east to Bundick. A little prior to that date, in the year 1901, I think the Louisiana & Pacific was built by the King-Ryder Lumber Company and owned by them, from Bonami, in a southeasterly direction.

Commissioner Harlan: What was the other terminus?

Mr. Sweet: Walla. At an earlier date the Lake Charles & Leesville was built by the Bradley-Ramsey Lumber Company to what is shown on this map which you have there, from Lake Charles

1827 to Fayette in a northerly direction, and then from Fayette to Camp Curtis in a northwesterly direction, a distance of about thirty miles.

Commissioner Harlan: How did it cross the river?

Mr. Sweet: I said from Lake Charles. I would say from the river opposite Lake Charles.

Commissioner Harlan: From a place called Banks?

Mr. Sweet: Yes, sir.

Commissioner Harlan: Just let me ask at that point, did that narrow gauge road pass through Fulton?

Mr. Sweet: Yes.

Commissioner Harlan: And as far north as Fayette?

Mr. Sweet: Yes, sir. I think in 1905, if I remember the correct date, the Longville interests, what we term as the Long interests, purchased the Bradley-Ramsey interests at Lake Charles, and in the name of the Calcasieu Long Leaf Lumber Company, the principal stockholders of which are Mr. Long, and the other stockholders are included, and with it they acquired the property of the Lake Charles & Leesville Railroad. If I have the date right, during 1905 or the first part of 1906 the organization of the present Louisiana & Pacific was made.

1828 Commissioner Harlan: Before you pass from that, let me ask what properties there were at Lake Charles that belonged to that lumber company you have just mentioned?

Mr. Sweet: What properties were there?

Commissioner Harlan: Yes, sir. Was a mill property?

Mr. Sweet: There was a mill property, and a chemical plant that went with the purchase from the Bradley-Ramsey Lumber Company.

Commissioner Harlan: And this narrow gauge railway was also purchased?

Mr. Sweet: Yes, sir.

Commissioner Harlan: Did that narrow gauge railway serve that mill at Lake Charles?

Mr. Sweet: Yes, sir. I do not know how many more, but——

Commissioner Harlan: How did it get across the river and into Lake Charles?

Mr. Sweet: With the property were tugboats that pulled these logs across the river from where they were dumped into the river to the mile. I think it was at that time a distance along the river of about five miles.

Commissioner Harlan: And that was owned by the lumber company?

1829 Mr. Sweet: Yes, sir.

Commissioner Harlan: Tug boats and landings?

Mr. Sweet: Yes, sir. In 1905 or the first part of 1906, the present Louisiana & Pacific road was reorganized and purchased from the lumber companies, the De Ridder & Eastern, the property of the old Louisiana & Pacific, owned by the lumber company, and also from the Calcasieu company at Lake Charles, and the Lake Charles & Leesville, and they started then to connect up the different lines between De Ridder and Lake Charles and the branch lines referred to.

Commissioner Harlan: When did it purchase the line from Bonami to Walla?

Mr. Sweet: At the time of the reorganization of the Louisiana & Pacific. They were all bought in at about the same time.

Commissioner Harlan: You did not mention that before.

Mr. Sweet: Yes, sir. Would you like for me to go into the sale to the Southern Pacific?

Commissioner Harlan: Well, what was the aggregate price paid by the Louisiana & Pacific for the properties which you have just described?

Mr. Sweet: The price paid for those lines, and it included
1830 their equipment, was the price determined to be their value from the cost of the construction and purchase price of the equipment. We paid them cost for that property.

Commissioner Harlan: And the vendors were lumber companies?

Mr. Sweet: Yes, sir.

Commissioner Harlan: And the lumber companies that have been before us in this hearing?

Mr. Sweet: I said lumber companies. They were organized as railroad companies, but the stock was held and owned by those lumber companies.

Commissioner Harlan: I want to get at that exactly. These three railroad companies were then incorporated railroad companies?

Mr. Sweet: Two, the De Ridder and Eastern, and the Louisiana & Pacific, were incorporated. I do not think that there was a charter possibly for the Lake Charles & Leesville. If there was, I do not think I ever saw it.

Commissioner Harlan: Then the road from Bonami to Walla, was not incorporated, so far as you know it?

Mr. Sweet: Yes, sir, it was incorporated. I am referring to the Lake Charles & Leesville. That was not incorporated.

1831 Commissioner Harlan: The narrow gauge road?

Mr. Sweet: Yes, sir.

Mr. Thurmond: At that point, can you state what was the object in connecting up these roads and starting to construct a road between Lake Charles and De Ridder——

Commissioner Harlan: There was a question unanswered, as to the purchase price.

Mr. Sweet: I answered it and said it was the price determined upon——

Commissioner Harlan: You stated that, but I asked for the figures.

Mr. Sweet: I could not give you that, but the price has been included in all our statements, and could be submitted at any time.

Commissioner Harlan: Well, I think we have it.

Mr. Thurmond: I was calling your attention and asking you to state what the prime object was of the organizing of this road in connecting up these branch roads and constructing a road from De Ridder to Lake Charles.

Mr. Sweet: I would have to consume a little time in the history of that. The history would be that during 1901 or 1902 or about
1832 that time the Long interests, if you care to put it that way, built mills and bought timber and built railroads at De Ridder and Bonami and that was located on the Kansas City & Southern

line. Later on, as I have stated they bought the mill at Lake Charles; and a little later than that built and completed the mill at Longville. But I am getting a little ahead of the story.

The Kansas City Southern were not able to serve the lumber interests of the Long interest, if you please. We looked for an outlet for that lumber. We solicited the Atchison, Topeka & Santa Fe to build to the Sabine River west; we proposed to them that we would build a line of road from De Ridder to the river and at that time, after going over the ground pretty thoroughly, they decided they would build the road themselves, and before the construction, however, of that line, our interests had figured on the purchase of the Bradley interests at Lake Charles, so we coupled them together and built these lines to serve the Long interests, that is the mills at De Ridder, Bonami, Bannister and Lake Charles and any other mills that might spring up in that country. We have also made our calculations on further extensions, and the further purchase of properties in that locality, not altogether in that direct locality,
1833 but some are and some are at a distance, not too far, for the construction of branch lines or the extension of this line.

Mr. Thurmond: Would one of those be the Woodworth and Louisiana Central?

Mr. Sweet: I would not like to go into detail on that, unless counsel wants to, for the reason that it might interfere with some negotiations, if you please.

Mr. Thurmond: Proceed in your own way.

(The previous question and answer thereupon were read.)

Commissioner Harlan: In the early part of that statement, you said, as I gather it, that your interests at Bonami were then being served by the Kansas City Southern, but not efficiently?

Mr. Sweet: Yes, sir; Bonami and De Ridder were the interests that we had in that locality at that time.

Commissioner Harlan: How close were the Bonami interests to the Kansas City Southern and where did you reach the line of that company?

Mr. Sweet: The mills of the King-Ryder Lumber Company were located at Bonami, and the mills of the Hudson River Lumber Company were located at De Ridder.

1834 Commissioner Harlan: And both mills were located on the Kansas City Southern?

Mr. Sweet: Yes, sir, they were located on the tracks. The tracks were built into the Kansas City Southern. I would like to explain that a little, that at the time during 1901 and 1902, when we were building the Bonami and De Ridder mills, we made our contracts with the Kansas City Southern for a siding a little different from the contracts that are usually made; that is, in that we had included that if we cared at any time to purchase from them the sidings that they had built into those places we had the privilege of doing so at cost price. The reason it was put in there was that we had in mind just what we have done here now, and we did buy those tracks.

Commissioner Harlan: Are those sidings now a part of your main line?

Mr. Sweet: They are, sir.

Commissioner Harlan: What was the mileage of the sidings thus purchased from the Kansas City Southern?

Mr. Sweet: I do not know that I could tell you correctly. It is shown in the exhibits of the sale to the Lake Charles & Northern, and I would be glad to furnish you with that detail if you
1835 like.

Commissioner Harlan: Does it leave your line still connected with the Kansas City Southern at Bonami?

1836 Mr Sweet: It does not. That is, the lines were connected with the Kansas City Southern at De Ridder and Bonami, and they were bought then from the Kansas City Southern by the reorganization of the Louisiana & Pacific, and it permits of a connection at those two places.

Commissioner Harlan: Well, it permits of a connection——

Mr. Sweet: There is a connection, yes, sir.

Commissioner Harlan: At De Ridder and Bonami?

Mr. Sweet: Yes, sir. They do not come on our own tracks and we do not go on their tracks.

Commissioner Harlan: You may proceed.

Mr. Thurmond: So as I understand it, the object of building this road was to get a connection with and competition by five or six trunk line railroads.

Mr. Sweet: As many as we could get. We had in mind those that we did connect with, and in other words we were out for trade.

Mr. Thurmond: And to get through routes and joint rates with as many railroads as possible.

Mr. Sweet: We were out to get as much money as we could out of it with these railroads and built for these connections.

1837 Mr. Thurmond: I do not know whether it is in the record, but you might state very briefly what roads this Louisiana & Pacific does connect with.

Mr. Sweet: We have a connection at De Ridder with the Atchison, Topeka & Santa Fe; we have joint agents at De Ridder with the Atchison, Topeka & Santa Fe and the Lake Charles & Northern, and have a connection there with the Kansas City Southern. We also connect at Bonami with the Kansas City Southern and the Frisco interests at Fulton. The Southern Pacific interests and the Missouri Pacific interests as well as the Kansas City Southern and Lake Charles.

Mr. Thurmond: Now, Mr. Sweet, when you sold this portion of your road between De Ridder and Lake Charles, you retained a joint trackage right with the Lake Charles & Northern?

Mr. Sweet: Yes, sir.

Mr. Thurmond: State whether or not you would have sold that road or that part of the road without still having the right to operate your road over it?

Mr Sweet: We made at the time of the sale a traffic arrangement, not with the Lake Charles & Northern, but with the Southern

Pacific interests, and one contract hinges on the other. The
1838 sale was made because of the track arrangement, and the track arrangement because of the sale. We would not have thought of selling other than to have had the track arrangement, that was one of the first things to think of.

Mr. Thurmond: The joint trackage contract is the contract which was contemplated and provided for in the sale of the road?

Mr. Sweet: Yes, sir. And we thought that the trade was a very good one for us, that we had the same rights on the road that we had before and we believed at less money than we could afford to own it and keep it up.

Commissioner Harlan: What price was paid to you?

Mr. Sweet: At the time the negotiations were made we had constructed and were operating between De Ridder and Bonami; it was a heavy timbered country through to Fulton, and we were working along that right of way and had the right of way cut and that was under construction. We had purchased for that construction into Lake Charles 40 miles of 60 pound rail, and we had that on hand, quite a little of it.

Commissioner Harlan: And that went with the sale?

Mr. Sweet: Well, we did not get our money out of that
1839 until it was in the track. We put it in the track. But we had the rail purchased, and it was part of it on the track, and as I say, the first payment they made us was $90,000.

Commissioner Harlan: Mr. Rickey has stated the amount correctly a little while ago, including this $15,000 for this right of way.

Mr. Sweet: I was not paying attention to what he said.

Commissioner Harlan: Well, what is your understanding then?

Mr. Sweet: They paid us the cost of the reconstruction line except that part of the Lake Charles & Leesville, and that went in in a lump sum. That did not include the rail, but just the right of way of the track and what work had been done in throwing up the dump, and so forth. It did not include the rail. The purchase of that did obligate them to take up the light rail that was on that line at the time they put down the heavy rail and delivered that light rail to us.

Commissioner Harlan: Was that a cash transaction?

Mr. Sweet: Yes, sir.

Commissioner Harlan: Between the Southern Pacific and what company?

1840 Mr. Sweet: And the Louisiana & Pacific.

Commissioner Harlan: And it amounted to—what was the amount?

Mr. Sweet: About $475,000.

Commissioner Harlan: About $475,000?

Mr. Sweet: Something like that. That would not be quite the figure.

Commissioner Harlan: And that went into the treasury of the Louisiana & Pacific?

Mr. Sweet: Yes, sir, it went into the treasury of the Louisiana & Pacific.

Commissioner Harlan: What was done with it?

Mr. Sweet: We have used it in buying additional equipment and rail, and so forth for the branches; it has never been paid out. We put down——

Commissioner Harlan: Well, did you use—that is about half a million dollars. Did you use that sum in addition to the other half million dollars you borrowed from the lumber companies?

Mr. Sweet: This money did not all come to us at one time. I think I put in the testimony that the first payment was $90,000.

1841 Commissioner Harlan: Yes.

Mr. Sweet: And we were borrowing money from time to time that went into this construction. The rail we bought on time and we did not pay for that, and we have not paid for it all yet, as far as that is concerned.

Commissioner Harlan: But ultimately you got approximately half a million dollars?

Mr. Sweet: Yes, sir.

Commissioner Harlan: In cash?

Mr. Sweet: Yes.

Commissioner Harlan: And later you borrowed another half million dollars from these four lumber companies?

Mr. Sweet: Yes, sir.

Commissioner Harlan: Do you mean to have the record show that you have an investment of about a million dollars in these branch lines and equipment?

Mr. Sweet: No, sir, about $725,000 now.

Commissioner Harlan: In the cash investment?

Mr. Sweet: Yes, sir.

Commissioner Harlan: Covering what mileage?

Mr. Sweet: That covers about 22 miles. Then we have on hand about 40 miles of steel. We have locomotives and cars.

1842 About half of that is in equipment, and about half of it in the tracks, and so forth.

Commissioner Harlan: Then there is a quarter of a million dollars still unaccounted for in your statement. What became of that?

Mr. Sweet: I did not do the accounting, but I do not think there was any error made in it——

Commissioner Harlan: No, I am not suggesting that there are any errors in the account, but you got $475,000——

Mr. Sweet: I think I understand the question now. The De Ridder & Eastern, at the time the new organization of the Louisiana & Pacific purchased it, was built of 35 pound rails. The same is true of the extension out from Lilly Junction to Walla. Since the organization and with some of this money, I could very easily say, and I think it is true, we put down 60 pound rail instead of 35 pound, and we have bought new locomotives and we have other locomotives coming now. I think we have 21 or 22 at this time.

Commissioner Harlan: In other words, has that absorbed the whole million dollars?

Mr. Sweet: Except what possibly we might have in cash at this

time and with the interest on the bonds and such things
1843 as those.

Commissioner Harlan: The total cash investment then approximates a million dollars, and how many miles of track?

Mr. Sweet: I think 22 or something like that.

Commissioner Harlan: And 40 miles of additional steel?

Mr. Sweet: Yes, sir.

Commissioner Harlan: And your equipment?

Mr. Sweet: Yes, sir. Well, in addition to that, there is quite an extensive yard at Lake Charles. We have in there I think, $64,000 in yards at Lake Charles, and in improvements.

Commissioner Harlan: You purchased and constructed all the Lake Charles terminal?

Mr. Sweet: Yes, sir.

Commissioner Harlan: And also this mile and a half of track from Bridge Junction into Lake Charles?

Mr. Sweet: Yes, sir. We have $64,000, I think it is, invested in that, and then we have quite a little investment at Longville in the tracks in there, the line we are building, which does not show here at Longville. I might give you the investment at that point if you care for it.

Commissioner Harlan: The amount of it?

1844 Mr. Sweet: Mr. Rickey, will you give me those figures? You can find them quicker than I can.

Mr. Thurmond: At that point may I ask, what do you say is the amount you have in that road? His Honor says about a million dollars.

Mr. Sweet. No, I said $725,000.

Mr. Thurmond: Is it not a fact now—I may be wrong about it, but if I am, set me right—that the Louisiana & Pacific constructed that road with funds which were furnished by the Lake Charles & Northern?

Mr. Sweet: Well, they used that fund. They did not use any of it for——

Mr. Thurmond: The contract provides that the purchase price shall be $15,000, which is the agreed value of the narrow gauge portion and then there is a provision that the second party shall pay the first party $90,000 at the time of the execution of the agreement and the balance shall be paid monthly as the work progresses on estimates furnished by the engineer.

Commissioner Harlan: That has already been gone over by the witness, and he stated it very clearly, but he stated the aggre-
1845 gate consideration was $475,000, and we have otherwise shown an investment of $199,000 for the branch roads, and cash put in by the lumber companies, so that the railroad is charged with approximately a million dollars for property that it now owns, and equipment.

Mr. Thurmond: That is what I wanted to get at.

Mr. Cowan: Property that it owns and the balance of money that came from the Southern Pacific was paid to it for the Lake Charles & Northern.

Commissioner Harlan: Yes.

Mr. Blair: Under the terms of the contract there was no money paid by the Southern Pacific or the Lake Charles & Northern except what was expended on the part of the road they were to build and certified to by the two engineers.

Commissioner Harlan: Let me ask the witness and see if he understands it. You sold what has been called here the main line for $475,000 in round figures.

Mr. Sweet: Something like that, yes, sir.

Commissioner Harlan: And that was ultimately paid to you all in cash, was it?

Mr. Sweet: Yes, sir.

Commissioner Harlan: Now then, you have left only the branch lines.

1846 Mr. Sweet: We have the branch lines and the Lake Charles investment.

Commissioner Harlan: The Longville investment?

Mr. Sweet: Yes, sir.

Commissioner Harlan: And the equipment?

Mr. Sweet: Yes, sir.

Commissioner Harlan: Now then the branch lines as shown by other testimony, were fully paid for by the lumber companies?

Mr. Sweet: Yes, sir. That is——

Commissioner Harlan: That is, they were constructed, and other sums were invested and you paid them by giving them your notes for half a million dollars.

Mr. Sweet: Yes, sir.

Commissioner Harlan: So that left you with cash on hand the amount of $475,000 received from the sale of the main line?

Mr. Sweet: Yes, sir.

Commissioner Harlan: Now I am just stating the result of the testimony as I gather it. I may be wrong about it, and if I am, I want to be set right.

Mr. Sweet: I think you have it right.

1847 Commissioner Harlan: Out of that money you built your Lake Charles terminals. You have possibly 40 miles of steel rail. I do not know whether you had that out of that fund or not; and you have built your Longville investment. Now that ought to leave you a substantial amount of cash on hand.

Mr. Sweet: We have about $45,000 of cash, I think our last statement——

Mr. Rickey: May I explain that? The Lake Charles & Northern advanced us money from month to month on the original estimates in the progress of the work so that in the ultimate completion of the work we have collected from them $475,000, but we had previous to the collection of that spent the money and had borrowed money from different sources in order to construct the property, therefore when we got the $475,000 back we did not have any surplus in cash left because we had spent that money in building the property and sold it to the Lake Charles & Northern at actual cost.

Mr. Sweet: I would like to add, if I may be permitted, to my testi-

mony, that this has been a going proposition for about four years, and this money you speak of has been coming in and going
1848 out for four years in different transactions. It has all been kept within the property of the Louisiana & Pacific, and has never been in any other books.

Mr. Thurmond: Is it not a fact that out of the $475,000 you speak of, the Louisiana & Pacific built the road from one mile south of Fulton to Banks?

Mr. Sweet: Give me that question again.

Mr. Thurmond: Out of this $475,000 you speak of as getting, is it not a fact that the Louisiana & Pacific built the road from one mile south of Fulton to the river, or to the place called Banks?

Mr. Sweet: No, they had nothing to do with that.

Commissioner Harlan: If there is anyone that understands this, I would like to have the facts stated.

Mr. Rickey: Did I not make myself clear?

Commissioner Harlan: Not at all.

Mr. Rickey: The Louisiana & Pacific had about $50,000 of working capital, and they made contracts to build this 26 miles of road to Fulton from De Ridder. Now they spent the $50,000 working capital in rails and construction work, and they went over to Houston and Mr. Kellogg, the engineer, verified the progress of the work and paid us that $50,000, and we took that and built some more,
1849 so we had no surplus of cash left.

Commissioner Harlan: We are not talking about surplus, and it seems to me you are adding to the confusion. We had a railroad from De Ridder to a mile south of Fulton, which was constructed, and we had a road too, from the latter point into Lake Charles which had been thrown up——

Mr. Blair: I do not like to get into the class of people who rush in where a better class of people fail, but I think I can explain it in this way. There are two contracts with the Lake Charles & Northern, one dated October 31st, 1906, which is an executory contract of sale, and the other dated February 21st, 1908, follows it, and is the completed contract. At the time of the executory contract of sale there was no road completed through De Ridder or one mile south to Ramsey Junction or to the other point, but the Louisiana & Pacific——

Commissioner Harlan: There was a road completed from De Ridder to one mile south of Fulton.

Mr. Blair: No, there is where your Honor is in error. At the time of the executory contract of sale there was no completed road. There was two or three miles from De Ridder in the direction of Bonami.
1850 Then some preliminary work had been done. The road between De Ridder and Bonami, the preliminary work being completed at $90,000, the contract between the Lake Charles & Northern and the Louisiana & Pacific was this, they said to the Louisiana & Pacific: "You go on and build a broad gauge road from De Ridder to one mile south of Fulton, and we, the Lake Charles & Northern, will pay you whatever you spend in building that road as part of the purchase price. Now then the Lake Charles & Northern will

commence at the other end and construct the road down to the river at its expense. When those two constructions are completed those deeds will be passed." It was under this obligation to complete the road to De Ridder from one mile from Fulton that the Louisiana & Pacific expended $475,000 and received from the Lake Charles & Northern $475,000, so if they kept their accounts fairly, and I have no doubt they did, they did not make a dollar by that transaction and had not any surplus.

Mr. Cowan: Then the Southern Pacific built the line, and the Louisiana & Pacific had nothing to do with it except do the work?

Mr. Blair: The Louisiana & Pacific had a narrow gauge road.

1851 Commissioner Harlan: From Banks to Camp Curtis.

Mr. Blair: Yes, and a right of way. They had a right of way from De Ridder to Fulton, and had done about $90,000 worth of work, and had a completed road from between De Ridder to Bonami, and those are what we bought, and those are the facts.

Commissioner Harlan: It may be when we come to look over the record some one can understand it, but this witness has testified that there was a railroad from De Ridder to Bundick belonging to the Hudson River Lumber Company, and in operation. He then testified there was a railroad from Bonami to Walla——

Mr. Blair: Those are all off the line we bought.

Commissioner Harlan: Not all the track is off the line. Part of that track is on the line, as I understand it.

Mr. Blair: Between De Ridder and Bonami is the only track I know of.

Commissioner Harlan: Now, from Bonami to Lilly Junction, was not that a part of the original lumber road, and is it not part of the main line?

Mr. Sweet: Bonami to Lilly Junction?

1852 Commissioner Harlan: Was it not a part of the lumber road?

Mr. Sweet: At the time this main line road was built, the line from Bonami to Lilly Junction was reconstructed and the new line did take in part of the old line.

Commissioner Harlan: It took in all the old line from Bonami to Lilly Junction?

Mr. Sweet: Yes, sir.

Commissioner Harlan: I understand so.

Mr. Blair: That is for what the $90,000 was paid.

Mr. Sweet: No, not from Bonami to Lilly Junction, but from Bonami Junction to Lilly Junction.

Commissioner Harlan: Well, have you any further questions to ask the witness?

Mr. Thurmond: The Commissioner yesterday was asking for some illustrations of benefit of a road like this to a small mill owner. Have you in mind an illustration of that kind on this line of yours, the Bundick line, which you could give me?

Mr. Sweet: What is that question?

Mr. Thurmond: The benefits of a tap line, as they call it, to a small mill owner, a small individual mill owner.

Mr. Sweet: Well, if they are located on a tap line they
1853 will get the benefits that any large or small mill owner will get.

Mr. Thurmond: Was there a case of that kind out at Bundick?

Mr. Sweet: There was at one time a small mill at Bundick, yes, sir.

Mr. Thurmond: Did that owner ship over this Bundick or De Ridder branch?

Mr. Sweet: Yes, sir.

Mr. Garwood: How far is it from Longville to De Ridder northward?

Mr. Sweet: 19 miles, I think, about.

Mr. Garwood: And thence from Longville to Lake Charles.

Mr. Sweet: About 24 miles or 25 miles.

Mr. Garwood: I do not think anyone has testified as to the general character of the construction and roadbed of the Lake Charles & Northern over which you operate. Is that a permanent, well constructed road?

Mr. Sweet: Yes, sir; built out of nearly all 60 pound rail with good ties, and was originally built with the ballast found along the right of way, dirt ballast, and is now being improved by hauling in sand and so forth at places where it is needed; it is a good dirt ballast road.

1854 Mr. Garwood: Will you state the weight of the rail?

Mr. Sweet: 60 pounds.

Mr. Garwood: How does that road compare with other roads in that locality, for instance, the Santa Fe or the Frisco?

Mr. Sweet: I think the Santa Fe has 60 pound rail on their line in that locality. The Frisco have a little heavier rail. The Frisco have in the last year or so ballasted their tracks, and I do not think the Santa Fe have put any ballast on their track. They had not the last time I was over it.

Mr. Garwood: Would you say in general terms that this Lake Charles & Northern is as good a road from a physical and operating standpoint as the Santa Fe?

Mr. Sweet: Just the same class.

Mr. Garwood: Just the same class of road?

Mr. Sweet: Yes, sir.

Mr. Garwood: You mentioned, or some other witness mentioned that the Long-Bell interests own a mill in Texas. Where is that mill?

Mr. Sweet: The Long-Bell people have an interest in a mill at Lufkin, Texas.

Mr. Garwood: Where is it situated with reference to the town of Lufkin, in it or near it?

1855 Mr. Sweet: I am not sure but part of it is inside the corporate limits; it is right in the town, you might say.

Mr. Garwood: Is there any railway there, any substantial interest

in which is owned by the same stockholding interests that own the mill?

Mr. Sweet: If there are any interests there which own——

Mr. Garwood: Do you own any railway over there?

Mr. Sweet: No, we have no interest there except the lumber company and the commissary, and so forth.

Mr. Garwood: Except the lumber mill?

Mr. Sweet: Yes, sir.

Mr. Garwood: From a lumber standpoint, how does that mill operate and succeed as compared with other mills belonging to the Long-Bell interests which come under your observations?

Mr. Sweet: The mill at Lufton, Texas, this year, and I would say at this time, is one as well operated and as cheaply operated as any proposition we have. They produce their lumber at less than the average cost and they obtain a price as high or higher than the average cost, or higher than the average price paid.

Commissioner Harlan: What line is it on?

1856 Mr. Sweet: On the St. Louis Southwestern.

Mr. Garwood: It is on the Cotton Belt. Did that interest there, the same interests that own the mill ever construct any railway over there?

Mr. Sweet: Yes, sir.

Mr. Garwood: About how many miles?

Mr. Sweet: They first constructed 30 miles and sold that to the Cotton Belt Line and later on constructed 20 miles, a total of 50 miles, and sold it to the Cotton Belt Line.

Mr. Garwood: Sold it to the Cotton Belt?

Mr. Sweet: Yes, sir.

Mr. Garwood: Was it through the acquisition of those lines by the Cotton Belt that the St. Louis Southern found an entrance into Lufkin and that portion of the state?

Mr. Sweet: No, sir. This was built from Lufkin. They came in from the west.

Mr. Garwood: But it now belongs to the Cotton Belt?

Mr. Sweet: Yes, sir.

Mr. Cowan: How do you get your logs to the Lufkin Mill?

Mr. Sweet: We haul them 50 miles over the Cotton Belt.

Mr. Cowan: What do you have to pay for it?

Mr. Sweet: 30 cents a train mile.

1857 Mr. Cowan: Do you get that back in any way?

Mr. Sweet: No.

Mr. Cowan: If you manufacture your lumber cheaper than you do elsewhere it is not on account of the cost of getting the logs to the mill.

Mr. Sweet: I do not know—I take the cost of getting the logs to the mill in with other costs of manufacture at that place.

Mr. Cowan: Why is it cheaper to manufacture at that place than elsewhere? It is not on account of the fact that the cost of logging is cheaper?

Mr. Sweet: I did not say it was any cheaper. I said it was as good as the average, or possibly a little better than our average mill costs.

761

Mr. Cowan: How much did it cost you to operate those trains in addition to paying 30 cents per train mile?

Mr. Sweet: I do not know that I have figured it in dollars and cents. I can go into details of the cost of making lumber, if you care to.

Mr. Cowan: Well, not at this time. Do you get any division of the rate when you ship out?

Mr. Sweet: No.

1858 Mr. Cowan: And do you get any compensation back from the Cotton Belt for hauling the logs in?

Mr. Sweet: No.

Mr. Cowan: None refunded in any way?

Mr. Sweet: No.

Mr. Cowan: So that in delivering the logs at the mill you are at the expense of logging your timber land and of operating the trains and paying 30 cents a train mile for the use of the track?

Mr. Sweet: Yes, sir.

Mr. Cowan: You operate your own trains now?

Mr. Sweet: Yes, sir.

Mr. Cowan: And furnish your own equipment?

Mr. Sweet: Yes.

Mr. Cowan: And when you move out the lumber you pay the flat rate of 18 cents to St. Louis, or whatever it is?

Mr. Sweet: Yes, sir.

Mr. Cowan: Is that the same rate as it is from Lake Charles?

Mr. Sweet: I am not posted on the rates.

Mr. Cowan: Well, there is a blanket rate all across this country, to common points?

1859 Mr. Sweet: We pay whatever rate is proper out of Lufkin We do not get any return on it.

Mr. Cowan: Is there another lumber mill at Lufkin?

Mr. Sweet: I think there is one mill there that I know of, right at the town.

Mr. Cowan: Outside of what profits you may have made in building the line and selling the line to the Cotton Belt, if any, if one mill at that place gets a division of the rate, say four or five cents per 100 pounds, and the other does not, does not the one that gets the division of the rate operate at an advantage as compared with the other?

Mr. Sweet: Well, I think that the condition surrounding that would make a little difference, and should be taken into consideration. The Cotton Belt built their main line right into our woods and all we have to do is to build spurs off from their main line. I think we are getting just as good an opportunity to make lumber cheap as would the other fellow who had to build the main line spur and then build his spurs off, and——

Mr. Cowan: In a somewhat similar case where you haul your logs from Camp Curtis down to Lake Charles, there you get a four cent division out of the rate, and you pay 25 cents a train mile

1860 for operation over the line of the Lake Charles & Northern.

Mr. Sweet: I can only answer as to the mileage. I do not

know what the divisions are. The testimony of other witnesses will show that. But so far as the railroad proposition is concerned, we as the Long interests do not care for the holding of railroad property, if people will do for us as the Cotton Belt has done at Lufkin, and other lines have done, build their main lines into the timber.

Commissioner Harlan: Well, you built that line?

Mr. Sweet: Yes.

Commissioner Harlan: And sold it to the Cotton Belt?

Mr. Sweet: Yes.

Commissioner Harlan: What did you get for it?

Mr. Sweet: The sale of the 30 miles was made before our interests came in possession of the Lufkin Land & Lumber Company property. I do not know what they received for that. We built 20 miles beyond and sold it to the Cotton Belt at actual cost of construction.

Commissioner Harlan: What was that?

Mr. Sweet: From memory I could not give it to you. The sale was made four or five years ago, and——

1861 Commissioner Harlan: Was it for cash or bonds?

Mr. Sweet: We took the bonds of the Cotton Belt Railroad.

Commissioner Harlan: At what rate?

Mr. Sweet: I could not say as to that. We carried the bonds a little while and sold them. I can ask for that information and get it right here for you if you want it.

Commissioner Harlan: You might do that.

Mr. Sweet: Mr. Rickey, can you not answer that question right off? It was the second mortgage Cotton Belt bonds.

Mr. Rickey: We got $185,000 par value, and I think the market value at that time was $169,000.

Commissioner Harlan: What rate of interest?

Mr. Rickey: Four and a half per cent.

Commissioner Harlan: Was that the only consideration?

Mr. Rickey: Yes, sir.

Commissioner Harlan: Was it all in bonds?

Mr. Rickey: Yes, sir.

Mr. Sweet: I would like to correct that a little. We had bought eight or nine miles of 60 pound rails from the Cotton Belt before we had any idea of selling it to them, and we were owing them for

1862 that rail at a certain price per ton, the market price at that time. We paid them this debt we owed them and took bonds for the balance of the track. That was the trade.

Mr. Andrews: Mr. Sweet, in the original contract, which I understand, your Honor, has been filed with the Commission, has it not?

Commissioner Harlan: No, it has not, but I will ask that it be filed.

Mr. Thurmond: I understood it had been.

Mr. Andrews: It bears no marks.

Mr. Thurmond: Copies have been filed. That is the original you have in your hand.

Mr. Andrews: Have copies been filed?

Mr. Thurmond: Yes.

Mr. Andrews: This is dated October 31st, 1906. The sole consideration that I find in it for the right of operating your trains over the road constructed and to be constructed is 25 cents a train mile. Was there any other consideration than that?

Mr. Sweet: Any other consideration?

Mr. Andrews: From you, to be paid to the Lake Charles & Northern.

Mr. Sweet: We pay a percentage of the station expense——

1863 Mr. Andrews: No, at that time, at the date of the agreement, October 31st, 1906.

Mr. Sweet: I do not know that I gather the question, but the right of operating—we reimbursed the Lake Charles & Northern or the Southern Pacific 25 cents a train mile.

Mr. Andrews: Perhaps I can make it plainer to read to you what the contract says, and then ask what I want to know: "And for the use of said railroad as aforesaid, said first party, that is you, shall pay to said second party, that is the Lake Charles & Northern, a rental equal to 25 cents per train mile for every train that shall be run over said road by said first party during the existence of this contract." Now I see nothing else in this contract anywhere that provides for you to pay anything else, and the question I ask is, did such an agreement exist at the date of the making of this contract?

Mr. Sweet: I think I can answer your question, and that is that at the time that contract was executed it was during the construction of this line from De Ridder to Lake Charles, and we were using the north end of it all the time while the other part was being constructed. I think the operating contract was made later than

1864 that. I think there is a contract and probably you have it there, made a year or so later, that covers the operating after the road was completed. This was a temporary arrangement, as I recall it.

Mr. Andrews: Under date of February 21st 1908——

Mr. Sweet: That is the one.

Mr. Andrews: You made another contract?

Mr. Sweet: Yes, sir.

Mr. Andrews: By which you agreed to pay 60 per cent of all the station expenses except at Lake Charles, at which place you agreed to pay $100 a month; and the query that I wanted to make was why this additional contract for another consideration not mentioned in the first contract, was made.

Mr. Sweet: Does not the second contract which you refer to also mention the trackage over the line and embrace all that?

Mr. Andrews: It refers to both of the former contracts, but it does not state why you are giving a compensation not provided in the first contract.

Mr. Sweet: Well, that is what I explained awhile ago, that the first contract was a temporary contract, if I remember correctly, providing for the Louisiana & Pacific to use these tracks during the construction.

Mr. Andrews: But it does not say anything about its being

1865 temporary or anything of the kind. There is a reference to a contract as to the details of operation to be made later.

Mr. Sweet: Well, that is the one. That was a temporary contract.

Mr. Andrews: But this is a contract with compensation in it, and what I was trying to find out was whether this compensation arose from an after consideration or existed as part of the first contract.

Mr. Sweet: The contracts followed one another, and the later contract was the one which was to be effective after the road was to be completed, and the other was to be effective until we turned the road over to the Lake Charles & Northern and received our money. It took a year or two to complete the road and get it in operation, I think two years, from 1906 to 1908. I take it 1908 was about the date we commenced joint operations and prior to that they were not on the line, the Lake Charles & Northern.

Mr. Andrews: You mean you were operating it, and the Lake Charles & Northern were not?

Mr. Sweet: Yes, sir, we were on it.

Mr. Andrews: Who kept it up during the two years you were operating it, and the Lake Charles & Northern were not
1866 operating it.

Mr. Sweet: Well, the line was new, and I suppose we were keeping it up and putting it in the cost of the road.

Mr. Andrews: Charging it to construction account?

Mr. Sweet: Yes, sir, the construction trains were running over it, and there was not very much to do, and the line was new.

Mr. Andrews: Do you know enough about the maintenance of railroads to say approximately what the maintenance charge ought to be, omitting equipment, per mile on this character of road?

Mr. Sweet: I could not say.

Mr. Andrews: Do you know from experience what it is on this road or otherwise?

Mr. Sweet: No, sir.

Mr. Andrews: No information as to the annual maintenance charge, omitting equipment?

Mr. Sweet: No. I have my own idea about that, and that is I think it is more than 25 cents a train mile, for what we run over it.

Mr. Andrews: Is it not true within your knowledge that 25 cents a train mile will not keep up the maintenance cost——
1867 Mr. Sweet: No, sir, that is not true——

Mr. Andrews: I am speaking of this particular road. Let me finish the question. Will not keep up the maintenance of this particular road on the operations which you do upon it.

Mr. Sweet: That is not within my knowledge. I do not know that.

Mr. Andrews: You said you did not think it would?

Mr. Sweet: I do not think it would. We did not think so when we made the contract.

Mr. Andrews: That is what I thought. I think you had arranged to eat your cake and have it too.

Mr. Sweet: That is the thought we had in mind during the construction of this track and milling interests, that we were making

good trades all the time, and we make them all the time, whenever we can.

Mr. Cowan: I have the curiosity to ask, if I may, if you know the genesis of the original trade, and with whom it was made?

Mr. Sweet: What trade is it?

Mr. Cowan: Well, the Long-Bell interests made a trade
1868 with somebody connected with the Southern Pacific interests in this transaction?

Mr. Sweet: I think Mr. Long and Mr. Harriman talked that matter over and made the trade.

Mr. Cowan: Did that cover any other railroad than the Louisiana & Pacific?

Mr. Sweet: No.

Mr. Cowan: Was the Sibley, Lake Bisteneau & Southern involved?

Mr. Sweet: No, what that had to do with the traffic arrangement included the Woodworth & Louisiana Central, but did not include the Sibley, Lake Bisteneau & Southern.

Mr. Cowan: The effect of the matter was that the trade was started by Mr. Long and Mr. Harriman before Mr. Long had spent any money to amount to anything on the road between De Ridder and Lake Charles.

Mr. Sweet: I don't know what you mean by any money to amount to anything, but the sale was contemplated and there was 20 miles under construction and $90,000 had been put into it, besides equipment.

Mr. Cowan: And that $90,000 was paid back?

Mr. Sweet: Yes, sir.

1869 Mr. Cowan: At the time the contract was made?

Mr. Sweet: No.

Mr. Andrews: That is what the contract says, that $90,000 and $15,000 were to be paid.

Mr. Sweet: The first $90,000 was paid after the contract was made, and after their auditors had satisfied themselves that they were safe in paying us an advance of $90,000 on what had been done.

Mr. Cowan: And thereafter the Southern Pacific interests advanced the money from time to time as the road was constructed?

Mr. Sweet: No, we constructed the road and then they advanced the money.

Mr. Cowan: I thought some gentleman who seemed to speak with authority said that the matter was submitted to Mr. Kellogg, who is an engineer of the Southern Pacific at Houston, on estimates, and the money was paid.

Mr. Sweet: You put the question the other way. You said the money was furnished and the road constructed, and I put it the other way. The road was constructed and the money furnished.

1870 Mr. Cowan: I said as it was constructed from time to time. I meant as the construction was completed from time to time.

Mr. Sweet: That is correct.

Mr. Cowan: That is what I meant.

Mr. Sweet: Yes, sir, that is correct.

Mr. Cowan: The Southern Pacific in effect built this line, the Louisiana & Pacific acting as the construction company in building it.

Mr. Sweet: Well, you can look at it that way if you want to. We had a line operating from Lake Charles to Camp Curtis and were operating over it. We were also operating from the north south.

Mr. Cowan: You were just logging over that?

Mr. Sweet: That is what we were doing there; yes, sir; hauling logs.

Mr. Cowan: This narrow gauge was how long, from Lake Charles north?

Mr. Sweet: 30 miles.

Mr. Cowan: Up to Fayette?

Mr. Sweet: Fayette, and then out to Camp Curtis.

Mr. Cowan: Were you operating that as a logging road too?

Mr. Sweet: Yes, sir.

1871 Mr. Cowan: Was any part of that track used, or was it thrown away and new line built?

Mr. Sweet: No, the grade was used and made standard, and of course that necessitated widening out the dump, and so forth, and the reconstruction of the roadbed.

Mr. Cowan: And that road was included in the sale under the contract?

Mr. Sweet: What road is that?

Mr. Cowan: That is the Leesville Road.

Mr. Sweet: A part of it was, to a point from the river to Fayette.

Mr. Cowan: And the steel which was taken up your company kept, and I suppose used for logging spurs?

Mr. Sweet: Well, some of it is in use, and some of it we have in storage or supply yards.

Mr. Cowan: Does the 40 miles of steel you have include that, or new steel?

Mr. Sweet: It includes that steel and other steel. We have been taking up, as I have told in my testimony, these branch lines of lighter steel and putting down 60 pound, and this supply we have is the lighter steel.

Mr. Cowan: The money that was borrowed from the lum-

1872 ber companies, or rather that was owing to them, was simply for these lines that the Louisiana & Pacific now own which they had constructed as lumber companies, and sold to the Louisiana & Pacific.

Mr. Sweet: No. Nearly the same thing, but they were not the same construction as they are now. It was the right of way and the rails that were in there, and there has been a different sort of construction put on it.

Mr. Cowan: Does your company have any interest whatever in the traffic or get any benefit out of the traffic which comes from Fullerton over the Gulf & Sabine River Road and over the Gulf, Colorado & Santa Fe and over the Lake Charles & Northern to Lake Charles?

Mr. Sweet: Mr. Davis can answer that question better than I can.

Mr. Cowan: You retain no interest by contract arrangement that you know of?

Mr. Sweet: We have a contract with the Frisco and Rock Island interests, which connect with us at Fulton.

Mr. Cowan: I said Fullerton.

Mr. Sweet: Oh, Fullerton, no.

(Witness excused.)

1873 Mr. Thurmond: In order that I may know what is in the record, may we have it understood for the purpose of argument that all the reports, monthly reports and statements and other documents filed with the Commission, are to be considered in evidence.

Commissioner Harlan: Yes.

Mr. Thurmond: I offer one of these time tables in evidence as a whole.

Commissioner Harlan: Have you filed copies of the contracts with the map attached?

Mr. Thurmond: We have not done so here. If not, we will do so.

Commissioner Harlan: What was it you referred to awhile ago when you said you had filed the original contracts?

Mr. Thurmond: I probably used the wrong word. I meant copies of our contracts are on file with the Commission.

Commissioner Harlan: Then they need not be filed here.

Mr. Thurmond: That is what I thought. May we consider also the official railroad map gotten out by the Commission.

Commissioner Harlan: Yes.

1874 Mr. Andrews: While you are right on the point of the contract, I would like to inquire of the Commission if in making up this record for the use of those who have ordered copies, if it is customary for the Commission to have inserted in making that record, copies of contracts introduced in evidence, so that reference will not have to be made by those desiring the information to the Commission's records to obtain them.

Commissioner Harlan: That is not the custom. It is the custom of counsel to furnish other counsel copies of their exhibits, and I assume Mr. Thurmond will furnish Judge Cowan and his colleagues copies of these contracts.

1875 Mr. Thurmond: Yes, we will furnish him a copy of these printed contracts which have been talked about here. I do not care about furnishing copies which we file with the Commission, but I will furnish him copies of those three. That is what you want?

Mr. Andrews: That is all I know anything about. There may be some others that I want very much, but do not know about at all.

Mr. Thurmond: I would like to offer in evidence one of these time tables of the Lake Charles & Northern Railroad Company. We rest on the Louisiana & Pacific, and I would like to file it, and put on the stand for the Commissioner to examine, the manager of the Sibley, Lake Bisteneau & Southern and the Woodworth & Louisiana

Central, unless for this reason that the Commissioner does not care to take up the Sibley, Lake Bisteneau & Southern Road. The divisions have not been cancelled; the Vicksburg, Shreveport & Pacific has recognized it as a regular road.

Commissioner Harlan: I think we will hear from those roads.

Mr. Cowan: I may state that my understanding is that all the annual reports filed with the Interstate Commerce Commission are by virtue of the statute itself evidence before the Commission
1876 and do not have to be offered, and it will be so understood.

Commissioner Harlan: Yes.

(The time table so offered and identified was received in evidence and thereupon marked Louisiana & Pacific Exhibit No. 5, received in evidence December 14, 1910, and is attached hereto.)

1877 *Sibley, Lake Bisteneau & Southern Railway.*

J. W. MARTIN was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: Where do you reside?

Mr. Martin: Yellow Pine, Louisiana.

Commissioner Harlan: Your business?

Mr. Martin: Railroad man; general superintendent of the Sibley, Lake Bisteneau & Southern, and lumber man and general manager of the Globe Lumber Company, Limited.

Commissioner Harlan: Just to shorten up the record, is that lumber company the company that controls this railroad?

Mr. Martin: The controlling stockholders in the lumber company are the controlling stockholders in the railway company.

Commissioner Harlan: What is the extent of that control?

Mr. Martin: I could not give you just the number of shares without going to the record, but I could go to the record.

Commissioner Harlan: It is very largely the whole of the stock?

Mr. Martin: Yes.

Commissioner Harlan: So, to all practical purposes there
1878 is an identity of interests in the two investments?

Mr. Martin: Yes, sir; all stockholders in the lumber company are not stockholders in the railroad company; all stockholders in the railroad company are not stockholders in the lumber company.

Commissioner Harlan: What is the terminus of the Sibley, Lake Bisteneau & Southern?

Mr. Martin: It connects with the Vicksburg, Shreveport & Pacific Railroad, and the Louisiana & Arkansas Railroad at Sibley, Louisiana, and extends south about 31 miles through Webster and Bienville into Red River Parish.

Commissioner Harlan: Is there a point called Camp Long?

Mr. Martin: Yes, sir, the last station we have established on that road.

Commissioner Harlan: That is the most southerly station?

Mr. Martin: The most southerly station. The road extends

beyond that some little distance, but that is the last station to which tariffs are issued?

Commissioner Harlan: How far beyond that does it extend?

Mr. Martin: About three miles.

Commissioner Harlan: And what is the character of the roadbed?

1879 Mr. Martin: It is graded.

Commissioner Harlan: Ballasted?

Mr. Martin: No, sir, not ballasted.

Commissioner Harlan: What rail do you use?

Mr. Martin: 40 pound and 60 pound rail.

Commissioner Harlan: When was it organized?

Mr. Martin: In July, 1900.

Commissioner Harlan: With what authorized capital?

Mr. Martin: $100,000.

Commissioner Harlan: What is the issued capital?

Mr. Martin: The same.

Commissioner Harlan: Any bonded indebtedness?

Mr. Martin: None.

Commissioner Harlan: Any current indebtedness?

Mr. Martin: Yes, sir.

Commissioner Harlan: Other than for current accounts?

Mr. Martin: Yes, sir.

Commissioner Harlan: What indebtedness have you?

Mr. Martin: There is about $99,000 at this time.

Commissioner Harlan: Represented in what form?

Mr. Martin: In outstanding notes.

Commissioner Harlan: Has that indebtedness in that form been larger than it now is?

1880 Mr. Martin: Yes.

Commissioner Harlan: What was its original highest amount?

Mr. Martin: That I could not say without going back to the records.

Commissioner Harlan: Well, about?

Mr. Martin: I would not like to make a guess.

Commissioner Harlan: Your road is approximately 33 miles long?

Mr. Martin: 31.

Commissioner Harlan: Standard gauge?

Mr. Martin: Yes.

Commissioner Harlan: You have six locomotives?

Mr. Martin: Yes, sir.

Commissioner Harlan: 113 freight cars?

Mr. Martin: Yes.

Commissioner Harlan: And one passenger car?

Mr. Martin: Two.

Commissioner Harlan: You have recently purchased another car?

Mr. Martin: No, we have had two cars for the past year or 18 months.

Commissioner Harlan: Well, that car must have been in the
1881 woods when we were down there looking for it.
Mr. Martin: Maybe so.
Commissioner Harlan: You have had it for a year or so?
Mr. Martin: But it was not on the train, it was at Yellow Pine.
Commissioner Harlan: You move passengers, do you?
Mr. Martin: Yes.
Commissioner Harlan: To what extent?
Mr. Martin: Well, the passenger fares run from $300 to $700 a month.
Commissioner Harlan: What sort of a place is Sibley?
Mr. Martin: It is a junction point; a small place, not very large.
Commissioner Harlan: Any stores?
Mr. Martin: Oh, yes.
Commissioner Harlan: How many people there?
Mr. Martin: Perhaps seven or eight hundred.
Commissioner Harlan: Is that a company town?
Mr. Martin: No, sir.
Commissioner Harlan: It is a community that is growing up on the Vicksburg, Shreveport & Pacific?
Mr. Martin: In the ordinary acceptance of a company
1882 town, there are no large industrial companies there. There are mercantile companies there.
Commissioner Harlan: What other towns have you on your road?
Mr. Martin: Yellow Pine.
Commissioner Harlan: What sort of a place is that?
Mr. Martin: That is what you would call a company town?
Commissioner Harlan: How many employees?
Mr. Martin: I presume there are 1,200, all told. The employees run four or five hundred.
Commissioner Harlan: What other towns?
Mr. Martin: Ringgold.
Commissioner Harlan: How large is that town?
Mr. Martin: Ringgold is a country trading town with a bank and post office and cotton gin and oil mill, which recently burned down, just a short time ago, and probably ten or twelve mercantile establishments.
Commissioner Harlan: How many people, about?
Mr. Martin: Oh, I would say 1,200.
Commissioner Harlan: And then Camp Long?
Mr. Martin: Well, there is Halls Summit, a town just north of Camp Long, a quarter of a mile. It is another country
1883 trading point, but it is not as large as Ringgold, and has no post office.
Commissioner Harlan: It has a post office?
Mr. Martin: No, it is on a rural route. That country from Ringgold south is served by a rural route. There is no post office except from Ringgold south.
Commissioner Harlan: You carry mail?
Mr. Martin: No.
Commissioner Harlan: Express matter?

Mr. Martin: We carry express as freight; in other words for people along the road who want express carried, merchants at Ringgold and Halls Summit and Yellow Pine, they leave a standing order to deliver their express to the road as freight, and we carry it from there as freight.

Commissioner Harlan: You carry it to Sibley and then they send it by express from that point?

Mr. Martin: Carry it out; yes, sir, as local freight?

Commissioner Harlan: And you receive it in the same way?

Mr. Martin: We receive it in the same way.

Commissioner Harlan: What was the extent of your traffic last year; I refer to the fiscal year.

Mr. Martin: I would prefer that you get those records
1884 from the auditor.

Mr. Thurmond: I will offer that statement——

Mr. Martin: Because the detail matter of figures is something I do not charge my memory with. The local auditor is C. P. Perkinson. The general auditor is P. C. Rickey, and Mr. Rickey has the figures.

Commissioner Harlan: You have heard what the figures are?

Mr. Martin: I have heard, but I never charge my memory with something I can make a matter of record.

Commissioner Harlan: How far can we go with you on this question?

Mr. Martin: Anything about the physical condition of the road, the manner in which it is conducted and safety appliances and so forth.

Commissioner Harlan: Well, tell us where the mill of the Globe Lumber Company is.

Mr. Martin: The mill of the Globe Lumber Company is situated at Yellow Pine.

Commissioner Harlan: How far is that from your junction with the Vicksburg, Shreveport & Pacific and the L. & A.?

Mr. Martin: About five miles.

Commissioner Harlan: When was it built?

1885 Mr. Martin: It was built before I came here; I suppose in 1898 or 1899.

Commissioner Harlan: When was the railroad built?

Mr. Martin: The railroad was built originally, I do not know when that part of it from Sibley to Yellow Pine, but it originally expected to serve the mill at Yellow Pine with logs obtained from Lake Bistineau, running southwest from Yellow Pine to the Lake.

Commissioner Harlan: By whom was that track built?

Mr. Martin: I could not say. I think it was by R. L. Trigg.

Commissioner Harlan: You went there when?

Mr. Martin: In July, 1901.

Commissioner Harlan: And the mill was since built?

Mr. Martin: Yes.

Commissioner Harlan: There was no railroad incorporated at that time, was there?

Mr. Martin Yes.

Commissioner Harlan: What was it?
Mr. Martin: This road was incorporated.
Commissioner Harlan: It was incorporated?
Mr. Martin: It was in 1900 that this road was
1886 & 1887 incorporated.
Commissioner Harlan: You do not know by whom or when that track was built?
Mr. Martin: No, but I have the impression that it was built by R. L. Trigg.
Commissioner Harlan: When did the Sibley, Lake Bistineau & Southern acquire that property?
Mr. Martin: When the railroad was organized we leased that property from the Globe Lumber Company, Limited, and afterwards bought the property.
Commissioner Harlan: Bought the right of way?
Mr. Martin: Yes.
Commissioner Harlan: And the equipment?
Mr. Martin: Yes.
Commissioner Harlan: Then did the railroad company afterward extend the line?
Mr. Martin: Yes.
Commissioner Harlan: To what extreme point as a railroad?
Mr. Martin: It is extended as main line——
Commissioner Harlan: To Camp Long, is it not?
Mr. Martin: To a point beyond and south of Camp Long in the northwest quarter of section 31, township 13, north range 9 west.
1888 Commissioner Harlan: Is it ballasted up to the point you have just named?
Mr. Martin: It is graded, and only at two places is ballasted.
Commissioner Harlan: What is the rail south of Camp Long?
Mr. Martin: 40 pound.
Commissioner Harlan: Any logging lines connected with your line?
Mr. Martin: Yes, sir; south of Camp Long the logging lines of the Globe Lumber Company, Limited, their spurs.
Commissioner Harlan: They belong to the lumber company?
Mr. Martin: They belong to the lumber company.
Commissioner Harlan: And the rails and equipment?
Mr. Martin: The rails and equipment belong to the lumber company.
Commissioner Harlan: Do they operate the logging lines?
Mr. Martin: Yes.
Commissioner Harlan: Your equipment does not go onto them?
Mr. Martin: Yes, sir; ours does.
Commissioner Harlan: They have no logging cars?
Mr. Martin: They have no logging cars, but we give them the use of ours.
1889–1899 Commissioner Harlan: They have locomotives?
Mr. Martin: No.

Commissioner Harlan: Then they have no equipment. I thought you said they had equipment.

Mr. Martin: No.

Commissioner Harlan: They lease it from you?

Mr. Martin: Yes.

Commissioner Harlan: What?

Mr. Martin: Logging cars and three locomotives.

Commissioner Harlan: All the logging cars?

Mr. Martin: All the logging cars and three locomotives and a couple of tank cars.

Commissioner Harlan: Do those locomotives get onto the main line?

Mr. Martin: Yes, sir, for switching purposes.

Commissioner Harlan: For no other purpose?

Mr. Martin: No.

Commissioner Harlan: They do not go through to the mill?

Mr. Martin: Only for repairs.

Commissioner Harlan: But the cars do?

Mr. Martin: The cars do.

Commissioner Harlan: What do they pay you for locomo-
1900 tives and cars?

Mr. Martin: At present they pay for the haul on the main line $2.75 per car for points south of Ringgold, and $2.50 per car——

Commissioner Harlan: Have you a map of your line here?

Mr. Martin: No, I have not. I presume some of the others here——

Mr. Thurmond: We have no map here, except the regular map——

Mr. Martin: The map of the Louisiana Railroad Commission locates our line properly, so far as such a map can.

Commissioner Harlan: Does it show the points?

Mr. Martin: Yes, sir: I think it does. I say properly; as properly as you can determine from a map that does not show section lines. (Witness examines map). It is practically correct, all the way; it shows the points and shows the stations.

Commissioner Harlan: My last question was whether you received any compensation from the lumber company for the use of your locomotives, and your equipment, and you proceeded to give an explanation. As I understand it, you do not receive any specific sum of money as rental?

Mr. Martin: That is not for the use of the locomotives
1901 and equipment; it is for hauling the logs.

Commissioner Harlan: But you do receive some compensation for hauling the logs. Now, from what point on the logging line?

Mr. Martin: As I stated in my answer, $2.75 from points south of Ringgold, and $2.50 from points north of Ringgold.

Commissioner Harlan: Are those main line points?

Mr. Martin: Any point where their spurs would reach our main line.

Commissioner Harlan: The $2.50 is from your main line junction?

Mr. Martin: From the point where they deliver those logs.

Commissioner Harlan: From the point where they deliver those logs on your main line?

Mr. Martin: Yes.

Commissioner Harlan: And from that point you haul the logs for $2.50 per car, from points south of Ringgold?

Mr. Martin: Points north of Ringgold, and $2.75 from points south of Ringgold.

Commissioner Harlan: Then there are logging roads that join your main line north of Ringgold?

Mr. Martin: No, there are not yet. There may be.

1902 Commissioner Harlan: Then you are not receiving $2.50 on any traffic?

Mr. Martin: We will this winter, because logs will be put on the road.

Commissioner Harlan: But at this time you have not?

Mr. Martin: We have not so far, since that tariff went into effect.

Commissioner Harlan: Then the logging roads are being constructed north of Ringgold?

Mr. Martin: No, the logs will be put on the side track at Davis, by wagon.

Commissioner Harlan: Is the Globe Lumber Company hauling any logs to your line?

Mr. Martin: They do not haul any logs. They hire it done.

Commissioner Harlan: They are hauling them to your main line by wagon?

Mr. Martin: Those logs they purchase from people living along the road, that they will haul to Davis.

Commissioner Harlan: They purchase delivered at Davis?

Mr. Martin: Yes.

Commissioner Harlan: And then you propose to charge $2.50 from that point?

1903 Mr. Martin: Yes, sir.

Commissioner Harlan: Do you receive logs at any other point north of Ringgold?

Mr. Martin: No. They are getting logs south of Ringgold at this time. I mean logs delivered by the people along the road, who haul them by wagon.

Commissioner Harlan: Are you getting logs delivered by any one at any point north of Ringgold except Davis?

Mr. Martin: Yes.

Commissioner Harlan: What points?

Mr. Martin: Just at a small spur about four or five miles from Yellow Pine.

Commissioner Harlan: South of Yellow Pine?

Mr. Martin: South of Yellow Pine.

Commissioner Harlan: Who delivers you logs there?

Mr. Martin: Different parties.

Commissioner Harlan: Well, from what forest?

Mr. Martin: From their own land.

Commissioner Harlan: And are they bought delivered by the Globe Lumber Company or shipped in by the people who do the logging?

Mr. Martin: They are bought by the Globe Lumber Com-
1904 pany delivered by the owners.

Commissioner Harlan: Delivered in wagons on your main line?

Mr. Martin: No, delivered by wagon.

Commissioner Harlan: Well, all right, we will say that; delivered by wagon on your main line?

Mr. Martin: Yes.

Commissioner Harlan: And from that point you charge $250, a car?

Mr. Martin: Yes.

Commissioner Harlan: That is paid by the Globe Lumber Company?

Mr Martin: Yes.

Commissioner Harlan: At what point south of Ringgold do you get logs?

Mr. Martin: Maddens Spur, Hulls Summit, and some at a point close to Giddens.

Commissioner Harlan: Those are delivered by wagon?

Mr. Martin: Yes.

Commissioner Harlan: And purchased in the same way by the Globe Lumber Company?

Mr. Martin: Yes.

Commissioner Harlan: Do you haul logs over your line for
1905 any one other than the Globe Lumber Company?

Mr. Martin: We hauled some export logs.

Commissioner Harlan: Where do they come from?

Mr. Martin: They were shipped from Davis.

Commissioner Harlan: That was just one shipment?

Mr. Martin: It was several.

Commissioner Harlan: Is it a regular traffic over your line?

Mr. Martin: No, because the material for regular traffic is not in there. This was just some walnut logs they found and some persimmon.

Commissioner Harlan: From what land did they come?

Mr. Martin: I could not tell, there are so many owners in there.

Commissioner Harlan: What rate did you charge?

Mr. Martin: The regular published tariff rate. I do not remember what it was.

Commissioner Harlan: Was it shipped locally?

Mr. Martin: No, it was to New Orleans, I do not remember what the rate was.

Commissioner Harlan: It was a through rate on walnut and persimmon logs from Davis?

1906 Mr. Martin: Yes, sir.

Commissioner Harlan: To New Orleans for export?

Mr. Martin: Yes, sir; I say for export. I know they were going for export, but I do not know that the rate was specially named for export.

Commissioner Harlan: How long had you had that rate in before the shipments were made?

Mr. Martin: Well, it was not put in specially for that. The tariff is the best evidence.

Commissioner Harlan: Was that a lumber rate or walnut rate?

Mr. Martin: Forest products.

Commissioner Harlan: With that exception you have hauled no logs over this line for outside interests?

Mr. Martin: No logs; no, sir.

Commissioner Harlan: What forest products have you hauled with that exception?

Mr. Martin: Lumber, ties and staves.

Commissioner Harlan: From what mills have you hauled lumber?

Mr. Martin: From H. B. Batcheloer's mill at Ringgold.

Commissioner Harlan: Is that on your line?

1907 Mr. Martin: Yes, sir.

Commissioner Harlan: The mill is right on your line?

Mr. Martin: No, the mill is off the line about 15 rods.

Commissioner Harlan: You have a spur track there?

Mr. Martin: No, we load it at the adjoining side track at Ringgold about a quarter of a mile long.

Commissioner Harlan: Does he move it by hand or fetch it there on a wagon?

Mr. Martin: He fetches it in there on a wagon.

Commissioner Harlan: How does he get his logs, by wagon?

Mr. Martin: On his own land, by wagon.

Commissioner Harlan: Is that a regular traffic, does his mill have a daily output?

Mr. Martin: Yes, sir, when he operates it. He does not always run it, though. It is still there.

Commissioner Harlan: What rate did you give him?

Mr. Martin: The regular published tariff rate, joint rate.

Commissioner Harlan: Where does his lumber go?

Mr. Martin: My impression is most of his lumber went up into Kansas.

Commissioner Harlan: It was a joint rate from Ringgold?

Mr. Martin: It was a joint rate from all points on our

1908 line.

Commissioner Harlan: A blanket rate?

Mr. Martin: The regular rate from that country, the same as Yellow Pine.

Commissioner Harlan: Well, the same rate as from Sibley?

Mr. Martin: The same rate as from Sibley.

Commissioner Harlan: And from Yellow Pine?

Mr. Martin: Yes, sir.

Commissioner Harlan: What is your division of that blanket rate?

Mr. Martin: We have not the same divisions to all points.

Commissioner Harlan: What is your lowest and what is the highest?

Mr. Martin: The lowest is one and a half cents that I know of, and the highest that I know of is four and a half cents.

Commissioner Harlan: Have you never received a higher division than four and a half cents?

Mr. Martin: I think we have, but I do not think we do now. That is my impression, but Mr. Davis can tell you.

Commissioner Harlan: Well, what is your impression?

Mr. Martin: I think we had at one time on a very small amount of traffic, as high as five and a half cents, that was
1909 to some point out in Colorado, I believe.

Commissioner Harlan: Did you not get as high as seven cents division at one time?

Mr. Martin: If we did, I do not recollect it. We may have.

Commissioner Harlan: Do you recollect a six cent division?

Mr. Martin: No, I do not recollect a particular six cent division, any division that means just six cents.

Commissioner Harlan: Well, do you recall anything about six cents?

Mr. Martin: No. I think we had one five and a half cents; five or five and a half.

Mr. Cowan: Maybe Mr. Davis can answer that.

Commissioner Harlan: What is your recollection of the highest division you ever received?

Mr. Davis: The highest division is seven cents; that is my recollection.

Commissioner Harlan: To what points?

Mr. Davis: Denver and Trinidad.

Commissioner Harlan: When was that?

Mr. Davis: Five or six years ago.

Commissioner Harlan: When was the six cent division?
1910 Mr. Davis: I do not recall the six cent division. I thought I had my division sheet here. I have a memorandum showing that the present divisions are three to four cents via Shreveport, two and a half to four and a half cents via Vicksburg, and two and a half cents via Monroe.

Commissioner Harlan: Where was the five and a half cent division applicable?

Mr. Davis: I do not recall the five and a half cent division.

Mr. Martin: That was my impression; five and a half cents.

Commissioner Harlan: You receive $2.75 from the Globe Lumber Company for carrying its logs from points south of Ringgold to its mill at Yellow Pine?

Mr. Martin: Yes.

Commissioner Harlan: Do you unload them at the mill?

Mr. Martin: We do.

Commissioner Harlan: You do not do any loading out on the tram line?

Mr. Martin: No, sir; none whatever.

Commissioner Harlan: Your employees do not go out there on the tram line?

Mr. Martin: No.

1911 Commissioner Harlan: Your train crews do?
Mr. Martin: No.
Commissioner Harlan: Do your track crews?
Mr. Martin: The train crews of the Globe Lumber Company that handle the engines they get from us go out on those tracks, and not our crews.
Commissioner Harlan: I am talking about your crews.
Mr. Martin: No, except that the contract provides that either company can use the tracks of the other company for switching purposes at the junction.
Commissioner Harlan: Who does the loading at these intermediate points?
Mr. Martin: The Globe Lumber Company.
Commissioner Harlan: And your train crews do not participate in that at all?
Mr. Martin: None whatever.
Commissioner Harlan: Do you have any rates on lumber in connection with other lines?
Mr. Martin: Yes, sir.
Commissioner Harlan: And they apply from all points on your line?
Mr. Martin: Yes, sir, alike.
1912 Commissioner Harlan: But the Globe Lumber Company does not ship any lumber except from Yellow Pine, does it?
Mr. Martin: That is all.
Commissioner Harlan: What haul do you perform on lumber?
Mr. Martin: From what point?
Commissioner Harlan: From yellow pine.
Mr. Martin: For interstate shipments?
Commissioner Harlan: Interstate or local.
Mr. Martin: About five miles. Local shipments, they ship some lumber back as far as Halls Summit and to Ringgold for local consumption.
Commissioner Harlan: And you charge the Louisiana tariff for that?
Mr. Martin: No, we have our own tariff.
Commissioner Harlan: You have your own local tariff for that?
Mr. Martin: Yes.
Commissioner Harlan: That, of course, is not an interstate movement.
Mr. Martin: No.
Commissioner Harlan: Is it a blanket rate to all points?
Mr. Martin: No, it is a mileage rate.
1913 Commissioner Harlan: Is it the Louisiana tariff?
Mr. Martin: It is based on that tariff.
Commissioner Harlan: What is the volume of that?
Mr. Martin: Very little.
Commissioner Harlan: Is it less than carload?
Mr. Martin: Very little.
Commissioner Harlan: Mostly all carload?
Mr. Martin: Yes, sir.

Commissioner Harlan: Who is the consignee, is it not the Globe Lumber Company?

Mr. Martin: No.

Commissioner Harlan: Who pays the freight?

Mr. Martin: The consignee, unless he buys it delivered.

Commissioner Harlan: Well, he usually does buy it delivered?

Mr. Martin: Yes, sir, particularly if it goes to a station where there is no agent. At Ringgold there is an agent.

Commissioner Harlan: You bring the empties from the Vicksburg, Shreveport & Pacific to Ringgold?

Mr. Martin: Yes.

Commissioner Harlan: And the cars are loaded and you get the divisions you have explained?

1914 Mr. Martin: Yes.

Commissioner Harlan: Who loads the cars?

Mr. Martin: The Globe Lumber Company.

Commissioner Harlan: Have you your gross tonnage for last year?

Mr. Martin: Yes, sir.

Commissioner Harlan: I thought you said a little while ago you did not have them.

Mr. Martin: Well, you were talking about finer figures than gross.

Commissioner Harlan: What was your gross tonnage last year?

Mr. Martin: I can give this just as I have it here, and perhaps it will serve your purpose better than any other way, as I got it for private purposes. For the year ending June 30, 1910, lumber shipments by the Globe Lumber Company, 41,637 tons; revenue, $31,141.12. Lumber shipped by other parties, 3,655 tons; revenue, $2,525.05. Other tonnage——

Commissioner Harlan: You are reading the same figures which I have here, and we will not stop on that.

Mr. Thurmond: May I put that list of figures in?

Commissioner Harlan: Yes, when your other witness comes.

Mr. Thurmond: Did you give a list of the other shippers on the line, such as Madden Brothers?

1915 Mr. Martin: I did not.

Mr. Thurmond: Give that please, general shippers of some considerable quantity of stuff.

Mr. Martin: Other shippers of lumber on the line of the Sibley, Lake Bisteneau & Southern are H. P. Batchelor, at Ringgold; R. R. Madden, at Madden's Spur; Tomme & Sons, at Giddens; Pierce Brothers at Davis or from Davis. This last named concern is just completing their mill.

Commissioner Harlan: A lumber mill?

Mr. Martin: Yes, sir. Another mill that is cut out is Tucker Brothers at Ringgold.

Commissioner Harlan: Well, what is the capacity of this mill that is approaching completion?

Mr. Martin: I expect they will ship 20,000 a day.

Commissioner Harlan: Do they own lands?

Mr. Martin: They own stumpage.
Commissioner Harlan: Have they a logging line?
Mr. Martin: Rail line?
Commissioner Harlan: Yes.
Mr. Martin: No, sir.
Commissioner Harlan: They will haul their logs?
Mr. Martin: Yes, and will haul the lumber after it is cut.
1916 Commissioner Harlan I thought you said the mill is on your line.
Mr. Martin: They ship at the point I named.
Commissioner Harlan: You mean they haul the logs to the mill?
Mr. Martin: They haul the logs to the mill and then they haul their lumber to the railroad.
Commissioner Harlan: How far?
Mr. Martin: Well, their haul will be three miles.
Commissioner Harlan: Well, the mill is not on your line.
Mr. Martin: No, it is not on our line, but this is the only available outlet, inasmuch as Lake Bisteneau is to the west of it and they cannot get across the lake.
Commissioner Harlan: I thought you said the mill was on your track.
Mr. Martin: No, that is the shipping point for the other shippers.
Mr. Thurmond: The Chatham Lumber Company?
Mr. Martin: S. H. Chatham. They make ties. And J. J. Capello Lumber Company.
Commissioner Harlan: Do these ties come from the lands of the Globe Lumber Company or outside?
1917 Mr. Martin: Outside.
Commissioner Harlan: Are they hewn or sawed ties?
Mr. Martin: Both.
Commissioner Harlan: Where is the mill?
Mr. Martin: Those mills I named cut quite a bit, and Tucker Brothers cut more or less, before they cut out.
Mr. Thurmond: How old a town is Ringgold?
Mr. Martin: It is one of the oldest -owns in that part of the state.
Mr. Thurmond: Have you got your passenger revenue, the number of passengers hauled?
Mr. Martin: No.
Mr. Thurmond: Have you got the passenger revenue?
Mr. Martin: For what date?
Mr. Thurmond: For the year ending June 30, 1910.
Mr. Martin: I think I have.
Mr. Thurmond: I will ask you if this is it (handing paper).
Mr. Martin: Passenger revenue for the year ending June 30, 1910, $3,112.16.
Mr. Thurmond: Have you the number of passengers there?
Mr. Martin: I have not.
Mr. Cowan: If he has the aggregate of his freight and
1918 passenger and lumber earnings there, let it be read.
Commissioner Harlan: It is shown on another statement.

He is simply taking the figures of the auditor.

Mr. Martin: That is all.

Mr. Thurmond: Do not bother looking it up any more.

Mr. Garwood: Do you raise any cotton up there?

Mr. Martin: Yes, sir. Ordinarily Ringgold ships about 4,000 bales. This year they haven't, nor for two years back, on account of the boll weevil. The cotton crop has been reduced.

Commissioner Harlan: To what figure?

Mr. Martin: Something like 2,000 bales.

Mr. Garwood: How much will you probably ship this year?

Mr. Martin: About 2,000 bales.

Mr. Garwood: Is it a good country, agriculturally speaking?

Mr. Martin: That country is as good a hill country as there is in Louisiana. We have considerable revenue in potatoes this year; I do not know how much. They turned their attention to potatoes and peanuts instead of cotton on account of the boll weevil.

Mr. Garwood: How much cotton have you in sight?

Mr. Martin: Well, that term might be a misleader. We
1919 cleaned our cotton up a week ago yesterday that was on our platform at Ringgold, while I was present.

Mr. Garwood: I have a statement here to the effect that you have moved this season to date 2,737 bales of cotton, and that there are about 500 more in sight. Is that correct?

Mr. Martin: Well, that was obtained from the ginners around there, that information, and I do not know what that is. If that statement came from our office at Yellow Pine, it is correct.

Mr. Garwood: Yes, sir, it comes from your local office.

Mr. Thurmond: We offer it in evidence.

Commissioner Harlan: The record may show that this witness has a statement from the office of his company showing that 2,700 bales have been moved this year, and 500 are in sight in the compress and elsewhere. You need not put it in.

Mr. Garwood: What in general terms is your movement of other agricultural products?

Mr. Martin: I would not like to give any figures, except that we move everything that is offered us to move, but just how much there is of each item I do not know.

Mr. Garwood: Give me a general idea.

Mr. Martin: But we always have more or less to move.

1920 Mr. Garwood: It is a substantial quantity, in other words?

Mr. Martin: Yes, sir.

Mr. Garwood: You subserve the convenience of the farming community, shipping products in substantial and appreciable quantities?

Mr. Martin: We do, and we move practically all of the products that are produced for eight miles on each side of the road.

Mr. Garwood: Is the country settling and progressing in an agricultural way?

Mr. Martin: Yes, sir.

Mr. Garwood: There has been more or less discussion in an interrogatory way as to the agricultural development of this Louisi-

ana country, where forests were originally on the ground. For our information will you please tell me what was the character of this country served by your road there. Is it to any extent what you might call a cut over territory; in other words has lumber been removed from it and a subsequent agricultural development followed?

Mr. Martin: I do not know that I am going to be very complimentary to some of the gentlemen present when I state the actual condition up there. That country was always a semi-settled
1921 country. If I had been picking it out for a logging country I would not have picked it out. There were too many farms in it, and fully one-half of the surface of the country has been cleared up and the logging proposition consisted of tracts owned by people outside of there in small amounts and parts of farms and I presume that one-half of that country has been cleared as a whole.

Commissioner Harlan: How many acres does the Globe Lumber Company own?

Mr. Martin: 42,000 and something in fee.

Commissioner Harlan: And what timber rights?

Mr. Martin: I could not say exactly how much there is of that left.

Commissioner Harlan: How much was there?

Mr. Martin: We have had timber rights on over 75,000 acres.

Mr. Garwood: The town of Ringgold is about what population?

Mr. Martin: Ten or twelve hundred people there.

Mr. Garwood: I will ask you if your road has received any donation of land or otherwise from that community.

Mr. Martin: It did.

Mr. Garwood: What was it?

Mr. Martin: The citizens of Ringgold furnished the right
1922 of way through townships 15 and 16 north range 9 west; that is, in Bienville Parish, for this road, in consideration of their building through the town of Ringgold and operating a train service.

Mr. Garwood: About how far was that?

Mr. Martin: Twelve miles.

Mr. Garwood: I will ask you if in order to reach your line there was a substantial change in location of the people; in other words, was there a moving from one place to another in order to be upon the line?

Mr. Martin: At Ringgold, yes, they have what they call laid out a new town. The old town was off from our road, because it was inaccessible on account of the topography of the country, and the business interests have largely moved down close to our track.

Mr. Garwood: About how far was that?

Mr. Martin: About 60 to 80 rods, in the general neighborhood of that.

Commissioner Harlan: This road runs somewhat parallel to the Louisiana & Arkansas Railroad, does it not, for some distance?

Mr. Martin: They diverge at Sibley and they go about five
1923 miles apart at Yellow Pine, and continue about that way as far south as Ringgold, after which they get farther apart.

Commissioner Harlan: How far apart are they at Heflin on the L. & A.?

Mr. Martin: About five miles.

Commissioner Harlan: Yellow Pine is not opposite Heflin, is it?

Mr. Martin: No, not near.

Commissioner Harlan: They get closer than five miles at Heflin?

Mr. Martin: No, that is what they call it. I drove it one time and thought it was ten miles.

Commissioner Harlan: Do you know anything about the financial details of this company?

Mr. Martin: In a general way; yes, sir.

Commissioner Harlan: You owe $10,000 to the Shreveport bank?

Mr. Martin: The Commercial Bank, yes, sir.

Commissioner Harlan: What interest are you paying on that?

Mr. Martin: Six per cent.

Commissioner Harlan: Is that the note of the company?

Mr. Martin: Of the railroad company?

1924 Commissioner Harlan: Yes.

Mr. Martin: Yes, sir.

Commissioner Harlan: Is anyone else on the paper?

Mr. Martin: I am and R. A. Long, individually, both of us.

Commissioner Harlan: And you owe $80,000 to the Globe Lumber Company on one note?

Mr. Martin: Yes, sir.

Commissioner Harlan: And $36,000 on another?

Mr. Martin: Well that $36,000 has been reduced since you got those figures, just recently.

Commissioner Harlan: Is anyone on those notes?

Mr. Martin: No, sir.

Commissioner Harlan: The national bank require two names on negotiable paper, do they not?

Mr. Martin: No, they do not make any particular mention of that. I asked for the loan——

Commissioner Harlan: I am asking you the question.

Mr. Martin: I was going to explain better than I can answer in any other way. I asked for the loan and told Mr. Urey that Mr. Long would endorse it personally and Mr. Urey said "Oh, pshaw, put your name on it," and I put my name on it, as Mr. Long

1925 was already on it. Mr. Urey is president of the bank.

Commissioner Harlan: I do not mean to suggest that your name would not have been sufficient, but as a matter of fact Mr. Long is on the paper, and national banks generally require two names on paper, do they not?

Mr. Martin: Well, my experience has not been very extensive——

Mr Cowan: That is the law, but it is not the practice.

Mr. Greer: No, sir, it is not the law.

Commissioner Harlan: Well, in addition to the capital stock you at one time, on June 30, 1909, owed $127,000 of which this $10,000 formed a part?

Mr. Martin: Yes.

Commissioner Harlan: What was the origin of that indebtedness?

Mr. Martin: It was for material bought from the Globe Lumber Company that was not taken care of by the stock that was received for the purchase price. That has been reduced.

Commissioner Harlan: What was the $100,000 of capital for?

Mr. Martin: The $100,000 of capital was what the company was organized with. You understand this organization took place years before my connection with it.

1926 Commissioner Harlan: You are not familiar with the details?

Mr. Martin: No, only the dates and so forth.

Commissioner Harlan: On June 30, 1908, you owed only $86,000, and on June 30, 1909 you owed $127,000.

Mr. Martin: Yes.

Commissioner Harlan: You had borrowed that money or created that indebtedness in the mean time. What was that for? That was after you came there.

Mr. Martin: I think that was because of the purchase of equipment.

Commissioner Harlan: Well, was not the equipment purchased with the $100,000 of capital?

Mr. Martin: No, the road was organized and the company was organized and the existing company was leased and extended by the railroad company and afterwards the road which was leased was bought.

Commissioner Harlan: That was done within your time, was it not?

Mr. Martin: I do not know the exact date. I wish you would get those figures from the auditor, because he has them in shape. I handle all the bills at Yellow Pine, and purchase everything at Yellow Pine but——

1927 Commissioner Harlan: What is the amount of the issued capital stock?

Mr. Martin: $100,000.

Commissioner Harlan: You do not know what that represents?

Mr. Martin: You mean——

Commissioner Harlan: What it was issued for, what you got in return.

Mr. Martin: I would rather you would go to the auditor for that.

Mr. Garwood: How far is it from the end of your road to the Red River?

Mr. Martin: About seven miles.

Mr. Garwood: What is the nearest town on the Red River?

Mr. Martin: Shadow.

Mr. Garwood: What sized town?

Mr. Martin: A little river trading town, about 1,200. It is also the Parish seat.

Mr. Garwood: What road?

Mr. Martin: The Louisiana Railroad & Navigation Company.

Mr. Garwood: What is the character of the intervening territory?

Mr. Martin: Shadow is right on the bank of the river, and
1928 the bluffs come down pretty close to the river.

Mr. Garwood: I mean intervening between Shady and the end of your road.

Mr. Martin: It gradually rises from the Red River Valley into the hills. It is good farming country.

Mr. Cowan: Your road has been an operating railroad hauling traffic for other people ever since you have been connected with it?

Mr. Martin: Yes, sir.

Mr. Cowan: You do not belong to this new dispensation which came in about 1905 or 1906?

Mr. Martin: Please be more specific.

Mr. Cowan: Well, organizing railroads for the purpose of getting a division of rates. You have been hauling people all along anyway.

Mr. Martin: I can make the best answer by saying what Mr. Long stated to me when I came with these people. I was with the Central Coal & Coke people and made arrangements to come to these people, and he made mention of the railroad and said "We are in a little railroad deal over there and we have not made much money out of it yet, but we hope to." So I take it that it was organized for the purpose of making money.

1929 Mr. Cowan: In the hauling of logs to this mill you do not refund back any of the money that is paid for that?

Mr. Martin: No, the railroad does not.

Mr. Cowan: There is no milling in transit proposition in that?

Mr. Martin: Not on that line, not at present.

Mr. Cowan: There has not been since you have been with it?

Mr. Martin: Yes, sir, there has.

Mr. Cowan: When was that?

Mr. Martin: Well, for a number of years, and in explanation of that, there have been various interpretations of the Interstate Commerce Law, and for awhile we were told in order to legally take divisions we had to haul the logs free the whole length of the road, and we did so.

Mr. Cowan: Your present counsel did not tell you that.

Mr. Thurmond: I was just going to suggest I hoped he did not attribute that law to us.

Mr. Martin: And the divisions which the railroad company received did not take care of the extension of the road, and the running expenses of it, and we cast about for a means of increasing the revenue and as a consequence we issued this tariff on
1930 on logs and since then it has been satisfactory.

Commissioner Harlan: Then you milled in transit before, and now you do not?

Mr. Martin: There are almost as many interpretations of that term "milling in transit" as there is of the Interstate Commerce Law, and I would like to have it defined before I say we milled in transit.

Mr. Cowan: I suppose the paper that has been filed covers or shows what percentage of earnings are from lumber and what percentage from the Globe Lumber Company?

Mr. Thurmond: Yes, that is all on this paper. I have not filed it yet because I have not identified it. Unless the Commissioner desires to inquire of Mr. Rickey, I will ask him if these figures are correct.

Mr. Rickey: They are.

(The paper so offered and identified, was received in evidence and thereupon marked Sibley, Lake Bistineau & Southern Exhibit No. 1, received in evidence December 14, 1910, and is attached hereto.)

Commissioner Harlan: Do you know about this capital stock?

Mr. Rickey: Yes, sir.

Commissioner Harlan: What did you receive for this
1931 $100,000 capital?

Mr. Rickey: I only know it in a general way, but I know the company has invested in the main line, 30 miles, $211,000, and this $100,000 was contributed towards the building of the line.

Commissioner Harlan: In what form has it invested it, in cash?

Mr. Rickey: I was not present in the early days.

Commissioner Harlan: Then why do you use that expression, that it has invested in the main line, $211,000?

Mr. Rickey: Because it is offset in the trial balance, and under the resources is the roadbed and structures, $211,000.

Commissioner Harlan: It is in that sense you have used the word invested?

Mr. Rickey: Yes.

Commissioner Harlan: Then it does not mean quite what it says. How do you know they invested that amount of cash in the road?

Mr. Rickey: From the nature of the physical property, I am sure that is the cost of it.

1932 Mr. Thurmond: Well, will it be necessary to file the charter of the company?

Commissioner Harlan: No, that is not necessary.

Mr. Thurmond: We may consider it for the purposes of argument?

Commissioner Harlan: Yes.

1933 *Woodworth & Louisiana Central Railway Company.*

ROBERT STACK, was called as a witness, and having been duly sworn, testified as follows:

Commissioner Harlan: Where do you live?

Mr. Stack: Woodworth, La.

Mr. Garwood: We would like to file as a part of Mr. Rickey's statement on the Sibley Road, a statement showing the indebtedness and for what it accrued. It should have been put in awhile ago.

Commissioner Harlan: This amount on notes payable?

Mr. Garwood: Yes, and another sum of $84,000.

Mr. Rickey: The laying of the steel and the indebtedness in

notes is $84,000 for improving cars purchased from the Globe Lumber Company.

Mr. Garwod: What was the $10,000 note?

Mr. Rickey: For new steel recently purchased and put on to the main line, not for the use of the lumber companies.

Commissioner Harlan: Where did you say you lived, Mr. Stack?

Mr. Stack: Woodworth.

Commissioner Harlan: What is your business?

1934 Mr. Stack: Superintendent of the Woodworth & Louisiana Central Railroad.

Commissioner Harlan: Where is Woodworth with relation to Shreveport and Sibley?

Mr. Stack: It is south. Woodworth is 14 miles south of Alexandria.

Commissioner Harlan: On what line?

Mr. Stack: On the Iron Mountain, the Watkins Branch of the Iron Mountain.

Commissioner Harlan: What is your relation to the Woodworth & Louisiana Central?

Mr. Stack: Superintendent.

Commissioner Harlan: How long have you been with the company?

Mr. Stack: With the railroad company six years.

Commissioner Harlan: Were you prior to that time connected with any other company?

Mr. Stack: Not any railroad company.

Commissioner Harlan: With any other company?

Mr. Stack: The Long-Bell Lumber Company.

Commissioner Harlan: At Woodworth?

Mr. Stack: No, at Kansas City.

1935 Commissioner Harlan: Have you any relation with the Rapides Lumber Company?

Mr. Stack: Yes, sir, General Manager of the Rapides Lumber Company.

Commissioner Harlan: How long have you been with that company?

Mr. Stack: I have been with that company as manager since 1904.

Commissioner Harlan: Who were the officers of the railroad company?

Mr. Stack: R. A. Long, President; C. B. Sweet, Vice President and General Manager; F. J. Bannister, Secretary; P. C. Rickey, Auditor; R. S. Davis, Traffic Manager, and Thurmond & Farrar, General Attorneys.

Commissioner Harlan: Are those gentlemen also connected with the Rapides Lumber Company?

Mr. Stack: All but Mr. Davis.

Commissioner Harlan: They are all officers except Mr. Davis?

Mr. Stack: Yes, sir.

Commissioner Harlan: And the stock of the railway company is owned by the stockholders of that company?

1936 Mr. Stack: Substantially, yes, sir.

Commissioner Harlan: It is practically the same investment?

Mr. Stack: Yes, sir; there are one or two different stockholders in the railroad company that are not in the lumber company.

Commissioner Harlan: Small stockholders?

Mr. Stack: Yes, sir, very small.

Commissioner Harlan: Do you receive a salary from both companies?

Mr. Stack: Yes, sir.

Commissioner Harlan: Is it a substantial salary from each company?

Mr. Stack: I think so.

Commissioner Harlan: Do the other officers of the railroad company receive salaries from the lumber company?

Mr. Stack: No.

Commissioner Harlan: You are the only one?

Mr. Stack: Mr. Long receives a salary.

Commissioner Harlan: From both companies?

Mr. Stack: Yes, sir.

Commissioner Harlan: What is his salary as President of
1937 the railroad company?

Mr. Stack: He gets $600 a year, I think.

Commissioner Harlan: What is the capital of the railroad company?

Mr. Stack: $25,000.

Commissioner Harlan: Bonded indebtedness.

Mr. Stack: It is not bonded.

Commissioner Harlan: Has it any other debts?

Mr. Stack: Yes.

Commissioner Harlan: To what amount?

Mr. Stack: It owes the Rapides Lumber Company, I think, $88,000, and a bank in Alexandria $10,000.

Commissioner Harlan: What was the maximum amount of its indebtedness to the Rapides Lumber Company?

Mr. Stack: I am not prepared to say.

Commissioner Harlan: Has that indebtedness been reduced from time to time?

Mr. Stack: Yes, sir.

Commissioner Harlan: Do you remember what the largest amount was?

Mr. Stack: I think it has been reduced probably $25,000 or $30,000.

1938 Commissioner Harlan: In the last four or five years?

Mr. Stack: Yes, sir.

Commissioner Harlan: Since the company was organized?

Mr. Stack: Yes, sir.

Commissioner Harlan: Did you give the date of the organization of the railroad company?

Mr. Stack: No. 1900.

Commissioner Harlan: The $10,000 borrowed at the bank there is represented by a note of the company?

Mr. Stack: Yes.

Commissioner Harlan: And you were on the back of it?

Mr. Stack: I am not.

Commissioner Harlan: Who is?

Mr. Stack: Mr. Long.

Commissioner Harlan: Anyone else?

Mr. Stack: No.

Commissioner Harlan: This is a narrow gauge road, is it?

Mr. Stack: 18 miles of it is narrow gauge and 6 miles is standard gauge.

Commissioner Harlan: And the 6 miles of standard gauge runs from La Moria to Woodworth?

Mr. Stack: Yes, sir.

1939 Commissioner Harlan: The standard gauge, which is 6.25 miles long, extends from what regular line?

Mr. Stack: From the Southern Pacific, Texas Pacific and Rock Island at La Moria.

Commissioner Harlan: What other connection have you?

Mr. Stack: The Iron Mountain at Woodworth.

Commissioner Harlan: That is the St. Louis, Watkins & Gulf?

Mr. Stack: Yes, sir.

Commissioner Harlan: And west from Woodworth the narrow gauge line runs for about 18 miles?

Mr. Stack: For about 18 miles.

Commissioner Harlan: To what point?

Mr. Stack: To a point we call Hineston.

Commissioner Harlan: You call that your main line?

Mr. Stack: Yes, sir.

Commissioner Harlan: You have one standard locomotive?

Mr. Stack: Yes, sir.

Commissioner Harlan: Two narrow gauge locomotives?

Mr. Stack: Yes, sir.

Commissioner Harlan: Two standard cars?

Mr. Stack: Yes, sir.

1940 Commissioner Harlan: And nine narrow gauge cars?

Mr. Stack: We have five narrow gauge locomotives.

Commissioner Harlan: And one standard locomotive?

Mr. Stack: Yes, sir.

Commissioner Harlan: What are the two standard gauge cars which you have?

Mr. Stack: One is a flat car and the other is a pile driver.

Commissioner Harlan: What sort of a town is La Moria?

Mr. Stack: A little country trading point.

Commissioner Harlan: How many people?

Mr. Stack: About 250 people, probably; two small stores.

Commissioner Harlan: And Woodworth?

Mr. Stack: It is a town of about 1000 to 1250 people.

Commissioner Harlan: And Hineston?

Mr. Stack: Hineston is a little country town, post office.

Commissioner Harlan: Do you carry passengers?
Mr. Stack: No.
Commissioner Harlan: Any mail?
Mr. Stack: No.
Commissioner Harlan: Express matter?
Mr. Stack: No.
1941 Commissioner Harlan: Do you carry any general merchandise?
Mr. Stack: Yes, sir.
Commissioner Harlan: To what amount?
Mr. Stack: We carry considerable.
Commissioner Harlan: You have not the figures with you?
Mr. Stack: No.
Mr. Thurmond: Here is a list of the figures (handing paper).
Commissioner Harlan: Is your total tonnage last year shown on this report?
Mr. Stack: I do not know. Mr. Rickey will show you that.
Commissioner Harlan: Do you move any farm products?
Mr. Stack: Yes, sir.
Commissioner Harlan: Move any manufactured lumber for shippers other than the Rapides Lumber Company?
Mr. Stack: No.
Commissioner Harlan: Move any logs over your line?
Mr. Stack: No.
Commissioner Harlan: You are manager of that lumber company and can tell us what is the extent of their forests. How many acres do you own?
Mr. Stack: We own 42,000 all told; about 20,000 or 21,000 virgin pine and about 20,000 cut.
1942 Commissioner Harlan: Do you own timber rights in addition?
Mr. Stack: Very small.
Commissioner Harlan: Does the railroad company own its own right of way?
Mr. Stack: Yes, sir.
Commissioner Harlan: Acquired when?
Mr. Stack: The six miles from La Moria to Woodworth was acquired in 1900 from the settlers; and since then we have been getting leases from the Rapides Lumber Company and settlers out on the west.
Commissioner Harlan: That is west of the Iron Mountain?
Mr. Stack: Yes, sir.
Commissioner Harlan: You do not own the fee of any lands there?
Mr. Stack: No.
Commissioner Harlan: Do you pay any rent to these lessors, do you pay the Rapides Lumber Company any rent?
Mr. Stack: No, we simply have the right as long as we use the railroad.
Commissioner Harlan: Have you any written leases?
Mr. Stack: Yes, sir.

Commissioner Harlan: Have you a copy of those leases
1943 here?

Mr. Stack: No, sir.

Commissioner Harlan: Will you be kind enough to furnish a copy of the lease between the lumber company and the railroad company, and copies of one or two leases with settlers.

Mr. Stack: Yes, sir.

Commissioner Harlan: Where is the mill of the lumber company?

Mr. Stack: At Woodworth.

Commissioner Harlan: Is it on the tracks of the Iron Mountain?

Mr. Stack: Right close to it.

Commissioner Harlan: Reached by a spur?

Mr. Stack: Yes, sir.

Commissioner Harlan: And the planing mill is on the spur track?

Mr. Stack: Yes, sir.

Commissioner Harlan: Does the lumber company own any logging lines connected with the Woodworth & Louisiana Central?

Mr. Stack: The spurs in the woods.

Commissioner Harlan: Are they owned by the lumber company?

Mr. Stack: Yes, sir.

1944 Commissioner Harlan: Who built them?

Mr. Stack: The lumber company.

Commissioner Harlan: And paid for them?

Mr. Stack. Yes, sir. They do not own the steel.

Commissioner Harlan: You own the steel?

Mr. Stack: The railroad company owns the steel.

Commissioner Harlan: Who paid for the labor?

Mr. Stack: The lumber company.

Commissioner Harlan: When you have to move those tram or logging roads who does it?

Mr. Stack: The lumber company.

Commissioner Harlan: At its expense?

Mr. Stack: Yes, sir.

Commissioner Harlan: Has the lumber company any cars?

Mr. Stack. No.

Commissioner Harlan: The railroad company operates the tram line?

Mr. Stack: Yes, sir.

Commissioner Harlan: Sends out the locomotives and cars?

Mr. Stack: Yes, sir.

Commissioner Harlan: Who does the loading on the cars?

Mr. Stack: The lumber company.

1945 Commissioner Harlan: Does the railroad company participate?

Mr. Stack: No.

Commissioner Harlan: The railroad company unloads at the pond?

Mr. Stack. Yes, sir.

Commissioner Harlan: Do you make any special charge for hauling the logs on the logging roads up to the main line junction.

Mr. Stack: The lumber company does that.

Commissioner Harlan: No, you do that, you have just said you did.

Mr. Stack: The lumber company delivers the logs to the spur on the main line and gives them to the main line engine.

Commissioner Harlan: But you have just said that the lumber company did not have any locomotives and any cars, and therefore it cannot make the delivery to you.

Mr. Stack: No, you misunderstood me.

Commissioner Harlan: Perhaps you misunderstood me, or I misunderstood you. We will start again. You have these logging roads connected with the main line at Hineston?

Mr. Stack: Yes, sir.

Commissioner Harlan: Does the lumber company have
1946 any locomotives?

Mr. Stack: They have leased locomotives, yes, sir.

Commissioner Harlan: From the railroad company?

Mr. Stack: From the railroad company.

Commissioner Harlan: Has it leased any cars?

Mr. Stack: Yes, sir.

Commissioner Harlan: How many?

Mr. Stack: It leases them all.

Commissioner Harlan: Has it leased all the locomotives, your narrow gauge locomotives?

Mr. Stack: Yes, sir, all but one.

Commissioner Harlan: And all your cars?

Mr. Stack: Yes, sir.

Commissioner Harlan: And you do not operate the narrow gauge road at all, do you, I mean the railroad?

Mr. Stack: Yes, sir, we operate the main line.

Commissioner Harlan: What do you regard as the main line?

Mr. Stack: From Woodworth to Hineston.

Commissioner Harlan: How can you as a railroad man operate that line when you have leased all your locomotives but one, and all your cars? You said you had leased all your cars.

Mr. Stack: The lumber company——

1947 Commissioner Harlan: Perhaps we do not understand one another. If you will explain how the logs get to the mill in your own way—who fetches them there?

Mr. Stack: The lumber company loads the logs on cars in the woods and delivers them with their own engines to the main line, and then the railroad company takes them with their engine and delivers them into the pond.

Commissioner Harlan: With the one locomotive?

Mr. Stack: With the one locomotive, yes, sir.

Commissioner Harlan: So the railroad company has no control over the cars, they have all been leased to the lumber company; but you do haul the cars with your own locomotive to the mill, is that it?

Mr. Stack: The railroad company owns the cars.

Commissioner Harlan: But you said they leased all the cars to the lumber company?

Mr. Stack: No, they have not.

Commissioner Harlan: Then I did misunderstand you. Then you have not leased any cars to the lumber company?

Mr. Stack: No.

Commissioner Harlan: But you have leased one locomotive
1948 to the lumber company?

Mr. Stack: No, we leased four locomotives to the lumber company.

Commissioner Harlan: Four?

Mr. Stack: Yes, sir.

Commissioner Harlan: Narrow gauge locomotives?

Mr. Stack: Yes, sir.

Commissioner Harlan: I do not know that I am hearing as others do——

Mr. Garwood: I think he said he leased all but one of the narrow gauge cars.

Mr. Stack: We leased all the locomotives on the spur except one, and that one is used on the main line. Those locomotives we use on the spur are leased to the lumber company.

Commissioner Harlan: You have five narrow gauge locomotives?

Mr. Stack: Yes, sir.

Commissioner Harlan: As I understand you now, the railroad company owns five narrow gauge locomotives?

Mr. Stack: Yes, sir.

Commissioner Harlan: And it has leased four of those locomotives to the lumber company?

1949 Mr. Stack: Yes, sir.

Commissioner Harlan: And the lumber company uses them on the spur?

Mr. Stack: Yes, sir.

Commissioner Harlan: And they do not get on the main line except on the switch movement?

Mr. Stack: Practically.

Commissioner Harlan: You have not leased any of the logging cars to the lumber company, have you?

Mr. Stack: No.

Commissioner Harlan: So that you deliver the cars to the lumber company at the interchange point, and they haul the cars out to the woods and there they are loaded by the lumber company?

Mr. Stack: Yes.

Commissioner Harlan: And there the loaded cars are delivered back to you at the interchange points?

Mr. Stack: Yes, sir.

Commissioner Harlan: And your one remaining narrow gauge locomotive hauls them from that point to the mill?

Mr. Stack: Yes, sir.

Commissioner Harlan: Do you collect any rent for those
1950 four locomotives?

Mr. Stack: No.

Commissioner Harlan: Do you make any charge for hauling the

logs from the interchange tracks to the mill and dumping them in the pond?

Mr. Stack: No.

Commissioner Harlan: That is a free service?

Mr. Stack: That is covered by the contract.

Commissioner Harlan: Covered in another way?

Mr. Stack: Yes, sir.

Commissioner Harlan: But there is no specific charge for that transportation?

Mr. Stack: No.

Commissioner Harlan: And there is no specific charge for the locomotives you have leased to the lumber company?

Mr. Stack: No.

Commissioner Harlan: What compensation do you get from the lumber company for the use of four locomotives and for the haul of the logs to the mill?

Mr. Stack: We get their outbound tonnage.

Commissioner Harlan: You get their outbound tonnage of manufactured lumber?

1951 Mr. Stack: Yes, sir.

Commissioner Harlan: And where do you receive that lumber?

Mr. Stack: At Woodworth.

Commissioner Harlan: At what point?

Mr. Stack: Woodworth.

Commissioner Harlan: I know, but at what point in Woodworth, at the planing mill?

Mr. Stack: Yes, sir, some at the planing mill and some at the sawmill.

Commissioner Harlan: Is it mostly dressed lumber or rough lumber?

Mr. Stack: Mostly dressed.

Commissioner Harlan: You receive it at the planing mill?

Mr. Stack: Yes.

Commissioner Harlan: At whose track?

Mr. Stack: Joint track.

Commissioner Harlan: Of the Iron Mountain and yourselves?

Mr. Stack: Of the Iron Mountain and ourselves.

Commissioner Harlan: Who places the empty cars there?

Mr. Stack: We do.

Commissioner Harlan: How far is the planing mill from the interchange track with the Iron Mountain track?

1952 Mr. Stack: Oh, probably 25 feet.

Commissioner Harlan: So your railroad hauls the empty cars 25 feet and spots it at the planing mill?

Mr. Stack: Yes, sir, we take it. Of course, the interchange is longer than that. They are just as far apart.

Commissioner Harlan: That is the end of the interchange track?

Mr. Stack: Yes, sir.

Commissioner Harlan: Is 25 feet away from the planing mill?

Mr. Stack: Yes.

Commissioner Harlan: And you possibly have a longer haul than that sometimes when the car is farther along on the interchange track?

Mr. Stack: Yes.

Commissioner Harlan: But from the interchange track to the planing mill is about 25 feet?

Mr. Stack: Yes, sir.

Commissioner Harlan: And that is a joint track?

Mr. Stack: Yes, sir.

Commissioner Harlan: And the interchange track itself belongs to the Iron Mountain?

1953 Mr. Stack: That is joint too.

Commissioner Harlan: When you say it is joint, do you mean it is jointly owned by the two companies?

Mr. Stack: The Iron Mountain or the old Watkins Road furnished the steel and we furnished the ties and labor.

Commissioner Harlan: That is the Woodworth & Louisiana Central furnished the ties and labor?

Mr. Stack: Yes, sir.

Commissioner Harlan: Who furnished the right of way?

Mr. Stack: We did; we furnished the right of way.

Commissioner Harlan: I thought you did not have any title west of the Iron Mountain tracks?

Mr. Stack: Well, I consider that ours.

Commissioner Harlan: I know, but I thought all the right of way west of the Iron Mountain track was leased.

Mr. Stack: Oh, no, not all of it.

Commissioner Harlan: You so stated. If you want to correct your testimony now is the time to do it.

Mr. Stack: It is not all leased. I said part of it was leased.

Commissioner Harlan: You certainly stated, and of course you may correct it, but you certainly stated all the right of way

1954 west of the Iron Mountain track was leased either from settlers or from the Rapides Lumber Company. Was that a mistake?

Mr. Stack: Well, that is what I mean, it is all from one or the other.

Commissioner Harlan: So the railroad company does not own it at all west of the Iron Mountain track?

Mr. Stack: No.

Commissioner Harlan: It is simply a lessee. I will ask again, with those facts before you, who furnished the right of way for this interchange track and the spur track which runs in front of the planing mill.

Mr. Stack: It was furnished by lease.

Commissioner Harlan: The railroad company had acquired the use of it by lease from the Rapides Lumber Company?

Mr. Stack: Yes, sir.

Commissioner Harlan: Well, for that service on the lumber what charge do you make?

Mr. Stack: We get a division of the rate.

Commissioner Harlan: What is the lowest division and what is the highest?

Mr. Stack: I think, without knowing positively, I will
1955 state about from one and one-half cents to, I think, about five and a half cents.

Commissioner Harlan: Did you not at one time get a higher division than that?

Mr. Stack: I think some time some years ago we did get a higher division than that.

Commissioner Harlan: Did you not get up as high as seven cents?

Mr. Stack: That was on some Denver business, I think.

Commissioner Harlan: When was that division cancelled?

Mr. Stack: I think about three or four years ago. Mr. Davis can tell you about it.

Commissioner Harlan: When was that cancelled, Mr. Davis?

Mr. Davis: I cannot tell you exactly.

Commissioner Harlan: Now as I understand it, the only interstate service that you participate in as a carrier and the only transportation service for which you are paid is the haul of the lumber from the planing mill to the interchange track?

Mr. Stack: That is on the business routed by the Iron Mountain. Of course, we perform a much greater——

Commissioner Harlan: I am talking about the Iron Moun-
1956 tain at this point.

Mr. Stack: That is right.

Commissioner Harlan: And I am also talking of the lumber of the Rapides Lumber Company. Now, do you haul any lumber or logs for any other company?

Mr. Stack: No.

Commissioner Harlan: Any forest products?

Mr. Stack: No.

Commissioner Harlan: I am now talking again about the narrow gauge road.

Mr. Stack: Yes, sir.

Commissioner Harlan: Do you haul any staves or ties?

Mr. Stack: No.

Commissioner Harlan: Do you haul any general merchandise over that road?

Mr. Stack: Some, yes, sir.

Commissioner Harlan: What rates do you charge, is that a local movement?

Mr. Stack: That is a local movement.

Commissioner Harlan: Purely?

Mr. Stack: Purely.

Commissioner Harlan: You have no through rates?
1957 Mr. Stack: No.

Commissioner Harlan: We will take the standard gauge line from Woodworth to La Moria; that is 6¾ miles long?

Mr. Stack: Yes.

Commissioner Harlan: Do you haul any manufactured lumber over that line and deliver it to other carriers?

Mr. Stack: Yes, sir.

Commissioner Harlan: Whose lumber do you haul over there?
Mr. Stack: The lumber of the Rapides Lumber Company.
Commissioner Harlan: And from no one else?
Mr. Stack: And from no one else.
Commissioner Harlan: You do that work with your standard locomotive?
Mr. Stack: Yes, sir.
Commissioner Harlan: And you do the work with your standard locomotive when you make delivery to the Iron Mountain?
Mr. Stack: Yes, sir.
Commissioner Harlan: What proportion of your traffic goes beyond the Iron Mountain over this standard track to the other carriers?
Mr. Stack: I should say at least 95 per cent.
1958 Commissioner Harlan: What divisions do you get from those carriers?
Mr. Stack: About I think two to five cents or five and a half cents.
Commissioner Harlan: When was that track built?
Mr. Stack: The standard gauge?
Commissioner Harlan: Yes.
Mr. Stack: In 1900.
Commissioner Harlan: Did you say five or five and a half cents?
Mr. Stack: From five to five and a half cents. I said from two to five and five and a half cents.
Commissioner Harlan: Have you never received any higher division than five and a half cents?
Mr. Stack: I said we did get seven cents to some points out in Denver and around in that country at one time.
Commissioner Harlan: When was that standard gauge track built?
Mr. Stack: In 1900.
Commissioner Harlan: Was the Rock Island in that country at that time?
Mr. Stack: No, sir.
1959 Commissioner Harlan: What lines did you connect with at the other end of your standard gauge track?
Mr. Stack: The Texas & Pacific and the Southern Pacific.
Commissioner Harlan: What divisions did you get from them at that time?
Mr. Stack: I don't remember.
Commissioner Harlan: Did you get any divisions?
Mr. Stack: We got some, yes, sir.
Commissioner Harlan: When did the Rock Island get into that territory?
Mr. Stack: I think it was two or three years ago.
Commissioner Harlan: 1907, was it not?
Mr. Stack: I think so.
Commissioner Harlan: Were your divisions over the T. & P. then increased or did they remain as ever?
Mr. Stack: No, sir, we are not getting any division on the T. & P. now.

Commissioner Harlan: What is that other line over there?

Mr. Stack: The Southern Pacific.

Commissioner Harlan: Were you divisions increased after you joined with the Rock Island?

Mr. Stack: As to that I could not say, but I do not
1960 think they were. They were left practically the same, although I would not be sure of that.

Commissioner Harlan: The connection with the Rock Island did not result in any increase in your divisions, as you now recall them?

Mr. Stack: I do not know, not that I recall. It may.

Mr. Davis: The division by the Southern Pacific is four cents with the exception of export.

Commissioner Harlan: What is the export?

Mr. Davis: Two cents.

Commissioner Harlan: Will you answer the question at this point, whether the connection between the Rock Island and the Woodworth & Louisiana Central resulted in an increase of divisions by any line?

Mr. Davis: An increase of one and one-half cents.

Commissioner Harlan: That increase became effective on the Iron Mountain as well as others?

Mr. Davis: No, sir. We are getting now on all business except Alexandria, four cents.

Commissioner Harlan: Four cents on all business?

Mr. Davis: Except Alexandria, Louisiana, and on that we get one and one-half cents.

1961 Mr. Cowan: Mr. Davis will file the division sheets as to all these railroads, of which he is traffic manager, covering the period of time the same as we asked for today in regard to the other line, and also the tonnage in the same way as was asked for from the Louisiana & Pacific and the output of each road, which goes to each road.

Mr. Davis: We will give it to you.

Commissioner Harlan: It is the understanding of the witness that the Rock Island went into that country in 1907. That is my recollection——

Mr. Davis: It is my recollection that we opened up with them in 1908.

Commissioner Harlan: You mean you made a connection with them in 1908?

Mr. Davis: Yes, sir.

Commissioner Harlan: Am I to understand that that did not affect your divisions?

Mr. Davis: It did by that route.

Commissioner Harlan: Of course, you then got divisions?

Mr. Davis: Yes.

Commissioner Harlan: But did it affect the amount of your divisions by any other route?

1962 Mr. Davis: No.

Commissioner Harlan: What division did you then get

from the Rock Island? You have stated that from two to five and a half cents——

Mr. Stack: Yes.

Commissioner Harlan: And you got seven cents on this Denver business?

Mr. Stack: Yes.

Commissioner Harlan: How did that affect the movement of your traffic?

Mr. Stack: Do you mean——

Commissioner Harlan: The connection with the Rock Island.

Mr. Stack: Volume?

Commissioner Harlan: No, but the routing of your traffic.

Mr. Davis: I can explain that. We give 50 per cent of our business to the Rock Island if they furnish cars, and of the balance, 40 per cent to the Southern Pacific.

Commissioner Harlan: Before the Rock Island went in there, what part of your traffic did the Iron Mountain get?

Mr. Davis: Well, I cannot say. I think the Texas & Pacific got a very large part of it at that time, and after the Rock Island
1963 connected with us they cancelled all rates with us and have had none since that time, but up to the time we formed this connection with the Rock Island they got at least 75 to 80 per cent of the tonnage.

Commissioner Harlan: And the Iron Mountain was getting some?

Mr. Davis: Yes, they were getting something, not a great deal though. The Iron Mountain and the T. & P. at that time were one, I guess.

Commissioner Harlan: Have you filed a copy of that contract with the Rock Island for the division of the tonnage?

Mr. Davis: Yes, sir, I think so.

Commissioner Harlan: I do not mean the division of the rate, but of the tonnage?

Mr. Davis: Yes, sir; it is in, I think.

Commissioner Harlan: Do you receive free transportation from the Rock Island, Southern Pacific, Iron Mountain and other connections?

Mr. Stack: I have transportation over the Southern Pacific but not over the other two.

Commissioner Harlan: Not over the Rock Island?

Mr. Stack: No.

Commissioner Harlan: Have you never had?

1964 Mr. Stack: No.

Commissioner Harlan: Why not?

Mr. Stack: I do not know.

Commissioner Harlan: Have you been refused transportation?

Mr. Stack: No, I have never requested it.

Commissioner Harlan: Do you use transportation over the Southern Pacific?

Mr. Stack: Very seldom.

Commissioner Harlan: Does any officer of your line get interchange transportation over the Rock Island?

Mr. Stack: I am sure I don't know.
Commissioner Harlan: Who applies for interchange transportation?
Mr. Stack: Mr. Davis, I imagine.
Mr. Davis: Mr. Long and Mr. Sweet and Mr. Rickey and myself, I believe, own Rock Island transportation.
Commissioner Harlan: Southern Pacific.
Mr. Davis: I think all the officers hold annual transportation.
Commissioner Harlan: And the Iron Mountain?
Mr. Davis: My recollection is Mr. Long and myself.
Commissioner Harlan: What connection takes you into
1965 Chicago on free transportation?
Mr. Davis: From Kansas City?
Commissioner Harlan: Yes, Kansas City or St. Louis.
Mr. Davis: The Rock Island and Burlington.
Commissioner Harlan: You have Burlington transportation?
Mr. Davis: Yes, sir.
Mr. Thurmond: You have had these figures compiled, have you not, your bookkeeper or auditor made them?
Mr. Stack: Yes, sir.

(The paper so offered and identified, was received in evidence and thereupon marked Woodworth & Louisiana Central Exhibit No. 1, received in evidence December 14th, 1910, and is attached hereto.)

Mr. Thurmond: You have seen there figures and know them, Mr. Rickey?
Mr. Rickey: Yes, sir.
Mr. Thurmond: They are taken from records in your office?
Mr. Rickey: Yes, sir.
Mr. Thurmond: You think they are accurate?
Mr. Rickey: Yes, sir.
Mr. Thurmond: That is all.
Commissioner Harlan: It is understood without further
1966 examination of these witnesses that both of these lumber companies and both of these railroads belong to what we call the R. A. Long interests.
Mr. Thurmond: Yes, in the sense it has been stated here, that Mr. R. A. Long has the majority of the stock.
Commissioner Harlan: Yes, he has the majority of the stock.
Mr. Thurmond: Yes.
Mr. Cowan: I understand the extent of that control will be presented to the Commission and also the request I made as to the relative amount of tonnage moving from each mill to each connection, and that this line, the same as we requested of the Louisiana & Pacific, will furnish it. The Commissioner asked for it for 1908, 1909 and 1910, and probably we had better make it the same.
Mr. Thurmond: I suppose any evidence is in here for all purposes, otherwise I ask that that certificate of percentages given by the Louisiana State Railroad Commission be considered in this case.
Commissioner Harlan: The whole record is available in each particular case.

Mr. Cowan: Do you make out the billing of the lumber that is shipped out from your mill, Mr. Stack?

1967 Mr. Stack: The agent of the railroad does. The waybill do you mean?

Mr. Cowan: Well, the bill of lading.

Mr. Stack: Yes, sir.

Mr. Cowan: The lumber company makes out the bill of lading, does it not?

Mr. Stack: Yes.

Commissioner Harlan: And passes it over to the agent of the railroad company to sign?

Mr. Stack: No, sir, the railroad company, the shipping clerk of the planing mill hands out a list of cars that is to go out that day, and the railroad agent makes out the bill of lading and sends it or delivers it to the lumber company.

Mr. Cowan: What agent does that?

Mr. Stack: The station agent of the Woodworth & Louisiana Central.

Mr. Cowan: Where does that bill of lading show that the lumber moves from?

Mr. Stack: That it moves from points—going to the Rock Island or Southern Pacific, it would move from Woodworth.

Mr. Cowan: And in the other case, of the Watkins & Gulf?

Mr. Stack: Pardon me——

1968 Mr. Cowan: In case it is moving over the Watkins & Gulf?

Mr. Stack: Nelsonville.

Mr. Cowan: Where is Nelsonville?

Mr. Stack: On our line west of Woodworth.

Mr. Cowan: In all cases after the lumber is actually loaded at the planing mill and moves out from there?

Mr. Stack: Yes, sir.

Mr. Cowan: And the logs are brought into the mill without any charge in each case?

Mr. Stack: Yes, sir.

Mr. Cowan: And the logs are not shipped separate which furnish the lumber that goes to the Rock Island from that that goes to the Watkins & Gulf?

Mr. Stack: No.

Mr. Cowan: So it is just a mere means of putting in so-called milling in transit on the Watkins & Gulf lumber, but not as to the other two?

Mr. Stack: I think so.

Mr. Cowan: But in all cases the service is the same except you do haul the lumber on from your mill over to the Rock Island and Southern Pacific?

Mr. Stack: That is true.

1969 Mr. Cowan: Where your line joins with the Southern Pacific do you maintain an agency there?

Mr. Stack: Yes, sir, joint agent.

Mr. Cowan: He is the local agent of the Southern Pacific?

Mr. Stack: The Southern Pacific, the T. & P. and our road.

Mr. Cowan: And is there an agent at the junction point with the Rock Island?

Mr. Stack: Yes, sir.

Mr. Cowan: Is he a joint agent?

Mr. Stack: No. We only have one agent at La Moria.

Mr. Cowan: Does he actually have the position of an agent of your road, or do you simply pay a part of his salary?

Mr. Stack: He is an agent of ours. We consider him so.

Mr. Cowan: How is that?

Mr. Stack: We consider him as an agent, yes, sir.

Mr. Cowan: Does somebody appoint him an agent?

Mr. Stack: Yes.

Mr. Cowan: Or do you just pay part of his compensation?

Mr. Stack: He is our agent and signs himself as our agent.

Mr. Cowan: Do you pay compensation to him?

Mr. Stack: Yes, sir.

Mr. Cowan: What proportion?

1970 Mr. Stack: We pay him $35.00 a month.

Mr. Cowan: All of the figures to show the traffic on your line are in the hands of Mr. Davis?

Mr. Stack: Yes, sir.

Mr. Cowan: I understand you to answer the Commissioner that you handle some merchandise, but that was just local. But you do not handle that as a carrier of merchandise, do you?

Mr. Stack: We handle anything that is offered us.

Mr. Cowan: Well, what do you handle?

Mr. Stack: We handle groceries and general merchandise.

Mr. Cowan: And that goes out to whom?

Mr. Stack: Out to our camps, out to the mill company's camps.

Mr. Cowan: Well, that is the extent of it?

Mr. Stack: Well, then, and from La Moria to Woodworth we handle merchandise.

Mr. Cowan: In what quantity?

Mr. Stack: Not very large quantities.

Mr. Cowan: What do you get for that, your local rates?

Mr. Stack: We have through rates, I think. For that you will have to refer to Mr. Davis.

1971 Mr. Cowan: He knows all about what you handle on the different lines, does he?

Mr. Stack: Yes, sir.

Mr. Cowan: I suppose there will be a classified commodity request. I think it has already been made, but if not, it will be, so that everybody will file a statement of the classified commodities, to show what quantity of stuff has moved and what they get for it.

Mr. Stack: We also handle a large amount of cane on our line.

Commissioner Harlan: I will ask you whether you handle any farm products on your line?

Mr. Stack: Yes, sir, a large amount of cane.

Commissioner Harlan: Between where?

Mr. Stack: Shady Spur and La Moria.

Commissioner Harlan: Is that a local movement to La Moria?
Mr. Stack: Yes, sir.
Commissioner Harlan: On the local rate?
Mr. Stack: Yes.
Commissioner Harlan: Any cotton?
1972 Mr. Stack: No.
Mr. Cowan: That is for the purpose of the camp or of the mill company?
Mr. Stack: Going west, yes, sir; at Woodworth and La Moria it is for the Rapides Lumber Company's store and two or three other little stores that are located there.
Mr. Cowan: Well, Mr. Davis can furnish a statement with regard to all of that?
Mr. Stack: Yes, sir.
Commissioner Harlan: This branch of the Commission will now adjourn until 9:30 tomorrow morning.

Whereupon, at 5:30 P. M., an adjournment was taken to Thursday, December 15th, 1910, at 9:30 A. M.

VOLUME II.

STAR GRAIN AND LUMBER COMPANY et al., Complainants,
against
ATCHISON, TOPEKA & SANTA FE RAILWAY COMPANY et al., Defendants.

1973 NEW ORLEANS, LA., *December* 15, 1910.

Met pursuant to adjournment at 10:00 A. M.
Before Examiner Burchmore.

Examiner Burchmore: Gentlemen, Examiner Boyle of the Commission will hold hearings during the day in the adjoining room. The cases to come up before him will be announced in this room. He will take up first the Gould Southwestern Railroad, and is now ready to poceed. The next road to come up before him will be the Liberty White, which I understand is an east of the river line. Are there any other east of the river tap lines present this morning?

(No response.)

Examiner Burchmore: There seems to be a general anxiety to conclude this hearing as soon as it can be completed without neglecting any important facts of the investigation, and in order to attain that result and expedite the time, I have been instructed by Commissioner Harlan to continue the proceeding in the same manner in which it has been conducted so far, and if counsel will cooperate by limiting their examination as much as it can be limited and
1974 by refraining from asking questions which have already been asked by other examining counsel, I think we may be able to adjourn this hearing by Saturday night, a result which I think all desire to see attained. A line of questions was gone into the other day concerning the so-called Colonial Railroad System, and I believe that Mr. Fullerton agreed to be present at a later time to explain that system or his understanding of that system to the Commission. Is Mr. Fullerton present?

Mr. Fullerton: Yes.

Examiner Burchmore: Will you please be sworn.

S. H. FULLERTON, was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: Will you make such explanations as you are able to with respect to this so-called Colonial System of tap lines?

Mr. Fullerton: I know absolutely nothing about them.

Examiner Burchmore: Then you are not able to enlighten the Commission in this connection?

Mr. Fullerton: The talk about the Colonial System I heard her for the first time.

1975 Examiner Burchmore: Were you not the president of system by that name?

Mr. Fullerton: No, sir.

Examiner Burchmore: I had inferred yesterday, Mr. Fullerton that for some years there was an association of several tap lines, th association not taking the form of an incorporation or formal organ zation, and the tap lines that were in this association were controlle by certain lumber companies whose entire output was sold throug the Colonial Lumber Company. Now whether that explanation correct or not, I do not know, but have you ever heard of the Col nial Lumber Company?

Mr. Fullerton: Yes, sir, the Colonial Lumber & Timber Com pany.

Examiner Burchmore: Are you or have you been an officer stockholder in that company?

Mr. Fullerton: I never have been an officer.

Examiner Burchmore: You have been a stockholder?

Mr. Fullerton: We bought out the Colonial Lumber & Timbe Company I think about the first of 1907.

Examiner Burchmore: In connection with that purchase of th Colonial Lumber & Timber Company you were not advised of th prior existence of any so-called Colonial System of tap lines

1976 Mr. Fullerton: No.

Examiner Burchmore: What was the nature of the bus ness of the Colonial Lumber & Timber Company?

Mr. Fullerton: They had interests in certain manufacturing in dustries and bought and sold lumber.

Examiner Burchmore: They did not manufacture lumber?

Mr. Fullerton: Yes, they manufactured it, that is through sub sidiary companies, not directly.

Examiner Burchmore: That was a holding and selling company

Mr. Fullerton: Yes, sir.

Examiner Burchmore: Then you are not able to enlighten th Commission with respect to the so-called Colonial System?

Mr. Fullerton: No, I do not know anything about it.

Examiner Burchmore: Do you know anyone who might be able t enlighten the Commission?

Mr. Fullerton: M. L. Fleishel, who was President of the Colonia Lumber & Timber Company might be able to do so. He was th man, we bought out his holdings in the Colonial Lumber & Timbe Company.

Examiner Burchmore: Does counsel desire to address any que tions to the witness in this connection?

1977 Mr. Cowan: Just with respect to the Colonial Lumber Com pany?

Examiner Burchmore: Just in that connection.

Mr. Cowan: Just in that connection only, none that I know of.

(Witness excused.)

M. L. FLEISHEL, called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: Can you inform the Commission with respect to this system of tap lines?

Mr. Fleishel: Yes, sir.

Examiner Burchmore: Please make such explanation as you can.

Mr. Fleishel: The Colonial Railway System was composed of a number of short line railroads that were the property of several lumber companies of which I was an officer. The name of Colonial System was simply used as a trade name for convenience; it was not an incorporated system, and had no significance other than the combining of those different railroads under one heading for convenience. That is about all there is to it. I was an officer of those several short line railroads myself.

1978 Examiner Burchmore: You were an officer of each of those railroads?

Mr. Fleishel: Yes, sir.

Examiner Burchmore: Was the Bernice & Northwestern one of those roads?

Mr. Fleishel: Yes, sir.

Examiner Burchmore: The Warren, Johnsville & Saline River?

Mr. Fleishel: No.

Examiner Burchmore: Was the Tioga & Southeastern?

Mr. Fleishel: No.

Examiner Burchmore: Was the Shamrock & Western?

Mr. Fleishel: Yes, sir.

Examiner Burchmore: Was the Mill Creek & Little River Railroad & Navigation Company a member?

Mr. Fleishel: I think it was; I am not positive; either that or the Boston & Little River.

Examiner Burchmore: Was the Little Rock, Sheridan & Saline River Railway?

Mr. Fleishel: No.

Examiner Burchmore: The Sabine & Little River?

1979 Mr. Fleishel: No, sir.

Examiner Burchmore: Were there any other companies in that system?

Mr. Fleishel: I think we were interested in a road over in Alabama about that time, and I am not sure but that was under that heading, but that was never an incorporated road.

Examiner Burchmore: And these lumber companies or tap lines were owned or controlled by substantially the same financial interests?

Mr. Fleishel: Yes, sir.

Examiner Burchmore: Any further questions by counsel?

Mr. Cowan: Which three or four or whatever it was formed the Colonial System?

Mr. Fleishel: I think the Bernice & Northwestern, the Shamrock & Western, and I think the Mill Creek & Little River Railroad & Navigation Company, and at that time the Dorcheat, the Blackman & Dorcheat, I think it was.

Mr. Cowan: What were the lumber companies served by each of those roads?

Mr. Fleishel: The Bernice Lumber Company and the Brown Lumber Company.

Mr. Cowan: Which one served the Brown Lumber Com-
1980 pany?

Mr. Fleishel: The Shamrock & Western.

Examiner Burchmore: The Little River Lumber Company owns the Mill Creek & Little River Railroad?

Mr. Fleishel: Yes, sir, substantially.

Mr. Cowan: What others?

Mr. Fleishel: The Vredenburg Sawmill Company own the road in Alabama. The Bernice Lumber Company, the Brown Lumber Company, and the Valley Lumber Company, and the Blackman & Dorcheat.

Examiner Burchmore: The Dorcheat Company and the Brown Lumber Company were controlled by the Chicago Lumber & Coal Company?

Mr. Fleishel: No.

Examiner Burchmore: Who did control those companies?

Mr. Fleishel: I did personally. The Chicago Lumber & Coal Company had nothing to do with them at that time. You understand this Colonial Railway System has had no existence of any kind for something over four years, I think.

Mr. Cowan: When it did have existence, the purpose of it was to handle the business passing over it somewhat as a unit?

1981 Mr. Fleishel: Well, yes.

Mr. Cowan: And that I assume was for the purpose of being able to get as good divisions from the trunk lines as you could?

Mr. Fleishel: No, the majority of them got no divisions whatever. During the years of the Colonial System I do not think any of those roads got any division.

Mr. Cowan: What could have been the purpose of it?

Mr. Fleishel: We expected to, and we hoped to, but we never did get them. The Bernice & Northwestern in later years and the Mill Creek & Little River Company in later years got divisions but the others never did get any.

Mr. Cowan: There was no other purpose of having the railroads operate under a particular name?

Mr. Fleishel: We incorporated most of those roads with the expectation of complying with the law and getting divisions, but we never did do it. I sold them out about that time, and never did follow them up.

Mr. Cowan: At the present time are those lumber companies which you mentioned still operating the railroads you mentioned?

Mr. Fleishel: Well, I do not know. The lumber compa-
1982 nies are not any more—they sold their properties out to railroad corporations.

Mr. Cowan: They have gone out of existence, have they?

Mr. Fleishel: No, the railroads have not. Some of them have, all but two have.

Mr. Cowan: What two?

Mr. Fleishel: The Bernice & Northwestern and the Mill Creek & Little River Railway & Navigation Company.

Mr. Cowan: And that was because the timber was cut out, I assume, in the other cases?

Mr. Fleishel: No.

Mr. Cowan: Did they sell out to some other company?

Mr. Fleishel: Yes.

Mr. Cowan: What companies own them now?

Mr. Fleishel: The timber was sold at Cotton Valley, and the Dorcheat Company's timber was sold, surrounding that country, to the Porter-Wadley Lumber Company. The Brown Lumber Company is still operating and will be for a good many years.

Mr. Cowan: Does it operate the same railroad?

Mr. Fleishel: Yes.

Mr. Cowan: Does that railroad now get divisions?

1983 Mr. Fleishel: No.

Mr. Cowan: Do any of the railroads which are in this list of the Colonial Line now operate or get divisions?

Mr. Fleishel: Yes, the Bernice & Northwestern and the Mill Creek & Little River Railway & Navigation Company.

Mr. Cowan: The Mill Creek & Little River Railway & Navigation Company has been heard?

Mr. Fleishel: Both of them have been heard.

Mr. Cowan: Both of them have been heard?

Mr. Fleishel: Yes.

Mr. Cowan: At present there is no relation between them whatever?

Mr. Fleishel: No.

Mr. Cowan: That Colonial Company had no reference to the handling of the lumber, that is the selling of the lumber?

Mr. Fleishel: The Colonial Lumber & Timber Company sold the bulk of the lumber in those days. It was a wholesale company.

Mr. Cowan: And they practically handled the output as a common sales agent company?

Mr. Fleishel: Yes.

Mr. Cowan: Does that company still operate?

1984 Mr. Fleishel: I think it does. I am not at the head of it any longer.

(Witness excused.)

1985 Examiner Burchmore: Is the Antoine Valley Railroad before the Commission?

(No response.)

Examiner Burchmore: Is counsel present for the Memphis, Dallas & Gulf?

(No response.)

Examiner Burchmore: I may state into the record that we were informed yesterday that the Antoine Valley Railroad had been absorbed by the Memphis, Dallas & Gulf. I understand also that

the Memphis, Dallas & Gulf has absorbed the Ultima Thule, Arkadelphia & Mississippi Railway. Is the Mississippi Valley Railroad present?

(No response.)

Mr. Ziebold: Is that road in Arkansas, connecting the Iron Mountain?

Examiner Burchmore: No, that is the other company. I understand you represent the Mississippi Valley Railway.

Mr. Ziebold: Yes.

Examiner Burchmore: That will be called later in the morning. Is the Paragould & Memphis present? An appearance has been filed for that company, by Mr. John B. Daish.

1986 Is the Portland & Southeastern Railway present? A letter has been received from that company and will be filed of record. The letter indicates that they will not appear.

(The letter is as follows:)

DEC., 13, 1910.

Commissioner Harlan, Grunewald Hotel, New Orleans, La.

DEAR SIR: Owing to circumstances over which we have no control it will be impossible for us to be present at the meeting now being held by your Commission.

We own and operate, according to the enclosed schedule, a line of railroad from Portland, Arkansas, to Albritton, Arkansas. This road is standard gauge and has been constructed at great expense, as a permanent road. It now is serving the people and persons engaged in timber and lumber business along its right of way with freight facilities. Several manufacturing establishments being already in operation and quite a number have contracted for the construction of mills and factories. Others are seeking locations in the vicinity of our road for the purpose of engaging in the

1987 manufacturing business.

We have applied for a United States mail contract and the Government Inspector has examined the road and its equipment and facilities and has approved the application.

This road is not a logging road, but was constructed and equipped and is now being operated as a regular railroad engaged in the business of transporting freight and passengers to and from various points along its lines and thereby accommodating the general public with freight and passenger service.

We have a schedule of freight tariffs on file with your Commission and concur in and conform to the tariff of rates of the St. Louis, Iron Mountain & Southern Railroad with which we connect at the City of Portland, Arkansas, and we further concur in the rates as promulgated and published by the Railroad Commission of the State of Arkansas.

We are arranging to continue the extension of our road southwardly to connect with the Queen & Crescent at Delhi or at some other point, and also to extend the road to Lake Providence, on the

Mississippi River Financial arrangements are now under way looking towards the raising of funds for this purpose.

1988 In view of the foregoing, we beg to advise that the charter of our company was issued by the State of Arkansas and we are a railroad within the full intent and meaning of the statute authorizing the building and operation of railroads in the State of Arkansas.

For some time past we have been making, and are now making our regular monthly reports to your Commission at Washington, as required by the United States statutes.

In the event your Commission should decide that our company is not a common carrier we shall have gone to an unnecessary expense in constructing the road in such substantial manner as would conform to the essential elements of a common carrier. We, therefore, trust that you will make no decision unfavorably affecting our company or its property and which does not recognize it as a public carrier.

Should you desire further information in regard to it, we will hold ourselves in readiness to at any time furnish same.

The officers of the company desire to express their regrets in being unable to be present either in person or by their representative.

Very truly yours,

1989 PORTLAND SOUTHEASTERN RAILWAY COMPANY,
By SAM B. JEFFRIES,
Vice Pres. & General Counsel."

Examiner Burchmore: Is the Wilmar & Saline Valley present?

Mr. Riddell: Mr. Judson is coming here to represent that road. I understand his train has been delayed. He will make his appearance later.

Examiner Burchmore: It was agreed that that case would be deferred until noon, as I recall it.

The Lake Charles Railway & Navigation Company.

Mr. Porter: Counsel are not present for that road this morning.

Examiner Burchmore: Are there any other Iron Mountain connections present who have not been heard or called?

(No response.)

Examiner Burchmore: The Anderson & Saline River Railway.

(No response.)

Examiner Burchmore: The Blytheville, Leachville & Arkansas Southern. The attorney for that road is now trying a case before Examiner Boyle, and this case will be deferred until he concludes that examination.

Examiner Burchmore: The Bearden & Ouachita River
1990 Railroad.

Mr. Beland: I represent that road. Mr. Walter is counsel.

(At this point Mr. Luther M. Walter appeared.)

Mr. Walter: We are ready for that case and our principal witness will also be a witness in the Thornton & Alexandria.

Examiner Burchmore: We will proceed with the Bearden & Ouachita River.

The Delhi, Baskin & Southwestern Railway Company.

Mr. G. W. Smith: I appear for that road, and I will state that at this time the Delhi, Baskin & Southwestern withdraws objections to cancellations of these tariffs, reserving the right, of course, to make application to the Commision to have the same reinstated in the future.

Examiner Burchmore: The Delhi, Baskin & Southwestern connects with the Iron Mountain?

Mr. Smith: Yes, sir.

Examiner Burchmore: And I understand it is willing to relinquish divisions on lumber, but wishes to reserve the rigght later if they be established.

Mr. Smith: Yes, sir.

Examiner Burchmore: That statement will be noted of record without any understanding, however, that that right will be reserved to it.

1991 Mr. Smith: I understand that perfectly.

Bearden & Ouachita River Railroad Company.

J. H. BELAND was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: Mr. Beland, you are an officer of the Bearden & Ouachita River Railroad?

Mr. Beland: Yes, sir.

Examiner Burchmore: What is your office?

Mr. Beland: Vice-president and manager.

Examiner Burchmore: Our understanding is that the Bearden & Ouachita River Railroad is controlled by the Cotton Belt Lumber Company, through the ownership of capital stock. Is that correct?

Mr. Beland: The same stockholders are practically the same for the lumber company as for the railroad, but two separate corporations.

Examiner Burchmore: They are separate corporations, but the stock is held by the same people?

Mr. Beland: Practically so.

Examiner Burchmore: Do those stockholders hold their
1992 stock in the two companies in the same proportion?

Mr. Beland: Yes, sir.

Examiner Burchmore: Where are the mills of the Cotton Belt Lumber Company located with reference to this line?

Mr. Beland: At Best, Arkansas.

Examiner Burchmore: There is but one mill?

Mr. Beland: One mill.

Examiner Burchmore: Is there a saw mill and planing mill?

Mr. Beland: Saw mill and planing mill.

Examiner Burchmore: The plant is located directly on the rails of the St. Louis Southwestern Railway, as well as on the rails of the Bearden & Ouachita River Railroad?

Mr. Beland: It is not on the right of way of the railroad.

Examiner Burchmore: But it immediately adjoins the right of way?

Mr. Beland: It does.

Examiner Burchmore: The junction with the Cotton Belt is at Best, Arkansas?

Mr. Beland: Yes.

Examiner Burchmore: Does this railroad intersect any other common carrier railroad?

Mr. Beland: No.

1993 Examiner Burchmore: I understand that the Bearden & Ouachita River Railroad runs in a southerly direction from Best for a distance of about 15 miles to Caney.

Mr. Beland: 14 miles absolutely due south.

Examiner Burchmore: And at Caney a private tram road owned by the Cotton Belt Lumber Company extends on in a southerly direction for a number of miles?

Mr. Beland: Practically in all directions, east, west and south of Caney.

Examiner Burchmore: What is the mileage of that private tram road?

Mr. Beland: Well, from half a mile to eight miles; it varies, where the logging is done.

Mr. Beland: I believe we have about eight or nine miles of steel.

Examiner Burchmore: What is the character of the territory traversed by the Bearden & Ouachita River Railroad?

Mr. Beland: Pine flat land.

Examiner Burchmore: Are there any farms along the way?

Mr. Beland: Yes, sir.

1994 Examiner Burchmore: Would you describe it as being in part of a farming country?

Mr. Beland: It is.

Examiner Burchmore: How many farms are on or near the line?

Mr. Beland: For a distance out from Best to 12 miles there are numerous farms all through there.

Examiner Burchmore: Beyond that point it is exclusively a timber country?

Mr. Beland: A few scattered homesteads.

Examiner Burchmore: Are there any other saw mills or milling operations on or near the line of this railroad?

Mr. Beland: None.

Examiner Burchmore: Then the Cotton Belt Lumber Company owns the only saw mill that this road serves?

Mr. Beland: Yes, sir.

Examiner Burchmore: Do these farmers manufacture staves or other forest products?

Mr. Beland: Occasionally they do.

Examiner Burchmore: How much of the timber land or what

proportion of the land and stumpage rights in the territory served by this company is owned or controlled by the Cotton Belt Lumber Company?

1995 Mr. Beland: Well, from eight miles out from Best I suppose 75 per cent of the land within a mile or two of the railroad track is owned by the lumber company.

Examiner Burchmore: Practically all of the timber is owned?

Mr. Beland: Yes.

Examiner Burchmore: So that the 25 per cent of the land which is not owned by this lumber company is not timber land?

Mr. Beland: No, sir.

Examiner Burchmore: Was that land formerly held by the lumber company and then disposed of by other people?

Mr. Beland: Some of it has and some has been cleared for farming.

Examiner Burchmore: When was this railroad constructed, or when was the first construction?

Mr. Beland: I suppose 15 or 18 years ago.

Examiner Burchmore: At that time it was merely a logging road?

Mr. Beland: Yes, sir.

Examiner Burchmore: By whom was the railroad constructed?

Mr. Beland: The lumber company.

Examiner Burchmore: When was this mill at Best opened?

Mr. Beland: About 1885.

1996 Examiner Burchmore: Previous to the building of any part of the railroad?

Mr. Beland: Yes, sir.

Examiner Burchmore: Then I assume that this railroad was constructed originally, or the first construction of this railroad was for the purpose of serving the mill at Best with logs?

Mr. Beland: Yes, sir.

Examiner Burchmore: When was it incorporated as a railroad?

Mr. Beland: June, 1904.

Examiner Burchmore: Previous to that time had it received any divisions out of joint rates on lumber?

Mr. Beland: My recollection is that it had, although I am not sure.

Examiner Burchmore: It was at that time incorporated as a common carrier railroad under the laws of that state?

Mr. Beland: Yes, sir.

Examiner Burchmore: And it has since held itself out to the public as a common carrier?

Mr. Beland: We take care of any business that is offered us.

Examiner Burchmore: What was the purpose of the in-

1997 corporation of this railroad company?

Mr. Beland: It is my recollection that we could not receive a freight proportion unless we were an incorporated road.

Examiner Burchmore: What was the capital stock of this railroad company at the time of its organization?

Mr. Beland: $28,000.

Examiner Burchmore: Was that entire amount issued at the time?

Mr. Beland: Yes, sir.

Examiner Burchmore: What was the authorized capital stock at that time?

Mr. Beland: $28,000.

Examiner Burchmore: Has there been any capital stock issued since that time?

Mr. Beland: No.

Examiner Burchmore: So the present capital stock is $28,000?

Mr. Beland: Yes, sir.

Examiner Burchmore: Was that stock issued in the beginning for cash?

Mr. Beland: There was a dividend declared by the lumber
1998 company when the railroad was sold.

Examiner Burchmore: When the railroad was sold to the railroad comporation?

Mr. Beland: Yes, sir.

Examiner Burchmore: And that dividend, instead of being in cash, took the form of stock in the railroad company?

Mr. Beland: Practically so.

Examiner Burchmore: The present officers of the two companies, I understand, are identical.

Mr. Beland: About.

Examiner Burchmore: They have the same president?

Mr. Beland: Yes, sir.

Examiner Burchmore: The same vice-president?

Mr. Beland: Yes, sir.

Examiner Burchmore: The same secretary?

Mr. Beland: Yes, sir.

Examiner Burchmore: The same treasurer?

Mr. Beland: Yes, sir.

Examiner Burchmore: And do they have the same traffic manager?

Mr. Beland: Well, the secretary acts as traffic manager.

Examiner Burchmore: Of both companies?

1999 Mr. Beland: Of both companies.

Examiner Burchmore: Are there any officers of the railroad company who receive salaries from the railroad company?

Mr. Beland: Yes, sir.

Examiner Burchmore: What officers are those and what are their salaries?

Mr. Beland: I think the president receives about $50 a month. I receive $50. The secretary $50.

Examiner Burchmore: And the treasurer?

Mr. Beland: Nothing. Also the lumber company's woods foreman, about $60 of his salary is charged to the railroad. He acts as agent at Caney.

Examiner Burchmore: This woods foreman acts as station agent.

Mr. Beland: Yes, sir.

Examiner Burchmore: Does he perform a substantial service for which he should be paid $60 a month?

Mr. Beland: He performs a service of checking all the stock in and out that is shipped to the people about the country.

Examiner Burchmore: What proportion of his time is devoted to railroad service?

Mr. Beland: It would be hard to say.

2000 Examiner Burchmore: Half of his time?

Mr. Beland: No, not a third.

Examiner Burchmore: What salary does he receive from the lumber company?

Mr. Beland: $150 a month.

Examiner Burchmore: Then the salary is supposed to be divided between the two companies in the same proportion that his service is divided?

Mr. Beland: About.

Examiner Burchmore: Do these other officers of the railroad company render any actual service to the company for which they should receive these salaries?

Mr. Beland: Practically not.

Examiner Burchmore: They serve it only nominally?

Mr. Beland: Yes, sir.

Examiner Burchmore: And their salaries, I presume, are inconsiderable in comparison to their salaries from the lumber company?

Mr. Beland: Yes.

Examiner Burchmore: These paid officers are all stockholders in the lumber company with the exception perhaps of this woods foreman?

2001 Mr. Beland: Yes, they are all excepting the woods foreman.

Examiner Burchmore: The main line mileage of this railroad is 14 miles?

Mr. Beland: Yes sir.

Examiner Burchmore: How many miles of siding has it?

Mr. Beland: It has only a few hundred feet.

Examiner Burchmore: Is it standard or narrow gauge, and what is the weight of the rail?

Mr. Beland: Standard gauge 35 pound steel.

Examiner Burchmore: From whom was that steel obtained?

Mr. Beland: Some from the Illinois Steel Company and some from the Carnegie Steel Company.

Examiner Burchmore: None of that rail was furnished by the Cotton Belt System of railroad?

Mr. Beland: None.

Examiner Burchmore: What rate of freight did you pay to get that steel to Best, a special rate published by the carrier to take care of that particular movement or movements?

Mr. Beland: I think the last rails we purchased were all bought delivered from the steel company.

Examiner Burchmore: Does this company hold any trackage rights over the rails of other companies?

Mr. Beland: No, sir.

Examiner Burchmore: Do the engines of the Cotton Belt at any time pass over the rails of this company?

Mr. Beland: The engines of the Cotton Belt?

Examiner Burchmore: Yes.

Mr. Beland: No, sir; the Cotton Belt Lumber Company owns no engines.

Examiner Burchmore: I mean the Cotton Belt Railroad.

Mr. Beland: No.

Examiner Burchmore: You connect with the Cotton Belt Railroad?

Mr. Beland: Yes.

Examiner Burchmore: What is the nature of the construction of this railroad; is it well built with substantial bridges?

Mr. Beland: Yes, sir.

Examiner Burchmore: And easy grades?

Mr. Beland: Yes.

Examiner Burchmore: How is it ballasted?

Mr. Beland: It is simply surfaced with the earth thrown up from the dumps.

Examiner Burchmore: Is the character of the country such that cuts and fills are necessary?

Mr. Beland: Only slight.

Examiner Burchmore: Where necessary you have made such cuts and fills?

Mr. Beland: Yes, sir.

Examiner Burchmore: How many locomotives are there?

Mr. Beland: Three.

Examiner Burchmore: How many freight cars and what is their class?

Mr. Beland: We only have but one box car, a small box car with about 50 logging cars.

Examiner Burchmore: You call that box car a passenger car, do you not?

Mr. Beland: No.

Examiner Burchmore: Haven't you got a passenger car?

Mr. Beland: No.

Examiner Burchmore: You had one?

Mr. Beland: No, sir. You are mixing it up with the T. & A., I expect.

Examiner Burchmore: We have on our list one combination passenger and freight car.

Mr. Beland: No.

Examiner Burchmore: That is the box car to which you refer?

Mr. Beland: That is the box car. Well, it is used as a caboose, and also hauling the local stuff to and from Caney.

Examiner Burchmore: Is this locomotive equipped with safety devices?

Mr. Beland: No.

Examiner Burchmore: It has not air brakes or automatic couplers?

Mr. Beland: No.

Examiner Burchmore: How about the box car?

Mr. Beland: It is not.

Examiner Burchmore: Do not the safety appliance laws of Congress require your company to equip its cars and engines with air brakes and other safety devices?

Mr. Beland: I think so.

Examiner Burchmore: Why have you not complied with that requirement, if there is any special reason?

Mr. Beland: We have not done any interstate business.

Examiner Burchmore: You have not done an interstate business?

Mr. Beland: No, that is, outside of our logs.

Examiner Burchmore: Have you any station buildings?

2005 Mr. Beland: No, sir.

Examiner Burchmore: You have stations, however?

Mr. Beland: We have a sort of a warehouse that is owned by the Cotton Belt Lumber Company.

Examiner Burchmore: Where is that located?

Mr. Beland: Best.

Examiner Burchmore: Is the road equipped with telegraph or telephone service?

Mr. Beland: No.

Examiner Burchmore: How many track crews have you at work on the line?

Mr. Beland: We have one at present.

Examiner Burchmore: Sometimes have two or three?

Mr. Beland: Yes.

Examiner Burchmore: Do those track men at any time work on the private tram road of the Cotton Belt Lumber Company?

Mr. Beland: No, sir.

Examiner Burchmore: Is it not a fact that they keep that road in good repair and maintain it?

Mr. Beland: No, we have a separate section crew for the Bearden & Ouachita River.

Examiner Burchmore: Do not the same men comprise

2006 both crews?

Mr. Beland: No.

Examiner Burchmore: Have you any station employees other than this woods foreman to whom you refer?

Mr. Beland: No, sir.

Examiner Burchmore: How many train crews have you?

Mr. Beland: One.

Examiner Burchmore: How do you operate three locomotives with one train crew?

Mr. Beland: The train crew of the main line is charged to the railroad. The other crews are furnished by the lumber company on the spur.

Examiner Burchmore: Are there any employees in the general

offices of the railroad company other than the officers to whom reference has been made?

Mr. Beland: No.

Examiner Burchmore: Do the clerks of the lumber company perform any clerical work for the railroad company?

Mr. Beland: Only the secretary of the lumber company, as I mentioned a while ago.

Examiner Burchmore: Then there are no clerks of the lumber company who work for the railroad company?

2007 Mr. Beland: No.

Examiner Burchmore: And the railroad company has no clerks other than the gentlemen already mentioned?

Mr. Beland: That is right.

Examiner Burchmore: Do you run any passenger or mixed train?

Mr. Beland: We carry passengers, but no charge is made for the service.

Examiner Burchmore: Then you do not carry passengers for hire?

Mr. Beland: No.

Examiner Burchmore: Is the road incorporated merely as a freight carrier?

Mr. Beland: I could not say as to that.

Examiner Burchmore: Are the trains run on a regular schedule?

Mr. Beland: There is a trip made some time in the forenoon and sometime in the afternoon.

Examiner Burchmore: But there is no published time table?

Mr. Beland: No.

Examiner Burchmore: You do not carry any mail or express matter?

Mr. Beland: No, sir.

2008 Examiner Burchmore: Are you able to give the figures for your total freight tonnage for the last fiscal year, or for any other defined period of time?

Mr. Beland: I think the past fiscal year was something like 58,000 tons. I am not sure as to that.

Examiner Burchmore: That is a slight increase over the tonnage for the preceding year?

Mr. Beland: I do not know.

Examiner Burchmore: It seems to be, if the figures we have for the previous year are correct and your figures also are correct. About 95 per cent of that tonnage was lumber, was it not?

Mr. Beland: Logs.

Examiner Burchmore: What other commodities did you handle?

Mr. Beland: An occasional car of cotton, fertilizer, feed and some groceries, local.

Examiner Burchmore: Does the Cotton Belt Lumber Company have any commissaries along the line of this road?

Mr. Beland: Only at Best.

Examiner Burchmore: Is that commissary located adjacent to the right of way of the St. Louis Southwestern Railroad?

Mr. Beland: Yes, sir.

2009 Examiner Burchmore: Does any of the freight intended for that commissary ever pass over the rails of the Bearden & Ouachita River Railroad for any distance?

Mr. Beland: No.

Examiner Burchmore: So this railroad is never interested in any way in traffic for the commissary?

Mr. Beland: No.

Examiner Burchmore: Does it handle any other traffic of any kind at any time for the lumber company?

Mr. Beland: Groceries, and such as that; that go to our log camps.

Examiner Burchmore: Do you charge any freight for that?

Mr. Beland: There is a charge made.

Examiner Burchmore: What is that charge, your regular local freight charge?

Mr. Beland: Yes, sir, I think it is.

Examiner Burchmore: It is the Arkansas Commission tariff, as applied to your road?

Mr. Beland: I think so.

Examiner Burchmore: You handle no lumber or forest products for shippers other than the Cotton Belt Lumber Company?

Mr. Beland: An occasional car of staves and cotton seeds.

2010 Examiner Burchmore: I asked with respect to forest products. What is the volume of staves which moves during the year, two or three carloads?

Mr. Beland: Yes, sir.

Examiner Burchmore: You did not have as many as that last year, did you?

Mr. Beland: I don't remember.

Examiner Burchmore: Will you furnish for the information of the Commission a statement for the year ending June 30, 1910, showing the total tonnage of logs handled for the account of the Cotton Belt Lumber Company, showing separately the total amount of merchandise or other traffic handled for the same company, showing also separately the total traffic handled for persons or firms in whom the Cotton Belt Lumber Company has no interest? You may subdivide the latter figure in any manner you choose, to show the total of staves and cotton, if that is desired, and give also the revenue on each class of this traffic. Can you prepare and furnish such a statement to the Commission?

Mr. Beland: Can we furnish that?

Examiner Burchmore: Yes.

Mr. Beland: I could not right here.

2011 Examiner Burchmore: I mean within the next fortnight, or so.

Mr. Beland: I think so.

Examiner Burchmore: We request that such a statement be forwarded to the Commission for filing in this record, and if possible, I would request that copies of all these statements be furnished to counsel for the trunk line with which the company connects and also to Judge Cowan, representing the intervenors.

Mr. Cowan: I make the suggestion, Mr. Examiner, that a formal request embodying what you have just said, be handed to all of the various tap lines who have been examined and who will be examined, and that when such a statement is furnished, that inasmuch as they are very short, as a general proposition, only covering a page or such a matter, that the Commission make an exception of the rule of not copying the exhibits, but let them be copied in the record. The difficulty is to ever find it when you go to look up the record, unless it appears in connection with the testimony.

Examiner Burchmore: It will be impossible to have these statements copied into the record at the point where the transcript of the witnesses' testimony appears, but your request will be
2012 noted on the record, and I think the Commission will make a written request on all the tap lines for such statement.

Mr. Thurmond: Where shall we send those?

Examiner Burchmore: They should be addressed to the secretary of the Interstate Commerce Commission at Washington, and reference should be made to this case. You have no published passenger farse?

Mr. Beland: No.

Examiner Burchmore: Do you file with the Commission any tariffs naming local rates on your line on logs or commodities or classes?

Mr. Beland: Yes, sir.

Examiner Burchmore: Those rates are applicable to interstate movements in the absence of joint through rates?

Mr. Beland: I think it only applies on lumber.

Examiner Burchmore: You have not any local class tariff?

Mr. Beland: No, sir.

Examiner Burchmore: Is your company a party to joint through class rates published by the St. Louis Southwestern Railroad, and applying from interstate points to points on your line?

2013 Mr. Beland: Yes, sir.

Examiner Burchmore: What is your division of those joint rates on class freight?

Mr. Beland: One to two and a half cents.

Examiner Burchmore: Is that division adequate?

Mr. Beland: We do not think so.

Examiner Burchmore: What stations are there on your line other than Best?

Mr. Beland: Caney; that is the end of the road.

Examiner Burchmore: What are the joint rates on class freight from Caney to interstate destinations; that is to say, are they the same as the local rates published by the St. Louis Southwestern from its station at Best, or are they higher than those rates?

Mr. Beland: The same.

Examiner Burchmore: I refer now to rates on class freight, merchandise.

Mr. Beland: We have no through rates at all.

Examiner Burchmore: You have no joint rates on merchandise or class freight?

Mr. Beland: No.

Examiner Burchmore: You just said you did have, as I
2014 understood you?

Mr. Beland: Only on lumber, carloads.

Examiner Burchmore: You have no joint rates on anything except lumber or logs?

Mr. Beland: No.

Examiner Burchmore: How do you move these shipments of staves that you have; are they shipped locally to Best?

Mr. Beland: Locally to Best. We charge the Arkansas distance tariff.

Examiner Burchmore: They are never billed to St. Louis or from St. Louis?

Mr. Beland: No.

Examiner Burchmore: You sometimes have movements of merchandise, do you not, over your line from Best to Caney which have originated at St. Louis or some other interstate point, and which are tendered to you at Best by the St. Louis Southwestern agent?

Mr. Beland: All stuff that has been shipped over our road has been billed to Best and rebilled from Best over our road, charging the local rate, the Court tariff.

Examiner Burchmore: It may be rebilled at Best, but as a matter of fact, who gives you the goods, the agent of the St.
2015 Louis Southwestern Railroad?

Mr. Beland: The party to whom it is consigned.

Examiner Burchmore: Nothing is handled, then, from interstate points to points on your line under a through arrangement without the intervention of the shipper's hand at Best?

Mr. Beland: That is right.

Examiner Burchmore: With respect to lumber, have you any joint through rates on forest products from Caney to interstate destinations in connection with the St. Louis Southwestern Railroad?

Mr. Beland: Not from Caney.

Examiner Burchmore: Then you have no joint through rates from Caney of any kind?

Mr. Beland: Unless it would be from the lumber. As I understand, that is a milling in transit proposition.

Examiner Burchmore: That is what I am trying to get at. Have you any joint through rates on lumber or forest products from Caney to destination?

Mr. Beland: This division or proportion we are getting, I do not know whether that applies from Caney or Best.

Examiner Burchmore: Have you a milling in transit arrangement on your line?

2016 Mr. Beland: Yes, sir, we suppose that proportion is a milling in transit.

Examiner Burchmore: Can you have milling in transit without having a joint rate into that place?

Mr. Walter: Is not that tariff on file, and would not that be the best answer?

Examiner Burchmore: Judge Cowan and the other gentlemen have not access to it, and we want to get it in the record. Are you informed as to it, Mr. Walter?

Mr. Walter: Not as to that particular tariff.

Examiner Burchmore: I think it is of some importance as to whether they apply from Caney or only apply from Best. Have you the tariff with you?

Mr. Beland: No, I have not.

Mr. Walter: The Cotton Belt tariff, as I understand, provides for milling in transit from this point of origin, and the shipping point at Best.

Examiner Burchmore: Do the rates on the Cotton Belt apply in any case from Caney?

Mr. Walter: It applies on any logs originating on that line, converted into lumber at Best, from any point.

Examiner Burchmore: I presume that is correct, but that
2017 statement may be verified by a reference to the tariffs on file with the Commission.

Mr. Walter: Yes.

Examiner Burchmore: What is the amount of the divisions which this company receives on lumber handled on joint rates with the St. Louis Southwestern Railway?

Mr. Beland: One to two and one-half cents.

Examiner Burchmore: Is two and a half cents the highest division you have ever received on lumber?

Mr. Beland: Yes, sir.

Examiner Burchmore: How long have you been receiving as much as two and a half cents per hundred pounds?

Mr. Beland: I wish to state that at one time we did receive three cents on shipments to Texas local points: that is, on the Cotton Belt Railroad.

Examiner Burchmore: I thought so. When was that three cent division withdrawn or reduced?

Mr. Beland: I think something like a year ago; I am not sure.

Examiner Burchmore: Was there not a time when you received four cents on certain traffic?

Mr. Beland: No, sir, not that I know of.

2018 Examiner Burchmore: You would know if you had received such division?

Mr. Beland: I think so.

Examiner Burchmore: You receive a division of from one to two and a half cents at the present time, and formerly you received as much as three cents on certain traffic. What service do you render for that division?

Mr. Beland: The hauling of the logs from the woods to Caney; you might say delivering the logs to the mill.

Examiner Burchmore: And that is all?

(No response.)

Examiner Burchmore: As to your method of handling logs, and lumber, reference has been made to some private spur tracks or tram lines belonging to the Cotton Belt Lumber Company up in the woods. Who owns the steel rail in those tracks?

Mr. Beland: The lumber company.

Examiner Burchmore: Did they purchase that rail from this lumber company?

Mr. Beland: No, sir. They reserved the rail. What rail was bought for the lumber company was charged to the lumber company and paid for by them.

2019 Examiner Burchmore: But all the rail was bought at one time?

Mr. Beland: Not all of it. It was bought from time to time.

Examiner Burchmore: And was the price paid by the lumber company for its rail the same as the price paid by the railroad company for its rail?

Mr. Beland: Different markets——

Examiner Burchmore: When purchased at the same time?

Mr. Beland: There was never any bought at the same time for both companies.

Examiner Burchmore: How did they reserve certain of the rail for the lumber company? Did the purchasing agent of the lumber company do the purchasing for the railroad company?

Mr. Beland: Yes, sir.

Examiner Burchmore: Does the lumber company get a commission on all those purchases?

Mr. Beland: No, sir.

Examiner Burchmore: They charge them over to the railroad company at cost?

Mr. Beland: Yes, sir.

Examiner Burchmore: The history of those transactions is

2020 all shown in the books of the lumber company as well as the railroad company?

Mr. Beland: Yes, sir, all in the lumber company, they are. We have purchased no rail for three or four years.

Examiner Burchmore: Does the lumber company own any locomotives?

Mr. Beland: No.

Examiner Burchmore: It leases two locomotives from the railroad company?

Mr. Beland: Yes, sir.

Examiner Burchmore: What is the compensation paid for those locomotives?

Mr. Beland: The railroad company owns all of the locomotives. They are not leased by the lumber company. If I said that I was mistaken.

Examiner Burchmore: You said they owned three locomotives.

Mr. Beland: The railroad company.

Examiner Burchmore: You said they only had one train crew.

Mr. Beland: Yes, sir.

Examiner Burchmore: How do they operate three with one train crew?

Mr. Beland: The locomotive is owned by the railroad, and
2021 the train crews on two of the locomotives are the lumber company's employees.

Examiner Burchmore: If the lumber company hires the train crew and the locomotives that those crews operate are the property of the railroad company, there must be some arrangement between the two as to those locomotives. Now what is it?

Mr. Beland: Well, there is an agreement of some kind. I think a copy of that is filed with the Commission.

Examiner Burchmore: I do not seem to find a copy of it in our files here this morning. What is the compensation that the railroad company receives for the use of its property? Is it a charge on the logs or a payment from it?

Mr. Beland: It is a small charge on the logs.

Examiner Burchmore: Then that compensation takes the form of a charge on the logs, and not a charge per day for the use of the locomotives?

Mr. Beland: Yes, sir.

Examiner Burchmore: Who furnishes the fuel that those locomotives burn?

Mr. Beland: The lumber company furnishes the fuel for the switch engine, and the railroad company furnishes the fuel on the main line.

2022 Examiner Burchmore: For two locomotives?

Mr. Beland: One on the main line and two in the woods; those two in the woods are not always in operation.

Examiner Burchmore: When in operation they burn wood furnished by the lumber company?

Mr. Beland: Yes, sir.

Examiner Burchmore: And the one on the main line burns fuel furnished by the railroad company?

Mr. Beland: Yes, sir.

Examiner Burchmore: I assume the logs are loaded on the cars by lumber company employees in the woods?

Mr. Beland: Yes, sir.

Examiner Burchmore: The crew employed by the lumber company takes those cars from the place where they are loaded down to the connection of the main line of the railroad?

Mr. Beland: Yes, sir.

Examiner Burchmore: What charge passes from the lumber company to the railroad company in connection with that much of the service, any charge?

Mr. Beland: Ten and one-half cents a ton.

Examiner Burchmore: Does that cover the logs up to the main line or all the way to the mill?

2023 Mr. Beland: That is the entire charge.

Examiner Burchmore: All the way to the mill?

Mr. Beland: Yes, sir.

Examiner Burchmore: Then the locomotive operated by the rail-

road company takes the logs on the logging cars from the point where they are loaded, from a point adjacent to the main line, and takes them to the mill?

Mr. Beland: Yes, sir.

Examiner Burchmore: And the entire charge received by the railroad company from the lumber company on the logs moving into the mill is ten and one-half cents a ton?

Mr. Beland: Yes, sir.

Examiner Burchmore: Is that on actual weight or estimated weight basis?

Mr. Beland: Estimated.

Examiner Burchmore: What is that estimate?

Mr. Beland: I think it is 8,000 pounds per thousand feet of logs.

Examiner Burchmore: What is the compensation paid for a logging car?

Mr. Beland: I could not tell.

Examiner Burchmore: Who unloads the logs at the mill?

2024 Mr. Beland: The train crew.

Examiner Burchmore: Does the railroad company receive any additional compensation for the labor of the train crew in unloading the logs at the mill?

Mr. Beland: None.

Examiner Burchmore: Now, we have disposed of the question of logs into the mill. Now take up lumber moving out of the mill. Who furnishes the empty cars for lumber movements?

Mr. Beland: The Cotton Belt Railroad.

Examiner Burchmore: Who places those empty cars at the mill?

Mr. Beland: The logging road does, and sometimes the railroad, the trunk line; principally by the trunk line.

Examiner Burchmore: Now the mill is served by a private side track or other side track directly connected with the St. Louis Southwestern, is it not?

Mr. Beland: Yes, sir.

Examiner Burchmore: That side track from the mill to the St. Louis Southwestern was laid by the latter corporation, was it not?

Mr. Beland: Yes, sir.

Examiner Burchmore: Is there any contract or form of

2025 side track agreement in existence between the lumber company and the St. Louis Southwestern covering that side track?

Mr. Beland: No.

Examiner Burchmore: When was the side track put in?

Mr. Beland: Twenty-six years ago, I guess. It has been changed from time to time.

Examiner Burchmore: Well, it was originally put in under a side track agreement, was it not?

Mr. Beland: It was.

Examiner Burchmore: And partly paid for by the railroad company?

Mr. Beland: I think they furnished the rails only.

Examiner Burchmore: That was under this usual refund arrangement of $2.00 a car, or something of that kind?

Mr. Beland: No, we never received any such refund.

Examiner Burchmore: Is it not a fact that under that original private side track agreement with the St. Louis Southwestern Railroad Company, the title to the land on which that side track was laid is now invested in the St. Louis Southwestern Railroad Company?

Mr. Beland: The lumber company's loading platform is on its own line, but the rails in the side track are on the Cotton Belt
2026 Railroad.

Examiner Burchmore: How often does it happen as a matter of fact that the locomotive of the Bearden & Ouachita River Railroad actually hauls the empty car up to this loading track? Is it not very unusual?

Mr. Beland: Not very.

Examiner Burchmore: Well once a week.

Mr. Beland: I presume so.

Examiner Burchmore: And they only place one or two cars at a time for loading?

Mr. Beland: Whatever might be there to load that they can handle.

Examiner Burchmore: When the car has been loaded with lumber it is moved over to the St. Louis Southwestern Railroad's main line by the locomotive of the St. Louis Southwestern or the locomotive of this railroad in the same way that the empty car is moved?

Mr. Beland: No, sir.

Examiner Burchmore: How is it handled?

Mr. Beland: It is handled direct by the St. Louis Southwestern. They go in on the side track and pull that car out.

Examiner Burchmore: Is there any bill of lading or way
2027 bill issued to cover the movement of the logs from the woods into the mill?

Mr. Beland: No, sir.

Examiner Burchmore: I presume that the conductor of your logging train makes a report to the mill superintendent upon his arrival as to the quantity of logs he has brought in?

Mr. Beland: Yes, sir.

Examiner Burchmore: Is that report made on a piece of paper or printed form?

Mr. Beland: He copies it on his time book. He keeps the train crew's time; he keeps a record of the cars he pulls in each day on that book, and as he turns in his time, he turns that in.

Examiner Burchmore: When the lumber is shipped out to interstate destinations who issues the bill of lading covering that car?

Mr. Beland: Our man.

Examiner Burchmore: Your agent?

Mr. Beland: Yes, sir.

Examiner Burchmore: He executes that bill of lading?

Mr. Beland: Yes, sir.

Examiner Burchmore: What is the point of origin as
2028 shown on that bill of lading?

Mr. Beland: Best.

Examiner Burchmore: Best, meaning the station of that name on the Bearden & Ouachita River Railroad?

Mr. Beland: Yes.

Examiner Burchmore: And not the station by that name on the St. Louis Southwestern. Does your agent also issue a through way bill?

Mr. Beland: I think he does.

Examiner Burchmore: Are you sure about that?

Mr. Beland: No, I am not.

Examiner Burchmore: Is it not a fact that it is only in rare instances that he does issue such a through way bill?

Mr. Beland: I feel quite sure that he issues the way bill.

Examiner Burchmore: And that way bill, when issued, corresponds to the bill of lading?

Mr. Beland: Yes, sir.

Examiner Burchmore: Are the divisions shown on the face of that way bill?

Mr. Beland: No, sir.

Examiner Burchmore: Your settlement with the St. Louis Southwestern Railroad is a monthly interline settlement?

2029 Mr. Beland: Yes, sir.

Examiner Burchmore: How does this railroad company make its collections from the Cotton Belt Lumber Company for the services rendered? Monthly?

Mr. Beland: I think it is charged monthly.

Examiner Burchmore: Is that a bookkeeping settlement or an actual check or cash settlement?

Mr. Beland: Bookkeeping.

Examiner Burchmore: Is the cash of the two companies mingled?

Mr. Beland: No.

Examiner Burchmore: The railroad has a separate bank account?

Mr. Beland: It has.

Examiner Burchmore: Well, is there any cash in that bank account other than the small amounts received from foreign shippers? You do not carry in that bank account any cash from checks received from the lumber company, do you.

Mr. Beland: Whatever source we receive any cash from, it is credited to this railroad account and is carried in the bank.

Examiner Burchmore: As a matter of fact, do you receive any cash or any considerable amount of cash from the Cotton

2030 Belt Lumber Company which you could deposit in the bank? Are not these payments all bookkeeping payments?

Mr. Beland: If the railroad company has anything due from the Cotton Belt Lumber Company it is paid by the Cotton Belt Lumber Company with a check, but no actual cash is handled.

Examiner Burchmore. But as a matter of fact the lumber company issues very few checks to the railroad company?

Mr. Beland: Very few.

Examiner Burchmore: Those checks are not of large amount?

Mr. Beland: No.

Examiner Burchmore: Does this railroad company have any bonds?

Mr. Beland: No, sir.

Examiner Burchmore: Has it any indebtedness aside from current liabilities?

Mr. Beland: No, sir.

Examiner Burchmore: Its total capital stock is $20,000?

Mr. Beland: Yes, sir.

Examiner Burchmore: It constructed 14 miles of railroad and bought all the equipment with a capitalization of $28,000?

Mr. Beland: There has never been any dividends de-
2031 clared and what profits have been made have been spent in the betterment of the road or equipment.

Examiner Burchmore: There have never been any dividends?

Mr. Beland: No.

Examiner Burchmore: The net revenues are all put into additions and betterments?

Mr. Beland: And improvements.

Examiner Burchmore: Have you any surplus at the present time?

Mr. Beland: I think about $3,000.

Examiner Burchmore: And it is proposed to devote that to additions and betterments?

Mr. Beland: I do not know yet.

Examiner Burchmore: You have not contemplated a cash dividend, have you?

Mr. Beland: It is possible.

Examiner Burchmore: Are the accounts of the railroad company kept in the manner prescribed by the Interstate Commerce Commission?

Mr. Beland: Yes.

Examiner Burchmore: Who keeps those accounts?

Mr. Beland: The secretary.

2032 Examiner Burchmore: You are the secretary?

Mr. Beland: No, sir.

Examiner Burchmore: Do you file annual reports with the Interstate Commerce Commission?

Mr. Beland: Yes, sir.

Examiner Burchmore: When did you file your first annual report?

Mr. Beland: The first annual report?

Examiner Burchmore: Yes.

Mr. Beland: Two or three years ago.

Examiner Burchmore: What is the valuation of this road, including equipment?

Mr. Beland: I suppose it is worth $35,000.

Examiner Burchmore: Including equipment?

Mr. Beland: Yes, sir.

Examiner Burchmore: Then if your capital stock is $28,000 and the total value of the road with equipment is $35,000, do we under-

stand you have only paid the difference, or $7,000 into additions and betterments out of your net profits?

Mr. Beland: Yes, sir.

Examiner Burchmore: Do the officers of this railroad company hold any free interstate passes from other railroad compa-
2033 nies, as officers?

Mr. Beland: I do.

Examiner Burchmore: Does any other officer hold such transportation?

Mr. Beland: No, sir.

Examiner Burchmore: How many annual passes have you; one on the Cotton Belt?

Mr. Beland: One on the Cotton Belt and one on the Burlington.

Examiner Burchmore: Is that all?

Mr. Beland: That is all that I remember. There may be two or three logging roads or tap lines.

Examiner Burchmore: Do you actually use those passes?

Mr. Beland: Occasionally.

Examiner Burchmore: Well, you never pay fares, do you, when traveling on those railroads?

Mr. Beland: No, sir, not when I have the free transportation.

Examiner Burchmore: And you do not forget to take your pass with you?

Mr. Beland: I try not to.

Examiner Burchmore: Mr. Walter, have you any ques-
2034 tions?

Mr. Walter: The operation of the railroad is entirely separate and distinct from the lumber company, is it?

Mr. Beland: Yes, sir.

Mr. Walter: Those cars, with the exception of the caboose and with the exception of the locomotive, are all standard logging cars, eight wheels?

Mr. Beland: Yes, sir.

Mr. Walter: And are not required by the Safety Appliance Law to be equipped?

Mr. Beland: We understand not.

Mr. Walter: About how many people live within the territory that is reached by your line who would use your railroad if they used any?

Mr. Beland: I suppose there are four or five hundred people.

Mr. Walter: All the supplies they receive that are carried over a railroad, go over your line?

Mr. Beland: No, sir.

Mr. Walter: How do they get them out there?

Mr. Beland: Well, some of them trade at Hampton and wagon the stuff to their homes.

Mr. Walter: Anything that goes out over the railroad goes
2035 out over your line?

Mr. Beland: What?

Mr. Walter: Anything that goes out to the immediate territory served by your line is handled by your railroad?

Mr. Beland: It is.

Mr. Walter: And all the products of the farm that they ship out over a railroad go over your line?

Mr. Beland: We move very little stuff of that nature.

Mr. Walter: The cotton and cotton seed that is shipped by them delivered to you at Caney on your line, is carried by you in?

Mr. Beland: We handle a few cars.

Mr. Walter: You do not turn down any?

Mr. Beland: No.

Mr. Walter: You handle it for anybody that brings it to you?

Mr. Beland: Yes, sir.

Mr. Walter. You have a joint rate only on forest products?

Mr. Beland: That is all.

Mr. Walter: You have your local class rates on classes that are carried?

Mr. Beland: Yes, sir.

Mr. Walter: That one and one-half cents you speak of is
2036 the division on lumber; it is not the class rate?

Mr. Beland: Lumber only.

Mr. Walter: You charge the local rate on everything else?

Mr. Beland: Yes, sir.

Mr. Walter: As a matter of fact, there are some staves or stave bolts hauled by you?

Mr. Beland: Yes, sir.

Mr. Walter: On all freight handled by you there is a tariff charge?

Mr. Beland: Yes, sir.

Examiner Burchmore: That tariff of local charges is not filed with the Interstate Commerce Commission, I understood you to say.

Mr. Walter: Do you know whether or not the so-called Court tariff of the Arkansas Commission is on file with the Interstate Commerce Commission?

Mr. Beland: I could not say as to that.

Mr. Walter: As a matter of fact, I understand it is on file with the Commission.

Examiner Burchmore: Has it been adopted by this company?

Mr. Beland: We use the Arkansas Court tariff.

2037 Mr. Walter: Has that been adopted by your company?

Mr. Beland: Yes, sir.

Mr. Walter: As I understand it, the railroad company, the Bearden & Ouachita River, hauls all the logs from Caney to the mill?

Mr. Beland: Yes, sir.

Mr. Walter: The lumber company only collects those logs in the woods and assembles them at Caney?

Mr. Beland: Out on the spurs from Caney.

Mr. Walter: And the railroad takes those intrain loads down to the mill?

Mr. Beland: Yes, sir.

Mr. Walter: And takes the empties back to these various spurs?

Mr. Beland: Yes, sir.

Mr. Walter: Do you make reports to the Arkansas Commission; have you had occasion to be requested to make reports without having made them?

Mr. Beland: We answer everything they ask for.

Mr. Walter: You comply with the regulations of the Commission so far as you understand them to apply to your road?

Mr. Beland: Yes, sir.

2038 Mr. Walter: As to the transactions between you and the lumber company, the same methods of taking care of that is had as if it was any other concern?

Mr. Beland: Yes, sir.

Mr. Walter: The fact that there happens to be joint interests or people interested both in the lumber company and railroad company does not affect the manner in which you take care of your railroad business?

Mr. Beland: No.

Mr. Walter: That is all.

Examiner Burchmore: Judge Cowan, have you any questions?

Mr. Cowan: Nothing.

Mr. Walter: This same witness is also in the Thornton & Alexandria.

Examiner Burchmore: Just one more question. The Commission has a report rendered in the summer of 1909 by one of its accounting examiners who went over your property and the accounts of your company. Now, assuming that that report correctly describes the methods and practices of your railroad as they were at that date, has there been any subsequent change of a substantial nature in your methods and practices of conducting transportation that would render such a report inaccurate at the present time, as

2039 describing your present situation?

Mr. Beland: Not that I know of.

Examiner Burchmore: You do business in about the same manner you did at that time?

Mr. Beland: Yes, sir.

Examiner Burchmore: Of course any little details of unimportant matters may have changed?

Mr. Beland: Yes, sir.

Examiner Burchmore: I merely asked the question to know whether our report is obsolete or in the main accurate. This witness it is understood also wishes to testify in the Thornton & Alexandria Railway. That railway is the last one listed as a Cotton Belt System connection. Is there any objection on the part of the other Cotton Belt System connections to taking up that railroad at this time?

Mr. Riddell: I agreed with Mr. Stocking, who left here, to represent one of those roads, and we would not like to waive any rights we have.

Examiner Burchmore: What road is that?

Mr. Riddell: The Saline River Railroad.

Examiner Burchmore: Do you object to this company be-
2040 ing heard at this time instead of immeditely after your company?

Mr. Riddell: We would like to get ourselves before the Commission as soon as possible.

Examiner Burchmore: It would simply mean a postponement of half an hour, or so.

Mr. Riddell: All right.

Mr. Greer: In what manner are you going to take those up, in alphabetical order?

Examiner Burchmore: As announced by the Commissioner two or three days ago, we are taking up in alphabetical order, or substantially in alphabetical order, the connections of these system. and we are now dealing with roads that are connected with the Cotton Belt.

Mr. Greer: Regardless of states?

Examiner Burchmore: Yes.

Mr. Greer: There are a good many in Texas on the Cotton Belt that are earlier than that.

Examiner Burchmore: The Angeline & Neches River Railroad.

2041 *Angelina & Neches River Railroad.*

ELI WIENER, was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: Are you an officer of the Angelina & Neches River Railroad?

Mr. Weiner: I am secretary and treasurer and auditor.

Examiner Burchmore: Are you also an officer of the Angelina County Lumber Company?

Mr. Wiener: Secretary and treasurer.

Examiner Burchmore: I understand that the Angelina & Neches River Railroad is controlled by the Angelina County Lumber Company through the ownership of the entire capital stock?

Mr. Weiner: The stockholders of the Angelina County Lumber Company own the stock of the Angelina & Neches River Railroad in substantially the same proportion, about ninety-five per cent of the stockholders of the lumber company own about ninety-eight per cent of the stock of the railroad company.

Examiner Burchmore: And five per cent in the case of one com
pany and two per cent in the other is in the hands of the
2042 directors?

Mr. Wiener: In the lumber company it is not; in the railroad company it is.

Examiner Burchmore: Who are these stockkholders, the five per cent, in the lumber company?

Mr. Wiener: One of them is a son of the president of the company and the other one is a sister of mine.

Examiner Burchmore: Then they are in the family, the principal ones?

Mr. Wiener: Yes, sir; as I say, the ownership is substantially the same.

Examiner Burchmore: The Angelina County Lumber Company has but one saw mill?

Mr. Wiener: But one.

Examiner Burchmore: A planing mill in connection therewith.

Mr. Wiener: A planing mill in connection therewith.

Examiner Burchmore: I understand that this railroad connects with the Houston East and West Texas at Prosser, Texas?

Mr. Wiener: That is correct.

Examiner Burchmore: And with the St. Louis, Southwestern Railway of Texas at Keltys, Texas?

2043 Mr. Wiener: That is correct.

Examiner Burchmore: Are those the two terminii of the line?

Mr. Wiener: No, the present terminus of the railroad is Naclina, which is in Nacogdoches County, 19.98 miles from Keltys.

Examiner Burchmore: And 19.89 miles is the total main line mileage of the road?

Mr. Wiener: Is the total main mileage of the road.

Examiner Burchmore: It also has about one mile of side tracks.

Mr. Wiener: It has, on June 30, 1910, 2.43 miles I think is the exact figure. Just one second, I will give them to you exact. (Witness refers to papers.) 2.43 miles.

Examiner Burchmore: Now, the mill of the Angelina County Lumber Company is located at the junction with the Cotton Belt system?

Mr. Wiener: Located at Keltys, yes, sir.

Examiner Burchmore: And it joins the right of way of that company as well as being on the line of the rails of the Angelina?

Mr. Wiener: The saw mill is situated some little distance
2044 from the Cotton Belt right of way. The planing mill is off the right of way, but very close to it.

Examiner Burchmore: Most of the lumber from that mill is shipped out of the planing mill?

Mr. Wiener: The majority of it is, yes, sir.

Examiner Burchmore: The loading platform near this planing mill is reached by the private side track directly connecting with the Cotton Belt, is it not?

Mr. Wiener: The Cotton Belt has connection with that side track.

Examiner Burchmore: It can reach that side track without actually moving over the rails of the Angelina & Neches River Railroad?

Mr. Wiener: It can; yes, sir.

Examiner Burchmore: And does?

Mr. Wiener: It does in some instances.

Examiner Burchmore: The distance from this mill plant to the junction with the Houston East & West Texas is about three miles?

Mr. Wiener: Approximately; three miles.

Examiner Burchmore: Does any considerable volume of lumber move out over the Houston East & West Texas?

2045 Mr. Wiener: During this year there has been a considerable volume, according to car supply. There have been some months when the volume has been fairly heavy, and for the last month or two the Southern Pacific system seem to have been short of empty cars and the tonnage has not been so heavy that way.

Examiner Burchmore: Are there any other saw mill operations on this line of railroad?

Mr. Wiener: None.

Examiner Burchmore: What is the character of the country through which it runs, is it a timber country?

Mr. Wiener: The twenty miles of road is through a section from which the larger portion of the pine timber has been cut in the past.

Examiner Burchmore: Was that land formerly owned by this lumber company?

Mr. Wiener: Some portions of it, a very small percentage of the entire twenty miles.

Examiner Burchmore: But this lumber company had the timber rights on most of that land, did it not?

Mr. Wiener: On the greater portion of it; yes; on a good deal of it, there have been some portions of it that have been
2046 cut by other mills, but nearly all has been cut by this lumber company, and there is a good deal of it in cultivation now.

Examiner Burchmore: When was the mill at Keltys opened for operation?

Mr. Wiener: I have been there since 1890; I think the mill was built early in the 80's, I do not know exactly, it was before my time.

Examiner Burchmore: When was this railroad first begun?

Mr. Wiener: That I cannot say. The Angelina & Neches River Railroad dates to 1900.

Examiner Burchmore: What was the date of the incorporation of this company?

Mr. Wiener: In August, 1900.

Examiner Burchmore: There had been a railroad there previous to that time?

Mr. Wiener: Yes, there was a railroad there previous to that time.

Examiner Burchmore: That railroad was originally built, was it not, in order to haul logs to this saw mill in the beginning?

Mr. Wiener: Yes, sir; it was originally built as a logging
2047 railroad.

Examiner Burchmore: And what was the length of the line in 1900?

Mr. Wiener: Approximately ten miles.

Examiner Burchmore: Then it ran from Keltys, crossing the Houston East & West Texas and on into some woods?

Mr. Wiener: Well, it ran to—I do not know whether the Texas & New Orleans was there at the time it ran to the point where the

Texas & New Orleans now is; I do not know whether the Texas & New Orleans was built there or not.

Examiner Burchmore: This railroad crosses or joins the Texas & New Orleans?

Mr. Wiener: Crosses the T. & N. O. approximately nine miles from Keltys.

Examiner Burchmore: What is the name of that junction?

Mr. Wiener: McCoy.

Examiner Burchmore: Do you interchange any lumber traffic with the T. & N. O.?

Mr. Wiener: We do not.

Examiner Burchmore: Then that is merely a crossing and not an interchange point?

Mr. Wiener: The T. & N. O., and the H. E. & W. T. inter-
2048 ests are practically identical, and for that reason we have *en*ver interchanged with them.

Examiner Burchmore: No particular object in interchanging with them?

Mr. Wiener: They reach the same territory that we can reach by the T. & N. O.

Examiner Burchmore: It simply involves a longer haul without opening up any new territory or givng you any better rate?

Mr. Wiener: That is correct.

Examiner Burchmore: When was the present main line approximately twenty miles completed?

Mr. Wiener: Completed some time this year, in 1910.

Examiner Burchmore: This railroad company was incorporated in 1900. Were the articles of incorporation entered into in accordance with the state laws governing the incorporation of railroad companies?

Mr. Wiener: General railroad law of Texas.

Examiner Burchmore: Then this is incorporated as a common carrier railroad?

Mr. Wiener: It is incorporated as a common carrier railroad.

2049 Examiner Burchmore: Has it held itself out in that capacity to the public from the beginning?

Mr. Wiener: It did.

Examiner Burchmore: When did it first begin to receive divisions out of joint through rates on lumber?

Mr. Wiener: I think at the time of its incorporation or very shortly thereafter. I don't remember exactly, it is a long time ago.

Examiner Burchmore: Were those divisions substantially the same as the present divisions it receives?

Mr. Wiener: I think they are identically the same via the Cotton Belt as they are today. I do not think there have been any changes.

Examiner Burchmore: Did you receive any divisions at that time from the Houston East & West Texas.

Mr. Wiener: We did not.

Examiner Burchmore: When were the Houston East & West Texas Divisions established?

Mr. Wiener: Some years ago, I don't remember.

Examiner Burchmore: Was it in 1905?

Mr. Wiener: Oh, long about 1895 or 1896, I don't remember the exact date.

2050 Examiner Burchmore: What was the total capital stock of this road when incorporated?

Mr. Wiener: Authorized $75,000; issued $55,000.

Examiner Burchmore: Has there been any issuance of capital stock since the organization?

Mr. Wiener: There has not.

Examiner Burchmore: So that the present outstanding stock holdings aggregate $55,000?

Mr. Wiener: That is correct.

Examiner Burchmore: Now was that $55,000 of stock issued for cash?

Mr. Wiener: There was no actual exchange of cash. We considered it a cash transaction. It was a bookkeeping transaction in fact.

Examiner Burchmore: Did not that amount as a matter of fact to a dividend on the stock of the lumber company stockholders, in substance?

Mr. Wiener: In substance it did. It was handled as a payment and repaid to the lumber company for the railroad.

Examiner Burchmore: The stockholders of the lumber company received shares of stock in the lumber company for which they did not actually pay in any cash?

2051 Mr. Wiener: Well it came—they had a surplus there to their credit with the lumber company and it was handled through the books of the lumber company.

Examiner Burchmore: Then the financing of this road was somewhat similar to that of a number of others which we have already examined?

Mr. Wiener: I presume so.

Examiner Burchmore: The president of the lumber company and the president of the railroad company are the same person?

Mr. Wiener: They are.

Examiner Burchmore: The same is true of the vice-president?

Mr. Wiener: That is true.

Examiner Burchmore: And the general manager?

Mr. Wiener: The vice-president and general manager are the same; one person in each instance.

Examiner Burchmore: The secretary and treasurer of each company is the same?

Mr. Wiener: That is correct.

Examiner Burchmore: And the auditor of the railroad company is the auditor of the lumber company?

Mr. Wiener: No, we have no auditor for the lumber com-

2052 pany, but the secretary and treasurer and auditor of the railroad company is secretary and treasurer of the lumber company.

Examiner Burchmore: Has either company any additional officers?

Mr. Wiener: The general attorney is all.

Examiner Burchmore: Well, the general attorney is not paid an annual salary, is he, by either company?

Mr. Wiener: He is paid an annual salary, yes.

Exminer Burchmore: Which of these officers of the railroad company receives salaries from that company?

Mr. Wiener: All of them.

Examiner Burchmore: What are those salaries?

Mr. Wiener: Fifty dollars a month each, the president, vice-president, general manager, and secretary-treasurer.

Examiner Burchmore: Do they all render the same service to the railroad company?

Mr. Wiener: That is supposed to be approximately for the proportion of their time that is taken. The time for the last six months or so in some instances, the railroad company has got more than its share of their time, but it is supposed to average the time they employ for the railroad company.

2053 Examiner Burchmore: Those salaries are not excessive for the services rendered, however?

Mr. Wiener: I do not think so.

Examiner Burchmore: As a matter of fact the services rendered by the president are almost nominal, are they not?

Mr. Wiener: Why, nominal; he is present at conferences and discussions of railway policy and things of that kind, but the actual work that he does is very nominal.

Examiner Burchmore: Do the stockholders of the lumber company actually convene in annual meetings?

Mr. Wiener: Yes, sir; we are all right there, in daily meeting you might say; we all live right there, or the majority of us.

Examiner Burchmore: This is a standard gauge line?

Mr. Wiener: It is.

Examiner Burchmore: What is the weight of the rail?

Mr. Wiener: Principally 35 pounds; there is a very little 30 pound and some 40 pound, but it is principally 35 pound rail.

Examiner Burchmore: Is it ballasted?

Mr. Wiener: Just in natural dirt ballast, well surfaced.

2054 Examiner Burchmore: Any cuts and fills on the line?

Mr. Wiener: Yes, a good many.

Examiner Burchmore: Does this road run uphill and down dale or is the country level?

Mr. Wiener: To a certain extent it is level. The first few miles built before its incorporation there was not so much of that work done, but in the last eight or ten months we have changed some of the old cuts and fills and spent $5,600.

Examiner Burchmore: Do you cross any streams?

Mr. Wiener: Yes, quite a number of them.

Examiner Burchmore: The bridges are substantial?

Mr. Wiener: We have one bridge approximately 2,000 feet which is the best bridge crossing the river. There are four, the H. E. & W. T., and the T. & N. O., and ours, and we have as good a bridge as any one.

Examiner Burchmore: The road is constructed in substantially the same way that the main or branch lines of the longer carriers in Texas are constructed?

Mr. Wiener: Yes, sir, it is. There may be some differences, some of them may have a bigger percentage of grading and some less, but the general character, there are no rock ballasted roads
2055 through there, and they are all about the same manner of construction.

Examiner Burchmore: But on the whole the construction of this road is good?

Mr. Wiener: Yes, sir; we so consider it.

Examiner Burchmore: Have you any station buildings?

Mr. Wiener: Not completed except a freight warehouse at Keltys.

Examiner Burchmore: That is a small warehouse?

Mr. Wiener: That is a small warehouse for handling freight.

Examiner Burchmore: That warehouse as a matter of fact is in a building owned by the lumber company, is it not?

Mr. Wiener: Well, it is a building built on the right of way of the railroad company and belongs to it.

Examiner Burchmore: What do you store in that warehouse?

Mr. Wiener: We store any outbound freight that may be tendered the railroad company, and if the railroad company has anything they store in it; they store different materials in it at different times.

Examiner Burchmore: As a matter of fact there is not very much freight stored in that, is there?

2056 Mr. Wiener: If there is a shipment of freight to go out it is usually taken down in the evening to that warehouse and loaded on the train next morning.

Examiner Burchmore: Do you use the station buildings of the Houston East & West Texas or the Cotton Belt system for any purpose?

Mr. Wiener: The Cotton Belt has no station at Keltys. We have up with them now the question of a joint passenger and freight depot at Keltys. They have none there and we have asked them if it would suit them to avoid doubling expense to build a joint station.

Examiner Burchmore: Have you any track scales on the road?

Mr. Wiener: No track scales on the road.

Examiner Burchmore: You have no means of weighing carload freight?

Mr. Wiener: We have no means of weighing carload freight; we take connection weight.

Examiner Burchmore: How many locomotives have you on this road?

Mr. Wiener: One.

Examiner Burchmore: Is that all?

2057 Mr. Wiener: That is all now. There have been some changes since the report of your Special Examiner.

Examiner Burchmore: You formerly had four locomotives?

Mr. Wiener: We formerly had four locomotives.

Examiner Burchmore: What became of the other three?

Mr. Wiener: We sold them to the lumber company.

Examiner Burchmore: How many cars do you own and operate?

Mr. Wiener: We own now one passenger car and three box cars and have bought one standard caboose, and have under lease one flat car.

Examiner Burchmore: When did you purchase that passenger car?

Mr. Wiener: We made a deal for its purchase some time in the spring or early summer; it was actually delivered to us about, I think, the 1st of October.

Examiner Burchmore: Is that passenger car a regular passenger car, or is it a freight car with windows cut in it?

Mr. Wiener: It is a regular passenger car. The reason we were delayed, the railroad we bought it from said they could not take it out of their passenger service and they delayed us for two
2058 months. It was in the T. & N. O. or the H. & T. C. passenger service.

Examiner Burchmore: What use is made of that?

Mr. Wiener: It is used in daily operation of a mixed passenger and freight train.

Examiner Burchmore: Have you any other rolling stock beside that referred to?

Mr. Wiener: I think of nothing else.

Examiner Burchmore: No motor cars?

Mr. Wiener: No.

Examiner Burchmore: No hand cars?

Mr. Wiener: Yes.

Examiner Burchmore: Are they used by the lumber company at any time?

Mr. Wiener: I think not; not to my knowledge: they are not supposed to be.

Examiner Burchmore: Is your equipment supplied with the proper and necessary couplers and air brakes?

Mr. Wiener: The railroad company's equipment is supplied with the equipment prescribed by the Safety Appliance Acts, so far as we know them.

Examiner Burchmore: Mr. Walter, in connection with this last company it was stated, and I neglected to amplify it after-
2059 wards, then it was not necessary to equip those logging cars with safely couplers because the Act makes an exception in favor of logging cars. That is not true, however of the locomotives. As I understand it, locomotives must be equipped with airbrakes and couplers, unless they are used solely for the hauling of log cars containing only logs.

Mr. Walter: That is right.

Examiner Burchmore: And the statements made by the witness for that company indicate that they sometimes haul other kinds of freight in their trains besides logs, so it would appear their locomotive ought to have some safety device.

Mr. Walter: I think as to the locomotive it has driving wheel brakes and proper couplers itself, but so far as the train line is concerned, it has not any.

Examiner Burchmore: The locomotive then is properly equipped?

Mr. Walter: I think it is. I will find out later and let you know.

Examiner Burchmore: I suggest you look into it. It is not necessary to inform us in this record.

Mr. Wiener: I would state that the safety appliance
2060* inspector of the Commission has been over our line at one time inspecting our equipment.

Examiner Burchmore: And the result of that inspection was not any prosecution for violation of law?

Mr. Wiener: No, so far as his statement to me, I think he found us satisfactory at that time.

Examiner Burchmore: Are there any private train lines or logging roads connecting with this road not owned or operated by it?

Mr. Wiener: There are logging lines connecting at Naclina.

Examiner Burchmore: Are those lines owned by the railroad company or by the lumber company?

Mr. Wiener: By the Angelina County Lumber Company.

Examiner Burchmore: What is the extent of those lines?

Mr. Wiener: They only have at the present time I think fifteen miles of rail, or possibly more; sometimes it is all down and sometimes only a portion is in operation.

Examiner Burchmore: Who owns the steel?

Mr. Wiener: The Angelina County Lumber Company.

Examiner Burchmore: Did they buy that steel from this railroad company?

Mr. Wiener: No.

2061 Examiner Burchmore: How many section gangs has the Angelina & Neches River Railroad at work?

Mr. Wiener: They have really three. They have been operating under one foreman and a sub-foreman, two gangs, and we call it one, and they have another gang.

Examiner Burchmore: Do they work at any time on the tracks of the lumber company?

Mr. Wiener: Not to my knowledge. If they do a bill would be rendered against the lumber company for the time they spent on those tracks.

Examiner Burchmore: What would be the basis of the bill?

Mr. Wiener: The cost of the service. However, I have no recollection of any such transaction.

Examiner Burchmore: Has the railroad any station employees?

Mr. Wiener: It has one agent.

Examiner Burchmore: At Kelty's?

Mr. Wiener: At Keltys.

Examiner Burchmore: He is also employed by the lumber company?

Mr. Wiener: He is an employee of the lumber company. In the past his railroad service has been nominal.

2062 Examiner Burchmore: And when he works for the railroad company he does not leave his lumber company desk?

Mr. Wiener: No, the office has been, I will state for your benefit possibly, or for your records, there have been some changes in those

matters lately on account of the increased mileage and so forth, and we are changing those matters considerably.

Examiner Burchmore: You say three of those locomotives formerly owned by the railroad company were sold to the lumber company. What was the payment?

Mr. Wiener: We sold them the three locomotives and all of the logging equipment, at a price based upon cost less depreciation.

Examiner Burchmore: How did you figure depreciation?

Mr. Wiener: Upon the basis of our report to the Interstate Commerce Commission.

Examiner Burchmore: Well, does this railroad now own no logging cars?

Mr. Wiener: It owns no logging cars.

Examiner Burchmore: The lumber company operates its own private spur tracks?

Mr. Wiener: It does.

2063 Examiner Burchmore: They are not operated by the railroad company?

Mr. Wiener: They are not operated by the railroad company.

Examiner Burchmore: Where do they keep the locomotives at night?

Mr. Wiener: They keep them in the woods, the spur locomotives in the woods.

Examiner Burchmore: Do these locomotives run back and forth over the line of the railroad company?

Mr. Wiener: Sometimes. One of those now hauls logging trains.

Examiner Burchmore: Do you refer to the locomotive still owned by the railroad company?

Mr. Wiener: No.

Examiner Burchmore: One of the other three?

Mr. Wiener: One of the other three.

Examiner Burchmore: How long has this lumber company been operating its own rails?

Mr. Wiener: It has been operating its own logging spurs always, except a portion of the main line spur, as they call it, and there was one time during the last fiscal year it was discontinued,

2064 when the railroad company operated for the lumber company a portion of its logging spur.

Examiner Burchmore: About seven miles?

Mr. Wiener: About seven miles.

Examiner Burchmore: When did they discontinue that operation?

Mr. Wiener: With the purchase of that seven miles of the additional track.

Examiner Burchmore: The railroad company purchased the seven miles?

Mr. Wiener: The railroad purchased the seven miles; yes, sir.

Examiner Burchmore: What did they pay for the seven miles?

Mr. Wiener: They purchased seven and a fraction miles and paid fifty thousand dollars for it.

Examiner Burchmore: Did the road cost but fifty thousand dollars to build, seven miles?

Mr. Wiener: I think it cost considerably more. There is one mile that represents over eighteen thousand dollars.

Examiner Burchmore: Then the lumber company sold this mileage for less than cost?

2065 Mr. Wiener: I think so. We attempted to make an estimate as close as we could and we arrived as near as we could at fifty thousand dollars, but there were several years' upkeep of that track, that improved the track and was not included in that estimate.

Examiner Burchmore: Did the railroad company pay for that seven miles of the track at the time, or did it assume an indebtedness to cover the purchase price?

Mr. Wiener: They executed an indebtedness; they did not assume an indebtedness; they executed an indebtedness.

Examiner Burchmore: In the form of bonds or notes?

Mr. Wiener: In the form of a vendor's lien note.

Examiner Burchmore: What is the amount of that note?

Mr. Wiener: Fifty thousand dollars.

Examiner Burchmore: Any other indebtedness between the lumber company and the railroad company except current liabilities?

Mr. Wiener: There is a current account; I do not know the exact figures; I think around twenty thousand dollars today that the railroad company owes the lumber company.

Examiner Burchmore: In addition to the fifty thousand dollars?

2066 Mr. Wiener: In addition to the fifty thousand dollars.

Examiner Burchmore: They have not paid any part of that fifty thousand dollars?

Mr. Wiener: No, it is not due yet.

Examiner Burchmore: It is the intention however to pay that out of net earnings?

Mr. Wiener: Either out of net earnings or bonded indebtedness or increased capital stock.

Examiner Burchmore: Has the railroad any bonds?

Mr. Wiener: It has not, except that fifty thousand dollars reported as bonded indebtedness.

Examiner Burchmore: Has this railroad any passenger or mail train service?

Mr. Wiener: It has.

Examiner Burchmore: Give the particulars of that service and state whether it is under a published schedule.

Mr. Wiener: Yes, sir; we are operating a mixed passenger and freight schedule under a published schedule.

Examiner Burchmore: That only operates between Keltys and——

Mr. Wiener: There is our published schedule.

(Handing paper.)

2067 (The paper so offered and identified was received in evidence and thereupon marked Angelina & Neches River Rail-

road Exhibit No. 1, Witness Wiener, received in evidence December 15, 1910, and is attached hereto.)

Mr. Wiener: It operates through to the end of the line over the entire mileage, 19.89 miles. We operate one train each way a day.

Examiner Burchmore: Does that train make any connection with the passenger trains of other companies?

Mr. Wiener: It leaves Keltys in the morning about fifteen minutes after the arrival of the Cotton Belt train and returns about ten minutes before the arrival of the Cotton Belt train going in the opposite direction.

Examiner Burchmore: It does not connect with the Houston East & West Texas trains?

Mr. Wiener: No, it does not.

Examiner Burchmore: Or the Texas & New Orleans train?

Mr. Wiener: It does not.

Examiner Burchmore: In addition to this mixed train do you run any freight train service?

Mr. Wiener: None.

Examiner Burchmore: How many cars are there in this
2068 mixed train?

Mr. Wiener: There is a passenger car and we expect to have a caboose in that service as soon as it arrives, and we use whatever freight cars are necessary for the handling of the business.

Examiner Burchmore: And logging cars?

Mr. Wiener: No logging cars.

Examiner Burchmore: How do the logging cars get down to the mill?

Mr. Wiener: At the present time they are operated by the lumber company.

Examiner Burchmore: That is under some form of trackage agreement?

Mr. Wiener: That is under a trackage agreement.

Examiner Burchmore: Then as I understand the logs which are cut up in the woods are loaded on logging cars belonging to the lumber company?

Mr. Wiener: That is correct.

Examiner Burchmore: And hauled by the lumber company engines, operated by its employees, down to the mill?

Mr. Wiener: They are hauled by the lumber company's engines
2069 first to the connection with the railroad, and there another lumber company engine operated by the lumber company's employees brings those log cars into Keltys.

Examiner Burchmore: Is there any written agreement covering this trackage?

Mr. Wiener: There is a written agreement covering this trackage?

Examiner Burchmore: Is it filed with the Commission?

Mr. Wiener: I think not.

Examiner Burchmore: Will you file it in connection with your testimony in this case?

Mr. Wiener: Yes, I will file a copy. You want a copy of our trackage agreement?

Examiner Burchmore: What is the basis of the computation for that trackage right?

Mr. Wiener: It is based upon 50 cents per thousand feet log scale for the logs handled over the road.

Examiner Burchmore: That I assume amounts to about one cent per hundred pounds on the lumber out?

Mr. Wiener: Fifty cents per thousand feet log scale I expect will amount to a fraction over it.

Examiner Burchmore: About one and one-half cents per
2070 hundred pounds.

Mr. Wiener: It would average one and a half to two cents.

Examiner Burchmore: That has not been paid, though, only for the last few months.

Mr. Wiener: Prior to that time the railroad company brought the logs to the mill.

Examiner Burchmore: From the junction of the small spur track?

Mr. Wiener: Well, they operated, I should say, between five and six miles of the track owned at that time by the lumber company. They ran their engine over it and their logging trains and brought the logs over that track and the twelve and a half miles then belonging to the railroad company into Keltys.

Examiner Burchmore: How did the logs get from the tree up to the point where the railroad company took them?

Mr. Wiener: Over tracks belonging to the lumber company.

Examiner Burchmore: But they were hauled by engines
2071 belonging to the railroad company?

Mr. Wiener: Owned by the railroad company but operated by employees of the lumber company.

Examiner Burchmore: And what payment was made for the use of those locomotives?

Mr. Wiener: We made one payment to cover the use of the locomotives in the operation of that track for one dollar per thousand feet.

Examiner Burchmore: That was one dollar from the tree to the mill?

Mr. Wiener: To the connection with the main line at Alco.

Examiner Burchmore: What did you charge from Alco to the mill?

Mr. Wiener: Our tariff provided that the outbound division should cover that charge.

Examiner Burchmore: Then you formerly received one dollar per thousand feet plus a certain part of your division that was received from the Cotton Belt Railroad Company?

Mr. Wiener: That is correct.

Examiner Burchmore: At the present time you do not touch the logs to the mill at all?

2072 Mr. Wiener: At present we are not.

Examiner Burchmore: But you receive fifty cents per thousand for the use of your tracks?

Mr. Wiener: Yes, sir.

Examiner Burchmore: Is any other use made of those tracks?

Mr. Wiener: Only for the operation of the railroad company's train.

Examiner Burchmore: What are your earnings from the operation of that train?

Mr. Wiener: Of the railroad company's train?

Mr. Examiner Burchmore: Yes. Are they considerable in amount?

Mr. Wiener: It seems to me they are going to be very much more than we first thought. I have the figures here for the first twenty-one day's operation of that train and the passenger earnings were $114.60.

Examiner Burchmore: Well, everybody was curious to ride on the passenger trains?

Mr. Wiener: No, there was no particular curiosity, but the country we are opening up is pretty well settled; we are into a thickly settled farming section. The freight earnings were $214.97.

2073 Mr. Cowan: What was the date of that twenty-one days?

Mr. Wiener: From November 7th to November 30th, that is twenty-one days' operation. We operate every day except Sunday.

Examiner Burchmore: That train has only been running about a month.

Mr. Wiener: After the 7th of November.

Examiner Burchmore: Before that you had no passenger service?

Mr. Wiener: We had no passenger service previous to that day.

Examiner Burchmore: Do you handle the United States mail?

Mr. Wiener: Not at present.

Examiner Burchmore: You are negotiating for that with the government?

Mr. Wiener: We are figuring and have been requested to make application. I have been requested personally to write up a form for some of the citizens whose post office is about a mile from the end of our track for the location of the post office on our road at Naclina, and they expect us to handle the mail when they get the post office established.

2074 Examiner Burchmore: Any express companies operating over your line?

Mr. Wiener: No.

Examiner Burchmore: Is it contemplated?

Mr. Wiener: If any one of them will make us a proposition that they want the business we will be glad to make an arrangement with them. I do not know whether the express company will consider it worth while or not. We handle it as a freight proposition now.

Examiner Burchmore: Do these passengers pay cash fare on the train or do they have tickets?

Mr. Wiener: The conductor carries a regular cash slip.

Examiner Burchmore: But you will sell tickets?

Mr. Wiener: We have tickets in stock and are awaiting the erection of station facilities.

Examiner Burchmore: You are going to erect some stations?

Mr. Wiener: As I have stated, we have proposed to operate a joint

station with the Cotton Belt at Keltys and we have requested the Houston East & West Texas to give us trackage privileges into the town of Lufkin with our trains.

2075 Examiner Burchmore: How far is Lufkin from the junction?

Mr. Wiener: I think one and three-quarter to two miles.

Examiner Burchmore: There are some other tap lines which run into Lufkin, are there not?

Mr. Wiener: There are three or two of them.

Examiner Burchmore: Do you propose to make joint traffic arrangements for passenger traffic with these other lines?

Mr. Wiener: We do not figure to have joint arrangements. We only expect to sell local tickets.

Examiner Burchmore: You do not expect to run your trains down beyond Lufkin?

Mr. Wiener: No, not at the present time.

Examiner Burchmore: Lufkin is the county seat?

Mr. Wiener: Lufkin is the county seat.

Examiner Burchmore: And quite a city?

Mr. Wiener: Yes, we figure five or six thousand.

Examiner Burchmore: Are there any towns on your present line?

Mr. Wiener: Outside of Keltys we have a station known as Alco which was the terminus of the road for some time. That has a small population and some farming settlement around the town,

2076 and the store there at present is owned by the lumber company but that is not expected to be continued. There is quite a settlement there, and at Naclina we have a town which is primarily a lumber company town but it is close into the river bottom where there are quite a number of farms.

Examiner Burchmore: What was your total freight tonnage for the last fiscal year?

Mr. Wiener: I have got that, Mr. Examiner, only approximately.

Examiner Burchmore: Well, the approximation will do.

Mr. Wiener: The approximate tonnage of lumber and logs—do you want them separately or together?

Examiner Burchmore: Separately and together.

Mr. Wiener: The approximate lumber tonnage was about 26,000 tons and the approximate log tonnage I believe 50,000 tons, and there was some other tonnage, very nominal, of other commodities.

Examiner Burchmore: Less than one per cent of your tonnage was other than lumber and logs?

Mr. Wiener: Less than one per cent of the interstate tonnage was, yes, sir.

2077 Examiner Burchmore: How much of that one per cent was handled on account of your company stores?

Mr. Wiener: I suppose at that time practically all of it was on account of the lumber company's business, the greater portion of it anyhow.

Examiner Burchmore: Is it not a fact that so far, or at least until recently your entire traffic was supplied by these controlling interests?

Mr. Wiener: Approximately all of it.

Examiner Burchmore: Well, there was not enough other traffic to be counted?

Mr. Wiener: Not enough freight traffic to cut any figure in the operation of the road.

Examiner Burchmore: An officer of your company stated to the Examiner when in the field that you did not handle anything except for the lumber company. Is that so?

Mr. Wiener: Possibly. I think I talked to the Examiner myself.

Examiner Burchmore: Well, you made some such admission?

Mr. Weiner: Well, we handled some other stuff, yes, but very nominal, not worth taking into account at that time. We handled anything that was tendered us, but until the extension of the
2078 line there was nothing else tendered to us.

Examiner Burchmore: And that was very recently?

Mr. Wiener: We acquired the additional mileage, I think on June 30th.

Examiner Burchmore: What is the explanation for this change in the practices and methods with respect to handling the logs into the mill?

Mr. Wiener: There are two or three explanations. One is with the increased mileage of our road and the increased business, we expected, we considered that an easier way to handle it.

Examiner Burchmore: Is the Mississippi Valley Railroad present?

Mr. Ziebold: Yes.

Examiner Burchmore: What are your connections?

Mr. Ziebold: The Frisco.

Examiner Burchmore: Through a misunderstanding yesterday, the Commissioner being under the impression that the Mississippi Valley Railway was identical with the Mississippi Valley Railroad, the latter being an Iron Mountain connection, he agreed that the case should be heard this morning. In view of that agreement it will now be called for hearing before Examiner Boyle in
2079 the adjoining room in a few minutes.

Mr. Jeffery: Did you say that is an Iron Mountain connection?

Examiner Burchmore: No, that is a Frisco connection.

What are the other reasons, Mr. Wiener?

Mr. Wiener: One thing that had some little effect on the matter was that the state passed a safety appliance law which copied the Federal law except it did not exempt logging equipment, and while we were advised that possibly as we were in both state and interstate business we would not have to comply with that law, we did not care to disobey it, and that required us to handle logs in standard flat cars equipped with safety appliances. We leased some of those cars and tried the operation and found it very unsatisfactory and the lumber company stated it was unsatisfactory to handle those cars over spurs, therefore it would be more satisfactory for them to purchase our equipment and handle it themselves.

Examiner Burchmore: Why did you buy the seven miles of railroad?

Mr. Wiener: Because they were opening up new settlements of farming country, and we thought it was a piece of track
2080 that would add to the ability of the railroad company to make money.

Examiner Burchmore: Why don't you buy the rest of it?

Mr. Wiener: We have some more road surveyed ahead of us that will be permanent road. The other road is being taken up and laid down. It is not permanent.

Examiner Burchmore: Do you contemplate any extension in the immediate future?

Mr. Wiener: Yes, sir.

Examiner Burchmore: Where are you going?
